SEAMAN'S CLUB: United Seaman's Service, Manila International Seaman's Center, Box 165, Bonifacio Drive, 8th Street, Port Area, Manila, Philippines 1002.

CURRENCY: Philippine Peso.

REGULATIONS: No particular or unusual regulations are observed at the port.

DELAYS: The expected delays are: During inclement weather, some difficulty may be encountered in berthing and when some of the specialised cargo handling facilities have failures.

DEVELOPMENTS: Manila South Harbour Piers (except Pier 13) were rehabilitated in 1991 to 1994, including renovation of transit sheds and installation of new area lighting, the upgrading of Mulle de San Francisco which serves as the immediate access road to pier zones, new street lighting and efficient drainage facilities.

In 1995, the container yard expansion project was completed. By the second quarter of 1996, the construction of an additional berth length at Pier 5 was started.

The cargo handling contractor for South Harbour, Asian Terminal Inc. (ATI), has also constructed and presently operates a land-based Bulk Grain Terminal at their site in Mariveles, Bataan, which is also under the jurisdictional area of the Port District Office of Manila.

Other development projects for Manila South Harbour are contained in the PPA 25-Year Port Development Plan, among which are South Harbour Port Expansion Project (which cover the expansion of Piers 3 and 5), and South Harbour Expanded Port Zone Development Project.

Commitment to Port Development – MICT: The container yard will be expanded by approximately 13 hectares, and an additional back-up area of 8.28 hectares will be developed and is expected to be operational by 2003. A new container freight station will also be built. The wharf extension project, which involves the construction of a fifth berth of about 300 m., complete with rail extension, a depth of 14.5 m and equipped with gantry cranes, was completed and inaugurated in March 1996 and is now in operation. This will increase the berthing capacity of MICT and will boost the volume of container traffic it can handle.

A new reefer rack to accommodate the increasing number of live reefers has recently been completed, and it will provide MICT with approximately 10,000 sq.m. of live reefer storage, accommodating 720 TEUs stacked four high.

The MICT Expansion Project included in the PPA 25-Year Port Development Plan involves the reclamation of water areas along the breakwater. In addition, it will include construction of additional container berths, land development including roads and pavements, construction of vertical structures (e.g. container freight stations), installation of other amenities and appurtenant facilities.

Another important short term development project is the construction of International Container Terminal Services Inc. (ICTSI) of the railway link from the MICT to its inland container depot in Cabuyao, Laguna.

Associated with Jardine Shipping Agencies.

MASBATE, Masbate Island: 12.35 N. 123.31 E.

(See Plan)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the mouth of the channel of Masbate Bay aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within Masbate Pass, but not greater than 500 m. from the mouth of the channel leading to Masbate Bay. The area within the Masbate Bay could only be used during emergencies and typhoons.

MAX. SIZE: LOA 300 m.; Draft 40 ft.

HEALTH: Vessels will clear quarantine on arrival at Masbate Harbour. Quarantine Officers will normally board the vessel once it is inside Masbate Bay.

BERTHING: The entire berth length of the wharf could be utilised for the loading or unloading of cargoes. Length of quay 189.0 m. Width 12 m. Max. depth of water 13.0 m. Quay height above sea level 2 m. at high tide and 4 m. at low tide. Average rate of loading/discharging 20 tons per gang hour.

CRANES: Mobile crane available.

STEVEDORES: Provided by Masbate Consolidated Arrastre, Inc.

MEDICAL: One government hospital and three private hospitals.

FRESH WATER: Not available.

FUEL: All grades obtainable from Caltex depot in the area and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

HATCHES: Opening and closing of hatches are part of the stevedores' work or at the Master's option.

REPATRIATION: All facilities available for crew changes; good sea and air connections.

AIRPORT: 3 km. from port area. One flight to Manila and Legazpi daily.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); Bonifacio Day (November 30th); Special Public Holidays declared by the President of the Republic of the Philippines is also included.

Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and ambulance can be contacted through the local PPA office.
TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (PILTEL).
SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Officer.
GENERAL: Vessels intending to call port at Masbate shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.
DEVELOPMENTS: Extension of the wharf by 80 linear metres.
AUTHORITY: The Supervising Officer, Philippines Ports Authority, Masbate, Philippines. *FAX:* 05221-243-431. *Contact:* Edgar C. Pilar, Port Manager, Legazpi (Tel: 2012).

MASINLOC, Luzon: 15.32 N. 119.57 E.
(Port Closed)

SHIPMASTER'S REPORT: June 1988.

DOCUMENTS:
6 copies Crew List, these being in addition to visaed Crew Lists supplied in advance.
3 copies Stores List.
3 copies Bonded Stores List.
3 copies Crew Declaration.
1 Summary of Ship's Particulars.
1 copy Maritime Declaration of Health.
1 copy Manifest of Transit Cargo.
1 copy each of Passenger List, Livestock, Arms and Ammunition Declaration or "Nil".
Last Port Clearance.

PILOTAGE: Pilot boards in position 15° 33' N., 119° 53' E. In view of the absence of navigational aids (buoys) it is recommended that the vessel waits for the Pilot to fetch the vessel inside to the anchorage. The depth outside is too great for anchoring. We drifted, 8 miles offshore, for a period of 14 hours whilst awaiting the Pilot and experienced very little drift.

The Pilot boards from an outrigger fishing canoe exhibiting a large 'H' flag. For berthing, normal pilotage hours are from 0500 – 1000 hrs., but this may be extended in calm weather conditions. No docking or undocking during the hours of darkness.

The Pilot was competent in berthing the vessel, using a starboard anchor (7.5 shackles out when alongside) and a mooring boat to run lines to the jetty, buoys and dolphins.

ANCHORAGE: The anchorage is about half a mile from the berth in position 15° 32.5' N., 119° 56' E., depth of water 11 fathoms.

Clearance is sometimes carried out at the anchorage.

RADIO: All communications are via Manila Radio as there is no direct link with Masinloc.
VHF: No VHF communications possible with the port or pilot.
BERTHING: The bulk loading jetty is located in position 15° 32.9' N., 119° 56.3' E., depth alongside 31 ft.

Starboard anchor was used for berthing. Lines were run to buoys ahead, astern and starboard quarter. Breast lines were run to dolphins and springs were run to the jetty (See "Plan").

Loading: Loading is by conveyor and shoot which can be deflected slightly forward and aft. Rate 100 tonnes per hour – 120 tonnes per hour.

Access gangway provided from the jetty.

Loading is suspended in heavy rain and hatches are covered.

STEVEDORES: Loading is carried out throughout 24 hours.
MEDICAL: Consultations can be arranged.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: Nearest Consuls are at Manila.
REPAIRS: No facilities available.
SURVEYORS: Based in Manila.
REPATRIATION: Repatriation can be effected through Manila which is about 3 hours by car.
AIRPORT: At Manila.
GENERAL: *Chart:* B.A. Charts No. 3806 (approach), 3559 (plan).
Notice of Arrival: To be sent to Agent in Manila.
Telephones: The nearest telephone is 1.5 hours away by car.
Accommodation: There is a local lodging house, but no air conditioning available so probably more comfortable aboard the vessel.
Stores: Available at local market.

SHIPMASTER'S REPORT: January 1989.

PORT LIMITS: Notice of Readiness tendered showing the time we reached the Pilot Station (Lat. 15° 33' N., Long. 119° 53' E.), and it was accepted without objections.

DOCUMENTS:
8 copies Crew List.
8 copies Passenger List.
3 copies Personal Effects List.
3 copies Stores List.
1 copy Vaccination List.
1 copy Cargo Manifest (cargo to be discharged – obviously always "Nil").

PILOTAGE: Pilot boarding position Lat. 15° 33' N., Long 119° 53' E.

There is only one pilot available. No VHF equipment available. ETA should be sent through Manila Agent.

As all buoys and beacons are missing, the ship can proceed, assisted by Pilot, in daytime only, whether for berthing, unberthing or anchoring.

The latest time the Pilot will board, all year round, is 1800 hrs.

In the calm season, a place for temporary anchorage is located 2 to 3 cables from that recommended by B.A. Pilot. (This one, in my opinion, is too close to the bank).

The Pilot recommends waiting outside and drifting, from April till October, as the anchorage is unreliable.

ANCHORAGE: The inner anchorage can accommodate 2 vessels. During the typhoon season, vessels should seek shelter in other places in the North or in the South.

RESTRICTIONS: Daytime only for berthing and anchoring.

No restrictions for shifting the ship by her own ropes at the wharf, at any time, for loading purposes.

HEALTH: Radio Free Pratique requested in advance, but of no advantage. Authorities boarded for the formalities and the whole process for Free Pratique was performed then.

RADIO: No local radio station; Agent's representative will make contact through his Manila office.

RADAR: Not available.

TUGS: Not available.

BERTHING: Only one berth, owned by Benguet Co., for loading chrome ore, exclusively by shore equipment (See "Plan").

BULK CARGO FACILITIES: There is a conveyor belt feeding a "shuttle". The maximum reach of the shuttle is 48 ft., measured from the outer border of the horizontal fender in the wharf. Its overall length if 57 ft. 3 in.

Onshore, a payloader and bulldozers are used for handling of the ore.

The shuttle can move backward and forward following the axis of the wharf (See "Plan"), somewhat oblique to the fore/aft line of the ship.

There is a flat spout at the end of the shuttle that, according to how it is positioned, permits direct loading in four different fixed directions.

Nevertheless, the trimming of cargo is performed by 15 to 20 men with shovels.

Maximum air draft for the hatch coaming: 35 ft. (low water).

Maximum loading rate: 200 tonnes/hour.

The ore arrives by rail cars from the milling plant some 27 km. away and is stocked while no ship is berthed.

CRANES: No cranes available.

STEVEDORES: Regular employees of Benguet Co., working 24 hours a day.

MEDICAL: For emergency cases there is one hospital 10 km. from the port.

DENSITY: 1022 to 1025.

FRESH WATER: Not available at present.

GANGWAY/DECK WATCHMEN: Compulsory.

REPATRIATION: Through Agents via Manila.

AIRPORT: Ninoy Aquino International Airport (formerly "Manila International Airport").

HOLIDAYS: Only holiday is Good Friday when work ceases from 0700 hrs. – 0700 hrs. the following morning.

POLICE/AMBULANCE: From Masinloc City, 1 km. from the port.

DELAYS: Only delays caused by force majeure (typhoons or another vessel already berthed).

SHORE LEAVE: Shore passes are sufficient, there are no restrictions regarding time. For receiving visitors, Master should ask the Authorities for permission in advance. The best opportunity is during clearance formalities.

GENERAL:
(a) Agents, surveyors, workshops and ship chandlers come from Manila. It is therefore very important to make all arrangements well in advance, even the ETA to Pilot.
(b) Boat service: When at the anchorage, whether for bringing the crew ashore, spares or parts for repair, small boats with 2 stabilizers are commonly used in many places in Philippines. One of these boats is used for handling the first lines to the berth and when shifting ropes from one bit to another.
(c) Length of the pier: 207 ft. 7 in. (bridge and dolphin excluded).
(d) Distance from tunnel portal to pier end: 640 ft. 7 in.
(e) Dredging is in progress. After completion the guaranteed draft will be 34 ft. maximum. Before starting, it was 31 ft.
(f) Maximum permissible draft at LW is 34 ft.
(g) During the stay in port and at the anchorage, 2 Customs Officers live on board; a cabin and meals are required for them.

SHIPMASTER'S REPORT: May 1989.

VESSEL:

LOA:	119.6 m.
Beam:	18.5 m.
D.W.T.:	9,262 tons
G.R.T.:	5,373 tons
N.R.T.:	3,082 tons
Loaded Draft:	Forward: 7.4 m. Aft: 8.3 m.

CARGO: Chrome Ore.

DOCUMENTS: The following are required:

1 copy Last Port Clearance.
6 copies Crew List.
4 copies Crew's Personal Declaration.
4 copies Stores/Narcotics List.
2 copies Animal List.
2 copies Plant List.
2 copies Firearms Declaration.
2 copies Vaccination List.

Derat Certificate should be ready for inspection. If any crew changes then 2 copies of amended Crew List are required.

PILOTAGE: Compulsory for all foreign vessels. Pilotage is restricted to daylight hours, and in good weather only. There are 2 pilots for the port (one was on leave during our call). Pilot boat is a wooden fishing boat with 3 m. long spreaders on either side for boarding. There are many fishing boats in the vicinity and therefore it is difficult to distinguish the pilot boat from other boats. It is only when close by that you notice a small pilot flag on the boat. Pilot has a walkie-talkie with Channel 16 (it was malfunctioning during our call). Pilot boards 1.5 miles North West of Alupihing Point (Salvador Is.). Pilot was very experienced.

ANCHORAGES: Owing to numerous reefs, shallow waters and restricted manoeuvring space it is recommended that vessels remain underway in the offing at least 2 miles off the coast. There was a negligible drift in 4 hours whilst we were awaiting daybreak.

RESTRICTIONS: Port is entered during daylight hours and only in good weather. Buoys No. 1, 2, 3 and 4 are missing. Beacons (wooden piles) exist as marked on the chart (BA. Chart No. 3559). Leading beacons were white slatted top marks with front metal triangles. At present, they are very rusty and are very difficult to sight unless one is dangerously close. I gave the Pilot some white paint so they could be painted. All reefs are noticeable as discoloured water. Please refer to China Sea Pilot for further details. There is very little range of tide at Masinloc.

MAX. SIZE: According to Pilot 32 ft. draft is the maximum. Length of pier is 66 m. only. There is a new pier under construction which is due to be commissioned in July of this year.

HEALTH: Free Pratique is requested by the Agent at Manila. Doctor comes from Manila, remaining quarantine officials operate from Masinloc. Usual inspection is carried out upon arrival.

RADIO: No radio at Masinloc, all communications through Manila Agent.

VHF: No VHF communications available.

RADAR, TUGS: Not available.

BERTHING: Channel is surrounded by tree-covered mountains. Tying up procedure takes about an hour from the first line to the last line. There is only one berth, a T-head concrete pier, 66 m. long with a steel bridge extending at the S.E. end. A dolphin is used for breast lines forward and aft. Loader, red in colour, is stationary with maximum horizontal extension of 14.5 m. Trimming of cargo is done by hand by inexperienced labour. When shifting vessel fore and aft it is very important that vessel remains parallel to pier at all times as there is less water beyond the line of pier. Air draft was 12.2 m. Cargo from this port is chrome ore only. Ore is brought by railway wagons from mines to the storage area, where it is put on to a conveyor belt by earthmovers and finally loaded on to the vessel. Conveyor belt is about 200 m. long. We averaged a load rate of 140 tonnes/hr.

Draft surveyors work out quantities twice a day, along with the Chief Officer.

Shore load scale was found to have a difference of about 2% on the high side. During total loading operation of 70 hours, we had chute trouble for 6 hours and 3.5 hours was utilised in 3 shiftings.

We were port side to with starboard anchor 7 shackles in water.

Notice of Readiness is accepted after holds are passed for loading.

FRESH WATER, FUEL: Not available.

DENSITY: 1023, constant during our stay.

REPAIRS, DRY DOCKS: Not available.

CONSULS: None at Masinloc, only in Manila.

SURVEYORS: Can be arranged from Manila only. Sufficient notice should be given as it is a 5 hour drive.

CUSTOMS ALLOWANCES: 1 bottle of spirits and 200 cigarettes per person.

REPATRIATION: Possible via Manila.

TELEPHONES: Only possible from Subic City (an American Naval Base), which is 120 km. from the port (about 2 hours' drive). Even domestic calls are not possible from Masinloc.

SHORE LEAVE: Allowed. Shore passes are issued and must be carried at all times.

GENERAL: Watchmen (2) are recommended by the Agents, though I found the port safe in all respects. 2 Customs Officers stay on board at all times, accommodation and food is to be provided. No ship chandlers at Masinloc. No deck or engine stores available, same can be arranged through Manila Agent, but would be expensive owing to transportation costs. Some fresh provisions can be purchased at Olangapo City, 140 km. from port (20 km. from Subic City). Seafood was relatively cheap compared with other places. Masinloc is a small town with a few ordinary hotels, accommodation is always available. Main mode of transportation is bus.

AGENT: There are no agents at Masinloc. Agent comes from Manila and remains at Masinloc during vessel's stay and is available whenever required.

AUTHORITY: Philippines Port Authority (PPI).

MATI, Mindanao: 06.56 N. 126.14 E. (See Plan)

SHIPMASTER'S REPORT: August 1990.

Also see "Davao".

DOCUMENTS: Entry formalities require 30 officials to clear vessel, and 6 copies of the following are required (these stapled together into small booklets to reduce confusion, with all officials taking papers simultaneously).

(a) Customs Inward Foreign Manifest.
(b) Ship's General Particulars and Information.
(c) List of Ports of Call.
(d) Crew List.
(e) Crew's Declaration Manifest.
(f) Ship's Bonded Stores List.
(g) Ship's Provisions List.
(h) Arms and Ammunition List – Nil.
(i) Animal List – Nil.
(j) Plants List – Nil.
(k) Mail List – Nil.
(l) Currency List – Nil.
(m) Passenger List – Nil.

Note: (h) to (m) can be included on one list to save paper.

APPROACHES: As it was the vessel's first visit, arranged arrival time to coincide with sunrise for approach into Pujada Bay. No navigational marks or aids seen at all.

Radar parallel index approach is possible, as land on either side steep to and good radar targets, as are Pujada and Uanivan Islands.

Pujada Bay is over 200 fathoms deep in places with plenty of space. Vessel entered Bay, and altered to leave a conspicuous white building (shown as "Mill" on chart, and is an old plywood mill, redundant) ahead.

Numerous small fishing pirogue dug-outs in Bay.

Actual loading berth is a dark, pyramid shed, with 3 oil tanks adjacent, which lie further to starboard.

PILOTAGE: Pilot comes from Davao, which is 4 hours away by bus, so plenty of advance warning to agent required. Vessel's Agent in Manila, so everything co-ordinated from there.

No VHF facilities to contact anyone locally.

ANCHORAGES: Anchoring not recommended without extensive local knowledge, as require to be close to shore, and there are underlying reefs off the town of Mati.

Vessel stopped, and waited for Pilot just inside the 100 fathom line, which is about 1.5 miles off the berth.

RESTRICTIONS: Do not shift too far ahead or astern when changing holds, as reef astern and shallow water ahead.

MAX. SIZE: 18,000 g.r.t. (about 180 m. LOA).

TUGS: None available locally. Tug available from Davao, but has to be ordered via Manila, and lots of paperwork required.

BERTHING: Pilot comes out in small yellow coloured boat, with top speed about 3 knots. This boat then serves as line handling boat for berthing, so vessel has to wait for it to return to berth before approaching.

Berth in daylight only and with no wind, any wind over 3 knots would be too dangerous. Use port anchor and berth port side to. Anchor will run to about 3.5 – 4 shackles, and great care should be taken, so as not to snatch bow and pull stern up onto reef.

Send spring first onto dolphin.

Best to let vessel pass final position, then bring back on lines once alongside, as reef also close astern (See "Plan").

STEVEDORES: All are copra mill employees and arranged by same through Agent. All pellets trimmed by hand.

CARGO: Coconut by-products; expeller pellets (by extraction method) and the oil (palm/coconut) from the process.

Bulk cargo as pellets and oil, both from same berth, by a conveyor belt running out from shore with a pipeline beneath, to a small elevator dolphin.

A smaller jetty alongside serves coastal vessels discharging the copra (coconut kernels), using a mobile crane into a lorry.

LOADING: A maximum airdraft to coaming of 39 ft. is required by mill, but vessel estimates 40 ft. 06 in. would have been possible (height of tide about 4 ft. at the time).

From dolphin loading tower, there is a fixed loading arm, the end spout of which can be manipulated by ship's crane to give some trimming.

Vessel has to shift under loading arm to load other holds, and would only permit loading up to No. 2 hold (vessel 180 m. LOA), as to load No. 1 would have put ship very close to reef astern. Similarly, to load No. 5 would have put vessel too close to shallow water ahead.

Loading rate of 90 t.p.h. – 100 t.p.h., as governed by pay-loader in shed feeding conveyor.

DENSITY: 1024.

FRESH WATER: Available by barge from Davao, but expensive. Coasters supplied by fire engine from mill.

FUEL: By barge from Davao.

FIRE PRECAUTIONS: No smoking on deck.

CONSULS: None locally.

REPAIRS: No facilities available.

SURVEYORS: None locally. Surveyor came from Manila to do On-Hire Survey and Draft Survey, and remained on board for surveys at other ports.

HATCHES: Operated by crew, and closed at first sight of rain, so cargo did not get wet.

WATCHMEN: Employment of local armed watchmen strongly advised as a deterrent. Ship's crew also used.

AIRPORT: Nearest airport at Davao.

SHORE LEAVE: No restrictions. Shore passes not required.

GENERAL: *Chart:* B.A. Chart No. 415.

Gangway: Access extremely difficult, as only loading tower dolphin connected to shore and insufficient space on this to use B.O.T. Gangway, etc. Crew had to climb up onto overhanging loading arm, or down pilot ladder onto some part of loading tower structure.

Stores: Very difficult to get through mill gate, and to get onto vessel equally difficult. Small amounts of fresh provisions possible via dug-out, but quality questionable.

SHIPMASTER'S REPORT: January 1991.

LOCATION: Approximate position of copra loading berth: Lat. 06° 56.0' N., Long. 126° 14.2' E., about 3 km. S.E. of the town of Mati.

DOCUMENTS:

Prepared by Agent:
- 12 copies Inward Foreign Manifest.
- 12 copies Outward Foreign Manifest.
- 12 copies Oath of Master.

Prepared by vessel:
- Last Port Clearance.
- 8 copies Crew List.
- 3 copies Stores List.
- 3 copies Personal Effects List.
- 3 copies Animals List (even if 'nil').
- 3 copies Arms and Ammunition List (even if 'nil').
- 3 copies Plants List (even if 'nil').
- 3 copies Narcotics List (even if 'nil').
- 3 copies Passengers List (even if 'nil').
- 3 copies Ports of Call List.
- 1 copy Ship's Particulars.

If Mati is the first Philippine port:
- 1 copy Health Declaration.
- 2 copies Vaccinations List (Cholera and Yellow Fever).

PILOTAGE: Compulsory and during daylight only.

The Pilot prefers daybreak for berthing and unberthing as there is normally no wind at that time.

The Pilot boards from a small orange coloured, open boat about 1.5 miles off shore. Vessels should wait for the Pilot at the 100 fathom line shown on B.A. Chart No. 415.

There is no VHF link with the pilot boat or shore. The Pilot comes from Davao (about 4 hours by bus) and must be ordered via agents.

ANCHORAGES: The Pilot advises that there are no safe anchorages for larger vessels.

RESTRICTIONS: Pilot advises maximum sailing draft is 14 m.

BERTHING: The berth consists of 3 concrete platforms in line with a distance of 60 m. between them. A fixed conveyor is installed on the central platform. Berthing is port side to.

There is a platform for the stern lines behind the first platform, about 60 m. to 80 m. away in a Northwesterly direction. In front of this platform is very shallow water which extends over the berth range. There is also a shallow water area in front of the whole berth, the Westerly end being marked by a cone buoy. This area is shown on B.A. Chart No. 415 with the symbol of underwater rock and stake. This area is wider than that shown on the chart. The distance between both shallow areas is 142 m., as advised by the Pilot, and the vessel has to berth/unberth at an angle of 30° to 40° to the platforms to avoid the shallow areas. The starboard anchor, with upto 4 shackles, will be used for berthing.

When unberthing the vessel goes astern dragging the anchor with one shackle until the bow is clear of the coned buoy. The vessel can then swing to starboard until Tataidaga Point is right ahead (about 222°). This heading should then be maintained until the vessel is 2.5 miles off Tataidaga Point when the vessel is then clear from the shallow water on the port side and can then proceed directly out to Pujada Bay.

MEDICAL: Facilities at Mati.

FRESH WATER: Available, but analysis should be carried out as the Agent advises that sometimes fresh water is mixed with sea water.

REPAIRS: Very small repairs possible at the factory workshop.

NASIPIT (Including Masao and Butuan), Mindanao: 09.06 N. 125.22 E. (See Plan)

See "General" before first port.

(Port Management Office of Nasipit) PMO-Nasipit presently covers the Baseport of Nasipit, PTO-Butuan and PTO-Masao.

PORT LIMITS: From Diwata Point up to the coastal limits at Bolo-Bolo Point, the territorial boundary between the Provinces of Agusan del Norte and Surigao del Norte.

DOCUMENTS:
- 3 Crew Lists.
- 3 Passenger Lists.
- 2 Stores Lists.
- 2 Stowage Plans.
- 2 Personal Effect Lists.
- 3 Inward and Outward Cargo Manifests.
- 1 Ship's Information sheet.
- 1 Statistical Supplement.
- 1 Cargo Bill of Lading, if any.

PILOTAGE: Compulsory.

ETA: Ocean going vessels – 24 hours' notice.
Coastal vessels – 12 hours' notice.

Pilot Boat Description: Upper structure white; lower structure black with a letter "P" at the bow. During night time, when a vessel requires a Pilot, particular light used is permanent red at the uppermost portion of the boat and a flashing white light.

Location of Pilot Station: Masao Harbour Pilot Association, 2nd Floor, St.Joseph Drugstore Building, Corner Lopez Jaena and Concepcion Streets, 8600 Butuan City.

For the Port of Masao, situated at Barangay Lumbocan, Butuan City, there is no alternative area in the event of bad weather as it is an open sea. However, at the Baseport of Nasipit, vessels can seek shelter during bad weather because of its natural cove which protects the vessels against strong winds and heavy seas.

Pilot Boarding Station:

Nasipit – One nautical mile N.E. of Nasipit Lumber Company Lighthouse, port side from seaward of the Nasipit Cove entrance.

Masao and Butuan – Two nautical miles North of the Pilot Station Tower at Barrio Lumbocan, Butuan City.

ANCHORAGES: Depth of safe anchorage: 20 m. – 75 m. deep along the shore line.

Masao Anchorage Berth:

Anchorage No. 1:	Lat. 9° 01' 05" N.,	Long. 125° 29' 50" E.
Anchorage No. 2:	Lat. 9° 01' 00" N.,	Long. 125° 29' 40" E.
Anchorage No. 3:	Lat. 9° 00' 55" N.,	Long. 125° 29' 30" E.
Anchorage No. 4:	Lat. 9° 00' 45" N.,	Long. 125° 29' 20" E.
Anchorage No. 5:	Lat. 9° 00' 35" N.,	Long. 125° 29' 00" E.
Anchorage No. 6:	Lat. 9° 01' 15" N.,	Long. 125° 29' 45" E.
Anchorage No. 7:	Lat. 9° 01' 10" N.,	Long. 125° 29' 35" E.
Anchorage No. 8:	Lat. 9° 01' 04" N.,	Long. 125° 29' 25" E.
Anchorage No. 9:	Lat. 9° 00' 55" N.,	Long. 125° 29' 05" E.
Anchorage No. 10:	Lat. 9° 00' 50" N.,	Long. 125° 28' 55" E.

RESTRICTIONS: Port of Butuan: Entrance and exit of vessels are controlled by the tide, particularly at the mouth of the Agusan River which is 3.5 m. deep at H.W.

MAX. SIZE: Masao: No limit.

Nasipit: Maximum possible length of vessel is 550 ft., breadth 65 ft., maximum mean draft is 25 ft.

Butuan: Maximum draft is 3.5 m.

HEALTH: For all 3 ports: Cable Quarantine Officer with name and nationality of ship, ports of call during voyage, number of crew and passengers, condition of health of all on board and, if any, type of sickness.

RADIO: (DWP 934 NAGOV) 8,776.4 kHz.

VHF: 140.88 MHz.

TUGS: Ports of Butuan, Masao and Nasipit: Tug assistance available from private companies upon request, on a rental basis (only small tugs available).

BERTHING:

Port of Butuan:

Butuan Government Wharf.

Area:	12,000 sq.m.
Berth length:	138.0 m.
Cargo Shed (semi-concrete):	540 sq.m.
Passenger Terminal:	75 sq.m.
Administration Building:	1 unit.
Amenity Building:	1 unit.
Load Capacity:	500 lbs./sq.ft.
Present draft alongside berth at MLLW:	5.0 m.
Distance from mouth of the Agusan River:	7 nautical miles.
Depth at the mouth of Agusan River at low tide:	8 ft.
1991 Cargo Throughput:	141,945 tonnes.

Port of Masao:

Government Wharf at Lumbocan, Butuan City.

Causeway:	280 m. (paved).
Berth Length:	32 m.
Depth alongside:	7 m.
Distance by road from Butuan:	14 km.
Load Capacity:	100 lbs./sq.ft.
1991 Cargo Throughput:	142,350 tonnes.

Port of Nasipit:

Berth Length:	299.35 m.
Length of Navigable Water:	800 m.
Width of Navigable Water:	200 m.
Width of the Entrance to the Nasipit port:	150 m.
Load Capacity – Container Berths:	830 lbs./sq.ft. (40 KPa).
Load Capacity – Ro-Ro Berth:	625 lbs./sq.ft. (30 KPa).
Open Storage Areas (paved):	9,600 sq.m.
Cargo Shed (paved):	1 unit.
Passenger Terminal Building:	1 unit.
No. of vessel to be accommodated at a given time:	4 domestic vessels. 2 foreign vessels.
Present draft alongside berth:	8.0 m.
1991 Cargo Throughput:	619,878 tonnes.
Distance by road to Butuan City (paved roads network):	27 km.
Cargo expected by 1992:	994,591 tonnes.

CRANES: None owned by the Authority nor by any cargo handling operators, but can be hired from the Department of Public Works and Highway or from private contractors companies.

BULK CARGO FACILITIES: Nasipit Port: Bulk oil / fuel pipeline owned by the Philippine National Oil Company (PNOC).

Nasipit Depot: Oil / fuel pipeline at Cabinet, Cabadbaran and Agusan del Norte owned by Pilipinas Shell Corporation.

SPECIALISED CARGO HANDLING FACILITIES: Ro-Ro ramp is available at Nasipit Port. A berth is allocated to handle oil products at the Southern portion of the wharf.

BRIDGES: None.

STEVEDORES: Masao and Butuan: Concord Arrastre and Stevedoring Services Corporation (CASCOR).

Nasipit: Nasipit Integrated Arrastre & Stevedoring Services, Inc. (NIASSI).

MEDICAL: No advance notice needed except in case of serious illness or injury. Hospital facilities available:

1. Government hospitals:
   - (a) Butuan General Hospital
   - (b) Butuan Maternity and Children's Hospital
   - (c) City General Hospital and Medical Centre.

2. Private hospitals:
   (a) Butuan Doctors Hospital
   (b) M.J.Santos Hospital.

TANKERS: See "Bulk Cargo Facilities".

DENSITY: Average density of water in the port and surrounding anchorage area is 1010 – 1012.

FRESH WATER: Masao: The supply of fresh water can only be made by water tanker trucks.

Butuan: Licensed water supply operators.

Nasipit: Nasipit Water District, through water pipes.

FUEL: Oil delivered by tank trucks at all berths.

REPAIRS: Only minor repairs can be undertaken whilst in port.

GANGWAY/DECK WATCHMEN: Service of watchmen is optional.

HATCHES: Opening or closing of hatches is normally carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco: Each man 1 pack per day. Wine and Spirit: Each man 1 bottle per week.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: Bancasi Airport, approximately 7 km. from Butuan City, caters for domestic daily flights to and from Cebu and Manila.

CARGO GEAR: Gear provided by shipping, arrastre and stevedore operators.

HOLIDAYS: New Year's Day (January 1st); Bataan Day (April 9th); Holy Thursday, Good Friday and Easter Sunday; Labour Day (May 1st); Independence Day (June 12th); National Heroes Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

Cargo-handling operations, however, can still be arranged on these days.

BANKS: Philippine National Bank, Montilla Blvd., Butuan City. Tel: 23-12; 23-11.

Bank of the Philippine Islands, Montilla Blvd., Butuan City. Tel: 31-12; 31-13.

Family Bank, Juan Luna Street, Butuan City. Tel: 33-97; 33-98.

Rural Bank of Butuan City, Juan Luna Street, Butuan City. Tel: 30-42.

PCI Bank, Corner of Juan Luna and Zamora Streets, Butuan City. Tel: 20-13; 21-42.

Development Bank of the Philippines, Zamora Street, Butuan City. Tel: 35-21; 35-20; 35-22; 39-22.

Metro Bank, Corner of P.Burgos and San Francisco Streets, Butuan City. Tel: 33-44.

City Trust, Zamora Street, Butuan City. Tel: 33-82.

Allied Bank, Corner of P.Burgos Street and Montilla Blvd., Butuan City.Tel: 31-95.

POLICE/AMBULANCE/FIRE: Police: 115; Fire: 114; Ambulance: 24-14.

TELEPHONES: Not possible to place telephones on board.

SERVICES: Shipchandling Services, Mooring/Unmooring Services, Laundry, Water-Taxi, Cargo-Checking, Carpentry, Forwarding, Bunkering. All ancillary services operators are duly licensed by PPA.

STORING:
1. Trucks can proceed alongside the berth.
2. Forklifts can be used on the jetty to handle stores.
3. Local riggers can be employed to assist storing.

SHIP SUPPLY SERVICE: None.

SHORE LEAVE: After entry formalities are completed, crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

WASTE OIL DISPOSAL: Not available.

GARBAGE DISPOSAL: No garbage collection service available. Garbage disposal regulated under Section 39(b) of PPA Administrative Order No. 13-77 known as the General Port Regulations of the Philippine Ports Authority, stating "No dirt, ash or rubbish of any description may be landed on any wharf or pier except in the receptacles provided for the purpose".

SEAMAN'S CLUBS: None.

CURRENCY: Philippines Pesos (P).

REGULATIONS: General Port Regulations promulgated and implemented by PPA.

DELAYS: Berth not available; Weather constraints, Tidal constraints, Lack of Equipment, Breakdown of Equipment, Pilot not available, Tug not available, cargoes for loading not ready.

DEVELOPMENTS: Butuan: Concrete paving of the back-up area at the Southern end portion of the wharf.

Masao: Extension of wharf to 205.30 m.; Reclamation (3 ha.) for back-up area; Office Building.

AUTHORITY: The Philippine Ports Authority, Port Management Unit of Nasipit, Butuan City, Agusan del Norte. *Tel:* 31-98, 34-29. *Contact:* Ferdinand C. Piencenaves, Port Manager. Oscar M. Beluan, Manager, Port Services Division.

PAGBILAO, Luzon: 13.51 N. 121.45 E.

BERTHING:

Length:	300 m.
Depth:	16.0 m. (Dredging underway to 19.8 m.).
Max. size:	100,000 tonnes d.w.t.

Cargo handled: Coal.

There are no restrictions on LOA, beam, GT or air draft, and no maximum distance from waterline to the top of the hatch-coaming.

The discharge rate is 8,000 tonnes per weather working day, but it is estimated that this will increase to 12,000 tonnes per weather working day, once the port is fully operational.

Two shore cranes, designed for geared and gearless vessels, will be in use.

The first trial shipment will be in March 1996.

OPERATORS: Slipform Marine.

POLLOC, Mindanao: 07.21 N. 124.13 E. (See Plan)

LOCATION: The Port of Polloc lies on the Southern coast of Polloc Harbour which, itself, is located N.E. of Illana Bay at about 14 km. in straight line North of Cotabato City. It is situated at Lat. 07° 21' 12" N., Long. 124° 13' 27" E.

PILOTAGE: Pilotage available 24 hours.

ANCHORAGE: Polloc Anchorage is contained between Lalayang Point and Polloc Island and provides a clear manoeuvring area some 3 km. in diameter with deep water along the marginal shallows which front the low cliffs of its Southern shore.

The anchorage along the Southern margin of Polloc Harbour also provides the port shelter and water depth as well as the best land and water frontage for the development of port facilities and of port-orientated industries.

Bongo Island, 6 miles long, is situated in the North Eastern part of the bay and affords some protection from the Westward to the Mindanao River Delta Area and Polloc Harbour.

RESTRICTIONS: None.

HEALTH: Quarantine anchorage at Lat. 7° 22' N., Long. 124° 14' E.

BERTHING: Main marginal wharf – 400 m. long.

Depth alongside – 10.5 m.

Lighter dock – 67 m. long on both sides.

2 government transit sheds – 11,960 sq.m.

Total port area – 102,350 sq.m.

Total area for open storage – 42,940 sq.m.

Total area reserved for private warehouses – 75,645 sq.m.

CRANES: 1×54 ton, 1×36 ton and 1×60 ton.

FRESH WATER: Available by pipe from P.P.A.

FUEL: Diesel oil available by road tanker.

GARBAGE DISPOSAL: Service not available.

WASTE OIL DISPOSAL: Service not available.

SEAMAN'S CLUBS: None.

CURRENCY: Peso.

GENERAL:

Terminal Ports: Cotabato City and Kalamansig City. The latter is situated at Sultan Kudarat with coordinates of Lat. 06° 33' N., Long. 124° 03'E., N.E. of Moro Gulf, South Coast of Mindanao Island which also caters to large ships loading logs at anchorage.

Tides: The tidal cycle is semi-diurnal and synodic form. The characteristics are as follows:

Highest Astronomical Tide = EL +2.3 m.
Mean High Water Springs = EL +1.9 m.
Mean High Water Neaps = EL +1.5 m.
Mean Low Water Neaps = EL +0.6 m.
Mean Low Water Springs = EL +0.2 m.
Lowest Astronomical Tide = EL −0.3 m.

Storm Occurrences: Mindanao is below the main typhoon belt and only minimal effects have ever been observed at Cotabato as a result of occasional typhoons over the island. This is thought to be due to the consistent nature of typhoons in this region which travel S.E. to N.W.

In the sheltered area of Polloc Harbour at the Easterly side of the Port of Polloc, the max. fetch of 8 km. is to the N.W. and only with winds of 40 knot during a storm will waves of 1.2 m. (4 ft.) be experienced. With an "onshore" typical wind of 15 knots from N.W., wave heights will be about 0.3 m. (1 ft.).

Port Site Description: West of the Haines Point which marks the Western Sarmiento boundary is the site of the port. A frontage of some 2 km. can ultimately be reclaimed from the shallows along this shoreline to provide land backing to the wharves of the port.

The Eastern half of the Southern shoreline is occupied by the extensive plywood factory of Eversun Development Ltd., part of Vicwood Group of Companies, which has developed its industrial complex on land reclaimed over the sand foreshore with filling from the high land behind.

Main Sub-ports: The Philippine Ports Authority took over in October, 1977, the Cotabato City Wharf and Parang Pier. The former is a port with a depth restriction on the bar resulting in ships anchoring in the open sea of the North Mindanao River mouth and there being served by lighters, ferry boats and barges; while the latter caters to large ships which load logs and plywoods at anchor. It contains a deep water pier at the East shore of the bay and also a submerged marine pipeline for pumping ashore petroleum products into a Tank Farm at Parang.

The Cotabato City Wharf also services inter-island watercraft such as passenger/cargo motor launches and other small sea transports.

Access Roads: The Port of Polloc is accessible by land to Cotabato City through a 13 km. modern concrete pavement which winds up at Simuay Junction at the Cotabato-Davao National Highway extending some 9 km. more to reach the commercial centre. From this point, the port is accessible by all forms of land transport facilities to any place in the Cotabato area.

The port is also expected to serve the Southern-most principalities of the Province of Lanao Sur with the improvement of the Ganassi Road connecting the province with main artery of the Cotabato area.

SHIPMASTER'S REPORT: July 1984 (Updated 1996).

Port Limits: Entrance to bay.

Documents: Usual for Philippine Ports.

Pilotage: Pilot available. Port used by coastal cargo and passenger vessels, and foreign vessels.

Anchorage: 5 cables off the berth.

Health: Pratique granted on completion of formalities, normal inspection.

Radio: Manila.

VHF: Not available.

Radar: None.

Tugs: None. One man with small private tug produced certificate that he had piloted vessel alongside even though he had only guided through bay in front of vessel and neither towed vessel or handled lines. He did not speak English.

Berthing: 400 m. of well fendered wharf. No shore cranes, ship's gear only – plywood in crates, sawn lumber and bulk copra are the main export cargoes.
Cranes: None.
Bulk Cargo Facilities: None.
Specialised Cargo Handling Facilities: Copra buckets.
Bridges: None.
Stevedores: Good – but have a bad habit of smoking down holds, which is prohibited. Used small forklift trucks down hold to stack cargo pallets of plywood – very competently handled.
Medical: Doctor and dentist available at Cotabato City.
Tankers: No facilities.
Density: 1025.
Consuls: None.
Repairs: No facilities available.
Dry Docks: None.
Surveyors: None.
Gangway/Deck Watchmen: Customs and Immigration officials on board throughout vessel's stay.
Hatches: Opening and closing by crew.
Customs Allowances: Normal allowance. Bond sealed.
Cargo Gear: Ship's gear only.
Repatriation: Possible – but not advisable.
Airport: South of Cotabato City (Awang, Dinaig, Maguindanao) with daily connections to Manila, Cebu, Iligan and Zamboanga.
Time: GMT plus 8 hours.
Holidays: Usual Philippine holidays.
Police/Ambulance/Fire: No telephones.
Telephones: None.
Services: None.
Shore Leave: Allowed. Shore passes arranged with Immigration Authorities. Going ashore advisable in daylight only – at night it is dangerous.
Identification Cards: Shore passes issued but identity card advisable.
Delays: Subject to berth availability.

AUTHORITY: Philippine Ports Authority, Port Management Office of Polloc, P.O.Box 163, Cotabato City, Parang, Maguindanao, Philippines. *Tel:* 21-10-37, 21-11-43. *FAX:* 21-10-37. *Cables:* PPA-PMO, Polloc. *Contact:* Ali L. Arumpac, Port Manager.

PUERTO PRINCESA, Palawan: 09.44 N. 118.43 E. (See Plan)

See "General" before first port.
Puerto Princesa, a large irregular inlet between Bancao-Bancao Point and Panagtaran Point, is 2 miles wide at the entrance, extending about 6 miles in a N.W. direction. Coral reefs about 0.5 miles wide making out on the entrance points narrow down the navigable width of the channel to about 1 mile, depths of 34 fathoms (62.2 m.), shoaling to 9 fathoms (16.5 m.) in the vicinity of the pier. The major portion of the Northwestern and Western part of the bay is mostly shoal. The shoreline is generally fringed with mangroves and fronted by mud flats. The surrounding land consists of extensive wooded plain, backed by a high mountain chain. Several small rivers navigable by launches and small boats empty into the bay. The inner part of the harbour is a good typhoon anchorage.
PORT LIMITS: About 1 mile South of the pier. This is the entrance to the inner harbour of Puerto Princesa.
PILOTAGE: Pilots can be contacted by radio message through the shipping Agent not less than 24 hours before ETA indicating among others the following information:
1. Name of vessel.
2. Name of shipping lines.
3. Country vessel is registered.
4. Type of vessel.
5. Overall length.
6. Draft.
7. G.r.t.
8. Volume of cargo to be discharged and storage required.
9. Nature of cargo.
10. Passengers disembarking, transit and embarking if any.

Pilot boat is a small pump-boat painted in white and named "Pilot". Sound signals requesting a Pilot are 2 long blasts and 1 short blast. The location of vessel at anchorage while awaiting a Pilot is a safe area, even during bad weather. When Pilot is not at usual station, vessel may proceed to berth after securing clearance from authorities to proceed to berth and after one hour waiting time at anchorage.

When Pilot is aboard the pilot boat, an international flag "P" will be seen flying at her foremast.
ANCHORAGE: Vessels not going alongside the T-shaped pier may anchor Southwestward of Princesa Point in 12 fathoms to 16 fathoms (21.9 to 29.2 m.), mud bottom. A better protected anchorage may be had in 9 fathoms to 10 fathoms (16.5 to 18.3 m.) about 400 yards Northward of the end of the pier.
RESTRICTIONS: At night, in approaching Puerto Princesa from offshore, the lights in the vicinity of Canigaran, Northward of the entrance, may cause some confusion to strangers as they are visible long before the Puerto Princesa Light can be seen. The port light which is fixed red, visible 7 miles over an area of 041°, only becomes visible close in and just off the mouth of the harbour. At daytime a course Southward of the range Thumb Peak-Tidepole Point clears the reef on the North side of the entrance. Mount Beaufort on range with Tidepole Point clears the reef on the South side.
MAX. SIZE: Vessels not going to dock alongside the pier may anchor in 9 fathoms to 10 fathoms or 12 fathoms to 16 fathoms. For vessels going to dock alongside the T-shaped pier, permissible draft is 27 ft. (8.2 m.)
HEALTH: Quarantine doctors are assigned in the Port to board the vessel and check any suspected disease or fever.
RADIO: Vessels at sea usually send their radio messages through the Association of International Shipping Lines in Manila to their Agents.
VHF: Not available.
RADAR: No radar station in the port.
TUGS: Tug service can be obtained by communicating with the local shipping Agent.
BERTHING: The City has a T-shaped concrete pier with a berthing face of 192.43 m. Depths 27 ft. (8.2 m.) alongside and 31 ft. (9.4 m.) about 6 yards off the face. The Northern and Southern ends of the "T" have depths of 11 ft. (3.3 m.) and 15 ft. (4.5 m.) respectively. The inshore arms of the "T" have depths of 11 ft. (3.3 m.) at each berth. Sailboats and other shallow vessels berth on each side of the concrete approach. Typhoon signals are exhibited from a pole on the rooftop of the PPA Building.

Open storage and 2 warehouses (12 m. × 56 m. each) available.
CRANES: 20 ton crane available. Forklifts of 10 tons – 16 tons available.
STEVEDORES: Advise Agent on volume of cargo to be discharged, storage required and nature of cargo. PCBSI (Prudential Customs Brokerage Services Inc.) is the authorised cargo handling operator.
TANKERS: May drop anchor at anchorage area.
FRESH WATER: Available, rate 10 t.p.h. – 15 t.p.h. Cost P.45.00/cu.m.
FUEL: Diesel oil, gasoline and kerosene may be purchased.
FIRE PRECAUTIONS: No smoking is allowed when vessels are refuelling within a radius of 100 m.

An improvised 3 in. hydrant is installed at the pier. The lines used to supply fresh water could be used in case of a fire.
CONSULS: Consuls from foreign countries in Manila.
REPAIRS: No repair facilities.
DRY DOCKS: No facilities available.
SURVEYORS: Lloyd's and other classification societies in Manila, none locally.
GANGWAY/DECK WATCHMAN: Watchman can be hired from local Security Agencies of the Port.
HATCHES: Opening/closing of hatches is usually done by stevedores.
CUSTOMS ALLOWANCES: Quantity permitted for each crew member to be held out of bond are the following: Cigarettes – 5 packs. Liquor – 1 bottle.
CARGO GEAR: Loading/unloading is effected by ship's gear.

A 20 ton crane and 2 forklifts (10 tons and 16 tons) are available for renting.
REPATRIATION: No facilities.
AIRPORT: The airport is about 2 miles from the pier with a schedule of 2 flights from Manila and back daily.
HOLIDAYS: The following are the Philippine National Holidays: January 1st – (New Year's day), Maundy Thursday, Good Friday, April 9th – (Bataan Day), May 1st – (Labour Day), June 12th – (Independence Day), July 4th – (Fil-Am Friendship Day), November 1st – (All Saint's Day), November 30th – (National Heroes Day), December 25th – (Christmas Day). Cargo handling operations may be arranged on these days at overtime rates.
POLICE/AMBULANCE/FIRE: Puerto Princesa City has all these facilities. There is a provincial hospital in Puerto Princesa. Private practising physicians and drugstores are available.
TELEPHONES: Pilipino Telephone (Piltel) services the City throughout 24 hours with a long distance call between the Port and Manila anytime of the day. Telephone connections for vessels alongside the quay can be arranged with the Telephone Company.
SERVICES: Mooring/unmooring, laundry, supply of ice.
BANKS: Philippine National Bank. Tel: (48) 4332341, 4332321, 4332521.
Land Bank of the Philippines. Tel: (48) 4332820, 4332823.
Bank of the Philippine Islands. Tel: (48) 4332083.
Far East Bank and Trust Co. Tel: (48) 4332875, 4332786.
Metrobank. Tel: (48) 4332238, 4332779.
Rizal Commercial Banking Corp.
Philippine Commercial and Industrial Bank. Tel: (48) 4332491, 4332679, 4332713.
Development Bank of the Philippines. Tel: (48) 4332538, 4332358.
Palawan Development Bank. Tel: (48) 4332489, 4332589.
UCPB Rural Bank. Tel: (48) 4332066.
UCPB Savings Bank. Tel: (48) 4332811.
Rural Bank of Coron. Tel: (48) 4332608.
STORING: See "Prelims".
(1) Truck Only.
(2) N.A.
(3) Trucks may proceed alongside.
(4) Yes.
(5) Regulations not applicable.
(6) Riggers available.
SHORE LEAVE: Crew members are allowed ashore provided they always carry with them their Seaman's Book or Passport.
IDENTIFICATION CARDS: Seaman's Book is sufficient for crews to identify them when ashore.
GARBAGE DISPOSAL: Garbage collection is performed by the City Engineering Office. Garbage at the port is collected every day.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Philippines Pesos (P). U.S.$ 1.00 = P26.16 (3.96).
DELAYS: Due to lack of some Port facilities, delay in berthing, loading, discharging and bunkering is sometimes experienced.
DEVELOPMENTS: A proposed 150 m. R.C. wharf extension on the Northern end and reclamation at the Northern foot of the approach, construction of transit sheds, fence, office, road networks, etc.
AUTHORITY: Philippine Ports Authority, PMO Puerto Princesa, Port Area, Poblacion, Puerto Princesa City 5300, Palawan, Philippines. *Tel:* (48) 4332351, 4332716. *FAX:* (48) 4332716. *Contact:* Buenaventura O. Robles, Port Manager. George A. Alfonso, Harbour Operations Officer.

PULUPANDAN, Negros: 10.30 N. 122.46 E. **(See Plan)**

See "General" before first port.

PORT LIMITS: The Pulupandan Pilotage District embraces the waters from the approach of the North and South Channel to Pulupandan Government Wharf including Philippine Bulk Corporation Wharf and also Banago Wharf and approaches. (Please take note that this definition of port limits is for the coverage of Pulupandan Pilotage District).

The seaward boundaries of the port within which a vessel is considered to be an *arrived ship* is bounded from the South Buoy at Lat. 10° 27' N., Long. 122° 46' E. and the North Buoy Lat. 10° 33' N., Long. 122° 46' E.

The "Notice of Readiness" is presented after quarantine and port formalities are completed after which acceptance laytime commences. Any deviation from this is subject to charter-party terms.

DOCUMENTS: The Master of the vessel should prepare the following documents in order to ensure a speedy clearance:

Clearance of a Vessel to a Foreign Port.
Oath on Entering Vessel to a Foreign Port.
Master's Oath.
Crew Lists.
Passengers Manifests (Disembarking and Embarking).
Cargo Manifests (Inward and Outward).
Advance Notice for ETA (Telegram).
Application for Berth.
Vessel's Information Sheet.
Identification Permit to PHILSUCOM (in case of exporting molasses and sugar).
Authority to Load (Telegram).
Guarantee Payment for Wharfage.
Charter Contract (Agreement of shipper and shipping company as to the activity of operations).

PILOTAGE: With the vessel's ETA, the Pilot can only presume that the incoming vessel is entering the port because most vessels usually wait beyond the harbour limits approximately 7 miles to 11 miles from the port. This is due to the restriction in the P.C. & G.S. Chart 4416 which is marked by red lines indicating "Anchorage Prohibited".

The area of "Anchorage Prohibited" is enclosed by the square red line bounded by Lat. 10° 30' N. to the North side and Lat. 10° 23' N. on the South side and Long. 122° 40' E. to the West side and Long. 122° 50' E. to the East side.

If a vessel anchors 10 miles from the pilot boat station, only the silhouette of the vessel can be seen so there is no guarantee that it is really the expected vessel. In this connection, the Agent makes assurances to the Pilot that it is the vessel expected in order for the Pilot to meet the vessel.

The telegraphic address is "Pulupandan Pilots", Pulupandan, Negros Occidental, Philippines. The required advance notice of ETA must be 48 hours before arrival. A follow-up notice of ETA must be sent 24 hours before arrival and if necessary an amendment of ETA if the vessel is further delayed. VHF is not available in the port of Pulupandan.

The pilot boat is 45 ft. in length with a wooden hull and superstructure painted white. The name "Pilot No. 3" painted in black on a white background is located at the upper portion port and starboard side.

At night time, a white light over the red light can be seen aside from the regular side lights. Sound signals requiring a Pilot are 2 long and 1 short blast on whistle and/or a display of pilot flag "H" during daytime.

ANCHORAGES: Though the Pilot boarding point is within the enclosed area of "Prohibited Anchorage", the vessel can drop anchor at this point and wait for the Pilot, depth 9 fathoms. Another anchorage area recommended for awaiting a Pilot is at Lat. 10° 33' N., Long. 122° 46' E. This point has a depth of 39 ft. Two miles North or West of this point is a good anchorage area, the depth ranging from 6 to 7 fathoms with a good holding ground.

The pilot boat is always stationed at the South end of the government pier South of Pandan Pt., for the look-out of incoming vessels. As soon as the expected vessel is sighted, the Pilot proceeds to the pilot boarding point Lat. 10° 27' N., Long. 122° 46' E. about 5 miles from the station. If the vessel cannot proceed to the boarding point, the Pilot will meet her beyond this point.

The specific requirement in boarding is a strong and well balanced Jacob's ladder to be placed on the leeward side of the vessel. A manrope is a necessity.

RESTRICTIONS: Entry to this port has no restrictions except in the case of bad weather when the pilot boat cannot proceed to meet the vessel. Since the loading point of a foreign vessel is mostly at Philippine Bulk Corporation Wharf, the docking and/or undocking is scheduled according to tide and current.

MAX. SIZE: The max. permissible length of a vessel handled at this port area particularly docking at PBC Wharf is 186 m. to 200 m. The controlling draft forward is 26 ft. and 30 ft. aft and after dredging a controlling draft of probably 30 ft. Vessels of this length are usually docked from slack to flooding and undocked from slack to ebbing.

HEALTH: Pratique procedure is a requirement for vessels calling at the port. The shipping Agent arranges Pratique procedure with the Department of Health, Department of Animal Industry and Department of Plant Industry. If there is a disease on board, the doctor of the Department of Health and the Plant and Animal Quarantine Officers will take the necessary action in curing the disease and preventing the spread of an epidemic.

RADIO: There is no radio facility available in this port.

VHF: VHF radio facility is not available at this port, hence, there is no communication with vessels approaching the port and also when manoeuvring within the port area.

RADAR: Radar facility is not available.

TUGS: There is no tugboat available at this port that can be readily used in case necessity demands. The Pilot usually requests the Agent and/or Master to hire a tugboat for docking and/or undocking. In most cases, tugs cannot be taken from Iloilo or Cebu. If ever, tugs can be hired from Cebu, the vessel having to wait for 3 days to 5 days.

In this regard, the Pilot will dock the vessel without tug assistance as requested by the Agent and/or Master in order not to delay the vessel. The Pilot encounters difficulties and risks in this situation but the Agent gives to the Pilot an additional bonus for his efforts.

BERTHING: The berth length of the Government Pier is 424 m., providing 241 m. as berthing space for secondary vessels and 183 m. for primary vessels. Secondary vessels usually handle molasses, sugar, lumber and fertilisers. Primary vessels handle as much as twenty-five commodities. Of these commodities, consumer goods, general cargo, metal and metal products, chemicals, live animals and empty bottles are the most common cargo handled.

CRANES: Cranes for cargo handling are not available.

BULK CARGO FACILITIES: The port area of Pulupandan includes the facilities and equipments of private piers of Philippine Bulk Corporation and Total Bulk Corporation.

The berth at PBC Wharf measures 189 ft. and the quay measures 442.09 ft. Conveyor gantry is the berth equipment used in handling molasses and sugar in bulk for exports. The max. height of the discharging-gear above HW level is 128.4 ft. at the discharging rate of 600 t.p.h. Max. loading depends on the draft of the vessel and max. draft is 22 ft. (salt water).

The quay of TBC measures 19.201 m. It has 1 tanker berth 40 ft. depth at MLLW. It has 5 mooring fender piles spaced at 13 m. with 2 mooring bollards 58 m. from both ends of fender piles. 25 ft. is the max. permitted draft.

Cargoes handled for exports through pipelines are molasses and alcohol. Load/discharge lines for molasses are 10 in. diameter, 8 in. diameter and 6 in. diameter while that of alcohol is 4 in. diameter. Max. loading/discharging rate for molasses is 350 m.t./h. and for alcohol is 70 m.t./h.

SPECIALISED CARGO FACILITIES: LPG and containerised cargo are also handled at the Government Pier but the port does not have facilities specially equipped for handling containers or liquid chemicals.

BRIDGES: There are no bridges in the harbour passage of Pulupandan port.

STEVEDORES: The shipping Agent should arrange with the arrastre/stevedoring office regarding the arrastre/stevedoring service to be rendered to the vessel. This can be facilitated by giving to the arrastre/stevedoring operator the schedule of the vessel's ETA. After the Customs Formalities which vary from 3 hours to 2 days are completed, the Agent should give to the arrastre/stevedoring office Notice of Readiness to discharge/load. When the Notice of Readiness is accepted, the arrastre/stevedoring workers can discharge/load cargoes from/to the vessel. The monthly average cargo tonnage discharged per vessel is 300 tonnes and 95 tonnes for loaded cargo. Cargo loaded and discharged at the government pier is mostly cargo from domestic vessels.

MEDICAL: Hospitals are not available in the port area but government and private hospitals can be easily reached by public vehicle as they are located in Bacolod City, 30 km. from Pulupandan.

A vessel is not allowed to berth and its crew and passengers not allowed to go ashore should there be fever, epidemic or any suspected disease on board. Inspection undertaken by the doctor of the Department of Health and the quarantine officers of the Department of Animal Industry and the Department of Plant Industry, by whom medical attention is given when needed.

TANKERS: See "Bulk Facilities".

DENSITY: Average salinity of water in the port is 1022 – 1023.

FRESH WATER: Water can be supplied by Nepoteco. Water from deep wells is delivered through a trucking service. The rate of delivery is 1 truckload per hour which costs P15.00 per ton.

FUEL: Fuel can be made available to the Master of a foreign vessel by notifying the shipping Agent of its need for fuel. The shipping Agent applies to the Department of Energy in Manila for the supply of fuel to a foreign vessel. If the application is approved, arrangement is made by the shipping Agent with the supplier.

FIRE PRECAUTIONS: Fire extinguishers are required for every office and establishment in the vicinity of the port.

CONSULS: Consuls are not available in the port of Pulupandan.

REPAIRS: There is no dry dock facility in the port.

SURVEYORS: The nearest surveyor is the Del Pan Sugar Surveyors in Bacolod City.

GANGWAY/DECK WATCHMEN: The need for the service of watchmen depends upon the discretion of the Master of the vessel. The cost of their service is P4.50 per hour for the Port District of Iloilo of which the Sub-port of Pulupandan is included.

HATCHES: Opening and closing of hatches carried out by both the crew and the stevedores.

CUSTOMS ALLOWANCES: The quantity of tobacco, wine and spirits allowed for each crew member to be held out of Bond must not be more than for personal consumption.

CARGO GEAR: The loading/discharge of cargo to/from the vessel is effected by the ship's gear.

REPATRIATION: There is no repatriation office in the port.

AIRPORT: The Airport is located in Bacolod City which is 30 km. from Pulupandan. Average number of flights is from 6 to 7 per day to different cities in the Philippines (Manila, Cebu, Iloilo and Davao).

All international flights commence at Manila International Airport.

HOLIDAYS: The following are National Holidays which are also observed in Pulupandan.

January 1st (New Year's Day), Holy Thursday and Good Friday (these religious holidays have no specific dates but often fall in March or April), May 1st (Labour Day), June 12th (Independence Day), July 4th (Fil-American Friendship Day), September 21st (Declaration of Martial Law), November 30th (Bonifacio Day), December 25th (Christmas Day, religious holiday), December 30th (Risal Day).

Official holidays of legal nature are usually working days for the port users due to the nature of work, while holidays of religious nature are often non-working days even for the port users.

POLICE/AMBULANCE/FIRE: The following are the telephone numbers of fire and police departments and government hospital where an ambulance can be made available.

Fire Department: San Juan 066, 2-31-91; Rodriquez Ave. 065; Lopez Jaena 064.

Police Department: 067; 062; 069.

Ambulance: 068; 2-30-96.

These departments are located in Bacolod City. There is a police department in this town but it does not have telephone facilities.

TELEPHONES: There is no telephone facility at this port.

SERVICES: Special services for tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, etc., are not available in this port.

SHORE LEAVE: Crew members are allowed to go ashore.

IDENTIFICATION CARDS: Identification cards are not required as shore passes.

REGULATIONS: Refer to PPA Port Rules and Regulations.

DELAYS: Delay in berthing is due to the draft limitation of the port and the position of the port in case of bad weather.

DEVELOPMENTS: Extensive repair, complete rehabilitation of Northern portion of the pier and demolition of rock filled jetty.

AUTHORITY: Philippine Ports Authority, Sub-port of Pulupandan, Port District of Iloilo. *Tel:* 7-69-45.

RIO TUBA, Palawan: 08.30 N. 117.26 E.

SHIPMASTER'S REPORT: February 1989 (Updated 1996).

VESSEL:	(1989)	(1995)
D.W.T.	23,800 tons	45,232 tons
G.R.T.	13,250 tons	25,027 tons
Duration of Stay	26 days	7 days

DOCUMENTS: See "General" before first port.

Officials come from Puerto Princesa.

Immigration require a visaed Crew List.

APPROACHES: There are 2 leading lights (Red) on approximate bearing of 301° from Sea Buoy in approximate position, Lat. 08° 25.2' N., Long. 117° 31.5' E.

PILOTAGE: Compulsory. Pilot comes from Puerto Princesa. It takes about 10 hours by public bus, 6 hours by taxi and 1 hour by private airplane. For this reason, the Master should send ETA at least 24 hours before arrival and much better to adjust speed to time according to ETA cabled.

Pilot Boat: Pilot comes by canoe. Pilot uses ship's accommodation ladder to come on board, not pilot ladder.

VHF: Not available.

Pilot Station: Approximately 0.5 miles off from Sea Buoy.

ANCHORAGES: Vessels always anchor in approximate position, Lat. 08° 28' N., Long. 117° 26' E. (1.1 miles off from the first leading light). Depth is approximately 18 m.

MAX. SIZE: Largest vessel: In 1994 M.V. "Azusa", 26,057 g.r.t., 45,210 d.w.t., LOA 225 m. Cargo 43,244 tonnes.

HEALTH: Free Pratique is granted after inspection of Vaccination Cards.

VHF: No facilities.

BERTHING: No facilities.

LOADING: By ship's cranes and grab buckets from barges.

Loading Rate: Depends on condition of ship's gears. If equipped with 3 cranes/grab buckets (6.5 cu.m.), it is possible to load approximately 5,300 tonnes per day.

Cargo: Beneficiated Nickel Silicate Ore in bulk.

Shipper: Rio Tuba Nickel Mining Corporation.

STEVEDORES: 24 hours per day. No holidays.

MEDICAL: Mining company hospital nearby.

FRESH WATER: Not available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not required as loading carried out at anchorage and stevedores are Mining Company Personnel. It is necessary to lock all cabins and stores for safety.

REPAIRS: No facilities available.

TIME: GMT plus 8 hours.

TELEPHONE: No international facilities on shore.

GENERAL: *Chart:* Not available.

Notary Public: Not available.

AGENCY: No Agents in Rio Tuba. The Agent comes from Manila. Agent and other officials always stay on board until loading completed.

Sub-Agent is PCBSI (Prudential Customs Brokerage Services Inc.), also the authorised cargo handling operator at this private port.

AUTHORITY: Philippines Ports Authority (PPA), Port Area, Poblacion, Puerto Princesa City, Zip Code No. 5300, Palawan, Philippines. *Tel:* 433-2716, 433-2351. *FAX:* 433-2716. *Contact:* Buenaventura O. Robles, Port Manager. George A. Alfonso, PMO – Harbour Operations Officer.

SAN FERNANDO, Luzon: 16.37 N. 120.18 E.

(See Plan)

See "General" before first port.

DOCUMENTS:

Vessel's Particulars.
Inward/Outward Foreign Manifest, 3 copies each for P.P.A.
Bill of lading (1 copy).
Crew List.
Passenger List.
Customs Documents.
Health Documents
Ship's Repairs List.
Ship's Certificates.

APPROACHES: Vessels enter the harbour through a channel marked by 2 buoys and 2 range lights 144.5° (fixed green and red light flashing every 3 seconds.).

PILOTAGE: Pilotage is compulsory. Vessel is met at mouth of harbour by pilot boat that flies a red flag with letter "P" in white. Pilot then brings the vessel to Quarantine Anchorage. Conventional signals are used to call Pilots.

Harbour Pilot Boarding Station: Lat. 16° 38.6' N., Long. 120° 17.6' W.

ANCHORAGE: Located at centre of the bay with 8 fathoms to 9 fathoms and good holding ground. In the event of rough weather or strong monsoon wind, vessels in the harbour are brought here for safety.

MAX. SIZE: Size of vessels that could be serviced is controlled by depth along quay:

Pier	*Depth Pier Head* (ft.)	*Depth Shore End* (ft.)	*Length* (ft.)	*Width* (ft.)
Philex Conveyor	32	–	656	10
PNOC Coal Conveyor	49	2	460	19
Government Pier (Old)	54	2	656	62
Pier I (New)	50	2	492	69
Pier II (New)	47	2	492	69
Timber Trestle	16	10	95	55
Government Ramp	11	10	187	144

Notes: 1. The old Government Pier is under renovation by Bacnotan Consolidated Industries Inc., and has been leased to BCII for 25 years.
2. Depths are based on MLLW.

HEALTH: Immediately after vessel anchors at Quarantine Anchorage, Quarantine Officers board and clear vessel. Imported grain will be fumigated on board vessel at anchorage.

Boarding Formalities: Members of party are Bureau of Customs Inspector and guards, Immigration and Philippine Coast Guards. Pratique is then issued to indicate vessel as "arrived" and subject to Charter Party terms, laytime will commence.

RADIO: No direct radio communication system with vessels at sea is available in the locality. Ship Masters report ETA to Agent in Manila who relay message to San Fernando by telex or commercial radiogram. The PMO – San Fernando may be reached by Long Distance telephone 41-25-57.

Arrival Advice: 48 hours before ETA, ship Agent files request for berth at PMO office indicating: ETA, draft, LOA and breadth, consignee or shipper, type of cargo and stowage, dangerous cargo (if any). Heavy lifts (if any), number of hatches to be worked, vessel is self sustaining or not.

24 hours before arrival or earlier, upon receipt of Master's advice by telegram, a berthing schedule is issued by the PMO. Copies are furnished to: Pilot, Consignee/Shippers, Arrastre/Stevedoring Contractor and Ship's Agent.

TUGS: 1 tug owned by Philex Mining Corporation, of 1,100 h.p., engine equipped with Kort Nozzle, is available for assisting, docking and undocking and launch service. Tug assistance during docking and undocking at the Philex Pier is compulsory while its use at the Government Piers No. 1 and No. 2 is at the option of the Harbour Pilot. A shipping company may bring in tugboat to assist its own vessel.

Tug lines are available at no extra cost. Conventional signals are used by Pilot and Master of tugboat.

Tug assistance rates: 0800 hrs. to 1700 hrs, regular time – others, overtime.

BERTHING: See "Max. Size"

STEVEDORES: Stevedores, longshoremen, checkers and watch-men for Government Piers No. 1 and 2 are provided by Northern Carriers Corporation.

Stevedores, checkers, etc. are non-union members. Any number of gangs can be ordered on 3 hours' notice. Stevedores work on 3 shifts:

1st Shift – 0000 hrs. to 0800 hrs.
2nd Shift – 0800 hrs. to 1600 hrs.
3rd Shift – 1600 hrs. to 2400 hrs.

Sundays, holidays and nights, stevedores are paid overtime rates. Christmas, New Year's Day, Easter Sunday, Good Friday and Maundy Thursday, stevedores will work on double pay.

TANKERS: The 3 oil terminals maintaining tank farms in the port zone are Petrophil, Caltex and Shell. They operate a common set of pipelines for white and black oil product passing under the old Government Pier. PMO policy is 1 tanker discharging at a time. A "boom" is available at the quay side.

MEDICAL: 3 modern hospitals staffed by trained physicians and specialists and 8 clinics. They are open 24 hours.

FRESH WATER: Fresh water available at old Government Pier via road tanker. Pumping rate: 8 t.p.h – Summertime. 12 t.p.h. – Rainy season.

FUEL: Bunker and others, POL product obtainable and supplied by lorries.

FIRE PRECAUTIONS: The oil terminals in the area maintain chemical fire fighting equipment, a "boom" to contain oil spillage and "light water". Voice of America and the Airport are within a 3 km. radius to the piers and maintain modern fire trucks.

No naked flames and no hot works on board while motor tankers alongside pier.

REPAIRS: Atlantic, Gulf and Pacific Co. of Manila at Batangas operates ship repair facilities.

SURVEYORS: Poro Point Shipping Services of San Fernando are available on request. Surveyors also available from Manilla, 270 km.

GANGWAY/DECK WATCHMEN: Available from Arrastre contractor upon request of Ship's Agent.

OPENING/CLOSING HATCHES: First open and last close normally carried out by crew. Stevedores operate the hatches when it rains.

CARGO GEAR: Arrastre operators maintain complete loading/discharging gear for bulk, general cargo and heavy lifts. Also available are:

11 units – Forklifts, 1 to 8 tons capacity.
2 units – Mobile cranes, 25 tons capacity.

AIRPORT: San Fernando Airport is 3 km. South of Pier. No regular flights.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday; Labour Day (May 1st); Independence Day (June 12th); All Saints Day (November 1st); Bonifacio Day (November 30th); Christmas (December 25th); Rizal Day (December 30th).
POLICE/AMBULANCE/FIRE: Police, Tel: 41-25-77. Hospital, Tel: 41-28-44, 41-23-55, 41-26-16; Fire Department, Tel: 41-24-88; Philippines National Police, Tel: 41-25-28.
TELEPHONES: Vessels docked at the port zone may request telephone connection from PLDT at PPA-PMO San Fernando Office.
SHIP SUPPLY SERVICE: The following authorised ship supply service operators with addresses in this port are:

1. A. Neral Chandling and Laundry Services, 32 Mabini Street, San Fernando, La Union, c/o Mrs. A. Neral (privately owned).
2. La Union Chandling and Laundry Service, Catbangen, San Fernando, La Union, c/o Mrs. Caridad Tabisola (privately owned).
3. Bureau of Quarantine, PPA Compound, San Fernando, La Union, (launch services – government owned).
4. Philex Mining Corporation, Poro, San Fernando, La Union, (launch services – privately owned).
5. Poro Point Shipping Services, PPA Compound, Poro, San Fernando, La Union (Shipping agency, chandling, cargo checking and other related port services).

SHORE LEAVE: Crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: For control of persons inside the port zone and for security, I.D. should be available when requested by guards.
GARBAGE DISPOSAL: The Municipal Goverment of San Fernando through the Municipal Administrator can be requested in writing to provide this service. The garbage should be put in plastic bags or covered cartons, but never in drums. Tel: 41-26-01.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: There are several night clubs/bars/night spots operating in the vicinity of the port but no official Seaman's Club.
CURRENCY: Philippines Pesos (P).
GENERAL: *Discharge of Ballast:* No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines.
Rat Guards: Rat guards shall be placed on all mooring lines to the pier.
Accessibility: Port is accessible by road and air transportation.
Provisions: Fresh vegetables can be supplied directly from the vegetable capital of the Philippines (Baguio City).
Rest, Recreation: Beach resorts with miles of clean beach just minutes away by car. First class hotels with swimming pools, air conditioned rooms. Baguio City, Summer Capital of the Philippines is 70 km. East and 5,500 ft. above sea level. A golf course at Camp John Hay, the R & R centre of U.S. Servicemen, can be used by civilians.
Other Ports: PMO San Fernando has administrative jurisdiction over Currimao Port, Ilocos Norte; Salomague, Cabugao, Ilocos Sur; Sulvec Port, Narvacan, Ilocos Sur; Masinloc Port, Zambales; Acoje Wharf, Sta. Cruz, Zambales, Port of Aparri, Aparri, Cagayan and Port of Irene, Sta. Ana, Cagayan.
AUTHORITY: Philippine Ports Authority, Port Management Office, San Fernando, La Union, Philippines. *Tel:* 41-25-57. *FAX:* 41-25-57. *Contact:* Adolfo LL. Amor Jr., Port Manager.

SANGI, Cebu Island: 10.23 N. 123.39 E. (See Plan)

MAX. SIZE: 50,000 d.w.t.
TUGS: 1 small tug (15.53 g.r.t.) owned and operated by ACMDC.
BERTHING:

Pier No.	*Length (m.)*	*Depth At LW (m.)*	*Remarks*
AFC No.1	98.0	5.0	Load/Unload General and Bulk. Max. load on wharf 90 tons.
ACMDC No.2	7.85	7.75	Loading conveyor for concentrates. Max. load on wharf 20 tons.
ACMDC No.3	80.0	16.0	Ship unloader and conveyor system. Max. Load on wharf 250 tons.

CRANES: ACMDC own a truck mounted crane with lifting capacity 20-25 tons. Crane available for renting.
SPECIALISED CARGO HANDLING FACILITIES: Liquid cargoes may be loaded/unloaded by pipeline at No.1 Pier and unloaded by pipeline at No. 3 Pier.
STEVEDORES: Advise before 0700 hrs. in order to commence operations at 0800 hrs. or 1500 hrs. same day.
MEDICAL: ACMDC operate a private hospital and priority given to employees. Hospitals and facilities available in Cebu City, distance 60 km.
DENSITY: 1023.
FRESH WATER: Available. Requests should be made to Agent or Supercargo.
FUEL: Available. Delivery by tank truck, which is to be ordered through Agent.
FIRE PRECAUTIONS: No smoking on piers or on vessels.
CONSULS: None.
REPAIRS: Most deck and engine repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Available from Cebu City.
GANGWAY/DECK WATCHMEN: Usually ship's gangway used. Deck watchmen are available through Agent.
HATCHES: Normally by crew, occasionally stevedores will open and close hatches.
CUSTOMS ALLOWANCES: See "Cebu".
CARGO GEAR: In the case of coal and concentrates discharge is effected by shore gear (ship unloader) and conveyor for loading. General cargo loaded and unloaded by ship's gear.
AIRPORT: No local airport.
HOLIDAYS: New Years Day, Holy Thursday, Good Friday, Labour Day, Valour Day, Independence Day, Fil-American Friendship Day, National Heroes Day, Bonifacio Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Using AFC telephone.
Toledo Fire Department Tel: 70.
Police department do not have a telephone. They are located along the shore.
Government ambulance can be contacted personally as they are located along the shore.
TELEPHONES: International telephone service available 1.5 km. from pier, at TMSI.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard station along the shore but no telephone.
SERVICES: Available through Agent.
BANKS: Philippine National Bank and Rural Bank in Toledo City.
SHORE LEAVE: No restrictions.
IDENTIFICATION: Required.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Philippines Peso.
DELAYS: None
DEVELOPMENTS: None.

SHIPMASTER'S REPORT: September 1991.
Location: The port of Sangi is located in the Western part of the island of Cebu in position Lat. 10° 22.07' N., Long. 123° 38.2' E.
On British Admiralty Charts it is either not indicated or is indicated incorrectly. It is located on the chart in the position of the town of Toledo and in many Philippine documents it is shown as Sangi-Toledo.
Documents:
7 copies Crew List (IMO forms).
3 copies Crew List (Philippine forms).
5 copies Arms and Ammunition List.
7 copies Bonded Stores List.
7 copies Stores List.
5 copies Ports of Call List and Intended Ports of Call.
1 copy Philippine General Declaration.
1 copy Maritime Declaration of Health.
Clearance from last port.
Manifest and Bills of Lading.
7 copies No Narcotics, No Animals, No Money, No Parcels and No Passengers if there are none on board.
Clearance is effected on board the ship when secured alongside.
Approaches: Several tall chimneys and prominent buildings can be seen on the approach to the port. We encountered many piroques and catamarans on our approach and this hindered our progress considerably.
Radio: ETA is required by VHF Channel 16, 4 hours prior to arrival.
Berthing: We berthed at the Cement Quay (See "Plan") which has very good cargo handling facilities and is called Berth No. 3. Depth of water alongside the berth is 50 ft. – 60 ft.
Cargo Operations: Work is carried out in 3 shifts throughout 24 hours. Loading and unloading of coal is by crane at Berth No. 3, coal being discharged on to a conveyor system.
Fresh Water: Fresh water is not available locally but is available from Cebu by barge, which is on the other side of the island so it is very expensive. Alternatively fresh water is available by trucks with 10 tons capacity. The quality of water varies greatly and may only be fit for washing.
Officials: At the request of the Port Authority we were expected to feed between 8 – 10 men, which was made up of Customs, Agent, Clerks and Police. On most occasions 6 persons were being fed.
With regard to carrying out formalities, the Port Authorities were very correct and friendly. The customs officers maintained a presence on board at all times as did the armed guards who were posted aboard to handle any serious attack upon the vessel.

AUTHORITY: Philippines Ports Authority.
Operator: Atlas Consolidated Mining & Development Corporation, ACMDC Minesite, Don Andres Soriano, Toledo City, Cebu, Philippines (P.O.Box 7066, Manila International Airport, Manila, Philippines). *Tel:* 819-0251/90. *Telex:* (ITT) 7425014; (RCA) 7222170; (Eastern) 3539; (ITT) 45642. *FAX:* 815-3089. *Contact:* Fernando S. Verde, Vice President – Production (Cebu Copper Operations).

SUBIC BAY (Olongapo), Luzon: 14.49 N. 120.18 E.

(See Plan)

(A) GENERAL CARGO FACILITIES
(B) TANKER TERMINAL

(A) GENERAL CARGO FACILITIES

DOCUMENTS: The Subic Bay Metropolitan Authority (SBMA) requires the following documents 48 hours prior to a vessel's arrival:

Ship/Vessel Registry.
International Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio Telegraphy Certificate.
P&I Coverage Certificate.
Marpol/IOPP Certificate.*

* For tankers only.

Owners and/or Masters should fax the above documents to Agent in Manila, minimum 48 hours prior to a vessel's arrival at Subic Bay.

BERTHING:

Piers in the Subic Bay Area:

1.	Alava Pier	– (Waterfront)
2.	Bravo Pier	– (SRF)
3.	Rivera Point	– (SRF)
4.	Sattler Pier	– (NSD)
5.	Marine Terminal	– (NSD)
6.	POL Pier	– (NSD) – Also see Section (B)
7.	Boton Pier	– (Cubi)
8.	Leyte Pier	– (Cubi)
9.	Nabasab Pier	– (Navmag)
10.	Kamayan Pier	– (navmag)

The main commercial port will be at the Sattler Pier and the Marine Terminal Pier located at the former NSD.

The other piers in the area will complement and support the main commercial port.

SBMA Container Port: Container Pier (Sattler):
Length 600 ft. Width 80 ft. Draft 42 ft.
20 moves per hour. 40 tons maximum per lift.

Covered Pier (Marine Terminal):
Length 750 ft. Draft 46 ft.
90,000 sq.ft. (L-600 ft. × W-150 ft.) Transit shed.
Capacity: 4 cargo ships at one time.

Freight Workload:
2,300 container lifts per months.
1,300 container (loaded) vans per month.
8 ships per month – 12 hrs. load time per ship.

Note: The Port Authority have several portal cranes at the Alava and Bravo Piers which could load/unload cargoes, but land vehicles are needed to transfer the cargoes to/from the container port.

Container Marshalling Yard:
Length 900 ft. Width 250 ft. = 225,000 sq.ft. or 20,903 sq.m.

Storage Compound: 99 acres.

	700,000 sq.ft. covered storage area.
Building 1026	132,000 sq.ft.
Building 1022	135,000 sq.ft.
Building 1027	152,000 sq.ft.
Building 1012	32,000 sq.ft. – freeze warehouse.
Building 1035	26,000 sq.ft. – transhed.

1 million sq.ft. of open storage also available.

REPAIRS: Dry dock and ship repair yard available, operated by Subic Shipyard and Engineering Inc.

AUTHORITY: Subic Bay Metropolitan Authority, Building 229, Waterfront Road, Subic Bay Freeport, 2200 Philippines. *Tel:* (047) 222-5456. *FAX:* (047) 222-5278.

AGENT: See "Manila".

(B) TANKER TERMINAL

LOCATION: Coastal's Subic Bay Terminal is located in the Subic Bay Freeport Zone on the S.E. shore of Subic Bay at Lat. 14° 48' 38" N., Long. 120° 17' 37" E. Coastal is the only operator of the Petroleum, Oil and Lubricants (POL) Pier, and the Subic Bay Metropolitan Authority (SBMA) is the operator of the Subic Bay Port.

DOCUMENTS: See "Section A".

PILOTAGE: Pilotage is provided by Coastal, and is compulsory for all vessels when entering and leaving Coastal's Subic Bay Terminal or anchoring in the Subic Bay en-route to Coastal's Subic Bay Terminal, except for small launches and other craft regularly utilising Coastal's Terminal, or if waived by the Terminal Manager.

Masters of ships anchoring or leaving the Subic Bay Anchorage may do so without the assistance of a pilot, but those unfamiliar with the anchorage are strongly advised to use the services of a pilot before anchoring. Coastal does not provide a pilot for anchoring at the Subic Bay Anchorage.

Masters must sign the pilot's Indemnity Certificate before pilotage commences. Ships using Coastal's Subic Bay Terminal are liable for any damage caused by the ship to any of Coastal's property or to any other vessel lying therein, whether or not a Coastal pilot is assisting at the time.

Pilot Boarding and Landing Offshore: All pilots shall be boarded or landed from a ship not located alongside a berth by means of a pilot ladder when the freeboard does not exceed 30 ft., or a combination of accommodation ladder and pilot ladder when the freeboard exceeds 30 ft. All pilot ladders shall conform to the requirements of SOLAS 1974 Chapter V, Regulation 17. A pilot may refuse to board a ship if the means of access does not conform to the above. If the pilot agrees, a pilot hoist may be used in lieu of an accommodation ladder and pilot ladder, but a standard pilot ladder shall be immediately available in the event of a failure of the pilot hoist. As it is essential that ship's engines be stopped whilst the pilot is transferring between pilot boat and ship, the ships' Masters should not approach the coast too closely for boarding the pilot. As a general rule, pilot should board about 1.0 – 2.0 miles off the Coastal Subic Bay POL Pier.

ANCHORAGE: If, for any reason, a ship is required to anchor prior to or after berthing at Coastal, the anchorage must be coordinated with the SBMA Port Authority.

Use of Anchors: If an anchor is used during the berthing manoeuvre, it shall be hove home on completion of the mooring. No ship may lie alongside a berth with an anchor on the bottom. Loaded ships should not drop an anchor near the POL Pier berths as bottom clearance is limited with the danger of running over the anchor which could pierce the hull.

RESTRICTIONS: *Depths/Clearance:*

Minimum depth of water in approaches	60 ft.
Under Keel Clearance in approaches	20 ft.
Minimum water depth alongside	41 ft.
Under Keel Clearance alongside	4 ft.

Loaded and Ballast Draft Requirements: Each of the berths at the Coastal Subic Bay POL Pier is dredged and the maximum allowable draft will be advised by the pilot. It shall be recognised that loaded ships may be draft restricted at the next scheduled port after Subic Bay.

For safe handling of tankers at all the Coastal Subic Bay POL Pier berths, the following minimum drafts are recommended:

D.W.T.	*Draft Forward*	*Draft Aft*
5,000 – 10,000	6 ft.	14 ft.
10,000 – 20,000	8 ft.	18 ft.
20,000 – 30,000	10 ft.	20 ft.
30,000 – 40,000	14 ft.	22 ft.
40,000 – 50,000	14 ft.	24 ft.
50,000 – 90,000	16 ft.	26 ft.
90,000 and over	18 ft.	28 ft.

Note that ships arriving or sailing with part cargo only are also recommended to conform to the above minimum draft and maximum of 10 ft. trim by the stern. In special circumstances and in very good weather conditions, it may be possible to safely handle ships with less draft and/or a different trim than those recommended above. In these cases, Masters should consult with the duty Dispatcher and Pilot.

Bow to Centre Manifold Restrictions at the Berths: The allowable bow to centre manifold distance at each of the berths is as follows:

Berth	*Maximum BCM*
1 and 2	85 ft.
3 and 4	288 ft.
5 and 6	450 ft.

In common for all berths, the distance from the tanker's most forward underwater point to the centre manifold has to be known accurately by Coastal to insure that there is sufficient length of deep water at the berth forward of the loading arm (hose) positions. All ships using the POL Pier must advise Coastal of their accurately measured horizontal distance from extreme bow (including the bulb bow) to the centre of their manifold connections, so that each ship is allocated a berth with sufficient length of deep water forward of the loading position.

MAX. SIZE: 100,000 d.w.t., maximum LOA 853 ft. and maximum draft 41 ft. Max. displacement 120,000 d.w.t.

RADIO: *ETA Requirements:* All ships shall advise their ETA at Coastal's Subic Bay Terminal 72, 48 and 24 hours in advance of arrival "via Manila Radio", and be able to communicate with "Coastal Subic Bay" on VHF Channels 16, 8 and 79 when within range. See "Pre-Arrival Information" required on cargo, bunker and ballast operations.

If a ship has received damage and/or is leaking oil, this must be advised in the ETA advice, so that the ship can be inspected by Coastal personnel before entering the port.

Pre-Arrival Information: All ships scheduled to load or discharge at Coastal's Subic Bay Terminal should, at least 48 hours prior to arrival, radio the following information to Coastal via Manila Radio (attention Operations Supervisor). If passage from last port is less than 24 hours, this information should be transmitted to Coastal on VHF as soon as in range.

(a) Clean Ships to Load Clean Products:

AA	Cargo Nomination (grades, volumes at 60°F).
BB	Proposed cargo layout.
CC	Last 3 cargoes carried in each tank.
DD	Cleaning done (hot wash, cold wash, descaling, draining, mopping) since last grade and between previous 2 grades.
EE	Condition of coating, if any.
FF	If gas-free, tanks of ships scheduled to load Kerosene and Turbo Fuel *must*, unless those tanks last cargo was also Kerosene or Turbo Fuel and have not carried ballast, be gas-free for entry and tanks scheduled to load Gas Oil or Heating Oil *must* be gas-free to below 40° of LEL (LFL) – Lower Explosive Limit (Lower Flammable Limit).
GG	Number of ballast tanks in which ballast will be carried on arrival.
HH	Estimated time to deballast and prepare ballast tanks ready for loading.
II	Any slops on board, if so, quality and quantity.
JJ	Any transit cargo on board, grade, volume, tank numbers.
KK	Preferred sequence of loading, grades which can be loaded simultaneously.
LL	Number of manifold connections (from forward) to be used for each grade (8 in.)
MM	Maximum loading rate.
NN	Maximum sailing draft.

(b) *Clean Ships to Discharge Clean Products:*
AA Bill of Lading quantity, gravity, temperature of each grade to be discharged.
BB Any discrepancy in Bill of Lading and ship's figures at loading port.
CC Quantity and grade of any transit cargo on board.
DD Number of ship's pumps available and estimated discharge time.
EE Number of manifold connections required (8 in.).
FF Estimated ballast time required at completion of discharge.

(c) *Dirty Ships to Load Dirty Products:*
AA Cargo nominations (grades, volumes at 60°F).
BB Last cargo carried, if crude oil what grade (source of origin) and what cleaning done.
CC Grade and quantity of any transit cargo on board.
DD Quantity of dirty ballast to pump ashore * and estimated time to deballast.
EE Quantity of slops to pump ashore *.
FF If more than one grade to be loaded, can grades be loaded simultaneously, if not, why not and preferred loading sequence of loading.
GG Maximum loading rate.
HH Maximum sailing draft.
* Note: The deballasting and slops system can handle only low Mercaptan sulphur slops. If previous cargo was "sour", it may not be possible to discharge slops at the Terminal.

(d) *Dirty Ships to Discharge Dirty Products:*
AA Bill of Lading quantity, gravity, temperature of each grade to be discharged.
BB Any discrepancy in Bill of Lading and ship's figures at loading port.
CC Grade and quantity of any transit cargo on board.
DD Number of ship's pumps available and estimated discharge time.
EE Quantity of ballast which can be loaded simultaneously with discharge, if agreed by Coastal.
FF Estimated residual ballasting time required.

(e) *Crude/Dirty Ships to Load Crude Oil:*
AA Cargo nomination (grades, volumes at 60°F).
BB Last cargo carried, if crude oil what grade of crude (source of origin).
CC Quantity and grade of any transit cargo on board.
DD Quantity of dirty ballast to pump ashore, estimated time to deballast.
EE Quantity and type of slops on board, to "Load-on-Top", segregate on board or pump ashore.
FF If more than one grade to be loaded, preferred sequence of loading.
GG Maximum loading rate.
HH Maximum sailing draft.

(f) *Crude Ships to Discharge Crude Oil:*
AA Bill of Lading quantity, gravity, temperature of each grade to be discharged.
BB Any discrepancy in Bill of Lading and ship's figures at loading port.
CC Grade and quantity of any transit cargo on board.
DD Number of pumps available for discharge, estimated time of discharge.
EE Does ship require crude washing of tanks during discharge, if so, reply to Crude Wash Check List.
FF Quantity of ballast which can be loaded simultaneously with discharge, if agreed by Coastal.

(g) *Speciality Ships:*
(1) Ships to Discharge Butane or Propane:
AA Bill of Lading quantity, quality and temperature of gas.
BB Any discrepancy between Bill of Lading and ship's figures at loading port.
CC If temperature of gas is much below ambient, what is the maximum temperature gas can be raised to on discharge (minimum discharge temperature acceptable is 60°F).
DD What is the minimum discharge pressure (maximum at manifold is 175 p.s.i. for Butane and 225 p.s.i. for Propane). Note: The terminal does not have a return line.
EE What is the estimated discharge time.
FF What is the size of the ship's manifold connection.
(2) Acid Ships to Discharge:
AA Bill of Lading quantity, quality and temperature of acid.
BB Any discrepancy between Bill of Lading and ship's figures at loading port.
CC Size of ship's manifold connection.
DD Does ship have acid hoses on board, if so what number and size.
EE Maximum discharge rate at 100 p.s.i. at manifold.
(3) Ships to Load Acid:
AA Nominated quantity.
BB Last 3 cargoes carried in nominated ship's tanks with cleaning done since each was discharged.
CC Type of coating in ship's tanks to be loaded and its condition.
DD Are heating coils in tanks to be loaded completely disconnected and blanked off?
EE Is loading system from ship's manifold to tank(s) completely segregated from all other systems?
FF What grades are loaded or to be loaded in tanks adjacent to the tank(s) to be loaded with this acid? Do any of these tanks require heating?
GG What size is ship's manifold connection.
(4) Ships to Discharge Strong or Spent Caustic:
AA Bill of Lading quantity, quality and temperature of cargo.
BB Any discrepancy between Bill of Lading and ship's figures at loading port.
CC Quantity and grade of transit cargo on board.
DD Size of ship's manifold connection.
EE Estimated time required for discharge (maximum pressure at manifold – 100 p.s.i.).

TUGS: Tugs are provided by Coastal and their use is compulsory. Towlines are provided by the tugs. Masters must sign the tugs' Indemnity Certificate presented by the pilot on boarding before tugs are made fast. The ship is liable for any damage to or caused by the tugs whilst assisting.

Communications between ship and tugs during manoeuvring are normally carried out on VHF Channel 8, the English language shall be used.

In case of a loss of VHF contact, the following signals shall be made on the ship's whistle or siren:

Forward Tugs (alongside or on hook):
1 short blast – ship's head to starboard.
Tug alongside port side – push.
Tug alongside starboard side – pull on beam.
Tug on hook – pull starboard bow.
2 short blasts – ship's head to port.
Tug alongside port side – pull on beam.
Tug alongside starboard side – push.
Tug on hook – pull port bow.
5 or more short blasts – stop.

After Tugs (alongside, tractor or on hook):
1 prolonged blast followed by 1 short blast – ship's head to starboard.
Tug alongside port side – pull on beam.
Tug alongside starboard side – push.
Tractor tug – pull on port-quarter (in).
1 prolonged blast followed by 2 short blasts – ship's head to port.
Tug alongside port side — push.
Tug alongside starboard side – pull on them.
Tractor tug – pull on starboard quarter (out).
1 prolonged blast followed by 5 or more short blasts – stop.

All Tugs:
3 short blasts – stop ship.
Tug on hook forward – stop.
Tug alongside – pull back (alongside).
Tractor tug aft – pull right aft.

It is emphasised that whistle signal form of communication between ship and tugs is for emergency use only and that, if possible, manoeuvres should be aborted or suspended until VHF contact is again possible.

TANKERS: POL Pier:

Berth	*Length* (ft.)	*Draft* (ft.)	*Controlling Depth* (ft.)
Southside	844	42	42
Northside	844	39	39

Mooring Operations: Ships berthing at the POL Pier berths shall have an adequate supply of heaving lines available for use. The forward spring lines are usually the first lines ashore.

The use of "rat guards" is mandatory.

All lines must be rope, or if steel, must have at least 150 ft. of rope leader for feeding to the dock line handlers.

Safety of Moorings: All ships must be securely moored to the satisfaction of the pilot. No cargo or bunker arms or hoses will be connected until the ship is securely moored. Moorings on winch drums shall be *securely braked off, self tensioning devices are not allowed.* On split drum winches, the number of layers of wire is taut and the ship in a fully loaded condition. Moorings of a different character (e.g. wire and fibre) shall not be sent out to the same dolphin or set of hooks/bollards. Moorings shall be monitored and kept taut by the ship's crew, and the ship maintained in her correct position and in contact with the berth fendering throughout the loading/discharging/ballasting/deballasting/bunkering operations. The Berth Assistant Operator is fully authorised to stop operations and disconnect cargo/bunker arms and hoses if moorings are seen to require attention, or if the ship is not kept in position and in contact with the fendering, or if the ship violates any other safe mooring practice.

Emergency Towing-off Wires: On completion of mooring, each ship at Coastal's Subic Bay Terminal shall provide towing-off wires, of adequate strength and condition, secured to the offside bow and quarter bollards with the eyes run out and maintained near the water line. The aft emergency towing-off wire shall be led through the central aftermost lead.

LOADING/DISCHARGING: POL Pier – Southside – Dock manifold data:

Number of Connection	*Diameter of Line* (in.)	*Product Handled*	*Maximum Discharge Rate* (bbls/hr.)	*Maximum Load Rate* (bbls/hr.)
4	6	F76	3,500	3,000

Notice of Readiness: Notice of Readiness will be signed for acceptance by the Operations Shift Supervisor after inspection and calculations are completed, and the vessel is in all respects ready to load or discharge.

If it is subsequently found that the ship was not, in all respects ready to load or discharge; in the case of loading, due to excessive deballasting time or unsuitability of tanks which, on inspection, require further cleaning or preparation for the nominated cargo; or in the case of discharging due to unavailability of pumps or inadequate temperature of cargo, a *Notice of Protest* will be delivered to the ship which will automatically cancel Coastal's initial acceptance of the Notice of Readiness. In such cases, the ship must prepare a revised N.O.R., cancelling the first one and stating a time tendered in accordance with its actual readiness.

Classifications of Petroleum: For the purpose of these regulations, the following classifications of petroleum products are established at Coastal's Subic Bay Terminal:

Clean Products:	Gasoline, Kerosene, Turbo Fuels, Gas Oil, Heating Oils, Light Diesel Oils. The ships which carry these products are designated "Clean Ships". Marine Diesel Oil (MDO) may be either a clean or dirty product.
Dirty Products:	All grades of Fuel Oil, Asphalt, Vacuum Gas Oil, Heavy Diesel. The ships which carry these products are designated "Dirty Ships".
Crude Oils:	All grades of crude oil including "Spiked" Crude. "Sour" Crudes are those crudes which contain appreciable amounts of hydrogen sulphide and/or Mercaptans. All Persian Gulf Crudes are classified as "Sour Crude". Ships which carry crude oil are designated as "Crude Ships". "Crude Ships" and "Dirty Ships" may be interchangeable.
Speciality Products:	Butane, Sulphuric Acid, Naphthenic Acid, Caustic Soda, Spent Caustic, TEL, Anti-Icing. Ships which carry these products are designated "Gas Ships", "Acid Ships" "Napacid Ships", etc., as the case may be.
Low Flash Petroleum:	Flash point below 60°C (140°F) as determined by the closed cup method of testing.
High Flash Petroleum:	Flash point of 60°C (140°F) or above as determined by the closed cup method of testing.

Manifold Requirements: Ships whose cargo and bunker manifolds conform to the OCIMF "Standards for Tanker Manifolds and Associated Equipment" will have no difficulty at Coastal's Subic Bay Terminal. Any ship which has a manifold construction other than steel, or has valves outboard of the supporting stool, must advise Coastal by VHF prior to arrival so that the manifold can be examined by Coastal Supervision and suitable precautions taken before and during connecting the arms.

Basic requirements for manifolds at Coastal's Subic Bay Terminal are:

Ships for the POL Pier (where ship may be portside or starboard side to berth): All products, clean or dirty, for ships up to 120,000 d.w.t. loaded to 42 ft. draft.

Cargo manifolds 2×8 in. ASA made of steel.

Bunker manifold 1×6 in. hose 150 p.s.i. rated flanges.

Distance from rail minimum 6 ft., maximum 10 ft.

All valves to be inboard of support stool or otherwise supported.

Distance apart of manifolds, including bunker, flange edge to flange edge, minimum 36 in., maximum 60 in.

If spill tank under manifold extends more than 24 in. outboard of connecting flange, the arm jacks will have to land on it.

Minimum height of lower edge of flange above spill tank (where fitted, or above deck if not fitted) 24 in., maximum 50 in.

If ship's connecting flanges are not made of steel, maximum allowable unsupported cantilever length of 24 in. will apply. Terminal Supervisor should be consulted.

Maximum Pressure at the Manifold: Never exceed the maximum allowable working pressure, as indicated below, at ship's rail, and make sure the loading rate is fully agreed.

Crude and refined products	–150 p.s.i.
Butane	–175 p.s.i.
Acids and caustics	–100 p.s.i.
Propane	–225 p.s.i.

Deballasting: Ships must not commence deballasting overside until the clean ballast has been inspected by a Coastal representative. If any oil is seen on top of the ballast, the Coastal representative will advise on what quantity of water may be discharged overside and what quantity has to be discharged ashore. Generally, clean ballast which has any oil floating on it should not be discharged overboard, after the tops of the suction pipelines in the tanks are uncovered. The responsibility for avoiding pollution during discharge of clean ballast overside remains with the ship. The shore deballasting system has a check valve in every lateral to prevent flow back. The ship should advise the Berth Operator and Coastal Operations Supervisor at least 30 minutes before completion of deballasting, so that tank inspection can be arranged without delay.

Tank Cleaning, Gas-Freeing Alongside: Permission to tank clean and/or gas-free alongside a berth must be obtained from the Operation Supervisor or his authorised deputy before commencing operations. Generally, this will not be refused unless in the opinion of the Operation Supervisor:

1. The weather or other conditions are considered unsatisfactory.
2. The equipment being used, the method employed, the experience or attitude of the officers and crew members involved are considered unsafe.
3. The length of time required to tank clean or gas-free is excessive.
4. The berth is needed for loading or discharging another ship. (See "General" – Vacating Berth).

No electrical equipment such as lighting and ventilation fans may be used unless certified flame or explosion proof and in good physical condition. Washing machine hoses must be tested for electrical continuity before washing commences. All tank cleaning and gas-freeing must be under the personal supervision of a senior ship's officer, who must always be in the vicinity of the tank cleaning operations.

Inert Gas System: It is important that inerted ships do not attempt to discharge cargo or ballast if their inert gas system is not functioning, or able to keep positive pressure on all tanks with less than 8% oxygen gas. Incoming air could cause pyrophoric iron to glow or ignite with resulting fire or explosion.

Also see "Safety".

Tank Preparation for Loading at Coastal's Subic Bay Terminal: Unless otherwise specified, the ship's tank preparation for cargoes to be loaded at Coastal's Terminal shall conform to the Tank Cleaning Guidance Chart (See "Appendix").

Tank Inspection: Ships should call for tank inspection in good time to avoid delay.

1. Before loading clean cargoes: Tanks will always be inspected with lids open except those designed for low flash cargoes and which may not, therefore, be gas free. Tanks to be loaded with Turbo Fuel or Kerosene will always be entered (unless last cargo in tank was Turbo Fuel or Kerosene and has not carried ballast), and must therefore be gas free for entry. The inspector may need to witness an explosimeter and oxygen analyser reading of any tank before entering.

   A ship's officer must always be present when tanks are being inspected. Tanks for clean products must have main and stripping valves in each tank open during inspection. Ships scheduled to load clean cargoes, particularly Turbo Fuel, Kerosene and Heating Oil, may be required to anchor in the Bay for inspection prior to berthing. When inspection is done from the tank lid, and all tanks cannot be seen clearly, the inspector may ask for some tank cleaning plates to be removed. Ship's manifold valves on both sides of the ship will be required to be opened, and the pipelines visually inspected. Where draining of lines is done into the pumproom bilges, the inspector may ask to see the drain valves or plugs opened, and also see the drain cocks on the pumps opened.
2. Before loading dirty products or crude oil: Tanks will normally be inspected with tank lids closed, however, in cases of doubt, the inspector may ask for the tank lids and/or the tank cleaning plates to be opened.
3. Tanks will normally be inspected with tank lids closed, but the inspector may ask for a tank cleaning plate to be opened. If measurable quantities of the previous cargo are seen, hand dips will be made and an ROB quantity computed (See "Cargo Measurement"). This will be included in the Dry Certificate. A Note of Protest will be issued if the ship cannot reduce the ROB quantity and it is considered excessive.

Dry Certificates: Coastal Supervisors will sign Dry Certificates on presentation, but they are instructed to endorse them with observations of any free water or previous cargo seen, and to the effect that the contents of the pipelines are unknown. Coastal does not accept any liability as to the actual condition of the cargo tanks inspected.

Static Electricity Precautions: For all static accumulator products having a flashpoint of over 100°F (Kerosene, Turbo Fuel, Gas Oil and Heating Oil), tanks shall be gas-freed to below 40% of the LEL (LFL) before loading. No other static electricity precautions will therefore be necessary, unless these products are stored at a temperature near or above their flashpoints. The loading rates will be restricted until the ship's tank piping is covered, and special precautions in ullaging, sampling and taking temperatures will be enforced. For all static accumulator products having a flashpoint of less than 100°F (Naphthas and Gasolines), the main precaution to be taken is that ullaging, dipping and sampling equipment shall be firmly grounded (earthed) to the structure of the tank to be loaded prior to its introduction into a tank, and remain grounded until after its removal.

OBO Ships – Precautions in Cargo and Ballast Handling: Due to the problem of the effect of large free surfaces and the stability of OBO's, the minimum number of tanks are to be slack at any one time. Generally, when ballast and cargo are being handled simultaneously, only one cargo tank should be slack at one time, otherwise a maximum of two cargo tanks should be slack at one time, and the loading rate shall be calculated accordingly. If a ship's Master can demonstrate that the ship's stability is adequate without more stringent precautions, he should consult with the Coastal Supervisor on this and all free surface problems. If a list develops during loading or discharging, operations will be stopped and arms/hoses disconnected and remain so until the free surface in the ship has been reduced and the list corrected. OBO's arriving with part cargo to complete loading should ensure that they have no slack tanks on arrival.

Commencement of Loading: On being advised by Coastal's Tank Inspector that the ship's tanks are satisfactory to load, all tank lids and tank cleaning plates must be closed and secured, unused manifold connections blanked off and the ship's system, with the exception of the manifold valves, lined up for loading. Flame screens must be in place in each ullage hole. When the shore indicates it is ready to load, open the appropriate manifold valves and advise the shore that you are ready to load by gravity. If loading more than one grade, start each grade off separately. Do not ask for a pump to be put on until you are sure the cargo is flowing into the intended tanks. Agree with the Berth Operator on the number of pumps to be put on and on the stand-by time he requires for pumps to be cut out (See "Emergency Stopping of Pumps"). Communications with the shore will normally be by UHF radio, but the Berth Operator can also be contacted by shouting to the berth. Cargo tanks are to be checked before commencement of loading of each grade of cargo.

Topping-Off: If you require a reduction in loading rate for topping-off, arrange this with the Berth Operator.

Emergency Stopping of Pumps: To stop shore pumps in an emergency, use UHF Channel 1, making sure to identify ship's name and berth number before requesting "Stop Pumps – Emergency", repeat several times. All ships at the Terminal are on the same UHF channel, and unless you identify your ship's name and berth, the Operator will not know which ship is requesting a stop.

Discharging: If a ship is inerted, all deck openings shall be sealed and tanks under positive pressure. On non-inerted ships, flame screens must be in place in all ullage holes. Open manifold valves and start pumps only after you have been told by the Berth Operator that the shore is all lined up, open and ready. Maintain continuous watch on the UHF Channel 1 allocated to your ship, as this will be the means the shore will use to request you to stop pumps in an emergency. If, for any reason, you temporarily stop discharging or drastically reduce the discharging rate, you must advise the Berth Operator.

Loading of Bunkers: Where possible, bunkers will be loaded simultaneously with cargo operations. The ship's officer in charge of bunkering should contact the Berth Operator as soon as possible after arrival alongside to arrange a convenient time for bunkering, topping-off requirements and any requirements for samples and/or sighting bunker meter readings.

Generally, bunkers are loaded through meters and a ship's representative is invited to witness opening and closing readings. Where it is not possible to load bunkers through a meter, shore hand gauged quantities will be used or, in case of small ships taking small quantities, a ship's inspection or "Bunker Survey" will be carried out by a Coastal representative. Ship's officers are invited to witness gauging of shore tanks upon start and completion of bunkering if meters are not used.

Cargo Measurements: The accurate measurement of cargo discharged or loaded at Coastal's Subic Bay Terminal is essential to the Company's business. Contract Inspectors are engaged to measure each cargo discharged or loaded, and ship's officers are requested to give every assistance to these inspectors to take the necessary measurements and samples. Inerted ships will need to depressurise the inert gas to the extent, that up to 3 ullage plugs can be opened at any one time for handgauging, sampling and inspection. All tanks will be hand gauged/dipped, temperatures and samples taken and waterfinding done by the Contract Inspectors, who will require to be advised of the reference calibration tables to compute the cargo loaded or to be discharged. Otherwise, the inspectors will use their own equipment. A ship's officer must witness the taking of ullages and temperatures.

Normally, Vessel's Experience Factors are not used by Coastal in computing ship's cargo quantities, but if available, the Contract Inspector will record the VEF. Where slops from a previous cargo are retained on board, they will be measured and, unless commingled, with Coastal's agreement, with incoming cargo, again after completion of loading.

In cases of discrepancies of over 0.5% between the computed ship's cargo loaded or discharged and the shore computed quantities, the ship will, in the case of loaded cargoes, be held at the berth or at anchorage for re-ullaging and examination, until the reason for the discrepancy is discovered or some other agreement with the cargo owner is reached.

Particular attention should be given to ensure that the ship's pipeline system used during the loading is full on completion of loading or, if drained into tanks, what portion is drained. It is helpful if the capacity of these lines is known. In the case of discharged cargoes, where the discrepancy between ship's and shore computed cargo quantities is greater than 0.5%, the ship will be examined and re-dipped. Ship's officers must calculate their cargo quantity independently of the inspectors.

It is emphasised that the ship should not start ballasting into cargo compartments during or on completion of discharging, unless authorised to do so by a Coastal representative (NOT the Contract Inspector).

ROB quantities will be computed from dips of the wedges of all 9remains in each tank. Trim correction will *not* be applied when the liquid does not entirely cover the bottom of the tank. If available, wedge tables will be used. In cases of large discrepancies between discharged ships and shore quantities, the quantity of oil floating on top of the ballast taken into cargo tanks might be measured to determine a more accurate ROB. A ship's officer will be required to sign for the quantity computed as ROB *"without" correction for trim,* the actual quantity ROB will be agreed upon later. A Note of Protest will be served on a ship which has an excessive pumpable ROB and a claim filed.

In cases of large ship/shore discrepancies and/or cargo contaminations, a ship's Master may wish to appoint an independent inspector to act on the ship's behalf.

Logging of Times of Operations: The Berth Operator/Dispatcher keeps a log of events during your ship's stay alongside. As this will be compared with the ship's port log before the latter is signed on behalf of the Terminal, it will save unnecessary differences, if the ship will cross-check with the Berth Operator, times of stopping and starting all cargo, bunker and ballast operations, and reasons for delay whether caused by ship or shore. This information exchange may be carried out by use of the UHF radio put on board your ship, calling berth number from ship (name) to raise the Berth Operator. Ship's officers on duty are not required to leave their ship for this information exchange.

Loading of Bulk Materials: No facilities exist at the Coastal POL Pier for the loading of bulk materials. Only stores as defined herein will be permitted to be loaded while alongside.

Lightering Operations in Subic Bay: Lightering operations, i.e. transferring of oil products or crude oil from one ship to another in the Subic Bay, must be approved by the Port Authorities, The Subic Bay Freeport Authority. Coastal will maintain all the equipment required for this operation, which is done in support of the Terminal.

It is emphasised that all vessels, that are ordered to load by lightering in Subic Bay, must arrive with all clean ballast for pumping overside without causing pollution.

Ship-To-Ship Transfers at the Dock: When it becomes necessary to transfer cargo directly from one ship to another via headers and pipelines, it is essential that a proper communications system is set up between the two ships, so that the receiving ship can regulate the flows of oil it is receiving, and stop it when necessary. Because of language and radio channel difficulties between ships, Coastal will set up a communications system, stationing on each ship an operator with a radio on a special frequency which cannot be interrupted. These operators will remain on board during the entire transfer operation.

BALLAST: *Deballasting Facilities:* All dirty ballast must be discharged into shore tankage, however the capacity of the shore reception facilities is limited. All clean, oil free ballast should be discharged overside. The responsibility for avoiding oil pollution rests with the ship. As a general guideline, ships arriving in ballast should have no more than 8% of their summer deadweight, as dirty ballast requiring to be pumped ashore (e.g. a 50,000 d.w.t. tanker should have no more than 4,000 long tons of dirty ballast). The remaining ballast needed to conform to the minimum draft requirements (See "Restrictions") must be clean for pumping overboard without causing pollution. Ships may be required by their Operators/Charterers to arrive with clean ballast and consolidated slops.

Also see "Loading/Discharging".

Note: Ballast Facilities not yet available (October 1993).

MEDICAL: Hospital located in Olongapo City.

FRESH WATER: Fresh water is available for sale at all berths at the POL Pier at Coastal's Subic Bay Terminal for delivery to ships. The ship should advise Coastal of its water needs in advance of its arrival.

FUEL: It is essential that ship's Masters include their bunker requirements in their arrival cable, and confirm their requirements by VHF when in range, but note that for Coastal to be able to supply bunkers, a bunker nomination must have been received from Coastal Marketing Miami or Singapore.

Also see "Loading/Discharging".

AIRPORT: Cubi (Subic) or Manila.

GENERAL:

Applications of Regulations and Requirements: Coastal's Subic Bay Terminal means: The POL Pier and the waters immediately adjoining it to a distance of 100 m. Ship at anchorage within the Subic Bay and destined to berth at the Coastal Subic Bay Terminal shall also be deemed to come within the scope of these Regulations. These Regulations and Requirements herein described shall be strictly observed within Coastal's Subic Bay Terminal, by all persons including personnel of ships, barges, tugs, launches, mooring boats and other craft. In the event of any conflict between these Regulations on the one hand and any SBMA or Government Law on the other hand, then latter shall prevail to the extent to which they are in conflict with the Regulations.

Knowledge of Regulations: The Master or person in charge of any vessel, whilst within Coastal's Subic Bay Terminal, shall have adequate knowledge of these Regulations and Requirements, and ensure that his crew members are fully informed of all requirements. In the case of small craft operating within Coastal's Terminal, the Owners must ensure that their employees know and will obey these Regulations and Requirements. Additional copies of these Regulations can be obtained from the Terminal's POL Pier Office, located at the head of the Pier or from ship's Agents.

Inspection: Subject to the agreement of the SBMA Customs and Immigration Authorities, any authorised representative of Coastal shall have the right to board any vessel within Coastal's Subic Bay Terminal and/or Subic Bay at any time for the purpose of ensuring that these Regulations are being observed.

Permission to Enter Coastal's Subic Bay Terminal: No ship, tug, barge, launch or other craft shall enter Coastal's Subic Bay Terminal without first obtaining the permission of the Terminal Manager or his authorised deputy as well as notifying the SBMA Port Authority of their arrival.

APPENDIX: *Tank Cleaning Guidance Chart:*

Last Cargo If grade last carried does not fall within general specifications of grades given below, seek special instructions.	*Cargo to be Loaded*										
	Avgas	Mogas	Lo Lead Naphtha	Kerosene Turbo	Gas Oil Heating Oil	Esso Heating	Belco Diesel	Marine Diesel	Vacuum Gas Oil	Fuel Oil	Crude Oil

For explanation of symbols see opposite.
+ Assumes MDO carried in clean ship. If not, substitute U.

Ship to Vacate Berth on Request by Coastal: As a condition of entry in Coastal's Subic Bay Terminal, a ship must vacate a berth promptly on being requested by Coastal (See "State of Readiness whilst Alongside").

Security of Buoyancy: When entering or leaving Coastal's Subic Bay Terminal in a loaded condition, it is important that the tanker's buoyancy is secured against ingress of water due to damage. Fore peak and pump room openings, including all ullage plugs, must be securely closed during the entire inward or outward passages.

Gangways: It is the ship's responsibility to provide and maintain a safe means of access between ship and shore. At the POL Pier berths, the ship must provide rig and tend a safe gangway or accommodation ladder, normally abaft amidships. The use of the shore hoist, where available, to assist in putting out or taking in a ship's gangway, is only allowed if the permission of the Berth Operator is given, and *if a Coastal employee is available to operate the hoist. Ship's personnel are not permitted to operate Coastal's equipment.* Coastal will accept no liability for damage caused by the failure of the hoist, and will bill the ship's Owner for any damage to the ship's gangway. If the ship's deck is higher than 10 ft. above the pier deck, a safety net must be rigged underneath the gangway. Particular attention must be given to providing safe access between the gangway and the ship's deck when the ship is high and the gangway is steep. Customs, Immigration, Quarantine and Coastal personnel will refuse to board a ship which does not have a safe gangway and access, with resulting delays for the ship's account.

State of Readiness of Ships Alongside: No repairs or work which will make the ship unable to move under its own power may be commenced without the written consent of the Coastal Terminal Manager or his authorised deputy. In general, such consent will be refused as, for the safety of the port, it is essential that ships maintain their propulsion, steering and other equipment required for unmooring and manoeuvring fully operational throughout their stay alongside. In cases where, through Force Majeure, a ship becomes immobilised whilst alongside, the Master must immediately advise the Berth Operator and the Operations Supervisor of the facts, so that a decision may be made on the advisability of continuing with cargo operations, and so that special precaution can be taken.

Ship/Shore Communications whilst Alongside: The Pilot, on boarding before berthing, will bring with him a portable UHF radio which he will use during the mooring operation and, before leaving the ship, will place under the care of the ship's Master. This radio will remain on board throughout the ship's stay alongside, and must then be handed back to the Pilot who sails the ship. Channel F1 on this radio is to remain open, so that the Berth Operator and Shore Operations Supervisor can contact the ship as necessary. The Berth Operator and the Operations Supervisor can be contacted on Channel F1 on this radio and overall control of loading/discharging can be maintained. This radio can also be used to advise time ballast is out, tank inspection is required, discharging is finished, stand-by or stopping loading pumps, ordering of pilots, etc. The radio must not be used for agency matters, nor for communicating with other ships and must be used responsibly. Should the radio be damaged or lost whilst under the care of the ship's Master, the cost of replacement will be billed to the ship's owner. The ship should call the Berth Operator or the Operating Supervisor if there is evidence that the battery is getting low or the radio is operating unsatisfactorily.

Appointment of Agent – Agency Services Available: No ship is allowed to enter Coastal's Subic Bay Terminal unless it has a duly appointed Agent or representative through whom all disbursements and ship's business can be channelled.

Also see "Safety".

SAFETY:

Ship/Shore Safety Check List: The Ship/Shore Safety Check List used at Coastal's Subic Bay Terminal is in general based on the ISGOTT Check List. It is Coastal's intent to check every ship as soon as possible after arrival. The Check List should also be used to self examine ship's safety, without waiting for Coastal personnel to perform a check.

Anchors: No ship may lay alongside a berth with an anchor on the bottom.

Emergency Towing-off Wires ('Fire Wires'): Fibre rope is not acceptable as an emergency towing-off wire.

Emergency Pilot Ladder: As soon as berthed, each ship at the POL Pier must put a pilot ladder over the offside just forward of the poop and keep the end just above the water level throughout the stay alongside, so that in an emergency, which makes boarding from the berth impossible, a pilot could board the ship.

Inert Gas Systems: All ships, having an inert gas plant (IGP), must before entry into Coastal's Subic Bay Terminal, confirm that the IGP is working correctly, i.e. maintaining positive pressure on all tanks with oxygen content of the inert gas less than 8% by volume. On arrival alongside, ships will be asked to depressurise tanks sufficiently to allow up to three ullage ports to be open at any one time for the purpose of gauging, sampling, waterfinding, temperature taking, tank inspection, etc., but ullage ports must be re-secured before cargo or ballast handling is commenced. During discharge of cargo or ballast, the IGP must be capable of producing sufficient inert gas of 8% or less oxygen quality to prevent air from entering the tanks. If necessary, the discharge rate must be regulated accordingly. *If the IGP is not operable, discharge will not be allowed to commence or, if during discharge of cargo or ballast, the IGP fails, the discharge must be stopped until the plant is again operational or, if this is likely to take more than 24 hours, until the ship's Owners and/or Charterers have been contacted, and a safe discharge plan agreed.*

When loading or ballasting into an inerted tank, the inert gas displaced must be vented through the ship's vent system and not the ullage plugs. The ullage plugs should only be opened during loading or ballasting for sighting, ullaging and sampling and personnel warned to keep upwind while carrying out these duties. If tanks which have been inerted have to be entered, after gas-freeing, for inspection, the inspectors must not enter the tanks until they are tested for oxygen content in addition to the normal test for hydrocarbons.

Loading Overall: Loading overall (through an open tank hatch or ullage plug) of any product is prohibited at Coastal Subic Bay Terminal.

Delivery of Stores over Coastal's Berths: The normal method of storing ships lying alongside Coastal's berths will be by stores launch. Minor amounts of stores defined as "dry goods" (no alcoholic or soft drinks) of a harmless nature in stout containers, which can be safely hand-carried up a ship's gangway with a total quantity of not more than 250 kg. or 4 cu.m., may be allowed to be put on board via the berth, but the supplier must first obtain a written permit from the Operations Supervisor. A shore crane will not be available for storing. The supplier will be responsible for clearing away any debris on the berth caused by the storing operation.

Repairs and Other Works, Storing by Launch, Hull Cleaning, etc., on Ships at Coastal's Subic Bay Terminal – Work Permits: All work performed on a ship alongside Coastal's Subic Bay Terminal by shore contractors must be with the permission of Coastal's Supervisor. Work requiring a cold work permit includes any cold work to be performed on the weather decks or hull of a ship alongside a berth at Coastal's POL Pier. Work performed by divers, including hull cleaning, and any work requiring a boat or a barge to lie alongside, including storing and lube oil delivery, requires a work permit to be issued prior to commencement of work. Hull cleaning by divers or machinery is *not* permitted when a ship is lying at a berth. Any diver working on the hull, rudder or propeller of a ship whilst alongside a berth must be accompanied by a helper and proper communications with the ship and Coastal established and maintained. All work requiring hot work, whether to be performed by contractors or ship's crew, on the weather decks or hull of ships alongside a berth at Coastal's Subic Bay Terminal, must be with the agreement of the Operations Supervisor, and done under the conditions of the Hot Work Permit issued by the Operations Supervisor. These permits are valid for 8 hours only, and must be renewed if work continues beyond an 8 hour period.

Tank Lids, Ullage Ports, Flame Screens, Tank Cleaning: All tank lids and tank cleaning plates shall be securely closed whilst loading, bunkering, discharging and ballasting. A tank cleaning plate may be opened during discharging where it is found safe to do so for the purpose of measuring remaining oil, water or sediments at the after section of a cargo tank. Only one plate shall be open at any time, and shall be closed immediately after the measuring is completed. Flame screens shall be in place in all ullage openings, and ullage ports shall be closed (and secured if ship is inerted) except when sighting, ullaging, sampling, etc. All lids of tanks not gas-free must be closed.

Chipping, Scraping and Painting: Chipping and scraping is not permitted on the weather decks or hulls of ships alongside a berth at Coastal's Subic Bay Terminal. Painting of ships' hulls from the deck, or fendering of a berth or from a position which can cause paint to fall onto the berth or its fendering, is not permitted. The painting of jetty fittings, pipelines, decks, etc., by ships' crew is strictly forbidden, and Coastal will bill the offending ship's Owner(s) with the cost of removing any such disfiguration.

Explanation of Symbols used in Tank Cleaning Guidance Chart:

A	When similar cargo to the last cargo carried is nominated, and no ballast is carried in tanks or cargo system concerned, no preparation, other than draining, may be necessary unless advised to the contrary.
B	Tank bottoms, cargo lines and pumps to be waterwashed; tank lines and pumps to be completely drained, special attention to be paid to deadends and low points, including deck lines and manifolds. Valves to be opened to drain lines of excess water.
C	Tanks, lines and pumps to be cold water machine-washed; tank lines and pumps to be completely drained, special attention to be paid to deadends and low points, including deck lines and manifolds. Valves to be opened to drain lines of excess water.
D	Tanks, lines and pumps to be completely drained of cargo and/or water, special attention to be paid to deadends and low points, including deck lines and manifolds.
F	Fresh water rinse large tanks, lines, pumps and risers to remove traces of salt.
G	Tanks must be gas-free to below 40° of the lower explosive (or flammable) limit.
H	Tanks to be hot water machine-washed, lines and pumps to be hot washed; tanks, lines and pumps to be completely drained paying special attention to deadends and low points, including deck lines and manifolds. Valves to be opened to drain lines of excess water.
M	After gas-freeing for entry, tank bottoms to be mopped dry of all water after valves have been opened, prior to loading.
S	After gas-freeing for entry, all loose scale and sediment to be removed.
W	Spot tank cleaning machines where necessary to cover shadow areas, under beams and plate stiffeners, etc.
X	Special cleaning instructions required from Owners/Charterers.
U	Not suitable for this grade to follow.
Note:	1. Hot wash water temperature (H) should be in accordance with coating manufacturers recommendations, but not less than 95°F. 2. If changing from dirty to clean trade special chemical cleaning is necessary.

Crew Access between Ship and Terminal Gates: The crew members of ships at the POL Pier berths are allowed to walk to the main POL Pier compound gate. The ship's Agent must arrange for transportation from there to the main Subic Bay Freeport gate going into Olongapo City. The Agent shall submit a Crew List to the SBMA and to Coastal (Operations Department).

Crew Passes and Crew Lists: Crew Lists must be submitted to Coastal's Operations Supervisor by ship's Agent, and crew members on shore leave must carry some means of identifications, so that they can be checked off against their ship's Crew List at the POL Pier main gate and at the SBF main gate.

Ship's Agent must make arrangements for crew members joining a ship at Coastal's Terminal to be issued with a pass to enter the SBF to join a ship.

Intoxicated Persons: No person who appears to be in an intoxicated condition or under the influence of drugs will be allowed within Coastal's Subic Bay Terminal. If a crew member in such condition arrives at the POL Pier gate, he will be refused permission to enter until the Master or an officer in charge of his ship provides an escort to supervise him between the gate and the ship.

Vehicular Traffic: No vehicles, except those delivering stores, will be permitted to enter Coastal's Subic Bay Terminal.

Ship Visiting: In general, the visiting of ships berthed at Coastal's Terminal by other than bona fide crew members, Owner's representatives and contractors having business on board (not seeking business) is not allowed or encouraged. In special cases, the Master may make arrangements with the Coastal Terminal Manager or his designee for others to visit his ship. Agents are not authorised to make these arrangements. Coastal Supervision and the Berth Operator will visit the ship from time to time in connection with their business, but in no circumstances should any Coastal representative visiting a ship be offered alcoholic beverages or gifts.

Fire Alarm: The Terminal fire alarm is situated on the POL Pier Office Building No. 1423 at the shore end of the POL Pier. The general fire alarm, which will be sounded in the event of a fire involving Coastal's Subic Bay Terminal or any ship or other craft at the Terminal, will be 8 short blasts on the fire siren repeated 3 times. The Terminal fire alarm will be tested on the first Monday of each month at 1100 hrs. All ships in the Terminal will be notified beforehand. Pull alarms are located at each station on the pier.

WEATHER/WIND/TIDE:

Tidal and Current Information: The tides are diurnal with a maximum amplitude of 4.7 ft. (1.43 m.) at the Spring solstices, but a normal average is 1.0 ft. to 1.8 ft. (0.31 m. to 0.55 m.). The datum used is MLW, and the water level is not likely to fall more than 7.2 in. (182 mm.) below this. The current at the POL Pier is non-existant. There can be some small current in the Bay during periods of high rainfall due to fresh water run off.

Electrical Storms: Severe electrical storms are not common in Subic Bay, but should one pass in the near vicinity during the handling of low flash cargo or loading or ballasting into non gas-free tanks, inert gas purging, tank cleaning and gas-freeing operations shall be temporarily stopped, and all tank openings and vent line valves closed until the storm has passed.

Heavy Rain Storms: Should a heavy rain storm, usually of short duration, occur during the topping-off operations in loading cargo or bunkers, the Berth Operator should be asked to stop the loading until the heavy rain has stopped.

Strong Winds: Although Subic Bay is a well protected natural harbour, strong winds can occur during typhoons and other strong storms. When wind speeds exceed 30 knots, ships will, depending on the wind direction and general weather synopsis, be alerted that cargo/deballasting/bunker operations may have to be suspended and arms disconnected. The Terminal has the responsibility of determining when wind conditions are reaching the limit of the design criteria for continued operation of the cargo arms.

Typhoons/Hurricanes: Coastal will monitor the movement of all tropical storms in the South China Sea and the Western Pacific. Ships will be alerted when weather conditions might affect the cargo operations, and based on the reported proximity and severity of the storm may be required to:

Suspend loading/discharging/deballasting operations and disconnect arms/hoses.

Keep engines and other equipment in a state of immediate readiness, should it be necessary to vacate the berth.

Ships at anchorage in the Subic Bay will be advised by the Subic Bay Freeport Authority what, if any, action should be taken.

Loading Fuel Oils after Crude Oils: Where unpumpable bottom residues, sediments or BS&W remain from the previous cargo of crude oil, tank bottoms must be machine-washed, hot or cold according to the removability of the sediments, lines and pumps flushed and all water and residues completely stripped from tanks, cargo lines and pumps into a single tank for pumping ashore prior to loading any residual type fuel oils. If appreciable sediments remain in ballast tanks on completion of discharge of dirty ballast ashore, it may be necessary to bottom wash these tanks. The slop tank, if being used to load fuel oil, after discharge ashore, must be hot machine-washed and stripped dry of all water and sediment, pumping directly ashore.

Note: If last cargo was a "sour" crude, see "Radio – Pre-Arrival Information – (c)".

AUTHORITY: Subic Bay Metropolitan Authority (See "Part (A)").

Operator: Coastal (Subic Bay) Terminal Inc., Building 8344, Sulu Road, Subic Bay Freeport Zone, Philippines 2222. *Tel:* 63-47-52-8888. *FAX:* 63-47-252-8856. *Contact:* Gordon Hartman, Terminal Manager.

AGENT: Jardines Shipping Agencies (See "Manila").

SURIGAO, Mindanao: 09.49 N. 125.29 E. **(See Plan)**

PORT LIMITS: A vessel is considered an "arrived ship" when 1 mile N.E. of Lighthouse.

DOCUMENTS:

Crew List.
Passenger Manifest.
Record of Vessels Boarded.
Statement of Facts.
Voyage Memo.
Ship's Particulars.
Coasting Manifests.
Statistical Supplement.

PILOTAGE: Pilotage is compulsory for all vessels.

Maasin-Surigao Harbour Pilots Association, through Captain C.Toledo, is informed 24 hours before expected arrival of the vessel by telegram, or as the vessel approaches the port limits or anchorage area. The pilot is contacted through VHF Channel 16. The pilot boat is painted orange, and the Pilot Station is located at the side of the lighthouse. Pilot boat's docking area is located at the Northernmost portion of the baseport of Surigao, adjacent to Berth No. 1.

Harbour Pilots Boarding Station:

	Latitude	Longitude
Foreign Vessels	09° 51' 30" N.	125° 28' 30" E.
Domestic Vessels	09° 47' 43" N.	125° 30' 40" E.

ANCHORAGES: Vessels can anchor in 30 m. with sand bottom in a position 0.25 miles East or S.E. of Surigao Light. Anchorages are exposed to N.E. monsoon.

RESTRICTIONS: There are at present no tide or draft restrictions for entering the harbour for anchorage purposes for formalities. It is not recommended to transit through Hinatuan Passage for purposes of docking at Nonoc Pier at night, due to unpredictability of the current.

MAX. SIZE: Vessels maximum permissible length at baseport is 150 m., and maximum draft not to exceed 8.0 m. at M.L.L.W.

RADIO: Port Management Office (PMO) of Surigao is equipped with Vodex telephone, Fax and Single Side Band (SSB), which is used as the communication link between PPA – PMO Surigao and Head Office and all other PMOs throughout the country. The call sign is simply "PMO Surigao".

VHF: *Vessels Traffic System (VTS):* Part of the Port Operations Radio Traffic System is the Vessel Traffic System (VTS), where vessels arriving at baseport of Surigao establish voice contact with the Philippine Ports Authority (PPA) – PMO Surigao, through VHF Channel 16 and 148.57 MHz. Any information vital to docking, required cargo handling service, dangerous cargo warning, etc., are relayed to the base, whose call sign is "Blue Gee Base", or any of the following: Bollard Master: Port Manager. Bollard One: Operations Manager. Bollard Two: Terminal Supervisor.

TUGS: No tugs available. For tug requirements, please contact PPA Cebu or Manila.

Note: Tugs on stand-by in the locality could be arranged for towage.

BERTHING:

Main Berth (Northern Portion): 354 m. long. 15.0 m. wide (working area).

At M.L.L.W., maximum permissible drafts are as follows:

Berths No. 1 – 1.5	4.0 m.
Berths No. 1.6, 2, 3 and 4	8.0 m.
Berths No. 5, 6 and 7	6.0 m.

Bulkhead (Southern Portion): 172 m. long; where smaller crafts like pump boats and motor bancas from the islands dock. Maximum permissible draft for Berths No. 8, 9 and 10 is 2.0 m.

Berths are numbered from 1 to 10, starting from the Northern portion of the wharf.

The port has no attached shore equipment or quay cranes, but it is capable of handling cargo/heavy lifts with the following equipment:

1 crane with S.W.L. 15 tons.
4 forklifts of 5 tons capacity.
1 forklift of 15 tons capacity.
27 units trucks.
4 LCT's for loading/unloading midstream.

Regulations: First come first served basis is the general rule in determining berthing priorities.

STEVEDORES: 24 hours before arrival of vessels, the cargo handling operator is informed, through a copy of the Application for Berth, to give ample time for the preparation of gang complement. One hour after vessel's failure, to arrive as scheduled, could mean settlement of laborers' stand-by time; unless the vessel's representative is able to file an amended schedule.

Cargo handling efficiency/performance is assured by the implementation of the Vessel's Operations Commitment (VOC), which serves as sort of contract between the carrier and cargo handler.

MEDICAL: Surigao Provincial Hospital, Miranda Family Hospital, Surigao Medical Center and Grace Christian Clinic of Surigao City service major and minor injuries. Laboratory facilities are also available.

FRESH WATER: The baseport of Surigao provides water at P.48.00 per cu.m. The fresh water at the port of Surigao is one of the factors that increases vessels' calls.

FUEL: Available.

FIRE PRECAUTIONS: The port has a well organised Fire Brigade and Evacuation Committee. It is equipped with fire extinguishers, sand drums, shovels, and axes at strategic areas of the port.

GANGWAY/DECK WATCHMAN: Provided by the security force of PMO – Surigao, as the port adopts the concept of Unified Security Command. During arrival of passenger vessels, or any vessel that requires security, security guards on tour of duty are augmented with those not on regular tour. On watch for any pilferage of cargo or any behavioural problem, the security guards, PPA Operations Officers, and members of Brazo sa Pantalan work as a team.

HATCHES: Opening/closing of hatches performed by dockhands and monitored by PPA Operations Officer-on-Duty.

AIRPORT: Airport is 4 km. away from the Baseport of Surigao City. Flight schedules of Philippine Airlines are as follows:

Tuesday, Thursday and Saturday: Arrival 0945 hrs., departure 1010 hrs.

Monday, Wednesday and Sunday: Arrival 0730 hrs., departure 0745 hrs.

BANKS: There are no banks within the port area, but all banks within the City are very accessible from the port area at a maximum distance of 1.0 km. These are the PNB, Far East Bank, PCI Bank, DBP, UCPB, BPI Family, BPI, Allied Bank, RCBC, Rural Bank, Land Bank and Metro Bank.

DELAYS: Delay is a very remote possibility, as the baseport has only an average berth occupancy rate of 40%.

GENERAL: *Port Management of Surigao:* One of the focal points of foreign and domestic shipping in Southern Philippines is PMO – Surigao. Port of Surigao is the principal port serving the provinces of Surigao del Norte, Surigao del Sur, including Bislig Port, Siargao and Dinagat Islands, Agusan del Sur and Southern Leyte.

AUTHORITY: Philippine Ports Authority, Port of Surigao, Port Area, Surigao City, Northern Mindanao, Philippines. *Tel:* 87366, 87361. *Contact:* Fernando A. Almeda, Jr., Port Manager.

TABACO, Luzon: 13.41 N. 123.58 E. (See Plan)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advice should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the wharf aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within the Tabaco Bay but not less than 500 m. from the existing facility.

MAX. SIZE: LOA 300 m., draft 40 ft.

HEALTH: Vessels clear quarantine on arrival at the Tabaco Harbour. Quarantine Officers will normally board the vessel 2 km. from the existing wharf.

BERTHING: The existing facility can accommodate two foreign-going vessels of regular size at one time. Length of quay 300 m. Width 23 m. Storage area 2 hectares. Max. depth of water 10.0 m. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 22 tons per gang hour.

CRANES: 2 mobile cranes available with capacities of 20 and 25 tons. For heavy lifts, vessels are required to use their own gear.

STEVEDORES: Provided by Tafworks Arrastre Corporation.

MEDICAL: 1 government hospital and 2 private hospitals.

FRESH WATER: Can be provided by pipeline or hoses from the port facilities.

FUEL: All grades obtainable from major oil depots at Legazpi City which is approximately 27 km. from the port area and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

HATCHES: Opening and closing of hatches is part of the stevedores' work or at the Master's option.

REPATRIATION: All facilities available for crew changes.

AIRPORT: At Legazpi City.

HOLIDAYS: New Year's Day (January 1st); Araw Ng Kagitingan (April 9th); Holy Thursday; Good Friday; Labour Day; (May 1st); Independence Day (June 12th); Bonifacio Day (November 30th); Special Holidays declared by the President of the Republic of the Philippines are also included. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and Fire, Tel. 222; Ambulance, Tel. 215.

TELEPHONES: Placing of telephones on board can be arranged with the branch office of the local telephone company (MATELCO).

SHORE LEAVE: Crew allowed ashore in company of an Immigration Agent.

GENERAL: Vessels intending to call at the port of Tabaco shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.

DEVELOPMENTS: Passenger Terminal; 5 sets cluster lights; fenced and concrete open storage area.

AUTHORITY: Terminal Supervisor, Philippines Port Authority, Port of Tabaco, Tabaco, Albay. *Tel:* 378.

Philippine Port Authority, P.O.Box 164, Legazpi City 4500, Philippines. *Tel:* 2012. *FAX:* 05221-243431. *Contact:* Edgar C. Pilar, Port Manager.

TACLOBAN, Leyte: 11.15 N. 125.00 E. (See Plan)

See "General" before first port.

DOCUMENTS: *Entrance Formalities:* For submission to PPA Harbour Section:

3 copies Inbound Coasting Manifest with enclosed or attached on each copy the following:

Crew List.
Oath of Master.
Passenger List (passenger vessels only).
Import Declaration (foreign vessels only).
Pratique (foreign vessels only).

Roll Book for presentation and clearance from last port of call also required.

Exit Clearance:

3 copies Outbound Coasting Manifest with attached or enclosed on each copy the following:

Crew List.
Oath of Master.
Passenger List (passenger vessels only).
Export Declaration (foreign cargo vessels).

PILOTAGE: The following signals from vessels requiring a Pilot are:

By day:

(a) The pilot jack hoisted at the fore.
(b) The International code signals or P.T.
(c) 2 long blasts followed by 1 short blast on ship's whistle.

By night:

(a) The pyrotechnic light, commonly known as blue light every 15 minutes.
(b) A bright white light, flashed or shown at short or frequent intervals just above the bulwarks for about a minute at a time.
(c) The International code signals P.T. by flashing lights.

Telegraphic address is Tacloban Harbour Pilot's Association, Tacloban City. 24 hours notice of ETA is required before arrival of vessels. No VHF in pilot boat or Pilot Station.

All pilot boats in general are painted white above the waterline and black below, with the letter "P" not less that 12.5 cm. in length on both bows above the waterline.

During the day, boat in use shall carry at the mast a red and white flag not less than 6 decimeters wide and 9 decimeters long.

The exact location where the Pilot has to be taken on board when entering Tacloban through San Juanico Strait is at Canauay Island about 2 miles N.W. of said Island. For vessels entering Tacloban Port through San Pedro Bay, the Pilot may be taken on board a mile North of Mariquitdaquit Lighthouse.

In case of bad weather, vessels are advised to drop anchor about 3 miles South of Dio Island when waiting for the Pilot.

With respect to safety measures while Pilot boarding vessels, it is suggested that the Master put his vessel to windward in a postion where the pilot boat is protected from big waves and strong winds. They must lower their accommodation ladder or rope ladder.

The location of anchorage for vessels awaiting a Pilot is either 1 mile North of Mariquitdaquit or 2.5 miles S.E. of Dio Island.

ANCHORAGES:

Dio Island Anchorage:

Position – 2 miles S.E. of Dio Island
Depth – 6 – 7 fathoms
Area – 4 square miles

Basey Anchorage:
Position – 1.6 miles West of Jinamoc Lighthouse
(Lat. 11° 15' 36" N., Long. 125° 04' 32" E.)
Depth – 4.5 fathoms
Area – 0.8 square miles
Tacloban Quarantine Anchorage:
Position – 0.5 miles South of Binatac Point
0.7 miles North of Panirungan Point
Depth – 4 – 5 fathoms
Area – 1 square mile.

RESTRICTIONS: Controlling draft for vessels entering Port of Tacloban via San Pedro Bay is 19 ft.

Due to numerous shoals, reefs and fish traps which abound in the area along the channel, vessels arriving at night must drop anchor either at the point 1.5 miles North of Mariquitdaquit or at the point 2 miles S.E. of Dio Island. The Pilot will conduct the vessels in at daybreak.

Tides in Tacloban show great inequality, mostly at HW. Mean range of tide is about 1.6 ft., whereas the Diurnal range is 2.3 ft. Flood current sets in a Northeasterly direction, while ebb current sets Southeasterly with a maximum velocity of 3 knots.

MAX. SIZE: See "Berthing".

HEALTH: Pratique is only necessary and required in the first port of entry; it is automatic when entering ports in the same country or state.

RADIO: Radio communication of the Philippines, Inc., Manila.

TUGS: Tugs normally join the vessel when inside Tacloban Harbour. For docking, tugs usually use the vessel's lines.

BERTHING: Inform local office of Philippine Ports Authority at least 24 hours before ETA if vessel on scheduled voyage and 36 hours before ETA if a tramping vessel.

Length of quay – 1,048.8 m., with 217.3 m. allotted for foreign vessels, 585.5 m. allotted for domestic vessels and 246 m. allotted for pump boats.

Maximum permissible ship draft at low water (sea water), Foreign vessels – 6 m.; Domestic vessels – 4 m. – 6 m.

Note: Actual depth along berth for foreign vessel at LW, 7 m.; Domestic, 4 m. – 7 m.

Load/ Discharge – Usually by ship's own gear but shore equipment available for rent.

BULK CARGO FACILITIES: See "Berthing" for berth details.

Cargoes handled: Copra, grain, abaca, sugar, rattan, lumber, drinks, goods in cartons, crated products, heavy lifts, steel bars, etc.

Facilties: Rope nets, rope slings, cable slings, spreader sets, sliding boards and pallets.

STEVEDORES: ETA advices should be furnished to stevedores through ship's Agent.

MEDICAL: Advance notice of required medical attention to ship's Agent essential.

TANKERS: No facilities.

FRESH WATER: Fresh water available through local supply.

FUEL: Only available to domestic (small) vessels.

FIRE PRECAUTIONS: Fire station in port area.

CONSULS: None.

REPAIRS: Not possible.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Necessary for safety of vessel. Ship's Agent makes all necessary arrangements.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All documents required by International Shipping Rules and Regulations.

CUSTOMS ALLOWANCES: One carton cigarettes per week for each man. Wines/spirits at the discretion of the Collector of Customs.

CARGO GEAR: Load/discharge affected usually by ship's gear but shore equipment available for hire.

REPATRIATION: Immigration Officer effects crew changes and arranging necessary repatriations.

AIRPORT: Distance from airport, 9 km., and is regularly served by airlines.

HOLIDAYS: Depending upon agreement with stevedores, work may be performed during holidays.

POLICE/AMBULANCE/FIRE: All departments are within one minute's call from the harbour.

TELEPHONES: Can be connected on board if required.

SERVICES: No special services available.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Needed for inspection by Immigration Officer.

GARBAGE DISPOSAL: Garbage disposal is available upon request from the City Government of Tacloban.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No seaman's clubs organisation exists, however facilities such as telephone, church services, shopping centers exist, while other services can be arranged in coordination with local clubs such as YMCA, JAYCEES, Lions, Rotary and other organisations.

CURRENCY: Philippines Pesos (P).

REGULATIONS: No unusual regulations.

DELAYS: Berthing: When all berths are occupied upon arrival. Loading/ discharging: Limited number of available haulers due to simultaneous operations of vessels at berth. Bunkering: Simultaneous bunkering of vessels.

SHIPMASTER'S REPORT: January 1991.

Documents:

Prepared by Agent:
12 copies Inward Foreign Manifest.
12 copies Outward Foreign Manifest.
12 copies Oath of Master.

Prepared by vessel:
Last Port Clearance.
12 copies Crew List.
5 copies Stores List.
5 copies Personal Effects List.
5 copies Animals List (even if 'nil').
5 copies Arms and Ammunition List (even if 'nil').
5 copies Plants List (even if 'nil').
5 copies Narcotics List (even if 'nil').
5 copies Passengers List (even if 'nil').
5 copies Ports of Call List.
3 copies Ship's Particulars.

If Tacloban is the first Philippine port:
1 copy Health Declaration.
2 copies Vaccinations List (Cholera and Yellow Fever).

Pilotage: Vessels entering from the South (San Pedro Bay) are strictly recommended to take the Pilot at a position about 1.5 miles North of the Mariquitdaquit Lighthouse, as all buoys shown on B.A. Chart No. 3840 are missing. In addition, the Pilot does not follow the recommended track on the said chart, he gives a wide berth to the West of the Egbert Shoals which are not marked by buoys.

The Pilot can be contacted by VHF on Channel 16.

The Pilot only works with visible landmarks, if they are obscured by rain and/or fog the Pilot anchors the vessel. Pilotage is carried out during daylight only.

Berthing: There are no tugs available. The Pilot will not berth and/or unberth the vessel during strong winds.

Vessels are berthed port side to.

Maximum allowed draft is 19 ft., but sailing with this draft is only possible at high water.

AUTHORITY: Philippine Ports Authority, Port Management Office, Port Area, Tacloban City, Philippines. *Tel:* 321-2469, 321-3373, 321-3374. *FAX:* 325–7248. *Contact:* Alex T. Cruz, Port Manager.

TAGALOAN, Mindanao: 08.32 N. 124.44 E. **(See Plan)**

SHIPMASTER'S REPORT: February 1989.

LOCATION: Lat. 08° 31' 50" N., Long. 124° 44' 21" E.

The wharf is in Macajarlar Bay and is aligned 150°/330°.

The wharf is private and operated by Ferrochrome Philippines Inc., Tagaloan Misamis Oriental, P.O. Box 249, Cagayan De Oro City 9000, Mindanao, Philippines.

PORT LIMITS: The Agent declared vessel as "arrived" when in position Lat. 08° 32' N., Long 124° 40' E., which is the position given for picking up the Pilot (Cagayan De Oro), but the consignee considers the vessel arrived only when berthed.

DOCUMENTS: Fifteen Port Officials boarded the vessel at Cagayan De Oro and once vessel was cleared, after one hour, vessel proceeded to berth at Tagaloan.

Officials from Customs / Immigration / Quarantine / Plant and Quarantine / Health / Coast Guard / Agent and two separate officials boarded from Manila as vessel had People's Republic of China crew, whom the Philippine Authorities class as restricted crew for landing purposes.

Following documents were required:
4 copies Crew Personal Declaration.
4 copies Provision, Engine Room and Deck Stores.
4 copies Narcotic List.
4 copies Bonded Stores.
3 copies Cargo Manifest.
4 copies Plant and Animal Declaration.
4 copies Vaccination List.
3 copies Ship's Particulars.

PILOTAGE: Pilots were arranged by Agent from Manila. Vessel had given 7/5/3/2 and 1 day's notice of ETA to Agent. Vessel requested to pick up Pilot at Cagayan De Oro in position 08° 32' N., Long. 124° 40' E. Vessel did not send separate message to Pilots.

Anchorage only in deep water of about 90 m, vessel remained underway near the Cagayan De Oro until port officials had cleared the vessel.

The same Pilot will berth the vessel at Tagaloan, but had to proceed at very slow speed, as the Pilot launch had to keep up with the vessel and it is used for line handling at the berth.

Pilots at Cagayan De Oro are a private organisation and service the whole of Macajarlar Bay.

Address: Cagayan Harbour Pilots Inc.
Port Area Macabalan, Cagayan De Oro City
Tel: 24-47. Telex: 7789 (PT & T).

RESTRICTIONS: Pilotage available 24 hours, depending on weather conditions, as no tugs available.

MAX. SIZE: Max. draft 10.0 m., and max. deadweight 40,000 tons. Size restriction is due to stresses imposed on pier equipment when vessel is shifting alongside.

HEALTH: Free Pratique is granted on arrival. No Radio Pratique available.

VHF: Cagayan De Oro Pilots operate on VHF Channel 16 and work on Channel 6. Contact with Pilots was made at a distance of 35 miles when approaching from the West.

TUGS: Not available, but tugs can be obtained through Agents of the "Villanueva", 3,000 h.p., but very expensive. Pilot informed us that one tug of 1,000 h.p. will be available late 1989.

BERTHING: Max. draft 10.0 m., depth alongside 12.0 m.

Only one shore crane available with S.W.L. of 12.5 tonnes, reach 22.5 m., height of lift 26.0 m.

Conveyor capacity – 140 tonnes/hr. – 200 tonnes/hr.

Cleaning of holds is done by small skid loader. Conveyor not designed for lumpy ore and maximum size that can be discharged is 150 mm.

Discharging done by shore crane and vessel has to move alongside the berth, the only problem was when discharging the extreme end hatches, the leads for the lines were very short. Loading done by ship's gear and should be at least 15 tonnes SWL, as the buckets used, when loaded, weigh approximately 14.5 tonnes.

Rates given by pier operators were as follows:

Discharging	Chrome Ore (Fine)	2,000 tonnes/day.
	Chrome Ore Lumps	1,000 tonnes/day.
	Coke	2,000 tonnes/day.
Loading	Ferrochrome	1,500 tonnes/day.

For our vessel discharging Chrome Ore (fine), a rate of 3,400 tonnes per day was achieved.

STEVEDORES: Pier operators have their own stevedores.

MEDICAL: Medical and hospital facilities available at Cagayan De Oro City, which is 30 minutes by car.

DENSITY: 1023 – 1025.

FRESH WATER: Can be arranged by road tankers, but requires a very long hose of 200 m. at least, and therefore not recommended.

PROVISIONS: Good quality provisions can be arranged from Cagayan De Oro City.

GENERAL: At present, about 3 – 4 ships call at this port each month for discharging chrome ore, coke and other raw materials for the Ferrochrome plant. Main cargo loaded is Ferrochrome (finished product), about 80% to Japan and the rest for Europe. An average of about 2 or 3 ships call each month for loading the finished product, and quantities loaded do not exceed 5,000 – 7,000 tonnes at any one time.

The Ferrochrome Plant is a joint venture between the Philippines and an Austrian Company.

TANAUAN, Leyte: 11.06 N. 125.01 E. (See Plan)

SHIPMASTER'S REPORT: 1976

N.I.D.C. Coconut Oil Pier: Location of berth Lat. 11° 06' 15" N., Long. 125° 01' 30" E. The berth is 7 miles from the Pilot boarding point. Least depth of water in channel from sea to berth, 32 ft. At berth bottom is mud and sand. Density 1025. Docking and undocking in daylight only at any stage of tide.

Anchorage 1.5 miles North of Mariquitdaquit Light. Terminal Information: Use shore hoses. Length of pipeline – 3,000 ft. connection at manifold – 8 in. Shore-booster pump not used. No steam. Product handled, coconut oil.

Port Information: Pilotage compulsory. Pilot requires 12 hours' and 24 hours' notice. Pilot boards 1 mile North of Mariquidaquit Island and comes from Tacloban. It is unsafe to enter and leave after dark. Vessels can enter and leave any state of tide. Max. LOA 1,000 ft. Max. beam 90 ft. Max. draft 31 ft. No tugs available. Vessel able to berth andunberth without aid of tugs.

Facilities available: Fresh provisions available from Tacloban, a small town, 20 km. away. Chandler requires payment in cash for goods.

Airport at Tacloban. Doctor and hospital available. Groceries, meats and laundry available.

No fresh water, repairs, Lloyd's Surveyor or fuel available.

TOLONG (Santa Catalina), Negros Oriental: 09.20 N. 122.51 E. (See Plan)

SHIPMASTER'S REPORT: March 1995.

VESSEL:

Deadweight	17,300 tonnes.
LOA	145.5 m.
Beam	21.0 m.
Summer Draft	9.48 m.

DOCUMENTS:

10 copies Crew List.
5 copies General Declaration (Stores).
5 copies Personal Effects List.
5 copies "Nil" List.
5 copies Ship Particulars List.

Officials: Tolong was our second port of call in the Philippines. As there is no local Immigration, Customs and Quarantine Station, all Officials come from Dumaguete (3 Customs Officers, 2 Immigration Officers, 1 Quarantine Officer, 1 Plant and 1 Animal Officer).

Accommodation: Accommodation is required for 3 Customs Inspectors and one Immigration Officer. If this can not be provided on board, it may be arranged ashore on Owner's account.

PILOTAGE: The vessel is met by the Pilot about one nautical mile S.S.W. of the pier at Tolong. He boards from a slow, small motorised fishing canoe. Contact with Pilot is on VHF Channels 16/6. Pilot usually boards at Dumaguete.

APPROACHES: See B.A. Chart No. 3811.

This chart is not much use as an approach chart as the scale is too small. However, the water is deep, and therefore it does not matter too much. It is not recommended to approach closer than one nautical mile without a Pilot on board. The shallow water near the beach is marked by bamboo poles.

ANCHORAGE: The safe anchorage is 0.2 – 0.35 m. nautical miles S.E. from head of pier and 0.25 nautical miles off coast line, with 8 shackles of cable in water for our vessel. The nature of the bottom is sand.

RESTRICTIONS: Port open during N.E. Monsoon only.

Also see "Berthing".

MAX. SIZE: Depth of 10.0 m. MLLW along the berth, after dredging.

TUGS: Not available.

BERTHING: One berth only, for loading of raw sugar in bulk. The pier and dolphins are concrete, but well fendered.

Arrival and departure from berth is during daylight only.

Vessels always berth head in, starboard side to, due to depth of water limitation and restricted manoeuvring area.

On approach to the dock, the port anchor is walked out and dropped when about 70 m. from the pier.

Small motorised fishing canoes are used as mooring boats.

Mooring arrangement:

Forward:	2 long head lines to dolphin.
	2 breast lines to dolphin.
	2 spring lines to pier/dolphin.
Aft:	2 long stern lines to dolphin.
	2 breast lines to dolphin.
	2 spring lines to pier/dolphin.

Warning: It is strongly recommended to sound the depth of water around the vessel after berthing and after every shifting. On arrival, Pilots and Pier Manager declared the depth of water from 10.0 m. – 11.0 m., but actual depths were from 6.0 m. – 9.0 m. Vessel had to stop loading and wait at anchorage 5 days for completion of dredging. As per Agent's information, the berth should be dredged every few months.

BULK CARGO FACILITIES: Loading conveyor belt system (with trimmer) is fixed and the vessel has to shift from hatch to hatch. Loading rate 200 tonnes/hr. Warehouse capacity about 6,500 tonnes.

STEVEDORES: Cargo work carried out day and night.

MEDICAL: All medical and hospital facilities are available in Dumaguete. One doctor is on duty at Santa Catalina.

FRESH WATER: Available by truck, at cost of U.S.$4.50 tonne.

FUEL: Not available.

GANGWAY/DECK WATCHMAN: Shore gangway. Watchman recommended, arranged with private security agencies from Dumaguete.

OPENING/CLOSING HATCHES: Carried out by the ship's crew.

REPAIRS: No facilities locally.

CUSTOMS ALLOWANCE: Sufficient amount for crew's consumption. Bond sealed.

REPATRIATION: Arranged by ship's Agent through Immigration Post at Dumaguete.

AIRPORT: At Dumaguete, about 100 km. by road from Tolong. Regular daily jet flight to Manila.

TIME: GMT plus 8 hours.

TELEPHONES: Facilities available for domestic calls in Santa Catalina. Facilities for international calls in Dumaguete only.

PROVISIONS: Only available from Dumaguete. Master can purchase vegetable, fruits and seafood locally.

SHORE LEAVE: Advisable in daylight only.

IDENTIFICATION CARDS: Not required. Movement area is Santa Catalina/Dumaguete.

VILLANUEVA, Mindanao: 08.35 N. 124.44 E. (See Plan)

DOCUMENTS, etc.,: See "Cagayan de Oro".

MAX. SIZE: Max. LOA 340 m., max. draft 21.5 m., max. beam 55 m.

BERTHING: Max. workable length allowed without shifting 248.5 m., max. height of hatch coamings above waterline 17.0 m., max. width of hatch coamings 16.8 m., outreach of grab from fender line 33.0 m., mean (F.W.) depth alongside 23.55 m., length of berth 351.0 m., depth at MLW 23.28 m., depth at MHW 24.38 m., distance from pier face to MHW level 4.45 m., distance from grab to MHW 22.25 m.

SHIPMASTER'S REPORT: May 1980.

Location: The Port of Villanueva is situated in Macajarlar Bay on the North coast of Mindanao Island in position Lat. 8° 34' 45" N., Long. 124° 44' 22" E. and has a clear deep water approach.

Pilotage: The Pilot and possibly Quarantine Officials board in position Lat. 8° 35' N., Long. 124° 40' E. by launch from Cagayan de Oro City.

Approaches: When approaching from the East, passage through the Surigao Strait creates no difficulties as there is deep water. There are good radar targets and no excessive tides or currents. Passage between Camiguen Island and the coast is also clear and deep. Numerous fishing vessels encountered throughout the area as well as frequent passings of coastal traffic.

Anchorage: Although there is very deep water to close inshore there is an anchorage position, recommended by the Pilots, in position Lat. 8° 37' N., Long. 124° 44' 30" E. which is 1 mile offshore.

Tugs: There are at least 4 tugs to assist with berthing, all modern efficient vessels of over 3,000 h.p. Tug's ropes used for towing.

Berthing: Berth is in position Lat. 8° 34' 45" N., Long. 124° 44' 22" E. and is aligned 050°/230°. The berth is 350 m. in length and fendered with 7 'Yokohama' balloon type fenders. Vessels of up to 300 m. in length berth port side alongside, vessels over 300 m. LOA berth starboard side alongside. Depth alongside 23 m. – 29 m. Daylight berthing only but reported able to leave at any time.

Moorings: Standard mooring equipment used, line boat used to run head and stern lines.

Moorings usually 4 head/stern lines, 2 breast lines and 2 springs at each end of vessel.

Loading: Loading is carried out by 1 loading unit with a capacity of over 4,500 t.p.h. The product, sinter ore, is a finished product with a stowage factor of 23 cu.ft.–24 cu.ft. per ton relatively clean and not much dust. The product can be loaded into holds previously containing coal without cleaning.

Discharge facilities exist on the same berth where there are 2 units using 60 ton grabs.

A thorough draft survey is carried out on arrival and again after loading completed.

General: After berthing the vessel is boarded by 14 port officials of various departments from plant quarantine to immigration, paperwork takes about 2 hours on arrival and again before departure after loading completed.

Fresh stores, including fish, are available of good quality and a reasonable price.

There is no VHF communication but telex service to Manila is reliable.

While alongside 3 Customs Officers/Inspectors remain on board and require food and accommodation on a 24 hour basis.

SHIPMASTER'S REPORT: January 1981.

Vessel: LOA 259.0 m., beam 39.6 m., draft 52 ft. 6 in.

Discharged 109,000 tonnes of iron ore at Philippine Sinter Corp. Pier.

General: The pier of Philippine Sinter Corporation at Villanueva is located at the S.E. end of the "J"-shaped bay of Macajalar, in position Lat. 08° 34.45' N., Long. 124° 45.24' E., on the North coast of the Philippine island of Mindanao, in the province of Misamis Oriental. Villanueva is only a very small village. The nearest city is Cagayan de Oro, 24 km. (45 minutes) by car from the plant. Our Agent and almost all other offices of importance, are located there.

Documents: The Authorities and the Agents' representatives boarded the vessel at the anchorage (14 persons). The following were required:

10 Crew Lists.
8 Cargo Plans.
2 Vaccination Lists.
1 Maritime Declaration of Health.
6 Ship's Stores Lists.
6 Personal Effects Lists.

In addition, there were other lists, but the Agent had all of them made out in advance.

Telegraphic Free Pratique is obtainable. A telegram sent to the Agent 24 hours before arrival stating the number of Filipinos and Europeans is also compulsory.

Upon departure, no Filipino crew member is allowed to depart if his Seaman's Book has expired, so all Seaman's Books must be renewed before departure. Filipino citizens who are not seamen (wives, etc.) are not allowed to join the vessel in a Philippine port and stay with the vessel to its next port of call. Visiting was no problem, except that a special Customs Permit must be obtained.

Pilotage: Pilotage is compulsory both when anchoring and at docking/undocking. The Pilots have a portable CB radio, but no VHF. The pilot cutter is about 50 ft. long, with a large (for its size) white superstructure. Pilot boarding ground Lat. 08° 37' N., Long. 124° 42' E. for inbound vessels. For outbound vessels, Pilot leaves as soon as the vessel is turned, and is about 5 cables off the pier.

Anchorage: The Bay of Macajalar is a deep water bay, with the exception of a shallow area centered at Lat. 08° 40.75' N., Long. 124° 41.5' E., and a strip of shallow water extending generally less than 0.5 miles off the coast.

The Villanueva Anchorage is the one exception on the East side of the bay. It is a ledge of less than 100 m. depth extending 1.4 miles Westward from Lat. 08° 37' N., Long. 124° 45.5' E. on the shoreline, and it is 3.5 cables wide. The recommended anchorage is 8 cables due West of Lat. 08° 37' N., Long. 124° 45.5' E. The depth here is 70 m. or less than 40 fathoms. We anchored here and found it to be good holding ground. Not being more than 0.8 miles from the reefs in a "J" shaped bay, consequently open to wind and sea from West to North, I would not like to anchor there in any strong Northwesterly wind.

In our case the wind was from N.E. to S.E. which, according to the Pilot, were the prevailing wind directions. We did, however, experience quite a bit of swell.

Berthing/Unberthing: Docking and undocking is only done during daylight. There are 4 tugs available in Villanueva, each of 3,500 h.p. The Pilot brought the vessel parallel to the pier about 0.2 miles off, and the 3 tugs we used (1 forward, 1 amidships and 1 aft) pushed us alongside without difficulty. We docked starboard side to. There was, according to the Pilot, no preference for docking starboard or port to, that is, for vessel's discharging.

Vessels loading must always dock port side to due to the construction of the shiploader.

The docking sonar had, in my opinion, the big fault that the Pilot had to rely upon verbal information via the CB radio. A display board visible from the bridge would have enabled us to form instant opinions.

Undocking was a reverse operation; we were pulled by 2 tugs until 0.2 miles off the pier, then the third pushed us around.

Cargo Handling Facilities: The pier is a concrete structure that rests on several large pipes that are sunk down to bedrock. It lays in direction 049° – 229°. There is a "gangway" connecting the pier to the shore. The pier itself is 380 m. long and about 50 m. wide. Large airfilled bags are used as fenders, 6 m. – 7 m. long with a radius of 1.5 m. – 2.0 m. So, even with a relative heavy swell, the ship lays very nicely alongside this cushion.

We tied up with 4 head/stern ropes, 2 spring and 2 breast ropes. The discharging cranes are of the same type as "Kawasaki" have in the port of Chiba, max. 6 tonnes with clamshells of 30 tonnes, portable cranes. Hourly average capacity on lump ore 1,100 tonnes per crane, and on fine ore 1,400 tonnes. We averaged 2,794 tonnes with 2 cranes.

The discharging operation was impressive, with regard to speed and precision.

The ship loader was a normal type conveyor belt with an airdraft of about 40 ft. Loading capacity 4,000 tonnes p.h. Free rail area at pier about 280 m., no shifting while loading for a ship of our size.

Services: There is good drinking water available at the pier. Bunkers are obtainable but at what quantity and price I was not able to find out.

As of repair facilities, I had the impression that only simple repair work could be carried out.

The city of Cagayan de Oro has an airport with a twice daily direct flight to Manila, and once a day connections with Cebu and Davao. There are no international flights.

International telephone service is extremely poor. One must make the call directly from the telephone company's office, and a 2 hour – 3 hour waiting time for Europe and the U.S.A. must be expected. A call to Manila may come through in less than an hour. The Agent had telex and this is the only sensible communication with Cagayan de Oro.

With mail from Europe and the U.S.A., one must reckon on 2 weeks to 3 weeks. It seems that all communications go through Manila, with the delays that this automatically causes.

The Agent had a minibus service from the plant to Cagayan de Oro. This proved a necessity, as taxis are scarce.

The ship chandler could only obtain foodstuff.

SHIPMASTER'S REPORT: December 1988.

The vessel arrived at Villanueva for loading Iron Ore Sinter for discharging at Sparrows Point, Baltimore, U.S.A. The information pertaining to port facilities and conditions have been collected and compiled during this call.

General: The Philippine Sinter Corporation (PSC) is one of the biggest single foreign investments in the Philippines today. This industrial joint venture between Kawasaki Steel Corporation of Japan and PSC was incorporated in 1974. Sinter production started in April 1977.

Mindanao Sinter Plant – Product and the Process:

The "Sintering" consists essentially of mixing fine iron ore with solid fuel, normally coke and flux such as limestone, and burning the mixture under controlled conditions to produce hard but permeable lumps which are ideal blast furnace feed. The mixture is spread evenly over a continuous train of pallets of the sinter machine in a uniform bed thickness and ignited under induced pressure provided by huge blowers. The blended material is agglomerated into big blocks of sintered ore. A hot crusher breaks these blocks into 150 mm. lumps, which are then cooled. The rest of the process involves screening to remove mediums and fines which are recycled.

PSC is diversifying into a new project which involves construction of drying plant to treat pineapple pulp into suitable cattle feed. The drying plant is located adjacent to existing sinter plant and will utilise the recovered waste heat from the sinter plant.

The Mindanao Sinter Plant has three main components.

1. The Ore Yard.
2. The Sintering Facilities.
3. The Port Facilities.

1. THE ORE YARD:

The 18 hectare ore yard is made up of 4×45,000 sq.m. yards with an aggregate storage capacity of 1,500,000 tons. The yards are equipped with a Wing stacker and reclaimer, etc.

The ore yard facilities are:

4 Ore yards, (50 m.×900 m.), for iron ore, sintered ore, limestone and coke breeze.
2 Stacker-Reclaimers, 3,600–6,000 t.p.h. and 3,600–1,500 t.p.h., rail mounted.
1 Wing stacker, 800 t.p.h., single wing and rail mounted.
8 Bulldozers.
6 Mobile truck cranes.

2. THE SINTERING FACILITIES:

These consist of one sinter machine with a 450 m. grate area, rated at 5 million tons per year and other ancillary equipment for limestone crushing, screening, coke grinding, material blending, mixing, storing, feeding and processing.

The equipment of the sintering facilities is:

14 Blending Hoppers, 600 cu.m. capacity.
1 Sinter Machine, 450 sq.m. grate area, Dwight-Lloyd type (90 m.×5 m.).
1 Sinter cooler, 400 sq.m. bed area, 15,000 cu.m./minute circular type.
2 Main blowers, 18,000 cu.m./minute, double suction type.

In addition other facilities include:

(a) De-dusting system equipment.
(b) Power equipment.
(c) Fuel tanks and deepwell.
(d) Maintenance shop for mechanical, electrical and instrumentation works.
(e) Laboratory for physical, chemical, bacteriological and environmental analysis.
(f) Instrumentation and control facilities.
(g) Communication facilities.

3. THE PORT FACILITIES:

The port has a main berth and a cargo berth. The 351 m. long main berth has a depth of 25 m. It can easily accommodate 300,000 d.w.t. bulk carriers and is equipped with 2 bulk unloaders with a capacity of 1,800 t.p.h. each and 1 shiploader with a capacity of 6,000 t.p.h. The cargo berth is 230 m. long with a depth of 5.5 m.

The following floating equipment is available:

2 tugs of 3,200 b.h.p., twin screw Z-peller.
2 tugs (pusher boats) of 3,200 b.h.p., twin screw.
2 barges each 6,000 d.w.t.
1 lineboat, 390 b.h.p., twin screw.

PORT INFORMATION:

Location: The Port of Villanueva is situated on the North coast of Mindanao Island, in Macalajar Bay, on the Eastern side in position Lat. 08° 34' 45" N., Long. 124° 44' 22" E.

Charts:

B.A. Chart No. 3811 – this chart is small scale for approaches.

U.S. Chart No. 92290 – this chart is fairly large scale and more useful.

Philippine Charts No. 4648 and 4649 – these charts were published by PC&GS in 1976 and are available from Philippine Sinter Corporation and may be obtained through Villanueva or Manila agents.

Port Limits: There is no specific demarcated port limit. Southern half of Macalajar Bay could be considered within port limits. However, entire bay is under control of Harbour Master of Cagayan De Oro Port, which is located on the Western side of the bay.

Pilotage: The Pilot and at times Quarantine Officers board vessels in position Lat. 08° 35' N., Long. 124° 40' E., by launch from Cagayan De Oro. Pilotage of Villanueva is carried out by pilots of Cagayan De Oro and is controlled by its Harbour Master.

Presently, there are 4 pilots at Cagayan De Oro for both ports. Usual arrival messages to be sent to Agent. VHF station at Cagayan De Oro keeps 24 hours' watch on VHF Channel 16. At least 6 hours prior to arrival, contact should be made with Port Authorities, calling "Cagayan Pilot Station" and give ETA, etc. Pilot boards vessel anytime, day or night, unless weather is bad, due to strong wind and rough seas hampering motor launch manoeuverability. Anchoring, berthing and unberthing at Villanueva is carried out anytime day or night on a 24 hour basis.

Anchorage: The Bay of Macalajar is a deep water bay. A strip of shallow water extends generally less than 0.5 miles off the coast. The Villanueva Anchorge is about 3 miles to the North of the berth, along the Eastern side of the bay. The recommended anchorage is in the vicinity of approximately 8 to 9 cables due West of position Lat. 08° 37' N., Long. 124° 45.5' E. In this area there is room for only 3 large vessels from Panamax size to 300,000 d.w.t. for safe distances whilst at anchor. The depth of water in this area is from 70 m. to 150 m. Anchoring is carried out by pilots anytime, day or night, however, it is preferable to anchor in daylight hours. On account of close proximity of coastline, during Northerly or North-Westerly winds, added precautions and vigilance would be needed to remain safely at anchorage.

While approaching the anchorage area, starboard anchor was lowered to 4 shackles in the water and the windlass was kept in gear. Vessel approached to within 1.15 miles of the coastline in position Lat. 08° 38' N., Long. 124° 44.5' E., ship heading 093° True, when echo sounder showed depth of 157 m. When vessel reached 0.77 miles off the coastline, cable was gradually lowered in gear up to 8 shackles in the water and subsequently was brought up when 0.68 miles off the coastline and water depth was 140 m. After swinging around with vessel heading on a Westerly bearing, water depth showed about 90 m. Holding ground was found to be good. There are no lights or buoys for checking anchor bearing. One has to improvise, using certain landmarks and conspicuous shore objects for ascertaining position by radar.

Approaches: Passage from East through Surigao Strait is safe as there is deep water. Most of the lights are either not working or are on low power. The passage through these waters can be made with good radar for night transits and impaired visibility periods during rain squalls. Numerous fishing vessels are encountered throughout the area, as well as coastal traffic. Also large vessels make use of Surigao Strait to and from Pacific.

Documents: The following documents were required and prepared by vessel:

10 copies Crew Lists.
4 copies Personal Declaration and 4 copies Stores List.
2 copies Vaccination List.
1 copy Maritime Declaration of Health.

In addition, there were other documents and Philippine forms which Agent had prepared in advance for Master's signature.

Vaccination List was not required by the Quarantine Officer.

Visaed Crew List: As informed by Agent, Visaed Crew List is a requirement. Prior to arrival at previous port, a telex message was received from Manila Agent advising that Crew List should be visaed by Philippine Embassy or Consulate. Therefore, 3 copies of Philippine Crew List forms were obtained from Philippine Embassy through Agent, which were then duly completed and sent for Visa. The visaed Crew List was forwarded by Agent to Villanueva in due course. Although it did not reach Villanueva when vessel arrived, Immigration authorities issued shore passes to crew without difficulty. Visaed Crew List reached Agent's office on day of departure (sent from Japan).

Health: Usual Radio Pratique message to be sent to Agent for presenting to Quarantine Officials. However, Pratique was granted by Quarantine Officer who boarded the vessel upon anchoring.

Boarding Formalities: Upon anchoring, 23 persons boarded the vessel, which comprises agents and representatives of various authorities:

Quarantine	1
Agents	3
Immigration	4
Customs	7
Plant and Animal	4
Coast Guard	4

Agent requested lunch and refreshments for all above officials.

Restrictions: There are no restrictions. Vessels up to 300 m. LOA and 250,000 d.w.t. are berthed at Villanueva for discharging iron ore and loading iron ore sinter. Maximum draft alongside berth is 25 m.

Radio/VHF: There is no radio or VHF station at Villanueva. Cagayan De Oro has a VHF station which keeps continuous watch. Vessels should send ETA messages through Manila Agent or directly by telex to Villanueva Agent.

At least 6 hours prior to arrival, contact should be made with "Cagayan Pilot Station" (Channel 16) for ETA notices and instructions.

Berthing Facilities: There are 4 motor launches for pilots at Cagayan De Oro which are painted red and are numbered "M.L. Pilot No. 2". "M.L. Pilot No. 3", "M.L. Pilot No. 4" and "M.L. Pilot No. 5". Launch No. 1 has been scrapped. There are 2 tugs of 3,200 b.h.p. and 2 pusher tugs of 3,200 b.h.p. There is 1 line boat of 390 b.h.p.

The main berth is 351 m. long with berthing capacity for vessels up to 300,000 d.w.t. and water depth of 25 m.

The main berth is used for discharging and loading operations. Berth is in position Lat. 08° 34.45' N., Long. 124° 44.22' E. and is aligned 050°/230°. The berth is protected by 7 "Yokohama" balloon type fenders. For discharging vessels there is no preference for docking starboard side to or port side to, whereas for vessels loading, docking with port side to is required due to location and movement of shiploader. Mooring lines are usually 4-2-2 at each end.

Cargo Facilities: For discharging there are 2 grab unloaders, rail mounted rope trolley type, each with a capacity of 1,800 t.p.h. These unloaders are adjacent to each other and are located on the Southwesterly side (i.e. after the shiploader).

For loading, there is one shiploader, rail-mounted luffing shuttling type, with a capacity of 6,000 t.p.h. However, in practice, average loading rate was found to be 4,500 t.p.h.

Air draft at berth is 40 ft. No shifting required while loading for Panamax size vessels. Iron ore sinter cargo stowage factor is 23 to 24 cu.ft. per ton. The cargo which was loaded was found to be very dusty, containing white-grey coloured powder (presumably limestone). Upon sailing, this powder was found to be sticking to hatch covers, main deck, pipelines, etc. and at some places use of scrapers was required as it could not be removed by hose washing. The dry powder remains could be swept more easily than removing when wet as it became sticky and hardened with water.

Fuel: HFO and DO can be supplied by trucks only, in any quantity. There is no pipeline facility for bunker supply at Villanueva.

Medical: Cagayan Medical Centre at Cagayan De Oro City is equipped with full medical and hospital facilities.

Stores and Provisions: A limited variety of deck, engine and catering stores are supplied from Cagayan, small quantities only can be supplied. Fresh provisions are also available at Cagayan De Oro. Prices of most items are normal, however certain items are expensive.

Surveyors: A.B.S. are stationed at Cebu. Surveyors of other Classification Societies are available from Manila with sufficient notice. Cargo surveyors at P.S.C. plant at Villanueva are from PNKKK, for carrying out draft surveys, etc.

Watchman and Safety: At anchorage, very efficient deck patrolling is necessary as pirates board unguarded vessels in dark hours. Loss of private property, ship's stores, ropes, paints, etc. are often reported. In addition to crew on deck, 3 armed guards, supplied by the Agents, patrol at night whilst at the anchorage.

Holidays: Government Offices, including Immigration and Customs, work 5 days a week. Agents and other commercial offices work half days on Saturdays.

Mail Service: Delays of up to 10 days to 15 days are normal as all mail is routed through Manila.

Telephones: Telephones are not provided on ship at berth. However, P.S.C. office located near the main berth has telephone for making domestic and International calls. Long delays for any International telephone calls from Villanueva, as well as Cagayan De Oro are normal.

Telex: Telex services to and from Villanueva were found to be normal.

Shore Leave: Immigration Authorities issue shore passes for crew to go ashore and crew can go to Cagayan De Oro. Agents arrange minibus for transportation to and from ship to Cagayan. Private taxis are also available. Travelling alone at night is not very safe.

Airport: Cagayan Airport is located 10 km. from Cagayan De Oro City and about 40 km. from Villanueva. Regular domestic flights are operated to and from Manila and Cebu.

Repatriation: Crew joining and leaving is possible, via Manila.

Time: GMT plus 8 hours throughout the year.

Consuls: Consulates of most countries are located in Manila and a few are located at Cebu.

Radio and TV Stations: AM/FM radio stations. Two TV channels from 1100 hrs. – 0000 hrs., programmes are in English and Tagalog.

Languages: English is widely understood and spoken. Visayas is the main language spoken on Mindanao Island. Tagalog, Spanish and English are taught in schools. Tagalog is the main language of Luzon.

Currency: The peso is the currency of Philippines. Exchange rate is linked to the U.S. Dollar. During ship's call, the exchange rate was U.S.$ 1.00=21.20 Pesos. However, in shops and stores, exchange was available at 20 pesos to U.S.$ 1.00.

AUTHORITY: See "Cagayan de Oro".

Operator: Philippine Sinter Corporation, Port Operations, Villanueva, Misamis Oriental, Philippines. Postal Address: P.O.Box 90, Cagayan Do Oro City, Philippines. *Tel:* 33-28. *Telex:* ITT-48406. *Contact:* Captain Emiliano Ea Duran.

WEST LINAPACAN, Palawan: 11.49 N. 119.07 E.

(See Plan)

LOCATION: *Location and Description of Terminal:*

1. West Linapacan Oil Terminal is located off the Western side of Palawan Island, at Lat. 11° 49' 08.19" N., Long. 119° 07' 00.75" E., in a water depth of 1,140 ft.

2. Navigation charts for the area are as follows:

British Admiralty Charts No. 967 and 3820, and U.S. Navy Charts No. 92490 or 14316.

3. The Terminal consists of a production and storage tanker called "FPSO II" of 125,000 tons, moored by means of a stern yoke to Single Point Mooring.

This vessel contains equipment necessary for production, storage and transhipment of crude oil. It is also the headquarters and accommodation of Terminal personnel.

To comply with international convention, during the hours of darkness, the vessel will show lights with the distinctive characteristics of the morse code letter "U". In periods of poor visibility, the fog signal will sound the morse code for the letter "U".

4. Vessels using the Terminal will be moored in Tandem, bow-to-bow, to the storage tanker, and loading is by means of a floating hose between the vessels.

ESSENTIAL REQUIREMENTS: *Summary of Most Essential Requirements to be met by Tankers Lifting Oil at West Linapacan Oil Terminal:*

1. No dirty ballast disposal.
2. Advise arrival time by radio.
3. Mooring Master meets ships 2 miles West of Oil Terminal.
4. Make a lee for the Mooring Master to board.
5. Have ready: 2 messenger lines forward, ship's derrick on port side, port manifold with 12 in. connection.
6. Vessel's Master responsible for safety of own ship at all times.
7. Lifting vessel's crew perform all operations of mooring, connecting and disconnecting hoses, and unmooring aboard lifting vessel.
8. Do not close valves against oil flow.
9. Emergency flow stop signal if all communications fail will be a continuous sounding of ship's whistle from either lifting vessel or "FPSO II".
10. No shore leave or crew change is permitted.
11. When arriving:
    By day: Fly flag "Q".
    By night: Display red light over white light for quarantine service.
12. Vessel's anchor to be secured against accidental use from the time the Mooring Master boards.
13. West Linapacan local time is GMT plus 8 hours throughout the year.
14. No supplies of any kind of medical services (except in case of emergency, and subject to a doctor being available), or other services of any kind are available at West Linapacan Oil Terminal.
15. Smit Connector or bow chain stopper of lifting vessel should have a minimum 76 mm. horizontal and vertical opening, and be properly greased and ready for use. A large 14 lb. hammer should also be available.

PORT LIMITS: The export vessel is considered "an arrived ship" when she has entered the territorial water of Palawan.

DOCUMENTS: Documents for arriving export vessel are:
Vessel's Last Port Clearance.
Crew Declaration.
Stores List.
Cargo Manifest.
Storage Plan (deleted if no storage is on board).
Health Quarantine Certificates.

PILOTAGE: Usual procedure is to advise export vessel to approach 2 miles West of the Oil Terminal, and wait for the supply vessel for pilot boarding.

Also see "Berthing" – "Mooring/Unmooring".

ANCHORAGE: West Linapacan Oil Terminal has no anchorage area. As water depth is in the region of 1,200 ft., arriving tankers are advised to drift outside of the 5 miles radius restricted area.

RESTRICTIONS: Port restrictions:
D.w.t.: 100,000 tons.
Arrival Displacement: 30% – 35% d.w.t.
LOA: No restriction.
Draft: No restriction.

HEALTH: The vessel should have a clean Bill of Health or equivalent document from the last Port of Call. The vessel's Master and all members of the crew shall possess International Certificates of Health showing such valid Vaccination Certificates as required by current Philippine Law. From time to time, Cholera Vaccinaton Certificates may be required, and it is therefore prudent that all crew members are in possession of valid Certificates.

RADIO/VHF: *Communications:*

1. Cable or Telex: It is most important that incoming tankers advise their ETA 72 hours, 48 hours, 24 hours and 4 hours in advance of arrival, stating GMT or local time.

Messages are to be sent as follows:
Cable Address: Alcorn Philippines.
Telex: 454371/22209/64293.
Attention: SVP Operations.

The following information shall be included in the message given 72 hours in advance:

(1) Name of tanker and radio call sign.
(2) ETA.
(3) Cargo requirements.
(4) Deballasting time.
(5) Maximum loading rate in barrels per hour.
(6) Estimated draft on arrival.
(7) If there is any sickness aboard or clean Bill of Health.
(8) Last Port of Call.
(9) Any hull, bulkhead, valve or pipeline leaks on vessel, which could negatively affect loading or cause pollution.
(10) Distance in feet from the bow to tanker's loading manifold, and from port rail to manifold.
(11) All vessels shall confirm ETA 24 hours and 4 hours prior to arrival, or any time a one-hour change of ETA is anticipated.

2. On receipt of the first message from the lifting vessel, Alcorn Philippine's office will respond to the tanker giving preliminary requirements of the Terminal. Vessel's Masters will comply with these requirements in all details, in order to facilitate vessel turnaround and Government formalities.

3. Radio Facilities:

Operating frequencies: West Linapacan Oil Terminal: IM/VHF/FM Storage vessel 6 ZMR (local call sign "FYPSO").

4. Once vessels are within 4 hours of West Linapacan Terminal, communication should begin with the "FPSO II" on VHF Channel 16. When contact has been made on this channel, further communication will be conducted on a mutually compatible channel, which would normally be Channel 6.

5. Mooring Master will carry a VHF/FM radio telephone, as he boards the tanker.

6. The 4 hour signal should confirm information on the time required to discharge ballast after arrival, and should establish a more exact ETA.

7. Insufficient or inaccurate ETA messages can cause delays as Government Officials have to come from Puerto Princesa. Acceptance of Notice of Readiness may be affected by such insufficiency or inaccurancy.

READINESS: *Loading Readiness and Arrival Time:*

1. The Terminal will make every effort to moor/load vessels upon arrival in daylight, weather permitting.

2. Notice of Readiness will not be accepted as at time of arrival, unless the vessel is in all respects ready to load. Arrival time will be considered at the time the Mooring Master boards the vessel, or the time the vessel reaches the deep water anchorage area, whichever occurs first. Notice of Readiness is to be in English.

If a vessel arrives while the Terminal is closed, Notice of Readiness will be accepted from the time the Terminal re-opens.

3. During the loading or unloading, the international code flag "B" shall be displayed.

TUGS: *Mooring Launches:* The Terminal maintains boats to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Mooring Master.

BERTHING: Terminal Facilities:

1. The West Linapacan Marine Terminal offices, storage and testing laboratory are located on board the 125,000 ton Liberian registered Floating Production Storage and Offloading vessel called "FPSO II", which is stern moored to a Single Point Mooring. This vessel has a crude oil storage capacity of some 134,000 cu.m.

2. Vessels using the Terminal will be moored bow-to-bow (Tandem), to the "FPSO II", by means of a 45 m. nylon snotter. On the outer end of the snotter is a short length of chain, ending in an open pear shaped link, which is attached to the lifting vessel's Smit Connector or guillotine-type stopper.

The vessels should have bow chain stopper with minimum vertical and horizontal opening of 76 mm.

For vessels not equipped with a Smit Connector, extra equipment, consisting of a 25 m. × 16 in. snotter, two short lengths of chain, one fitted with a triangle plate and the other with special shackle, can be supplied.

3. During the period the lifting vessel is in the berth, a tug/supply vessel furnished by the Terminal will remain secured to the stern of the lifting vessel, in order to prevent the vessel from jack-knifing. The lifting vessel shall not have the authority to direct or control the tug/supply vessel.

4. Loading hose connection is ASA 150 12 in. I.D.

5. Loading rates at the Terminal will be governed by either the lifting vessel's maximum loading rate, or the maximum pumping rate of the FPSO II (approx. 15,000 b.p.h.), whichever is the lesser.

Berthing:

1. Lifting vessels will normally be accepted and berthed in chronological order of arrival, provided such vessels have current nomination for cargo, valid at the time of tender, carry clean ballast, if any, and have cargo tanks in a fit condition to receive cargo. Also they must be in all respects properly equipped, manned and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

2. Vessels, required to leave the Terminal area on account of bad weather, should keep in contact with the Terminal via the Radio Telephone Station at West Linapacan Oil Terminal, call sign FYPSO, in order that they may be available when the weather is fit for resumption of operations. The Terminal reserves the right to load vessel out of turn following the return of good weather. Further the Terminal reserves the right to decline to moor a specific vessel, if its condition or facilities are unsafe for mooring or loading, even though the Terminal may be open to other vessels.

3. The West Linapacan Oil Terminal Mooring Master's decision on berthing will be final.

4. A lifting vessel will be expected to have ready on the forecastle head the following equipment:
Windlass ready for use.
Smit Connector free, open and greased.
A large coil of messenger line.
A large 14 lb. hammer.

On approaching the berth, a messenger line attached to a Norwegian buoy on mooring is recovered on forecastle, and line taken in until main recovery line is on deck. This line is placed on winch and brought in until mooring chain on deck, this chain then being secured in bow stopper, Smit Connector or any other suitable, safe, mooring arrangement. On completion of mooring, a supply vessel will then be secured to stem of tanker using ship's rope or wire, and this vessel will normally exert a minimum pull at all times to avoid contact of any sort between ship and "FPSO II".

MOORING/UNMOORING:

1. Vessels to be moored, anchored or manoeuvered at West Linapacan Oil Terminal, will be boarded by the Mooring Master. No lifting vessel may enter the Terminal area, unless a Mooring Master is on board.

The Mooring Master will advise the vessel's Master on approaches to the berth, mooring, unmooring, tug handling, connecting and disconnecting the hoses and other operations within the Anchorage and Terminal Area. All such manoeuvring of vessel shall be done only in accordance with the advice of the Mooring Master, except where the vessel's Master believes such advise to be contrary to the proper navigation and safety of the vessel and its crew, and subject to the understanding that in all cases and circumstances, the Master of the vessel being manoeuvered, shall remain solely responsible on behalf of his vessel's owners or charterers for the safety and proper manoeuvring of the vessel.

The vessel's Master, or one of his designated qualified Deck Officers specifically appointed by him at the time, must be on the navigation bridge at all times, while the vessel is being manoeuvered.

1. Vessels will provide a lee for the Mooring Master's boat while the Mooring Master is boarding and leaving. All vessels are requested to have a pilot ladder safely and securely rigged, and ready for immediate use and long enough to reach the Mooring Master's boat. A combination ladder, so arranged that personnel can first use the pilot ladder part way up the vessel's side, and then transfer to the accommodation ladder, is recommended, especially on very large vessels. A light line should be ready to take aboard the Mooring Master's portable radio. There should be adequate lighting at night.

3. The Mooring Master will be in direct control of all vessel's communications while in the Terminal area. Any unauthorised communications will at option of the Mooring Master be cause for the cessation of all operations except clearing of the berth, and the vessel's Notice of Readiness will immediately be nullified.

4. Raising, lowering, connecting and disconnecting of oil loading hoses, as well as all other labours and duties on shipboard, will be performed by the vessel's crew under advice of the Mooring Master.

5. The Mooring Master will report unsatisfactory conditions to the West Linapacan Oil Terminal Superintendent, who may at his discretion, reject the vessel until corrections are fully made. All costs or liabilities accruing therefrom will be to the vessel's account.

6. The services of the Mooring Master are provided without charge upon the express understanding and conditions that when the Mooring Master goes onboard a vessel for the purpose of assisting such vessel, he becomes for such purposes the servant of the owners or charterers of the vessel, and the companies shall not be liable for any damage or injury resulting from any advice or assistance or actions given or made by the Mooring Master.

7. The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel, or mooring or both or for infringement of these Terminal Regulations.

8. The West Linapacan Oil Terminal Superintendent shall be the sole authority, as to when the Terminal is opened or closed for normal working due to weather conditions.

9. Various combinations or wind, sea and tidal conditions, also size, length, ballasted trim, and handling qualities of a vessel, can affect the decision to berth a vessel at West Linapacan Oil Terminal.

All these factors have to be evaluated before a final berthing decision is made, and agreed by the vessel's Master and the Mooring Master. Delays to lifting vessels, due to the Terminal being closed because of bad weather conditions or statutory holidays, are not to be computed as "used lay time" when compiling a vessel's turnaround time.

Vessel's Gear:

1. The Mooring Master may reject a ship if it is not, upon inspection, properly equipped, or if it is not suitably manned, or if he deems it to have dirty ballast or tanks unsuitable for receiving the cargo.

A vessel is suitably manned if it has full complement of officers and crew in a sober condition, competent and willing to carry out their duties and orders and proficient English is spoken, so that the Mooring Master can understand and be understood.

2. A vessel must be equipped with a good working propulsion unit, as passed by the appropriate survey society. Inoperative vessels, or partially inoperative vessels, will be rejected. Should they become inoperative while in berth, they may be removed from the Terminal area.

3. Additionally, a vessel must have both bower anchors and ground tackle in good working condition, and in such sizes and amounts to meet either "Lloyd's" or "A.B.S." standards, although they may be in fact classified by other societies. On instruction from the Mooring Master, the vessel's anchors must be properly secured against accidental dropping.

4. All vessels must carry suitable stoppers for all Manila or synthetic lines for mooring use.

5. *Vessels must have suitable winches or capstans in good operating condition on the forecastle deck.*

6. Vessels must be adequately equipped with a 5 ton boom, blocks, tackles, wire runners and sundry equipment on the port side, to efficiently hoist the hoses to the loading position. Sundry equipment should include wrenches, drift pins, nuts and bolts, wire and fibre straps, drip pans, gaskets, etc.

To assist in vessel's turnaround, the vessel should have all necessary booms and cargo gear rigged and ready, before being boarded by the Mooring Master.

Vessels, which consider the lifting capacity of their gear to be marginal, should strengthen their gear accordingly. This does not relieve the vessel of the necessity to provide adequate lifting gear as already described for West Linapacan Oil Terminal operations.

7. Vessel's loading manifolds should be prepared for 12 in. 150 ASA hose connection prior to vessel's arrival. Where no crossover valves exist on loading manifolds, it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. Vessels, equipped with smaller than 12 in. hose connections at the loading manifold, should arrive with such hose connections suitably adapted for 12 in. hose, so that maximum flow through the 12 in. cargo hose will be achieved (12 in. ASA 150 flange).

Vessels, equipped with larger than 12 in. hose connections at the loading manifold, should provide their own reducers.

Connecting Hoses:

1. After the vessel is securely moored, the cargo hose will be hoisted on the port side. The berth is equipped with a single 12 in. loading hose string, the weight of the hose lift being approximately 3 tons. Therefore, all lifting equipment and tackle should have a safe working load of at least 5 tons. The hose is lifted by vessel's gear and crew, and all connecting of the hose will be done by them. The lifting derrick, equipment, tackle, etc., should be topped off and ready on arrival. Terminal loading hoses are fitted with ASA 150 flat face flanges, and vessels should have adapters and fittings to enable these hoses to be connected to the vessel's manifold. The Mooring Master advises the vessel's personnel on hose lifting and connecting procedures; however, a vessel's Master or Deck Officer must be present, and must direct the vessel's crew in all handling. The Mooring Master may reject a vessel for unsatisfactory hose handling.

2. When a Mooring Master is assigned to a vessel, the vessel at her cost will supply him with meals at the same time and in the same manner as for comparable personnel of the vessel. The vessel will also provide a suitable cabin and smoking facilities.

BALLAST: *Disposal of Ballast:*

1. Owners and Masters are responsible for complying with all International Conventions and Philippine Laws concerning pollution of the sea, having particular regard for Offshore Palawan area.

2. There are positively no facilities for disposal of dirty ballast. It is the Shipmaster's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel.

This includes oily water from bilges, crude residue from previous voyages or any other matter that may result in pollution of the sea. Any fines imposed or third party claims shall be for the vessel's account.

3. If evidence of oil appears during ballasting, the vessel will be rejected forthwith, and will not be accepted until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection or during progress of loading, it is revealed that the vessel's tanks are not tight, or that oil is leaking from the vessel, the vessel may be rejected or refused further loading. The vessel will not be accepted for loading, unless satisfactory evidence of repair is submitted, duly certified by "Lloyds", "A.B.S.", or other recognised surveyors. Any vessel, rejected because of dirty ballast or sea pollution, will automatically nullify her "Notice of Readiness", and will lose any priority of position for loading.

4. A vessel must have proper trim and sufficient ballast and/or cargo already on board for safe handling, having due regard to existing weather and sea conditions (normally 30% – 35% of d.w.t.). The vessel's Master shall maintain a careful watch of the weather and sea conditions, and a frequent exchange of information between vessel and Terminal. Through his knowledge of the behaviour of his own vessel, the Master, if satisfied that it is safe to do so, may come to the Terminal with a minimum of ballast, and thus lessen any possibility of sea pollution or infringement of regulations.

5. Vessel equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the West Linapacan Oil Terminal Superintendent.

6. Load-on-Top Method: Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings on ship aboard, and treating these washings with chemicals. The result is that no oil is discharged into the sea, and the oil separated is collected in a slop tank. With the written permission of off-taking companies, the Terminal will "Load-on-Top" of such slops. To avoid pollution, this system is highly recommended.

7. All spillage of oil must be reported immediately to the West Linapacan Oil Terminal Superintendent, and a detailed report must be written, signed and submitted by the Master of the lifting vessel concerned.

MEDICAL: No medical assistance available, except in an emergency.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: The nearest Consuls are in Manila.

REPAIRS: No repair facilities at the Terminal.

SURVEYORS: SGS has acted as the independent surveyor for the liftings to date. Surveyor is nominated by the buyer and Alcorn.

CUSTOMS: Three Customs Officials are assigned to the export vessel, and will be onboard during the duration of the lifting. 2,000.00 Phils. Pesos per day is charged (U.S.$ 85.00) for their allowances and per diem. Customs' transportation is for the buyer's account.

EMERGENCY CO-ORDINATION CENTRE: All oil spills or emergencies are co-ordinated by the Coast Guard located in Manila.

REPATRIATION: Not possible.

TIME: GMT plus 8 hours throughout the year.

SHORE LEAVE: Not permitted.

Crew members cannot leave the vessel at West Linapacan Oil Terminal, except in cases of extreme urgency. Even in an emergency, it should be noted that Seamen's Books may not be valid under the local Governmment Law. A valid Passport is required.

SHIP SUPPLY SERVICE: A supply boat is available 24 hours a day.

This supply boat is the same boat assisting the export tanker. Once export tanker is secured, this supply boat is heaving and tied-up to aft of export tanker – so it will not be available for 24 hours a day.

GENERAL: After each tanker lifting, the Terminal will prepare all necessary loading documents, in accordance with the consignee's instructions. Documentation will be finalised on board the lifting vessel, as soon as practicable after loading operations are completed.

Visitors must obtain a special pass from the Company's Terminal Superintendent. Visitors will be restricted to a minimum due to hazards involved.

IMPORTANT NOTICE:

The attention of owners, charterers and Masters of vessels which visit the Terminal, is drawn to the importance of taking every precaution to ensure, that no oil of any kind is discharged or allowed to escape overside.

If there is any such discharge or escape, any resultant loss or expense to the companies will be for the account of the owners or charterers of the vessel.

The West Linapacan Oil Terminal is located within the Territorial Waters of the Philippines. Visiting vessels will therefore be subject to the Laws of the Republic of the Philippines.

SAFETY: *Safety Precautions:*

1. The lifting vessel's personnel are responsible for the safety of the vessel and themselves, and must take all necessary precautions whether or not so advised by the Mooring Master or other Terminal personnel. Any safety precautions imposed by the West Linapacan Oil Terminal Superintendent and disregard by the vessel's Master, Officers, or crew, will be considered just cause for rejection of the vessel and all expenses, losses, claims or liabilities related thereto will be for the account of the vessel.

2. When a vessel is in the moorings or vicinity thereof, its engines must remain on standby with full power always available for immediate use. Deck machinery shall be kept at instant readiness. Positively no repairs of any sort, affecting the availability of the vessel's machinery or engines, will be permitted in the moorings. Other repairs (including all painting), which present any hazard to the loading operation, are strictly prohibited. Vessel's whistle is to be at instant readiness at all times.

3. The bridge and/or control area shall not be locked or otherwise arranged to prevent immediate entry at all times by the Mooring Master.

4. Not less than one Deck Officer and three Seamen shall be on duty, sober, alert and available at all times. No person under the influence of alcohol is to be allowed on deck. The Mooring Master's opinion on the sobriety of any individual will be final, unless an independent medical physician present at the time indicated otherwise.

5. No transistor radio sets or other electrical appliances may be used on deck, unless certified for use in hazardous petroleum areas and subject to approval of the Mooring Master.

6. All scuppers must be plugged and witnessed by Mooring Master and the vessel's Master. Refusal to plug scuppers will result in the ship being rejected. Drain trays and all materials necessary to clean up any oil spillage on deck are to be available for immediate use.

7. After complete discharge of ballast, the Mooring Master and Petroleum Inspector (if any) will witness closing of pumproom sea suctions and sealing of same.

8. The presence of unauthorised craft alongside a vessel will render the vessel unacceptable. It is the duty of the vessel's personnel to see that the vessel's sides are clear of all such craft.

9. Fire fighting equipment shall be in instant readiness throughout the vessel, and additional equipment available at the loading manifold while in the berth. Water shall be available on deck service at all times, and fire hoses connected at all fire stations and flaked out for immediate use.

10. No radio transmission will be permitted on board, except by the express permission of the Mooring Master in each case; this to apply only during the period the vessel is in the Terminal area, or under the direction of the Mooring Master.

11. When vessel is at the Terminal, boiler tubes are not to be blown. Every precaution must be taken that no sparks escape from the funnel or stack or from the galley stack. No ullage hole shall be left open, unless effectively covered with a gauge mesh wire spark arrester.

12. Smoking will not be permitted on deck while in the moorings, and will only be permitted in places approved jointly by the vessel's Master and the Mooring Master. There may be occasions when smoking will be entirely prohibited. Cigarette butts should be thrown overboard or through portholes at any time.

13. Lifebuoys shall be available throughout the vessel, and in particular in the loading manifold area, and at all points of entry and exit, e.g. at pilot ladder.

14. All vessel personnel are to be adequately instructed by the vessel's Master to avoid breathing gas escaping from tank ullage plugs while loading, and gas vents should be used.

The vessel shall be equipped with fresh air masks, gas masks and resuscitators, which shall be kept in a conspicuous and readily acccessible position, ready for immediate use.

15. All accommodation doors, portholes and ventilators should be closed during loading operations, and doors and openings to machinery spaces in vicinity of vessel's tanks are to be closed.

16. If an emergency stop of loading is required, and communications between the vessel and Terminal fail, the vessel's siren or whistle is to be continuously sounded. *This signal stops all loading.*

17. Vessel shall have "Fire Towing Wires" of suitable strength laid out and hung overside to sea level from Poop Deck.

18. No swimming in the sea is permitted while vessels are in the berth.

19. No fishing is permitted in the loading berths or within the restricted navigation area.

20. The attention of the Master is drawn to the off-loading documents, in particular those documents that relate to the safety of the operation, i.e.:

Safety Requirements.
Ship/Terminal Safety Check List.
Fire Instructions.
Safety and Fire Regulations.
H_2S Instructions.

21. The attention of the Master is drawn to the fact that the West Linapacan crude oil is sour, and gives off H_2S gas, which may, during loading operations, give rise to hazardous accumulations in or in the off-loading tanker. The Master is therefore to be aware of this possibility, and of the drill to follow as laid down in the H_2S Instructions if greater concentrations of 10 ppm. of H_2S are detected. The Mooring Master will carry an H_2S detector with him at all times to assist in detecting such concentration.

WEATHER: *Tides, Currents, Wind and Weather and Seas:*

1. The navigator is referred to published sailing instructions for this area for information on winds, tides and currents, viz:

United States Hydrographic Office, Publication No. 92, Vol. 3, "Sailing Directions for the Philippine Islands", published by the U.S. Government Printing Office, Washington D.C. or British Admiralty equivalent."

2. The information on currents, wind and weather and seas in this area is meagre.

Currents: The general circulation offshore Palawan is wind driven, and displays the monsoonal direction reversal. The speed has been observed from 0.25 to 1.0 knots.

Wind and Weather: The Palawan offshore environment is controlled by monsoonal meteorological variations.

Winter Monsoons – Wind from Northeast.
Summer Monsoons – Wind from Southeast.

The Winter monsoon with wind from the Northeast quadrant is the more severe of the two. It is fortuitous, however, that some sheltering is provided by Palawan and other islands to the Northeast, limiting the fetch, and thereby reducing the effect of the wind during this period. The Summer monsoon from the Southeast experiences a greater fetch by lesser wind velocity, which together yield generally smaller wave heights.

Typhoons are not a major threat to operations in this area, as the strongest ones normally pass North of Palawan. However, the location has been affected by eight typhoons within 200 miles over a ten-year period, which have occurred predominantly during the late Winter months. Tropical depressions in the South China Sea affect the area more than typhoons.

Visibility limitations are not a normal problem in the area, but may be experienced. The Winter months contain the poorest visibility conditions. The worst monthly average visibility from available data was 12.4 miles during December. The remaining months display generally good visibility with distance of 16 – 18 miles.

Waves: The waves are controlled by the monsoonal winds, and reflect the winds variation in the direction and intensity. The Spring transition (April – June) generally has lower wave heights. The Winter monsoon (December – March) with waves from the Northeast is more severe than the Summer monsoon (July – September). Wave heights from 2 ft. to 4 ft. are expected for 45% of the year, while heights of 4 ft. to 8 ft. are expected for 20% of the year. Waves in excess of 8 ft. are estimated for 5% of the year. A heavy swell, generally from the North, is raised by any typhoon or tropical depression passing through the Philippines, and this is liable to cause delays in operations.

AUTHORITY: See "Puerto Princesa".

Operator: Alcorn (Production) Philippines Inc., 19th Floor, Pacific Star Building, Corner Sen.G. Puyat Avenue and Makati Avenue (P.O.Box 2283, MCPO, Makati, Metro Manila, Philippines). *Tel:* 817-6021. *Telex:* 45371/22209/64293. *FAX:* 817-4643. *Contact:* Eduardo F. Hernandez, General Manager.

ZAMBOANGA, Mindanao: 06.54 N. 122.04 E.

(See Plan)

See "General" before first port.

PILOTAGE: Vessels approaching the port use International Code Signals for calling Pilot.

Pilot Station: Telegraphic address is Zamboanga Pilots, Zamboanga City. Estimated time of arrival (ETA) must be radioed 24 hours in advance. Pilots always on duty. Pilot boat is wooden launch painted white with red trimmings and displaying the pilot flag. The exact area where a Pilot will board vessel is in the vicinity of Little Sta. Cruz Island, for vessels coming from West, and near the vicinity of Rio Hondo for vessels coming from East. Alternative area in the event of bad weather is in the vicinity of Zamboanga Pier at a distance of at least 1 mile either way. Vessels awaiting Pilot should not necessarily drop anchor, provided 24 hours' notice of their ETA is given by local Agents or the Master, to the Zamboanga Pilots, for a Pilot is *always* on duty.

ANCHORAGES: Owing to the steep bank, strong currents and hard, uneven bottom, there are no good anchorages off Zamboanga. However, anchorage may be made anywhere Southward of the wharf at a distance of about 3 cables from shore Eastward of an imaginary line from the Tide Indicator, at a depth of between 25 fathoms and 30 fathoms and giving 7 shackles of chain in the water. This will hold vessel even at strongest current of 6 knots. In the event of very bad weather the vessel should transfer her anchorage to Caldera Bay, which is approximately 7 miles West of the anchorage area.

MAX. SIZE: No limits for anchoring. For berthing, up to 10.0 m. draft.

HEALTH: Quarantine Officer will board the vessel for the necessary inspection of all crew on board. Thereafter he issues Pratique, if and when he finds that there is no disease or fever on board. The Pratique is valid until after the vessel departs to a foreign port.

RADIO: Philippine Telegraph & Telephone Corp. (PT & T), Universal Telecommunication Services (UTS), Radio Communications of the Philippines (RCPI), Central Radio Communications (CRC), Capitol Wireless Inc., (CWI), Telefast Communication and the Bureau of Telecommunication operated by the National Government for receiving and transmitting radio messages. Night and day services.

TUGS: The position where tugs normally join the vessel is in the stream and the usual ship's lines or tug's lines are used. There is no charge collected for the use of the tug's lines.

BERTHING: The Zamboanga Government Wharf is 1,363 linear metres long with a depth at the latest survey of the following: East end 5.0 m.; mid-section 7.0 m. and West end 10.0 m. at MLLW. There is a private wharf at Baliwasan and vessels of 27,000 g.r.t. can dock there with the following limitations: Draft forward must not exceed 32 ft.; draft aft must not exceed 36 ft., upon completion of loading. Vessels docking at this wharf can only be docked at *flood* tide (current running East to West) and can only be undocked in the same manner.

2 anchors must be used in berthing and vessels lay alongside the concrete pier port-side-to. This wharf in Baliwasan is for loading coconut oil and copra pellets only.

Also see "Developments".

STEVEDORES: The Master of the vessel shall cable to the local Agents so that contract could be made with the shipper to arrange gangs.

MEDICAL: It is necessary for Agents to receive advance notice of required medical attention. Hospital facilities are available at all times. Inoculations are also required by the Quarantine Officer upon boarding a vessel.

TANKERS: There are 4 oil depots at Gavilan Pt. and at Baliwasan. (Shell, Mobil, Esso and Caltex.) Max. tonnage of 4,000 gross with a draft of not more than 18 ft. can be moored for discharge.

FRESH WATER: Fresh water can be obtained any time of the day. There are 5 water outlets strategically distributed at the new quay.

FUEL: Fuel, diesel, and crude oil available.

FIRE PRECAUTIONS: Smoking is entirely prohibited on board a tanker entering this port. The Master must advise all persons boarding his vessel.

GANGWAY/DECK WATCHMEN: The services of watchmen are necessary to stop looters from boarding the vessel.

OPENING/CLOSING HATCHES: Normally opening and closing by the crew, and if done by stevedores the vessel has to pay.

CUSTOMS ALLOWANCES: 200 cigarettes per man. Upon arrival in port the cigarettes are sealed in a bonded store by the Customs Authorities, and can be opened only upon permission granted by the Collector of Customs.

CONSULS: None available.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the foreign Embassy concerned.

AIRPORT: Distance from Zamboanga Pier to the airport is 3 km. Served by regular airlines. There are 2 flights daily (0920 hrs. and 1930 hrs.) from Zamboanga to Manila by Philippine Air Lines (PAL). Airport is also open to International flights.

HOLIDAYS: Cargo work can be arranged with the Stevedoring Company through the shipper to work during holidays, including Sundays.

POLICE/AMBULANCE/FIRE: Police Department, Tel. 119; Ambulance, Zamboanga Regional Hospital, Tel. 25-11; and Fire Department, Tel. 110.

TELEPHONES: Telephones cannot be installed on board when docked at the pier as is not allowed by the City Government.

SERVICES: Special services may be available, e.g. tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, through representations to be made with the shipper or local Agent of the vessel.

IDENTIFICATION CARDS: All crew members to have identification cards for immediate identification in case of trouble while the crews are on shore.

DEVELOPMENTS: A new quay 220.44 m. length and 10 m. depth is in operation.

New Facilities:

a. New Quay:	220.44 m.
b. Ferry Pier:	20 m. wide × 49.9 m. length of reinforced concrete.
c. Closed Transit Shed:	40 m. × 126 m. with two 6 m. × 15 m. office spaces and a 24 m. × 40 m. Passenger Terminal.
d. Gate House:	18 m. × 30 m. with 2 × 50 ton capacity weighbridges, through booths and 2 guardhouses.
e. Equipment Shed:	15 m. × 60 m.
f. Maintenance and Fire Station Building:	15 m. × 66 m.
g. Passenger Terminal Building at Eastern Section:	30 m. × 54 m.
h. Amenity Block:	6.5 m. × 10 m.
i. Generator Shed/Power House:	15.4 m. × 25 m.
j. Administration Building:	Three storeys (1,296 sq.m.)
k. Open Storage Area:	40 m. × 135 m.
l. Container Marshalling Yard:	100 m. × 137 m.

AUTHORITY: Philippines Ports Authority, PMO-Zamboanga, Port Area, P.O.Box 360, Zamboanga City 7000, Philippines. *Tel.* 2991-2995,7156.
Contact: Prudencio B.Mercado, Jr., Port Manager.

AGENT: See "Manila".

NOTES

Please also advise Shipping Guides Ltd.

Poland

GDANSK: 54.21 N. 18.39 E. (See Plan)

ICE: Efforts made to keep port open all year round. Only in very severe Winter are difficulties experienced.

DOCUMENTS:

8 copies Cargo Manifest.
1 copy Bill of Lading.
Passports or Seaman's Books.
Ship's Register.
Maritime Declaration of Health.
5 copies Ship's Articles/Crew List.
Derat Certificate or exemption from Sanitary Certificates, covering food cargoes and/or of animal origin, destined for discharge here.
Specification of Dangerous Cargo, even if in transit.
2 Stowage Plans.
Trimming Class Certificate.
Crew Effects Declaration.
Bonded Stores Declaration.

PILOTAGE: Compulsory. Advance notice of 12 hours required prior to arrival and 2 hours notice required prior to departure. Boarding in Gdansk Roads. Gdansk Pilot Station available on VHF Channel 14.

Also see "Baltic Deep Sea Pilotage".

ANCHORAGES: Gdansk Roads. Anchorages No. 1, 2 and 3 for ships up to 738 ft. LOA.

Anchorages: No. 1 draft 29 ft. 06 in.; No. 2 draft 34 ft. 05 in.; No. 3 draft 39 ft. 04 in.; No. 4 for bulk carriers with max. draft 52 ft. 06 in.; No. 5 for large tankers with max. draft 63 ft. 11 in. No tides.

RESTRICTIONS: On arrival or if moving or in every case of emergency conditions contact Harbour Master's Office on Channel 14. Tel: 43-07-10.

MAX. SIZE: Baltimax size for ships entering North Port. Max. size of ships permitted to enter inner port: Draft 10.20 m. brackish water, max. LOA 225 m. Also see "Berthing".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease, the vessel should cable to "Quarantine Gdansk", or via Agents.

RADIO: Messages should be sent via Gdynia Radio.

RADAR/VHF: Port Radar Service acting with Pilot Station, can be contacted on VHF Channel 14. Also see "Gdynia".

Polish Notice No. 202/86: Ship Reporting System: The following are required to report by VHF to the Harbour Master of destination on crossing the latitude of 54° 45' N. (Repline Hel) in the entrance to the Gulf of Gdansk:

All vessels – if on account of special circumstances they may cause a risk of collision or pollution.

Vessels bound for Gdansk – of 150 g.r.t. and above.
Vessels bound for Gdynia – of 500 g.r.t. and above.
The report should include:
REPHEL (abbreviation of Repline Hel)
Name and call sign
Date and time
Position
Destination and ETA
Type and quantity of cargo
Draft
Any deficiencies, e.g.
(a) Overloading, or excessive heel or trim.
(b) Faults affecting manoeuvring capability.
(c) Uncleaned tanks, etc.
(d) Anything which might cause pollution.

The consent of the Harbour Master must be obtained before entering the roadstead of the port of destination.

TUGS: 14 tugs available. Join in Gdansk Roads. Vessel's lines must be used. Tugs compulsory for all vessels over 2,000 g.r.t. Tugs available up to 2,500 h.p.

BERTHING: Max. draft mentioned below is to be taken as normal water level. No tide. Max. difference from mean level is plus/minus 3 ft., subject to wind direction.

Name of Quay	*Length* (m.)	*Max. Draft* (m.)	*Max. LOA* (m.)
Inner Port:			
WOC 1	610	8.40	170
WOC 2	220	8.40	170
Ziolkowskiego	125	6.50	127
Oliwskie	600	10.20	225
Westerplatte	700	8.60	225
Obroncow Poczty Polskiej	285	10.10	235
Weglowe	840	8.80	225
Rudowe	695	10.20	225
Administracyjne	124	5.20	80
Wislany	869	10.20	225
Chemikow	210	10.20	225
Przemyslowe	235	6.40	145
Port Polnocny/Northern Port:			
Liquid Fuel Terminal	335	15.00	280
Coal Terminal	354	15.00	300
Ore Terminal	300	12.00	200

BULK HANDLING FACILITIES: Coal Handling Facilities at Northern Port Coal Terminal capable of receiving vessel up to max. draft 15.0 m. Daily loading rate 50,000 tons. Also Inner Port-Weglowe Quay equipped with 8, 10 and 16 tons cranes for vessels up to 9.6 m. draft. Bulk and liquid sulphur handled at Obroncow Poczty Polskiej Quay. 20 tons grab cranes and conveyor system for fertilisers in bulk at Chemikow Quay.

Grain elevator: Grain is also discharged by grabs. Conveyor system for loading salt and sodium in bulk.

Timber handling facilities at Rudowe and Westerplatte Quays.

CRANES: Quay cranes up to 40 tons; mobile quays up to 60 tons and floating cranes of 60 tons, 100 tons and 300 tons.

Also see "General Cargo Handling Facilities".

STORAGE FACILITIES:

Coal yard: 650,000 tons.
Phosphate shed: 60,000 tons.
Grain elevator: 8,000 tons.
Solid sulphur store: 20,000 tons.
Warehouses: 100,000 sq.m.
Open storage: 550,000 sq.m.
Refrigerated warehouse (Oliwski Quay): 5,000 tons.

GENERAL CARGO HANDLING FACILITIES: Passenger cargo/Ro-Ro terminal at Ziolkowskiego Quay.

Port is equipped with new Ro-Ro floating berth which can operate at every general cargo quay.

Westerplatte Quay: Warehouse and open storage yards. Handling of general cargo and packaged pulpwood. This quay is also used for waiting.

Oliwskie Quay: Warehouses on quay can handle general cargo, fruit and vegetables. Open storage yards for general cargo and packaged pulpwood.

Gorniczy Basin: Ore bridges have been dismantled. Max. draft up to 10.2 m. Handling general cargo and steel products.

Wislany Quay: Equipped with 3-16 ton portal cranes for general cargo and 7-8 ton cranes for bulk cargo, a grain elevator and special suction installations. Warehouses and open storage for general cargo and bulk cargo. Handling general cargo, steel products and heavy units.

STEVEDORES: As gangs for the following day must be ordered before 1100 hrs., vessel's ETA should reach the Agents relevantly in advance.

Stevedores work 24 hours per day, which is considered to be between 2300 hrs. – 2300 hrs. following day. First shift from 2300 hrs. – 0700 hrs., second shift from 0700 hrs. – 1500 hrs., third shift from 1500 hrs. – 2300 hrs.

Timber, general cargo and heavy lift operations are usually performed in two shifts only between 0700 hrs. and 2300 hrs. Sulphur, superphosphates, phosphorites, apatites, grain and other awkward dusty cargoes worked in 4 shifts of 6 hours each.

Port works Sundays, holidays and free Saturdays at premium rates. 1 in 4 Saturdays are worked.

MEDICAL: No special notice required. Full hospital facilities available.

TANKERS: Liquid Fuel Terminal at Northern Port.

Location: Southern part of the Gulf of Gdansk, 54° 25' N., 18° 43' E. approximately. Advisable route via "ZN" Beacon, to "ZS" Beacon, then anchorage on No. 5 Beacon 54° 27' N., 18° 53' E.

Facilities: 1 L-shaped jetty for berthing consists of 1 main platform and 4 main dolphins, fitted with quick release hooks. The main platform is fitted with gangway tower and 7 movable handling arms for loading and discharging purposes. Only 1 mooring place available. The jetty accessible for vessels having minimum 150 ft. (about 10,000 d.w.t.) and maximum 1,000 ft. (150,000 d.w.t.) length and 49 ft. 03 in. draft.

No facilities for liquefied gases.

For towing purposes there are 3×2,500 h.p. and 2×1,650 h.p. diesel tugs available, if necessary further 1,200 h.p. tugs are at hand. All tugs equipped with fire fighting equipment.

Cargo Handling Equipment: The 7 mobile handling arms, Luceat Production, are used as follows: No. 2, 3 and 4 for discharging of crude oil, rate about 10,000 cu.m./hr. No. 1 and 5 for loading bunker oil and water, rate about 2,000 cu.m./hr. No. 6 and 7 loading liquid fuels and refined products, rate 2,000 – 2,500 cu.m./hr. Loading pressure of vessel's pumps should not exceed 14.5 kg./sq.cm. at any time.

Facilities for handling of vessel's ballast water available.

Services: Marine diesel and fuel oil available at the jetty. Storage tanks located in the neighbourhood of the terminal and connected with central pipeline system of Poland. Laboratory for testing purposes and repairing facilities available.

DENSITY: Salt content: Below 0.3%

FRESH WATER: Available at hydrants, and delivery to vessels in roads.

FUEL: Heavy, intermediate and thin fuels, marine diesel oils and gas oils available ex-shore installation or lighter. 48 hours' notice required.

CONSULS:

Chinese People's Republic Consulate General, Tel: 41-64-76.
German Consulate General, Tel: 41-43-66
Russian Consulate General, Tel: 41-06-13.

At Gdynia:

Belgian Consulate, Tel: 20-39-83.
Brazilian Consulate, Tel: 21-61-31.
Italian Vice-Consulate, Tel: 21-51-15.
Swedish Consulate, Tel: 21-62-16.

At Sopot:

Finnish Consulate, Tel: 51-50-52.
Also representing other Scandinavian countries.

REPAIRS: All types of deck and engine repairs performed by specialised ship repair yard.

Floating docks: No. 1, 6,400 tons lifting capacity, dimensions 135×25.20 m. No. 2, 8,000 tons lifting capacity, dimensions 156×27.20 m. No. 3, 11,000 tons lifting capacity, dimensions 176×28.00 m. 1 floating jack of 1,700 tons capacity and 3 minor docking pontoons.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, crew allowed to handle.

CERTIFICATES:

Load Line Certificate.
Cargo Gear Certificates.

CUSTOMS ALLOWANCES: For 3 days – 160 cigarettes or 30 cigars or 150 gm. tobacco per crew member. Master is allowed double ration. 1 bottle wine and 1 bottle of spirits per crew member for each 3 days. Master is allowed double ration.

REPATRIATION: Crew changes and repatriation can be arranged by Agent.

AIRPORT: Gdansk Airport.

TIME: Middle European Time, which is 1 hour ahead of GMT.

HOLIDAYS: New Year's Day (January 1st); Easter Sunday (movable); Easter Monday (movable); Labour Day (May 1st); Constitution Day (May 3rd); St.Mary's Day (August 15th); Corpus Christi (movable); All Saints' Day (November 1st); Christmas Day (December 25th); Boxing Day (December 26th). On Christmas Eve and New Year's Eve, work stops at 1500 hrs. In justified and approved cases, overtime on Sundays and holidays can be arranged.

POLICE/FIRE/AMBULANCE: Police: Gdansk-Nowy Port, Wladyslawa IV-3, Tel: 31-48-61; Ambulance: Gdansk-Wrzeszcz, Al. Zwyciestwa 49, Tel: 41-10-00; Fire: Gdansk-Nowy Port, 57 Na Zaspe Street, alarm phone Tel: 41-22-22.

TELEPHONES: Available on most general cargo quays.

SERVICES: Collecting of oily ballast water to Ballast-water Treatment Plant. Cleaning of holds, bilges and ship's tanks.

STORING: Baltona ship chandlers supply ships with provisions, cabin, deck, bonded stores as well as spare parts for main and auxiliary engines. "Duty Free" shops for crew convenience.

IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book/Seaman's Book, and will receive a separate shore permit issued by the Immigration Authorities, entitling him to go ashore within the area of Gdynia/Sopot/Gdansk.

GARBAGE DISPOSAL:
1. Port Service Ltd. Tel: 20-07-21. Fax: 20-85-98. Telex: 59219. Disposal. Tel: 21-50-42, 20-85-71 (Cell: 226 or 277). Collection time 24 hours. Charges: U.S.$ 7.8 for 1 bag (0.3 cu.m.), minimum charge for 5 bags, all to Port of Gdansk tariff.
2. Grudel SC. Tel: 32-15-25.
3. Comal Ltd. Tel: 41-56-26. Telex: 051-2965.
4. Ship Service Ltd. Tel: 20-26-62.

WASTE OIL DISPOSAL:

1. Port Service Ltd. (data given above). Special tankers collect waste oils. Non-toxic oils permitted. Charges depend on kind of fuel (oil) and grade of contamination. Transformer oil and those containing PCB are not accepted. Transmission and engine oils in any quantity are accepted. Special tankers collect oily dirty ballast water for transportation to Ballast Water Treatment Plant situated in North Port (Tel: 43-71-41). Facilities: Tanker, barges and drums.

2. Comal Ltd. (data given above). Collect oily ballast water with barges and tank lorries.

SEAMAN'S CLUBS: No Seaman's Clubs in Gdansk. The nearest Club is in Gdynia. Shipchandler Baltona has duty free shops at Ziolkowskiego Quay, and at 16 Wolnosci Street in Nowy Port.

CURRENCY: Zloty.

DEVELOPMENTS: 2×40 ton shore cranes have been installed at Szczecinskie Quay.

Szczecinskie is being adapted for container handling and Ro/Ro vessels. Storage space of 20,000 sq.m. and container handling equipment will be available.

AUTHORITY: The Port Authority of Gdansk, Joint Stock Company, 18 Zamknieta Street, Nowy Port, 80-955 Gdansk, Poland. *Tel:* 439-600. *Telex:* 0512324 MPH PL, 512846 MPH PL. *Cables:* Geoport. *FAX:* 439-549. *Contact:* M.Switek, General Manager. R. Zdeb, Commercial Director.

AGENT: See "Szczecin".

GDYNIA: 54.32 N. 18.34 E. (See Plan)

ICE: On average, during most of the Winter periods both port and the roads are ice-free. Only prolonged and severe frosts may result in ice cover formation in basins and in the roads outside. Winds of gale force may shift some drifting ice floes from other parts of the bay and render navigation in the roadstead difficult. In such cases the approach channel and the port basins are kept free of ice and unobstructed to navigation by icebreakers of the Polish Ship Salvage Company and powerful tugs of the Port Authority. The cost of icebreaking is borne by the Port Authority. These phenomena, however, are rather rare, since Winters are usually mild in those areas.

PORT LIMITS: A vessel is an "arrived ship" and laytime commences from time of ship's entry into the roads.

DOCUMENTS:
- 11 copies Cargo Manifest.
- 2 copies Bills of Lading.
- Discharge Books to be collected for presentation.
- Ship's Register.
- Ship's Articles/Crew List.
- Maritime Declaration of Health.
- Derat Certificate.
- Sanitary Certificates covering food cargoes and/or of animal origin, destined for discharge here.
- Specification of Dangerous Cargo (even if in transit).
- 2 Stowage Plans.
- Load Line Certificate.
- Cargo Gear Certificates.

PILOTAGE: Compulsory. Pilots to be ordered 12 hours prior to arrival and 2 hours prior to departure. Boarding in Gdynia Roads. Gdynia Pilot station available on VHF Channel 12. Traffic around the clock.

Also see "Baltic Deep Sea Pilotage".

ANCHORAGES: Gdynia Roads at Buoy GD, up to 200 m. – 500 m. off port entrance. No tides.

RESTRICTIONS: Depth in main entrance 11.42 m.

MAX. SIZE: No limit on length, max. draft 11.42 m.

Also see "Berthing".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease the vessel should cable "Quarantine Gdynia", "Radio Medical Gdynia" or via Agents.

RADIO/VHF: Message should be sent via Gdynia Radio. Port Radar Service acting with the Pilot Station, can be contacted on VHF Channel 12, Gdynia. Contact Agent VHF Channel 7. Gdynia Radio on Channel 16, working on Channels 12, 24, 26 and 27. Traffic lists at 0035, 0835, 1235, 1635 and 2035 on Channel 26.

TUGS: 9 tugs available. Join vessel in Gdynia Roads. Vessel's lines must be used.

DRY DOCKS: 3 floating docks of a lifting capacity of 4,500, 3,500 and 1,200 tons. 12 slipways of 1,500 tons lifting capacity each.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Opening/closing hatches normally carried out by stevedores, but crew allowed to handle.

CERTIFICATES:
- Load Line Certificate.
- Cargo Gear Certificates.

CUSTOMS ALLOWANCES For each 3 days – 150 cigarettes or 30 cigars or 150 gm. of tobacco per Crew member. Master is allowed double ration. 1 bottle wine and 1 bottle spirits per Crew member for each 3 days. Master is allowed double ration.
REPATRIATION: Crew change and repatriation can be arranged.
AIRPORT: Gdansk-Rebiechowo Airport, situated 35 km. from Gdynia. Daily flights to Warsaw to connect with international flights.
TIME: Middle European Time, which is 1 hour ahead of GMT is kept in Autumn and Winter; East European Time, 2 hours ahead of GMT, is kept in Spring and Summer.
HOLIDAYS: New Year's Day (January 1st); Easter Sunday (movable); Easter Monday (movable); Labour Day (May 1st); Constitution Day (May 3rd); Corpus Christi (movable); Roman Catholic Church Holiday (August 15th); All Saints' Day (November 1st); Independence Day (November 11th); St. Barbara Day (December 4th, for coal workers only); Christmas Day (December 25th); Boxing Day (December 26th). On Christmas Eve and New Year's Eve, work is generally suspended at 1500 hrs. In justified and approved cases, overtime on Sundays and holidays can be arranged against extra payment.
POLICE/FIRE/AMBULANCE: Emergency Numbers: Police 997, Ambulance 999, Fire 998.
EMERGENCY CO-ORDINATION CENTRE: Urzad Morski, Gdynia 81–338, Chrzanowskiego 10, Telex: 054285; Tel: 20-69-11; Alarm: Gum Radio. Tel: open 24 hours: 21–61–62, VHF Channel 16.
TELEPHONES: Available on most general cargo quays.

Placing of telephones on board is according to current costs per 24 hours.
IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book and will receive a separate shore permit issued by the Immigration Authorities entitling him to go ashore within the area of Gydnia-Sopot-Gdansk.
GENERAL: Cargo is handled around the clock in 3 shifts of 8 hours each. Work on 3 Saturdays per month is paid by addition of 100 per cent. Sunday and holiday interruptions last from 2300 hrs. on Saturdays or days before holidays and terminate at 2300 hrs. on Sundays or holidays.

Transhipment of cargo at port rates. Extra fast despatch can be arranged at additional charges.
DEVELOPMENTS:

1. Ferry Terminal.
2. Reconstruction of the Francuskie Quay.
3. Enlarging storage capacity of the Baltic Grain Terminal Gdynia Ltd. up to 26,000 tons.
4. Duty Free Zone.

AGENT'S REPORT: September 1991.
Oil:
Berth Operator: Morski Port Handlowy Gdynia, except Oksywie which is Polish Navy base.
Breakwater: Crude oil, gas oil, gasoline, max. LOA 210 m., max. draft 12.50 m.

Fresh water can be supplied by barge only.
Danish Quay: Gas oil, gasoline. Max. LOA 100 m., max. draft 7.30 m.
Dutch Quay: Gas oil only. Max. LOA 200 m., max. draft 10.50 m.
Swedish Quay: Gas oil only. Max. LOA 200 m., max. draft 9.10 m.
Oksywie: Gas oil only. Max. LOA 100 m., max. draft 8.00 m.

No tides at Gdynia Port.
Max. depth in approaches 11.30 m.
Water density 1,005.
Berthing/unberthing 24 hours per day.
Bunkers available on prior arrangement.
Fresh water delivery from all piers by hydrants.
Type of berths: Concrete.
No minimum size of vessel restriction.
Dirty ballast/slops removing accepted, only to the barge.

One tug compulsory for vessels over LOA 90 m. Two tugs over 131 m. or draft 8.0 m. Three tugs over 166 m. or more than 9.0 m. draft. Four tugs compulsory over 200 m. One tug can be added by Harbour Authorities for vessels carrying dangerous/inflammable cargoes.

No air draft restrictions caused by bridges, etc.
No pilot boarding area on roads.

Agents are obliged to inform all parties concerned regarding flash point, and IMO class of cargo, which will be discharged.
Dry Bulk Cargoes:
Silesian Pier: Max. LOA 200 m., max. draft 8.50 m., max. outreach of cranes from jetty face across vessel 12.0 m.

5 cranes with capacities 7 tons and 10 tons.
Travel distance of cranes 400 m.
Loading rate for coal: 5,000 – 6,000 tons per day.
Loading rate for coke: 3,000 – 4,000 tons per day.
Dry bulk cargoes handled: Coal, coke, iron ore, bauxite and grain.
2 open storage areas of 80,000 tons available.
Dutch Pier: Max. LOA 200 m., max. draft 10.50 m.

Max. outreach of cranes 22.0 m.
6 cranes with capacities 10 tons and 16 tons.
Travel distance of cranes 360 m.
Loading rate from open storage: 10,000 tons per day (maximum).
Dry bulk grades handled: As above.
2 open storage areas of 23,000 tons.
Indian Pier: Alumina discharged via floating elevator to warehouse with capacity 8,000 tons. Discharge rate 3,000 tons per day.

SHIPMASTER'S REPORT: November 1994.
Pilot Station: Position Lat. 54° 32.1' N., Long. 18° 40.0' E.
Charts: B.A. Charts No. 2377 and 2384.
Distances: From Skagen Rev via The Sound 423 miles and via The Belt 543 miles.
Communications: Notices to Agents by telex as required by charter party, then contact Pilots on VHF as per A.L.R.S. B2640.
Approaches: Found to be as charted.
Buoys: The four buoys in position Lat. 54° 33.9' N., Long. 18° 37.7' E. were not seen.

Seven orange pillar buoys were noted in the prohibited area off Cypel Oksyioski Pier (Lat. 54° 33.0' N., Long. 18° 34.15' E.) on a bearing of 095° from the pier head, 4 buoys close East of the pier head and 3 buoys 3 cables from the pier head.
Pilots: Pilots board at the charted pilot station or a little to seaward.
Tugs: Three tugs come out with the pilot vessel, one making fast each end with 2 ship's lines through the centre lead (2 SLCL) and the third tug standing-by to push as required.
Berth: The vessel went on to Berth No. 19 in the Avant Port, where a minimum of 4 and 2 moorings are recommended.
Clearance: Friendly and efficient. The bonded store is sealed but an issue can be arranged every 3 days.
Cargo Working: Loading steel beams and billets.

Shore cranes were used throughout with occasional use of ship's cranes.

Working is on a 3 shift basis, round the clock.

Stevedoring is very good with a tight level stow being obtained, suitable for working on top with forklift trucks.

A stowage factor for beams of about 1.13 cu.m./tonne was achieved and an overall loading rate of 71.17 tonnes per gang hour was achieved for both commodities.
Surveyor: A Cargo Surveyor from W.K. Cargo Survey Ltd. attended throughout and passed suggested notations for the Mate's Receipts to the Chief Officer.
Departure: Three tugs are used, one each end with 2 SLCL and the third standing-by to push as required.

The vessel turned short round off the berth and the after tug let go when the turn had been completed. The forward tug lets go outside the breakwaters and the Pilot leaves at the entrance buoys.

SZCZECIN: 53.25 N. 14.32 E. (See Plan)
Including Swinoujscie, 53.55 N. 14.15 E.

DOCUMENTS: Basic Customs documents for entry:

12 copies of Cargo Manifests.
2 copies Bills of Lading.
International Tonnage Certificate.
International Load Line Certificate.
Vessel's Safety Certificates.
4 copies of Crew List.
Passenger List.
Maritime Declaration of Health.
Derat Certificate.
Specification of Dangerous Cargo (even if in transit).
2 copies Stowage Plans.

PILOTAGE: Contact Pilot Station, VHF Channel 12 and 14, also 26 or 27. Harbour Master's office, Channel 12. Light and sound signals used according to international rules. The Pilot is taken on board at the anchorage. Pilot compulsory for all vessels over 40 m. LOA.

Also see "Baltic Deep Sea Pilotage".

RESTRICTIONS: Vessels exceeding LOA 176 m. or draft 8.99 m. enter/leave port during daylight only.

Power Cable: An overhead power cable (clearance 64 m.) has been established in position Lat. 53° 31.55' N., Long. 14° 37.88' E. to Lat. 53° 31.72' N., Long. 14° 38.35' E.

MAX. SIZE: The depth at the operating berths in Szczecin enables loading and unloading ships of draft up to 9.15 m. and length up to 210 m.

The relationship between permissible length, breadth and draft for ships of overall length over 160 m., entering the port of Szczecin, is shown in the following table:

Overall length of ship in metres	*Maximum breadth of ship in metres*		
	up to 25 m.	up to 28 m.	up to 31 m.
	Maximum draft in fresh water in metres and feet		
160 – 176	8.99 m. (29 ft. 06 in.)	8.84 m. (29 ft. 00 in.)	8.69 m. (28 ft. 06 in.)
176 – 186	8.76 m. (28 ft. 09 9in.)	8.61 m. (28 ft. 03 in.)	8.46 m. (27 ft. 09 in.)
186 – 196	8.61 m. (28 ft. 03 in.)	8.46 m. (27 ft. 09 in.)	8.31 m. (27 ft. 03 in.)
196 – 210	8.46 m. (27 ft. 09 in.)	8.31 m. (27 ft. 03 in.)	8.15 m. (26 ft. 09 in.)

HEALTH: All ships arriving Szczecin from South of Cape Finistere are subject to sanitary inspection.

RADIO: Szczecin Radio, SPE, 2182 kHz. Medium frequencies.

TUGS: 15 tugs with capacity 800 h.p. – 1,500 h.p.

In ports Szczecin and Swinoujscie:

For ships over 85 m. – 1 tug compulsory.
For ships over 120 m. – 2 tugs compulsory.
For ships over 160 m. – 3 tugs compulsory.
For ships over 180 m. – 4 tugs compulsory.

Service is provided by Zaklad Uslug Zeglugowych Sp. z.o.o., Ludowa 16, 71-700 Szczecin, Poland. Tel: 48 91 305 559. Fax: 48 91 347 700.

BERTHING: Use of mooring service is compulsory, boatman must be ordered through vessel's Agent.

Szczecin:

Name of Quay	*Length (m.)*	*Depth (m.)*	*Designation*	*Equipment*

Greckie	627	5.6-5.8		Anchorage for ships and barges.
Jugoslowianskie	95	1.9-7.7	General cargo	No cranes, 3,280 sq.m. open storage.
Swinoujscie:				
Portowcow	215	10.60	Bulk cargo, general cargo.	2×16-ton cranes, 4,200 sq.m. open storage.
Gornikow	260	12.80	Coal	2×10-ton cranes, coal terminal capable of accepting vessels upto 65,000 d.w.t. Shiploader with daily capacity of 30,000 tons. Fully mechanised open coal storage area equipped with rubber-belt conveyors for transport of coal at the storage areas. Storage capacity 700,000 tons.
Wladyslawa IV	554	10.0		The quay is used for lighterage and as a lay-by berth.
Chemikow	282	12.8	Bulk (ore)	2×20-ton gantry cranes. Import raw chemical materials such as phosphates. Covered storage for 100,000 tons of cargo. Handling rate of 10,000 tons daily. Barges and wagons can be loaded directly ex-ship or ex-store with capacity of 500 tons.
Hutnikow	329	12.8	Ore	1×40-ton gantry crane and 1 shiploader (capacity 630 t.p.h.) for handling ore, aggregate and heavy general cargoes. Open storage of 5,200 sq.m.

Note: * New Quays.

In Swinoujscie there is also a defreezing plant for railway cars and railcar dumpers.

BULK HANDLING FACILITIES: See "Berthing".

CRANES: Shore cranes: 93×6 tons – 20 tons. Floating cranes: 1×16 tons, 1×90 tons, 1×200 tons. Mobile container crane of 50 ton capacity.

Also see "Berthing" for quay cranes.

STEVEDORES: 24 hours ETA required to arrange gangs.

1 in 4 Saturdays are worked.

MEDICAL: Doctors and hospital facilities available.

TANKERS: All empty tankers have to give 24 hours ETA advice whether they are gasfree and name of last cargo carried. No residue discharge facilities.

DENSITY: 1000.

FRESH WATER: Fresh water supplied from hydrants on quays or by water tanker. The minimum charge is for 5 tons of water. For supply of water on Sundays and holidays a surcharge of 100% is levied. Cost per ton – via hydrant $3.90, via barge $7.80.

FUEL: All grades of Shell fuel oil and Castrol marine lubricants.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally opened by crew.

CUSTOMS ALLOWANCES: Each man – 160 cigarettes and 1 bottle of spirit. Master allowed double.

CARGO GEAR: No additional requirements; all gear supplied by stevedores except rain tents.

CONSULS: Swedish Consulate (represents Denmark and Norway), Russian Consulate, Czech Rep. Consulate, German Consulate and Cuban Consulate.

REPAIRS: *Shipyards:*

Stocznia "Odra" (Odra Shipyard), ul. Heyki 14, 71-631 Szczecin. Tel: (48-91) 337-822, 489-965. Telex: 422473 Stor Pl. Fax: (48-91) 345-911.

REPATRIATION: Crew changes and arranging repatriation can be done.

AIRPORT: 45 km. from Szczecin. Regular flights to Warsaw. From Warsaw communication to every main airport in Europe. Berlin Airport is 140 km. from Szczecin.

TIME: GMT plus 1 hour; GMT plus 2 hours in Summer.

HOLIDAYS: Port Authority holidays in Szczecin-Swinoujscie in 1996:

January	1	New Year
	6, 20, 27	free Saturdays
February	10, 17, 24	free Saturdays
March	2, 16, 30	free Saturdays
April	6, 13, 27	free Saturdays
	7	solemn holiday
	8	holiday
May	1	holiday
	2, 3	solemn holiday
	4, 11, 25	free Saturdays
June	6	holiday
	1, 8, 22, 29	free Saturdays
July	13, 20, 27	free Saturdays
August	3, 17, 31	free Saturdays
	15	holiday
September	7, 21, 28	free Saturdays
October	15, 19, 26	free Saturdays
November	1, 11	holiday
	2, 9, 30	free Saturdays
December	21, 28	free Saturdays
	24 from 2 pm, 26, 27	holiday
	25, 31 from 2 pm	solemn holiday

POLICE/FIRE/AMBULANCE: Police, 997; Ambulance and First Aid Station, 999; Fire Brigade, 998.

EMERGENCY CO-ORDINATION CENTRE: Rescue Co-ordination Centre at Swinoujscie, ul. Nab. Wladyslawa IV, 72-601 Swinoujzcie. Tel: (48-936) 5929 (day and night). Telex: 422632 Pro Pl.

TELEPHONES: Telephone exchange of the Port Authority Szczecin 308 999/Trunk service connections with ships in the port. Port telephone numbers:

Port Fire Bridge	308 355, 308 455.
Port Office of the Police	533 935, 539 919.
Port Officer on duty	533 944.
Port District Medical Dispensary	344 582, 344 662.

SERVICES: "Shipservice" – Enterprise for Maritime Services, ul. Przejazd 1, 70-607 Szczecin. Tel: 337-162, 342-471. Fax: 338-284. Telex: 422282 Ship Pl.

Marine Radio Service: "MORS" Morska Obsluga Radiowa Statkow. All services to any radar, radio or navigation equipment – orders via Morska Agencja Szczecin.

Compass adjusting available. Chart corrections possible. British Admiralty and Polish charts available.

STORING: See "Prelims".

1. Vessel can be stored by barge/motorboat/or truck.

3. Trucks can proceed alongside at the berth. Vessel can store from barge/trucks during loading/discharging operation using her derricks or port crane.

5. Customs Office must be informed about storing.

6. Local riggers (strictly port's workers) can be employed to assist with storing.

SHIP SUPPLY SERVICE: Supplied by Agent.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book and will receive a separate shore permit issued by the Immigration Authorities entitling him to go ashore within the city area.

GARBAGE DISPOSAL: Shipservice, ul. Przejazd 1, 70-607 Szczecin, Poland. Tel: 337-162, 342-471. Telex: 422282. Fax: 338-284.

Clean Up Service II, ul. Komuny Paryskiej 32c/8 Szczecin. Tel: 520-322.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: Sailor's Home, 10/12 Malczewskiego Street, 70-612 Szczecin, Poland. Tel: (48-91) 240-001. Telex: 425159. Fax: (48-91) 228-578.

CURRENCY: Polish Zloty (Zl). U.S.$ 1.00 = 2,548 Zl. (March 1996).

DEVELOPMENTS: The Szczecin port has been in the main developed as a general cargo port. A main investment effort has been directed toward an establishment of a modern general cargo potential. New berths and terminals working on the "Roll-on/Roll-off" and "Lift-on/Lift-off" system will be built. The investment will comprise: berths, storage space, cranes, trucks and the other equipment for transhipment of conventional and containerised general cargo.

The Port of Swinoujscie is still being built in as a bulk cargo harbour, capable of serving large vessels. Simultaneously the port will be developing ferry services. A modern ferry terminal built in 1972-1973 is under further development and a target project stipulates 4 berths and 10 arrivals and departures per day.

Fertiliser plant under construction at Police. For vessels up to 38,000 d.w.t.

SHIPMASTER'S REPORT: November 1994.

Pilot Station: At Anchorage No. 2, in position Lat. 54° 03.4' N., Long. 14° 15.0' E.

Chart: B.A. Chart No. 185.

Distances: From Skagen Rev via The Sound 272 miles and via the Belt 372 miles.

Communications: All communications are through the Agent at Szczecin, and to the Pilots 24 hours in advance by telex, then by VHF when in range.

Approaches: Found to be as charted, except that the Racon on Buoy N-2 was inoperative and Buoy N-5 was missing.

When within VHF range, the Pilot will advise which anchorage to use or if the vessel is berthing on arrival.

Pilot: The Pilot boards at the pilot station at Anchorage No. 2 or a little closer inshore.

When berthing at Szczecin, the Pilot will take the vessel to Debina (Approx. Lat. 53° 30' N., Long. 14° 13' E.), where the Pilots change, and a second Pilot takes the vessel to the berth and alongside.

When leaving Szczecin, if the vessel is berthing in Swinoujscie, the same Pilot remains with the vessel throughout.

If the vessel is proceeding to sea or going to anchorage to await a berth at Swinoujscie, Pilots will change at Swinoujscie (Approx. Lat. 53° 54.5' N., Long. 14° 16' E.), the second Pilot taking the vessel to anchorage or leaving at Buoys No. 5/6, when going to sea.

Tugs: Four tugs are used for berthing, one made fast each end with 2 ship's lines through the centre lead and 2 tugs pushing as required.

When berthing at Szczecin, the tugs join and make fast fore and aft shortly after changing Pilots, and when released will put the lines ashore.

On departure, 4 tugs are used, one each end with 2 SLCL and 2 tugs assisting until the vessel has turned and is heading downriver, when the 2 tugs pushing and stern tugs are dismissed. The bow tug remains made fast aft until Debina, where it is released.

Berthing – Szczecin: The vessel berthed port side to Berth No. 65. The starboard anchor was required to be ready, but was not used.

Restrictions: For this vessel – LOA 188.4 m., beam 31 m. and draft 8.31 m., in variable density, on this occasion 1005, the draft available may change with wind conditions.

Daylight transit of the river only.

Two miles visibility for the whole transit is required.

Cut-off time for departure in November was 1300 hrs.

Passage Time: Szczecin to Swinoujscie takes about 5 – 6 hours.

Szczecin – Cargo Working: We loaded steel products in 3 shifts, round the clock, with ship's cranes.

Berth No. 65 is equipped with luffing cranes which can be rigged for grab or hook working and can be used for bulk cargoes. There are stock pile areas on the quay for steel, etc.

A good stow is obtained by using mobile cranes in the holds to reach the wings and overhang areas with bundles and coils of plate.

Securing with steel strapping is a continuous process throughout loading.

Berthing – Swinoujscie: Vessel berthed starboard side to at Chemikow, which is used mainly for bulk cargoes, and is served by 2 gantry cranes.

Tugs: Four tugs are used for berthing and departure, one each end made fast with 2 SLCL and 2 tugs pushing. The tugs join when approaching the berth.

On departure, the stern and pushing tugs are dismissed when clear of the berth, but the forward tug remains made fast until the vessel is clear of the breakwaters.

Pilots: Pilot disembarks at Buoys No. 5/6.

Swinoujscie – Cargo Working: We loaded steel products in 3 shifts, round the clock, by ship's cranes throughout, with occasional assistance from the shore cranes.

The cargo was shipped down from Szczecin by barge and some cargo was landed ashore to be loaded using the shore gantry cranes, but mostly loaded direct from the barges alongside the port side, using ship's cranes.

On this occasion, stevedores came down from Szczecin to supplement the local gangs. The Szczecin stevedores are more experienced with this type of cargo.

If Szczecin gangs are used, it is appreciated if accommodation is made available for the foreman who remains with the vessel throughout.

Stowage in the holds is by mobile crane and a good tight stow is achieved, securing with steel strapping being carried out throughout the loading.

Cargo loaded was packets and rolls of plate and wire rod coils. A stowage factor of 1.26 cu.m./tonne was achieved for wire rod coils. The overall loading rate for both ports and commodities was 53.24 tons per gang hour.

This berth is close by the river entrance, and loading delays can be experienced due to strong winds.

The cargo weights are given on the loading lists as gross. However, the draft survey weight for all cargo loaded in Poland was 2.9% greater than the Bill of Lading weight, which could cause problems when loading to the marks.

Surveyor: A Cargo Surveyor is in attendance throughout and passes the suggested notations direct to the Agents for inclusion on the Mate's Receipts, after discussion with the Chief Officer.

Medical: Medical attention is arranged by the Agent, and in Swinoujscie, the Port Health Authority Chief Medical Officer will attend on board and arrange any shore treatment required.

Clearance: Clearance inwards is friendly and efficient and applies for both berths.

Shore Leave: Shore passes are issued on arrival at the first berth and collected before departure.

Extracts of Szczecin Port By-Laws:

122. The ship moored to a port quay at night or in periods of limited visibility should show white lights located on the water side at the height of the ship's deck as follows:
Ship's length less than 50 m. – one light at ship's middle part.
Ship's length 50 m. – 100 m. — 4 lights at ship's bow and stern.
Ship's length over 100 m. – 3 lights at ship's bow, stern and middle part.

68.4 Mooring ropes should be provided with rat guards.

86.1 Ship's laying at a quay or other similar construction should have safe and properly fixed connections with land (gangway, ladder, platform, etc.). Before fixing such connection with land, the traffic between the ship and land is forbidden.

.2 In the place of the ship's connection with land should be positioned a lifebuoy with a heaving line.

.3 The ship's connection with the land should be well lit at night.

.4 Without ship's connection, the gate in the ship's bulwark should be closed and pilot ladder not outside vessel.

.6 It is forbidden to use ship's connection with land if it is damaged.

87.1 The gangway should be sufficiently strong and with both sides secure.

.4 The gangway should be protected by a net.

88.3 Outlet openings for impurities and for pumps onboard the ship should be protected to prevent water pollution and splashing of the quay and passing persons.

89.1 The Master of the ship or his deputy and the sufficient number of crew should be onboard for performing the port watches, and particularly for supervising the vessel.

90.1 Engine test mooring trials can be performed at the testing stations only, or other place determined by Harbour Master.

91. Maintenance works, as well as minor repairs to the ship's outside hull when she is moored at a quay or at some mooring place, can be performed after receiving Harbour Master's permission.

113.2 Oily water, polluted with crude oil derivative substances or with a concentration greater than 15 ppm. should be delivered from the ship to a proper receiving installation before ship sails out.

.4 Waste – Solid food waste and waste materials should be landed before the ship sails out.

.7 In case only small quantity of impurities, mentioned in Section 2 and 4, is collected on the ship, the Harbour Master can withdraw the obligation of their landing, provided ship's Master makes a statement that the ship's free storage capacity assures their storage on a ship without throwing them into the Baltic Sea.

114. Szczecin Maritime Office may seal the ship's bilge system valves after their closing, for all time of ship's stay in the port.

75.1 All ships of over 150 gross tons are obliged to use the port wharfmen at quay.

77.2 When making notice of an international navigation ship's entry, it is necessary to submit Tonnage Certificate, Crew List, Cargo Manifest and Passenger List.

.3 The Harbour Master's office has the right to keep the ship's Tonnage Certificate for time of the ship's stay in the port.

80.1 It is forbidden to leave port if:
1. Overloaded or showing a large list – until it is partly unloaded or list is reduced.
3. Ship's safety documents are not valid.
4. Ships do not meet the requirements stated in the safety documents, as regards number and qualification, of crew, equipment, etc.

§15.2 The enterprises performing agency and broking services are obliged to inform Masters of ships they serve, about the port bye-laws and upon their demand to deliver them the properly prepared copies of the port bye-laws.

NOTES

Please also advise Shipping Guides Ltd.

Portugal

AVEIRO: 40.39 N. 08.45 W. (See Plan)

PORT LIMITS: A vessel is considered "arrived" when she is 3 miles from the piers.
DOCUMENTS:

5 Crew Lists.
4 Lists of Passengers Disembarked.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
1 Provisions List and Spares.
2 Health Certificates.
2 Dangerous Cargo Lists (when applicable).
2 Lists of Articles held by the Crew.

PILOTAGE: Compulsory for vessels of 200 g.r.t. and above. Pilots address: Departmento de Pilotagem do Porto de Aveiro - Barra - 3830 – Ilhavo. Hours: 0800 – 1200 and 1400 – 1800.

Telephone: 369 429.
Telex: 37338 Inppda p.
Telefax: 369244.
VHF: Channels 14 and 16.

At least 3 hours notice of ETA required by VHF or telephone.

In normal conditions of weather and sea, the area of boarding is usually 1 miles N.W. of North Pier. If not possible to board in this area the pilot boat will guide the vessel across the bar. If weather and sea do not allow this, vessel will be guided by VHF Channel 14 and take the Pilot between piers.

There are 3 pilot boats, one of 18 m. and the other 12 m. length, both have black hull and white superstructure, identified with a "P", and another fast boat totally white. All boats display a white flag sorrounded by narrow blue strip, with a black "P" in the centre.

ANCHORAGE: West of North Pier, at a distance of about 1.5 miles.
RESTRICTIONS: Depth at bar 8.0 m. to 11.0 m. Tidal variation 3.0 m. Entering and sailing only during daylight. No entry during thick fog.

It is expected that 24 hour entering and sailing will commence soon.

MAX. SIZE: LOA and draft are regulated by Port Captain's Notice No. 5/89.

North Terminal: Length 130 m., draft 7.0 m.
South Terminal and Industrial Port (tankers): Length 90 m., draft 5.2 m.

HEALTH: Usual international health regulations to be observed. Free Pratique automatic for vessels coming from other Portuguese ports.
RADIO: Aveiro Pilots Radio on VHF Channels 14 and 16. Radio station is Lisbon Radio.
VHF: See "Pilotage".
RADAR: Pilot boat has radar that can assist vessels during approach to harbour entrance.
TUGS: 1×145 h.p., 1×400 h.p., 1×475 h.p. and 1×800 h.p.
BERTHING:

	Length (m.)	*Depth at LW* (m.)
North Terminal	650.00	10.0
South Terminal	400.00	6.5
Chemical Terminal:		
No. 20	35.00	8.0
No. 21	49.00	8.0
No. 22	41.50	8.0
Fishing fleet port	25.90 – 45.00	3.0 – 6.0

CRANES: *North Terminal:* 6×12 ton and 1×39 ton electric cranes.
South Terminal: 4×6 ton and 2×12 ton electric cranes.
Mobile cranes: 2×3 ton, 6×7 ton, 7×16 ton, 1×50 ton, 1×100 ton.
BULK CARGO FACILITIES: Petro chemicals at Chemical Terminal. Grabbing cranes at North and South Terminals of up to 9.0 cu.m. capacity.
SPECIALISED CARGO - HANDLING FACILITIES: There is a Ro/Ro berth at the Northern part of North Terminal.
STEVEDORES: Advise agent 24 hours before vessel's arrival.
Working hours: 0800 – 2400 hrs., overtime possible.
MEDICAL: Hospital and clinics in town. Advance notice not required. Required vaccination certificate, and when ship comes from affected regions, also yellow fever certificate.
TANKERS: Private quay of Petrogal/GALP used by small-sized tankers. Two Port Authority quays for tankers, wine, liquid combustibles and chemicals. No facilities for dirty ballast.
DENSITY: About 1025.
FRESH WATER: Supplied from quay at 20 t.p.h. or by road tanker.
FUEL: Only diesel available. Smaller quantities supplied from road tankers. Otherwise, from Petrogal's private quay (pipeline).
CONSULS: Nearest Oporto, 60 km.
REPAIRS: All types of repairs can be carried out.
DRY DOCKS: 1 Dry dock (100 m.×18 m.) for vessels up to 3,000 d.w.t. and 1 floating dock for vessels up to 1,200 d.w.t.
SURVEYORS: Cargo and ship surveyors available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: By crew.
REPATRIATION: Possible. If crew member has letter from Master of vessel, 40% discount allowed on fare.
AIRPORT: Oporto Airport (Pedras Rubras) at about 80 km. Lisbon Airport (Portela) at about 250 km. Both served by regular airlines covering all the world.
TIME: From October to April: GMT; April to October: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Local Holiday (movable – Monday after Easter); Liberty's Day (25th April); Worker's Day (1st May); Portugal's Day (10th June); Religious Holiday (15th August); Corpus Christi (movable); Proclamation of the Republic (5th October); All Saint's Day (1st November); Independence of Portugal (1st December); Immaculate Conception (8th December); Christmas Day. No work allowed on Christmas Day and New Year's Day.
CUSTOMS ALLOWANCES: 125 grams tobacco, and 1 bottle wine/spirits for each man.
POLICE/FIRE/AMBULANCE: Call 115 for all services.
TELEPHONES: Not available on board.
SERVICES: Ship repairs, fresh water, towage, provisions, repatriation, gyro/radio repairs, fumigation, bunkering, medical, surveys, divers.
BANK: Lloyd's Bank and Portuguese Banks.
STORING: See "Prelims".

1. Yes.
2. No interference with cargo work.
3. Yes.
4. Yes.
5.
6. Yes.

SHIP SUPPLY SERVICE: Available. Contact agent.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Crew members going ashore will need a special card issued by Customs Officer and Maritime Authority. Ship's Agent takes these cards aboard, where they are completed in accordance with Crew List. See "Lisbon".
GARBAGE DISPOSAL: Service available, 0.8 cu.m. containers, provided alongside by Port Authority.
WASTE OIL DISPOSAL: Slop reception, according to MARPOL.
SEAMAN'S CLUBS: Club Stella Maris, Av. Bacalhoeiros 354, Gafanha da Nazare, 3830 Ilhavo, Tel: (034) 361150.
CURRENCY: Portuguese Escudos (PTE).
DELAYS: As a tidal port, arrivals and sailings are subject to tides. Delays may occur owing to bad weather, especially during the Winter months.
DEVELOPMENTS: Construction of container terminal.

FIGUEIRA DA FOZ: 40.09 N. 08.52 W. (See Plan)

DOCUMENTS:

Health Certificate (Pilot supplies form).
5 Crew Lists.
4 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
Provision and Spares List.
2 copies each Bill of Lading.

PILOTAGE: Compulsory. Send ETA to Agent by cable 24 hours before arrival. Vessels should arrive 2 hours before high tide. Call Figueira Pilots on VHF Channels 16 and 14, from 0900 hrs. – 1200 hrs. and 1400 hrs. – 1700 hrs.

Await Pilot 0.5 miles from the piers.

ANCHORAGES: South of N.W. Azimuth of North Pier, at a distance of more than 0.5 miles.

RESTRICTIONS: No service available at the following times:

1st October – 30th April, between sunset and sunrise.
1st May – 30th September, midnight to sunrise.

MAX. SIZE: Max. draft 15 ft. (16 ft. weather and tide permitting). Max. length 100 m.

HEALTH: Free Pratique authorised for vessels coming from other Ports in Mainland Portugal. For vessels coming from other countries, Health Declaration supplied by the Pilot must be filled in.

RADIO: Radio Foz listens on VHF Channel 16, Monday – Friday from 0900 hrs. – 1230 hrs. and 1400 hrs. – 1730 hrs.

Figueira Pesca listens on VHF Channels 16 and 3, from 0600 hrs. – 2400 hrs. Monday – Friday and 0600 hrs. – 1300 hrs. Saturday.

TUGS: 1×396 h.p. Tugs not compulsory for berthing and unberthing.

BERTHING: The port is in the mouth of the Mondego River. The anchorage is in sand and outside the harbour.

Concrete Quay: Length 462 m. Depth 16 ft.
Lay-up Quay: Length 250 m. Depth 16 ft.
Depths on Bar: MHW 7.0 m. MLW 4.30 m.

There is about 2,000 m. of quayage for small ships and fishing craft.

CRANES:

4×6 tons at 24 m. (electric)
12 tons at 20 m.
3×3 tons at 24 m. (electric)
6 tons at 20 m.
1×1.5 tons at 24 m. (electric)
3 tons at 16 m.
1×2.3 tons at 16 m. (mobile)
16 tons at 3 m.
1×52.5 tons at 23 m. (normal operation) or
72.5 tons at 17 m. (maximum – mobile), with spreaders for containers up to 40 ft.
20×3/25 ton forklift trucks.

STEVEDORES: Advise Agent 24 hours before arrival.

MEDICAL: No prior advice is necessary. All medical facilities available.

DENSITY: About 1020.

FRESH WATER: Each quay has its own installations.

FUEL: Only diesel available.

CONSULS: France, Spain and United Kingdom.

REPAIRS: There are two shipyards and repair facilities, also a slipway for ships up to 3,000 tons.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCES: No limit, but must be declared.

REPATRIATION: No difficulty in crew repatriation.

TIME: From last Sunday in September till last Sunday in March GMT and the rest of the year GMT plus 1 hour.

HOLIDAYS: New Year's Day; Good Friday; 25th April; 1st May; Corpus Christi (movable); 10th June; 24th June; 15th August; 5th October; All Saint's Day (1st November); 1st December; 8th December; 24th December; 25th December.

POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 115; Fire 22122 and 22030.

SHORE LEAVE: Crew allowed ashore.

DELAYS: As a tidal port, arrivals and sailings subject to tides. Delays may occur owing to bad weather, especially during Winter months.

IDENTIFICATION CARDS: See "Lisbon".

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Available.

SEAMAN'S CLUBS: Stella Maris.

CURRENCY: Escudos.

DEVELOPMENTS: Construction of a new bulk terminal started early 1996, and is expected to be completed early 1997. The terminal will be served by railway.

AUTHORITY: Junta Autonoma do Porto da Figueira da Foz, Avenida de Espanha, 3080 Figueira da Foz, Portugal. *Tel:* (033) 22365, 22366. *FAX:* (033) 23945. *Contact:* Joao de Oliveira Barrosa, Port Director. Captain Rocha Cabecas, Harbour Master.

AGENT: A. J. Goncalves de Moraes, Lda., 262-Rua da Republica, 3080 Figueira da Foz – Portugal. Tel: (33) 22584. Fax: (33) 20543. Cables: Amoras. After office hours: (33) 25016 and (34) 24666 ("Aveiro" network). Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

LEIXOES and OPORTO (Douro River): (See Plan)
Leixoes: 41.11 N. 08.43 W. Oporto: 41.09 N. 08.37 W.

DOCUMENTS:

Health Certificate.
6 copies Crew List.
2 copies Stores List.
2 copies Crew Effects List.
Maritime Declaration of Health.
Ship's Register.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio Certificate.
5 copies Manifest and 1 copy of each Bill of Lading concerning cargo to be discharged.
1 copy Transit Manifest, if cargo in transit exists.

APPROACHES: *Leixoes:*

By day: Vessels coming from the North should take due heed of the Orca Rock situated 1,300 m. beyond the Northern Quay on the parallel 41° 10' 37" N. and should pass to the South of the breakwater light.

By night: Vessels approaching the port should be guided by the lights of the breakwater and then by the lights of the lighthouse, positioned at the heads of the North and South Moles of the Port, placing the Leca lighthouse in the middle of them.

Entrance Channel: The width of the port entrance between the heads of the breakwaters is 220 m.; in the foreport the channel widens to 500 m., from the entrance for 240 m. and is reduced again towards the entrance of Dock No. 1 to 113 m. By dredging, the depths are maintained at 10 m. The width of the entrance to Dock No. 2 is 58 m.

PILOTAGE: Pilotage is compulsory for entry and leaving, with the exception of coastal vessels and national flag craft up to 500 g.r.t., coastal and local fishing vessels and pleasure craft. Available day and night in Leixoes, but in Oporto only between sunrise and sunset, and then dependent upon sea conditions. Vessels must communicate their ETA a minimum of 12 hours ahead and confirm again 4 hours in advance. Departures must be communicated 2 hours ahead between 0800 and 1800 hrs. This must be done via the Radar Station.

Pilot boat recognition:

By day – black hull, with the letter "P" painted in white. Also a flag may be hoisted which is white, lined in blue, and with a black letter "P" in the centre.

By night – a white light at the top of the mast forward and lower down a red light.

Call-up signals by ship's siren:

To call Pilot – Letter "G" in morse, or Letter "O".
To call pilot launch – Letter "O" in morse.

VHF: Pilots on VHF Channels 9, 12, 13 and 16.

ANCHORAGES: *Douro River:*

Outside the port: Vessels may await entry, anchoring to the North of the alignment of the bar entrance lights of the Douro River in an area defined by the alignments of the Leca lighthouse, and the N.W. side of the Leixoes mole. In this area the depths vary between 16 m. and 21 m.

The anchorage is not safe in certain weather conditions.

Inside the port: Vessels can anchor with 2 anchors at the bow and 1 small anchor at the stern, and even by passing lines ashore at the following points: Alfandega, Cabrea, Pedras, Bicalho, Gas, Lugan, Carbonifera, Gaia and Monchique.

Leixoes:

Outside the port: Vessels can await entry, anchoring outside a radius of half a mile from the head of the breakwater to the West, and with an Eastern limit as the alignment of the Leca lighthouse with the breakwater light itself.

Anchorage is not safe during bad weather.

Inside the port: Vessels can anchor in the foreport.

MAX. SIZE: *Douro River:* Permitted draft on entering the port, variable with the state at the bar is from 18 ft. to 19 ft. (HWST) and 16 ft. to 17 ft. (HWNT).

The height of the tide of the port is: Average during Spring tides 2.30 m; average during Neap tides 1.80 m.

At times and particularly during the months of January, February and December, normal movement of vessels is affected by the rough sea which in conjunction with the river current causes frequent variation, both in the width and in the depth of the access channel, and necessitates annual dredging in order to guarantee conditions of navigability.

Leixoes: Cargo vessels 31 ft. Also see "Tankers".

RESTRICTIONS: *Douro:* Subject tide and bar conditions.

The main alignments of the bar, are as follows:

1. Tres Orelhas (a pillar with 3 battlements on the upper part, located at Sobreiras) or Marca Nova do Mato, on the Anjo (an archway on the Tower of S. Miguel da Cantareira);

2. Tres Orelhas by Marca Nova da Cantareira (light on iron column).

Marking of navigation channel – The channel is defined by 7 buoys.

HEALTH: Free Pratique authorised for vessels coming from other ports in mainland Portugal. For vessels coming from other countries Health Declaration supplied by the Pilot must be filled in, and delivered to the Agent. Radio Pratique also available.

RADIO: *Leixoes Naval Radio Station:* Operated by the Leixoes Port Captaincy, working with permanent listening-watch on 2182 kHz for aid to navigation; receives and listens on frequencies 2182, 2097, 2566, 2657, 4474.5 and 7510 kHz. Transmits weather report and Notices to Mariners by radiotelephony for the coastal strip for a distance of 50 miles to seaward of the coast of Portugal at the times 0735 Z, 1005 Z, 1935 Z, 2205 Z, on frequency 2657 kHz.

It listens out permanently on VHF Channel 16 (156.80 MHz) for aid to navigation and has working Channels 11, 13, 19, 39 and 60.

RADAR/VHF: *Leixoes Radar Station:* Operated by the Administration of the Ports of the Douro and Leixoes, it is equipped with radar for control and support to navigation, and has a range of 18 miles. It also has VHF equipment, permanently listening out, working on the 156 – 175 MHz band, it being possible for any vessel, up to a distance of 50 miles to contact this station for identification, port matters and meteorological information. The permanent listening channels are 12 and 16. The working channels are 9, 10, 11 and 68.

TUGS: Normally join the vessel.

At Leixoes: 7 tugs, 1,300 – 2,800 h.p. In the outer harbour up to 700 g.r.t., no tug required; from 700 up to 1,800 g.r.t. 1 tug compulsory. Over 1,800 g.r.t., 2 or more tugs required.

Report: 1994.

Large vessels require 4 tugs (2×35 ton B.P. from Port Authority and 2×45 ton B.P. from Petrogal).

At Douro River: As a rule service necessary on arrival/sailings. Thus they join the vessel after passing the bar.

BERTHING: *Douro River:* Gaia Quay: Length 280 m. Depth 18 ft. Estiva Quay: Length 140 m. Depth 11 ft. – 17 ft. Porto A Quay and Alfandega Quay are for small craft only.

In addition there are private facilities of Secil (4 cement silos, total capacity 12,000 tons), Leiria Cement Company and Mobil.

Outer Harbour: The depth of water at the entrance and in the centre of the outer harbour is 10.00 m. at MLWST; Maximum rise of tides 3.99 m.; Minimum rise of tides 0.07 m.; Total water area 117.36 ha.; Breadth of entrance (harbour) 220.05 m.; Breadth of entrance (Dock No. 1) 113.00 m.

Dock No. 1: Length of North Quay 487 m.; South Quay 551 m.; Maximum draft 29 ft.

Dock No. 2: Length of North Quay 670 m. and South Quay 743 m.; Maximum draft 31 ft.

South Mole: Length of Quay 370 m.; Depth 19 ft.

Ro/Ro Terminal: Quay with a usable length of 145 m. and max. depth of water of 18 ft.

Dock No. 4: Length of quay 500 m., max. draft 30 ft.

CONTAINER HANDLING FACILITIES: *South Side:* 440 m. of usable quays with a depth of 9.3 m. The total open storage area for containers is 3.4 hectares. It is equipped with a gantry crane of 35 tons capacity, 2 transtainers with 35 tons capacity and 2 straddle carriers of 30 tons capacity.

Equipment used at both terminals include 2 forklifts of 25 tons capacity and 2 container handlers with front line spreaders of 7 tons capacity for empty containers.

North Side: 360 m. of usable quay with a depth of 9.1 m. Its usable open area for containers is 1.97 hectares. It is equipped with 2 gantry cranes of 35 tons capacity and 5 transtainers with a capacity of 35 tons. Also see "South Side" above.

CRANES: *Leixoes:* Dock No. 1: 1×94 tons on the North side and 6×5 tons on the South side.

Dock No. 2: 11×5 tons and 2×5/15 tons on the North side, and 1×31.8 tons, 2×12/24 tons and 13×5 tons on the South side.

Dock No. 4: 2×5 tons and 2×15 tons.

South Mole: 3×5 tons.

Douro: Gaia Quay: 2×1.5 tons, 1×3 tons and 1×5 tons.

TANKERS: *Terminal Operator:* Petroleos de Portugal E.P. (Petrogal).

Pier A: Max. d.w.t. 120,000 tons. Depth of water: 14.0 m. Max. draft: 44.5 ft. (with dredging). Max. length: 250 m. Daylight berthing only.

Products Handled	Capacity t.p.h.	Hoses (in.)
Crude Oil	10,000 disch/2,000 load	4×12
Gas Oil	1,500 load	1×12
Fuel Oil	2,000 load	1×12, 1×10
Naphtha	1,200 load	1×10

Pier B: Max. d.w.t. 27,000 tons. Max. draft: 30 ft. Max. length: 200 m. Berthing at night possible. Depth alongside 9.0 m. Depth in approaches 7.7 m.

Products Handled	Capacity t.p.h.	Hoses (in.)
Crude Oil	4,000 load	2×10
Gas Oil	1,500 load	1×10
Fuel Oil	2,000 load	1×12, 1×8
Gasoline	700 load	2×10
Petrol (Jet)	400 load	1×8
Lub Oil	300 load	1×6
Benzine	350 load	1×8
Toluene	350 load	1×8
Octoxylene	350 load	1×8
Paraxylene	350 load	1×8

Pier C: Max. d.w.t. 5,000 tons. Max. draft 19 ft. Max. length 100 m. Berthing at night possible. Depth alongside 5.7 m.

Products Handled	Capacity t.p.h.	Hoses (in.)
Fuel Oil	2,000 load	2×8
Gas Oil	1,500 load	1×8
Gasoline	700 load	2×8
Petrol (Jet)	400 load	1×8
Lub Oil	300 load	1×6
LPG	200 load	1×6
LPG/B	200 load	1×6

Moorings: Vessels are to be moored with following lines, as a minimum:

Pier	Head Lines		Breast Lines		Springs	
	Fore	Aft	Fore	Aft	Fore	Aft
A	4	4	2	2	2	2
B	3	3	2	2	1	1
C	3	3	–	–	1	1

BRIDGES: Bridge at Leixoes between Docks 1 and 2 opening regularly.

STEVEDORES: Ordered by Agents according to berth and cargo.

MEDICAL: Masters to advise by radio prior to arrival if medical attendance is required on board. Hospital facilities available.

DENSITY: 1026.

FRESH WATER: Available at any quay.

FUEL: Available from Shell, Petrogal, Mobil and B.P.

REPAIRS: All types of deck engine and electrical repairs can be carried out.

DRY DOCKS: None.

OPENING/CLOSING HATCHES: Work always done by crew.

LISBON: 38.42 N. 09.11 W. (See Plan)

LOCATION: Lat. 38° 42' 30" N., Long. 9° 11' 10" W. Capital and principal port of Portugal.

PORT LIMITS: A vessel is considered to be an "arrived vessel" when, after entering the Tagus Estuary, she has left behind the alignment between the Torre of S. Juliao and the Torre of Bugio.

DOCUMENTS:

Health Certificate.
6 Crew Lists.
10 Passenger Lists.
2 Lists of Articles held by the crew: cameras, binoculars, radios, cigarettes, spirits, etc.
2 Stores Lists.
All to be signed by ship's Master.

Certificates for vessels up to 500 tons: – Tonnage Register, Loading and Navigation Certificates.

For vessels over 500 tons: – Tonnage Register; Load Line; Radio; Safety Equipment and Navigation Certificates.

Cargo Documents:

10 Manifests.
3 sets of Bills of Lading.
For cargo in transit: 2 Manifests.

APPROACHES: The Port of Lisbon is situated on the Tagus estuary which is 25 km. long and between 2 km. and 14 km. wide with a highest tidal rise of 4.4 m. At the bar which gives access to the port is a channel with a depth of 13 m. (16 m. at HT).

PILOTAGE: Compulsory. Cascais is the main station for Pilots at Lisbon. There is another station on the Tagus, near Belem Tower. The charge varies according to the tonnage of vessel, from $100.00 in or out for vessels up to 100 tons to $4,000.00 for vessels of 185,000 tons. At night, plus 50%. These charges are obligatory whether Pilots are employed or not (tourist vessels half rate). Exemptions from payment are as follows: Vessels calling solely to land sick crew or passengers, or vessels made to shift by order of the Port Authority, half rates for pilotage in creeks of River Tagus. Reduction of 50% as follows: (1) Tourist vessels; (2) vessels calling solely for supplies of provisions, fuel or water; (3) vessels calling for shelter only. The attendance of Pilots at all movements inside the River Tagus is compulsory.

For this assistance (mooring or unmooring and shifting in the harbour) the charge varies.

MAX. SIZE: See "Berthing".

HEALTH: Ordinary visit made at central area with vessel anchored, from 0800 hrs. to 1900 hrs. Master may ask for Free Pratique to get ship

---

ore the

iver: Between 0800 hrs. and 1800 hrs.

800 hrs. and 1300 hrs. on Saturdays, Sundays and olidays to communicate by telephone or on VHF with the "Estacao de Pilotos de Setubal" at least one hour beforehand, giving the name of the ship, the time and place where the Pilot is required and the service needed.

Only in cases of emergency will requests be accepted outside these hours.

To effect requests for Pilots, the Pilots use the following means of communication:

VHF — Listening permanently on Channel 14 being able to reply on any of the following Channels as requested: 11, 12 and 16.

MF — Listening in permanently on 2182 kHz, replying on 2132 kHz, their working frequency. Once contact has been established ships must change to this frequency. Communications can be made in SSB or AM according to the equipment of the ship.

Telephone No. (065) 522914.

Fax: (065) 526404.

The Pilots embark by motor launch based in Setubal and wait near the fort at Portinho da Arrabida when necessary and the weather permits.

To increase speed and safety on embarking and disembarking, ships of more than 4,000 tons gross, when light, and those of greater capacity in any condition, unless they have a door in the side or other modern means for Pilots to board and leave, and if the weather permits, should lower the gangway to about 3 m. above sea level and fix a rope-ladder so that it stays alongside the lower platform of the gangway.

Bad weather from the South, causing breaking waves at the edge of the shoals, sometimes prevents the pilotage service from operating.

In such conditions, ship must contact the Pilots to discover the state of the bar and limitations imposed on the pilotage service.

ANCHORAGES: Only inside harbour with a Pilot aboard.

RESTRICTIONS: No restrictions on night entry. At low tide vessels only up to 25 ft. draft. Max. draft 31 ft. 6 in., length/breadth no restrictions.

HEALTH: Free Pratique automatically given when ships come from other Portuguese port. Otherwise, Health Certificate is to be handed over to Health Authorities during clearance procedures.

Maritime Health: This station is located next to the Commercial Dock, Avenida de Luisa Todi 80. Apart from normal sanitary visits, observation of sick crew members, etc., the station issues Derat Certificates to vessels of all nationalities. Tel: 2 39 22.

RADIO: Call through Lisbon Radio.

Coastal radio station known as "Setubal-Pesca", with call sign CUX 9. Listens out permanently on 2182 kHz and replies on 1848 kHz. On receipt of the reply, vessels must change to 2284 kHz.

The station transmits weather bulletins and Notices to Mariners at 1105 hrs. and 1405 hrs., and makes general calls at 0205, 0505, 0805, 1105, 1405, 1705, 2005, and 2305 hrs.

TUGS: 12 available.

BERTHING: All installations are along the right (North) bank of the Rio Sado Estuary.

Fontainhas Terminal: Length 530 m. Depth 9.5 m. – 10.5 m. Used for general cargo. 12 electric cranes, 3 tons – 25 tons capacity.

Ro-Ro Terminal: Length 215 m. Depth 10.5 m. 2 berths with one side ramp and one stern ramp.

Container Terminal: Length 165 m. Depth 10.5 m. 1 gantry crane (20 ft. – 40 ft.); maximum capacity 65 tons at 30 m.

All the terminals are connected to the international highway and railway network. Water and electric power points available.

Equipment: 3 mobile cranes, capacity 2 tons – 45 tons, 1 reach stacker (1×22 tons for 20 ft. containers). Private equipment also available including 1×50 ton Coles mobile crane, 23 forklift trucks and 9 loading shovels.

Private Facilities:

Secil – Companhia Geral de Cal e Cimento: Length 104 m. Depth 11 m. Products handled: cement, clinker, coal and sand.

Ford/VW: Ro-Ro Terminal used for exportation of the automobile production from the Ford/VW factory near Setubal. Length 365 m., depth 10.5 m.

Propam – Consorcio Portugues de Panificacao, S.A.R.L.: Depth 6 m. Pontoon quay.

Pirites Alentejanas, S.A.R.L.: Length 125 m. Depth 9 m. Products handled: Pyrites.

Sapec – Societe Anonyme de Produits et Engrais Chimiques du Portugal: Pontoon – Length 80 m. Depth 5.5 m. Quay – Length 100 m. depth 9.0 m. Products handled: Pyrites, clay, phosphates.

Mague – Construcoes Metalomecanicas: Length 91 m. Depth 9 m. Products handled: Cranes, rolling bridges, alternators. Quay can take loads of 10-20 tons/sq.m.

Solisnor: Construction and repair of vessels. Depth 8.0 m. – 10.0 m.

Lisado: Pontoon quay. Gas freeing and tank cleaning.

Eurominas – Electro-Metalurgia, S.A.R.L.: Length 130 m. Depth 11.5 m. Products handled: Ferro-manganese and silicon manganese.

STEVEDORES: Ordered by the Agent some time in advance.

MEDICAL: Prior to arrival and in order not to delay ship's clearance, Master should inform by radio if medical assistance required, this only in case of contagious or epidemic diseases.

TANKERS: Shell Maritime installation with private pier. Discharge lines 4 in., 6 in. and 8 in.

Port Authority equipment for local oil spill response (skimmers, booms, transfer pumps, sorbents, storage tanks, etc.) available.

DENSITY: About 1026.

FRESH WATER: Supplied from shore to all piers.

FUEL: Supply available on request.

FIRE PRECAUTIONS: Repairs such as cutting, welding and other types of hot work shall be limited, as far as practical, at marine terminals and piers.

t works are not permitted:
(a) During gas freeing operations.
(b) Within 30.5 m. (100 ft.) of bunkering a
involving hazardous materials.
Smoking only allowed in designated areas a

AYS: The Terminal works all days except Christmas Day and ear's Day.

AGE DISPOSAL: Service available free of charge. Ships should st the service through local agent as soon as possible or on arrival Terminal Representative.

TE OIL DISPOSAL: Service available at oil and petrochemical als – Piers No. 2 – 7, 9 and 10. Ships should request the service gh the local agent as soon as possible or on arrival to the Terminal esentative.

MAN'S CLUBS: Clube Stella Maris de Sines, Av. Domingos Pablo. 633941. Casa do Marinheiro, Lg. Gago Coutinho 56. Tel: 633965.

RENCY: Portuguese Escudo (PTE). U.S.$ 1.00 = 156.806 PTE 96).

RE LEAVE: Possible. Shore passes issued by Customs.

AYS: In Winter, vessels may suffer delays due to bad weather.

ETY: The following are some of the safety rules.

ding and Discharging Operations:

oading and discharging operations can be commenced only after the ster or his Deputy fills out and signs the Safety Check List.

. The loading or discharging of static accumulator products such as: as oil, Kerosene, Jet fuel, Naphtha, Gasoline, etc., should commence ccordance with the following scheme (a cargo plan of the ship should produced to the Safety Inspector who, together with the Operations am Supervisor, will analyse it).

Any loading or discharging shall begin at a slow flow rate (not higher n 1 m./sec.):

(a) In case of loading, and until the ship's lines are full, free from air d water, and the product height in the tank bottom is sufficient etween 0.6 m. and 1 m.) to prevent both air dispersed product particles d liquid surface turbulence.

(b) In case of discharging, until the ship lines and loading arms are ll and Refinery confirms that the product is rising in the tank.

Only after beginning in accordance with (a) or (b) above, may the oading or discharging speeds be increased up to 5 m./sec. or to the aximum the ship and Terminal can support, in the event that ship/ erminal cannot reach that limit.

2. *Non static accumulator products* (crudes, fuel oil) loading or ischarging should commence at a slow rate until:

(a) In case of discharging, the Refinery confirms that the product is filling the tank.

(b) In case of loading, the Chief Officer confirms that product is entering the tank or tanks in accordance with the cargo plan.

As soon as the above conditions are sustained the flow rate can be raised to the required rate.

3. *Loading or Discharging Operations Completion – Pressure Surges:* The line length between Terminal and Refinery is about 8 km.

The following precautions should be taken while pumping in or off cargoes at high flow rates:

(a) The cargo pump rate should be slowly reduced when finishing or whenever there is a stoppage.

(b) Flow rates should change slowly by controlling the cargo pumps r.p.m.

(c) If the flow rate reductions of loading/discharging operations interruptions are controlled by valves they should be slowly reduced or closed.

Usually motor-valves have an acceptable closing speed which does not cause pressure surges when flow rate reductions of loading/discharging interruptions take place.

Simultaneous loading and deballasting operations are permitted if a previous agreement has been settled between Master and the cargo loader or receiver, with terminal agreement.

Ballast: Ballast in the cargo tanks cannot be pumped out into Sines Harbour waters.

On arrival Masters must declare the ballast loaded in the cargo tanks.

Ballast will be pumped out into inland ballast tanks or will remain on board. Port Authority Safety Inspector may request the ballast tank measurements together with the ballast valves sealing.

The permanent ballast can be pumped out to the sea. Before pumping the permanent ballast into the sea, the Master must be sure it is not contaminated. Terminal Safety Inspector may require a sample of the ballast which will be sealed in the presence of the Master or his Deputy.

Crude Oil Washing – Inert Gas: Sines Port Authority gives permission for crude oil washing (C.O.W.) during discharging. Permission to be requested through Agent 48 hours in advance.

However, this operation can only be permitted if the ship has an inert gas system in good working condition.

The tank atmosphere will be considered inert when the percentage of oxygen in it is not higher than 8%. Nevertheless, during operations, the oxygen percentage in the tanks cannot be higher than 6%.

If by any means the oxygen percentage increases to over 8% or its evaluation is doubtful, the washing procedures should cease at once.

The washing operations also cease if there are leakages or traces of leakages in the deck lines.

If the condition of the pipes is not satisfactory under a visual inspection the washing is not permitted.

Transhipment: This type of operation in the Sines Harbour is subject to the permission of the Maritime Authority and A.P.S. (Port Administration) who will set up the conditions by which the transhipment should be performed.

When this operation is a ship-to-ship transfer the correct functioning of the inert gas system is compulsory.

During approaching and mooring manoeuvres, ballast, deballasting, internal cargo transfers, bunkering, etc., are not permitted.

If there will be a gas concentration over the ships or the wind velocity is lower than 4 knots, the transhipment will cease.

Also there will be a stopping of the transhipment and separation of the ships if the weather conditions become unfavourable for that type of operation.

All the applicable safety rules should be strictly followed during the transhipment.

Gas Freeing and Cleaning of Ship's Cargo Tanks: Under previous permission of A.P.S. and the Maritime Authority, gas freeing and cleaning can be performed by a ship at anchor.

With bad weather threatening or wind velocity lower than 4 knots these operations should cease.

Cleaning of tanks alongside is possible for ships equipped with inert gas system and fixed washing systems.

Entry of persons inside cargo tanks for cleaning or drying operations not permitted whilst vessel alongside.

LPG tankers can inert tanks on Piers No. 9 or 10. The owner should contact Neste Chemicals, S.A., to agree to the operation.

Bad Weather: When there is bad weather threatening, all operations must cease, the tank lids must be closed and secured and the loading arms disconnected. In the case of bad weather, when it is likely the ship will exceed the safety limits of the loading arms, all operations should be brought to a stop.

Masters are requested to strictly follow the Operations Team Supervisor and/or the Terminal Safety Representative instructions.

Even with surplus mooring lines, there will still be a threat to the ship and/or the Port, and vessel must prepare to unberth.

In the case of a thunderstorm threatening from windward about 5 km. away the operations should cease and tank lids be closed.

Undertow: The Port of Sines, as with any other open port, is subject to the undertow effects. The phenomenon is due to waves which may have their source either in the North or South hemispheres.

At Sines the undertow effects show up between November and March. During that period the Masters must be more concerned about their ship's mooring. If necessary and taking into account the weather forecast for the laytime, Masters will be supplied with special safety instructions.

Foodstuff, Lubricants or Spares: Foodstuff, lubricants or spares can be shipped aft if permission is granted by A.P.S. and the Maritime Authority, after ascertaining that there are no operations on board, that involve tank lids opening or zones with gas concentrations (next to the pump house, blowers, etc.).

With ship alongside, shipping of foodstuff and spares can be done over the quay when the packages can easily be carried by hand.

Metallic objects or steel banded packages should be handled with care to avoid direct contact with the steel deck plate.

A ship with an inert gas system can receive heavy packages for shipping at the stern while loading, discharging or ballasting. If there is no inert system in the ship, packages to be loaded must be held until after loading.

Shipping of foodstuff, spares, etc., whether the ship is alongside or anchored can only be made with permission of A.P.S. and the Maritime Authority.

Watchmen and Crew: Master must maintain permanently on duty, sufficient number of qualified members of the crew to ensure the execution of manoeuvres, operations, to face an emergency and stand guard at the gangway.

Visitors: Persons who are not crew such as family, visitors, technicians, etc., must carry a special permit issued by the ship's Agents.

Permits issued by the Port Safety Authority are to be used for circulation in the Terminal premises only.

Visitors on board are the Master's responsibility.

During loading, discharging or ballasting operations visitors are not allowed to stay on the forecastle or amidship, especially women and children.

Crew Identification and Circulation in the Terminal: Crew are requested to keep with them their IDs (especially the yellow pass given by Customs) which must be shown on request to any Terminal Officials.

Crew and visitors are not permitted to walk around the Terminal Zone and when in it Safety Rules in force should be strictly followed.

Mooring Lay Time: The ship is not permitted alongside more than 2 hours after operations are completed.

GENERAL: The anchorages are provisional. No difficulties arise in Summer. In Winter, the decision to anchor is at the option of the Master. It is recommended that in the event of bad weather, anchorage be suspended and that vessels should heave to off the coast.

SHIPMASTER'S REPORT: October 1987 (Updated 1996).
Chart: BA. Chart No. 3276
Documents:
6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
6 copies Cargo Manifest.

Bond not sealed. Shore passes are issued by Customs/Immigration and have to be returned before departure.

Approaches: The approaches are visually identified and on the radar.

Anchorage: Small vessels anchor under the direction of Port Control in approximate position Lat. 37° 56.5' N., Long. 08° 52.2' W. between the Petro Chemical Terminal and the new Coal Harbour breakwater. The anchorage is relatively sheltered.

In fine weather the Pilot boards off the Molhe Oeste Buoy and in bad weather inside the main breakwater. The Pilot boards from a pilot boat and is available throughout 24 hours for berthing and unberthing. Pilot may be contacted on VHF Channels 16 and 12.

The Pilot reports that berthing is undertaken in most weather conditions.

Tugs: 5 × 2,400 h.p. stationed at the port. A minimum of 1 tug is required for all vessels and it is too large and too powerful for handling small vessels.

Berthing: Vessel berthed at the Petro Chemical Terminal (B.A. Chart No. 3276).

The depth at both berths was approximately 12.0 m. but the pilot reports maximum draft normally allowed is 10.0 m.

For ethylene loading and discharging, Berth No. 10 on the East side is used. Vessel berths head out, starboard side to.

For propylene and "C4" discharge, Berth No. 9 on the West side is used. Vessel berths head out, port side to.

It is possible to berth head in if this is required for manifold connections. The concrete quay is very high and has large fenders.

There is a swell running in the harbour even when conditions are calm in Winter time.

Tidal range is approximately 2.5 m.

Berthing and unberthing undertaken throughout 24 hours. Moorings consisted of 2 head/stern lines, 2 breast lines and 2 springs at each end. These were secured on to hooks.

2 mooring boats are provided. Shore gangway provided.

Cargo: Berth No. 10: Vessel loaded ethylene. The liquid and vapour arms are 8 in. 150 ASA.

We loaded at a rate of approximately 100 tonnes per hour with two plants. Manifold temperature −99°C.

The charterers were concerned at the temperature due to discharge port temperature requirements and only 20 hours steaming. Just before completion of loading the shore agreed to connect the vapour arm and we loaded an extra 20 tonnes to take account for a vapour return. Two plants are required and shore compressor drew from manifold.

It took 8 hours to return 20 tonnes and reduce temperature from −99°C to −101.9°C.

Bill of Lading figures are calculated using the weight of Air not Vacuum. Shore personnel connect and disconnect arms.

Berth No. 9: Vessels discharge propylene (Refrigerated storage). Shore requested maximum of 3 pumps which gave discharge rate of 150 tonnes per hour.

The Terminal like the product very cold. Ours being at −48°C created no difficulties. However some ships arrive with the product at around −40°C and this can cause difficulties.

The liquid arm is 8 in. No vapour return line. It was not used due to product contamination.

It was requested that we berthed starboard side to in order to connect to our extended starboard manifold but this was not satisfactory as the Chicksan arm was too close to the catwalk, so we had to shift around and berth port side to.

Shore tank pressure maximum 90 mbs.

Shore nitrogen is used to purge the Chicksan arm upon completion. They do not allow a vessel to "hot gas" purge ashore.

Bureau Veritas Cargo Surveyor attended.

Fresh Water: Fresh water is available from the quay at a good rate and is metered. The waterman supplies shore hoses.

Stores: It was difficult to store at both berths as the lorry can only proceed to the car park which is about 100 m. from the ship. From there a hand truck is to be used and there is no shore crane.

General: Personnel are not allowed to walk through the Terminal. The use of transport is compulsory and this is arranged through the agent.

The new Coal Harbour to the East of the oil port is very conspicuous.

The breakwater is completed and has navigational lights: Fl. G. 6 sec. on the N.W. head; Fl. Y. 6 sec. on the S.E. head, and Fl R. 4.5 sec. on fishing harbour breakwater. Breakwater leisure harbour – Fl. G. 4 sec.

Berth construction is finished and operations start in 1992.

AUTHORITY: Administracao do Porto de Sines – A.P.S., Apartado 16, 7521 Sines Codex. *Tel:* (069) 860600, 860605 (24 hours). *Telex:* 12027 Sinmar P. *FAX:* (069) 860690, 862114 (24 hours). *Contact:* Eugenio Fialho Borralho, President of Administration. VIANA DO CASTELO: 41.41 N. 08.50 W. (See Plan)

DOCUMENTS:
- Health Declaration.
- 3 Crew Lists.
- Provision List (ship's and individual).
- Tobacco Declaration and Entrance Forms supplied by Agents on arrival.
- 2 Manifests and 1 copy of each Bill of Lading concerning cargo to be discharged.
- 1 Transit Manifest if cargo in transit exists.

PILOTAGE: Pilotage compulsory. ETA should be given to Agent with ample notice. Signals; during the day Flag "G" of International Code, and at night 3 long blasts. Boats black with white cabins. Pilots to be taken on board in outer or inner harbour respectively with good or bad weather.
ANCHORAGES: Outer or inner harbour according to weather conditions.
RESTRICTIONS: Entering and sailing only during daylight unless exceptionally good weather. Depth in entrance 6.5 m.
MAX. SIZE: Max. draft 26 ft. on HWST.
HEALTH: Free Pratique authorised for vessels coming from other Portuguese ports. For vessels coming from other countries Health Declaration must be filled in and delivered to the Agents.
RADIO: Call Viana do Castelo Pilots frequency 2182 kHz and listen on 2132 kHz.
TUGS: 3 tugs of 1,160 h.p., 400 h.p. and 1,400 h.p.
BERTHING: Over 1,500 m. of Commercial Quays with 500 m. of Commercial Quays with depth of 9.0 m.
Ro/Ro Terminal: Max. LOA 160 m. Max. draft 7.6 m. Length of quay 233 m. Terminal equipped with 3×40 ton capacity Tugmasters, 1×56 ton at 12 m. mobile crane, 1×42 ton forklift and small forklifts of 2 tons – 7 tons capacity.
BRIDGES: 1 bridge which allows entrance/sailing at any time.
CRANES: 1×5.5 tons, 2×12.5 tons, 2×18 tons, 6×12 tons, 1 × 40 tons and 1×56 tons.
STEVEDORES: Ordered by Agents 8 hours in advance.
MEDICAL: No prior advice is necessary.
FRESH WATER: Supplied by shore installations.
FUEL: Only small quantities of gas oil can be supplied.
CONSULS: France 22412. Spain 23018.
REPAIRS: All types of deck, engine and electrical repairs can be carried out.
DRY DOCKS: Three dry docks available.

	Length	*Breadth*	*Draft*
Dock 1	203 m.	34.0 m.	18 ft.
Dock 2	127 m.	18.5 m.	18 ft.
Dock Eng. D. Pacheco	104 m.	11.0 m.	16 ft.
Fitting Dock	190 m.	65.0 m.	21 ft.

No special equipment for tank washing is available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Work usually done by crew.
CUSTOMS ALLOWANCES: No limit, but must be declared.
REPATRIATION: No difficulties for crew repatriation.
AIRPORT: Nearest is Oporto Airport, 55 km.
TIME: From end September to end March – GMT. From end March to end September – GMT plus 1 hour.
HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; Corpus Christi; 10th June; 15th August; 5th October; 1st November; 1st, 8th, 24th and 25th December.
POLICE/AMBULANCE/FIRE: Tel. 115.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Required.
DEVELOPMENTS:
1. Roadworks.
2. Marina.

AUTHORITY: Junta Autonoma dos Portos do Norte, Rua do Marques No. 65, 4900 Viana do Castelo, Portugal. *Tel:* 058-829096/7/8/9. *Telex:* 32609 Porvia P. *FAX:* 058-829106. *Contact:* Jose Monteiro de Morais, Managing Director. Captain Z. Cavaco, Harbour Master. (*Tel:* 058-22168).

VILA REAL DE SANTO ANTONIO: 37.10 N. 07.26 W.

DOCUMENTS:
- 2 Health Certificates.
- 3 Crew Lists.
- 1 List of Passengers in Transit.
- 2 Lists of Passengers Disembarking.
- 2 Dangerous Cargo Lists.
- 1 Ship's Register.
- 1 Tonnage Certificate.

PILOTAGE: Black boat, wooden hull, white "P" at bow. Stationed near buoy No. 1 (harbour entrance). All sea-going vessels entering or leaving harbour are obliged to avail themselves of the services of a Pilot. Latest 24 hours before arrival cable "Corporacao dos Pilotos de Vila Real de Santo Antonio" or to Agent. Departing vessels should apply for their Pilots at least 6 hours before the time of departure.
MAX. SIZE: Entrance channel 4,000 m. long, has a depth of 4 m. (12 ft.) at LW. Vessels drawing up to 5.5 m. (16 ft.) can enter under normal circumstances 1 hour before HW, a keel clearance about 1 ft. will be maintained.
TUGS: Tugs up to 105 h.p. available.
BERTHING: 1 pier 300 m. long. Depth at pier 20 ft.
STEVEDORES: Ordered by Agents. ETA to stevedores is necessary. No work allowed on Sundays.
MEDICAL: Inoculations in hospital Marques Pombal - Vila Real de Santo Antonio.
FRESH WATER: Obtainable alongside quay.
FUEL: Gas oil can be supplied in small quantities.
CONSULS:
Finland, Avenida da Republica, 133
France, Avenida da Republica, 114
Greece, Avenida da Republica, 109
Italy, Avenida da Republica, 11
Netherlands, Avenida da Republica, 73
United Kingdom, Rua Dr. Oliveira Salazar, 4

REPAIRS: There is 1 small ship repair yard at Vila Real de Santo Antonio.
GANGWAY/DECK WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CUSTOMS ALLOWANCES: About 200 cigarettes and 1 bottle of spirits per man.
HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.
POLICE/AMBULANCE/FIRE: Police 66; Ambulance 202; Fire 202.
AUTHORITY: Junta Autonoma dos Portos de Sotavento do Algarve, Rua Conselheiro Bivar 68, 8000 Faro. *Tel:* (089) 22025, 22049. *Telex:* 56117 Japsa P. *Contact:* Eng. Jose Domingos Mendonca de Sousa, Director.

NOTES

Please also advise Shipping Guides Ltd.

Puerto Rico

AGUADILLA: 18.26 N. 67.10 W.

DOCUMENTS: See "San Juan".
PILOTAGE: Mayaguez's Pilots provide service in Aguadilla. At least 24 hours advance notice required.
RESTRICTIONS: Open port, very deep, safe in good weather. Cold fronts from North cause very heavy swells. Vessels cannot berth during this kind of weather.
MAX. SIZE: 600 ft. long, 36 ft. draft.
HEALTH: Free Pratique granted on arrival.
BERTHING: *Harbour:* 1 mile North of the town is a conveyor pier with 1 dolphin berth at its head. Least depth alongside 12.2 m. (40 ft.). Length of mooring lines not less than 180 m. (600 ft.). Vessels tie up to 4 mooring buoys, with spring lines to 2 bollards at the loading tower. 10 in. connection to molasses line. 1 off-shore tanker berth with 9 m. (30 ft.) depth consists of mooring buoys and pile clusters, connecting platform and pipelines for discharging aviation gas for Borinquen Airport.
MEDICAL: 24 hours' notice preferred; local hospital available.
TANKERS: See "Berthing".
FRESH WATER: Available. 2 in. pipeline with meter.
CONSULS: No local representation.
GANGWAY/DECK WATCHMEN: Usually crew members are used.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: U.S. Customs Regulations. For Customs service Aguadilla is under the jurisdiction of the Mayaguez Custom House.
REPATRIATION: Can be arranged.
AIRPORT: 20 minutes' drive. Regular airlines.
TIME: Atlantic Standard Time, 4 hours less than GMT. No alterations during year.
HOLIDAYS: Refer to "San Juan".
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required to go ashore.
DELAYS: No delays unless another ship is already berthed.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Mayaguez. Tel: 832-3375.

GUANICA: 17.57 N. 66.54 W.

DOCUMENTS: See "San Juan".
GENERAL INFORMATION: Refer to "Ponce".
PILOTAGE: Port operations are under the control of the Captain of the Port. Pilot services are available day and night, by previous arrangement with Mayaguez Pilots.
ANCHORAGES: Harbour is located 8 miles Westward of Guayanilla Bay. Though small, it is one of the best hurricane harbours in Puerto Rico.
TUGS: Available from Guayanilla.
BERTHING: Bulk sugar, bulk fertiliser and bulk grain handling facilities. Length 700 ft.; depth alongside 28 ft. During recent years, operations at the port have been practically nil.
MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
FRESH WATER: Available in limited quantities for emergencies only.
FUEL: Available by trucks from Ponce.
CONSULS: None available locally, nearest at Ponce.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Guanica. Tel: 821-2860.

GUAYANILLA (incl. Tallaboa Bay): 18.00 N. 66.46 W.

(See Plan)

DOCUMENTS: See "San Juan".
PILOTAGE: Port operations are under the control of the Captain of the Port and Pilot services are available day and night. Pilots stand-by on VHF Channel 16 and operate on Channel 14. Arrangements should be made with at least 4 hours advance notice.
ANCHORAGES: Guayanilla is the largest hurricane harbour and one of the best in Puerto Rico. It has protected anchorage for 5 vessels. Maximum draft permissible is 42 ft. It is protected at its entrance by extensive reefs which extend a mile or more offshore. The entrance channel between these reefs is about 1.5 miles long and about 0.4 miles wide.
HEALTH: Pratique is not necessary. In case of continuous high fever or contagious disease, Agents must be notified prior to vessel's arrival. Agents will immediately contact Public Health for proper action.
RADIO: Chatham Radio (WCC) – Chatham, Massachussetts. Equipped with RCA automatic land line circuit direct to New York, N.Y., San Francisco, California and Washington, D.C.
TUGS: Available 24 hours daily from South Puerto Rico Towing Co., Tel: 809-835-2795, as requested by vessel.
BERTHING: The Union Carbide Company has berthing facilities for barge operations and LPG.

New port facilities for Pittsburgh Plate Glass are owned by the Puerto Rico Ports Authority. 2 berths at jetty, each 240 m. length. Depth alongside 35 ft.

Berths were recently dredged and actual restrictions are as follows:

**Refinery Dock – Guayanilla:*

DWT	80,000 tons	
LOA	830 ft.	
BCM	400 ft.	(Critical)
Draft	42 ft.	(South Face, Berth No. 5)
	42 ft.	(North Face, Berth No. 4).

**Petrochemical Dock – Guayanilla:*

DWT	50,000 tons	
BCM	449 ft.	
Draft	36 ft. 06 in.	(South Face, Berth No. 3)
	30 ft.	(North Face, Berths 1 & 2) Ships only
	28 ft.	(North Face, Berths 1 & 2) Barges only

*Commonwealth Oil Refining Co. Ltd. facilities.
Texaco: There is a private pier owned and operated by Texaco for the receipt of clean petroleum products. Berth 650 ft. long and 24 ft. deep being dredged to 36 ft. Diesel bunker available.
Punta Gotay Pier: 1 berth at dolphins with depth 38 ft.
Punta Pepillo Pier: 1 berth at dolphins with depths 12 ft. – 28 ft.
Tallaboa Bay: 1 dolphin berth with depth 20 ft. and 1 jetty with depth 38 ft.

Also see "LPG".
LPG: Dolphin berth at Cayo Rio in Tallaboa Bay in Lat. 17° 59' N., Long. 66° 44.5' W.
Report: February 1984.
Max. Size: Vessel's dimensions not to exceed: length overall 965 ft. Max. draft 41 ft. Max. beam no restriction.
Manifold Position: The manifold must be positioned within 50 ft. fore or aft of the midpoint of the vessel's overall length.
Dock: The dock has been designed to accept the breasting load from a ship (or ships if vessel to vessel discharging is arranged) of up to 109,000 long tons total loaded displacement.
Depths: Depth of the docking area and approaches has been increased by dredging to over 44 ft. Due to swell and tidal actions, the maximum allowable vessel draft has been set at 41 ft. This draft has been approved by the U.S. Coast Guard and nautical charts affected are being updated accordingly.
Mooring Basin: The docking area is 450 ft. wide and is designed to handle a 125,000 cu.m. (145 ft. beam) vessel and a 75,000 cu.m. (120 ft. beam) vessel moored side by side.
Hose handling: Although connecting hoses and supplying the equipment necessary for doing so is the vessel's responsibility, receivers can, at their discretion, make such connections provided that the carrier's manifold elevation above water plus its manifold distance inboard plus its manifold distance from the midpoint of the carrier's overall length is 60 ft. or less. If it is more than 60 ft. the carrier would have to provide hose handling assistance including a crane to lift the end of the loading hose to the deck.
Carrier/loading platform access: An accommodation ladder will be provided for those carriers that have a deck height of 25 ft. or less above the water and are accessible from loading platform. Carriers that cannot meet the above must provide their own accommodation ladder. Transportation from their accommodation ladder will be provided.
Sanitary waste removal: Dumping of sanitary wastes into Tallaboa Bay is not permitted. Therefore, for those carriers that stay in port for 20 days or more, removal of sanitary wastes by barge will be provided. The carrier must provide the means (to be approved by Union Carbide Company) of transferring the wastes from the carrier to the barge.
Potable water: Potable water is not available at berth, but fresh water is. A fresh water connection is available on the loading platform. The carrier must provide his own hose for hook up. Should the carrier wish to purchase such water a release must be executed.
Bunkers: Bunkers are not available.
Night navigation: No U.S. Coast Guard regulation prohibits the berthing or unberthing of LPG carriers at night unless the incoming/departing vessel is being moored alongside another (storage) vessel.
MEDICAL: Medical service is available; hospitalisation at Ponce, which is only 15 minutes distant.
FRESH WATER: Available whenever requested by the vessel. Water delivery very slow (3 to 5 tons per hour).
FUEL: Available only whenever arranged by Owners of the vessel and/or charterers prior to arrival.
Fuel Dock: Length 680 ft. with deep water alongside. Mooring dolphins and moorings buoys installed to assist with clearing the dock.
CONSULS: None available locally; nearest at Ponce.
REPAIRS: Various marine contractors available in Ponce upon request. Minor repairs available in Guayanilla and Ponce. No drydock facilities in the area. For drydock facilities and other major repairs refer to "San Juan".
Radar: For radar technician contact local Agent prior to vessel's arrival. Various technicians available in San Juan.
REPATRIATION: Arranged by ship's Agents.
AIRPORT: International Airport in outskirts of San Juan served by regular airlines. Small airport in Ponce connects with San Juan.
CUSTOMS: For Customs service, Guayanilla is under the jurisdiction of the Ponce Custom House.
SHORE LEAVE: Foreign crew members are allowed to go ashore through U.S. Immigration.
IDENTIFICATION CARDS: Shore passes are sufficient for shore leave.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Guayanilla. Tel: 835-2647.

JOBOS (Aguirre): 17.56 N. 66.13 W.

DOCUMENTS: See "San Juan".
GENERAL INFORMATION: Refer to "Ponce".
PILOTAGE: The Port of Jobos is served by the Pilots of Ponce. Services must be arranged in advance.
ANCHORAGES: A fine land-locked harbour, located on the South coast, approx. 42 nautical miles Eastward of Ponce and 20 miles West of Point Tuna. Anchorage inside the bay is Southward of the pier in depths of 19 ft. – 24 ft., soft mud bottom.
RESTRICTIONS: The principal entrance is from Westward between Morrillo Cay and Ratones Cay.
TUGS: No tugs available.
BERTHING: To the West of the sugar pier (not in use and not buoyed) is an open concrete barge dock 632 ft. in length with a buoyed access channel for the receipt of fuel oils for the Water Resources Authority.
MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
TANKERS: See "Las Mareas".
FUEL: No bunkers are available.
CONSULS: None available locally; nearest available at Ponce.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".

Captain of the Port, Jobos. Tel: 821-2860.

LAS MAREAS: (Guayama) 17.55 N. 66.10 W. **(See Plan)**

The Puerto de Las Mareas Terminal is located on the South side of the island of Puerto Rico. It is located approximately 26 nautical miles East of the port of Ponce. The nearest city is Guayama.

All vessels calling at Phillips Puerto Rico Core Inc., Puerto de Las Mareas Terminal should be consigned to Phillips Puerto Rico Core Inc., and all official documents for such ships should show them so consigned. In conformance with port regulations, no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the Port.

DOCUMENTS: The following documents are required by the Customs and Immigration authorities for entry and clearance:

Master's Oath (original and 1 copy) Entry and Clearance.
General Declaration (original and 1 copy) Entry and Clearance.
Stores List (original and 2 copies) Entry.
Crew Purchases List (Curio List) (original and 2 copies).
Cargo Declaration (original and 1 copy).
Crew List (1 copy certified and 2 copies not certified).
Clearance from Last Port (if arriving on an international voyage).
Crewmen Landing Permits (for each crew member without the Plastic Form 1-14).
Passenger List (if any passengers).
All permanent documents of the vessel.
Also see "Customs" and "Firearms".

Passenger Lists: The Passenger List must show full names, sex, age, nationality, and occupation of passengers landing at Puerto de Las Mareas. The ultimate destination of in-transit passengers must also be shown in the Passenger List.

Outward Clearance: In most cases, outward clearance and cargo documents will be delivered on board by the ship's Agent, making it unnecessary for Masters to obtain such clearance in person from the U.S. Customs Office (Ponce).

APPROACHES: The harbour is entered through a channel 250 ft. in width at its narrowest portion, bearing 025.6° (T). It is protected on the Eastern side by a rubble mound breakwater extending approximately 700 ft. from the shore line. The dredged channel extends out to the 40 ft. depth contour and has a width at this contour of approximately 900 ft., narrowing to 250 ft. approximately 2,100 ft. inshore from the 40 ft. contour. The 250 ft. wide portion of the channel is approximately 1,000 ft. long. At the inshore end of the 250 ft. wide channel, the harbour itself extends for a length of 2,300 ft. and a maximum width of 1,100 ft. The harbour has a depth of 38 ft. below MLW but the maximum draft allowable for inbound and outbound vessels is 37 ft. The above dimensions are given to the bottom of the channel; the sides of the channel and the harbour are sloped at 1 in 3.

PILOTAGE: The use of Pilots is compulsory for all vessels. Vessel's Agent will arrange for Pilot, upon receipt of the arrival notice. Pilot will board inbound vessels off the entrance to the harbour about 1 mile offshore.

When approaching the dock and channel, vessels must have one anchor, to be designated by the Pilot, free of the hawse pipe and ready for quick release if necessary to stop the vessel.

Note: Every vessel arriving or departing must provide, properly secured, a pilot ladder which conforms to the standards of construction normally accepted by international safety standards.

Also see "Pilot's Report".

NAVIGATIONAL AIDS:

A. Lighted Buoy LM: This sea buoy is located 300 ft. West of the centre line of the channel, 2 miles offshore from the end of the rubble mound breakwater. It displays a white light through 360° flashing Morse code letter "A". (0.5 seconds on, 0.5 seconds off, 2.0 seconds on, 0.5 seconds off). The buoy is painted with black and white vertical stripes and is fitted with a radar reflector. Water depth is 70 ft.

B. Channel Marker Buoys:

(1) Buoy 1: This buoy has 360° green light flashing 0.6 seconds on and 3.4 seconds off. It is painted black and has a green retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.

(2) Buoy 2: This buoy has 360° red light flashing 0.5 seconds on and 2.0 seconds off. It is painted red and has red/orange retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.

C. Channel Marker Navigation Lights: There are 4 channel marker navigation lights, 3 are located on piling, and 1 on the end of the rubble mound breakwater.

(1) Channel Marker Number 3: This marker is located on a single pile 400 ft. West from the centre line of the channel, 2,024 ft. inshore from the channel marker buoy No. 1. The light is located 25 ft. above MLW, and is displayed through 360°. It is a green light, flashing 0.6 seconds on and 3.4 seconds off. The marker is fitted with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 3.

(2) Channel Marker Number 4: This marker is located on a tower at the end of the rubble mound breakwater, 50 ft. above MLW. The light is displayed through 360°, red, flashing 0.5 seconds on and 2.0 seconds off. The marker has 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark green reflective border, numeral 4.

(3) Channel Marker Number 5: This marker is located 175 ft. West from the centre line of the channel, 1,000 ft. inshore from the end of the rubble mound breakwater. It is on a single pile 25 ft. above MLW and displays a green light through 360° flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 5.

(4) Channel Marker Number 6: This marker is located 175 ft. East from the centre line of the channel, 1,295 ft. inshore from the end of the rubble mound breakwater on a single pile 25 ft. above MLW. It displays a 360° red light, flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark reflective border, numeral 6.

D. Obstruction Light: This light is mounted on the protective dolphin at 10 ft. above MLW and displays 3 fixed red lights through 360°.

E. Range Lights: LLNR 1380.55 front range light is mounted on a tower located on the centre line of the channel 3,500 ft. inshore from the end of the rubble mound breakwater. It consists of a quick flash white light 86 ft. above MLW and visible on range line only. The tower is fitted with a 6 ft.×12 ft. KRW dayboard, covered with red/orange reflective coating with an 18 in. white stripe down the centre.

LLNR 1380.56 rear range light is mounted 104 ft. above ground on a tower located on the centre line of the channel 5,500 ft. inshore from the end of the rubble mound breakwater. It consists of an equal interval, white, 3.0 seconds on and 3.0 seconds off. The tower is fitted with a 6 ft.×12 ft. KRW dayboard covered with red/orange reflective coating with an 18 in. white stripe down the centre.

RESTRICTIONS: The entrance channel has a depth below MLW of 40 ft. and the harbour itself has a depth of 38 ft. Hence vessels using the port are limited to a maximum draft of 37 ft.

Vessels are required to have a minimum draft of 14 ft. forward and 24 ft. aft when entering or leaving the port.

MAX. SIZE: 55,000 d.w.t., LOA 221 m. (725 ft.). Beam 32.3 m. (106 ft.) and draft 11.28 m. (37 ft.).

HEALTH: Free Pratique is not required for vessels arriving at Puerto de Las Mareas, except when cases of communicable disease are on board. In such cases, U.S. Public Health Service doctors are available, and should be requested through the Agent 48 hours prior to arrival.

RADIO: Agents of vessels or Owners or its representatives should advise Phillips Puerto Rico Core Inc. by telex, cable or telephone, 72 hours, 48 hours, and again 24 hours before their expected arrival at the sea buoy.

ITT Telex No. 3451056 "Philcorgya".
Telephone (809) 864-1515.

Incoming vessels should advise the Agent by radio 48 hours and again 24 hours before their expected arrival at the sea buoy.

Coast stations available for such advice are:

Lantana Radio (WOE) - Lake Worth, Florida. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0005, 0205, 0405, 0605, 0805, 1005, 1205, 1505, 1605, 1805, 2005 and 2205. Transmits weather bulletins at (GMT) 0105 and 1600.

New York Radio (WNY) - New York City. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco, Washington, D.C.)

Transmits Traffic Lists at (GMT) 0010, 0210, 0410, 0610, 0810, 1010, 1210, 1410, 1610, 1810, 2010 and 2210. Transmits weather bulletins at (GMT) 1000, 1400, 1600 and 2200.

Also equipped with teletypewriter (TWX) for direct communication with steamship companies in the United States having this equipment.

Chatham Radio (WCC) - Chatham, Massachusetts. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0050, 0450, 0850, 1250, 1650 and 2050. Transmits weather bulletins at (GMT) 0100, 1300 and 1700.

In addition to the above commercial radio facilities, incoming vessels may contact the port through radio facilities on tugs stationed at the port. These facilities are as follows:

VHF radio: range 30 miles. Channel 16 (156.8 MHz), working frequency Channel 14 (156.7 MHz).
SSB radio: 12 MHz, 8 MHz, 4 MHz.
Call letters: WA 6617 and WS 6560.

Diverted Vessels: Vessels diverted to Puerto de Las Mareas must furnish the required 48-hour and 24-hour notices of arrival, unless notice of diversion is received less than 48 hours before anticipated arrival, in which case the notice of arrival will be given as soon as notice of diversion is received. In such cases, however, Phillips Puerto Rico Core Inc. reserves the right to refuse to load or unload such vessels if tankage is not available for the cargo, or if cargo is not available to loading.

TUGS: The use of tugs is compulsory for arriving and departing vessels. Two tugs are stationed in the harbour to assist in docking, undocking and turning. Arrangements for the use of tugs should be made through the Agent well in advance of the vessel's arrival. A minimum of 2 tugs required for berthing and a minimum of one tug required for unberthing.

Tug Operator: McAllister Brothers Inc. Tel. (809) 721-8888, 722-8111.

BERTHING: The dock at the terminal consists of a finger pier approximately 800 ft. in length inside the harbour with a tanker loading berth on each side. The finger pier consists of a cargo platform 45 ft. by 90 ft., fitted with fender piling and dolphins (3 breasting dolphins, 2 mooring dolphins and 1 protective dolphin). The cargo platform is connected to shore by a driveway 12 ft. 6 in. wide. The mooring and breasting dolphins outboard of the cargo platform are connected to each other and to the platform by a walkway. No launches are required to handle mooring lines. The top of the cargo platform is 12 ft. above MLW level. Water depth alongside the finger pier is 38 ft. at MLW. There is no current at the dock or in the harbour.

Bollards for mooring lines are provided on the breasting dolphins, the mooring dolphins and the turning dolphins.

Turning Basin: Turning basin 1,100 ft. wide and 1,060 ft. long, outboard of the turning dolphin, is provided. The turning basin has a depth over its entire area of 38 ft. at MLW. Normal procedure will be for vessels to enter the harbour and turn prior to docking.

Vacating of Berths: Vessels will be required to vacate berths promptly on completion of loading or discharging cargo. Permission to use a berth when not loading or discharging cargo may be granted under special circumstances, and must be requested through the Agent.

If the vessel fails to vacate the berth on the expiration of the allowed time, it will be held liable for payment of any demurrage and/or damages incurred by Phillips Puerto Rico Core Inc., as a result of delays to other vessels waiting berths, or for any other consequence of its failure promptly to vacate the berth.

HURRICANES: The South coast of Puerto Rico is subject to winds of hurricane force, accompanied by abnormally high tides, during the late Summer and Autumn. In the event of such abnormal conditions, vessels may be required to put out additional moorings, or if necessary, to suspend all operations and put to sea until normal conditions prevail.

MEDICAL: Medical assistance or hospitalisation arrangements should be made through the Agent. If hospitalisation is required for any crew member, arrangements should be made through the ship Agent with hospitals located in the Municipality of Guayama. Ambulance service can be furnished upon request to the Agent.

TANKERS: The various cargoes available at the Puerto de Las Mareas terminal include motor fuel, cyclohexane, benzene, paraxylene, orthoxylene, mixed xylenes, paraffinic naphtha, and other special products. Feedstock for Phillips Puerto Rico Core Inc. facilities is naphtha, and there is a fuel oil unloading line.

Cargo handling is accomplished through various sizes of lines, as follows:

Product	*Hose size (each side of dock)* No. (in.)	*Line size* (in.)	*Loading/ discharging rate with one pump* b.p.h.
Naphtha Feedstock	3 × 8	20	13,700
Motor Fuel Regular	3 × 8	20	10,000
Motor Fuel Premium	2 × 8	12	5,700
Motor Fuel Unleaded	1 × 8	14	7,000
Benzene	1 × 8	12	3,800
Cyclohexane	1 × 8	10	4,000
Paraxylene	1 × 8	12	5,000
Orthoxylene	1 × 6	8	2,200
LP-7 Raffinate	2 × 8	16	7,500
Mixed Xylenes	1 × 6	8	2,000
Toluene	1 × 8	8	800
Fuel oil	1 × 8	12	3,500
Ballast	1 × 8	12	6,000
Domestic water	1 × 2	2	3
Butane	1 × 6	16	2,000

CONNECTING/DISCONNECTING HOSES: Service will be provided by the terminal to connect and disconnect hoses on the ship. Vessels are requested to have blanks removed from the cargo lines and hose handling booms rigged on arrival at the dock.

READINESS: Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo, and that the vessel's equipment is ready and capable of loading or discharging petroleum or petrochemical products. Phillips Puerto Rico Core Inc. reserves the right to refuse to accept such notice of readiness if, upon inspection, the vessel is found not to be ready to receive or discharge cargo. Vessels may tender Notice of Readiness upon arrival, berth or no berth, according to the terms of the charter party or contract of affreightment under which they have been engaged.

BALLAST: Ship's Masters are reminded that they are prohibited by Puerto Rico law from pumping dirty ballast overboard when within the Puerto Rican limits. Facilities are provided for disposing of dirty ballast ashore at Puerto de Las Mareas. U.S. Coast Guard Regulations are enforced for any discharge of dirty ballast, and any violations will be quickly detected and reported.

Ballast is pumped ashore (when authorised by Terminal) through a 12 in. line, capable of receiving at a pressure at the ship's rail of 100 p.s.i. The ballast facilities are sufficient to accommodate 100,000 barrels of dirty ballast. Vessels are requested to arrive with minimum of dirty ballast.

FRESH WATER: Available at the dock in limited quantities.

FUEL: No bunkers are available at Puerto de Las Mareas. However, arrangements for bunkering at any other ports in the island can be made through the Agents.

STORES: May be ordered through the ship's Agent for delivery at the terminal.

CONSULS: No consular representatives are located in the vicinity of Puerto de Las Mareas. Some nations maintain consular representatives in San Juan. Further information can be obtained from the Agent.

REPAIRS: Complete repair and dry dock facilities are available in San Juan. Limited facilities for emergency repairs are available at Ponce. Requests for such services should be made through the Agent.

SURVEYORS: There are no classification society surveyors stationed at Puerto de Las Mareas, but they are available on call from Ponce or San Juan. Requests for survey services should be made through the vessel's Agent at least 24 hours prior to arrival.

FIREARMS: All firearms and ammunition should be shown on the stores list and will be removed from the vessel during its stay in Puerto Rican waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

CUSTOMS: U.S. Customs and Immigration Authorities will board vessels at the dock, except in unusual circumstances, in which case they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving from or departing to a foreign port.

SAFETY: The provisions of Part 35 "Operations" of the Rule and Regulations to Tankvessels, Sub-chapter D (CG-123) published by the U.S. Coast Guard are in force at Puerto de Las Mareas, and must be observed under penalty of fine and imprisonment as provided therein.

Particular attention is called to the following safety precautions:

(1) Vessels must be, and remain, in readiness to sail from the dock at any time. In the event of engine repairs, which might interfere with such readiness to sail, being required, written permission must be obtained from the Harbour Master before such repairs may be undertaken.

(2) Scuppers must be plugged during cargo-handling operations.

(3) Absolutely no smoking or open lights will be permitted on the dock or open decks.

(4) Screens in good conditions must be used over gauging hatches when not actually gauging.

(5) Operations may be suspended at the discretion of the Master, or may be required to be suspended by the Harbour Master, during severe electrical storms.

(6) In the event of a breakdown of communications between dock and the shore terminal during loading operations, and the need to shut off the flow of cargo to the vessel, an emergency signal consisting of a continuous sounding of the ship's whistle shall be given. The signal shall not be discontinued until the flow of cargo has been shut off.

(7) An electrical bonding cable will be provided from the dock to the ship. This bonding cable must be firmly secured to a clean metal surface of the vessel's hull or cargo piping before hoses are connected, and must remain in place until the hoses are disconnected.

(8) The vessel must moor bow to seaward when feasible and be prepared to get underway on short notice. A towing cable shall be made ready forward and aft with the bight at water's edge.

(9) Each foreign flag vessel must be in possession of a valid Letter of Compliance issued by the Commandant, U.S.C.G. for the carriage of the specific products to be loaded or discharged. All vessels must possess a Certificate of Financial Responsibility and be able to produce the same upon demand.

(10) Ship to ship transfer of cargo within the harbour is not permitted.

(11) All persons considered to be intoxicated or under the influence of drugs shall not be allowed to board the ships or enter the facilities during cargo operations.

Violations of these and other safety regulations, as described in Parts 35 of Sub-chapter D will result in the suspension of cargo-handling operations by the Harbour Master, or the PPRC dock personnel or safety inspectors, without recourse. Such suspension of cargo operations will continue until the violations are corrected or the safety hazards removed.

POLLUTION: *Oil Spill Avoidance:* All vessels must comply with the latest Commonwealth and Federal laws and regulations regarding prevention of oil spills. Such laws absolutely prohibit any discharge overboard of oily water, oily ballast or oil in any form. Since the harbour is an enclosed area with no flow of water through it, any violations, no matter how small, will be quickly detected and reported to the U.S. Coast Guard. VIOLATORS WILL BE VIGOROUSLY PROSECUTED AND ARE LIABLE FOR HEAVY FINES.

Sanitary Regulations: Pollution laws and regulations concerning sanitation apply to the harbour of Puerto de Las Mareas. Trash and galley waste will not be dumped into the waters of the harbour and must be kept on board until the vessel has sailed. Discharge of toilets and bathrooms into the waters of the harbour is prohibited. Sanitary facilities are provided on the dock for use by crew members while their vessels are at the berth.

MAIL: Official and personal mail may be addressed to the vessel care of Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel, and will ensure its delivery to the local U.S. Post Office, upon receipt of a mail transmittal slip to support disbursements.

SHORE LEAVE: When the vessel is berthed at Puerto de Las Mareas there normally are no restrictions on shore leave. In order to avoid delay in sailing, Masters are requested to ensure that all crew members are on board their vessel at sailing time. There are no facilities to provide shore leave from vessels at anchor awaiting berth.

Crew members from foreign vessels must carry their crewman's landing permit, Form I-95A, when on shore leave.

GARBAGE DISPOSAL: Service available from Ponce Waste.

WASTE OIL DISPOSAL: No facilities for dirty ballast.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar.

GENERAL: *Charts:* The general area and the harbour of Puerto de Las Mareas is shown in U.S. Hydrographic charts number 25677 and 25640.

Tides: Tides in the general area of Puerto de Las Mareas have an average yearly range of 0.8 ft. from MLW to MHW.

SHIPMASTER'S REPORT: February 1988.

The Oil Port is called Jobos, Phillips Oil Terminal. Guayama is the nearest town, and La Salinas is just nearby.

British Admiralty Charts for the area are inadequate, U.S. Chart No. 25687 is of greater assistance.

The Pilot, using a tug, boards at Lat. 17° 54' N., Long. 66° 11' W. This position is very close to the Fairway Buoy.

This vessel, a 218.5 m. LOA tanker, proved to be one of the largest ever handled at the terminal.

Berthing for large vessels takes place in daylight only, close to the daybreak or before sunset, when the wind subsides.

Max. draft requested was 36 ft. 06 in. Vessels berth heading seaward.

Entering the port and making the turn with such a large vessel is not easy. We had to put our bulbous bow on the Eastern bank in order to stop the vessel for the tugs to change side.

The jetty is built for smaller vessels so our ropes were either short, or had to be crossed.

Vessel discharged 335,000 bbls. of naphtha, through 2 × 8 in. hoses tested for 118 p.s.i., and flow requested not to exceed 18,000 bbls./hr.

Discharging was smooth, with slight difficulty during stripping because of the high back pressure.

We had good co-operation with the Authorities, Terminal and Agent. Chas. Martin Inspector attended. According to new Company's policy, the inspector refused to sign any documents other than Chas. Martin's Forms.

U.S.C.G. did not board, even though the vessel had not been to a U.S.A. port for about 2 years.

Provisions were of U.S. quality and were expensive. No bonded stores available.

PILOT'S REPORT: March 1993.
Approaches: Extreme caution should be exercised when approaching the port, in particular for anchoring at night.
Restrictions: Inbound and outbound traffic during daylight hours only. Local pilots will advise ship's Master accordingly upon arrival at the port.
Anchorages: Vessels may anchor at a distance of at least 1 mile E.S.E. from the Lima Mike (LM) Buoy. It is recommended that anchorage positions be obtained from the local Harbour Pilot on arrival or from the vessel's Agent.
General Information:

Vessels bound for Las Mareas should prior to departure from previous port obtain U.S.C.G. Chart No. 25677.

Local Government Regulations require that vessels inbound remain at least 1 mile South of the (LM) Lima Mike Buoy, until they have a pilot on board.

It is recommended that vessels, that do not have the local chart on board, remain drifting until they can contact the local pilot for advice. These vessels should not get closer than 3 miles from the Lima Mike Buoy.
Fishing: Do not eat fish caught near the anchorage, unless you are familiar with the local species.

AUTHORITY: Puerto Rico Ports Authority, see "San Juan".
Operator: Phillips Puerto Rico Core Inc. (Postal address: Call Box 10003, Guayama, Puerto Rico 00785). *Tel:* (809) 864-1375. *Telex:* 3451056. *FAX:* (809) 864-2302. *Contact:* Captain Jaime Rivera, Port Captain. Victor M. Reyes, Marine Transportation Coordinator.

MAYAGUEZ: 18.13 N. 67.12 W.

DOCUMENTS: See "San Juan".
PILOTAGE: Ship's Agents must make arrangements with Captain of the Port Office at Mayaguez Pier well in advance, not less than 24 hours before arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) as required, showing the letter "P" on each bow. Pilots board 1 to 2 miles offshore of Sea Buoy depending on weather conditions. Pilot service available day and night.
ANCHORAGES: Close to the entrance channel and boundaries. Sufficient depths for larger vessels.
RESTRICTIONS: The bay is easily entered day or night and is a good harbour in any weather, except in a hurricane. The harbour is 3.8 miles wide, and offshore is protected by reefs which extend across the harbour entrance in a general North by West direction.

The principal channel is about 0.4 miles wide, with depths at the entrance of about 47 ft. to 120 ft. and it is marked by lighted buoys and the range. Depth in the inner channel is approximately 30 ft. and close alongside the pier from 28 ft. to 29 ft.
MAX. SIZE: Cargo vessels 600 ft. or more in length call at the port. Safe draft for operations at the wharf is 27 ft.
RADIO: Communication to all points, including ships at sea, is available through commercial systems. Cables-Telex via RCA Communications, Inc., a global service of Radio Corporation of America. ITT World Communications, Inc., tel. 830-3316. Puerto Rico Telephone Company, local and overseas communications services, 129 and 128.
TUGS: Not used at Mayaguez Port.
BERTHING: Berthing permit required from the Ports Authority. The Puerto Rico Ports Authority operates the terminal facilities which consist of a bulkhead wharf approximately 1,200 ft. long, apron width 30 ft., and transit sheds and open storage. There are other berthing facilities in the port which are owned by the tuna packing plants.
STEVEDORES: Arrangements are made by the ship's Agents or representatives.
MEDICAL: The Agent should know in advance of any medical needs so that he can make the necessary arrangements with the U.S. Public Health Service. Good medical and hospital services available.
TANKERS: See "Guayanilla".

Regular calls from Esso and Texaco to unload fuel by means of barges in order to supply tanks on land by means of pipes located at berthing facilities.

FRESH WATER: Available alongside the berth at 4 outlets to supply any amount required at any time. Hose connections of 2.5 in. or less, maximum pressure.
FUEL: All grades available.
FIRE PRECAUTIONS: Standard fire and safety precautions throughout. U.S. Coast Guard regulations.
CONSULS: Dominican Republic, France, Tel: 832-4322. Others at San Juan and Ponce.
REPAIRS: Call San Juan facilities where complete salvage equipment is available. Service to other ports of the island.
GANGWAY/DECK WATCHMEN: Ship provides gangway watchmen.
OPENING/CLOSING HATCHES: By stevedores.
REPATRIATION: Arranged by ship's Agents.
AIRPORT: Mani Airport, 15 minutes from pier, served by regular airlines daily from Mayaguez to San Juan.
TIME: GMT minus 4 hours all year round.
HOLIDAYS: Refer to "San Juan".
POLICE/AMBULANCE/FIRE: Telephone numbers: Police, 343-2020, 832-2300; Ambulance, 832-0496, 832-3212; Fire, 343-2330, 832-2330.
TELEPHONES: Can be arranged by Puerto Rico Telephone Company.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required to go ashore.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Mayaguez. Tel: 832-3590.

PONCE: 17.58 N. 66.37 W. (See Plan)

DOCUMENTS:
Crew Landing Permit (Form 1-95).
Crew List (Form 1-418).
Ship's Stores Declaration (Form USCF 1303).
Crew Effects Declaration (Form USCF 1304).
Cargo Manifest (Form USCF 1302).
PILOTAGE: Pilotage is compulsory for all foreign and U.S.A. vessels.
The pilot service is under the supervision and direction of the Puerto Rico Ports Authority and their Captain of the Port Office.
ANCHORAGES: Harbour is protected from the prevailing Easterly trade winds by enclosing reefs.
RESTRICTIONS: Depths: Entrance channel 50-150 ft.; turning basin, 34 ft..
MAX. SIZE: Max. draft 39 ft.
BERTHING: 9 berths available. Vessels of 1,000 ft. LOA can be berthed. 1×40 ton Paceco Portainer at Berth No. 8. Ro/Ro ramp available. Three container yards; 12 acres, 9 acres and 6.7 acres.
MEDICAL: Medical services available upon request to the Agent.
FRESH WATER: Water is available whenever ordered in advance, 24 hours a day.
FUEL: Available either by barge or truck.
CONSULS: (In San Juan).
Colombia
Denmark
Dominican Republic
Honduras
Netherlands
Panama
Spain
Sweden
Switzerland
REPATRIATION: Arranged by ship's Agents.
TIME: GMT minus 4 hours.
HOLIDAYS: 19 holidays in the year. Work performed 24 hours a day, 7 days a week.
DEVELOPMENTS: See "Plan".
AUTHORITY: Port of Ponce, Board of Management, P.O.Box 125, Playa Station, Ponce, P.R. 00734-4125. *Tel:* (809) 848-4992. *FAX:* (809) 840-4681. *Contact:* Jose A. Buitrago, Port Director. Wilfredo Mattei, Port Captain.

PORT ARECIBO: 18.29 N. 66.42 W.

Port Arecibo is located on the North coast of the island, 32 nautical miles Westward of San Juan. There is a breakwater to afford some protection from heavy seas, but even so the port is not considered safe for vessel's operations, which are practically non-existent, except for a tug-barge operation (liquid chemicals are pumped out from a tank-barge alongside the pier through a pipeline to P.R. Chemical storage tanks ashore).

A sizeable fleet of pleasure craft use a section of the berthing facilities. There has been a significant growth in tug-barge traffic calling at the port.

There is a pier 600 ft. long. Depth alongside is close to 20 ft., but there is a shallow spot towards the inshore end of the pier. There is also a 30,000 sq. ft. cargo shed and open storage area.

The port is mainly used as an industrial port.

Port installations are under the control of the Puerto Rico Ports Authority.

Port Arecibo is not a Customs Port of entry.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Port Arecibo. Tel: 878-6460.

PORT FAJARDO: 18.20 N. 65.38 W.

The Port of Fajardo lies on the East coast of Puerto Rico. There is a 250 ft. long concrete pier owned by the Puerto Rico Ports Authority for the passenger and cargo ferryboats and other craft which engage in inter island traffic to the islands of Vieques and Culebra.

Port operations are under the control of the Captain of the Port.

For Customs service, the Port of Fajardo is under the jurisdiction of the Fajardo Custom House.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".

Captain of the Port, Port Fajardo. Tel: 863-0805.

SAN JUAN: 18.28 N. 66.07 W. (See Plan)

DOCUMENTS: Customs:

1. American flag vessels engaged exclusively in the coastwise trade (to or from American ports only, U.S. Virgin Islands ports excepted) are not required to make entry or to obtain clearance. A Permit to Depart is required, however, if loading coastwise cargo.

2. No formal entry or clearance is required for American yachts arriving or departing regardless of destination, but a report of arrival must be made within 24 hours after arrival from foreign ports or from the Virgin Islands.

3. All vessels arriving from foreign ports for discharging and/or loading cargo must report arrival within 24 hours and make entry within 48 hours. Vessels arriving in distress or for the purpose of taking on bunkers, water and/or stores and departing within 24 hours need not make entry or clearance, but must report arrival and comply with certain Customs formalities, such as reporting bunkers and stores taken, before departing.

(a) The following valid documents shall be available for examination and return to Master regardless of length of stay in port:

1. Register or Nationality Certificate.
2. Load Line Certificate (if over 150 tons).
3. Water Pollution Certificate (if over 300 tons).

(b) Additional documents, to be filed in duplicate for Customs purposes, are as follows:

1. Master's Oath of Vessel in Foreign Trade (C.F. 1300).
2. General Declaration (C.F. 1301).
3. Cargo Declaration (C.F. 1302) in the English language.*
4. Ship's Stores Declaration (C.F. 1303).
5. Crew Effects Declaration (C.F. 1304).
6. Crew List/Passenger List (Immigration Form I-418).
7. Clearance from Last Port (original only – if available).

(*) Only one copy of the Cargo Declaration is required for in-transit cargo for foreign ports.

4. NOTE: Specific procedures for the entry and clearance of vessels are extensively described under Part 4 of the Customs Regulations (19 Code of Federal Regulations, Part 4) and Title 46, United States Code. Questions on such procedures may be directed to:

District Director of Customs,
P.O.Box 2112,
Old San Juan, Puerto Rico 00902.
Attention: Carrier Control Branch.
Tel: (809) 725-3310
(809) 721-7777

Or to the Port Director of Customs at the following sub-ports: Fajardo (809) 863-0950, Mayaguez (809) 832-0308, Ponce (809) 842-3195 or 842-1030.

Immigration: From 0800 – 1700 hrs., Monday through Saturday, no charges. Exceptions are Federal holidays, Sundays and periods from 1700 hrs. – 0800 hrs. daily, when overtime charges paid by the Federal Government will be charged to the steamship company according to specified tariff.

Documents required:

1. U.S. Crew List, Form I-418 (only one is necessary) duly visaed by the American Consul at port of departure: if there is no Consul available, list must be signed by the Master and sworn before an Immigration Officer on arrival.

2. If crew is to be given shore leave, Form I-95 is to be prepared for each member of the crew. If this form fully filled out for each member of the crew is not presented to the Immigration Inspectors, crew will be detained on board.

3. Both copies of Form I-95 must be printed (or typed) legibly, not written in script.

4. Whenever passengers are carried, a separate Form I-418 listing each passenger, must be presented in accordance with instructions thereon, together with a Form I-94 if required.

For additional information on Consular Clearances for the Dominican Republic and Venezuela, and Immigration Documentary requirements, said offices should be contacted directly.

Agent:

3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchase List.
1 copy of Narcotics List.
1 copy of Passengers List.

MAX. SIZE: Cargo vessels 750 ft. in length call regularly at the Port of San Juan. Channel to tanker berth, 36 ft.

PILOTAGE: Pilot services are available day and night. Pilotage is compulsory for: all vessels of foreign registry; American flag vessels bound to or arriving from foreign ports and American flag vessels not having on board a deck officer duly licensed as harbour pilot for Puerto Rico waters.

Ships' Agents must make arrangements with Pilot Station well in advance (not less than 24 hours) of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) with the letter "P" on each bow. Pilots board 3 miles offshore of Sea Buoy. Call Pilot station on Channel 16 VHF. There is no inner anchorage for incoming vessels to wait for the Pilot.

Port Administration: Most of the port terminal installations are under the control of the Puerto Rico Ports Authority. Utilisation of all port terminal facilities is subject to prior application to the Puerto Rico Ports Authority and the issuance of a written berthing permit by the Operations Division of the Maritime Department of the Ports Authority, tel: 729-8725 and 729-8705.

Vessels approaching to enter San Juan Harbour shall remain outside, not less than 3 miles to the North of the harbour entrance, to pick up the Pilot; and vessels ready to depart shall inform the Maritime Traffic Control or look-out station via radio-telephone of their intention.

ANCHORAGES: Deep draft anchorage "E", on the S.W. shore of Isla Grande, is for vessels awaiting Customs or Quarantine, and no vessel shall remain more than 24 hours without a permit from the Puerto Rico Ports Authority and U.S. Coast Guard Captain of the Port.

The effective size of this anchorage area has been reduced on its S.E. sector on account of the construction of barge mooring facilities that encroach on the area.

Restricted Anchorage "F" (Fox), shoreward of the West margin of Anegado Channel, is for vessels discharging explosives. Anchorage permit required from U.S. Coast Guard Captain of the Port and the Puerto Rico Ports Authority.

Anchorage "D", East end of San Antonio Channel, is for yachts, schooners and small craft.

RESTRICTIONS: Besides the harbour entrance channel (Bar Channel) and the main ship channel (Anegado Channel) with depths of 48 ft. and 36 ft. 6 in., respectively, there are 4 other navigable channels in the inner harbour:

The Army Terminal Channel, which runs in a straight North to South direction is approximately 1 mile long and 300 ft. wide with a depth of 37 ft. The channel leads into the turning basin off the Army Terminal on the South shore of the bay. On the Westerly margin of the channel there are located the pile clusters berthing facilities, silos and other shoreside installations for the receipt of bulk grain shipments and petroleum products.

The Puerto Nuevo Channel, approximately 1 mile long and 300 ft. wide, with an average depth of 30 ft. 6 in., runs East-Northeasterly from the Army Terminal Turning Basin to the Graving Dock Turning Basin. This provides access to modern marine terminal facilities in the Puerto Nuevo port zone.

The Graving Dock Channel, approximately 1 mile long and 300 ft. wide, with average mid-channel depth of 29 ft., runs in a general Southeasterly direction from Anegado Channel to the Graving Dock turning basin.

San Antonio Channel, approximately 1.5 miles long and 300 yards wide, with average mid-channel depth of 32 ft. 6 in. – 36 ft. branches out from Anegado Channel for about 0.25 miles up to Isla Grande Light Beacon, thence along the North shore of Isla Grande in a straight West-East direction for about 1 mile to the small craft anchorage "D" and the Yacht Club. This channel is bounded on the North margin by commercial piers and the Frontier Base berthing facilities and in the South by Isla Grande marginal wharf and the container terminal facilities.

HEALTH: Foodstuffs and plants not to be taken ashore.

RADIO: Radio communication to all points, including ships at sea, is available through commercial systems. Cables, telex via RCA Communications, Inc., a global service of Radio Corporation of America, tel. 723-6170, San Juan, Puerto Rico. Also, Western Union International, tel: 725-2121, ITT All American Cables & Radio, tel: 723-3732, and ITT World Communications, Inc., tel: 725-1515.

The Maritime Traffic Control Station "KRS – 893" at Fort San Cristobal in San Juan Harbour is manned around the clock for radio-telephone communication with incoming and outgoing ships' traffic. Transmitting vessels can communicate with the station through 156.8 MHz (Channel 16) for call and reply and working Channel 14, 156.7 MHz.

TUGS: Crowley Towing & Transportation, tel: (809) 722-1111, Telex: ITT 3450056, RCA 3252660, and McAllister Brothers, Inc., Puerto Rico Branch, tel: (809) 721-8888, telex: Towco 3450469, operate a fleet of tugs. Service is available day and night, subject to previous arrangements.

Use of tugs compulsory for docking and undocking vessels 8,000 tons displacement and over unless equipped with bow or side thrusters.

BERTHING: Finger Piers No. 1 – 7 and the open bulkheads between them are located in the Old San Juan waterfront and Piers No. 8 to 14 are situated in the section known as Puerto de Tierra on the outskirts of downtown San Juan at the North margin of San Antonio Channel.

With the exception of Pier 15 and Frontier Base which are Navy property, all the piers including those in the Old San Juan waterfront and the new facilities (Terminals A, B, C, D, E, F, G, H, J, K, L, M and 1/2 N) located in the port zone known as Puerto Nuevo, on the South shore of San Juan, are Ports Authority owned installations. The utilisation of the berthing and other facilities by maritime operators is subject to prior approval by the Ports Authority.

The Port installations in San Juan Harbour aggregate in the neighbourhood of 22,700 lineal ft. of berthing space; 1,100,000 sq.ft. transit shed area: 1,500,000 sq.ft. open storage area and 105 acres of marshalling yards. The latter facilities are located mostly at the Puerto Nuevo port zone and Isla Grande.

All vessels must request and obtain well in advance before arrival a Berthing Permit from the Ports Authority.

Pier 1: North shore of the harbour, in the Old San Juan waterfront, East of Customs Building and next Westerly to the ferryboat landing. Modern twin berth, 770 ft. long, double deck, cruise and passenger vessels' terminal, pierside passenger and baggage gangways, elevators, parking and shopping. Water and light facilities available.

Ferry Terminal: Next Easterly to Pier 1. Ferry terminal for the San Juan-Catano ferry fleet.
Pier 3: North shore of the harbour, Old San Juan waterfront next Easterly to the ferry terminal. Tourist ships' terminal similar to Pier 1. Depths in the approaches and alongside tourist piers 35 ft.
Wharf No. 6: Marginal wharf, 1,300 ft. long, accommodates cruise and passenger vessels. Water and light facilities available.
Pier 7: Northerly continuation of Pier No. 6; 472 ft. long, 1 berth.
Pier 8: East of Pier 7, finger pier, 3 berths, general cargo pier. Transit shed area and other covered storage 171,000 sq.ft., open area 40,000 sq.ft. Water and light facilities available.
Pier 9: East of Pier 8. Finger pier, 3 berths, general cargo pier. Net storage space pier shed 133,738 sq.ft. open area 40,000 sq.ft. Water and light facilities available. South berth is a tug–barge terminal.
Pier 10: North shore of San Antonio Channel. East of Pier 9. Open Finger pier, 1 ship berth, tug and barge terminal. No transit shed space. Water, fuelling facilities and light available.
Wharf No. 11: East of Pier 10, marginal wharf, 1 berth, 580 ft. of bulkhead, general cargo pier. Transit shed area 100,000 sq.ft. ample back area. Water and light facilities available.
Wharf No. 12: An extension of Wharf No. 11 Bulkhead 550 ft. long, wide apron, 15,000 sq.ft. transit shed area, 37,000 sq.ft. open storage. General cargo wharves. Water and light facilities available.
Wharf No. 13: Prolongation of Wharf No. 12: 28,000 sq.ft. transit shed area, 55,000 ft. open storage area, general cargo wharf. Water and light facilities.
Pier 14: Extension of Piers 12–13 bulkhead; marginal wharf, general cargo pier, wide apron. 446 ft. long, 40,000 sq.ft. transit shed area, ample marshalling area. Water and light facilities available.
Frontier Base Pier: Navy facility operated by the Puerto Rico Ports Authority under contract. 2 berths for sea-going vessels. Depth alongside 30 ft. Principally used for berthing of cruise vessels and conventional ocean carriers handling open storage cargo.
Isla Grande Terminal: South shore of San Antonio Channel. General cargo wharf. 1,500 ft. long bulkhead. Wide aprons. Transit shed 32,000 sq.ft. with 240,000 sq.ft. of paved open area. Easterly section of bulkhead for shallow draft vessels.
Container Terminals:

(a) In Westerly section, Bulkhead wharf 1,320 ft. long. Wide apron, ample marshalling yards for trailers. 2×45 tons capacity container handling cranes. Paved marshalling area approximately 1,800,000 sq.ft.

(b) On the South shore, berthing facilities, 300 ft. bulkhead wharf with adjacent areas for TMT's Roll-on/Roll-off operations. Shoreside concrete ramp extending out to seaward. Tug-barge operation, loading and unloading through bow and side ramps, about 30 acres for trailers on exclusive lease basis. Max. draft approximately 18 ft.

(c) Trailer Marine Transport Roll-on/Roll-off three level ramp, barge-tug operation; loading and unloading at bow. Max. draft 18 ft.

The lands in Isla Grande and the conventional cargo handling terminal facilities are U.S. Navy property under lease and operated by the Puerto Rico Ports Authority. These facilities are in the process of being transferred to the ownership of the Puerto Rico Ports Authority.
Pier 15: Bulkhead Wharf and Finger Pier used by commercial vessels. Containerised and general cargo facilities. U.S. Navy installation under lease to Perez & Cia. from Puerto Rico.
Pier 16: Navy installation under lease. Graving and floating docks. See "Repairs".
Puerto Nuevo Docks: Terminals "A" and "B" marginal wharves. 2×500 ft. berths. 102,000 sq.ft. transit shed area. 2 cargo sheds. 30 ft. depth alongside. General cargo piers. Limited open storage area.
Trailership Terminals: 3 at Isla Grande port zone, above, 10 at Puerto Nuevo port zone. Berths C, E, F, G, H, J, K, L and M and West Side Army Terminal.
Berths "J" and "K": P.R. Maritime Shipping Authority Roll-on/Roll-off terminal. Shoreside movable ramps for side loading and unloading. Extra wide pier platform, ample trailer marshalling yards. 600 ft. long marginal wharf.
Berth "D": 100,000 sq. ft. of transit shed space for break-bulk operations and cargo stripping and distribution. Marginal wharf 40 ft. wide, 600 ft. long. Ample trailer marshalling yard. 30 ft. depth alongside, approximately.
Berths "E", "F", "G", "H", "J", "K", "L" (900 ft.), and "M": 600 ft. each, continuous bulkhead wharves, Lift-on/Lift-off operation. Max. draft alongside 30 ft. Extra wide pier platforms. Ample trailer marshalling yards. Five 25 ton capacity pierside cranes are installed at Berth "E" to "H".
Army Terminal Pier: Finger pier; 3 berths. Approximately 50,000 sq. ft. transit shed area. East and West berths 600 ft. each. North berth 200 ft. Under the control of the Ports Authority. West side, ramp for Roll-on/Roll-off operation.
Isla de Cabras Pier: Explosives handling pier at Isla de Cabras. Ports Authority property.
BULK HANDLING FACILITIES:
Bulk Grain Handling Facilities: Berthing clusters, silos and other shoreside installations for the receipt of shipments of bulk grains (Nebraska Mills, California Rice Mills, Red Seal, etc.).
STEVEDORES: Arranged by the ship's Agents.
MEDICAL: Medical attendance and services are available for seamen at the United States Public Health Service in San Juan (out-patients). The Ashford Memorial Community Hospital handles internal cases.
TANKERS: *Caribbean Oil Refinery:* Pile clusters berth for handling gasoline and fuel oils, max. permitted draft 33 ft.
Navy Oil Pier: South shore of the bay, next Westerly to Terminal "A", Puerto Nuevo. G.S.A. property leased to Texaco, Esso, Shell. Berthing facilities 350 ft. long and 24 ft. MLW. Bunkers available.
FRESH WATER: Most of the piers have adequate installations to supply water.
FUEL: Served in barges either alongside the vessel at the pier or at anchor. Other combustible liquids are delivered in tank trucks by Shell, Esso and Texaco.

SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar (U.S.$).

DEVELOPMENTS: The new port sector, under development at Puerto Nuevo, now at an advanced stage, will ultimately comprise 15 berths, of which 12 are already in operation.

Port facilities used predominantly by trailerships are located towards the Southern sector of the bay. These are marginal wharf type facilities immediately adjacent to the Puerto Nuevo Channel.

Presently, the Ports Authority has initiated the final stage for the development of some 108 acres of land that will be used as back-up lands in connection with the ocean-front operations of Wharves "J" to "N".

This land has been in a process of stabilisation over the last years and presently a project is already under way to remove the sand surcharge deposited on it. The material being removed is being used as surcharge material for the stabilisation of other areas.

The degree to which this stabilised terrain will be further developed will depend on their demand for use by maritime interests.

YABUCOA: 18.02 N. 65.48 W. (See Plan)

DOCUMENTS: The following documents for vessels in foreign trade are required by the U.S. Customs and Immigration Authorities for entry and clearance:

Master's Oath (original and one copy) entry and clearance.
General Declaration (original and one copy) entry and clearance.
Stores List (original and two copies) entry.
Crew Purchases List (Curio List) (original and two copies).
Cargo Declaration (original and one copy).
Crew List (one copy certified and two copies not certified).
Clearance from Last Port (if arriving on an international voyage).
Crewmen Landing Permits (for each crew member without the Plastic Form 1-14).
Passenger List (if any passengers).
All permanent documents of the vessel.

Passenger List: The Passenger List must show full names, sex, age, nationality and occupation of passengers landing at Puerto Yabucoa. The ultimate destination of in-transit passengers must also be shown on the Passenger List.

Deratisation Certificates: Deratisation Certificates cannot be renewed at Puerto Yabucoa.

Outward Clearance: In most cases, the outward clearance and cargo documents will be delivered onboard the vessel, during her free time period or ballast period, prior to leaving the Dock.

Customs and Immigration: U.S. Customs and Immigration authorities will board vessels at the dock, except for unusual circumstances, in which cases they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving from or departing to a foreign port.

APPROACHES: Vessels arriving at Puerto Yabucoa should proceed to approximately 2 miles S.E. of the seaward end of the channel and stand-by on VHF Channel 19A for berthing instructions from Puerto Rico Sun Oil Company, Marine Department (VHF Call Sign "WLZ") and/or the Pilot.

Approach to Harbour: The harbour is entered through a channel 500 ft. wide at its narrowest portion, on a course of 297° True. A rubble mound jetty is located at the N.E. side extending 500 ft. seaward. The channel is dredged to the 50 ft. contour which is approximately 5,765 ft. from shore. Seaward of the 50 ft. contour, a depth of 55 ft. is provided along with a 500 ft. channel width for a total distance of approximately 9,000 ft. from shore. Vessels approaching the channel from the E.S.E. will have a clear approach.

Navigational Dangers: The area seaward of the dredged channel is relatively open and free from danger, but care should be exercised in approaching the channel as soundings decrease extremely rapidly at the channel entrance. Outcrops of hard seafloor material exist in the regions adjacent to the channel.

PILOTAGE: Harbour pilots must be used by all vessels except for American flag vessels in domestic trade bound to or arriving from a U.S. Port with a deck officer onboard who is qualified and licensed as a Pilot for Puerto Yabucoa.

Pilot services are available at any hour of the day or night. The Ship's Agent will arrange for the Pilot upon notification of arrival. The Pilot will board in-bound vessels approximately 1.5 miles seaward of the channel entrance. The vessel should not approach any closer than this distance until the Pilot is on board.

Every vessel requiring a Pilot must provide, properly rigged and secured, a pilot ladder which conforms to international safety standards. When picking up or disembarking the Pilot, the vessel must heave to and provide a lee with the pilot ladder rigged on the lee side 6 ft. (2 m.) above the water.

ANCHORAGE: If a significant delay in berthing is anticipated the ship may anchor and await berthing instructions. A suitable anchorage is located 1.25 miles South of Punta Negra, Vieques Island approximately 18° 04' N., 65° 27' W. (Nautical Chart No. 25650).

This anchorage is to be used only at the discretion of the Master.

MAX. SIZE: The maximum draft that can be handled in Puerto Yabucoa is 44 ft. 6 in., subject to change, based on silting.

RADIO:
Notice of Arrival: Vessels calling at Puerto Yabucoa must notify Puerto Rico Sun Oil Company through the ship's Agent 72/48/24 hours prior to arrival at Yabucoa Sea Buoy. If ETA is expected to change more than one hour it must be corrected at least 24 hours prior to arrival.

Radio Communications: The following radio stations are available for communicating with Puerto Rico Sun Oil Company or the ship's Agent.

a. Commercial Coast Stations:
   (1) Lantana Radio (WOE) – Lake Worth, Florida.
   Equipped with RCA automatic land line circuit direct to New York City, San Francisco and Washington, D.C.
   (2) New York Radio (WNY) – New York City.
   Equipped with RCA automatic land line circuit direct to New York City, San Francisco and Washington, D.C. Also equipped with teletypewriter (TWX) for direct communication with steamship companies in the United States having this equipment.
   (3) Chatham Radio (WCC) – Chatham, Massachusetts.
   Equipped with RCA automatic land line circuit direct to New York City, San Francisco and Washington, D.C.
   (4) Virgin Islands Radio (WAH) – St. Thomas, Virgin Islands.
   Very High Frequency (VHF)
   (a) Channel 16 – calling channel
   (b) Channel 28 – working channel
b. Puerto Rico Sun Oil Company Stations:
   The following stations are authorised to handle Puerto Rico Sun Oil Company business traffic only and cannot accept public correspondence calls.
   (1) Puerto Rico Sun Oil Marine Department (WLZ) Yabucoa, Puerto Rico. On the air from 0800 hrs. to 1700 hrs. (1200 hrs. to 2100 hrs. GMT) Monday through Friday, except holidays.
   Very High Frequency (VHF) Channels: Channel 19A – standby and working channel.

BERTHING:
Docking Procedures: Upon arrival at the Sea Buoy the vessel must have:
(a) The engine on manoeuvring speed for picking up the Pilot and for entering the channel.
(b) Deck machinery and lines ready for docking and tying up port side to the Dock.
(c) Port anchor backed out of the hawse pipe and free to run.
(d) Vessels arriving in ballast must have the propeller submerged and have a trim of not more than 10 ft. by the stern.

Notice of Readiness: Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo and that the vessel's equipment is ready and capable of loading or discharging petroleum products. Puerto Rico Sun Oil Company reserves the right to refuse to accept such Notice of Readiness if, upon inspection, the vessel is found not to be ready to receive or discharge the cargo. Vessels may tender Notice of Readiness upon arrival, berth or no berth, according to the terms of the Charter Party or Contract of Affreightment under which they have been engaged.

CARGO FACILITIES:
Connecting and Disconnecting Hoses: A crew will be provided by Puerto Rico Sun Oil Company to handle mooring lines and to connect and disconnect hoses and loading arms on the ship. Vessels are required to have blanks removed from cargo and ballast lines which will be used during cargo or ballast transfer when the vessel docks. In order to properly connect 2 loading arms to the vessel, the risers onboard should be at least 6 ft. between centres.

Communications for Cargo Transfer: Portable radios are provided by the shore crew for communications during loading and unloading operations. The Mate must sign a receipt upon receiving said radios, and is responsible for returning them prior to sailing. Failure to return the radios shall result in billing for the cost of same. The original signed receipt shall constitute proof of liability. The ship must obtain this original when radios are returned.

Ballast: All dirty ballast must be pumped ashore to the ballast facilities. The ballast facilities can receive 70,000 barrels of ballast through a 24 in. line capable of receiving a pressure at the ship's rail of 125 p.s.i. Vessels are requested to arrive with a minimum of dirty ballast.

All clean and segregated ballast may be discharged overboard, provided the vessel is in compliance with all regulations as stated in 33 CFR 157.43.

Crude Oil Washing: Crude Oil Washing is permitted in Puerto Yabucoa provided the vessel complies with all safety and regulatory procedures as stated in 33 CFR 157, Sub-chapter D.

Vessels may Crude Oil Wash more than one third of their tanks provided it has been so stated in the terms of the charter agreement.

Pumping Data: The crude oil, products and ballast water are pumped through loading arms on the dock.

The sizes and approximate pumping rates are as follows:

Arm No.	*Product*	*Flange Size* (in.)	*Line Size* (in.)	*Max. Pumping Rate* Bbls.Hr.
1	Bunker C	10	14	6,000
	Ballast	10	24	10,000
2	Gas Oil	10	14	10,000
	Ballast	10	24	10,000
3	Jet Fuel	16	14	12,000
	Naphtha	16	12	7,500
	Kerosene	16	20	12,000
	No. 2 Fuel Oil	16	20	18,000
	Lt. Distillate	16	20	18,000
4	Lube Oils	10	14	5,000
5	Slack Wax	10	10	2,500
6	Aromatic Extract	10	8	1,500
7	Crude Oil	16	24	20,000
	Ballast	16	24	10,000
8	Crude Oil	16	24	20,000
	Ballast	16	24	10,000
Hose	Marine Diesel Fuel	4	4	150

TUGS: The use of tugs is compulsory for arriving and departing vessels. Arrangement for the use of tugs should be made through the Agent well in advance of the vessel's arrival.

MEDICAL: Medical and dental services are available in Yabucoa. Requests for ambulance service or hospitalisation for crew members can be made through the ship's Agent.

FRESH WATER: Fresh water facilities at this port are limited to approximately 100 tons while vessel is discharging or loading.

FUEL: Bunker C and Marine Diesel fuel oils are available at Puerto Yabucoa. Arrangements for bunkering should be made with a Puerto Rico Sun Oil Company Marketing Representative prior to the vessel's arrival in Yabucoa.

CONSULS: No consular representatives are located in Yabucoa. Many nations maintain consular representatives in San Juan. Specific information can be obtained from the ship's Agent.

REPAIRS: Limited repair facilities are available in San Juan. Requests for such services should be made through the Agent at least 48 hours before the vessel's arrival.

SURVEYORS: Classification Society Surveyors are available from Ponce or San Juan. Requests for these services should be made through the vessel's Agent at least 48 hours prior to arrival.

Cargo Inspection Services are available for quantity and for quality inspections of incoming and outgoing cargoes. The ship's Agent can arrange for such services, if requested. This service must be requested at least 48 hours prior to the vessel's arrival.

SHORE LEAVE: When the vessel is berthed at Puerto Yabucoa there normally are no restrictions on shore liberty. In order to avoid delays in sailing, Masters are requested to ensure that all crew members are onboard their vessel at sailing time. There are no facilities to provide shore liberty from vessels at anchorage awaiting berth.

Crew members from foreign vessels must carry their crewman's landing permit, Form I-95A, when on shore liberty.

GENERAL:

Consignment: All vessels calling at Puerto Yabucoa Harbour Tanker Terminal should be consigned to Puerto Rico Sun Oil Company, or to Hemisphere Oil Company, and all official documents for such vessels should show them so consigned. In conformance with Port Regulations no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the Port.

Charts: The general Puerto Yabucoa Bay area is shown on USC & GS Chart No. 25661.

Ensigns: By international customs and usage, the American Flag is required to be flown at the masthead of all vessels from the time of entering the channel in-bound until clearing of the channel out-bound.

Sea Conditions: The wave action in the vicinity of the channel entrance is generally from the East or Southeast. Wave heights are less than 6 ft. 90% of the time, however, during tropical storms or hurricanes, wave heights can get substantially higher.

Weather: Easterly and Northeasterly winds are predominant over this region of Puerto Rico. January through March is the windiest season. September through November is the calmest season. The principal season for hurricane activity is during late Summer and early Fall.

Sanitary Facilities: Pollution laws and regulations prohibit vessels from discharging overboard sanitary and galley wastes into the harbour. Pollution laws and regulations also prohibit vessels from discharging galley wastes and garbage ashore.

Puerto Rican Laws: All vessels calling at Puerto Yabucoa shall comply with all applicable Laws and Regulations of the United States and of the Commonwealth of Puerto Rico.

Firearms and Ammunition: All firearms and ammunition must be shown on the Stores List and may not be removed from the vessel during its stay in Puerto Rico waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

Store and Supplies: Limited ship chandler service is available in Puerto Yabucoa. Stores and supplies can be ordered through the ship's Agent for delivery to the vessel, but such orders must be made at least 48 hours prior to the vessel's arrival.

Crew Transportation: Public transportation (Publico) for crew members from the Dock into town is available. The "publico" fare is to be paid by the crew member. Transportation to and from the airport can be arranged through the ship's Agent.

There are no water transportation facilities available at Puerto Yabucoa for vessels at anchor.

Mail: Official and personal mail may be addressed to the vessel in care of the Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel and will ensure its delivery to the local U.S. Post Office. Express mail and air freight services are also available.

Vacating of Berth: Vessels will be required to vacate berths promptly upon completion of loading or discharging cargo. Permission to use a berth when not loading or discharging cargo may be granted under special circumstances, and must be requested through the Agent.

Vessels discharging cargo will be allowed time for ballasting if required.

If a vessel fails to vacate the berth on the expiration of allowed time, it will be held liable for payment of any demurrage and/or damages incurred by Puerto Rico Sun Oil Company as a result of delays to other vessels awaiting berths, or for any other consequence of its failure to promptly vacate the berth.

SHIPMASTER'S REPORT: August 1986.

Position: Lat. 18° 03' 18" N., Long. 65° 50' 08" W.

Pilotage: Compulsory for non Sun Oil vessels. Pilot boards 1.0 to 1.5 miles off the Sea Buoy.

Restrictions: Berthing and unberthing possible day and night.

Anchorage: 2.5 miles East of Sea Buoy in depths of 10-25 fathoms.

Approach to Berth: No difficulties.

Immobilisation of Engines: Allowed with permission of Sun Oil.

Berth: North side of Yabucoa Bay. Wharf well fendered with berthing dolphins. Maximum length of vessel is 870 ft. and the max. draft alongside the berth and in the channel is 44 ft.

Tugs: 2×3,800 h.p.

Density: 1025.

Brief Description of Shore Line System: Position of connections-midships. Maximum loading rate 12,500 bbls.p.h. per pump. 2 pumps available for each line.

There are 8 loading arms, sizes from 10 in. to 16 in.
2 for crude oil.
1 for aromatic.
1 for slack wax.
1 for lube oil.
1 for naphtha.
1 for gas oil and ballast.
1 for bunker and ballast.

Bunkers and Lubricants: Available.

Fresh Water: Available.

Stores and Laundry Facilities: Available. Handled by San Juan companies.

Tank Cleaning and Dirty Ballast Facilities: Possible. Maximum capacity for dirty ballast 100,000 bbls. Sun Oil does not accept any leaded washings or dirty ballast from tanks which previously contained leaded cargo.

Points of Interest: Minimum ballast arrival draft:
Forward 14 ft.
Aft 24 ft.

No gangway from shore available.

SHIPMASTER'S REPORT: January 1988.

Documents: see "San Juan". Requirements similar to U.S. Ports.

Immigration: As for San Juan. Immigration Officer and Agriculture Inspector from Fajardo board on arrival for formalities.

Pilotage: Available on a 24 hour basis when required. Pilot boards from tug about 2 miles E.S.E. of buoyed channel entrance. After initial contact on Channel 16, pilot and tugs use Channel 73 for all berthing operations.

Anchorages: There are no safe anchorages for large vessels in the vicinity of Yabucoa. The designated waiting anchorage is off the island of Vieques, some 20 miles to the East of Yabucoa, where there is safe anchorage on the coastal bank. We anchored 1.5 miles South of Punta de Tierra, in approximate position Lat. 18° 04' N., Long. 65° 28' W. in a depth of about 24 fathoms. The vessel remained there in winds of up to Force 7, for 3 days without any problems. Some fishing buoys may be encountered within this area. BA. Charts are of insufficient scale, and it is recommended that Masters obtain the relevant U.S. charts for the area.

Max. Size: Our vessel is 97,000 d.w.t. and 253 m. long, and was berthed without undue difficulty, although space is very tight. The vessel immediately preceding us had been of 117,000 d.w.t., but with a part cargo. Oil Company states up to 45 ft. acceptable, but pilots not prepared to go above 43 ft. Our vessel was 41 ft. draft and had no difficulties, although only a little under-keel clearance.

Communications: Puerto Rico Sun Oil Co. has VHF in office, and usually listens on Channel 16 during office hours (Monday to Friday, 0800-1700). They are not easy to contact at lunchtime, and there is no watch kept during weekends or 'fiestas'. The radio is in the Marine Department Office near the jetty. They also have telex, (206) 345-3014. The Marine Department also provides Agent services if nominated. They were used by us on this occasion. Also see "Pilotage".

Tugs: According to the Pilot, two tugs are usually stationed here, and used for most vessels up to about 100,000 tons displacement. Over that size, at the pilot's discretion, a third tug is brought from a nearby port for berthing (we used 3 tugs). One tug is usually sufficient for sailing.

Berthing: Only one large vessel can berth at a time as there is only one jetty.

Vessels usually berth port side alongside. There are no mooring boats to handle lines, ropes are sent via messenger when vessel very near to the jetty. There is no shore gangway, means of access has to be provided by the vessel.

Medical: Doctors and small hospital available locally for ordinary illnesses. Anything serious is attended to in San Juan (which is 2 hours by road). It was not possible to get Cholera vaccinations updated, although if urgent these could be done in San Juan, but this would be very expensive due to distance.

Repatriation: No difficulties encountered. At time of our visit there was one direct flight weekly to and from U.K., and numerous daily flights from Europe and U.S.A. The airport is 2 hours by road from Yabucoa. Crew members being repatriated leave the vessel 4.5 hours before flight departure time in order to complete outward Immigration formalities before going to airport.

Shore Leave: Allowed – Form I–95 required.

Provisions: Obtainable from various Chandlers in San Juan, a delivery charge is made. As jetty very cluttered, it is necessary to carry all stores by hand up the gangway, therefore berth is not very suitable for major storing of large objects.

General: The port is privately maintained by Puerto Rico Sun Oil Co. Crude oil is the main import and various refined products are exported. There is also a barge jetty, and a facility for barges to load graphite from a Union Carbide plant.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".

Captain of the Port, Yabucoa. Tel: 893-2408.

Operator: Puerto Rico Sun Oil Co., P.O.Box 186, Yabucoa, P.R. 00767. *Tel:* 809-893-2073. *FAX:* 809-893-3895. *Contact:* John M. Shea, Refinery Manager.

Qatar

AL SHAHEEN TERMINAL: 26.35 N. 52.00 E.

(See Plan)

LOCATION: The Al Shaheen Terminal is located in Qatari National Waters, approximately 145 km. N.N.E. of the capital city of Doha, the centre is in position Lat. 26° 35' N., Long. 52° 00' E. The depth of water is approximately 62 m.

Facilities: Facilities consist of a STAR platform holding the wells, a jack-up platform equipped with a Production System and accommodation. 2 Single Point Mooring buoys are connected to the Production Platform by submarine pipelines.

A Floating Storage and Offloading (FSO) vessel is moored to SPM No. 2.

The Single Point Mooring Buoy No. 2 is anchored to 6 piles by 4 in. chains with a tested holding power of 300 tonnes. The mooring system consists of 2 braided nylon grommets with a minimum breaking load or 500 tonnes.

The FSO has a storage capacity of approximately 2.7 million barrels. The vessel is equipped for crude oil transfer to the receiving tanker in a tandem or side by side (STS) mode.

Crude oil is transferred from the production facility via the SPM to the FSO, utilising floating hoses from SPM to a bow-end flange on the port side of the FSO. The flange is equipped with a quick release coupling, and in addition the hoses with a breakaway coupling.

Facilities Positions:

STAR Platform AS-AA:	Lat. 26° 35' 36.07" N.,	Long. 52° 00' 00.98" E.
DMS Venture (Jack-up rig):	Lat. 26° 35' 26.70" N.,	Long. 51° 59' 59.14" E.
SPM 1:	Lat. 26° 35' 06.57" N.,	Long. 51° 59' 24.05" E.
SPM 2:	Lat. 26° 34' 36.08" N.,	Long. 52° 00' 07.04" E.

Area Description: The Al Shaheen Terminal is located close to major shipping lanes, as well as the Qatar Gas North Fields "A" (QGPC) and "B" (Qatargas) complex. Consequently, traffic conditions in the area can be busy.

Navigation Lights: Navigation lights, displaying the Morse character "U" (two short and one prolonged flash) every 15 seconds, are shown from the production installation and the SPMs. In addition, there is a fog signal on the production installation and the FSO. The FSO displays normal anchor lights whilst moored to the SPM.

DOCUMENTS:

Arrival:

Maritime Declaration of Health.
2 copies Crew List.
Last Port Clearance.
Cargo Manifest.
Crew Declaration.
Stores List.
MENAS Certificate.
Tovalop Certificate.
Arrival Form.
Notice of Readiness.
Dry Certificate (Last Port Ullage Report).

In addition, the following local forms will be presented to the Master for signature:

Request for Pilotage Form.
Receipt of Al Shaheen Terminal, General Information Booklet.

Departure:

Receipt of Samples.
Vessel Ullage Report.
Certificate of Origin and Authenticity.
Certificate of Quality & Quantity.
Cargo Manifest.
Bill of Lading.
Receipt for Cargo Documents.
Port Performance Sheet.
Port Clearance Certificate.
Cover letter for Discharge Certificate, with Certificate.
Customs Export Bill.
Port Time Sheet.
Disbursement Memo.

Bill of Lading Procedure: The Bill of Lading cargo figures will be entered by the Export Supervisor, who will then present the Bill for the Master's signature.

Customs and Immigration: A representative from the Qatar Authorities, present at the Al Shaheen Terminal onboard the FSO will clear vessels inwards and outwards.

PILOTAGE: *Pilot Station/Arrival Point:* Pilot station where the Pilot/Berthing Master will join the vessel is designated as: Lat. 26° 33' 00" N., Long. 52° 04' 00" E.

The pilot station is the Al Shaheen Terminal "Arrival Point".

Responsibility: The Pilot/Mooring Master is to be considered as an advisor to the Master, who remains solely responsible for the safety of his vessel. The Pilot/Mooring Master has the responsibility to decide whether conditions are suitable for mooring operations to commence. The Pilot/Mooring Master can request the Master of the export tanker to abandon the lifting operation and leave the safety zone. The Master will comply with this request promptly and without delay. The Pilot/Mooring Master will remain on board throughout the vessel's stay.

The decision to initiate, carry on with or abort the mooring operation, or to suspend the transer for safety reasons, remains with the Master.

Suitability (Vessel Vetting): By prior arrangement, the vessel will be suitable to load at the Terminal. Should, for any reason, the vessel be unsuitable or unsatisfactory following inspection by the Pilot/Mooring Master, then Maersk Oil Qatar AS reserve the right to reject the vessel, either totally or until such time as any defects are remedied.

Boarding: Once VHF communications have been clearly established, the arriving vessel will be advised whether the vessel is to anchor or berth on arrival, and the Pilot/Mooring Master, including assistant(s), surveyor(s) and relevant personnel, boarding time. Weather and current to allow for safe berthing.

Boarding Ladder: The Pilot/Mooring Master will board on export tanker's starboard side via the tug in a position approximately 5 miles E.S.E. of the FSO, normally using a pilot ladder and gangway combination, such that the climb on the pilot ladder is not more than 8 m.

The pilot ladder must be constructed and rigged to international standards with two manropes, well clear of obstructions and overboard discharges. A responsible Officer must be in attendance when personnel are embarking or disembarking.

Pilot Card: The Master shall prepare a "Pilot Card", showing the vessel's manoeuvring characteristics and any deficiencies or peculiarities, and hand this over prior to the mooring operation's briefing.

Signals: The correct international navigation signals must be displayed prior to and after the boarding of the Pilot/Mooring Master. Correct signals shall be used during the entire stay at Al Shaheen Terminal.

Pilot/Berthing Services Form: The Master shall sign the Pilot/Berthing Services Form prior to commencement of the mooring operation.

Notice of Readiness (NOR): NOR will be accepted by Maersk Oil Qatar – Al Shaheen Terminal only after completion of the Pilot/Berthing Master's inspection of the vessel's suitability and the satisfactory result of the inspection.

Weather/Current: The weather and current to be monitored and found acceptable by both Master of the vessel and the Pilot/Berthing Master prior to approaches.

The weather (wind/sea status/swell) and/or current are to be monitored continuously during the entire lifting. If any of said parameters endanger the operation, taking into account all installations and their positions within the area, use of utility vessels, etc., the operation is to be postponed until weather and/or current allow for safe working conditions.

Departure: Once operational paperwork and unmooring has been completed, the receiving tanker will be released from the Al Shaheen Terminal. It is recommended that the tanker clears the Al Shaheen Terminal in an Easterly to South Easterly direction at slow speed, before shaping course for the next destination.

ANCHORAGE: An anchorage area to the S.E. of the Al Shaheen Terminal is recommended for all vessels. The depth of water is 62 m., and the holding ground is good. The designated anchorage is a circular area of 1 nautical mile radius centred at Lat. 26° 33' 00" N., Long. 52° 04' 00" E.

RESTRICTIONS: Berthing and unberthing throughout 24 hours, weather permitting.

MAX. SIZE: 370,000 d.w.t.

RADIO/VHF: *Initial Messages:* Communication with the Al Shaheen Terminal can be initiated through Coast Radio Stations by telex, telegram or radiotelephone, or via Inmarsat. For details of telex, telephone and Satcom numbers, as well as available frequencies, see below. The first ETA advice, 7 days in advance, shall be by telex to Maersk Oil Qatar, Doha Office and copied to the FSO.

FSO/Al Shaheen Terminal Direct Communications: Once within VHF range, communications shall be established, firstly on Channel 16, then Channel 12 for the FSO, and Channel 69 for the Pilot/Mooring Master. The Mooring Master will advise any additional channels to monitor during operations, as well as berthing time or anchoring instructions.

Advance Notice of Arrival: ETA must be passed 7 days, 72 hours, 48 hours and 24 hours in advance. Vessels coming from another loading port in the Gulf should ask Agent to pass the ETA by fax or telex, if the vessel's Satcom system is not in use.

Approximately 14 days before but not later than upon receipt of advance notice of ETA (7 days) is received, a standard message will be sent in return, containing details of cargo and the expected quantity, ballast information, berthing prospects and the type of transfer planned. If there are any queries about this message, or the vessel cannot comply with any requirements, then the Master should contact Maersk Oil Qatar AS by telex or fax immediately.

Standard Arrival Message: See below.

Maersk Oil Qatar (MOQ): COMMUNICATIONS:
Between MOQ and Field:
Fax and R/T
1. Fax messages via microwave link.
2. R/T with Maersk Oil Qatar Doha Office on:
Tx 4125 kHz
Rx 4125 kHz

Note: Only manned during office hours (Saturday – Wednesday 0700-1530 hrs.).

Inter Field and between Working Parties:
VHF Channels: 12 and 69 (Production facilities, FSO and tug).
Between Terminal and Export Tanker:
Before Arrival:
By telex via Satcom system (Indian Ocean satellite) for standard message and initial ETA messages. Initial message to Maersk Oil Doha Office and copy to FSO.

Maersk Oil Doha: Telex: (+497) 4272 MSKQTR DH
Fax: +974 493444

FSO Control Room	Channel 69
FSO Deck Crew	Channel 69
Stand-by Vessel/Tug	Channel 69

STANDARD ARRIVAL MESSAGE

Date: . . . .
Lifting No: . . . .

From: Maersk Oil Qatar AS, Export Supervisor
To: Master of . . . .
Call Sign: . . . .
Inmarsat C Telex: . . . .
Inmarsat A Fax: . . . .
Text:

We confirm your vessel nominated to load approximately . . .U.S. barrels +/−5% Al Shaheen Crude Oil at Al Shaheen Terminal for discharge . . . .

Approximate loading temperature: . . . degrees F.
Approximate API gravity: . . . at 60 degrees F.
Berthing will be to FSO Terminal via Tandem or STS Mooring.
Maximum freeboard 21.5 m., trim optimum for manoeuvring. Propeller shall be submerged. Derricks rigged on port side. Pilot ladder/gangway/accommodation ladder on starboard side.
Contact Al Shaheen Terminal on VHF Channel 16 when within range.
Maersk Oil Qatar AS reserves the right to pass on all information given below to relevant entities.
Please acknowledge and advise or confirm the following within 24 hours of receipt:

AA: ETA at Al Shaheen Terminal (72/48/24 hours prior to arrival).
BB: Last port of call.
CC: Confirmation of ability to load nominated volume.
DD: Arrival and sailing draft.
EE: Maximum loading rate each manifold.
FF: Quantity and origin(s) of ballast water on board (if any).
GG: Quantity and origin(s) of ballast water to be discharged (if any).
HH: Quantity, origin(s) and location(s) where ballast water discharged since last port of call (if any).
II: Quantity of oil slop on board (if any).
JJ: Cargo gauging and vent system operational.
KK: Mechanical defects affecting manoeuvring.
LL: Early Departure Procedure acceptable.
MM: Party responsible for appointing Agent.
NN: Additional requirements.

MOQ Telex: 4272 MSKQTR DH
Regards.

Doha Radio: Call sign A7D.
Transmitter site: Lat. 25° 42′ N., Long. 51° 35′ E.
Receiver site: Lat. 25° 21′ N., Long. 51° 32′ E.

The station keeps continuous watch on 500 kHz, 2182 kHz and VHF Channel 16.

GENERAL INFORMATION:

Maritime Telecommunications:

Station Name: Radio Maritime Coast Station (Doha Radio).
Station Call Sign: A7D, working daily 24 hours.
Area Coverages: VHF – Territorial Waters.
MF – The Gulf.
HF – Red Sea, Mediterranean, Europe, Atlantic Ocean, Africa Coasts, Far East, North Australia and North-West Pacific.
Services: RTG, RTF-2, RTX-1, METEO, OBS, AVUR, SLT (Radiotelegraphy, Radiotelephony, Radiotelex, TX. Weather Reports, Accepts Radiotelegrams on Weather Observations, TX. Urgent Warnings to Navigators, Radiomaritime Letters).
Emission: A1A, A2A, H2B, F1B, H3E, J3E, F3E.
Frequency Bands: Medium, High and Very High Frequency.
Local Time: GMT plus 3 hours.
Station Capability: Receiving – 9 Operating Consoles.
Transmitting – HF Maximum Power 5 kW.
– MF Maximum Power 2 kW and 1 kW.
Station Telephone No.: 864444 Local, Country Code (+974) International.
Station Telex No.: 5061, 5062 DOHRAD Local, C.C. (497) International.
Owner and Accounts: Qatar Public Telecommunications Corporation (Q-Tel), P.O.Box 217, Doha, Qatar.

RADIO TELEPHONY:

Frequency Bands: MF, HF, VHF.
Calls through the Coast Station are accepted for Qatar and for on passing to the rest of the world via one of the 3 Satellite Earth Stations operating in Qatar besides the other Advanced Retransmission Networks.

1. MF (Medium Frequency):

Calling and Distress: 2182 kHz (24 Hours Watch Keeping).
Working Frequency: 2768 kHz (Normal – 24 Hours).
Traffic Lists: 0433, 0833, 1233, 1633 (UTC).
Weather Forecasts: 0503, 1003, 1233, 1633 (UTC).
Navigation Warnings: On receipt, at end of next silence period and at 0433, 0833, 1233, 1633 (UTC).

Other Working Frequencies: 2601, 3673 kHz.

			Aft Peak		1,274

Mooring/Unmooring: *System Description:* The primary method of mooring will be for the receiving tanker to secure to the stern of the FSO. On occasions, it may be necessary to use a side-by-side transfer. Such operation will follow industry standard procedure (OCIMF "Ship-to-Ship Transfer Guide").

The receiving tanker mooring system consists of one braided nylon grommet with a minimum breaking load of 250 tonnes, connected to the stern of the FSO in a quick release system. Connection at the receiving tanker, which must have tongued or hinged bar chain stoppers for 76 mm. (3 in.) chain.

The export connection between the FSO and the receiving tanker is via a 20 in. floating hose streamed from the stern of the FSO, which terminates in 1×16 in. tail. The receiving tanker ends are fitted with a butterfly valve and a Camlock quick connecting coupling and a breakaway coupling.

Preparations: The mooring system is designed to comply with the OCIMF Standards, and only tankers that are fully equipped to this standard will be allowed to berth in tandem at the Al Shaheen Terminal.

Additional mooring and hose connecting equipment will be brought to the receiving tanker by the Pilot/Mooring Master. Ship's crew will lift this equipment on board using the manifold derrick or crane.

Vessel's anchors must be stowed and secured in the hawse pipe, prior to final approach.

The Pilot/Mooring Master will brief the Master and ship's Officers on the mooring operation to be carried out. Emergency signals in the event of radio failure will be agreed upon at this time and contingency planning discussed.

Sufficient crew must be available for both mooring and hose handling. Rope messengers and heaving lines shall be made ready.

Maximum Freeboard, Trim, Deadweight and Draft: The vessel shall be upright and at an optimum trim for manoeuvring. The propeller shall be submerged. The maximum freeboard permissible at Al Shaheen Terminal is 21.5 m. As such, there is no limitation on draft as water depth is 62 m. However, if vessel should exceed 370,000 d.w.t., additional vetting may be done to ensure safe operation.

Engine Test: Before making the final approach to the FSO, the ability of the receiving tanker's engines to manoeuvre astern must be verified by the Pilot/Mooring Master.

Mooring: The approach to the FSO will be made at slow speed as nearly as possible on a constant heading from a distance of one mile inwards. Good communications between bridge and forecastle are essential. The Pilot/Mooring Master will advise on current strength and direction to be expected.

On approaching the FSO rope, messengers will be passed to the Standby Tug, who will connect the messenger line to the pick-up line. This pick-up line is connected to the chafe chain.

The pick-up line is heaved on board and connected to the tanker's delegated drum. The messenger line(s) and the pick-up line are then heaved up until the chafe chain is in position in the stopper. The chain is then secured in the stopper.

The messenger line is 1.5 in. × 80 m. and the pick-up line 3 in. × 150 m.

Stand-By Tug: The stand-by tug is equipped with towing hook, anchor handling winch, and firefighting equipment.

Immobilisation: Immobilisation of machinery, such as main engines, steering gear, deck machinery, power sources or any essential equipment, is not permitted whilst the vessel is moored at Al Shaheen Terminal or during ship-to-ship transfer.

In the event of a blackout, other than momentary loss of power, then the transfer of crude oil shall be stopped, and the Pilot/Mooring Master informed immediately. If the blackout condition persists, then consideration will have to be given to moving the vessel off.

Safe Distance: Once tandem mooring operations have been completed, a close watch must be kept to see that both tankers maintain their safe distance apart. Any apparent closing of the distance must be advised to the Mooring Master immediately. A watchman shall be permanently on the forecastle whilst the vessel is in tandem mooring.

The stand-by tug may be used to hold the tankers in position. The tug will be secured using tanker's lines, or soft line tail onto a towing wire.

Unmooring: Unmooring will be carried out once the hoses have been pulled clear and secured by the standby tug.

The pick-up rope and the messenger line shall be lowered to the surface where it will be pulled clear by the tug. Once the line has been let go and is clear, the vessel can be manoeuvred clear of the FSO.

Once clear, the vessel will either proceed to anchor or hold position in the anchor area for completion of departure formalities, or if those formalities are complete, she will disembark the Pilot/Mooring Master at an agreed position, and take departure.

LOADING: Hose Handling:

General: Tanker manifolds must comply with OCIMF Standards for oil tanker manifolds and associated equipment.

Hoses will be connected, normally on the port side, by the ship's crew. The Pilot/Mooring Master and/or his assistant will give guidance as required.

Connection: The tanker rail hose 16 in. reducers must be fitted before mooring operations commence.

Derricks/Cranes: The minimum required capacity of hose handling derricks or cranes is 15 tonnes. Once connected, the weight of the hose will be taken by hanging a webbing strop from the derrick running wire or crane to the hose. The hose will be prepared for quick release.

Disconnection: When the hoses are disconnected, any spillage shall be collected in the drip pans, and the hose shall be blanked. The pick-up buoys and lines shall be resecured and the hoses lowered to the water.

Loading: *Loading Plan:* The Standard message will indicate the quantity to be loaded.

The Master of the export tanker shall prepare a loading plan for the intended cargo. This will show the estimated final tank figures as well as the loading rotation with expected trim and draft calculations. Any proposed ballasting operations shall be indicated with this plan. Handling of segregated ballast only.

Rates: The export tanker will be informed of the expected loading rates and the minimum rates that can be used for topping-off, as well as the notice required for reductions and stopping. The FSO is capable of discharging approximately 50,000 bbl./hr. through 1×20 in. line and 1×16 in. hose.

Emergency Shut Down: The emergency shut-down procedure shall be clearly established and made known to the relevant personnel.

Inert Gas: The inert gas system must be operational throughout the operation, and tanks shall be inerted according to normal tanker practice.

Check Lists: The Ship/Shore or Ship-to-Ship Check List(s) will be completed prior to the transfer.

Hose Handling Equipment: Hose strings must be properly suspended throughout the transfer.

Drip Trays, etc.: Drip trays must be positoned under flanges where appropriate, plugs fitted to permanent catchment trays, if necessary. All drip trays must be clean and dry at the commencement of the transfer.

Transfer – General: The transfer will begin at a slow rate to enable the receiving system to verify that all systems are lined up properly. The hoses and connections will be checked for leaks and the rate will be increased, in steps as mutually agreed, until the full flow rate is achieved. The agreed loading plan will then be followed. If it becomes necessary to divert from the plan, then the Pilot/Mooring Master must be informed.

Hose Monitoring: Throughout the transfer, hoses and connections must be monitored to ensure there are no leaks or chafing damage. All leakages or spillages must be reported to the officer-in-charge immediately. The emergency shut-down procedure must be initiated if the leakage is severe.

Venting: Where venting arrangements are open to atmosphere, this is restricted to the use of masts and/or risers only.

Stability and Stress Calculations: Calculations to ensure that the vessel is always in a stable condition, and that bending moments and sheer forces are within acceptable limits, shall be made prior to, during and upon completion of loading.

List and Trim: Where possible, listing and excessive trim should be avoided throughout the transfer. Completion must result in the export tanker being upright and, as nearly as possible, even-keel.

Topping-Off: The export tanker will advise when "topping-off" and give sufficient notice for reduction of the loading rate. Tanks that are completed shall have the master valve closed to provide two valve separation from tanks being loaded. Ullages must be periodically checked to ensure there is no leakage which could lead to an overflow.

The number of valves to be closed during "topping-off" must be reduced to a minimum.

The export tanker must never close all its valves against the flow of oil.

Completion: Sufficient ullage in the final tank(s) must be left to enable the pumps to be stopped in a controlled manner, and for line contents to be drained into those tanks if necessary.

Once the system is confirmed as closed, the Mooring Master and the Independent Surveyor will witness ullaging and sampling and the cargo calculations.

After completion of loading and ullaging, a responsible Officer will ensure that all cargo system valves are closed, all appropriate tank openings are closed and pressure/relief valves are set correctly.

Ballast Handling: Any ballast discharged overboard must be clean, and only segregated ballast. There are no reception facilities for dirty ballast.

Concurrent Operations: Ballasting operations during the transfer will be carried out to avoid excessive trim or freeboard changes. However, unless adequate separation of cargo and ballast lines exists, a minimum of two valve isolation is required. Ballasting or deballasting shall not be carried out while cargo is being transferred.

Ballast Plan: Ballasting/deballasting operations must be carried out according to the loading plan. The independent Surveyor and Pilot/Mooring Master must be made aware of the plan.

Completion of Ballasting: Upon completion of ballast operations, lines and pumps must be drained of water and all sea valves tightly shut, checked and sealed. Pilot/Mooring Master is to be advised of the quantity and origin.

Cargo Quantities: *Ullaging:* On commencement and completion of loading, the export tanker must ullage all tanks in the presence of the independent Surveyor(s), who will previously have checked the "shore" figure onboard the FSO. The Master of the export tanker must then prepare the Al Shaheen Ullage Report in conjunction with the Surveyor(s).

Cargo Samples: Representative sample(s) of the exported crude, witnessed and sealed by the independent Surveyor(s) will be handed to the FSO and export tanker. These sample(s) will be clearly marked and labelled.

Previously Loaded Cargo: Ullages of previously loaded cargo must be recorded before and after loading at Al Shaheen Terminal to ensure no contamination.

MEDICAL: There are limited medical facilities at Al Shaheen Terminal.

In emergencies, arrangements can be made for a doctor to be flown out from, or for a patient to be flown to, Doha. All costs involved will be charged to the vessel concerned.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: The following countries maintain Embassies in Qatar:

REPAIRS: No facilities.

REPATRIATION: At the present time it is not possible to arrange crew changes through Al Shaheen Terminal.

TIME: The local time in Qatar is Universal Co-ordinated Time (UTC) plus 3 hours. There is no daylight saving time.

SHORE LEAVE: Not permitted.

SAFETY: *Standards:* Vessels must at all times comply with safety regulations as detailed in the International Safety Guide for Oil Tankers and Terminals, Maersk Oil Qatar Marine Procedures and their Owner's Ship Management procedures.

Check Lists: The vessel's Safety Operation Check List must be completed prior to the commencement of loading, and particulars should be verified at intervals during the transfer. The Pilot/Mooring Master and the Master, or his appointed deputy, will carry out the checks.

Responsibility: Responsibility for safe conduct of operations on board rests with the Master. It is expected that the safety practices and requirements of the various international Agencies be complied with strictly during all operations at Al Shaheen Terminal. If any infringement of these practices is observed that cannot immediately be rectified, the Pilot/Mooring Master must be informed immediately.

Maersk Oil Qatar AS reserved the right, in the event of any continued or blatant disregard of these various safety requirements by any ship, to stop all operations and order that vessel to leave the moorings and Safety Zone for appropriate action to be taken by the Charterers or Operators concerned.

Hydrogen Sulphide: Al Shaheen Crude contains H_2S in medium to high concentrations. The Pilot/Mooring Master will advise if any particularly high concentrations have been detected. All necessary precautions must be taken to avoid exposure.

Fire Wires: Emergency towing wires must be rigged on the side opposite the loading manifold. The eyes must be maintained just above the waterline, ready for immediate pick-up by a tug or supply vessel, and at least 50 m. of slack must be allowed. Vessels fitted with emergency towing arrangements aft must have this system ready for immediate use.

Emergencies: In case of emergency on board the export tanker, the Pilot/Mooring Master must be informed immediately. He will act as the communications focal point in the initial stages and, with the Maersk Oil Production Supervisor, co-ordinate any assistance required. In the event of fire, the emergency shut-down system(s) must be activated immediately.

Anti-Pollution: All standard precautions to prevent pollution of the sea must be taken. Any incidents must be reported to the Pilot/Mooring Master, who will co-ordinate the response as appropriate.

Seepages or minor spills on deck shall be cleaned up promptly.

GENERAL: *Safety Zone and Prohibited Areas:* A safety zone extends 1,000 m. from the centre position. All vessels intending to approach the Al Shaheen Terminal should obtain permission from the Maersk Oil Production Supervisor before entering this safety zone, unless they have a Maersk representative onboard, i.e. Berthing Master.

Navigational and Meteorological Warnings: Area navigation warnings and information are broadcast by local Coast Radio Stations and via the GMDSS network.

Meteorological information is broadcast by Coast Radio Stations at scheduled times. In addition, a continuous broadcast in English and Arabic on VHF Channel 72 for Qatari coastal waters is made by Doha Radio, giving short term forecasts and general synopsis.

Flag: The Qatar national flag must be flown during daylight hours at Al Shaheen Terminal.

Alcohol Restrictions: The consumption of, or trading in, liquor or other alcoholic beverages is strictly prohibited at Al Shaheen Terminal.

Drug Policy: The use or trafficking in drugs and other harmful substances is strictly prohibited in Qatar. Any proven or suspected cases of narcotic abuse or trafficking will be reported to the Authorities.

Mail: Mail will be accepted for forwarding via the Qatar National Postal Service.

Agency: Maersk Oil Qatar will act as vessel's Agent. The representative on site will be the Export Supervisor.

Agent's address: c/o Tanker Agency Department, Maersk Oil Qatar AS, P.O. Box 22050, Doha, Qatar. Tel: 974-493493. Fax: 974–493444. Telex: 4272.

OPERATOR: Maersk Oil Qatar AS, P.O. Box 22050, Doha, Qatar. *Tel:* 974-493493. *Telex:* (497) 4272 MSKQTR DH. *FAX:* 974–493444. *Contact:* John Erenskjold, Marine Manager.

DOHA: 25.17 N. 51.32 E. (See Plan)

DOCUMENTS:

8 copies of the Unfreighted Manifest.
2 copies of the Freighted Manifest.
2 copies of the Hatch List.
2 copies of the Stowage Plan.
2 copies of the Dangerous/Hazardous Cargo List.
1 set of Bill of Lading.
1 copy of Crew List.
A list of Food Stuff.
A list of Insecticides and any Poisonous Cargo.

Agents:

1 copy of the Arrival Report (Supplied by the Agent on boarding).
1 copy of the Crew List.
1 copy of the International Declaration of Health.
1 copy of the Passenger List (if applicable).

Port Health:

1 copy of Crew List.
1 copy of Dates and Types of Inoculations.
1 copy of the International Declaration of Health.

Immigration:

4 copies of Crew List.
4 copies of Lists of Passengers Landing (if applicable).

Customs:

Bonded Store List (Bond will be sealed but issues are available).
Port Clearance Certificate should be procured before the vessel sails.

PILOTAGE: Compulsory pilotage for all vessels of 14 ft. draft or more. Naval vessels exempted. Application for a Pilot should be made to the "Doha Port Control" through VHF (Channel 16 and 14) or Tel: 434377, 24 hours prior to the arrival of the vessel at the Pilot Station (via Doha Radio or via Doha Agents).

Pilot station keeps a VHF watch 24 hours a day on Channels 16 and 14. Call sign Doha Port. Similar watch kept on R/T 2182 kHz.

Pilot boat proceeds to the vicinity of the Doha Light Vessel, position Lat. 25° 16' 08" N., Long. 51° 41' 05" E. when the Pilot is required. Pilot launches are painted white. When the vessel is underway the Pilot requires a pilot ladder complete with manropes as per SOLAS Regulations.

ANCHORAGES: Near the Doha Light Vessel and S.E. from it only. Minimum depth of water 5 fathoms.

RESTRICTIONS: Depth of water in entrance is 8.0 m. plus tide and the minimum depth of water required under the keel for manoeuvring in the channel is 3 ft.

Car carriers and livestock carriers transit from sunrise to sunset only.

MAX. SIZE: Max. length 600 ft., up to 625 ft. by special permission from Harbour Master. Max. breadth 90 ft. Max. draft 8.3 m. on high tide.

HEALTH: The International Flag signals for Pratique must be flown and remain up until the vessel is cleared by the Port Health Authorities. A Port Health Official will board the vessel in the anchorage or at the Deep Water Jetty when the vessel is alongside. There is no Automatic or Radio Pratique available.

RADIO: ETA and Agent's messages should be routed through Doha Radio. Doha Radio A7D, continuous watch on W/T 500 kHz., R/T 2182 and VHF Channel 16. Radio-telephone communications through Doha Port signal station. Calling and listening 2182 kHz. Working frequencies, 2638 kHz, 2738 kHz, 2570 kHz.

TUGS: 5 Government tugs are normally available to assist in berthing operations.

BERTHING:

Berth No.	*Length* (m.)	*Minimum Depth* (m.)
1	181	8.5
2	181	8.3
3	181	8.1
4	181	7.7
5	200	8.5
6	215	7.4
7	190	7.3
8	190	7.3
9	180	7.3

Equipment: 2×70 ton, 4×40 ton, 3×30 ton, 3×20 ton cranes, 2 straddle carriers, 2 container cranes and 122 trailers.

Transit storage areas at landward end of approach causeway with extensive paved open storage and transit sheds giving 16,722 sq.m. cover.

New transit storage area on extended main quay with extensive paved open storage, 5 transit sheds giving 30,000 sq.m. cover completed. Construction of 500 ton cold storage completed. Control tower for Doha Port is under construction.

Normally berthing and unberthing to and from the deep water jetty is with certain reservations:

(a) Draft and trim of vessel.
(b) Height of tide.
(c) Visibility from Navigation Bridge.
(d) Prevailing weather conditions.

The duty Pilot has the option to berth or unberth a vessel at his discretion after consultation with the Senior Pilot, when the above mentioned conditions are unfavourable.

STEVEDORES: ETA advice is required on the number of gangs workable. Advance notice is required for any heavy lifts (say in excess of 10 tons) and the consignee's name if possible as special arrangements have to be made for handling. Average discharge rate is 75 tons per hook per day.

MEDICAL: Unless an emergency no advance notice is required. Hospital facilities do exist and a doctor will visit on request. Current Vaccination and Cholera Certificates are required.

DENSITY: The density of the water is salt (1025) at all states of the tide.

FRESH WATER: Fresh water is available at the anchorage and when alongside the jetty and is supplied by tankers.

FUEL: Bunkers available from Qatar National Tanker and Bunker, Doha.

Actual Bunkering Locations:

Doha Port Harbour
Pilot Station Doha
Umm Said Harbour
Pilot Station Umm Said
Inner Anchorage
Outer Anchorage
Pilot Station – Halul Island

Grades Available: Gas Oil and Marine Gas Oil with 14 days' pre-notice, upon request.

Supply Method:
By tank trucks at berth and by tugs at anchorage.

Operation: 24 hours per day – 7 days per week.

CONSULS: The following countries maintain embassies in Qatar:

Bangladesh
Egypt
France
Gabon
Germany
Great Britain
India
Iran
Iraq
Japan
Jordan
Korea
Kuwait
Lebanon
Libya
Mauritania
Morocco
Oman
Pakistan
Saudi Arabia
Somalia
Sudan
Syria
Tunisia
U.S.A.
Yemen

REPAIRS/DRY DOCKS: All kinds of repairs can be carried out. Metal-locking, bottom brushing and underwater welding. Floating dock 105 m.×19 m.×6 m. Capacity 10,000 d.w.t.

GANGWAY/DECK WATCHMEN: The Public Security Department (Police) post a guard at each gangway, but it is advisable that the ship also supplies a watchman. Before landing *every* crew member must lodge his Passport or Seamen's Identity Card with the guard when alongside the jetty and at the dock Police Station when at the anchorage.

OPENING/CLOSING HATCHES: This work may be carried out by crew or stevedores, but usually by the latter.

CUSTOMS ALLOWANCES: Qatar is "dry" and no official allowance is made. The bond is sealed on the ship's arrival.

CARGO GEAR: No additional requirements apart from those required by International Law.

REPATRIATION: Crew changes can be carried out. The Agents will need to know the names, Discharge Book or Passport numbers and necessary information of dates, etc. well in advance for the Authorities. Repatriation is normally by air. Crew joining must have Seaman's Book.

AIRPORT: It is about 3 miles from the port to the airport. There are regular flights to Europe, U.K. and India by British Airways, M.E.A., Air India, P.I.A., Gulf Air, etc.

TIME: The standard time in Qatar is GMT plus 3 hours.

HOLIDAYS: The holidays in Qatar are usually religious and therefore fall on movable dates. As far as shipping is concerned there are only 2 days when work is not possible under any circumstances, Idd Al Fitr and Idd Al Adna.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: Telephone available at the new jetty. No.414865.

SHORE LEAVE: Shore leave is permitted after the Immigration Authorities have cleared the ship and given permission, in writing, on the Crew List. Seamens' documents or Passports must be deposited with the police at the gangway and retrieved on returning aboard.

GARBAGE DISPOSAL: Service available through the Agents (QNNTC).

WASTE OIL DISPOSAL: Facilities not available.

SEAMAN'S CLUBS: None.

CURRENCY: Qatar Riyals.

IDENTIFICATION CARDS: Discharge Books or Passports are required to be handed to the Police before any crew member may proceed ashore. See "Shipmaster's Report".

GENERAL: Particular attention must be paid to:

(1)The Qatari flag must be flown at all times at the fore mast.

(2) Liquor is not allowed ashore and it is a serious offence to offer alcohol to a Qatari.

(3) Smoking is not permitted in any of the port areas.

DEVELOPMENTS: Construction of Container Berth and Flour Mill Berth are in progress in the harbour.

Inner and outer channel will be dredged soon after completion of same. All approaching vessels will be warned through their Agents.

SHIPMASTER'S REPORT: November 1984.

The Public Security Department warned me that the crew are not allowed to take a walk around the jetty when it is a holiday or the stevedores are not working.

Therefore, the crew must go directly outside the harbour limits or they stay on board.

The Security Department did not post a guard at the gangway but every crew member before landing must present his Passport or Seamen's Identity Book to the Immigration and they issue a shore permit that will be shown to the guard together with the Seamen's Identity Book.

The guard will keep the Seamen's Identity Book and the crew can cross to the Harbour Gate with the Shore Permit.

When the crew come back to the ship they collect their Seaman's Identity Books at the Gate but can keep the Shore Permit for the next time they go ashore.

Before the ship sails all the issued shore permits must be returned to Immigration.

AUTHORITY: Department of Ports, Ministry of Communications & Transport, P.O.Box 313, Doha, Qatar. *Tel:* PABX 457457. *Telex:* 4372 Mawani DH. *Cables:* "Mawani". *FAX:* 413563. *Contact:* The Harbour Master, Tel: 438586. Fax: 413994. G.A.Genkeer, Director of Ports. Captain Ahmed Al Mas, Head of Harbour Affairs.

AGENT: Qatar National Navigation & Transport Co. Ltd., P.O.Box – 153, Doha. Telex: 4206 Melaha Dh. Cable: "Navigation" Doha. Tel: 321175/9, 23684, 21213.

HALUL ISLAND: 25.40 N. 52.25 E.

Halul Terminal S.B.M. **(See Plan)**

LOCATION: Halul Island (Position Lat. 25° 40.3' N., Long. 52° 24.6' E.) is part of the State of Qatar. Doha, the capital, is situated on the Eastern side of the country.

Halul Island is 52 miles in a N.E'ly direction from Doha. It serves as the export terminal for Qatar Marine Crude which is produced from the offshore oilfields of Idd El-Shargi, Maydan Mahzam, and Bul Hanine. The Halul Terminal is operated by Qatar General Petroleum Corporation.

Halul Island: The island is roughly circular in shape with a radius of approximately 0.5 miles. The island is hilly, rising to an elevation of 202 ft. (61.6 m.). (Charts: U.S. Government Charts: 62400, 62397, 62402, British Admiralty Charts: 2886, 3413, 3950, 3953).

The island is fringed by a reef which in places extends about 3 cables offshore.

The island is barren, with a number of oil storage tanks, a small industrial complex and personnel living quarters. There is a harbour on the Southern side of the island which is only for use of small craft.

DOCUMENTS: Following papers are required on arrival:

Notice of Readiness.
2 Crew Lists.
2 Health Declarations.
1 Valid Tovalop Certificate.
1 Arrival Report.
1 Request for Pilotage and Berthing Assistance.
1 Latest Light Dues Certificate.
1 copy Ship and Shore Cargo Figures and Experience Factor details for previous 10 loadings.

The Berthing Officer acts as ship's Agent and on behalf of National Customs and Immigration Authorities.

PILOTAGE: A Pilot is at all times to be considered as an advisor to the Master. The latter shall remain solely responsible for the safety of his vessel. The Pilot will remain on board throughout the vessel's stay at Halul.

Boarding: When VHF contact is made with Halul Radio, the Pilot will advise the Master whether he should proceed to anchor or whether a Pilot will board the vessel on arrival.

A Pilot will board the vessel about 2 miles East of Halul Island. The vessel is expected to make (if necessary) a good lee for the pilot launch.

Ship Deficiencies: The Master should inform the Pilot of any deficiencies on his vessel and any unusual characteristics pertaining to his vessel e.g. lack of astern power, time to change from ahead to astern, etc.

Pilot Signals: The vessel must display the proper signals prior to and subsequent to the boarding of a Pilot.

Pilot Ladder: The vessel shall rig on the starboard side, a pilot ladder which must conform in construction to all recognised international standards for pilot ladders. On vessels over 50,000 d.w.t., a combination of pilot ladder and accommodation ladder shall be rigged.

In the latter case the Pilot must not be expected to climb more than 9 m. on the pilot ladder.

There must be provision for the Pilot to pass safely from the head of the ladder to the deck of the ship.

Any such pilot ladder must be rigged well clear of all overboard discharges. 2 manropes are to be fitted, one on each side of the ladder, together with a safety line if conditions warrant such. At night both the ladder and the point of access must be properly illuminated.

A responsible officer must be in attendance when shore personnel are boarding/disembarking.

Note: To prevent unauthorised persons from boarding the tanker unobserved, particularly at night, the pilot/accommodation ladder must be retrieved after the Pilot and his assistant have boarded.

NAVIGATION: A light is exhibited at an elevation of 220 ft. (67.1 m.) from a white concrete tower with a black top, 16 ft. (4.9 m.) in height, situated on the summit of Jazirat Halul. Light characteristic is Fl.W.R. 12 secs. W 19M R 9M. Sectors W 030° – 300° (270°) and R 300° – 030° (90°) over pipeline area. On the Western and Eastern arms of the small boat harbour there are floodlights illuminating the breakwaters. There are various radio masts with red lights, the highest being 365 ft. above sea level. On each of the SBM loading points there is a white light morse "U" every 20 secs.

A hose marker light, flash white every 5 seconds, is located 150 ft. from the hose ends at each SBM.

Deepwater Channel: To the East of Halul there are 2 buoys marking a deepwater channel which is the recommended departure channel for all vessels.

H-1 Green conical – Quick flash green.
H-2 Red – Quick flash red.

Prohibited Navigation: The offshore oilfields are prohibited for navigation because of the numerous production stations, drilling rigs, wellhead jackets and oil and gas pipelines.

The location of the 3 oilfields are:

1. Idd El-Shargi with centre Lat. 25° 28.9' N., Long. 52° 22.6' E., radius 2 miles.
2. Maydan Mahzam with centre Lat. 25° 36.0' N., Long. 52° 33.1' E., radius 2 miles.
3. Bul Hanine with centre Lat. 25° 25.5' N., Long. 52° 44.0' E., radius 5 miles.

Navigational Warning: Masters should be aware, when crossing any pipeline, that many pipelines are not under the seabed and that the charted water depth may be reduced by at least 2 m.

It is strongly recommended that vessels do not pass South of Halul when making passage to/from Umm Said or Doha.

Also see "Radio – Halul Terminal Standard Cable" re-subsea wellhead.

ANCHORAGES: Vessels are advised, unless restricted by draft, to anchor in an area centred on a position from Halul Island Light 082° × 2.5 miles with radius 6 cables. Water depth is 70 ft. – 80 ft. and the bottom is sand.

Prohibited Anchorage: The area covered by the red sector of the Halul Island Light is to be taken as a prohibited anchorage. This is due to the number of oil pipelines within this area.

MAX. SIZE: SBM No. 1 up to 22 m. draft. (In certain conditions of weather and tide a maximum draft of 25 m. can be accepted). SBM No. 2 up to 29 m. draft. Displacement limit of 640,000 tons (550,000 d.w.t.) for both SBMs.

HEALTH: See "Medical".

RADIO: *General:* QGPC has its own radio station in Doha call sign Alpha Seven Delta (A7D). Cable address: Qatoff Doha (attn. PDP). Telex: Qatoff 4201 DH (Attn. PDP).

A sub-station is also maintained on Halul Island (call sign "Halul Radio").

A7D maintains 24 hour watch on 500 kHz, 2182 kHz and VHF Channel 16, while Halul Radio maintains a continuous radio watch on VHF Channels 6 and 16.

Vessels bound for Halul should contact "Halul Radio" approximately 6 hours prior to arrival on VHF Channel 16 or 6, or as soon as VHF contact can be established.

Long distance communication (initial ETAs, etc.) will normally be routed via Doha Radio (A7D).

Advance Notice of Arrival: A vessel must advise:

(a) Its ETA at Halul at least 72 hours before arrival.
(b) Confirmation of any amendment to its ETA at Halul 24 hours before arrival at Halul.
(c) On arrival at Halul, the exact time of arrival at Halul.

Note: Any failure to observe the laid down sequence of ETA advice may delay the loading of the vessel.

Ships Loading at Other Gulf Ports: Masters are advised that when they commence loading at the last port before Halul they should instruct their Agent to send a corrected ETA for Halul to QGPC.

Standard Cable: On receipt of the 72 hours ETA advice QGPC will transmit via Doha Radio a standard cable containing details of cargo, quantities, etc. (See below.)

If any vessel has any queries with regards to this cable or if the vessel cannot comply with the requirements of the cable the Master should contact QGPC immediately.

Halul Terminal Standard Cable:

To Master ....

We confirm your vessel nominated to load approximately ....bbls., Qatar Marine Crude at Halul Terminal for discharge .... approximate load temperature .... degree F ..... API gravity.

Depending on availability/draft/loading rate and prevailing weather conditions, vessel will berth at either SBM-1 or SBM-2 which are located 2.3 and 3.4 miles respectively S.E. from Halul Lighthouse.

Vessel arriving in ballast or light part loaded condition should ensure draft/trim/freeboard adequate for safe manoeuvring. The minimum acceptable draft being propeller fully immersed and recommended trim not exceeding 10 ft. by the stern, consistent with a maximum acceptable freeboard forward (Panama Lead to waterline) not exceeding 70 ft. (21.3 m.) Freeboard constraint mandatory for berthing and at all times while vessel moored to the SBM. Terminal will provide 2 SBM mooring lines. Please prepare 2 empty winch spooling drums forward and have 2 good messenger ropes ready to connect to the SBM mooring pick-up ropes. The use of winch drum ends is not permitted.

Starboard side derrick/crane, minimum SWL 10 tons should be rigged ready and starboard manifold prepared with reducers to connect 2×16 in. hoses.

Ship crew are required to moor vessel and connect hoses with guidance from our operations assistant. When proceeding towards berth, both anchors must be fully secured in the hawse pipe. Pilot will board 2 miles East of Halul. Pilot ladder and/or accommodation ladder should be rigged ready on the starboard side, and a good lee made when Pilot boards and mooring equipment lifted on board.

Please contact Halul Control/Halul Radio on VHF Channel 6 soonest for final instructions and berthing prospects.

Unmarked sub-sea wellheads are located at Lat. 25° 41.6' N., Long. 52° 25.9' E. and Lat. 25° 41.1' N., Long. 52° 25.7' E., respectively 7.0 m. and 4.0 m. above sea bed. The location is unmarked and vessels should navigate with caution accordingly.

Please acknowledge receipt and advise/confirm the following:

AA Present ETA Halul.
BB Arrival and sailing draft.
CC Maximum available loading rate long tons/hour.
DD Derrick/crane SWL.
EE That all ballast clean, deballasting time and if concurrent loading possible at either full or reduced rate.
FF Type and number bow mooring chain stoppers fitted.
GG That original and valid Tovalop Certificate on board with expiry date.
HH That vessel equipped with IGS, system fully operational and cargo tanks properly inerted.
II Cargo tank gauging and closed loading vent system fully operational.
JJ Any navigation aid or machinery defects that affects the vessel's ability to navigate or manoeuvre safely.

QATOFF Doha

Doha Radio (A7D):

Department of Telecommunications,
P. O. Box 648,
Doha,
State of Qatar.
Tel: 864444/864032.
Telex: 5061/2 DH.

Doha Radio keeps continuous watch on 500 kHz, 2182 kHz and VHF Channel 16.

HF telegraphy service:

A1A FREQ	QSX
8473 kHz	H24 C 5,6,15,16
12966 kHz	04-18 UTC C 5,6,15,16
16880 kHz	04-18 UTC C 5,6,15,16

Traffic lists at 0400, 0800, 1200, 2000, 2400 hrs. UTC on 484 kHz after announcement on 500 kHz, 8473 kHz, 12966 kHz and 16880 kHz.

MF telegraphy service:
Calling 500 kHz (H24).
Working 484 kHz.

MF telephone service:
Calling 2182 kHz (H24).
Working 2768 kHz/2049 kHz.

Use A7D for quick and reliable ship to shore and air to ground radio communications.

Ship's Radio Officers take notice: When in Doha or Umm Said you are always welcome to visit us. Just give us a call on MF/HF/VHF or telephone Doha 864646 and we will pick you up.

VHF: A Company VHF station on Halul Island, call sign "Halul Radio" maintains a continuous watch on Channels 16 and 6 (Channel 6 being the working frequency). The station has a range of approximately 50 miles and incoming tankers should establish communications withthis station when within range.

Ship to shore communication during loading is by portable VHF Radio telephone with emergency shutdown system, provided by the terminal.

TUGS: Not available.

BERTHING: Approach is from the open sea, passing to the Eastwards of Halul. There are 2 single buoy moorings. No. 1 SBM in position Lat. 25° 38.7' N., Long. 52° 26.4' E. This berth will primarily accommodate vessels up to 640,000 tons displacement. No. 2 SBM in position Lat. 25° 38' 36" N., Long. 52° 27' 35" E. This berth will accommodate vessels with up to a draft of 29 m. In both berths, mooring lines from the buoys are secured on the forecastle head using equipment provided by the terminal or using ship's bow chain stoppers if fitted. A suitable messenger rope should be ready for use. No moorings are used aft. The Pilot will advise in detail the mooring procedure.

	SBM 1	*SBM 2*
Position from Halul Lt.	133°×2.3 miles	124°×3.39 miles
Loading pipeline	30 in.	48 in.
Submarine hoses	2×20 in.	2×20 in.
Floating hoses	1×20 in. with 2×16 in. tails	2×20 in. with 16 in. tails
Length of hoses	1×810 ft. with 2×180 ft. tails	1×1,020 ft. and 1×990 ft.
Manifold Connection	2×16 in.	2×16 in.
Mooring Ropes	2×15 in. braided nylon grommets	2×15 in. braided nylon grommets
Water depth	105 ft. (32 m.)	120 ft. (36.5 m.)
Max. draft	72 ft. (22 m.*)	95 ft. (29.0 m.)
Loading rates	5,500 t.p.h.	9,500 t.p.h.

*Also see "Max. Size".

MOORING: All tankers loading at Halul SBMs must comply with "OCIMF Standards of Equipment Employed in the Mooring of Ships at Single Point Moorings".

Both SBM 1 and SBM 2 are equipped with OCIMF recommended 76 mm. chafe chains suitable for vessels over 350,000 tonnes deadweight. To accommodate these, vessels should be fitted with OCIMF approved bow Panama type fairleads, measuring at least 600 mm. × 450 mm., tongue or hinged bar chain stoppers, and winch spooling drums to permit 'hands-off' mooring.

The use of winch drum ends is not permitted.

Smit type brackets are not acceptable at Halul.

Preparations: When the Pilot has boarded, the ship's crew is required to use the starboard side ship's derrick or crane over the side to lift the mooring and hose connecting equipment on board from the pilot/mooring launch. An Operations Assistant will board with the Pilot. He will give guidance to the ship's crew on mooring and also on connecting the hoses.

Vessel's anchors must be stowed and properly secured in the Hawse pipe.

Briefing: Prior to approaching the SBM the Master, Pilot and Officer delegated to duty on the forecastle should meet and the Pilot will brief all concerned on the mooring operation.

Mooring Operation: On approaching the SBM the ship should make ready a rope messenger suitable for passing over the stem of the tanker to the mooring launch. This rope will be joined to a 10 in. pick-up rope (400 ft.) which is in turn connected to a 50 ft. pick-up wire and then the chafe chain. Each chafe chain is connected to a 15 in. grommet of braided nylon.

The starboard mooring is always picked up first.

Safe Practices: With the objective of achieving a safe 'hands-off' mooring procedure, winch spooling drums will be used for heaving the pick-up ropes. The use of winch or windlass drum ends is not permitted. Masters and crew should be aware at all times of safe working practices while mooring the ship and avoid standing in the danger sectors of ropes and wires under tension.

SBM Security: From the time of completion of mooring, the ship shall station a lookout on the forecastle. This lookout must inform the Berthing Officer in the event that the ship is likely to come into contact with the SBM.

Immobilisation of Engines: Under no circumstances should the ship's engines, steering gear, deck machinery power source, or any essential equipment be immobilised.

HOSE CONNECTION: Tanker manifold arrangements must comply with "OCIMF Standard for Oil Tanker Manifolds and Associated Equipment".

Connection Position: Hoses will be connected/disconnected on starboard side by ship's crew. The Operations Assistant will give guidance to the crew as required.

Connection Sequence: The first hose will be the tanker rail hose string. It must be connected to the forward of the 2 manifold connections.

Hose Sizes: Tanker rail hoses on both SBMs are 2×16 in. diameter. Vessel should arrive with reducers fitted to the starboard side manifold accordingly.

Ship Lifting Capacity: To lift these hoses, a derrick or crane with a SWL of 10 tons minimum is required.

Connection: The hoses shall be bolted to the ship's manifold with a bolt in every hole. When the hoses are connected the weight of each hose shall be taken by hanging a strop (supplied by shore) from the ship's derrick or crane.

LOADING: All vessels should arrive with cargo tanks properly inerted, gauging and venting systems fully operational, such that a closed loading procedure can be safely followed. The Pilot will verify the oxygen content of the cargo tanks prior to commencement of loading.

Load-on-Top: If load-on-top is to be practiced at Halul, the Pilot may measure the quantity of residue in the slop tank. However, the Pilot will not check tank soundings, ullages, sign Dry Certificates or otherwise act as a cargo surveyor.

Commencement of Loading: Upon request from the ship's Duty Officer the Pilot will instruct the shore to commence loading. Loading will be initially by gravity, and when the ship is satisfied that the cargo is flowing into the ship, the shore will be instructed to start pumping. The total quantity of cargo to load, maximum rate, and whether a "ship or shore stop" is applicable, should be established and confirmed with the Halul Control Room.

Loading Rates: SBM 1: Maximum loading rate is 5,500 tons per hour using diesel pumps.

SBM 2: Maximum loading rate is 9,500 tons per hour using either turbine pumps or a combination of turbine and diesel pumps.

Quantity Checks: During loading, ship and shore should check the long ton quantity of cargo loaded every hour and compare figures. If there is a large discrepancy, the quantities should be re-checked and if the difference remains, with no explanation from the ship, then an inspection of the pipeline and hose systems may be necessary.

Approximately 2 hours after the commencement of loading, the Pilot will advise the ship's Officer the provisional API gravity and shore tank temperature.

Valve Operation and Surge Pressures: During full speed loading, the Duty Officer should inform the Pilot if any valve manipulation, which is likely to restrict the flow of oil, is going to take place. Ships should be aware of the potential dangers of creating a pressure surge by closing valves too quickly and/or restricting the flow of oil by closing off tanks without first reducing the loading rate.

The Master will be held responsible for any apparent or subsequently apparent damage to the shore pipeline and hose system, resulting from surge pressure(s) caused by failure of the ship's pipeline/valve system or the mismanipulation of the ship's valve.

A pressure recorder will be installed at the ship's manifold for continuous monitoring and recording of pipeline pressures, which will also be continuously monitored by Halul Control.

Completion of Cargo Operations: Final topping-up operations should only be conducted in the presence of the Pilot in the cargo control centre. The loading rates should be progressively reduced to a safe level prior to tank valve closure to avoid surge pressure.

Loading can be completed by gravity which gives a rate of about 1,500 tons/hr.

Communications: Communication between ship and shore is by dedicated frequency VHF radio (supplied by shore), which will be positioned in the cargo control room. This radio will have an emergency stop frequency. In the event of an emergency, this facility can be used to stop the loading pumps at the shore terminal. This emergency stop procedure will be tested and demonstrated to the ship's Officers prior to commencement of loading.

Precautions: A watch must be maintained on the radio link with the shore. Connections at the manifold must also be watched continuously for any signs of leaks, ruptures, etc.

BALLAST:

Maximum Freeboard: The SBM's at Halul are considered exposed locations and the safety of operations is highly weather dependent. To ensure that a vessel is always safely moored, the maximum freeboard forward (Panama Lead to waterline) must not exceed 70 ft. (21.3 m.) with a positive stern trim at any time whilst the vessel is in the berth.

Deballasting: Vessels capable of simultaneous cargo loading and deballasting are required to do so in order to maintain the freeboard as low as possible.

Vessels unable to perform simultaneous loading and deballasting operations will, in marginal weather conditions or to comply with the maximum freeboard limitation, be required to load part cargo prior to deballasting.

Dirty Ballast Facilities: No dirty ballast facilities available. All vessels must arrive with clean ballast.

CARGO QUANTITIES/DOCUMENTATION: *Ullaging:* On completion of loading the ship must ullage all tanks into which cargo has been received. The Master is required to complete an ullage report provided by the shore.

Early Departure Procedure: In order to avoid delays to ships, Halul Terminal follows the "Early Departure Procedure" for the completion of cargo documents. When cargo loading is completed the Pilot will receive the departure papers from the shore. These will include documents completed as far as possible but without cargo quantities which the Master should sign as appropriate.

Departure from Halul Island will be dependant on ship/shore agreement on the cargo quantity loaded.

The final Bill of Lading cargo figure will be passed to the vessel by radio, prior to the Pilot disembarking. The Pilot will enter both the Bill of Lading Figure and Final Ship's Figure on Form 19X (Tanker Port Performance), which both the Pilot and Master will then sign. The Bill of Lading cargo figures information will also be transmitted to the vessel after departure via Doha Radio or direct by telex. The Master should insert these figures in the various incomplete forms that remain on board.

All delays resulting from the Master's refusal to accept Early Departure Procedure will be for the vessel's account.

Forms to be Signed: The following is a list of forms which have to be completed for each parcel of cargo and received by the Master. (Not all documents are signed by the Master.)

Bill of Lading.
Cargo Manifest.
Certificate of Quantity and Quality.
Discharge Certificate.
Master's Receipt of Documents.
Arrival Report.
Disbursement Memo.
Certificate of Origin and Authenticity.
Ullage Report.
Customs Export Bill.
Customs Clearance.
Port Timesheet and Form 19X.
Receipt for samples.

Discharge Certificate: We stress the importance of the Discharge Certificate placed on board at the completion of loading. It is absolutely essential that the Discharge Certificate should be completed in duplicate in respect of every discharge whether for entire or part cargo.

DEPARTURE: *Unmooring:* When all ship's papers have been completed and the hoses disconnected the vessel is ready to sail. The port mooring should be released first. The mooring should be lowered to sea level and the pick-up rope paid out slowly to allow the mooring launch to receive the pick-up rope on board. The starboard mooring will then be released.

When the vessel is clear of the SBM, the mooring launch will come alongside on the starboard side to load the mooring and hose connecting equipment, and then stand-by to await the Pilot.

Pilot Disembarkation: When the vessel has been unberthed the Pilot will disembark to the East of the two SBMs and well clear of the submarine pipeline area. Laden vessels should under no circumstances navigate in the pipeline area to the South of Halul Island. It is strongly recommended that all vessels use the Deep Water Departure Channel to clear the Halul area.

DENSITY: At berth, 1028/1030 (approximately).

CARGO: Flash point below 32° Fahrenheit.

H_2S Content in Halul Crude: H_2S Hydrogen Sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour.

If exposure to hazardous concentrations of this gas is likely to occur, appropriate safety precautions should be taken. Suitable respiratory protection should be available during ullaging and sampling.

The TLV is given as 10 p.p.m. but concentrations in enclosed spaces should be reduced as far below this level as practicable and if men are to work without breathing apparatus, a nil concentration should be achieved before entry is permitted and effective ventilation should be maintained.

On tankers regularly committed to the carriage of sour crude, H_2S gas indicators should be provided.

It is important to realise that the concentration of H_2S can be measured and expressed in two different ways:

The p.p.m. in the liquid, by weight;
The p.p.m. in the air, by volume.

Producing and Processing Departments at terminal often use the liquid measure for H_2S content, and this could be confusing to tanker officers who usually think of H_2S as expressed in air volume measure. There can be a vast difference between the two measures. The measure in air is higher and can be very much higher. For example, chemists have measured a concentration of 7,000 p.p.m. (deadly) in the vapour stream coming out of ullage opening when a tank is being topped off with a crude oil containing only 70 p.p.m. H_2S in the liquid. Therefore, it is of vital importance to appreciate that a sour crude can release a lethal concentration of H_2S into the air.

The following guide to the effects on exposed persons of various atmospheric concentrations of H_2S gives some indication of its dangers:

Measured in air by volume

50 to 100 p.p.m.	Eye and respiratory tract irritation after exposure of 1 hour.
200 to 300 p.p.m.	Marked eye and respiratory tract irritation after exposure of 1 hour.
500 to 700 p.p.m.	Dizziness, headache, nausea, etc., within 15 minutes; loss of consciousness and possible death after 30 to 60 minutes exposure.
700 to 900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.
1000 to 2000 p.p.m.	Death is apparently instantaneous.

Apparent death from H_2S is not irreversible as prompt and efficient artificial respiration may restore life.

The terminal should advise the Master if the cargo to be loaded contains H_2S in concentrations which cause the gases vented during loading to be hazardous if inhaled. When handling cargo with noticeable H_2S content or when ballasting after discharge of such cargo, it is recommended that the following precautions should be taken.

The officer supervising the operations should keep a sharp watch on personnel for signs of fatigue or distress.

Lifelines, breathing apparatus and resuscitator should be readily available.

Loading through the pump room should be avoided where possible to reduce the possibility of H_2S contamination of the pump room atmosphere.

Gas should be vented through the cargo tank venting system and, if open ullaging is necessary, the ullage plugs should be kept open only for a minimum period of time.

When ullaging tanks, personnel should work in pairs and stand at right angles to the wind direction in relation to the ullage opening.

Personnel should not enter a pump room without first starting the ventilation, checking that there is no gas present, and without someone else standing by. If any gas concentration is recorded, a self-contained breathing apparatus should be worn.

Other spaces into which H_2S may have been drawn should be ventilated and checked before entry.

Persons overcome by H_2S should be moved to a gas free area immediately and artificial respiration should be administered at once.

Gas tests should be made on deck and in accommodation at regular intervals and particularly during the topping-off periods. If concentrations exceed 10 p.p.m. inside the accommodation or 50 p.p.m. on deck more than 10 ft. from a gas outlet, the loading rate should be adjusted and if this does not result in a decrease of the gas concentration, loading should be stopped until conditions have improved or other suitable measures are taken.

During discharge, the pump room bilges should be kept dry.

During loading or ballasting operations, conspicuous notices warning of potential danger should be posted on deck and at pump room entrance, and at the entrance to any other space which could be affected.

MEDICAL: There is no doctor on Halul Island. If there is any sickness on board, details should be included in the vessel's ETA message.

In emergencies, the services or advice of the QGPC Medical Officer in Doha may be obtained. If the doctor or patient has to be flown from/to Doha, the vessel concerned will be charged for the helicopter hire, the services of the doctor and other related costs.

TIME: Local time is GMT plus 3 hours throughout the year.

FRESH WATER: Not available, except in cases of extreme emergency if a supply boat is available. For this service a charge of 1 day's supply boat hire plus cost of water will be charged.

FUEL: Various grades of bunkers available, diesel and fuel, ex barge or lighters at Halul anchorage provided minimum 7 days' prior notice given.

Also see "Doha".

REPAIRS: Not available.

SURVEYORS: (1) Watson Grey, Caleb Brett and Ace (Qatar) Ltd. in Doha.

(2) Lloyd's Register in Doha.

TANK CLEANING: No facilities available and ships must arrive with clean ballast, lines and pumps.

CONSULS: The following countries maintain Embassies in Qatar.

Algeria
Bangladesh
Egypt
France
Gabon
Germany
India
Iran
Iraq
Japan
Jordan
Korea (Rep. of)
Kuwait
Lebanon
Libya
Mauritania
Morocco
Oman
Pakistan
Saudi Arabia
Somalia
Sudan
Syria
Tunisia
Turkey
United Kingdom
U.S.A.
Yemen

CUSTOMS: Trading in liquor is *strictly* prohibited and no alcoholic drink should be offered to Arab nationals.

Qatar Laws concerning Alcohol: The import and sale of alcoholic drinks in Qatar is subject to stringent Government control and there are heavy penalties for infringement of the relevant laws.

Masters are advised therefore, to ensure that no alcohol, of any description, leaves the vessel while at Halul Terminal.

REPATRIATION: Changes of personnel can be carried out at Halul Island. This can only be carried out on a limited scale due to scarcity of accommodation and transport. For crew joining a ship, Owners should notify the Agency, at least 72 hours in advance of arrival in Doha, the details of the personnel and the arriving flight. Crew leaving a ship at Halul can be arranged but advance notice is required.

SAFETY: Vessels must at all times comply with safety regulations as detailed in the ISGOTT (International Safety Guide for Oil Tanker and Terminals) published jointly by the International Chamber of Shipping and the Oil Companies International Marine Forum and The International Association of Ports and Harbours.

Safety Check List: This check list must be completed prior to the commencement of loading and verified at regular intervals thereafter. The Pilot and the Master of the vessel or a responsible officer will jointly carry out the safety inspection.

Cessation of Loading: If during loading operations, the Pilot becomes aware of any unsafe working practice or safety hazard, loading will cease until such time when the safety hazard has been removed. All delays thus incurred will be for vessel's account.

Hydrogen Sulphide: It is brought to the ship's attention that Qatar marine crude contains Hydrogen Sulphide (H_2S). See "Cargo".

Emergency Towing Wire: Whilst moored to the SBM, all vessels must have Emergency Towing Wires correctly positioned and rigged on the port side forward and aft. The eyes of the wires must be maintained just above the waterline, ready for immediate pick-up by a tug or supply boat. The inboard end must be properly secured to the bollards with at least 40 m. of slack wire on deck with a rope stopper to prevent the slack accidentally running out.

Tanker Emergency: In case of an emergency on board the Tanker the Pilot must immediately be informed. He will act as liaison between ship and shore.

If for whatever reason the Pilot is incapacitated, the Master/Officer on duty must inform Halul Control, giving brief details of the type of the emergency via the portable VHF radio (walkie-talkie) provided by shore.

In case of fire, explosion, etc., cargo must be stopped immediately by requesting "Emergency Stop" via the walkie-talkie and/or via the emergency stop frequency (push-button) provided in the radio.

The Master may also call "Halul Radio" on the ship's VHF Channel 6 or 16, giving details of the emergency and the kind of assistance required, if necessary.

SHORE LEAVE: Not permitted.

GARBAGE DISPOSAL: No garbage disposal service is available for tankers loading at Halul.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No shore leave permitted.

CURRENCY: Qatar Riyals (Q.R.).

GENERAL:

Meteorological Service: A daily 24 hour weather forecast is issued at 0945 hrs. L.T. This forecast covers the area of Halul Island and the offshore oilfields. Details of this forecast can be obtained from Halul Radio on VHF Channel 6 or, if vessel is at one of the SBMs, from the Pilot on board the vessel.

Tidal Information: Halul Island can be found in British Admiralty tide tables Volume 2. Halul is a secondary port based on the standard port of Shatt al-Arab.

Climatic Conditions: Masters and crews should be aware of the extreme climatic conditions which exist in the Halul area during the months of June through October. Everybody should be made aware of the dangers of heat and sun stroke.

Stores and Laundry: Not available at Halul Island.

Courtesy Flag: The Qatar National flag should be flown during daylight hours when a vessel is at Halul Island.

Mail Service: There is an excellent mail service from Qatar to all parts of the world. Qatar stamps must be used on all mail sent through the national post office.

Blue air letter forms other than Qatari forms are not accepted.

AUTHORITY: Qatar General Petroleum Company – Marine Department, P.O.B. 47, Doha, Qatar. *Tel:* 402666, 402593. *Telex:* 4201 Qatoff Doha. *Cables:* Qatoff, Doha. *FAX:* 402707. *Contact:* Captain P. MESAIEED (Umm Said): 24.54 N. 51.34 E. (See Plan)

DOCUMENTS: The Qatar Customs Authority requires the following documents to be kept ready on arrival at Mesaieed Ports and presented to Customs Officer when alongside Berth No. 6, Berth No. 19 or to Pilot when at SPM/CBM/NGL Jetty.

2 copies Crew List.
2 copies Crew Declaration.
2 copies Stores List.
2 copies Bond List.
2 copies Arms and Ammunition List.
1 copy Last Port Clearance.
1 copy Health Declaration.
1 copy Vaccination List.

Also see "Shipmaster's Report" dated June 1996.

BUOYED CHANNEL: All vessels wishing to navigate the Mesaieed Buoyed Channel must obtain prior clearance from Mesaieed Control who can be contacted on VHF Channels 14 or 16 or by Telex via Doha Radio, addressed to Petroqat Mesaieed. This precaution is essential to avoid unexpected encounters with deep-laden oil tankers.

APPROACHES:

Approach to Mesaieed Terminal: With Halul Island peak astern steer 235° for a distance of 31.5 miles to (K) Kareinein Light Buoy in position Lat. 25° 24' 18" N., Long. 51° 56' 16.4" E., thence 226°, 12 miles to (M) Mishut Light Buoy in position Lat. 25° 15' 51" N., Long. 51° 46' 43.4" E.

From Mishut Light Buoy steer 214° for a distance of 8 miles to (W) Wakrah Light Buoy, leaving this light buoy on the port hand.

From Wakrah Light Buoy steer 180° for a distance of 6.4 miles, to (H) Hul Light Buoy leaving this buoy to port.

From a position of 2 cables West of (H) Hul Light Buoy, steer 164° for a distance of 1.9 miles to pass between Nos. 1 and 2 Outer Channel Buoys, thence 158° 30', 0.3 miles to pass between Nos. 3 and 4 Outer Channel Buoys, thence 178°, 0.9 miles to leave No. 6 Outer Channel Buoy on port hand, thence 173°, 1.6 miles to pass between Nos. 7 and 8 Outer Channel Buoys, thence 191° 30', 1.6 miles to pass between Nos. 9 and 10 Outer Channel Buoys, thence 176°, 0.8 miles to pass between Nos. 11 and 12 Outer Channel Buoys.

From a position midway between Nos. 11 and 12 Outer Channel Buoys, steer 157° for a distance of 2.2 miles, leaving S.E. Arrif Buoy on the starboard hand, thence 217° for a distance of 3.25 miles, leaving S. Arrif Buoy on the starboard hand.

After rounding S. Arrif Buoy, steer 335° for a distance of 1.7 miles, passing close West of No. 1 Inner Channel Buoy, thence 003°, 1.1 miles, passing close East of No. 2 Inner Channel Buoy.

From a position close East of No. 2 Inner Channel Buoy, steer 348°, 0.5 miles to pass between Nos. 3 and 4 Inner Channel Buoys thence 323° to round Turning Buoy, leaving this buoy on the port hand.

From Turning Buoy steer a course to enter the designated Anchorage Area. The Northern limit of the designated Anchorage Area is a straight line joining the Turning Buoy and Fairway Buoy positions.

Masters of vessels anchoring at Mesaieed are required to use the appropriate anchorage. With the exception of emergencies only, anchoring outside this area or obstructing the fairway is *not* permitted.

Prohibited Area: A prohibited area enclosed by the pecked lines as shown on Chart No. 3786 (See "Plans") has been established. Masters of all vessels are prohibited from entering, anchoring or fishing within this area unless permission has been granted by the Corporation.

Masters of vessels anchoring at Mesaieed are required to use the designated anchorage area. With the exception of emergencies only, anchoring outside this area or obstructing the Fairway is not permitted.

Outward Passage: The reverse track is followed as for the inward passage described above.

Charts: Admiralty Chart No. 3787 – Approaches to Musay'Id and Ad Dawhah.

Admiralty Chart No. 3950 – Fasht at Arrif to Ras Laffan.

Admiralty Chart No. 3786 – Mesaieed Harbour.

Depths: In the Outer Channel there are least depths of 36 ft. (10.97 m.) in the vicinity of Nos. 1 and 2 Buoys, 3 and 4 Buoys and Nos. 9, 10, 11 and 12 Buoys.

Between the Outer and Inner Channel the depth varies from 40 ft. (12.2 m.) at Nos. 11 and 12 Outer Channel Buoys through 72 ft. (22.0 m.) and 78 ft. (23.8 m.) between S.E. Arrif and S. Arrif Buoys to 47 ft. (14.3 m.) close to No. 1 Inner Channel Buoy.

In the Inner Channel the least depth is 37 ft. (11.28 m.) between Nos. 3 and 4 Inner Channel Buoys.

From the Inner Channel to the Anchorage the depths vary from 43 ft. (13.1 m.) between the channel and Turning Buoy to 48 ft. (14.6 m.) at the Anchorage.

Tidal Conditions: In general the tide follows the coast line with the flood tide setting to the South or S.W., and the ebb tide setting to the North or N.E. The greatest caution must be exercised by all vessels when setting course to round the S.E. Arrif Buoy. It should be noted that tidal sets can run up to 2 hours after the predicted H.W./L.W. times.

Abnormal meteorological conditions may affect all the above tides by ±2 ft. (0.61 m.).

The normal tidal range is from 0.4 m. to 2.0 m., with the highest tides being in the region of 2.45 m. in exceptional circumstances.

Tide Gauge: The Terminal Office at Mesaieed is equipped with a tide gauge, so that verification of tidal predictions, with actual depth of water, can be made.

PILOTAGE: Inward and outward pilotage is compulsory for all vessels loading at the North and South Berths (Crude/Stabilised Condensate), NGL (Propane, Butane and Condensate), NODCO (Products) and QAPCO (Ethylene). The Pilot boards the vessel in the vicinity of the Mishut Buoy and will contact the vessel approximately one hour before boarding. The Pilot normally disembarks in the vicinity of the Wakrah Buoy.

In the case of the North Berth (SPM) and South Berth (CBM), the Pilot remains on board the vessel throughout, acting as Loading Master and QGPC Representative.

Pilotage is compulsory for berthing and unberthing of all dry cargo vessels from sunrise to sunset.

Pilot Ladder: Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 3.0 m. – 6.0 m. above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder (on after leading accommodation ladders), to within 1.5 m. above the water. This will enable Pilot to ascend pilot ladder clear of the launch, and then step on to lower platform of accommodation ladder.

A suitable heaving line should be ready for use. On no account should weighed heaving lines be used in the vicinity of the pilot boat or mooring launches.

A good lee must always be made.

Automatic pilot hoists are not to be used.

Pilotage is compulsory for dry cargo ships bound to for Mesaieed Anchorage only if the draft is 33 ft. or over. Pilotage performed by Doha Pilots.

All dry cargo vessels using Mesaieed Channel must obtain channel clearance from Mesaieed Traffic Control on Channels 16 and 11 at Mishut Buoy, prior to entering channel and prior to sailing from Mesaieed berths. Berthing and unberthing schedules are obtained from Doha Ports (Channels 16 and 14).

ANCHORAGES: The recommended anchorage is one mile N.W. of the Mishut Buoy, and vessels should not anchor to the South.

Prohibited Anchorage: A Prohibited Anchorage has been established in the vicinity of (W) Wakrah Light Buoy to protect submarine pipelines laid in the area. A yellow can buoy (Fl. Y. 10 secs.) (Radar Reflector) has been laid in position Lat. 25° 13' 51" N., Long. 51° 45' 23.4" E. and a line drawn 073° from the coast through this position marks the Northern boundary of the Prohibited Anchorage. A similar buoy (Fl. Y. 6 secs.) (Radar Reflector) has been laid in position Lat. 25° 8' 18" N., Long. 51° 41' 54" E. and a parallel line drawn through this position marks the Southern boundary of the Prohibited Anchorage.

RESTRICTIONS: In the case of crude oil shipments, mooring, loading and unmooring is carried out at all times (weather permitting).

Mooring and unmooring operations are restricted to daylight hours at the NGL Jetty, NODCO Jetty (Berth No. 6) and QAPCO Jetty (Berth No. 19).

MAX. SIZE: *Depths/Drafts of Laden Vessels/Minimum Underkeel Clearance:* The draft of laden tankers leaving Mesaieed is constrained by the depth of water in the Outer Channel. However, vessels are required to maintain a minimum underkeel clearance in relation to total height.

The table below details the minimum underkeel clearances for vessels using the Mesaieed Channel.

Vessels up to 99,999 d.w.t.	3 ft. (0.91 m.) Clearance
Vessels from 100,000 to 149,999 d.w.t.	4 ft. (1.22 m.) Clearance
Vessels between 150,000 and 320,000 d.w.t.	5 ft. (1.52 m.) Clearance
LPG Carriers (All Sizes)	5 ft. (1.52 m.) Clearance

The following are examples of the tidal calculations to determine whether or not a vessel would be allowed to use the channel:

Ship A – VLCC 250,000 tonnes d.w.t.:

Sailing Draft	10.79 m.
Required Minimum Underkeel Clearance	+ 1.52 m.
Depth of water required	12.31 m.
Minimum depth of water at Chart Datum	10.97 m.
Height of tide required (minimum)	1.34 m.

Therefore this vessel can use the Mesaieed Channel only if the height of tide is equal to or greater than 1.35 m. at the time of passing the outer end of the outer channel.

Ship B – Product Carrier 85,000 tonnes d.w.t.:

Sailing Draft	9.40 m.
Required Minimum Underkeel Clearance	+ 0.91 m.
Depth of water required	10.31 m.
Minimum depth of water at Chart Datum	10.97 m.
Height of tide required (minimum)	– 0.66 m.

Therefore this vessel can use the Mesaieed Channel at any state of the tide.

Note: For vessels loading to drafts which are close to the limits of the Mesaieed Channel, the small mooring launch is available to allow ship's officers to make a visual inspection of the draft prior to sailing.

The Pilot carries an up-to-date set of tide tables and will perform the tidal calculation in advance of the ship sailing to ensure that the margins of safe underkeel clearance are maintained. If the Master requires further information regarding this matter prior to arrival at Mesaieed, he should contact the Terminal through the normal method.

Also see "Terminal Information" – "Berth Limitations".

Navigation in Shallow Waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilots and Masters of ships should be guided by the following:

(a) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

(b) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

(c) Ensure accuracy of vessel's draft reading, including the midship drafts, having in mind the tendency of vessels to sag and the adverse effect of a small list.

(d) Note that list can mean an appreciable increase in draft.

(e) When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid-channel.

Particular attention should be paid to rounding the S.E. Arrif Buoy on a flood tide, especially when heading South. Extra allowance for set should always be made.

HEALTH: (Quarantine and Medical Clearance). Medical attention to Masters and crews of ships provided by Q.G.P.C. Medical Officer when asked for by Master.

For dry cargo vessels, the medical facilities are arranged through Agent.

When advising their ETA, ships must state all ports of call within the previous 21 days and report any cases of sickness on board.

RADIO: Doha Radio – A7D – continuous watch on W/T 500 kHz, R/T 2182 kHz and VHF Channel 16.

Doha Port continuous watch on R/T 2182 kHz and VHF Channels 16 and 14. Mesaieed Terminal for channel clearance keeps continuous watch on Channel 16.

When advising their ETA ships must state their last port of call within the previous 21 days and report any sickness on board. If the last port of call is Bahrain or Ras Tanura, the previous port must be stated.

Radio Messages: Vessels are requested to inform Petroqat, Mesaieed by cable of their ETA at (M) Mishut Light Buoy, 72 hours, and confirm 48 hours, 24 hours and 12 hours prior to their arrival. It should be clearly indicated that times quoted are in GMT. They should also state the quantity of cargo, in long tons, the maximum loading rate required, deballasting time and whether able to load and discharge ballast concurrently. Any crew changes and/or medical treatment required should also be notified in this cable (Also see "Health").

These cables should be addressed to Petroqat, Mesaieed, and passed via Doha Radio.

The following cable is sent to all vessels by Agent (Petroqat):

Quote:

Advise your ETA at Pilot Station Mishut (M) Buoy in GMT 72 hours and confirm 48 hours, 24 hours and 12 hours before arrival. Pilotage is compulsory and in order to confirm pilot boat arrangements essential you advise firm ETA 48 hours before arrival to avoid any delays. Rig combination accommodation/pilot ladder on Lee side before arrival. Pilot hoist and weighted heaving lines must not be used. Tugs are available if required. Please advise your requirements 48 hours in advance.

It is preferred that mooring hawsers in general consist of rope where possible but all wire moorings or wires with rope tails are acceptable. Please note, however, that for safety reasons, all springs which are connected to the main jetty must be of rope or wires with rope tails.

Please advise your last cargo, and confirm that your tanks are cooled down and ready in all respects to receive your nominated cargo. Butane and propane can be loaded concurrently if required. Loading lines are 12 in. diameter and vapour return lines are 8 in. diameter all fitted with Class 150 ASA flanges. Your attention is drawn to the Prohibited Anchorage (Lat. 25° 10' N.) safeguarding the submarine pipelines laid in the vicinity of Wakrah (W) Buoy.

If your vessel is fitted with telex which has high (75B) and low (50B) speed transmission, please ensure that your machine is operating on low (50B) speed mode to ensure that we receive clear, ungarbled text.

Petroqat Mesaieed

Unquote.

Telex Messages: Vessels fitted with telex machines may make contact through Telex No. 4050 Qpausd Dh. However, only the low (50B) transmission mode should be used to ensure the receipt of clear, ungarbled text.

High (75B) speed transmission mode must not be used.

VHF: "Mesaieed Traffic" is equipped with VHF radio equipment operating on Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 67, 68, 69, 70, 71, 72, 73, 74 and 77 of international maritime mobile telephone service.

A continuous 24 hour listening watch is maintained on Channels 11 and 16, the call sign being "Mesaieed Traffic". The range of station is approximately 50 miles.

Also see "Pilotage".

Berth Radio Frequency: Tanker berthing/loading operations are carried out using intrinsically safe portable VHF radio sets on a frequency of 155.975 MHz (transmit and receive). These radio sets also have the facility to use VHF Channel 9.

Vessel Traffic Control: Entrance to Mesaieed by all shipping, both commerical and hydrocarbon, is strictly under the Vessel Traffic Control System call sign "Mesaieed Traffic". Prior to any movement in Mesaieed Port Area or entry to the navigation channels, permission must be obtained from Mesaieed Traffic.

Inbound: Vessels are required to obtain clearance to proceed South at the Mishut Buoy, thereafter to report their position at Hul, S.E. Arrif, and Fairway Buoys.

Outbound: Vessels are required to obtain clearance to proceed from the berth or anchorage and report their position at S.E. Arrif, Hul Buoy and Mishut Buoys.

Communications: The Traffic Control maintains a 24 hour continuous listening watch on VHF Channels 16 and 11, which is the working frequency.

TUGS: The use of tugs is compulsory and is as follows:

North Berth: Tugs not used.

South Berth: One or two tugs at Pilot's discretion used during berthing. Tug may be utilised for unberthing if weather conditions are unfavourable.

NGL Jetty: Two tugs used for both berthing and unberthing.

NODCO Jetty No. 6: Two tugs for berthing and unberthing.

QAPCO Jetty No. 19: One tug used for berthing, assuming that vessel is fitted with an operational Bowthruster unit, otherwise 2 tugs will be used. For unberthing, the use of a tug is at the Pilot's discretion and will depend upon the weather conditions at the time.

Vessels are to provide tug lines in good condition and made of rope. Wires are prohibited.

BERTHING: Pilots act in same capacity as Mooring Masters in the berthing of vessels, after which they supervise raising of flexible hoses and connection to ship's manifold. During loading operations they act as the Corporation's representatives.

Vessel's crew are required to assist with hose connecting.

North Berth: Crude Oil: North Berth is a Single Point Multi-Product Mooring Buoy in position Lat. 24° 53' 37.2" N., Long. 51° 34' 54" E., connected to the shore installation by a 36 in. submarine pipeline. The seaward end of the pipeline and buoy terminates in 2×16 in. × 900 ft. (Crude) and 890 ft. (Stabilised Condensate) flexible floating hoses.

Stabilised Condensate: SPM is also designed to accommodate vessels for loading stabilised condensate. The submarine pipeline is 30 in. in diameter and the seaward end of the pipeline and buoy terminates in 2×16 in. × 890 ft. flexible floating hoses.

Gear to be Provided by Tankers:

(i) General: All tankers berthing at the SPM will be required to have situated on the foc'sle head a Tongue Type bow stopper capable of accepting a 0.76 mm. diameter chafing chain and manufactured and fitted in accordance with the Oil Companies' International Marine Forum and Classification Societies' Recommendations regarding the standard of equipment employed in the mooring of ships at Single Point Moorings. In addition, all tankers mooring at either the SPM or CBM berths must comply with the OCIMF standard for Oil Tanker Manifolds and associated equipment. No use of winch barrel ends is permitted for mooring and only spool drums to be used. Vessels are rejected if this is not possible.

(ii) North Berth (Crude): Vessels are moored by a single hawser from bow to buoy.

The following equipment should be carried by each vessel:

1×40 mm. diameter × 75 m. messenger rope, one axe, crowbar and large hammer ready for use at the bow.

One good boat rope at least 60 m. long, ready at accommodation ladder position.

Derrick or crane rigged over the portside manifolds should be capable of lifting 16 in. floating hose to a height of up to 10 m. above deck (S.W.L. 15 tons). 2×1 tonne chain blocks for hose connection.

Reducers or adaptor (if necessary) bolted to the ship's manifold flanges so as to take 2×16 in. loading hoses.

(iii) North Berth (Stablised Condensate): Stabilised condensate is loaded through the multiproduct SPM at a maximum loading rate of 35,000 bbls./hr. From the shore, the cargo passes through a single 30 in. sea line to the SPM and then into a single 20 in. floating hose, culminating in 2×16 in. overrail hoses which are connected to the ship's portside manifold.

Mooring Arrangements: For vessels arriving at this port without the approved type of "AKD" stoppers fitted, the Terminal will supply suitable snotters and shackles. These will be utilised forward to make fast the chafe chain (attached to the end of the SPM Mooring rope) to a suitable set of ship's bollards. The Pilot will advise as to this arrangement.

Warning: Ship's anchors must never be used within 0.5 miles of this berth or the 36 in. submarine pipeline and must therefore be well secured at all times.

MESAIEED (Umm Said): 24.54 N. 51.34 E. (See Plan)

DOCUMENTS: The Qatar Customs Authority requires the following documents to be kept ready on arrival at Mesaieed Ports and presented to Customs Officer when alongside Berth No. 6, Berth No. 19 or to Pilot when at SPM/CBM/NGL Jetty.

2 copies Crew List.
2 copies Crew Declaration.
2 copies Stores List.
2 copies Bond List.
2 copies Arms and Ammunition List.
1 copy Last Port Clearance.
1 copy Health Declaration.
1 copy Vaccination List.

Also see "Shipmaster's Report" dated June 1996.

BUOYED CHANNEL: All vessels wishing to navigate the Mesaieed Buoyed Channel must obtain prior clearance from Mesaieed Control who can be contacted on VHF Channels 14 or 16 or by Telex via Doha Radio, addressed to Petroqat Mesaieed. This precaution is essential to avoid unexpected encounters with deep-laden oil tankers.

APPROACHES:

Approach to Mesaieed Terminal: With Halul Island peak astern steer 235° for a distance of 31.5 miles to (K) Kareinein Light Buoy in position Lat. 25° 24' 18" N., Long. 51° 56' 16.4" E., thence 226°, 12 miles to (M) Mishut Light Buoy in position Lat. 25° 15' 51" N., Long. 51° 46' 43.4" E.

From Mishut Light Buoy steer 214° for a distance of 8 miles to (W) Wakrah Light Buoy, leaving this light buoy on the port hand.

From Wakrah Light Buoy steer 180° for a distance of 6.4 miles, to (H) Hul Light Buoy leaving this buoy to port.

From a position of 2 cables West of (H) Hul Light Buoy, steer 164° for a distance of 1.9 miles to pass between Nos. 1 and 2 Outer Channel Buoys, thence 158° 30', 0.3 miles to pass between Nos. 3 and 4 Outer Channel Buoys, thence 178°, 0.9 miles to leave No. 6 Outer Channel Buoy on port hand, thence 173°, 1.6 miles to pass between Nos. 7 and 8 Outer Channel Buoys, thence 191° 30', 1.6 miles to pass between Nos. 9 and 10 Outer Channel Buoys, thence 176°, 0.8 miles to pass between Nos. 11 and 12 Outer Channel Buoys.

From a position midway between Nos. 11 and 12 Outer Channel Buoys, steer 157° for a distance of 2.2 miles, leaving S.E. Arrif Buoy on the starboard hand, thence 217° for a distance of 3.25 miles, leaving S. Arrif Buoy on the starboard hand.

After rounding S. Arrif Buoy, steer 335° for a distance of 1.7 miles, passing close West of No. 1 Inner Channel Buoy, thence 003°, 1.1 miles, passing close East of No. 2 Inner Channel Buoy.

From a position close East of No. 2 Inner Channel Buoy, steer 348°, 0.5 miles to pass between Nos. 3 and 4 Inner Channel Buoys thence 323° to round Turning Buoy, leaving this buoy on the port hand.

From Turning Buoy steer a course to enter the designated Anchorage Area. The Northern limit of the designated Anchorage Area is a straight line joining the Turning Buoy and Fairway Buoy positions.

Masters of vessels anchoring at Mesaieed are required to use the appropriate anchorage. With the exception of emergencies only, anchoring outside this area or obstructing the fairway is *not* permitted.

Prohibited Area: A prohibited area enclosed by the pecked lines as shown on Chart No. 3786 (See "Plans") has been established. Masters of all vessels are prohibited from entering, anchoring or fishing within this area unless permission has been granted by the Corporation.

Masters of vessels anchoring at Mesaieed are required to use the designated anchorage area. With the exception of emergencies only, anchoring outside this area or obstructing the Fairway is not permitted.

Outward Passage: The reverse track is followed as for the inward passage described above.

Charts: Admiralty Chart No. 3787 – Approaches to Musay'Id and Ad Dawhah.

Admiralty Chart No. 3950 – Fasht at Arrif to Ras Laffan.

Admiralty Chart No. 3786 – Mesaieed Harbour.

Depths: In the Outer Channel there are least depths of 36 ft. (10.97 m.) in the vicinity of Nos. 1 and 2 Buoys, 3 and 4 Buoys and Nos. 9, 10, 11 and 12 Buoys.

Between the Outer and Inner Channel the depth varies from 40 ft. (12.2 m.) at Nos. 11 and 12 Outer Channel Buoys through 72 ft. (22.0 m.) and 78 ft. (23.8 m.) between S.E. Arrif and S. Arrif Buoys to 47 ft. (14.3 m.) close to No. 1 Inner Channel Buoy.

In the Inner Channel the least depth is 37 ft. (11.28 m.) between Nos. 3 and 4 Inner Channel Buoys.

From the Inner Channel to the Anchorage the depths vary from 43 ft. (13.1 m.) between the channel and Turning Buoy to 48 ft. (14.6 m.) at the Anchorage.

Tidal Conditions: In general the tide follows the coast line with the flood tide setting to the South or S.W., and the ebb tide setting to the North or N.E. The greatest caution must be exercised by all vessels when setting course to round the S.E. Arrif Buoy. It should be noted that tidal sets can run up to 2 hours after the predicted H.W./L.W. times.

Abnormal meteorological conditions may affect all the above tides by ±2 ft. (0.61 m.).

The normal tidal range is from 0.4 m. to 2.0 m., with the highest tides being in the region of 2.45 m. in exceptional circumstances.

Tide Gauge: The Terminal Office at Mesaieed is equipped with a tide gauge, so that verification of tidal predictions, with actual depth of water, can be made.

PILOTAGE: Inward and outward pilotage is compulsory for all vessels loading at the North and South Berths (Crude/Stabilised Condensate), NGL (Propane, Butane and Condensate), NODCO (Products) and QAPCO (Ethylene). The Pilot boards the vessel in the vicinity of the Mishut Buoy and will contact the vessel approximately one hour before boarding. The Pilot normally disembarks in the vicinity of the Wakrah Buoy.

In the case of the North Berth (SPM) and South Berth (CBM), the Pilot remains on board the vessel throughout, acting as Loading Master and QGPC Representative.

Pilotage is compulsory for berthing and unberthing of all dry cargo vessels from sunrise to sunset.

Pilot Ladder: Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 3.0 m. – 6.0 m. above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder (on after leading accommodation ladders), to within 1.5 m. above the water. This will enable Pilot to ascend pilot ladder clear of the launch, and then step on to lower platform of accommodation ladder.

A suitable heaving line should be ready for use. On no account should weighed heaving lines be used in the vicinity of the pilot boat or mooring launches.

A good lee must always be made.

Automatic pilot hoists are not to be used.

Pilotage is compulsory for dry cargo ships bound to for Mesaieed Anchorage only if the draft is 33 ft. or over. Pilotage performed by Doha Pilots.

All dry cargo vessels using Mesaieed Channel must obtain channel clearance from Mesaieed Traffic Control on Channels 16 and 11 at Mishut Buoy, prior to entering channel and prior to sailing from Mesaieed berths. Berthing and unberthing schedules are obtained from Doha Ports (Channels 16 and 14).

ANCHORAGES: The recommended anchorage is one mile N.W. of the Mishut Buoy, and vessels should not anchor to the South.

Prohibited Anchorage: A Prohibited Anchorage has been established in the vicinity of (W) Wakrah Light Buoy to protect submarine pipelines laid in the area. A yellow can buoy (Fl. Y. 10 secs.) (Radar Reflector) has been laid in position Lat. 25° 13' 51" N., Long. 51° 45' 23.4" E. and a line drawn 073° from the coast through this position marks the Northern boundary of the Prohibited Anchorage. A similar buoy (Fl. Y. 6 secs.) (Radar Reflector) has been laid in position Lat. 25° 8' 18" N., Long. 51° 41' 54" E. and a parallel line drawn through this position marks the Southern boundary of the Prohibited Anchorage.

RESTRICTIONS: In the case of crude oil shipments, mooring, loading and unmooring is carried out at all times (weather permitting).

Mooring and unmooring operations are restricted to daylight hours at the NGL Jetty, NODCO Jetty (Berth No. 6) and QAPCO Jetty (Berth No. 19).

MAX. SIZE: *Depths/Drafts of Laden Vessels/Minimum Underkeel Clearance:* The draft of laden tankers leaving Mesaieed is constrained by the depth of water in the Outer Channel. However, vessels are required to maintain a minimum underkeel clearance in relation to total height.

The table below details the minimum underkeel clearances for vessels using the Mesaieed Channel.

Vessels up to 99,999 d.w.t.	3 ft. (0.91 m.) Clearance
Vessels from 100,000 to 149,999 d.w.t.	4 ft. (1.22 m.) Clearance
Vessels between 150,000 and 320,000 d.w.t.	5 ft. (1.52 m.) Clearance
LPG Carriers (All Sizes)	5 ft. (1.52 m.) Clearance

The following are examples of the tidal calculations to determine whether or not a vessel would be allowed to use the channel:

Ship A – VLCC 250,000 tonnes d.w.t.:

Sailing Draft	10.79 m.
Required Minimum Underkeel Clearance	+ 1.52 m.
Depth of water required	12.31 m.
Minimum depth of water at Chart Datum	10.97 m.
Height of tide required (minimum)	1.34 m.

Therefore this vessel can use the Mesaieed Channel only if the height of tide is equal to or greater than 1.35 m. at the time of passing the outer end of the outer channel.

Ship B – Product Carrier 85,000 tonnes d.w.t.:

Sailing Draft	9.40 m.
Required Minimum Underkeel Clearance	+ 0.91 m.
Depth of water required	10.31 m.
Minimum depth of water at Chart Datum	10.97 m.
Height of tide required (minimum)	– 0.66 m.

Therefore this vessel can use the Mesaieed Channel at any state of the tide.

Note: For vessels loading to drafts which are close to the limits of the Mesaieed Channel, the small mooring launch is available to allow ship's officers to make a visual inspection of the draft prior to sailing.

The Pilot carries an up-to-date set of tide tables and will perform the tidal calculation in advance of the ship sailing to ensure that the margins of safe underkeel clearance are maintained. If the Master requires further information regarding this matter prior to arrival at Mesaieed, he should contact the Terminal through the normal method.

Also see "Terminal Information" – "Berth Limitations".

Navigation in Shallow Waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilots and Masters of ships should be guided by the following:

(a) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

(b) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

(c) Ensure accuracy of vessel's draft reading, including the midship drafts, having in mind the tendency of vessels to sag and the adverse effect of a small list.

(d) Note that list can mean an appreciable increase in draft.

(e) When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid-channel.

Particular attention should be paid to rounding the S.E. Arrif Buoy on a flood tide, especially when heading South. Extra allowance for set should always be made.

HEALTH: (Quarantine and Medical Clearance). Medical attention to Masters and crews of ships provided by Q.G.P.C. Medical Officer when asked for by Master.

For dry cargo vessels, the medical facilities are arranged through Agent.

When advising their ETA, ships must state all ports of call within the previous 21 days and report any cases of sickness on board.

RADIO: Doha Radio – A7D – continuous watch on W/T 500 kHz, R/T 2182 kHz and VHF Channel 16.

Doha Port continuous watch on R/T 2182 kHz and VHF Channels 16 and 14. Mesaieed Terminal for channel clearance keeps continuous watch on Channel 16.

When advising their ETA ships must state their last port of call within the previous 21 days and report any sickness on board. If the last port of call is Bahrain or Ras Tanura, the previous port must be stated.

Radio Messages: Vessels are requested to inform Petroqat, Mesaieed by cable of their ETA at (M) Mishut Light Buoy, 72 hours, and confirm 48 hours, 24 hours and 12 hours prior to their arrival. It should be clearly indicated that times quoted are in GMT. They should also state the quantity of cargo, in long tons, the maximum loading rate required, deballasting time and whether able to load and discharge ballast concurrently. Any crew changes and/or medical treatment required should also be notified in this cable (Also see "Health").

These cables should be addressed to Petroqat, Mesaieed, and passed via Doha Radio.

The following cable is sent to all vessels by Agent (Petroqat):

Quote:

Advise your ETA at Pilot Station Mishut (M) Buoy in GMT 72 hours and confirm 48 hours, 24 hours and 12 hours before arrival. Pilotage is compulsory and in order to confirm pilot boat arrangements essential you advise firm ETA 48 hours before arrival to avoid any delays. Rig combination accommodation/pilot ladder on Lee side before arrival. Pilot hoist and weighted heaving lines must not be used. Tugs are available if required. Please advise your requirements 48 hours in advance.

It is preferred that mooring hawsers in general consist of rope where possible but all wire moorings or wires with rope tails are acceptable. Please note, however, that for safety reasons, all springs which are connected to the main jetty must be of rope or wires with rope tails.

Please advise your last cargo, and confirm that your tanks are cooled down and ready in all respects to receive your nominated cargo. Butane and propane can be loaded concurrently if required. Loading lines are 12 in. diameter and vapour return lines are 8 in. diameter all fitted with Class 150 ASA flanges. Your attention is drawn to the Prohibited Anchorage (Lat. 25° 10' N.) safeguarding the submarine pipelines laid in the vicinity of Wakrah (W) Buoy.

If your vessel is fitted with telex which has high (75B) and low (50B) speed transmission, please ensure that your machine is operating on low (50B) speed mode to ensure that we receive clear, ungarbled text.

Petroqat Mesaieed

Unquote.

Telex Messages: Vessels fitted with telex machines may make contact through Telex No. 4050 Qpausd Dh. However, only the low (50B) transmission mode should be used to ensure the receipt of clear, ungarbled text.

High (75B) speed transmission mode must not be used.

VHF: "Mesaieed Traffic" is equipped with VHF radio equipment operating on Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 67, 68, 69, 70, 71, 72, 73, 74 and 77 of international maritime mobile telephone service.

A continuous 24 hour listening watch is maintained on Channels 11 and 16, the call sign being "Mesaieed Traffic". The range of station is approximately 50 miles.

Also see "Pilotage".

Berth Radio Frequency: Tanker berthing/loading operations are carried out using intrinsically safe portable VHF radio sets on a frequency of 155.975 MHz (transmit and receive). These radio sets also have the facility to use VHF Channel 9.

Vessel Traffic Control: Entrance to Mesaieed by all shipping, both commerical and hydrocarbon, is strictly under the Vessel Traffic Control System call sign "Mesaieed Traffic". Prior to any movement in Mesaieed Port Area or entry to the navigation channels, permission must be obtained from Mesaieed Traffic.

Inbound: Vessels are required to obtain clearance to proceed South at the Mishut Buoy, thereafter to report their position at Hul, S.E. Arrif, and Fairway Buoys.

Outbound: Vessels are required to obtain clearance to proceed from the berth or anchorage and report their position at S.E. Arrif, Hul Buoy and Mishut Buoys.

Communications: The Traffic Control maintains a 24 hour continuous listening watch on VHF Channels 16 and 11, which is the working frequency.

TUGS: The use of tugs is compulsory and is as follows:

North Berth: Tugs not used.

South Berth: One or two tugs at Pilot's discretion used during berthing. Tug may be utilised for unberthing if weather conditions are unfavourable.

NGL Jetty: Two tugs used for both berthing and unberthing.

NODCO Jetty No. 6: Two tugs for berthing and unberthing.

QAPCO Jetty No. 19: One tug used for berthing, assuming that vessel is fitted with an operational Bowthruster unit, otherwise 2 tugs will be used. For unberthing, the use of a tug is at the Pilot's discretion and will depend upon the weather conditions at the time.

Vessels are to provide tug lines in good condition and made of rope. Wires are prohibited.

BERTHING: Pilots act in same capacity as Mooring Masters in the berthing of vessels, after which they supervise raising of flexible hoses and connection to ship's manifold. During loading operations they act as the Corporation's representatives.

Vessel's crew are required to assist with hose connecting.

North Berth: Crude Oil: North Berth is a Single Point Multi-Product Mooring Buoy in position Lat. 24° 53' 37.2" N., Long. 51° 34' 54" E., connected to the shore installation by a 36 in. submarine pipeline. The seaward end of the pipeline and buoy terminates in 2×16 in. × 900 ft. (Crude) and 890 ft. (Stabilised Condensate) flexible floating hoses.

Stabilised Condensate: SPM is also designed to accommodate vessels for loading stabilised condensate. The submarine pipeline is 30 in. in diameter and the seaward end of the pipeline and buoy terminates in 2×16 in. × 890 ft. flexible floating hoses.

Gear to be Provided by Tankers:

(i) General: All tankers berthing at the SPM will be required to have situated on the foc'sle head a Tongue Type bow stopper capable of accepting a 0.76 mm. diameter chafing chain and manufactured and fitted in accordance with the Oil Companies' International Marine Forum and Classification Societies' Recommendations regarding the standard of equipment employed in the mooring of ships at Single Point Moorings. In addition, all tankers mooring at either the SPM or CBM berths must comply with the OCIMF standard for Oil Tanker Manifolds and associated equipment. No use of winch barrel ends is permitted for mooring and only spool drums to be used. Vessels are rejected if this is not possible.

(ii) North Berth (Crude): Vessels are moored by a single hawser from bow to buoy.

The following equipment should be carried by each vessel:

1×40 mm. diameter × 75 m. messenger rope, one axe, crowbar and large hammer ready for use at the bow.

One good boat rope at least 60 m. long, ready at accommodation ladder position.

Derrick or crane rigged over the portside manifolds should be capable of lifting 16 in. floating hose to a height of up to 10 m. above deck (S.W.L. 15 tons). 2×1 tonne chain blocks for hose connection.

Reducers or adaptor (if necessary) bolted to the ship's manifold flanges so as to take 2×16 in. loading hoses.

(iii) North Berth (Stablised Condensate): Stabilised condensate is loaded through the multiproduct SPM at a maximum loading rate of 35,000 bbls./hr. From the shore, the cargo passes through a single 30 in. sea line to the SPM and then into a single 20 in. floating hose, culminating in 2×16 in. overrail hoses which are connected to the ship's portside manifold.

Mooring Arrangements: For vessels arriving at this port without the approved type of "AKD" stoppers fitted, the Terminal will supply suitable snotters and shackles. These will be utilised forward to make fast the chafe chain (attached to the end of the SPM Mooring rope) to a suitable set of ship's bollards. The Pilot will advise as to this arrangement.

Warning: Ship's anchors must never be used within 0.5 miles of this berth or the 36 in. submarine pipeline and must therefore be well secured at all times.

South Berth: Crude Oil: The South Berth consists of a Conventional Buoy Mooring, connected to the shore by a 24 in. submarine pipeline. The seaward end of the pipeline terminates in 2×16 in. × 240 ft. flexible hoses.

Mooring: Vessels are moored to this berth by the use of the ship's two anchors and wires from 6 mooring buoys, (five aft and one forward).

The following equipment will be required on board each ship *in addition* to the equipment required for the North Berth (see above).

Port and starboard anchors with at least 13 shackles of anchor chain on each.

Five mooring wire drums aft and one on the portside of the foc'sle. These drums will be used for heaving up the 4.75 in. circumference wires from the mooring buoys. Vessels should provide either completely empty drums and 4 in. circumference messenger ropes of sufficient length to reach the waterline. Alternatively, the mooring wires may be spooled directly on top of the ship's wires, providing that the latter are neatly stored and sufficient space is available on the drum. However, it is recommended to remove any fibre rope, rope tails and shackles from drums.

TERMINAL INFORMATION:

SBM/CBM:

Berth	Max. *bbls./hr.*	*Fixed sea-line*	*Over rail hoses*
North (SPM) - Crude	55,000	One – 36 in.	Two – 16 in.
North (SPM) - Stabilised Condensate	35,000	One – 30 in.	Two – 16 in.
South (CBM) - Crude	40,000	One – 24 in.	Two – 16 in.

Depth of Water: Available depth of water at seaward end of sea-line is as follows:

North Berth (SPM)	65 ft. (19.6 m.)
South Berth (CBM)	48 ft. (14.6 m.)

An allowance of 8 ft. for South Berth has been made for height of sea-line end cradle above the sea bed.

Berth Limitations:

North Berth (SPM) – 320,000 Summer d.w.t.
Bow to manifold 590 ft.
South Berth (CBM) – Maximum 320,000 tons Summer d.w.t.
Minimum 50,000 tons Summer d.w.t.

Note: Minimum size of vessels at CBM is governed by vessel's length – 650 ft. minimum.

Ballast:

(i) It is essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Pilot's request as to ballast quantity and disposition.

(ii) Mesaieed is an open roadstead and subject to sudden changes in weather. *All tankers will be required to maintain a minimum of 20% of Summer deadweight ballast/load condition at all times and load/deballast concurrently.* An adequate forward draft must be maintained at all times and the freeboard from waterline to the mooring Panama Fairlead must never exceed 25 m. Vessels in light condition in strong winds risk parting the mooring hawser. Masters of all vessels should note that, should a situation arise that a vessel has to vacate the berth due to adverse weather or for any other reason, the vessel must have on board sufficient ballast/cargo to enable it to manoeuvre with safety and therefore the trim must never exceed 3.0 m.

Loading Operations: After the vessel has been securely moored in berth, loading hoses are lifted and connected to the ship's manifold.

Connection carried out by shore personnel with the assistance of ship's crew.

The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge on the deck is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

Monitoring of Cargo Quantity: During loading, hourly checks of vessel's tanks shall be made by ship's personnel to determine cargo loaded comparison with shore figures if required. This is to prevent loss of oil through a leaking hose, and particularly applies at night when seepage of oil can remain unobserved.

Pressure Surges: Closure of ship's valves against the flow of oil results in increased hose line pressure. In case of total shutdown, a shock wave can cause severe damage to the shore installation.

At all times, sufficient tanks must be open to safely accommodate the current flow rate. Any valve closure that is likely to cause a rise in pressure must be advised to the pilot *prior* to shutting down.

During "Topping-off", the pilot will be on hand, and will maintain contact with shore control to ensure the regulated decrease in loading rate required for safe operation.

Completion of Loading: When loading is completed, hoses will be disconnected and lowered, under the supervision of the Pilot.

Ships will then proceed to an anchorage allocated by the Pilot or direct to sea upon receipt of documents.

NGL Jetty: This is a 'T' type jetty with breasting dolphins flanked either side by 2 mooring dolphins. Water depth at the berth is 42 ft. (12.8 m.). The jetty is fitted with a telescopic ladder.

Max./Minimum Size:
LOA: 550 ft. – 950 ft.
Capacity: 30,000 cu.m. – 120,000 cu.m.

Mooring and unmooring operations are restricted to daylight hours. The use of 2 tugs is mandatory for berthing and unberthing at this jetty.

Products loaded are Butane, Propane and Condensate. Vapour recovery lines are provided for Butane and Propane and must be connected. Vessels without provision for this connection will not be accepted.

Loading Rates are as follows:
Butane 1,200 tonnes p.h. (12 in. loading line, 8 in. vapour return line).
Propane 1,200 tonnes p.h. (12 in. loading line, 8 in. vapour return line).
Condensate 1,400 tonnes p.h. (12 in. loading line).

Bulk Ethylene Jetty: *QAPCO No. 19:* Ethylene tankers are moored at the Qatar Petrochemical Company's facilities at Berth No. 19. Liquid ethylene is loaded through one Chicksan type 12 in. loading arm and there is a similar 6 in. vapour return arm on the North side of the loading arm. Flanges are Class 150 ASA.

Total development height of arms is 46 ft.
Maximum loading rate 600 tonnes p.h.

Mooring and unmooring operations are restricted to daylight hours. Tugs are available to assist in mooring and unmooring.

Mooring: The jetty has bollards spaced at 17 m. intervals. The jetty fendering consists of solid rubber, cylindrical fenders of 1.5 m. length and 1.0 m. diameter, spaced at approximately 10.0 m. intervals.

Mooring Arrangements:

1. Vessels moor in either direction at Pilot's discretion.
2. The actual "Tie-up" is 3, 3 and 2, fore and aft (3 head/stern lines, 3 breast lines and 2 springs).
3. There is no restriction on the LOA because Ethylene tankers are all of a certain size, which can be accommodated quite safely at the present moment. As a general guide, any vessel having a stern to manifold distance in excess of 94.0 m. should ask the Terminal for further details prior to arrival.
4. Maximum depth of water at berth is 42 ft. (12.8 m.).
5. Ship's gangway to be used.

Mooring and unmooring operations are restricted to daylight hours. One tug is used for berthing, assuming the vessel is fitted with an operational bow thruster. The use of a tug for unberthing is at the Pilot's discretion, dependent on weather.

Product Loading Berth: *NODCO – Berth No. 6:* The jetty has bollards spaced at 21.5 m. intervals. The jetty fendering consists of solid rubber, cylindrical fenders of 1.5 m. length and 1.0 m. diameter spaced at 10.5 m. intervals.

Mooring Arrangements:

1. Vessels may moor in either direction at Pilot's discretion.
2. The actual "tie-up" will be 3, 3 and 2, fore and aft (3 head/stern lines, 3 breast lines and 2 springs).
3. Maximum permitted LOA 780 ft. (238 m.).
4. Maximum bow or stern distance to manifold 390 ft. (119 m.).
5. Maximum beam 45 m.
6. Maximum arrival displacement not to exceed 60,000 tonnes.
7. Minimum depth of water at berth 13.00 m.
8. Extreme care should be taken to tend moorings and gangway, especially in N.W.ly winds.
9. Ship's gangway to be used.

Mooring and unmooring operations are restricted to daylight hours. The use of 2 tugs is mandatory for berthing and unberthing at this berth.

Loading Arrangements:

1. 2×8 in. loading arms for heavy fuel oil.
2. 2×8 in. loading arms for other products (white oils).
3. The pumping rates are as follows:
   Heavy fuel oils: 1,300 cu.m./hr. with 2 loading arms and 650 cu.m./hr. with 1 loading arm.
   White oils: 1,100 cu.m./hr. with 2 loading arms and 550 cu.m./hr. with 1 loading arm.
4. Vessels fitted with inert gas must arrive fully inerted.

CARGO HANDLING FACILITIES: Government Pilots provide berthing assistance. See "Doha".

Max. draft permissible at any state of the tide – 33 ft.
Max. draft permissible at HW – 39 ft.
Max. LOA – 850 ft.

Berth	*Length*		*Depth*		
No.	(m.)	(ft.)	(m.)	(ft.)

QAFCO S	212	700	12.0	40.0	Urea

Qatar Fertiliser Company (QAFCO): QGPC do *not* supply pilotage or agency services for vessels utilising the QAFCO jetty.

Arrival Information: Masters should telex their ETA Mesaieed 7 days, 72 hours and 24 hours in advance.

The Telex address is: Shipping Section, 4215 QAFCO DH.

The time for tendering "Notice of Readiness" is the anchoring time at the Freighter Anchorage in Mesaieed.

Please do not tender N.O.R. upon reaching the Mishut Buoy, as this pilot boarding area is not applicable for vessels using the QAFCO installation.

(QAFCO) Jetty: General: Finger Jetty 700 ft. long and 100 ft. wide, and lies in a direction 310° – 130° (T).

Fixed navigation beacon with one flashing light and one red light mounted one above the other on the seaward extremity of the jetty.

Berthing on both sides, North for bulk Urea and Ammonia loading and unloading grain, and South side for bagged Urea loading only.

Gravity fendering arrangements on jetty head protected by tubular rubber slings.

Bollards over the full length of the jetty head.

Lighting by conventional street lightings.

Jetty approach is 1,200 ft. long with a roadway 20 ft. wide.

Operational Equipment:

North Berth -	Ammonia Arm	1×10 in. liquid loading arm at a fixed point (Class 150 ASA).
	Bulk Loader	One mobile bulk urea automatic shiploader.
	Grain Unloading	6 unloading points for connecting 2 mobile grain unloading machines.
South Berth -	Bag Loaders	Two mobile bagged urea automatic ship loaders.
Loading Capacities		Ammonia at maximum 450 tonnes/hr. Bulk Urea at maximum 400 tonnes/hr. Bagged Urea at maximum 125 tonnes/hr.

CARGO: *Inert Gas System:* The Terminal will not accept any oil tanker which is not fitted with a fully operational Inert Gas System, and does not have all tanks fully inerted prior to commencement of loading.

Flash Point: Flash point of Qatar Crude is below 32° Fahrenheit.

H_2S Content: Qatar (Land) Crude contains concentrations of H_2S (sulphuretted hydrogen). This is an evil-smelling poisonous gas which can be lethal depending on concentration of gas in the air inhaled. It can be detected normally by its smell, but a high concentration of the gas rapidly paralyses sense of smell and may lead to a false sense of security. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned must be left with all possible despatch until adequate ventilation can be carried out. The explosimeter will not detect this type of gas.

It is not intended to exaggerate the dangers of H_2S and if a vessel is fitted with an operational inert gas system then these dangers can be regarded as minimal. However, in the light of experience gained, the under-noted precautions have been proved necessary to provide against a possible accident:

(a) The accommodation air-conditioning system should be placed into the recirculation mode, so that none of the toxic gas is drawn into the accommodation. *This is essential throughout the whole loading operation and is a mandatory requirement.*

(b) The H_2S meter supplied by the shore should be utilised by Ship's Officers whenever they suspect the presence of the gas. Note: The alarm setting on the meter is set at 10 ppm. The operation of the meter will have been demonstrated by the Pilot/Loading Master to the Chief Officer, who must ensure that all his Officers are fully conversant with its operation.

(c) During loading, venting of tanks should be allowed only through the agreed venting arrangements (as noted in the ship/shore safety check list). *On no account should any tank lids be opened for any purpose whatsoever.*

(d) Manual ullaging of tanks should be kept to a minimum and, if undertaken, personnel should keep to windward of the tank openings and avoid breathing fumes as much as possible. Breathing apparatus should be worn if manual ullaging of tanks is to be undertaken over a prolonged period of in a confined space.

(e) Entry into pump rooms or any compartments where gas can collect should be avoided. If entry is considered necessary, then an approved breathing apparatus and lifeline should be worn by the person entering and other persons should be standing by, and tending the life-line. One of those persons on stand-by should be wearing a second breathing apparatus set and life line, ready to rescue the person entering the compartment should the latter be overcome by fumes.

(f) Breathing apparatus, life lines and oxygen resuscitators should be readily available during all cargo and tank cleaning/gas freeing operations.

(g) During cargo discharging and tank cleaning/gas freeing operations, the gas ejector for the pump room should be kept running.

(h) Please display the notice headed "Hydrogen Sulphide the Invisible Killer" in a cargo control room, in order to ensure that all personnel connected with the loading operation are aware of the dangers.

LOADING:

Notice of Readiness: The Notice of Readiness should be addressed to the "Qatar General Petroleum Corporation, Mesaieed, Qatar".

The Notice will be *received* by the Corporation Representative, provided that the vessel is ready to load. The normal procedure is to present the Notice to the Pilot who receives it at the same time as he boards the vessel, in the majority of cases.

Laytime will commence as stipulated in the export agreement between purchasers and vendors.

Tank Dips: During loading, hourly checks of vessel's tanks shall be made by ship personnel to determine cargo loaded for comparison with shore figures if required. This is to prevent loss of oil through a leaking hose and particularly applies at night when seepage of oil can remain unobserved.

Inspection of vessel's tanks will be made by a ship's Officer before loading and, if required, by a Q.G.P.C. Representative. Opening dips and closing ullages will be taken by ship's personnel and the quantity of cargo calculated.

Particular care must be exercised by ship's personnel, towards completion of loading, in the "Topping-off" of tanks to ensure that the Terminal is given timely advice of any decrease in pumping rate required. Adequate "Stand-by" notice should be given before the final "Stop".

Loading Pumps: Three 2,230 h.p. pumps are used to load crude oil and it is important to note that any rapid changes in the oil velocity may cause pressure surges in the loading system. A pressure surge may rupture the flexible hoses connected to the vessel spilling dangerous quantities of crude oil onto the decks or surrounding areas and may also cause excessive damage to the Terminal installations. To avoid these risks, valve operations and tank switching should be done with extreme care. Please ensure that 15 minutes' notice is given for "Slow Speed" and/or "Stop" instructions. A letter of protest will be issued by the Shore Representative/Mooring Master on any occasion a pressure surge is generated, whether Terminal installations have been damage or not.

Tank Inspection Certificates: Masters should note that Corporation personnel are not authorised to sign dry tank certificates prior to loading. As such, if verification of tank inspection is required, then shipowners should make their own arrangements for a third party survey.

Bills of Lading/Documentation: There is no provision for "Early Departure Procedure" at Mesaieed, and all Masters will be provided with a full set of documentation prior to departure. It should be noted that the Agent will sign all original documents on behalf of the Master, and duly stamped copies will be signed by the Master for receipt only.

BALLAST: In the world today there is a greater awareness of the environment in which we live and the need to ensure that we protect our inheritance for future generations. As such, we ask Masters of all vessels entering Qatari waters to ensure that the ballast to be discharged is clean. You are required to sign a declaration, stating that the ballast to be discharged complies with current MARPOL regulations (Oil content to be less than 15 p.p.m.), and it should be noted that sampling of ballast water may be carried out in Mesaieed, and if proven to be in contravention of the current MARPOL regulations, then the ship will be refused permission to discharge that ballast. In effect imposing a severe financial penalty for failure to comply with anti-pollution regulations.

In addition, vessels should ensure that no oily water of any sort is discharged overboard, whether it be from bilges, pump rooms or washed overboard from deck. Scuppers should be effectively plugged and any leaks or overflows of cargo should be contained within the confines of the vessel. Any vessel found to be in contravention of these rules will be liable to heavy fines and liabilities for claims arising from pollution of the sea and shore areas. Where a vessel has caused pollution, it will be held responsible for all the costs of the cleanup operation.

The message is very clear from the Qatari Government. Do not cause any pollution, otherwise heavy penalties are in force.

MEDICAL: Medical and hospital facilities available.

DENSITY: The density of sea water in Mesaieed harbour is in the region of 1030 to 1035. However, no "Dock water allowance" should be made when calculating the departure draft, as the density of water in the region of shallowest depth of water may be less than in the Mesaieed port area, especially during a flood tide.

FRESH WATER: Available at Berths No. 6 and No. 19, but not at S.B.M., C.B.M. or L.N.G. Berth.

FUEL: Available at Berth No. 6. Also see "Doha".

CUSTOMS ALLOWANCES: The State Laws of Qatar are very strict about the import of liquor and its consumption both on the mainland and on vessels in the harbour. No employee, whether senior or junior, is permitted to import any liquor direct or to bring any liquor ashore from vessels, and under no circumstances should liquor be offered for consumption on your vessel to any Q.G.P.C. employee or any shore personnel. Vessels should seal their liquor store before arrival, and any cameras should also be placed under seal. *Heavy penalties are enforced for any infringement of the Law.*

REPATRIATION: Immigration/Transit facilities for arriving or departing ship personnel are good. 24 hours notice should be given on name, passport details and Seaman's Book No. to ensure minimum delay to travelling personnel. Officers and crew joining a vessel must have Seaman's Books.

DISCHARGE CERTIFICATE: The Master of every vessel loading at Mesaieed is handed a numbered Discharge Certificate for completion by the Customs or Port Authority at port of discharge and return by air mail to Qatar General Petroleum Corp., P.O.Box 3212, Doha, Qatar within 40 days of sailing from Mesaieed.

Instructions regarding the cable to be sent after discharging a cargo loaded at Mesaieed must be strictly followed.

It must be emphasised that failure to comply with this requirement may result in delay or even boycott of the vessel upon return to Qatar.

It is therefore in best interest to ensure that Agent at port of discharge attends to despatch of this certificate and the cable with least possible delay. Airmail should be used for Certificate posting.

N.B. If the cargo is destined for onward transit, the final destination of the cargo must be advised on the Certificate.

SECURITY: The Government of Qatar and the Corporation are anxious to ensure that unauthorised persons do not board vessels loading at Mesaieed. Vessel's co-operation is requested in checking the identity of all persons boarding.

Vessels are particularly advised to keep all points of access to vessel under surveillance at all times, and to provide maximum night illumination of vessel insofar as the safety regulations permit.

A State Police Launch is present in the area and may be available for assistance if required.

SHORE LEAVE: No shore leave is allowed in Mesaieed, but can be arranged for ship's business purposes through the Agent.

GARBAGE DISPOSAL: Not available.

Government Regulation: The MARPOL regulations regarding the disposal of garbage are now in force and as such, all vessels entering Qatari waters should take steps to ensure that no garbage is thrown over the side from their vessels. Any vessel found in contravention of this regulation will be subject to a fine, and be made to pay for any clean-up operation.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Qatar Riyals (Q.R.).

GENERAL: *Stores and Provisions:* At Mesaieed there are facilities for the supply of stores.

Photography: Photography is prohibited, all cameras on board should be kept in a locker for sealing by Customs Officer on arrival.

Q.G.P.C. Light Dues: A charge is made to cover the provision and maintenance of light buoys in the Entrance and Industrial Channels to Mesaieed. This covers one visit to this port, both inward and outward passage.

Qatar Port Dues: The State of Qatar imposes Port Dues on all petroleum carrying vessels which load hydrocarbon substances in one or more of the oil loading ports located in the State of Qatar. This includes islands and offshore areas belonging to the State of Qatar.

Note: The G.R.T. for purposes of these calculations will be that shown on the Arrival Report signed by the Master.

M.E.N.A.S. Light Dues: M.E.N.A.S. Light Dues at rates fixed by the Middle East Navigation Aids Service are payable at Mesaieed to cover both inward and outward passage through the Gulf.

Industrial channel dues are applicable to all vessels berthing at QASCO/NODCO/Commercial Harbour and QAPCO (i.e. Berths No.1-19).

Deratisation: There are no facilities for deratisation in Qatar.

DEVELOPMENTS: The new Mesaieed port, opened in 1977, has a total water frontage of 4.5 km. of which 2.5 km. has been developed to provide deep-water berths and a harbour for small craft. Three berths at the Northern end having 15.5 m. minimum depth of water at MLLW are reserved mainly for the requirements of Qatar Steel Company and 2 berths at its Southern end having 13.0 m. minimum depth of water are reserved mainly for the requirements of Qatar Petrochemical Company. Three additional berths having 13.0 m. and two berths having 10.0 m. minimum depth of water at MLLW are available for specialised and general cargoes.

Inner approach channels and manoeuvring areas have been dredged to serve all berths in the new Port.

In addition there are wharves under construction which will be used by general cargo vessels, Ro/Ro vessels, car carriers and container vessels.

A chemical plant is also being constructed.

SHIPMASTER'S REPORT: 1980 (Updated 1996).

Vessel: 210,000 tonnes d.w.

Pilotage: This is now compulsory for the inward passage too for tankers. The Pilot/Mooring Master boards by boat from Doha at Mishut Buoy in position Lat. 25° 16' N., Long. 41° 47' E.

Agents/Operators: Qatar Petroleum Producing Authority has now been renamed Qatar General Petroleum Corporation and Notices of Readiness, etc., should be addressed accordingly. Cable address: PETROQAT, Mesaieed.

Documents: 2 Crew Lists, 2 Stores Lists, 2 Bonded Stores Lists, 2 Arms and Ammunition Lists and Port Clearance from last port.

Radio: A7S was heard after contact had been established on VHF. The Mooring Master did not know of any ships ever using this station.

SHIPMASTER'S REPORT: January 1992 (Updated 1996).

Vessel called to load 25,000 tonnes of Jet Fuel.

Restrictions: Daylight berthing/unberthing only.

Tugs: Two tugs for berthing/unberthing. Tugs use ship's lines.

Berthing: Berthed at NODCO Jetty, Berth No. 6, the most Southern end of the new Mesaieed port, starboard side alongside with 3 head/stern lines, 3 breast lines and 2 spring lines. All soft ropes (See also "Plan").

Ship is turned before berthing and berths head out on heading 211° (T).

Jetty Layout: Berth No. 6 is part of a long straight quay with fenders of 1.0 m. diameter (approx.). There are 4 loading arms, 2 for black oil and 2 for white products. The black oil arms are the most Northern ones.

No shore gangway, the ship's accommodation ladder could be used.

All bitts on the quay are situated 1.0 m. (approx.) from waterfront. Not a single one further inland.

As the prevailing wind in the Winter is Northwesterly, it is possible for ships to be blown off the jetty in Winter, as there are no bollards for breast lines other than those at 1.0 m. from the quay line.

Loading: Loaded through 2 arms with 8 in. ASA 150 flanges. Max. loading rate per arm 550 cu.m./hr.

SHIPMASTER'S REPORT: June 1996.

Documents:

6 copies Crew List.
3 copies Bond List.
3 copies Vaccination List.
1 copy Stores List.
1 copy Last Port Clearance.
1 copy Health Declaration.

The following documents to be passed to Agent for onward inspection at the Port Department:

1. International Load Line.
2. Safety Equipment.
3. Safety Construction.
4. Classification for Hull.
5. Classification for Machinery.
6. Safety Radio Telegraphy.
7. Station Licence/Radio Licence.
8. Measurement/Tonnage/Freeboard Certificate.
9. Registry/Nationality.
10. Oil Pollution.
11. Master's Competency.
12. Officer's Certificates.
13. Original Crew List.

Note: No. 12 and No. 13 required only for vessels registered in Qatar.

Pilotage: Outward pilotage is compulsory for dry cargo vessels to navigate the Mesaieed Buoyed Channel, if vessel's max. draft is over 10.4 m.

AGENCY:

(A) *Tankers:*

Qatar General Petroleum Corporation (Oil and Gas Operations), P.O.Box 50070, Mesaieed, Qatar. Telex: 4050 Qpaush DH. Fax: 770421. Cable: Petroqat, Mesaieed. Terminal Tel. No.: 771219, 774221, 774223, 774568.

(B) *Other Vessels:*

Qatar National Navigation and Transport Co. Ltd., P.O.Box 153, Doha, Qatar. Telex: 4206 Melaha DH. Cable: Navigation. Tel: 321175/9, 23684, 21213.

AUTHORITY: Qatar General Petroleum Corporation (Oil and Gas Operations), P.O.Box 50070, Mesaieed, Qatar. *Tel:* 771219, 771852. *Telex:* 4050 Qpa Usd. *Cables:* Petroqat Mesaieed. *FAX:* 770421. *Contact:* Salem Abdul Rahman, Manager – Export and Marine Department.

General Cargo: Director, Department of Ports, Ministry of Communication and Transport, P.O.Box 313, Doha, Qatar. *Tel:* PABX 457457, 414626. *Telex:* 4378 Mawani DH. *FAX:* 413563. *Cables:* Mawani. *Contact:* Harbour Master. Tel: 414287.

RAS LAFFAN: 25.56 N. 51.37 E.

LOCATION: Ras Laffan is situated on the N.E. coast of Qatar, in Lat. 25° 56' N., Long. 51° 37' E. The purpose-built port has been designed as the export facility for Liquefied Natural Gas (LNG), Condensate and Sulphur derived from the processing of gas landed from the North Field Gas Reservoir situated 67 km. N.N.E. of the port.

PORT LIMITS: The port limits extend to 5 cables outside of the Main and Lee Breakwaters, and the Approach Channel, including the area within a radius of 1.0 nautical mile centred on the Fairway Buoy and includes the designated anchorage areas.

DOCUMENTS: The following documents are required by shore authorities upon arrival:

Customs:
1 copy Crew List.
1 copy Crew Declaration.
1 copy Stores List.
1 copy Bonded Stores List.
1 copy Arms and Ammunition List.
1 copy Last Port Clearance.

Immigration:
1 copy Crew List.

Police:
1 copy Crew List.
1 copy Arms and Ammunition List.

Health:
1 copy Vaccination List.
1 copy International Health Declaration.
1 copy Animals onboard.

Port Management:
1 copy Arms and Ammunition List.

Agency:
1 copy Crew List.
1 copy Crew Declaration.
1 copy Stores List.
1 copy Bonded Stores List.
1 copy Arms and Ammunition List.
1 copy Last Port Clearance.
1 copy Vaccination List.
1 copy International Health Declaration.
1 copy Animals onboard.

Note: Derat Certificate – Facilities for derat are not available at Ras Laffan Port at present.

PILOTAGE: Pilotage available 24 hours.

(a) Pilotage is compulsory for all vessels navigating within the port area, except for the following exempted vessels where the Master has, in the opinion of Port Management, sufficient knowledge of the port and approaches:
   (i) At the sole discretion of the Port Management, vessels of less than 2,000 g.r.t. which do not have on board dangerous substances to which the provisions of the Dangerous Substances in Harbour Areas Regulations 1987 apply.
   (ii) Fishing vessels and supply boats.
   (iii) All tugs operating as such exclusively within Ras Laffan Port Area.
   (iv) Military, Coastguard or Police vessels of the State of Qatar, and
   (v) Any other vessel exempted by the Port Management.

(b) Boarding Area: Vessels arriving from sea, which are required to take a Pilot in compliance with this Direction, or otherwise require a Pilot, shall take the Pilot on board in a position 1.0 miles N.E. of the Fairway Buoy. Vessels may board a Pilot in other areas only if expressly directed to do so by the Port Management.

(c) Pilotage Exemption Certificates: Will be issued, on application, at the sole discretion of the Port Management, to the Master of the exempted vessels. The terms and validity of the Certificate will be determined by the Port Management.

(d) Pilot Ladder Requirements:
   (i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots shall be supervised by a responsible Deck Officer.
   (ii) Pilot ladders shall be secured in a position well clear of any overboard discharge and such that each step rests firmly against the vessel's side.
   (iii) Pilot ladders shall be secured in a position where the Pilot can gain safe and convenient access to the vessel after climbing not more than 9.0 m. Where the vertical distance exceeds 9.0 m., then a combination or accommodation ladder and pilot ladder is required. Accommodation ladders should always lead aft.
   (iv) Adequate lighting shall be provided so that the pilot ladder and the boarding position shall be properly illuminated.
   (v) Pilot hoists are not acceptable for the boarding and landing of Pilots at Ras Laffan.

(e) Vessel Actions:
- (i) Communication with the pilot boat must be maintained at all times during the approach to, and embarkation/disembarkation of, the Pilot.
- (ii) Masters should be aware that a good lee is required for all small boat transfers, and that considerable time saving is possible if this exercise is carried out in good time and in a professional manner.
- (iii) Pilot transfers will not be undertaken at speeds in excess of 3 knots without the agreement of the Pilot.

APPROACHES: Ras Laffan port is bounded by a 6 km. long breakwater to the North (Main Breakwater) and a 5 km. long breakwater to the South (Lee Breakwater) ending at a 400 m. entrance to the port, open in an 098°/278° direction.

The 5.5 km. × 280 m. buoyed approach channel is dredged to −15.0 m. C.D., which reduces to −13.5 m. C.D. between the breakwaters, marking the beginning of the port deep water dredged area.

Charts: Vessels visiting the port must have on board a sufficient range of current hydrographic charts relevant to the area. These charts must be kept up-to-date with regard to Notice to Masters and other notices promulgated for the area.

British Admiralty Charts No. BA 3789 "Ras Laffan" (Scale 1:6,000) and BA 3791 "Approaches to Ras Laffan" (Scale 1:35,000), have been printed and are available through the usual sources or on request through the Agent.

Prohibited Areas: Masters should be aware of the live gas lines which exist (and are charted) to the West of the port. Extreme caution should be exercised when navigating in this area and adequate under-keel clearance allowed with due regard to swell, squat and the profile of the gas lines which are often routed above the sea bed.

Buoyage and Navigation Aids:

(a) Fairway Buoy: A conventional shaped buoy, painted in vertical red and white stripes, with "Ras Laffan" written in white on the sides. It has a focal plane of 6.0 m. and is equipped with:

Racon (Morse code letter 'G').

Fog signal (2 secs. blast ev. 10 secs.) range 0.5 miles synchronised with the light.

Conventional bell, worked by buoy movement.

(b) Channel Buoys: The buoys are all of a similar and conventional shape, with:
- (i) Starboard hand buoys painted green, with a green 'triangle' top mark (apex upward), and identified by white 'odd' numbers from the Fairway Buoy as RL1, RL3, RL5, RL7, RL9 and RL11.
- (ii) Port hand buoys painted red, with a red 'can' topmark, and identified by white 'even' numbers from the Fairway Buoy as RL2, RL4, RL6, RL8, RL10 and RL12.

  All channel buoys are equipped with lights (see below) which are 'gate' synchronised, i.e. RL1 and RL2 flash together, RL3 and RL4 flash together, etc.
- (iii) Buoys/Beacons – Position and Light Characteristics:

Buoy/Beacon Name or No.	*Position* North	East	*Light – Colour Characteristics*	*Range* miles
Leading Lights			R Fl.ev.1 sec.	8
Main Breakwater			G Fl.ev.5 secs.	8
Lee Breakwater			R Fl.ev.5 secs.	8
Main Breakwater Inner Spur			G 2 Fl.ev.5 secs.	5
Fairway Buoy	25° 55' 00"	51° 42' 00"	W Fl.ev.10 secs.	10
RL1 Channel Buoy	25° 55' 16.7"	51° 40' 28.7"	G Fl.ev.5 secs.	6
RL2 Channel Buoy	25° 55' 07.7"	51° 40' 27.2"	R Fl.ev.5 secs.	6
RL3 Channel Buoy	25° 55' 21.0"	51° 39' 55.6"	G 2 Fl.ev.5 secs.	6
RL4 Channel Buoy	25° 55' 12.0"	51° 39' 54.2"	R 2 Fl.ev.5 secs.	6
RL5 Channel Buoy	25° 55' 25.4"	51° 39' 22.6"	G 3 Fl.ev.5 secs.	6
RL6 Channel Buoy	25° 55' 16.4"	51° 39' 21.1"	R 3 Fl.ev.5 secs.	6
RL7 Channel Buoy	25° 55' 29.7"	51° 38' 49.4"	G Fl.ev.5 secs.	6
RL8 Channel Buoy	25° 55' 20.7"	51° 38' 48.0"	R Fl.ev.5 secs.	6
RL9 Channel Buoy	25° 55' 34.0"	51° 38' 16.4"	G 2 Fl.ev.5 secs.	6
RL10 Channel Buoy	25° 55' 25.0"	51° 38' 14.9"	R 2 Fl.ev.5 secs.	6
RL11 Channel Buoy	25° 55' 38.3"	51° 37' 43.3"	G 3 Fl.ev. 5 secs.	6
RL12 Channel Buoy	25° 55' 29.3"	51° 37' 41.8"	R 3 Fl.ev. 5 secs.	6

Attention is drawn to the service provided by MENAS who promulgate warnings for the whole Gulf area.

Masters are required to report any navigational hazards to MENAS, via cable: Megulite Bahrain, Telex: 8246 Menas Bn. or Fax: 727765.

Turning Circles:

(a) A turning circle of 750 m. diameter is situated within the Deepwater Harbour. In general, all vessels berthing within the Deepwater Harbour will turn and berth so that the vessel's bow is heading towards the entrance when berthed.

(b) A turning circle of 350 m. diameter, located between the Lee Breakwater and the S.W. end of the Sulphur loading peninsula, accommodates vessels bound for the heavy lift/Ro-Ro berth.

ANCHORAGES: Anchorages have been designated off the port within the following co-ordinates:

Western Anchorage:	Lat. 25° 58' N.,	Long. 51° 41' E.
	Lat. 25° 56' N.,	Long. 51° 41' E.
	Lat. 25° 57' N.,	Long. 51° 40' E.
	Lat. 25° 57' N.,	Long. 51° 42' E.
Eastern Anchorage:	Lat. 25° 54' N.,	Long. 51° 45' E.
	Lat. 25° 54' N.,	Long. 51° 47' E.
	Lat. 25° 55.5' N.,	Long. 51° 45' E.
	Lat. 25° 55.5' N.,	Long. 51° 47' E.

RESTRICTIONS: *Entry/Departure:* Daylight only at present.

Draft and Trim: The approach to the port is through a buoyed channel dredged to −15.0 m. C.D. The Deepwater Harbour is dredged to a depth of −13.5 m. C.D.

(a) Arrival: Vessels shall have the propeller submerged and have a reasonable stern trim not exceeding 3.0 m.

(b) The following table shows the maximum permissible draft alongside and the height of the various berths:

Berth	*Max. Draft Alongside*	*Berth Height*
LNG	12.0 m.	+5.0 m. C.D.
Liquid 2A/2B	12.0 m.	+5.0 m. C.D.
Dry Cargo/Container	12.0 m.	+4.0 m. C.D.
Heavy lift/Ro-Ro	7.0 m.	+3.0 m. C.D.
Supply/Service Berth	To be agreed	+3.0 m. – 3.5 m. C.D.

Under-Keel Clearance: A minimum UKC of 1.0 m. alongside and 2.0 m. elsewhere within the Deepwater Harbour area is to be maintained.

MAX. SIZE: The enclosed port area accommodated LNG carriers of up to 135,000 cu.m. capacity, part laden/ballasted tankers up to 300,000 Summer d.w.t., dry cargo vessels, and supply vessels serving the North Field Gas Reservoir operations.

Berth Limitations:

(a) LNG/Liquid: The following limitations shall apply:

Vessel/Berth Criteria	LNG 1 and 2	Liquid Berth 2B
Max. vessel length overall	298 m.	345 m.
Min. vessel length overall	170 m.	165 m.
Max. bow to manifold	146 m.	170 m.
Max. stern to manifold	186 m.	170 m.
Max. allowable draft alongside	12 m.	12 m.
Max. vessel displacement	105,000 tonnes	152,000 tonnes

(b) Dry Cargo and Heavy Lift/Ro-Ro Berths:

Vessel/berth Criteria	Dry Cargo Berths	Heavy Lift/Ro-Ro Berth
Max. vessel length overall	To be agreed.	175 m.
Ramp width	–	34 m.
Min. vessel length overall	To be agreed.	To be agreed.
Water depth alongside	−13.0 m. C.D.	−8.0 m. C.D.
Maximum cargo load at the berth	3 tonnes/sq.m.	3 tonnes/sq.m.
Max. vessel displacement	60,000 tonnes.	21,500 tonnes.

Under all circumstances:

Head lines must lead ahead, or by exception no more than 5° astern of a line at right angles to the fore and aft axis of the vessel.

Stern lines must lead astern, or by exception no more than 5° ahead of a line at right angles to the fore and aft axis of the vessel.

In addition to the foregoing, due consideration must be given to the operating envelope of the loading arms at the berth as specified in the relevant Terminal Regulations and Information. The Port Management reserves the right, at its sole discretion, to change the above limitations.

HEALTH:

(a) Radio Pratique can be obtained via the vessel's Agent providing the Master can declare that there has not been a serious illness on board for the preceeding 30 days.

The following information is supplied to the Quarantine Officer via the vessel's Agent:
- (i) Ship's name and flag.
- (ii) Master's name.
- (iii) Number and nationality of officers and crew.
- (iv) Ports visited during the last 21 days.
- (v) Has the vessel any suspected case of Plague, Cholera, Yellow Fever, Typhus, Smallpox, or any other infectious disease.

(b) All crew members shall be in possession of a valid Cholera Certificate.

(c) The standard International Declaration of Health is required upon arrival. Copies can be provided by the Agent if not available on board.

RADIO: Vessels are required to inform Ras Laffan Port Authority of their ETA 7 days, 72 hours and 24 hours prior to arrival (Also see "VHF – Port Control").

Tankers intending to lift condensate should state the amount of ballast onboard and whether SBT or CBT.

Notice of Arrival: In order to expedite Pilot attendance, Masters should endeavour to confirm their final ETA to Port Control 6 hours prior to arrival to Ras Laffan Fairway Buoy. When 5 miles off the Fairway Buoy, Masters shall advise "Ras Laffan Port Control" (See "VHF").

Pre-Arrival Information: Vessels which are required to take a Pilot for Ras Laffan Port are required to provide the Port Management with the following information:

ETA's at least 7 days, 72 hours and 24 hours in advance of arrival, with notification of variations in excess of 4 hours within the last 24 hours.

Vessels should contact "Ras Laffan Port Control" by VHF within 6 hours of arrival via Channels 16 or 12.

The 72 hours ETA shall include the following information:

	Pre-Arrival Information	*LNG*	*Tanker*	*Dry Cargo*
1	Ship's name and call sign	x	x	x
2	Port of Registry	x	x	x
3	Name of Master	x	x	x
4	G.r.t.	x	x	x
5	Arrival Displacement	x	x	x
6	Summer Deadweight (metric tonnes)	x	x	x
7	Length Overall	x	x	x
8	Draft fore and aft – Arrival	x	x	x
9	Draft fore and aft – Sailing	x	x	x
10	Advise quantity of clean segregated ballast to be discharged at this Port.	x	x	x
11	Advise any vessel defect affecting cargo operations or manoeuvring/mooring ability.	x	x	x
12	Confirm P&I Club name / validity.	x	x	x
13	Confirm Pollution Cover	x	x	x
14	Last 3 Ports of Call	x	x	x
15	Last 3 Cargoes		x	x
16	Does vessel have fully operational Inert Gas System.	x	x	
17	Condition of tanks on arrival.	x		
18	Are all cargo tanks inerted to air oxygen level of 8% or below.		x	
19	Is gas detection system operational.	x		

x = To be completed as indicated.

	Pre-Arrival Information	*LNG*	*Tanker*	*Dry Cargo*
20	Are smoke/fire detection and fixed fire extinguishing systems operational.	x	x	x
21	Amount and grade of cargo required.	x	x	x
22	Size, rating, and standard of cargo manifold connection.	x	x	
23	Distance of centre manifold from the bow.	x	x	
24	Height of manifold above keel.	x	x	
25	Distance between manifold flange centres.	x	x	
26	Distance of manifold from ship's side.	x	x	
27	Distance from manifold face to first full restraining bracket.	x	x	
28	Maximum loading rate.	x	x	
29	Anticipated loading time.	x	x	
30	Confirm cargo transfer emergency stops fully operational and date of last test.	x	x	
31	Confirm tank high level and pressure alarms operational.	x	x	
32	Confirm that remotely operated manifold valves have been operated through a complete open/closed cycle, ensure correct functioning and advise valve type (ball, gate, etc.) and actual closing time. Note: Subject valves must close within 30 secs. of operation with the final 20% of closure taking at least 6 secs.	x	x	
33	Both anchors to be cleared away and main engine tested astern before Pilot boards.	x	x	x
34	Vessel's Inmarsat No., Telex No. and Fax No.	x	x	x

x = To be completed as indicated.

VHF: *Port Control:* The Port Control Room is located at the top of the Port Control Tower and is on stand-by for 24 hours a day for communications. Masters are encouraged to contact "Port Control" (VHF Channels 12 and 16) should they have any concerns or be in doubt as to the operational requirements of the port. Port Control Tower equipment includes both long and short range radar, VHF coverage, and a range of meteorological instruments.

(a) All movements within the port limits are subject to the permission of the Port Management. Any vessel wishing to enter, leave, or move within port limits should seek the permission of "Port Control" on VHF Channel 12 *before moving*.

(b) Masters should note that the *dredged channel* to/from the port is subject to controlled *one way navigaiton* at all times.

(c) Routine weather forecasts and navigation warnings may be obtained from Port Control on request.

(d) Information and advice is given in good faith with no guarantees as to accuracy.

Shipping Movements, Navigation and Weather Broadcasts:

(a) Shipping Movements:

(i) All marine movements within Port Limits are controlled by "Ras Laffan Port Control" (VHF Channels 16 or 12). All vessels are required to contact Port Control before entering, leaving or manoeuvring within port limits.

(ii) The dredged channel is subject to *one way navigation*, with all movements within this channel and the Deep Water Basin being prohibited during the entry or departure of vessels bound to, or from, any of the berths in the Deep Water Basin. The movement of such vessels will be advised by "Port Control" on VHF Channel 12; approximately 30 minutes before their intended time of entering the dredged channel or letting go.

(b) Navigation and Weather Broadcasts:

(i) Routine navigation warnings and weather forecasts may be obtained, on request, from the Port Control on VHF.

(ii) Non-routine/urgent navigation warnings will be broadcast as soon as received and repeated every hour on the hour for the following 3 hours.

Communications:

(a) All communications shall be in English.

(b) Communications shall be directed through the proper channels as agreed during the Pre-Loading Meeting. If in doubt, Masters are requested to contact "Port Control", using the following communications table for guidance:

Communications	*Primary*	*Secondary*	*Back-up*
Port Control	VHF Channels 12 and 16	Ship Telephone	Fax/Telex
Ras Laffan Agency	Ship Telephone	VHF 12 and 16 via "Port Control".	Fax/Telex

TUGS: 4×4,700 h.p. (55 ton B.P.).

(a) All towage operations within the port limits shall be performed by tugs provided by the Port Management.

(b) Tugs lines (44 mm. steel wire) are used during normal towing operations. The *minimum* number of tugs required under normal operating conditions will be decided by the Port Management at their sole discretion.

(c) Vessels equipped with a thruster(s) are not subject to a reduction in the indicated tug requirements.

Tug Stand-By: Any request for the services of a stand-by tug or additional tugs should be directed through "Port Control" on Channels 16 or 12.

BERTHING: General Cargo:

Berths:

Length of heavy lift berth – 150 m.

Total length of dry cargo berths No. 1 and 2 – 600 m.

Equipment: Cranes up to 130 tons capacity, bulk sulphur loader (Rate 1,000 tonnes/hr.), forklifts and trailers available.

Tankers/Gas Carriers: *Moorings/Fire Wires:*

(a) The *minimum* mooring requirement for gas carriers and tankers is:

Lines	*Forward*	*Aft*
Head/Stern	3	3
Breast	3	3
Springs	2	2
Fire Wires *	1	1

* During the vessel's stay, the fire wires should be positioned on the offshore bow and quarter with the towing eye maintained at a height of 1.0 m. above the water edge at all times.

The shipboard end should be made fast on the bitts whilst allowing sufficient slack flaked out on deck for effective towing, the slack being secured in a safe and professional manner.

Masters should not hesitate to increase the number of moorings, should they feel it is prudent to do so.

(b) Mooring lines are to be in good condition and without splices in their working length. Coiled or flaked ropes should be turned up on the bitts in the 'figure of eight' style where possible. Ropes turned up on the winch drum and backed-up on bitts are not acceptable.

(c) Mooring wires and ropes with dedicated winch drums must be spooled in the correct direction on the winch drum.

(d) Mooring lines used in a common direction (head/stern/breast/springs) shall be of similar breaking strength, elasticity and material. Under no circumstances will a mixture of wire and synthetic ropes be accepted in a common direction, except moorings which are additional to the indicated minimum requirements.

(e) On completion of mooring, winches should be out of gear with the brakes 'hardened up'. Winches must NOT be left on 'automatic tension'.

(f) It is the Master's responsibility to ensure that:

(i) Their vessels are securely moored in line with the foregoing and with due regard to the current weather forecast.

(ii) A strict watch, of sufficient and proficient personnel, is maintained to ensure that moorings are tended, as required, to prevent slack or overtaut lines, and undue movement of the vessel.

(iii) Weather forecasts are monitored during the vessel's stay alongside, and appropriate action taken in advance of deteriorating weather.

(g) Regular checks of the moorings shall be undertaken by the shipboard personnel, arranged by the vessel's officers. The Master shall remain at all times responsible for ensuring the integrity of the vessel's moorings.

(h) Failure to adequately tend the moorings will be considered a breach of the Port Regulations with consequent and appropriate action taken by the Port Management.

LOADING: *Pre-Operations Meeting and Inspection:* On completion of mooring, all vessels, except those exempted by the Port Management, shall pursue the following actions:

(a) The mooring pattern shall be regularly monitored.

(b) Pre-loading meeting shall be attended by the appropriate representatives onboard the vessel to discuss with representatives from the relevant Terminal, and the Port Management.

(i) Ship/shore communications.
(ii) Ship/shore Safety Check List.
(iii) Emergency Procedures.
(iv) Cargo Handling Plan.
(v) Bunker/Ballast Handling Plan.
(vi) Permit to work requirements.
(vii) Any concerns or operational requirements.

(c) An inspection of the vessel will be carried out:

(i) To confirm compliance with the ship/shore Safety Check List.
(ii) In line with requirements of Port Regulations.

(d) Whilst the vessel is alongside, subsequent inspections may be carried out at any time by the Port Management.

Loading Arms and Gangway Tower:

(a) Maximum Design and Operational Limits (Refer to the relevant Terminal Regulations and Information).

(b) Manifold Connection/Max. Loading Rates, to be confirmed under the relevant Terminal Regulations and Information.

(c) ESD System Alarms (Refer to the applicable Terminal Regulations and Information).

Ballast/Oil Transfers/Pollution:

Note: The waters around Ras Laffan are renowned for their abundant marine life, and there is an increasing awareness of the environment in the Ras Laffan area.

Any pollution affecting the well-being of the area is looked upon as extremely serious and will incur heavy penalties in addition to any clean-up costs.

Ras Laffan Port does NOT have ballast or oily water reception facilities. To protect the interest of all parties, Masters should be guided as follows:

(a) The discharge of 'clean' ballast from Segregated Ballast Tanks (SBT) is permitted.

(b) All ballast water other than that contained within SBTs shall be retained onboard.

(c) It is NOT allowed to discharge cargo tank ballast, oil, or any mixture containing oil into the waters of the port.

(d) Ballast water for discharge at this port will be sampled and analysed periodically by the Port Management.

Should any analysis indicate that the quality of the ballast water does not conform to that required within the "Environmental Guidelines" as published and amended from time to time by the Port Management, then appropriate action will be pursued. A table of the criteria for 'clean ballast' is given below:

Substance	*Units*	*Max. allowable*
Ammonia	mg/l	3
Biochemical Oxygen Demand	mg/l	75
Chemical Oxygen Demand	mg/l	470
Floatable Oil and Grease	mg/l	Nil
pH	pH units	6 – 9
Total Suspended Solids	mg/l	35
Total Oil	mg/l	15
Total Organic Carbon	mg/l	150

In line with the ROPME Protocols any water discharged into the Arabian Gulf should be free from substances that:

Settle or form objectionable deposits.

Float as debris, scum, oil, or other matter to form nuisance.

Produce objectionable colour, odour, or turbidity.

Result in impact on the adjacent open Gulf water quality and injure or are toxic or produce adverse physiological responses in humans, marine animals or plants.

(e) Whilst within the port limits, the internal transfer of any oil or slops is not permitted without the approval of the Port Management.

(f) In the event that pollution, on the land or within the waters of the Port Limits occurs, regardless of cause or origin, the person in charge or responsible for the operation, works or location where such pollution occurs, shall immediately report the incident via the Port Control by the most expeditious means.

Immediate action must be taken to stop or minimise further pollution and contain or clean-up any spillage of oil on the vessel's deck or shore areas.

Failure to report a pollution incident is a serious offence against the Regulations, and persons found contravening this requirement will be liable to heavy fines and prosecution in Qatari courts.

Cargo Handling Rates:
LNG: 10,000 cu.m./hr.
Condensate: 4,000 cu.m./hr.

STEVEDORES: Supplied at the request of the end user.

MEDICAL: Medical attention is available and should be requested via the Agent for routine matters and via "Port Control" (VHF Channels 16 and 12) for emergencies.

Charges for medical services will be borne by the vessel via the Agent.

FRESH WATER: Only available in an emergency.

FUEL: Bunkering facilities are not available at present. In an emergency, gas oil can be supplied by road tanker at the dry cargo and non-hydrocarbon berths only.

REPAIRS: No facilities.

SURVEYORS: Several surveyors appointed by classification societies are established in Doha (American Bureau of Shipping, Bureau Veritas, Det Norsk Veritas).

Several cargo surveyors are also stationed in Doha (Caleb Brett, SGS Redwood, Watson Gray).

GANGWAY/DECK WATCHMEN: Compulsory. To be supplied by vessel.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: No limit on cigarettes or tobacco. Alcohol prohibited.

REPATRIATION: *Immigration and Transit:* Immigration and transit facilities for arriving and departing ship's personnel are available and efficient through Doha International Airport. A minimum of 48 hours notice is required with full details of names, Passport and Seaman's Book for crew transits.

Note: A Seaman's Book is mandatory in order to join a vessel.

AIRPORT: Doha International Airport.

HOLIDAYS: None.

POLICE/AMBULANCE/FIRE: Contact "Port Control".

TELEPHONES: GSM (Global System for Mobile Communications) telephones are available on request through ship's Agent.

BANKS: The following banks are available within 30 km. of the port:

Doha Bank Ltd. (Head office: Tel: 456600. Fax: 416631).

Commercial Bank of Qatar (Al Khor Branch. Tel: 721819. Fax: 721934).

Qatar National Bank (Al Khor Branch. Tel: 720127. Head office, Doha. Tel: 407407. Fax: 413753).

Other banks are available in Doha.

SHORE LEAVE: Shore leave can be arranged through the vessel's Agent, including transport from and to the vessel.

IDENTIFICATION CARDS: Shore passes are supplied by the Agent to the Master and shall be returned prior to sailing.

WASTE OIL DISPOSAL: Not available.

CURRENCY: The unit of currency is the Qatar Riyal, which is divided into 100 Dirhams.

Denominations are issued as follows:
Qatar Riyals: 1, 5, 10, 50, 100 and 500.
Dirhams: 25 and 50.

The Qatari Riyal is fixed against the U.S.Dollar at approximately QR 3.65/U.S.$ 1.00 (July 1996).

There are no exchange control regulations in Qatar.

WEATHER: *Meteorological Conditions:*

(a) Wind: The prevailing winds are from the North to N.W., particularly during the Winter and Spring months.

(b) Air Temperature: Winter – ranges from 6°C at night to 23°C during the day.

Summer – ranges from 27°C at night to 45°C+ during the day with very high relative humidity.

(c) Sea Temperature: Ranges from 18°C in the Winter to 34°C+ in the Summer with the maximum recorded being in early September.

Tidal Conditions: In general, the tidal current sets in a direction parallel to the coast line at rates up to 2 knots South-going and 1.6 knots North-going. Considerable increases in currents occur during extended periods of strong and constant direction winds.

The normal tidal range is between +0.3 m. and +1.8 m. C.D. However, tidal heights may be affected by abnormal meteorological conditions.

Tidal information may be requested from "Port Control" on VHF Channels 12 and 16.

GENERAL: *Alcoholic Drinks/Drugs:*

Note: Qatar is a Muslim country with very strict laws governing the import and consumption of alcohol, both on the mainland and on vessels in the port.

(a) Masters are advised that the consumption of alcohol within the port is not permitted; and that the bonded store will be sealed by the relevant authority on the vessel's arrival alongside. Heavy penalties may be imposed on any infringement of the law.

(b) The use or possession of drugs anywhere within the State or territorial waters of Qatar is strictly forbidden with heavy and severe penalties for any transgressor. Masters are reminded of their responsibility for the security of prescription drugs carried onboard vessels.

Cameras: The use of cameras including video cameras within the port limits is strictly prohibited without the prior written permission of the Port Management.

Firearms: All firearms, including ammunition, shall be declared to the Port Management who will specify the security arrangements required as imposed by the governing authorities.

Fishing: Fishing is prohibited within the port area.

Flags and Signals: When within port limits, from sunrise to sunset, all vessels shall fly their national flag and the national flag of Qatar. In addition, vessels shall at all times comply with the International Code of Signals and display flags, shapes and lights as required by the International Regulations for the Prevention of Collision at Sea.

Gangway Requirements:

(a) The purpose-built shoreside gangway shall be used at all times unless unavailable or unsuitable for the vessel at which time the vessel is to provide a gangway as (b).

(b) (i) Any gangway provided by the vessel should conform with the Regulations with correctly rigged rails, embarkation steps, safety net, and appropriately positioned lifebuoy.

(ii) During the hours of darkness, the access area on deck and where possible the length of the gangway should be floodlit.

(iii) A gangway and manifold watch shall be maintained at all times by competent shipboard personnel.

(c) During the vessel's stay alongside, notices and information shall be displayed at the gangway access area as required under the relevant Terminal Regulations and Information.

Port Clearance: Every vessel wishing to leave the port shall obtain a Port Clearance issued by the Port Management. A Port Clearance may be withheld from any vessel by the Port Management for any violation to the provisions of the Laws and Regulations, or for any legal cause or restraint duly ordered by the court in the State of Qatar, or for non-payment of port charges.

Port Services: Only services provided or authorised by the Port Management shall be utilised within the port area. The use of the port equipment, services and facilities shall be given priority over other third party equipment, services and facilities. Requests for the various services shall be made through the Agent. No third party services, equipment or facilities shall be allowed within the port area without the written approval of the Port Management.

Ship/Shore Co-Operation – Vessel Alongside: Whilst a vessel is alongside at the LNG, Liquid or dry Cargo Berths:

(a) The relevant end-user shall appoint and maintain at the Terminal, at all times, a sufficient number of qualified and experienced persons, including a competent person with suitable marine expertise, to monitor the progress of all operations aboard the vessel and to ensure reliable communications are maintained with the Master and the Port Management.

(b) The Master shall ensure that his staff who are charged with the responsibility of conducting or overseeing the cargo operations and related duties are qualified and competent, including the ability to communicate in English. Sufficient vessel personnel shall be made available at all times to ensure that the Port Management requirements for safe and efficient operations and mooring practices are observed and that adequate ship/shore liaison is maintained. The Master and his delegated staff shall ensure that the instructions and requirements that may be imposed by the Port Management, pursuant to these Regulations, are attended to and performed with reasonable despatch and in an appropriate manner.

Shipboard Radio and Radar Equipment: A vessel's main radio station, including emergency transmitter, shall not be used when the vessel is within 400 m. of any Terminal or loading vessel. While berthed, the transmitting aerials shall be disconnected and earthed. At the LNG and Liquid berths, VHF and UHF communications with a radiated power of 1 Watt or less are allowed. All other portable communications equipment at the LNG and Liquid berths shall be intrinsically safe type.

It is prohibited to operate ship-borne radar having a peak pulse power in excess of 60 kW within the following distances from any Terminal or loading vessel:

(a) Radar operating below 2 GHz – 400 m.

(b) Radar operating above 2 GHz – 200 m.

The testing of transmitters operating between 415 kHz and 26 MHz or ship-borne radar with a peak power pulse exceeding 60 kW is permitted if:

(a) The vessel's associated equipment does not present a source of ignition.

(b) The written permission of the Port Management has been obtained prior to any testing.

Shipboard Hot Work: Repair work involving burning, welding, flame cutting, brazing, grinding and similar operations which produce ignition sources, including the use of naked lights, are prohibited unless a Hot Work Permit has been issued by the Port Management. Any violation could result in the cessation of the cargo operations and the vessel requested to vacate the berth, and being put to anchor pending a full inquiry. The vessel will be responsible for all the costs and delays whatsoever resulting from such action.

Security: The Government of Qatar and the Port Management require that no unauthorised persons board vessels within the port limits. Masters are required to check the identity of all persons boarding their vessel. A gangway watch must be maintained at all times by competent shipboard personnel, and any unauthorised attempt to board the vessel being reported immediately to Port Control. Security passes are required for all personnel proceeding ashore; these can be arranged through the Agent.

Ship Standards:

(a) Gas Carriers and Tankers:
  (i) Tankers nominated for Ras Laffan Port must be less than 20 years of age.
  (ii) Gas carriers and tankers nominated for Ras Laffan Port are required to be vetted and accepted as 'suitable' before the nomination is confirmed.
  (iii) First time callers and vessels not having visited the port in the last 12 months will undergo a safety inspection in accordance with OCIMF recommendations prior to commencement of cargo loading.
  (iv) Update inspections will be performed on successive visits at the discretion of the Port Management.
(b) OBO Vessels: On application, OBO vessels may be accepted at the sole discretion of the Port Management, and shall be subject to conditions and requirements to be advised.
(c) Dry Cargo Vessels: Shall be inspected on berthing to ensure compliance with the safety and environmental policy of the port.
(d) Supply Vessels:
  (i) Shall be inspected on their first visit to the port and at random intervals thereafter to ensure compliance with Port Management requirements.
  (ii) The vessels procedures for the transfer of materials, equipment, oil and water shall be subject to the approval of the Port Management.
  (iii) Special provisions shall apply to the supply vessels authorised to use Ras Laffan Port as a regular base for their operations. Such provisions shall apply to access and security, environmental protection, safety arrangements and emergency procedures.

Ship to Ship Transfer: The ship to ship transfer of cargo, bunkers, water, stores, provisions, or any other materials and equipment in the port, or within the port limits, is strictly prohibited without the written permission of the Port Management.

Small Craft:

(a) Entry to the port is restricted to authorised vessels only.
  Mooring buoys have been positioned to the North of the Main Breakwater and to the South of the Lee Breakwater, for the free use of fishing boats, dhows, pleasure boats, and other small craft. When using such buoys, small craft owners and sailors do so at their own risk and the Port Management reserves the right of control over the use of such buoys.
(b) Any vessel requiring lifeboat exercise within the port area must first obtain the written permission from the Port Management.

Stores and Provisions: Stores and provisions, with the exception of alcohol and pork products, are normally obtainable through the Agency.

Stores and/or Spare Parts:

(a) Stores, other than hand carried provisions and laundry, are NOT allowed to be taken onboard during the loading of LNG or Condensate cargoes.
(b) Barges or craft carrying stores or spare parts are NOT allowed alongside any LNG or liquid tanker when the loading arms are connected. Delivery of stores and/or spare parts by barge or boat should be arranged for the period before or after loading. Arrangements shall be made through the Agent.

Swimming: Swimming is not permitted within the port area.

Tank Lids/Cargo and Bunker Connections:

(a) Tank lids, other than SBT, must be closed and gas tight at all times.
(b) Cargo and bunker connections not in use must be blanked and gas tight with *all holes bolted.*

Tank Cleaning/Gas Freeing/Purging: Tank cleaning, inerting, purging or gas freeing within the port area is strictly prohibited without the written permission of the Port Management, with the exception of associated and agreed routine procedures pertaining to the LNG carriers operations performed under the relevant Terminal Regulations.

Weather Working Parameters:

(a) Weather working parameters will be established and advised to the Master by the Port Management.
(b) Electrical storms – during periods of localised electrical storms, cargo operations shall be suspended and all cargo valves closed, ensuring that no pressure build-up occurs in the tanks.

DEVELOPMENTS: Liquid Product Berths 1A, 1B, 3A and 3B are unlikely to be in operation within the next 2 years.

OPERATOR: Qatar General Petroleum Corporation, P.O.Box 47, Doha, Qatar. *Tel:* 402085. *Telex:* 4201 Qatoff Dh. *FAX:* 402512. *Cables:* Qatoff, Doha. *Contact:* Taieb Belmahdi, Manager – Ras Laffan Port.

Agency: Agency services are performed by QGPC Agency Department (the Agent). Telegraphic address, contact modes and numbers to be provided later.

NOTES

Please also advise Shipping Guides Ltd.

Reunion Island

POINTE DES GALETS: 20.55 S. 55.17 E. (See Plan)

LOCATION:
West Port: 20° 55' S., 55° 17' E. The West Port is comprised of the North Dock and the South Dock.

East Port (Baie de la Possession): 20° 54' 50" S., 55° 19' 40" E. The East port comprises the West Dock (Berths P.10 and P.11).

Arrival time at both ports is the time when the vessel crosses the leading line no more than 2 miles from the breakwaters.

FLAG: French flag.

APPROACHES: *West Port:* Channel and Buoyage: The leading line 102° 30'. In the channel the depth is 10 m., 70 m. wide and is buoyed by 4 spars, 2 on each side.

The leading marks for access to the North Port, South and Fishing Port, respectively 009°, 189° and 260°, are marked as shown below:
North Dock: By day, 2 white rectangular signs, with a thick red line marking the centre line, at night, 2 fixed red lights.
South Dock and Fishing Basin: 2 rectangular white signs with a black vertical line marking the centre line by day. 2 fixed green lights by night.

PILOTAGE: *East Port and West Port:* Compulsory for all vessels over 50 m. LOA. Pilot is normally ordered by ship's Agent, or in particular cases by the Harbour Master if contacted by VHF beforehand. Pilot launch carries regulation pilot signals. Pilot boards at the entrance to the port about 1 mile to 2 miles from the breakwaters. Pilot on VHF Channel 16, it is recommended that a watch be kept and ETA confirmed. *Working Hours:* Between 0430 hrs. and 2200 hrs. in the East Port, and between sunrise and sunset in the West Port.

ANCHORAGES: *East Port and West Port:* There are 2 anchorages in the roads near the port.

(a) In Baie de St. Paul in depths of about 40 m., well marked and safe except in very strong swell. Private mooring buoy available in bay.

(b) In Roads of La Possession unmarked anchorage and little used.

If vessel requires a Pilot for anchoring, then anchorage dues are incurred. Vessels anchoring by their own means do not incur charges.

RESTRICTIONS: *West Port:* Manoeuvring is best done in the early morning or at daybreak because during the day wind can make movement difficult. The current on the entry leading line varies in strength (between 1 and 2 knots) and direction. Its direction can only be determined by careful observation during the approach. As a consequence ships should be ready to anchor on instruction from the Pilot while transiting the channel.

Berth No. 8 unsafe during swell periods.

MAX. SIZE: *West Port:* Under certain conditions, the topography of the port and jetties, access is limited to the sizes below:
North Dock: Length 160 m., beam 22.0 m., draft for entry 8.5 m. Greater with preliminary agreement of the Port Authorities. Departure draft fixed by the Port Authorities. (Length 160 m. if draft less than 8.50 m.).
South Dock: Length 175 m. Beam 24 m.
Draft 8.0 m., mean draft for inbound vessels.
Draft 8.5 m., mean draft for outbound vessels.
Draft 8.5 m., max. draft for inbound vessels.
Length 160 m. Beam 24 m.
Draft 8.5 m., mean and max. draft for inbound vessels.
Draft 9.0 m., mean and max. draft for outbound vessels.
In any case, a normal trim is recommended.
Fishing Basin: Length 55 m. draft 4.50 m.

Otherwise entry or departure are under Port Station control. Normally entry only occurs at the following times depending on the season. Maximum daylight 0445 hrs. – 1845 hrs.
East Port: LOA 215 m., draft 12.0 m. and beam 34 m.

RADIO: Saint Lys or Saint Denis Radio.

VHF: Harbour Master's Office equipped with VHF. Call on Channel 16, no watch between 2200 hrs. and 0400 hrs.

TUGS: 2×2,400 h.p. and 1×800 h.p. Only used to assist vessel manoeuvring in the port. Tug joins vessel in outer harbour. Tug will also assist on roads (deliveries of mail).

BERTHING: *West Port:* Berth assigned by Harbour Master, basis vessel's length and draft. Oil tankers berth in the South Dock (P.8 and P.9). Molasses tankers berth in the North Dock (P.2). GPL, bitumen and cement tankers berth in the outer harbour at Dolphin Berth (P. H.). This berth was available for tankers less than 160 m., but now never used.
Fore Port: Channel: 70 m. usable width. Turning circle 300 m. Dredged to 10 m. Max. draft available for vessels less than 130 m. LOA: 8.00 m. Max. draft for vessels 160 m. LOA: 7.50 m. (forward) and 8.5 m. (aft).
North Dock: Narrow entrance. Max. size: 160 m. LOA and 22 m. beam. Max. draft 8.5 m.
Berth 1: 160 m. length, 8.50 m. depth.
Berths 2, 3, 4: Total length 366 m., 9.00 m. depth. Berth No. 4 used by French Navy.
Berth 5: 150 m. length, 7.5 m. depth. French Navy.
Berth 6: 140 m. length, 6 m. depth. French Navy.
Berth 7: 210 m. length, 9 m. depth. Bulk sugar loading berth, rate 400 t.p.h.
South Dock: Berths 8, 9: Each 190 m. length, 10 m. depth.
Berth S: 120 m. length, 8.5 m. depth.
Fishing Basin: 6 berths, 70 m. length, 5 m. depth. Max. draft 4.2 m.
The depths above are dredged depths.

Forklifts for handling 40 ton containers with spreaders at certain berths.

East Port: Located at Baie de la Possession, now handles 75% of the traffic for the Pointe des Galets.

Berthing is carried out between the hours of 0400 and 1900. Departures are possible up to 2200 hrs.

Approach to the port is easy. The leading line (162° True) is marked by two black diamonds on white square towers. At night, two red lights are exhibited.

In the daytime there is occasionally a strong Northerly wind and a current of 0.5 knots may be experienced. There is no swell, except at times of cyclone.

Length of quay (Berths P10 and P11): 510 m.
(Berths P15 and P16): 510 m.
Depth alongside: 12.8 m.
Depth of access channel: 13.20 m.
Width of access channel: 130 m.
Turning Basin: 300 m. × 400 m. with depth 13.2 m.

Berth P10 receives 90% of petroleum product for the port. Clinker and containers also discharged at the berth.

Berth P11 is a container terminal and handles 90% of the traffic for the port.

Berths P10 and P11 have special access conditions whereby the authorities give priority to regular users. Berths equipped with 2 post-Panamax gantry cranes. A third crane will be available early 1995.

Containers are handled at a rate of 250 per shift of 7 hours, with 4 or 5 gangs, depending on number of cranes on board the ship.

Berths P14 and P15 handle conventional cargo, bulk cargo and cars.

Bunkers are not available.

BULK HANDLING FACILITIES: *West Port:* Berth No. 7: Sugar loaded at 1,400 t.p.h. Max. draft on completion of loading is 8.20 m.

Berth No. 9: Portable vacuator for discharge of cereals, capacity 200 t.p.h.

CRANES: No shore cranes.

STEVEDORES: Normal working hours 0700 – 1400 hrs. and 1400 – 2100 hrs. Morning shift may be extended to 1700 hrs. if vessel is going to sail.

MEDICAL: Doctor and hospital facilities available.

TANKERS: Oil tankers berthing to P.10 must be fitted with I.G.S. The system must be operated from time of entering until time of leaving French waters.

Small tankers berthing to P.8 and P.9 may be authorised to discharge F.O. whose flash point is less than 63°C. Authorisation has to be obtained beforehand from the Port Authorities.

Also see "Berthing".

Operator's Report: (West Port) (Updated 1992).
Approaches: Currents generally set across the harbour entrance and vessels should not approach within one mile of the port without the Pilot onboard. Also it has been reported that when entering the channel at sunrise the sun's glare distorts and obscures some important ranges and structures.
Entry: The outer harbour is entered via a dredged channel of 10 m. (36 ft.) depth, about 70 m. (213 ft.) wide through the breakwaters. When entering the harbour between the breakwaters, a moderate speed may be necessary to compensate for cross currents. Once inside the breakwaters vessels have less than 1,500 ft. (450 m.) to the end of the outer harbour, to stop and turn 180° for berthing. Four buoys indicate limits of 8.5 m. water depth at side of dredged channel.
Weather: The port is subject to "rollers", ocean waves which though infrequent are not predictable. They occur at certain intervals, in any weather and during a perfect calm, unaccompanied by any change in the atmosphere or other indication. The first appearance is a long swell, not assuming the shape of an ordinary wave until it reaches the shore, on which it will burst with great violence, sometimes assuming greater proportions than during a cyclone.

Masters are advised to discontinue cargo transfer operations and to vacate the berth before the swell reaches the stage where the motion imparted to the ship and the consequent bumping against the pier might result in severe damage to the vessel. (A swell warning is in existence).
General: Petroleum products are stored at the Shell Terminal for Esso, Caltex, Total and Elf. White products and gas oil are discharged at Berth P10 (East Port), while heavy F.O. is discharged at Berths P8 and P9 (West Port).
Port Approaches: The approach to the port is clear of navigational dangers, but soundings are of little value as depths of 200 fathoms can be found one mile offshore. However, the land provides good radar echoes and visibility is usually good, except during heavy rain.
Special Preparations: Both anchors must be ready before arrival. Mooring lines, gangway and manifolds must be prepared for berthing starboard side to Berth P9. Ships mooring at Berths P8 and P9 must have lifting gear ready, respectively on port and starboard side, to lift cargo hoses.
Special Conditions: A tanker at Berth PH near the breakwater may have to leave the harbour and return later if another large vessel is to be turned in the outer harbour.
Tugs: Normally one tug assists making fast as required by Pilot after vessel enters within the breakwaters. Tug normally pushes, but if making fast use tug's lines.
Berthing Procedures:

Berth PH – Outer Harbour: Vessels bound for Berth PH on the North side of the outer harbour pass the berth on their port side soon after passing through the breakwaters. They are then turned to starboard with the aid of a tug and berth starboard side to the pontoons, heading seaward.

Berth PH consists of a central "T" shaped platform supporting 2 hard arms and it is protected by a breasting dolphin of steel piles. The face of this dolphin is slightly inside the line joining the 2 concrete breasting structures on which the ship lays when berthed. Resilience of breasting dolphins is rather limited.

The disposition of the bollards is not particularly favourable for a proper lead of the spring lines when the ship is positioned alongside.

Berths P8 and P9 – Bassin Pres. J. Caille: After having passed through both breakwaters the vessel turns to starboard with the aid of the tug and berths head into the dock port and starboard side to, respectively to Berths 8 and 9.

These are non-dedicated tanker jetties and are normally used for general cargo. Ships carrying gas oil are shifted to these berths from Berth PH The hose is connected purposely for the operation. Bollards are placed along the edge of the jetty. Breast lines cannot be secured. Both berths are well sheltered and not affected by swell.

Pipelines are laid under the quay and flexible hoses are connected each time the ship has to discharge.

Weather at Berth: Weather conditions are generally good except during the cyclone season which occurs November to March. The cyclone warning system is well developed and early warning can be expected. When cyclone warning is received, ships are advised to be ready to leave the port.

Fendering: The fendering system at Berth PH is made of rubber faced timber and is considered insufficient if unusually high swell imparts motion to the ship.

Gangway: Ship's gangway is used.

Facilities:

Water is available at the quays.

Fuel Oil available ex-quay at Berth P8 and P9.

Provisions are available but expensive.

Ship's stores are mostly imported and are therefore, expensive. Availability uncertain.

Ballast, Slops and Tank Cleaning: There are no slop or diry ballast facilities, and tank clearning is only allowed with special permission from the Harbour Master when 2 tanks may be made available.

Engine room slops may be discharged by prior arrangement.

Cargo Connections: Berth PH has 1 × 10 in. and 1 × 8 in. counter-balanced hard arm for handling of gas, rum, molasses, cement and bitumen. Connection is a bolted flange, ASA standard.

Berths P8 and P9 have flexible hoses, 6 in. for gas oil and 8 in. for fuel oil. Connection is a bolted flange.

Ullageas and Temperatures: Taken by a terminal representative accompanied by a ship's officer.

Oil Pollution: Pointe des Galets and all Reunion is covered by the French National "Polmar" plan to cover oil pollution prevention.

Fire Fighting: The port has its own fire brigade and both tugs are equipped with foam and water. There are also fire hydrants on the quays.

Also see "Shipmaster's Reports" – January 1987 and May 1989 (East Port).

DENSITY: 1025.

FRESH WATER: Available at all times by pipeline at the quays. Rate 10 t.p.h. minimum.

FUEL: Fuel and marine diesel available at Berths No. 8 and 9.

REPAIRS: Repairs can be effected by P.I.B. Tel: 43.80.05. Telex: 916614. Slipway facilities for vessel of 55 m. LOA and draft 4.5 m.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally performed by ship's crew who also unlash and hook containers at the 3rd height.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: 30 km. away, daily connections world-wide (Air France, Air Mauritius, S.A.A., Reunion Air Service, Point Air and Air Madagascar).

TIME: GMT plus 4 hours. No alterations during the year.

HOLIDAYS: No cargo work on May 1st or November 1st. Possible to work on January 1st, Easter Monday, May 8th, July 14th, August 15th, November 11th, December 20th and December 25th.

TELEPHONES: *West Port:* Police 42.00.17 and 42.15.80. Ambulances 18 or 42.06.53 (Private), Fire 18, Harbour Master 42.09.12. Telephones can be placed onboard at all berths.

East Port: Police 42.00.47. Ambulance and Fire 18.

SERVICES: Harold J. Thomson (Indoceanic Services) – P&I Club representative (Oceanus, Strike, London Mutual and others). Speaks excellent English, will assist with any shipping services or supplies. Tel: 42.85.85. Telex: 916252. Fax: 42.03.10.

SHORE LEAVE: Crew are allowed to go ashore.

IDENTIFICATION CARDS: Seaman's Book compulsory, to avoid visa problems.

GARBAGE DISPOSAL: Skips are placed alongside. Garbage is collected when ships depart. Contact Tel: 420130 or 432730 for details.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: French Franc (F.Fr.).

DELAYS: General cargo rate 500 – 1,000 tons per day, depending on category and conditions.

SHIPMASTER'S REPORT: 1978 (updated 1988). West Port.

Documents: 3 Crew Personal Effects Lists, 3 Crew Lists, 3 Bonded Stores Lists. Declaration of Health (Supplied on arrival).

Pilotage: Pilotage compulsory. Pilot boards 1 mile off breakwater, minimum of 12 hours' notice required.

Anchorage: At Saint Pauls Bay, 5 cables offshore in depth of 20 fathoms – the water is too deep further offshore.

Restrictions: Vessels can enter and leave at any stage of the tide during daytime. Max. beam for North Port 22 m.

Max. Size: Length 175 m. with draft 8.0 m. and length 160 m. with draft 8.5 m.

Tugs: Normally 1 tug required for berthing and unberthing in the North and South Port. (3 tugs available in 1986).

Radio: Radio station – Saint Denis Radio "FFD". VHF Channel 26 (Hours: 0800 – 2000 hrs. weekdays, 0800 – 1200 and 1500 – 1800 hrs. on Sundays and 24 hours during cyclone periods).

VHF: Pilot and Port Authority Channel 16.

Special Bulk Facilities: Bulk sugar berth – rate 400 t,p.h. No quay cranes – no Ro/Ro facilities. Facilities for handling containers and storage space for containers in North and South Dock in the West Port and at the East Port.

Fresh Water: Available.

Repairs: Facilities available.

Services: Provisions, Bunker fuel, diesel available.

SHIPMASTER'S REPORT: January 1987.

East Port: Tankers berth at Berth P10.

Currents of opposite direction are observed. At a distance of 3 miles off the breakwaters an Eastward current of 1.5 knots experienced and when 1 mile off, a Westerly current of 1.0 knots experienced.

SHIPMASTER'S REPORT: May 1989. East Port (Updated 1994).

Vessel called at La Reunion laden with mogas, gas oil and jet fuel, which was part discharged in the port "Port de la Possession".

Port: Port de la Possession (locally also referred to as East Harbour or East Port).

Documents:

5 copies Crew List.

1 copy Vaccination List.

2 copies Stores List.

2 copies Personal Effects List.

1 copy Maritime Declaration of Health.

Local Time: GMT plus 4 hours.

Communications: Communication with St. Denis Radio/FFD is rather difficult as only MF facilities available and watch keeping is during daytime only.

VHF contact can be established on Channel 16, with Port Control, but only during office hours (0400 hrs. – 1900 hrs.).

Port Authority and Pilots work from 0400 hrs. – 1900 hrs.

Anchoring: No anchoring facilities are available and vessel must drift whilst awaiting berth. Port Control confirms on VHF, time of Pilot boarding and position.

Health: Radio Free Pratique is available through the Agent.

Cyclone: Cyclone season is from January to the end of March.

Berthing: Two powerful tugs of 32 tons' bollard pull are used for berthing. Only 2 berths are available, giving access to vessels up to 215 m. LOA, 34 m. beam with a draft of 12.5 m., of which one berth is used for tankers.

Tankers: The dock has one portable Chicksan of 10 in. diameter which connects the vessel's manifold to the underground pipe. Therefore only 1 product can be discharged at a time.

Shore tanks are about 3 km. away (16 in. pipeline).

Fire Fighting: Being a container dock, portable shore fire-fighting equipment is made available for tankers, consisting of 2 lorries with water sprayers.

Telephone: Provisions for placing shore telephone on board is available.

Fresh Water: Fresh water is available at both berths.

Bunkering: No bunkering facilities at present at the East port.

Medical: The town is only 3 km. away, with adequate medical facilities. The Doctor visits the ship if requested by the Agent. However, for cases which require the attention of a Dentist or an Optician, the crew member is taken ashore by the Agent. Cholera vaccinations are also administered on board by the doctor, however, for yellow fever vaccination the crew member must go ashore.

Customs: Allowance of 200 cigarettes and 1 bottle spirits is permitted for each member of the crew to be held out of the bond.

Shore Leave: All crew members are allowed to go ashore and no shore pass is required.

Repatriation: All facilities available for crew changes and repatriation.

Airport: Daily worldwide links by Air France, Air Mauritius, SAA, Reunion Air Services and Air Madagascar.

AUTHORITY: Direction Departementale de l'Equipement de la Reunion, Arrondissement Mixte, Subdivision Exploitation du Port et du Littoral, BP 2008, 97821 Le Port, La Reunion, Republique Francaise. *Tel:* 42.09.55. *Telex:* 916428 RE. *FAX:* 42.06.02. *Contact:* R. Goavec, L'Ingenieur des T.P.E., Chef de la Subdivision S.E.P.L.

Port Captain. Tel: 42.09.12. Telex: 916249. FAX: 43.05.52.

NOTES

Please also advise Shipping Guides Ltd.

Romania

GENERAL

DOCUMENTS: After a vessel is alongside the wharf it is boarded by the Sanitary Commission (for the sanitary inspection of crew as well as for veterinary and phitosanitary inspection). On completion of the sanitary inspection the vessel is boarded by the Control Commission. The Master fills in a Form of Declaration (4 copies) which, together with the Cargo Plan, Manifest of Goods, Sanitary Certificates, etc., is handed to the representative of the Agency. Within a maximum of 12 hours after performing arrival formalities the Master or Chief Officer completes the Declaration questionnaire at the Harbour Master's Office. The following documents will be tendered which will be retained until departure:

Certificate of Nationality.
Certificate of Tonnage.
Cargo Equipment Safety Certificate.
Load Line Certificate.
Radiotelegraphy Equipment Certificate.
Safety Construction Certificate.
Ship's Register.

Note: Crew Lists and Passenger Lists must be issued in several copies (about 10 of each). If the vessel is staying more than 12 hours in the port, Provisions Lists, Crew Personal Effects Lists and Bonded Stores Lists should be issued.

PILOTAGE: Pilotage is compulsory in all Romanian Ports for all vessels. See individual ports for details.

RADIO: All radio communications are through Constantza Radio (call sign YQI) on 500 kHz. and 461 kHz. Continuous watch is maintained on VHF Channels 16 and 12.

TUGS: Towage in the roads and in the ports is compulsory for all vessels greater than 1,000 g.r.t. See individual ports for other provisions or exceptions.

STEVEDORES: Orders for stevedores must be made a minimum of 4 hours before starting operations. To apply for stevedores and for gangs of workers contact the vessel's agent.

CUSTOMS ALLOWANCES: A small quantity of goods is permitted for each crew member from the bond. The quantities for a 5 day period are:

Master: 400 cigarettes and 2 bottles of alcohol;
Rest of crew: 200 cigarettes and 1 bottle of alcohol.

Quantities in excess of these amounts are kept under customs seal. To renew these quantities from the bond, contact the agent who will contact the customs.

TIME: GMT plus 2 hours.

Summertime: GMT plus 3 hours from the first Sunday in April to the last Sunday in September.

HOLIDAYS: The official holidays in Romania are: New Year (January 1st and 2nd), Easter (2 days) (March/April), Labour Day (May 1st); National Day (December 1st); Christmas (December 25th and 26th) and all Saturdays and Sundays throughout the year.

WORKING HOURS: Official hours for starting are 0700 hrs., 1500 hrs. and 2300 hrs.

CURRENCY: 1 Leu = 100 Bani.

SPECIAL REGULATIONS: From the time a vessel enters the territorial waters of Romania until leaving the zone (12 miles), hoisting of the Romanian flag is compulsory.

Carrying out external maintenance (painting, repairs, etc.) is permitted only during daylight; at nightfall Master's must take all necessary steps to bring the equipment (tools, ladders, platforms, ropes, etc.) back on board.

If a vessel must shift from one berth to another, according to the decision of the Port Authorities, the Master of the vessel is to be advised in writing by the agent at least 2 hours in advance of such shifting. Refusal to perform the shift requested by Port Authorities, is punishable with a fine by the Harbour Master.

In order to prevent the carrying of disease and epidemics into the country by rats, Masters are obliged to install ratguards immediately after berthing. Diameter of ratguards must be at least 50 cm. If ratguards come off ropes due to wind or faulty fastening they must be replaced immediately.

Dock working is not normally available from Saturday morning or the evening of a holiday until 0800 hrs. on the following day or Monday following the weekend.

According to the custom in Romanian ports (Not compulsory), Shippers will accept Notice of Readiness only after the vessel has been inspected by the official surveyor, who issues a certificate stating vessel's fitness for loading. Survey charges are to vessel's account.

The official survey is compulsory. When loading/discharging tally charges are to vessel's account.

Throwing of garbage overboard is not allowed in the territorial waters of Romania. Failure to observe these rules results in penalties imposed by the Harbour Master. Discharge of ballast and dirty water is not allowed. Once again, failure to observe this will result in fines for pollution being imposed.

Sea Protests are to be issued (5 copies) and handed to the agent or Agency Department within 24 hours of the vessel's arrival. The Notes of Protest are to include abstracts from the Log Book containing details with regard to the respective situation. If the Log Book is presented in a language other than English, 5 copies of translation into English will also be necessary.

Protests with regard to damage caused during loading/discharging operations must be handed over to Agency as soon as possible but not later than 12 hours from the time they occured. The protest has to contain the following items:

time when damage occured;
place of damage;
description of damage;
other details if necessary.

It has to be stressed that any protests handed in later than 12 hours from the time the damage occured will not be taken into consideration by the Port Authorities.

AGENT: Ship's Agent in Romanian ports (state and private companies) may be appointed on long term contract basis or occasionally, by letter or telex before ship's arrival in the loading and/or discharging port.

The major company acting as Ship's Agents and Ship Chandlers is Navlomar S.A. Bucharest, 6 Dumbrava Rosie, P.O.Box 851, Bucharest 70254. *Tel:* 40-1-2113445, 40-1-2115096, 40-1-2114122. *Fax:* 40–1–2114121, 40-1-2114123. *Telex:* 10735, 11783 navlo r. Navlomar have branches in Constantza, Mangalia, Galatzi, Braila, Tulcea and Sulina.

When appointing an agent, Owners have to indicate vessel's name and flag, g.r.t., d.w.t., as well as n.r.t., Suez Canal Tonnage, cargo quantity for port and kind of operation.

Necessary funds for disbursements, including bunkers and special services requested, should be remitted, at agents' request, in free currency, telegraphically or by telex through one of the authorised banks in Romania, in the favour of Navlomar before sailing clearance of the vessel.

Cash to the Master in free currency may be arranged by each Navlomar branch agency if instructed accordingly by the Owner.

In required, Navlomar may also arrange supply of provisions, fresh water and small quantities of bunkers at the roads, weather permitting, lashing and technical materials, deck and engine stores.

Navlomar provides its own form of Bill of Lading.

For international telephone calls, Navlomar provides its own telephonic booths.

BRAILA: 45.15 N. 27.59 E.

LOCATION: Second river port of the Danube, situated West of the Danube Delta between km. 168.5 and km. 175, upstream from Sulina, 19.2 km. from Galatzi (B.A. Chart No. 2835).

Also see "Sulina" – "Shipmaster's Reports".

PORT LIMITS: The limits of the port are marked by km. 168.5 and km. 175.

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory for all ships. River pilots are replaced by port pilots in the roads, or during navigation in the port zone.

ANCHORAGES: For maritime vessels and river convoys the roads are situated from km. 166 to km. 168.5 (5 – 6 vessels). Vessels anchor between the channel and the right bank so as not to obstruct navigation in the vicinity of the port.

RESTRICTIONS: Navigation forbidden during poor visibility.

MAX. SIZE: Vessels of 8,500 d.w.t. and 9,000 d.w.t. may operate in Braila. The depths are between 11.1 m. and 25 m., but the drafts of vessels are limited by the Sulina Bar at 23 ft. (7.01 m.).

HEALTH: See "Constantza".

RADIO: When proceeding in the channel at Sulina Bar, all radio communications, except VHF transmissions, are prohibited.

VHF: Direct contact with local authorities is possible.

Braila Pilot Station – Channel 14 – continuous listening.
Braila Harbour Master – Channel 68 – continuous listening.

RADAR: Not available.

Continuous radio watch to be maintained on Channel 16 with Galatzi Port Control when transiting or at anchor. No vessel should proceed into the port or manoeuvre without Port Control permission.

TUGS: See "Constantza".

BERTHING: The port has 3 sectors:

1. The Old Harbour between km. 172 – km. 171 and km. 171 – km. 169.8, including the passenger quays and Berths No. 1 – 6 for general cargo, 2,200 m. total length.
2. The Dock Basin situated from km. 169.8 to km. 169, including Berths No. 1 – 4 (direct to the river), total length of 550 m. and Berths No. 5 – 17 (inside the basin) with a surface area of 10 ha. The entrance is 75 m. wide and depth is 6.0 m. – 7.5 m.
3. The Ferry Zone situated between km. 169 and km. 168.5.

BULK CARGO FACILITIES: See "Berthing" and "Cranes".

Loading/Discharging Rates:

Cargo	*Operation*	*Thousands of Tons per Ship per Day Vessel Capacity (Tons)*				
		Upto 600	601-1500	1501-3500	3501-6000	6001-15000
Ore	Direct transhipment	1.20	1.50	1.70	2.00	2.60
Coal	Direct transhipment	1.00	1.30	1.50	1.70	2.20

General		0.75	1.00	1.50	1.75	2.00
		0.30	0.40	0.50	0.70	0.90

CRANES: At Berths No. 11 – 15 there are 5 cranes of 16 tons and 5 cranes of 5 tons capacity, at Berths No. 6 – 9 there are 3 cranes of 16 tons and a conveyor bridge of 8 tons capacity. At Berths No. 1 – 3 ship's gear or floating cranes of 5 tons – 16 tons capacity are used.

The port also has 9 floating cranes of 5 tons – 16 tons capacity and 31 mobile cranes of 5 tons – 40 tons capacity.

STEVEDORES: See "General" before first port.

MEDICAL: Medical assistance is available at the city hospital. All problems will be handled by the agent.

FRESH WATER: Available.

FUEL: Bunkers are only available from the specialised berth.

FIRE PRECAUTIONS: See "Constantza".

REPAIRS: All kinds of repairs possible, including dry docking.

DRY DOCKS: See "Repairs".

SURVEYORS: The Romanian Shipping Register (RNR) is authorised for class surveillance.

GANGWAY/DECK WATCHMEN: See "Constantza".

HATCHES: Opening and closing of hatches on account of the vessel.

CUSTOMS ALLOWANCES: See "General" before first port.

CARGO GEAR: See "Constantza".

REPATRIATION: Possible.

TIME: See "General" before first port.

HOLIDAYS: See "General" before first port.

POLICE/AMBULANCE/FIRE: City Police – Tel: 055. Ambulance – Tel: 061. Fire – Tel: 081.

For all problems connected with police and ambulance contact vessel's agent on VHF Channel 10. In case of fire contact Braila Harbour Master by VHF Channels 16 and 68.

TELEPHONE: See "Constantza".

SHORE LEAVE: See "Constantza".

IDENTITY CARDS: See "Constantza".

REGULATIONS: See "General" before first port and "Sulina".

AUTHORITY: Harbour Master's Office, Gara Fluviala Street, Braila, Romania. *Tel:* 40-39-613068. *Telex:* 55279. *FAX:* 40-39-612184. *Contact:* Captain Tutuianu Nicolae, Harbour Master.

AGENT: Navlomar Braila, 27 Imparat Traian Street, Braila, Romania. Tel: 40-39-613103, 40-39-614395, 40-39-613598. Telex: 55232 Navma R. Fax: 40-39-613103. Cables: Navlomar Braila-Romania.

CONSTANTZA: 44.10 N. 28.39 E. (See Plan)

LOCATION: *Port Description:* Constantza is on the West side of the Black Sea, at 182 nautical miles from the Bosphorus and 85 nautical miles from Sulina, at the mouth of Dunarea River into the sea. Bucharest is 250 km. to the West.

The port of Constantza, the biggest port of Romania, is composed of the Northern Port, completely in operation and further on, the Southern Port, partly operational. The total surface of the port of Constantza is of 3,626 hectares, of which 1,784 hectares is land and 1,842 hectares is water.

The sea walls, the Northern sea wall and the Southern sea wall, have a length of 7.934 km. and of 5.56 km. respectively.

The Northern Port with a surface area of 789 hectares (484 hectares land and 305 hectares water, 15.45 km. quays and 78 berths) has terminals specialised in the trafficking of petroleum products, ore, coal, cereals, containers, rolled goods and general cargoes.

The Southern Port, with a surface of 2,837 hectares (610 hectares of land, 2,227 hectares of water, 13.07 km. quays and 50 berths, out of which 35 are opertive berths) has terminals specialised in chemicals, general cargo, ferry terminal (in operation), Ro/Ro and on the berths of the maritime river basin, there are arranged transhipment sectors for ore, coke and coal directly into barges which have access to the Danube-Black Sea Canal.

In the Southern Port is located the Free Zone Constantza South 37 ha. (26.7 ha. for processing-storing operations and 10.3 ha. for commercial and financial/banking operations) and the Danube-Black Sea Canal flows in and is the important navigable corridor Danube-Rhine-Main, according to EEC-UNO standards. The Danube-Black Sea Canal is in the "F" class of internal canals (Length 64.4 km., depth 7.0 m., breadth 90 m., 2 locks, 3 river ports, convoy maximum 6 barges × 3,000 tons).

PORT LIMITS: As the commercial limits of the port are marked by the breakwaters the Notice of Readiness is received at the operating berth after obtaining "Free Pratique". In order that the vessel may be considered "arrived" she should notify the port authority of the time and place of anchoring.

DOCUMENTS:

Master's Declaration.
Cargo Manifest.
Derat Certificate.
International Certificate for Prevention of Hydrocarbons Pollution.
Log for Hydrocarbons.
Cargo Plan.
Crew Lists.
Passenger Lists.
Provisions Declaration.
Crew's Customs Declarations.
Customs Declaration (seal items with value over U.S.$1,000.00).
Muster Roll.

At the Harbour Master's Office of Constantza, within 12 hours of berthing, there must be lodged, by vessel's authorised representative, the following documents:

Certificate of Registry.
Tonnage Certificate.
Freeboard Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radiotelephone Certificate.
Master's Declaration.
Crew List.
Passenger List.

At the Harbour Master's Office, the vessel's representative will fill in a Maritime Interrogation and shall have with him the vessel's stamp.

Also see "General" before first port.

PILOTAGE: Compulsory for all vessels, except navy vessels, vessels used in public service, vessel for maintenance or for the control and surveillance of navigation, intervention vessels, training, hospital and pleasure vessels.

Pilotage is compulsory for berthing, unberthing and shifting and is available 24 hours a day. The vessel's Master has to advise Agent at least 12 hours before arrival in port roadstead. At the entrance, in the zone of 12 nautical miles from the Northern jetty head, the vessel's Master shall contact "Port Control" Constantza, by VHF Channel 67, for the necessary berthing information. Contact with pilotage is on VHF Channel 14.

Compulsory zone to embark/disembark the Pilot:

In fair weather (Force 4 maximum) within the circle with a radius of 0.5 nautical miles, with centre at Lat. 44° 05' 06" N., Long. 28° 43' 06" E.

In bad weather (Over Force 4) near the position Lat. 44° 06' 24" N., Long. 28° 42' 30" E.

Traffic separation scheme for vessels entering and leaving:

(a) The separation zone has the following limits:

Lat. 44° 04.42' N., Long. 28° 43.22' E.
Lat. 44° 04.78' N., Long. 28° 43.76' E.
Lat. 44° 00.19' N., Long. 28° 48.96' E.
Lat. 43° 59.81' N., Long. 28° 49.44' E.

(b) Entrance channel into port, general direction N.W. (True course = 316°).

Lat. 44° 00.74' N., Long. 28° 50.73' E.
Lat. 44° 05.35' N., Long. 28° 44.53' E.

(c) Exit navigation channel from the port, general direction S.E. (True course = 136°).

Lat. 44° 03.88' N., Long. 28° 42.44' E.
Lat. 44° 59.27' N., Long. 28° 48.65' E.

The observance of 1972 COLREG is compulsory.

The length of the navigational channel is 6.4 nautical miles.

The breadth of the navigational channel is 0.8 nautical miles.

The separation zone (width) is 0.5 nautical miles.

The pilot boat is painted in white, with "Pilot" painted on the hull.

In the port of Constantza, pilotage is only done by licensed and authorised companies: S.C. Atlas Pilot, S.C. Sail, S.C. Pilot Service, S.C. Agigea Pilot, S.C. Rompilot and others.

ANCHORAGES: The roadstead of Constantza is limited by the following co-ordinates:

(A) Lat. 44° 10' 50" N., Long. 28° 44' 00" E.
(B) Lat. 44° 10' 50" N., Long. 28° 49' 50" E.
(C) Lat. 44° 06' 50" N., Long. 28° 49' 50" E.
(D) Lat. 44° 06' 50" N., Long. 28° 44' 00" E.

The meridians of 28° 46' 50" E. and 28° 48' 20" E. divide the anchorage into 3 zones, numbered from West to East.

Zone No. 1: Anchorage for vessels up to 40,000 g.r.t. (except tankers).
Zone No. 2: Anchorage for vessels over 40,000 g.r.t. (except tankers).
Zone No. 3: Anchorage for tankers, LPG carriers and vessels carrying dangerous cargoes.

The roadstead allows safe anchorage, with depths between 25 m. – 30 m. for 40 – 50 large ships, with the possibility to make a full swing, in case of change of wind or current direction.

In bad weather, small vessels may enter into the port waters only with the approval of the Harbour Master's Office of Constantza.

The control, surveillance and the leading of the vessels from the roadstead is done by "Port Control Constantza" by VHF Channel 67. The orders of "Port Control Constantza" are compulsory.

RESTRICTIONS: Entrance to the port during night-time is forbidden for tankers with a draft over 35 ft.

The entrance into the port of large tonnage bulk carriers is allowed in special circumstances.

MAX. SIZE: The maximum size vessel allowed is length of 330 m. (bulk carriers of 250,000 d.w.t.).

The depths up to 13.5 m. allow the berthing of large vessels, both in the docks for dry cargoes (Berths No. 66 – 68), as well as in docks for petroleum (Berths No. 75 – 76). For larger oil tankers, the port has a post at Berth No. 79, with a maximum depth of 18.0 m., a for the vessels with bulk solid cargoes, there are Berths No. 80 and No. 81 with a depth of 18.0 m.

In the Southern Port, the maximum depth at the berths for general cargoes, bulk and Ro-Ro is 14.5 m.

HEALTH: *Sanitary Inspection:* Immediately upon berthing the Sanitary Commission checks the state of health of all those on board, the nature of the cargo, particularly regarding any disease, vaccinations, etc.

If no contamination danger exists, the Sanitary Commission issue the vessel's "Free Pratique".

VHF: Permanent watch maintained.

Harbour Master's Office – Constantza	Channel 67
Port Control Constantza	Channel 67
Pilotage Constantza	Channel 14
Towage Constantza	Channel 11
Salvage Group	Channel 13
Radio Constantza	Channel 16

RADIO: Radio Constantza, call sign "YQI", working frequencies 500, 461 and 2748 kHz.

RADAR: VTS is permanently maintained by Constantza Port Control. The jurisdiction zone of Constantza Port Control is the circle with a 12 nautical miles radius, with the centre at Lat. 44° 10.2' N., Long. 28° 39.6' E.

The Master is obliged to be in permanent contact with Port Control when entering this sector as well as during stay at anchor. Entrance into port or manoeuvring in the anchorage zone are not allowed without Port Control approval.

TUGS: Compulsory for every vessel over 1,000 n.r.t. Tug's number and power are jointly agreed by vessel's Master and the Pilot. The tugs take the vessels from the point from where they are requested by the Pilot, except tankers which are taken from the entrance into the port.

Towage is performed by S.C. Coremar, S.C. Poseidon Shipping and other smaller companies.

Communication with "Towage" Constantza is by VHF Channel 11.

BERTHING:

Northern Port:	Length of quays	15 km.
	Number of operating berths	78
	Depth in basins	7.0 m. – 14.0 m.
Southern Port:	Length of quays	13 km.
	Number of operating berths	35
	Depth in basins	7.0 m. – 18.0 m.

The Port of Constantza has a warehousing surface of about 220 ha. (190 ha. uncovered and 30 ha. covered) for the general cargoes, dry bulk (coal, ore, coke, etc.) containers, steel products, construction materials, cars, etc., as well as tanks for edible oil, molasses (25,000 tons), silos for cereals (90,000 tons), silos for cement (40,000 tons), tanks for petroleum and petroleum products (1.7 million cu.m.), refrigerated warehouses (10,000 tons), silos for phosphates and apatite (30,000 tons) and silo for urea (25,000 tons).

CRANES: 167 quay cranes with a lifting capacity from 3 tons – 25 tons; 10 discharging gantries for ore, coal, coke, phosphate of 20 tons – 50 tons; 94 truck cranes; 17 floating cranes of 16 tons – 100 tons.

The specialised terminals are equipped with specific installations.

When operating, the port cranes are used, but vessels have the obligation to put at disposal, at the request of operators, vessel's lifting gear, in a full operating and safe condition.

BULK CARGO FACILITIES: There are facilities for the operation of bulk cargoes (dry and liquid) in specialised terminals.

Cereals Terminal: The operational Berths are No. 17 – 18 (minimum depth 7.0 m.), Berth No. 24 (minimum depth 7.2 m.) and Berths No. 31 – 33 (depth 8.8 m. – 10.7 m.).

Cereal loading/discharging from/into vessels or barges into/from silos or railway wagons is done by 5 pneumatic elevators, 2 suction elevators and 5 quay cranes.

Coal, Coke, Ore Terminal: The operational Berths are No. 64 – 67 (minimum depth 8.4 m. – 12.2 m.), Berths No. 80 – 84 (minimum depth 10.5 m. – 18.0 m.), Berths No. 85 – 86 (minimum depth 10.5 m.) and Berths No. 94 – 96 (minimum depth 3.3 m. – 4.3 m.).

The operation of the cargoes (discharge from the vessel into warehouses, barges, railway wagons, and loading from the warehouses into barges and railway wagons) is done with 8 dischargers from the vessels with capacity 27 tons – 50 tons; 4 loaders from the barge with capacities between 1,200 – 2,000 t.p.h.; quay cranes and floating cranes.

Chemical Products Terminal: Operating berths are Berths No. 54 – 61 (minimum depth 9.2 m. – 11.0 m.) and Berth No. 62 (minimum depth 6.5 m.). Berths equipped with 2 dischargers from the vessel of 25 tons each for phosphates and apatites. Berth No. 63 (minimum depth 9.8 m.) equipped with 2 loaders from the vessel with a capacity of 200 – 250 t.p.h. for urea.

Cement Terminal: Operating berth is Berth No. 68 (minimum depth 10.6 m.). The berth is equipped with quay cranes and 2 bulk cement loaders, with a capacity of 400 t.p.h. each.

Bulk cement can be discharged/loaded at other berths by floating cranes and a floating installation for loading cement from the barge into vessels with a capacity of 250 t.p.h.

Liquid Bulk Terminal: (Edible oil and molasses): Operating berth is No. 19 (minimum depth 7.0 m.). The liquid bulk is carried by pipes to 7 tanks of 25,000 tons capacity.

SPECIALISED CARGO HANDLING FACILITIES: The container terminal for the Northern Port (See "Berthing") is equipped with 2 container cranes of 40 tons, 2 transtainers of 32 tons, auto-trucks and lateral loaders. The warehousing capacity behind the quay is 3 ha.

The Ro-Ro terminal (Berth No. 121) in the Southern Port (See "Berthing") has parking for 120 vehicles of 12 m. length on the loading side, and a similar capacity on the discharge side.

Ferry Terminal: The ferry line between Constantza and Samsun (Turkey) is in operation since August 1995.

BRIDGES: Vessels calling at Constantza South for transiting the Danube – Black Sea Channel must ensure a maximum draft of 5.5 m. and a free height under bridges of 17.0 m.

STEVEDORES: See "General" before first port.

MEDICAL: In the port there is a polyclinic and a hospital, as well as stomatology rooms.

Emergency medical service is effected by Port Hospital, 24 hours a day, 7 days a week.

Costs vary subject to consultation, treatment or hospitalisation.

TANKERS: The petroleum terminal has 7 operating berths, from which 6 berths (No. 69, 70, 72, 73, 75 and 76) have depths between 11.2 m. – 12.5 m. (length of berth 328 m. each).

Berth No. 79 (depth 18.0 m., length of berth 405 m.) for large petroleum tankers.

The berths are equipped with coupling facilities to vessels, with a diameter of 12 in. and 16 in. (installation types are Woodfield and Flexider).

The terminal is equipped with fire preventing and fighting systems and equipment for leakages (collecting vessels, anti-pollutants barriers, etc.).

DENSITY: 1014.

FRESH WATER: Fresh water can be supplied at any berth, even during loading/discharging operations. Delivery is also available from fresh water tankers. The approximate price is U.S.$3.93 per ton for delivery from quay (Minimum order 20 cu.m.) or U.S.$10.00 per ton for delivery from the water tankers.

FUEL: Bunkering is undertaken by tanker barges in the port, and in the roadstead only with Harbour Master's Office approval.

The following types of fuel can be supplied in any quantity:

Heavy Fuel: CNM Type 2, 1500 sec., equivalent MFO 180 cst.
(approximate price U.S.$100.00/ton).
CNM Type 3, 600 sec., equivalent RDW 80 cst.
(approximate price U.S.$100.00/ton).
Gas Oil: Types 5.5 and −15 equivalent MDO.
(approximate price U.S.$255.00/ton – May 1st 1996).

FIRE PRECAUTIONS: The Master is directly responsible for the losses caused by the outbreak of fire on board, as a result of non-observance of fire prevention rules by the crew or by the workers.

Repair works on board a vessel and especially the works with open flames are done only with the approval of the Harbour Master's Office, this being requested in writing.

Smoking is forbidden on the deck and in vessel's holds as well as in the zones where petroleum products and inflammable goods are handled.

REPAIRS: In the shipyards of the ports of Constantza, Midia and Mangalia, all types of repairs are possible (hull and engine).

Floating docks:
Constantza Shipyard: 1×8,000 tons and 1×15,000 tons.
Midia Shipyard: 2×10,000 tons and 1× 20,000 tons.

Dry docks:
Constantza Shipyard:
1 dry dock for vessels up to 150,000 d.w.t.
1 dry dock for vessels up to 200,000 d.w.t.
Mangalia Shipyard:
2 dry docks for vessels up to 150,000 d.w.t.
1 dry dock for vessels up to 250,000 d.w.t.

CONSULS: China, Russia, Slovakia and Turkey.
DRY DOCKS: See "Repairs".
SURVEYORS: *Cargo Inspectors:* Gemma Star, Romcontrol, SGS, BNN and others.
Classification Societies: Representatives of Lloyd's Register, Bureau Veritas and RNR (Romanian Register of Shipping, who also represent Germanischer Lloyd, Norske Veritas, American Bureau, Nippon Register and the Russian Register).
GANGWAY/DECK WATCHMEN: Deck and/or gangway watchmen are provided by the vessel or they can be hired on request, when special cargoes are handled. The hire and payment can be arranged by the Agent.
HATCHES: Opening/closing of the hatches is carried out by the crew or by the stevedores on request.

The hatches must be open completely in all directions. The beams and the hatch covers must be moved using vessel's gear.
CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: Loading/discharging is usually done with quay equipment, but vessels must have (compulsory) their own gear ready and in good condition, in case it is required.
REPATRIATION: Transit visas are granted to seamen who wish to disembark with a view to repatriation. The issuing office is the Immigration Office in Constantza Port.
AIRPORT: The international airport "Mihail Kogalniceanu" is situated at 25 km. from Constantza and the international airport "Otopeni", Bucharest, is situated 250 km. from Constantza.
TIME: See "General" before first port.
HOLIDAYS: Sailors Day (15th August).

Also see "General" before first port.
POLICE/AMBULANCE/FIRE:

Port Police – Tel: 619100/1955.
Port Ambulance – Tel: 619100/1961.
Port Fire Brigade – Tel: 619100/1981.

EMERGENCY CO-ORDINATION CENTRE: In any emergency contact Port Control Constantza on VHF Channel 67 or Group Salvage on VHF Channel 13.
TELEPHONE: It is possible to hire mobile telephones for U.S.$. 10.00 per day. Telephone calls, telex messages, cables and mail are handled by the ship's Agent.
SERVICES: Tank cleaning, slop discharge, disposal of dirty ballast, compass adjusting, radio and radar repairs, charts, sounding machine paper, Notice of Mariners, safety equipment, extension of certificates.
BANKS:

Banca Romana de Comert Exterior (Romanian Foreign Trade Bank), 1st Traian Street. Tel: 619500. Fax: 619703.

Banca Comerciala "Ion Tiriac" ("Ion Tiriac" Trade Bank), 32-34 Stefan cel Mare Street. Tel: 638020, 661520. Fax: 638020.

Banca Comerciala Romana (Romanian Trading Bank), 68 Traian Street. Tel: 638200. Fax: 638200.

Banca Romana de Dezvoltare (Romanian Development Bank), 9 Arhiepiscopiei Street. Tel: 618960. Fax: 618960.

Banca Agricola (Agricultural Bank), 9 Piata Ovidiu Street. Tel: 617115. Fax: 618680, 619586.

"Mindbank", Complex "Dacia", Lapusneanu Avenue. Tel: 667399. Fax: 638802.

"Credit Bank", Negru Voda Street. Tel: 619707, 617673. Fax: 619707, 617673.

"Bankcoop", 6 Cristea Georgescu Street. Tel: 617600. Fax: 617600.
SHORE LEAVE: When the inspection on arrival is completed, the crew may go ashore but must be in possession of their passport or Seaman's Book and shore permit, issued by the Immigration Office.

The entrance/exit to the port is only through Gate No. 1 for seamen leaving to go to the town of Constantza, but only up till 2000 hrs.
IDENTIFICATION CARDS: See "Shore Leave".
GARBAGE DISPOSAL: Garbage is collected from the vessel in bags. Collection time every 2 days during Summer and every 4 days during Winter.

Tariff for garbage collection from the vessel is U.S.$ 16.20 per day.
WASTE OIL DISPOSAL: Bilge water, petroleum waste, oil waste disposal: There are facilities for the collection of bilge water, petroleum waste and oil waste.

Tariff for waste oil collection is U.S.$ 19.50 per cu.m.
SEAMAN'S CLUBS: There are no Seamen's Clubs. There are mail, telephone and telex facilities at the post office at Gate No. 1.
CURRENCY: The national currency is the Leu. Rate of exchange is U.S.$ 1.00 = Lei 2,951 (30th May 1996).
REGULATIONS: Carrying out exterior maintenance (Repairs, etc.) is permitted only during daylight; at nightfall the Master must take all necessary steps to bring the displayed equipment (tools, ladders, platforms, ropes, etc.) back on board.

If the vessel must perform a shift from one berth to another, according to the decision of the port authorities, the Master is to be advised by the agent at least 2 hours in advance. Refusal to perform a shift requested by port authorities is punishable by the Harbour Master.

In order to prevent the carrying of disease and epidemics into the country by rats, Masters are asked to note the following:

Placement of ratguards immediately after berthing;

Great attention must be paid to placing ratguards on the ropes so that no space is left between them and the ropes;

Diameter or ratguards must be at least 50 cm.;

If ratguards come off the ropes (due to wind or faulty fastening) they must be replaced immediately.
DELAYS: Delays are those allowed according to the "Charter Party".
DEVELOPMENTS: A container terminal with a capacity of 800,000 TEU/year. Extension of the actual Free Zone. An industrial zone.
AUTHORITY: Constantza Port Administration, Incinta Port Constantza, Gara Maritima, Constantza 8700, Romania. *Tel:* 40-41-611540. *Telex:* 14218. *FAX:* 40-41-619512. *Contact:* Jorj Unciuleanu, Harbour Master. Vasile Pistolea, General Manager.

Economou International Shipping Agencies, 98A Cuza Voda, Apartment 1, 8700 Constantza, Romania. Tel: (4041) 615555. Telex: 14492 Ceco R. Fax: (4041) 611699.

GALATZI: 45.25 N. 28.05 E.

LOCATION: The port is situated on the left bank of the Danube between km. 144 and km. 156, upstream of Sulina. (B.A. Chart No. 2835).

Also see "Sulina" – "Shipmaster's Reports".
PORT LIMITS: The limits of the port are marked by km. 156 and km. 144.5.
DOCUMENTS: See "General" before first port.
PILOTAGE: Compulsory for all ships. River pilots are replaced by port pilots in the roads, or during navigation in the port zone.
ANCHORAGES: The port of Galatzi has 3 areas situated as follows:

Zone 1: km. 155 – km. 156 – loaded maritime vessels.
Zone 2: km. 158 – km. 159 – unloaded maritime vessels.
Zone 3: Mm. 76 – Mm. 78.5 – maritime vessels.

RESTRICTIONS: Navigation forbidden during poor visibility.
MAX. SIZE: The maximum draft is limited by Sulina bar at 23 ft. Vessels of greater draft must have approval of the River Authority.
HEALTH: See "Constantza".
RADIO: See "Sulina".
VHF: Direct contact with local authorities is possible.

Galatzi Port Control – Channel 16 – continuous listening.
Galatzi Pilot Station – Channel 14 – continuous listening.
Galatzi Harbour Master – Channel 68 – continuous listening.

RADAR: Radar surveillance available. Vessels should keep continuous watch on VHF Channel 16 (Galatzi Port Control) when transiting or at anchor. No vessel should proceed into the port or manoeuvre without Port Control permission.
TUGS: See "Constantza".
BERTHING: The port has four sectors:

1. The Old Harbour in the vicinity of km. 151.5 downstream with a quay length of 1,160 m. (365 m. for passenger vessels; 350 m. for ballast products; 445 m. waiting quay for maritime vessels).

2. The Dock Basin situated downstream of the Old Harbour. The quay has a total length of 1,440 m. (540 m. direct to the Danube and 900 m. in the basin).

3. The New Basin or Wood Basin situated downstream of the Dock Basin to km. 146. Length of the quay is 2,365 m.

4. Ore Harbour situated between km. 155.5 and km. 157, upstream of the Siret Mouth. Quay length is 800 m. (400 m. for maritime vessels with depth up to 9.0 m. and 400 m. for river vessels).

Alongside there are 43 cranes of 16 tons capacity. The maritime quays are provided with conveyor belts. The port also has floating cranes of 16 tons capacity.
CRANES: At Berths No. 26 – 28 there are 6 cranes of 5 tons capacity, at Berth No. 30 there are 3 cranes of 5 tons capacity, at Berths No. 23 – 25 (direct to the Danube) there are 6 cranes of 8 tons capacity and 2 cranes of 10 tons capacity. At Berths No. 39 – 44 loading/discharging is by ship's gear. At Berths No. 45 – 53 there are 13 cranes of 10 tons capacity, one crane of 5 tons capacity and one conveyor belt for river vessels.
BULK CARGO FACILITIES: See "Berthing" and "Cranes".
Cargo Handling Rates:

Cargo	*Operation*	*Thousands of Tons per Ship per Day Vessel Capacity (Tons)*

STEVEDORES: See "General" before first port.
MEDICAL: Medical assistance is available at the city hospital. All problems will be handled by the agent.
FRESH WATER: Fresh water is available direct from quay installations at a rate of 10 tons/24 hours for vessels up to 4,000 d.w.t.
FUEL: Bunkers only available from barge.
FIRE PRECAUTIONS: See "Constantza".
REPAIRS: All kinds of repairs possible in Galatzi Repair Yard.

SURVEYORS: The Romanian Shipping Register (RNR) is authorised for class surveillance.
GANGWAY/DECK WATCHMEN: See "Constantza".
HATCHES: Opening and closing of the hatches on account of the vessel.
CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: See "Constantza".
REPATRIATION: Possible.
TIME: See "General" before first port.
HOLIDAYS: See "General" before first port.
POLICE/AMBULANCE/FIRE: City Police – Tel: 055. Ambulance – Tel: 061. Fire – Tel: 081. For all problems connected with police and ambulance contact vessel's agent on VHF Channel 10. In case of fire contact Harbour Master or Galatzi Port Control on VHF Channel 68 or 16.
EMERGENCY CO-ORDINATION CENTRE: In all cases of emergency contact Galatzi Port Control on VHF Channel 16.
TELEPHONE: See "Constantza".
SHORE LEAVE: See "Constantza".
REGULATIONS: See "General" before first port and "Sulina".
AUTHORITY: Galatzi Port Authority, 34 Port Street, Galatzi, Romania. *Tel:* 40-36-460248. *Telex:* 51208. *FAX:* 40-36-460318. *Contact:* Bucur Constantin, Harbour Master.

AGENT: Navlomar Galatzi, 20 Port Street, Galatzi, Romania. Tel: 40-36-460094. Telex: 51260, 51360 Anmar R. Fax: 40-36-460790.

MANGALIA: 43.49 N. 28.35 E.

LOCATION: The port is situated on the S.E. coast of Romania, 246 km. from Istanbul. (B.A. Chart No. 2285), and 38 km. South of Constantza Port.
PORT LIMITS: As the commercial limits of the port are marked by the ends of the breakwaters the Notice of Readiness is received at the operating berth after obtaining "Free Pratique". In order that the vessel may be considered "arrived" she should advise the port authority the time and place of anchoring in the roads.
DOCUMENTS: See "General" before first port.
PILOTAGE: Compulsory for all ships.

From the North end of the S.E. breakwater over a distance of 8.5 cables to the South there are depths of less than 3.0 m., so care must be taken.

ANCHORAGES: The Mangalia roads are limited to the North and South by the parallels 43° 49.2' N. and 43° 48.2' N. and to the East and West by the meridians 27° 39.2' E. and 28° 37.8' E.
RESTRICTIONS: Pilotage is compulsory in the roads and in the port, even when shifting berth, except for auxilliary and technical port vessels, small fishing vessels and pleasure craft, but always with Port Authority permission.
MAX. SIZE: The entrance is 200 m. wide with 10 m. depth.
HEALTH: See "Constantza".
RADIO: See "General" before first port.
VHF: Direct contact with local authorities is possible.

Harbour Master's Office – Channel 68 – continuous listening.
Mangalia Pilot Station – Channel 14 – continuous listening.

TUGS: See "Constantza".
BERTHING: The port is formed by 4 breakwaters of 3.78 km. total length. The harbour basin has an area of 80 ha., with 2 berths each 200 m. in length and 9.0 m. depth.

The sea port has recently become operational, formed by 2 breakwaters of 1.53 km. and 2.0 km. length, enclosing a basin of 300 ha. Piers of 400 m. length allow deep draft vessels to berth. There are also 4,300 sq.m. of covered warehouses.

CRANES: The port is equipped with 5 ton electric cranes and various mobile cranes and forklifts. Generally, during operations, port cranes are used but all vessels must have their loading/discharging gear in good condition.
STEVEDORES: See "General" before first port.
MEDICAL: Medical assistance available at the city hospital. All problems will be handled by the agent.
TANKERS: No facilities available.
DENSITY: See "Constantza".
FRESH WATER: See "Constantza".
FUEL: Bunkers available in small quantities from road tankers only.
FIRE PRECAUTIONS: See "Constantza".
REPAIRS: All kinds of repairs are possible at a special repair yard, length of berth 520 m.
DRY DOCKS: There is a dry dock for vessels up to 150,000 d.w.t. (dry dock dimensions are 360 m.×60 m.×10.5 m.).
HATCHES: See "Constantza".
CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: See "Constantza".
REPATRIATION: Possible.
AIRPORT: Constantza Airport, 70 km. from the port.
TIME: See "General" before first port.
HOLIDAYS: See "General" before first port.
POLICE/AMBULANCE/FIRE: City Police – Tel. 955. City Ambulance – Tel. 961. Fire (city) – Tel. 981. For all problems connected with fire contact Mangalia Harbour Master by VHF Channel 68.
TELEPHONE: No facilities. For international calls use only the booths of the City Post Office.
SHORE LEAVE: See "Constantza".
REGULATIONS: See "General" before first port.
AUTHORITY: Harbour Master, Incinta Port, Mangalia, Romania. *Tel:* 40-41-751299. *FAX:* 40-41-751299. *Contact:* Ion Mircea, Harbour Master.

AGENT: See "Constantza".

SULINA: 45.11 N. 29.45 E. (See Plan)

LOCATIONS: Situated at the Danube mouth on the right bank of the Sulina Channel, 148 km. from Constantza (B.A. Chart No. 2284).
PORT LIMITS: From the line of the entrance on the Sulina Channel to "Mile 2".
DOCUMENTS: See "General" before first port.
PILOTAGE: Vessels should notify arrival at the roads to the Sulina Free Port Administration – Sulina FPA – Agency Department, Telex No. 52294 and Fax. No. 040-543294. ETA can be confirmed or amended when necessary by VHF Channel 16. There is no specific zone for the pilot boat. Usually the pilot boards the ship at the anchorage.

The approaches are as follows:

Sulina – S.E. Approach No. 5: 1.6 miles in width, 7 miles in length. Alignment 146° – 326°. The centre line joins the following positions:

S1: Lat. 45° 03.1' N., Long. 29° 53.4' E. – 11.5 miles, true bearing 124.4° to the Sulina Lighthouse.

S2: Lat. 45° 08.9' N., Long. 29° 47.9' E. – 5.75 miles, true bearing 095.7° to the Sulina Lighthouse.

From the No.01 Buoy (whistle buoy) and then following the course 302.2°, vessel will proceed in to the Sulina Channel and then into port. Maximum draft admitted is 23 ft. (7.01 m.).

ANCHORAGES: The anchorage place is communicated by the Pilot Station, both for inner or outer roads.
RESTRICTIONS: Vessels proceeding to Danube river ports must wait at the Sulina roads, 1 mile from the black buoy marked "01" (green flash). All vessels should have an Administration Pilot on board. In the Sulina Channel navigation is forbidden at night and during poor visibility.
MAX. SIZE: The maximum draft at the Sulina Bar is 23 ft. (7.01 m.). Vessels of maximum LOA 180 m. may call at the port of Sulina. No tide restrictions. Any changes regarding the maximum draft are broadcast daily at 1150 hrs. on 1935 metres Long Wave band.
HEALTH: See "Constantza".
RADIO: Until reaching Sulina Bar, all radio communications should be transmitted to Constantza Coast Radio Station. When proceeding in the channel at the Sulina Bar, all radio communications are prohibited, except for VHF radio communications.
VHF: Direct contact with local authorities is possible. Vessel may contact Sulina Pilot Station, Sulina Harbour Master, Free Zone Administration and Navlomar on Channel 16.
RADAR: Not available.
TUGS: See "Constantza".
BERTHING: The port of Sulina has 3 Maritime Berths and the Sulina Free Zone Administration has 3 berths in the Maritime Transit Basin.

Loading/discharging operated by Sulina Free Zone Administration's gear.

CRANES: Sulina Free Zone Administration has floating cranes of 16 tons and 32 tons capacity.
BULK CARGO FACILITIES: No special facilities available. Bulk fertilisers can be transhipped to barges. Fertiliser in bags can be stored in special warehouses. Different kinds of ore can be handled and stored in open spaces.
STEVEDORES: Sulina Free Zone Administration have their own stevedoring department.
MEDICAL: Medical assistance is available at the city hospital. All problems will be handled by the agent.
FRESH WATER: Fresh water available at Maritime Transit Basin and at the City Quay.
FUEL: Not available.
FIRE PRECAUTIONS: See "Constantza".
REPAIRS: Ordinary maintenance possible. Qualified personnel available for mechanical works.
DRY DOCKS: None available.
SURVEYORS: Lloyd's Agent and representatives of classification societies as well as official surveyors may be called at short notice.
HATCHES: Opening/closing of the hatches for vessel's account.
CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: See "Constantza".
REPATRIATION: Not possible.
AIRPORT: Nearest airport at Tulcea, about 70 km. up the Danube.
TIME: See "General" before first port.
HOLIDAYS: See "General" before first port.
POLICE/AMBULANCE/FIRE: Contact Port Authority on VHF Channel 16 for all problems connected with police, ambulance and fire.
TELEPHONES: See "Constantza".
SERVICES: Shipchandling services available to all vessels calling at or passing Sulina Port.
BANKS: In Sulina: Bucharest Romanian Commercial Bank and Bucharest Credit Bank.
STORING: See "Prelims".

1. Vessel can be stored by barge supplied by foreign partners, surveyance and guard of the barges being provided by Sulina Free Zone Administration.
2. Previous notification for barge storage compulsory, details to be obtained through Sulina Free Zone Administration's representatives.
3. No transhipment into trucks directly possible for the moment.
4. Forklifts can be used on the jetty to handle stores.
5. No Customs interference regarding storing on the territory of Sulina Free Zone, first period (negotiable) of storage free of charges, tariffs to be established by the Administration. Storage possible both in covered and open spaces, on platforms.
6. Riggers belonging either to the Administration or to Romtrans (Specialised Romanian Foreign Trade Enterprise for forwarding activity, which has an office in Sulina) can be employed, for sorting and arranging cargo on platforms and in warehouses.

SHORE LEAVE: See "Constantza".
IDENTIFICATION CARDS: See "Constantza".
GARBAGE DISPOSAL: Service available.
WASTE OIL DISPOSAL: Service available.

SEAMAN'S CLUBS: No Seaman's Clubs.
Services available in the port: Duty free shops, international telephone service, church services, postage facilities.

CURRENCY: Lei.

REGULATIONS: Maximum speed in the Sulina Channel is 10 km./hr. Entrance and navigation only by daytime in the Sulina Channel.

Also see "General" before first port.

SHIPMASTER'S REPORT: February 1984.

The entrance route to Danube River from Gura Sulina for Galatz and Braila is as follows: Arrival point Lat. 44° 47' N., Long. 29° 55.8' E. and from this point vessel is to steer 000° True till Lat. 45° 05.1' N., Long. 29° 55.8' E. and from this point 301° True to No. 1 Buoy. Because of shallow water the vessel must not go South of No. 1 Buoy. With radar, Sfantul Gheorge Lighthouse was observed at 15 miles, Sulina at 20 miles and lighthouse at South Mole at 15 miles. Anchorage area is 2 miles East or 1 mile North of No. 1 Buoy. Pilot on VHF Channel 16. Pilot embarks 1 mile East of the No. 1 Buoy.

After anchoring near to Sulina, Customs, Immigration and Doctor board the vessel for clearance. After clearing the vessel another two Pilots board and vessel proceeds to destination. No navigation is permitted during the night for large vessels.

SHIPMASTER'S REPORT: December 1989.

Vessel: 12,800 g.r.t., 156 m. LOA and 22.8 m. beam.

Transit of the River Danube (Sulina - Galatz - Sulina):

Two port pilots are taken on at Lat. 45° 08.8' N., Long. 29° 47.6' E. as far as Lat. 45° 09.8' N., Long. 29° 42' E., where the vessel has to anchor to carry out Police, Customs and Port formalities.

If the vessel is transiting for the first time, the Tonnage Certificate for the Suez Canal is requested in addition to ordinary certificates. This additional certificate is held at the Captaincy, and is only handed back on the return passage.

Once formalities have been completed, 2 pilots are taken on for the transit of the canal as far as Galatz, where these pilots are changed for 2 port pilots. Vessels berth starboard side alongside.

On arrival in Galatz, all the formalities are repeated and those carried out at Sulina being considered null and void.

Loading at Galatz is rapid, the gangs work 24 hours a day. As the vessel is berthed starboard side to quay, it is necessary to go as far as Km. 159 to turn, before going down river. This location is supposed to be safe, however, by reason of bad buoyage (in fact non-existent) as well as inadequate dredging, great care has to be taken as there are some mud banks, unknown to everybody, on which it is possible to go aground.

On both the inward and outward voyages, vessels anchor at the 48 Mile marker. This anchorage is very safe.

At the level of Tulcea, navigation is very easy, and the use of tugs is not compulsory, in fact it is not advisable. The most delicate part of the Danube is between Miles 57 and 58. Our sounder indicated that at this point there are minimum depths of 8.0 m.

AUTHORITY: Sulina Free Zone Administration is both specialised foreign trade state enterprise and Port Authority in Sulina Free Zone.

Sulina Free Zone Administration, 202 I Street, 8829 Sulina, Tulcea County, Romania. *Tel:* 40-40-543243, 543242, 543241, 543650. *Telex:* 52294. *FAX:* 40-40-543294. *Contact:* Caraivan Antonie, General Manager. Andrei Mihai, Head of Commercial Department and Agency Department (Tel: 40-40-543243, ext. 19).

AGENT: Navlomar Sulina, No. 202 I Street, Sulina, Romania. Tel: 40-40-543019. Telex: 52280 Navlo R.

TULCEA: 45.10 N. 28.49 E.

LOCATION: The port is situated at the entrance of the Danube delta, 62 km. from Sulina. (B.A. Chart No. 2835).

PORT LIMITS: The limits of the port are marked by Mm. 35.5 and Mm. 41. The Notice of Readiness is received at the operating berth after obtaining "Free Pratique". In order that the vessel may br considered "arrived" she should notify the Port Authority the time and place of anchoring in the roads.

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory for all ships. River pilots are replaced by port pilots in the roads.

ANCHORAGES: The port of Tulcea has 2 zones situated as follows:
Zone 1: Mm. 34.5 – Mm. 37.
Zone 2: Mm. 44.5 – Mm. 45.5.

RESTRICTIONS: The pilotage of vessels in the roads and in the port is compulsory even when shifting berth. Maximum draft is 23 ft. (maximum at Sulina Bar). For other details see "Sulina".

MAX. SIZE: Maximum draft is 23 ft. (7.01 m.).

HEALTH: See "Constantza".

RADIO: See "Sulina".

VHF: Direct contact with local authorities is possible.
Tulcea Port Control – Channel 68 – continuous listening.
Tulcea Pilot Station – Channel 14 – continuous listening.
Tulcea Harbour Master – Channel 16 – continuous listening.
Navlomar Agency – Channel 10 – continuous listening.

Vessels should keep continuous radio watch on Channel 68 (Tulcea Port Control) when transiting or at anchor. No vessel should proceed into the port or shift without Port Control permission.

RADAR: Radar surveillance not available.

TUGS: See "Constantza".

BERTHING: The port has 2 piers of 230 m. total length and depth 9.0 m.

CRANES: The port is equipped with 3 Kangur cranes of 16 tons capacity.

BULK CARGO FACILITIES: See "Berthing" and "Cranes".

Loading/Discharging Rates:

Ore	Field	1.00	1.50	2.00	3.00	5.00	7.00
	Vehicle	0.80	1.10	1.50	2.00	3.00	4.00
Coke	Field	0.70	1.00	1.30	1.80	2.60	3.60
	Vehicle	0.60	0.90	1.20	1.50	2.00	2.60
Miscellaneous		0.30	0.40	0.50	0.70	0.90	1.00

STEVEDORES: See "General" before first port.

MEDICAL: Medical assistance available at the city hospital. All problems will be handled by the agent.

TANKERS: No facilities available.

FRESH WATER: Fresh water available direct from quay installations at a rate of 80 – 100 tons/24 hours, as well as from a special barge for vessels up to 4,800 d.w.t.

FUEL: Bunkers are available in small quantities, also lubricating oil.

FIRE PRECAUTIONS: See "Constantza".

REPAIRS: All kinds of repairs possible at Tulcea Repair Yard. The yard has a synchro-lift.

DRY DOCKS: See "Repairs".

SURVEYORS: See "General" before first port.

HATCHES: First opening and last closing of the hatches on account of the vessel. The hatches must be opened completely on all sides. Tarpaulins and covers must be moved with the ship's gear.

CUSTOMS ALLOWANCES: See "General" before first port.

CARGO GEAR: See "Constantza".

REPATRIATION: Possible.

AIRPORT: Tulcea. 10 km. from the port.

TIME: See "General" before first port.

HOLIDAYS: See "General" before first port.

POLICE/AMBULANCE/FIRE: For all problems connected with police and ambulance contact agent by VHF Channel 10. In case of fire contact Harbour Master or Tulcea Port Control by VHF Channel 16 or 68.

EMERGENCY CO-ORDINATION CENTRE: In all cases of emergency contact Tulcea Control on VHF Channel 68.

TELEPHONE: See "Constantza".

SHORE LEAVE: See "Constantza".

IDENTITY CARDS: See "Shore Leave".

REGULATIONS: See "General" before first port.

SHIPMASTER'S REPORT: May 1996.

Location: The port of Tulcea is situated on Danube River, about 40 miles up from the mouth of the river at Lat. 45° 10' N., Long. 28° 40' E..

The ships use an artificial channel 40 miles long with width from 100 m. to 130 m., except natural channel in the river where the breadth reaches 400 m.

Documents: We needed the following at Sulina (inner roads) where inward formalities were completed:
6 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Ship's Stores List.
1 copy Maritime Declaration of Health.

After this procedure, ships proceed to Tulcea Roads where new Customs and Immigration formalities must be completed.

Up to 10 officials come on board for formalities at Tulcea, and also at Sulina.

At Tulcea port, the following documents have to be prepared:
6 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Ship's Stores List.

All ship's certificates are tendered to representative of Harbour Master. Upon departure, all documents are given back. All certificates are to be valid and not to expire before ship's sailing from the port of Tulcea.

Pilotage: Compulsory for all vessels. Notice of ETA and request for a Pilot must be made not less than 24 hours prior to arrival to the Sulina Port Administration via Agent.

To proceed in Sulina Channel and to reach Tulcea, ships take 2 Pilots at Sulina Entrance and then proceed to port of Sulina where they must drop anchor for completion of inwards formalities.

Above mentioned Pilots can be picked up near the white-yellow Buoy No. 1 with ball on a top (Lat. 45° 08.14' N., Long. 29° 47.50' E.).

Ships may contact pilot station on VHF Channels 16 or 14, call sign "Sulina Pilots".

Pilot boat has no colour, it is rusted, but initial colour was white.

While manoeuvring near Buoy No. 1, it should be taken into account that current from North, especially during winds from Northern quarter, may reach 3 knots – 4 knots.

Anchorage: When waiting for Pilot, a good anchorage may be obtained in the quarter circle with radius 2 miles from point with centre (Lat. 45° 08.52' N., Long. 29° 46.78' E.), and restricted by 2 lines one directly in a Northern direction and the other in a 121° direction (See "Sulina" Plan). The depths are from 13 m. – 21 m., with good holding ground.

Approaches: "IALA" Buoyage System "A" has been adopted.

Restrictions: The depth is limited by bar at Sulina Entrance and is 23 ft. Sometimes it may be increased by written permits from Sulina Canal Authority, up to 24 ft.

There is a submerged vessel in position Lat. 45° 11' N., Long. 28° 58' E. Part of the vessel is aground and part is submerged. The submerged end is marked by a red buoy. Ships pass very close to it, at distance about 5 m. – 10 m.

Vessels may pass through Sulina Canal day and night, except at place where there is a submerged vessel, which can only be passed in daytime. Passage of Sulina Canal from Sulina Entrance to Tulcea takes about 6 hours.

Max. Size: Prior to 1989, the biggest vessels (LOA 220 m.) passed through Sulina Canal. But after an accident with one vessel (130 m. LOA) (above mentioned submerged vessel), the size of vessel was decreased, but not to any concrete figure. However, vessels with LOA 130 m. – 150 m. may pass through Canal.

Health: Free Pratique is given upon arrival to Sulina inner roads, where all formalities were undertaken.

Density: In Danube River, full fresh water (1000).

Fresh Water: Good quality water is available, but only at the pier.

Fuel: Not available.

Customs Allowances: 1 bottle of any spirit and 200 cigarettes for each crew member.

Customs Search Teams search every cabin.

Medical: Resident doctors and hospital available.

Airport: Nearest at capital city of Bucharest, about 240 m. (5 hours drive), but road is not very good.

AUTHORITY: Harbour Master, 26 Portului Street, Tulcea, Romania. *Tel:* 40-40-513226. *Telex:* 52324. *FAX:* 40-40-512937. *Contact:* Ichim Iulian Dan, Harbour Master.

13. Okhotsk
14. Provideniya
15. Severo-Kurilsk
16. De Kastry

(b) Addresses and telephone numbers of V/O "Soyuzvneshtrans", VVO "Sovfracht" and V/O "Sovbunker":

VVO "Sovfracht" is the sole organisation in rendering brokerage services to local and foreign Shipowners. V/O "Sofracht" carries out chartering of foreign and Soviet tonnage and is the General Agent for foreign flag vessels in ports.

Postal address: VVO "Sovfracht" 1/4, Rozhdestvenka Street, Moscow, 103759, Russia.
Cable: Sovfracht Moscow
Telephone: 926-11-18
Telex: 411168 a, b, 411170 a, b.
Fax: 2302640.

Vsesoyuznoe Obyedinenie (V/O) "Sovbunker" carries out ships' bunkering and port consignment stock operations.

Postal address: V/O "Sovbunker", 10/12, Kaloshin Lane, Moscow, 121002, Russia.
Cable: Sovbunker Moscow
Telex: 411170
Telephone: 248-23-52.

Vsesoyuznoe Obyedinenie (V/O) "Soyuzvneshtrans" carries out all transportation and forwarding of export and import cargoes as well as transit of goods via Russia and foreign territories.

Postal address: V/O "Soyuzvneshtrans", 17/16, Gogolevsky Boulevard, Moscow, 121019, Russia.
Cable: Soyuzneshtrans Moscow
Telex: 411441, 411442
Telephone: 203-11-79.

(c) Guiding principles to comply with when calling at Russian ports: All vessels calling at above ports must also abide by the Customs and Obligatory Harbour Regulations of each particular port of call which are obtainable through the local Inflot agencies.

(d) Ship/shore radio link: Ships' communication with ports of call is usually maintained through the local port radio stations, some information of which is given in the respective entries for the ports.

Ships' radio stations and/or radio-telephones (excluding VHF), must not be operated when the vessel navigates or lies at anchor within thelimits of the port boundaries as well as when calling at or leaving the port, except in emergency, e.g.

when giving distress signals;
when rendering assistance to other vessels in distress;
while making way through the ice;
after having obtained special permission of the Harbour Master.

Note: Superiority in use of radio communication means is given to an icebreaker when leading a convoy of ships through the ice; in case there are two or more icebreakers in a convoy – to a leading icebreaker.

Vessels equipped with VHF radio-telephones must keep them operated in the calling Channel stipulated by the Obligatory Harbour Regulations when navigating within a port limit.

(e) Notice of Arrival: The Master of a vessel should send preliminary information to the Inflot Shipping Agency about the vessel and the cargo not later than 12 days prior to vessel's arrival at the port of destination (for tankers, gas carriers and vessels loaded with liquid chemicals, as a rule, 14 days prior to arrival).

In the preliminary Notice the Master should state the following information:

Name and nationality (flag) of the ship;

Port of departure (last port of call);

Draft fore and aft, cargo carrying capacity, volume of holds, measures of hatches, number and location of 'tweendecks, etc.;

Nature and total quantity of cargo and stowage plan; heavy lifts (over 3 tons) to be shown separately;

Amount and spacing of water ballast (for tankers only), as well as the name of cargo which was unloaded from the vessel before taking ballast;

Particulars of inoperative cargo handling gear as well as whether the vessel requires supply of electric power from the shore for lighting purposes during cargo handling operations (all possible damages which may occur either for lack of all relevant information mentioned above or due to untimely and/or incorrrect data given by the Master to the Port Authorities when advising ETA, etc., are to be for the vessel's account);

Request for any kind of port services.

More precise information about a vessel's approach to the port (roadstead) of destination is to be given by the Master to the Inflot Shipping Agency. Masters of dry cargo vessels are to inform ports of destination about their ETA at first 96 hours and then 12 hours prior to arrival and as far as Masters of tankers, gas carriers and vessels loaded with liquid chemicals are concerned they are to inform Port Authorities 72 hours and 12 hours prior to their arrival at a port.

Masters of tankers bound for loading/unloading oil products are to inform ports of destination 72 hours prior to their arrival that they have in their possession International Certificate on Civil Liability for Oil Pollution Damage.

According to Charter Parties, Sale Contracts and other documents stipulating conditions of carriage of goods by sea, Masters should give necessary information to additional addresses at stipulated time.

The Port of destination Authorities should be immediately informed by the Master about all unforeseen delays during the voyage.

Vessels calling at ports for bunkers, fresh water, provisions, etc. only, should advise their ETA to the Port Administration in due time stipulated above.

The Port Administration should provide Masters of calling vessels with all necessary information regarding anchorage, berthing and handling of cargo not later than 2 hours prior to vessel's arrival.

Since for some ports, time and terms of giving Notice of Arrival are different to that mentioned above, Masters are advised to look at the information for a particular port.

(f) Pilotage: Pilotage is compulsory for all vessels when calling or leaving Russian sea ports, as well as when mooring and unmooring. In addition the Pilots perform shifting berths and other duties related to the harbour operations.

A Pilot having boarded a vessel shall be advised by the Master of the precise draft and other particulars necessary for safe pilotage of a vessel.

According to the Merchant Shipping Code of Russia, the Master of a vessel shall be obliged to pay a fine in an amount of double the rate due as pilotage fee for incorrectly declaring the draft, length or breadth of a vessel or its net registered tonnage, irrespective of the liability established by law for the consequences which may occur as a result of the incorrect information.

A Pilot should be ordered through the local Inflot Agency 12 hours prior to vessel's arrival at the Pilot boarding place. More accurate information should be given 4 hours prior arrival unless otherwise stated in the Obligatory Harbour Sea Regulations.

Also see "Baltic Deep Sea Pilotage".

(g) Anchorages: A vessel approaching the Port of Call and not having been boarded by a Pilot immediately on arrival, or for any other reason, shall anchor in the anchorage area specially designed for this purpose and under no circumstances let its hull go across the boundaries of this area or prevent other vessels from using the leading lights, navigation marks or lights.

No anchorage is allowed in the prohibited zones shown on the charts, listed in special manuals for navigation and/or in the Obligatory Harbour Regulations as well as those announced in the appropriate Notices to Mariners.

No anchorage is allowed at a distance of less than 1.5 cables length off fairways and leading lines as well as in depths not providing a vessel with a safe anchorage while drifting on the anchor chain.

No vessel shall anchor within the water area of a shipbuilding yard after being refused permission to carry out repairs.

It is prohibited to change a vessel's anchorage by drifting.

Vessels carrying explosives or inflammable liquids must anchor in the areas recommended for them only.

All vessels when at anchor shall carry the lights or the marks in accordance with International Regulations for Prevention of Collisions at Sea. Apart from that every vessel by night, when at anchor, shall be illuminated from stem to stern with additional lights placed so that the hull be as far as possible visible from the surface of the water.

Vessels using a kedge anchor shall, in addition to the lights and the marks as to the International Regulations for Prevention of Collisions at Sea, conspicuously display by night a white light and by day a red flag lowered from the stem by the anchor chain to the extent of half of the side's height.

In restricted visibility whether by day or night, every vessel when at anchor shall use sound signals conforming strictly with the International Regulations for Prevention of Collisions at Sea.

Masters of all vessels when at anchor are not allowed without the Harbour Master's consent, except in emergency, and/or in case of Port and Boarding officials, to give anybody permission to come alongside in a private launch or a small rowing boat whether under oars or sail and board a vessel.

Swimmers must not be allowed to come on board a ship.

Should, in case of emergency, swimmers have been taken on board or strangers have been discovered aboard a vessel, the Master of such ship shall forthwith without delay report the fact to the Harbour Master and shall later hand those people over to the Representatives of the Port Administration.

(h) Regulations for entering and leaving Russian ports: When approaching Russian ports all vessels must follow the recommended courses announced in issue No. 1 of the Russian Notices to Mariners (GDNOMD).

All vessels when approaching a port or a Pilot's boarding place as well as when leaving a port during the daytime must keep their National flags hoisted. A vessel's National flag must be kept hoisted on the stern flagstaff from 0800 hrs. in the morning up to sunset, and the State National flag on the fore mast. In Arctic ports during prolonged period of light National flags must be kept hoisted from 0800 hrs. till 2000 hrs.

Every vessel coming from abroad shall hoist Quarantine Signals of the International Code of Signals depending on health and sanitary conditions on board.

For entry permit, a vessel must contact the Port Control service either by VHF radio-telephone or by means of visual signals, viz, by day, hoisting her call-sign, and by night, making call-sign signals in Morse Code by searchlight or by Morse-lamp.

No ship shall enter the Harbour until the proper signal has been hoisted at the signal station or by a pilot boat authorising such entry.

No vessel is allowed to enter the Harbour until the prohibition signals hoisted at the signal station shall have been lowered down.

If entry is refused a vessel must immediately slow down, alter course and if possible leave the fairway, and drift or drop her anchor in the recommended area.

Turn of entry to the Harbour is controlled by the Port Administration with regard to tonnage of vessel, nature of cargo, weather conditions in the port area, readiness of the port to start cargo operations and other circumstances.

Simultaneous entry of two or more vessels to the Harbour or vice versa is not allowed in the majority of ports.

In all cases a vessel entering the Harbour must give way to the outgoing one not preventing her manoeuvrability.

(i) **Sanitary and Quarantine requirements:** It is prohibited by law to contaminate inner and territorial waters of Russia with any kind of substances which are considered to be unhealthy for people or harmful to live resources of the sea. It is also prohibited to discharge into the sea oil contaminated, faecal, washing waters and oil residues; no rubbish, waste foodstuff shall be thrown into the water. The list of harmful substances is published annually in issue No. 1 of the Russia Notices to Mariners.

Not later than 6 hours before arrival Masters of all vessels coming from foreign countries to Russian ports should advise Quarantine Authorities by radio through Inflot Agency giving full details of health conditions on board as well as sanitary conditions at the last port of call.

If medical assistance is required on board Master has to contact Inflot Agency or any other local port Agent.

No shore connection is allowed to a vessel until Free Pratique is obtained.

Masters are advised to ask a Sanitary Officer for inoculation, vaccination, fumigation, de-contamination, etc., if required, whilst he is on board a ship together with the other Boarding Officials.

Veterinary Certificates of Good Health are required for the livestock, all kinds of meat, animal food and raw meat stuff brought to Russian ports from abroad. Certificates should be issued by the proper authorities of the country from which the cargoes have been exported.

Masters should have a Phytoquarantine Certificate for the goods of vegetable nature.

It is prohibited to take ashore fruit, vegetables, grain seeds, plants, plant products, etc., without a certificate issued by a local branch of the Agricultural Quarantine Inspection; animals and birds are also not allowed to be brought ashore without getting pemission from the veterinary authorities.

(j) **Regulations for the Clearance of Vessels on Arrivals and Departures:**

Upon arrival at a Russian port the Master of a foreign flag vessel has to hand over to a representative of the Inflot Shipping Agency the following documents (filled in with full accordance of the IMOrequirements) duly signed by the vessel's administration for further examination by:

(a) *Boarding Port of Call Officials:*
  (1) Ship's Patent;
  (2) Measurement Certificate;
  (3) Load Line Certificate (or International Load Line Exemption Certificate);
  (4) Passenger Ship Safety Certificate;
  (5) International Certificate on Civil Liability for Oil Pollution Damage (for vessels carrying more than 2,000 tons of oil).

(b) *Health Authorities:*
  (1) Ship's Health Certificate;
  (2) Derat Certificate;
  (3) International Certificate of Vaccination;
  (4) Maritime Sanitary Declaration.

(c) *Customs Officials:*
  (1) General Declaration;
  (2) Cargo Declaration;
  (3) Ship's Crew Personal Effects Declaration;
  (4) Crew List;
  (5) Passenger List.

The Master has to declare to the Customs:

(1) Cargo Manifest, Bills of Lading and other documents for the cargoes carried by the vessel.

(2) Other Ship's documents on request.

The Master fills in a form of Master's Declaration (Shipowner's address, cargo, cases of illnesses on board, if any, etc.) with the Agent's assistance.

In accordance with Article 38 of the Merchant Shipping Code of Russia in case a foreign flag ship which, on calling at a Russian port, raises doubts as to her meeting the requirements of safe navigation may, irrespective of whether she possesses the necessary ship's papers mentioned above, be subjected to an examination by way of technical survey on the same basis as ships sailing under the State Flag.

The Obligatory Harbour Regulations to be fully complied with during a vessel's stay at Russian ports are handed over to the Master either by Pilot or by representative of the Harbour Master's Office, or by Agent when arriving for the first time.

Upon sailing from a Russian port: No other documents apart from those mentioned above are required in order to obtain the authorisation to leave the port.

No vessel is to get under way without having obtained the permission of the Harbour Master.

The authorisation to leave the port shall be given after a vessel herself and her draft shown in the Master's Statement have been checked by a Port Authorities' representative.

The Harbour Master may not allow a vessel to leave the port, if:

(1) The Cargo Loading Regulations have not been fulfilled, *i.e.* a vessel is considered overloaded or wrongly loaded in case:

(a) a vessel's load lines corresponding to the maximum depth to which she should have been loaded are under water without any list;
(b) the cargoes loaded in the holds and/or on deck have not been made fast in a proper manner or have not been made fast at all;
(c) a vessel has a bad list* caused by faulty loading or her stability does not correspond with the ship's documents;
(d) a vessel loaded with bulk or liquid cargoes has not used the necessary materials or accommodations to prevent cargoes from shifting or overflowing in case of vessel's pitching and rolling;
(e) the deck cargo is considered as danger to the safety of a vessel and the safety or life on board caused by faulty loading;
(f) the corresponding regulations for loading of dangerous cargoes or cattle to be carried by vessel have been broken;
(g) other loading regulations have not been abided by in the course loading.

(2) Under other circumstances which may cause a danger to the safety of a vessel and the safety of life on board, as well as in case when the ship's documentation regulations have been infringed.

(3) When the port dues, tolls and fines have not been paid.

All expenses which may occur due to a vessel's possible delay in the port in connection with the reasons stated above are to be for the Owner's account.

Note: *According to the Harbour Regulations a vessel is not allowed to leave a port if her list exceeds 5° or she has trim by bow which was not specified by her construction.

ANNEX 2

The Memoranda for Masters of Foreign Vessels calling at Russian Ports.

1. On arrival of the ship the Master is to submit to the representatives of the Port Authorities the following documents (IMO Forms) duly signed by ship's administration:

General Declaration (Form I). Filling in of points 8 and 11 is not compulsory (5 copies).

Cargo Declaration (Form II). (4 copies). Filling in of point 6 is not compulsory; points 7, 8 and 9 are to be filled in only for:

(a) cargoes for which Bills of Lading were not issued (names of Shippers and Consignees to be stated);
(b) transit cargoes;
(c) cargoes for other Russian ports;
(d) cargoes of agricultural origin;

Ship's Stores Declaration (Form III) – not required.

Crew's Effects Declaration (Form IV). Amount of Master's and Crew members' valuables (gold, silver, platinum, jewellery, bonds, travel checks, etc.), personal firearms and cartridges (ammunition), explosives and narcotics are to be stated in point 2 (2 copies).

Crew List (Form V) (4 copies).

Passenger List (Form VI) (4 copies).

2. The Master of a ship is to instruct all members of the ship's crew that in accordance with the Rules in force in Russian ports:

Exportation and importation of local currency is forbidden;

No articles are permitted to be taken ashore or brought on board the ship without permission of the Custom House Authorities;

Articles taken ashore or brought on board the ship and concealed from Customs control shall be regarded as smuggled goods liable to confiscation with a fine imposed;

Likewise, the sale of any articles of foreign origin on the territory of the state will be regarded as smuggling;

No wastes shall be thrown into the water or on the quay; the discharge of oil contaminated water and/or oil residues is prohibited;

All mooring ropes must be fitted with rat-guard plates;

Only one gangway must be led ashore at night when loading or discharging is not carried out;

It is prohibited to take ashore grain, seeds, plants, plant products, soil, etc. as well as animals and birds;

Violation of the above-mentioned rules will entail penalty in accordance with the laws of the state.

(k) **Customs Examination:** Immediately after the clearance formalities have been accomplished, all the vessel's premises with cargoes and articles not destined for the port of call and not being allowed to be taken ashore are sealed by the Customs Officials. In case a part of cargo and/or articles, not for discharge at destination port, are stowed in the same area as articles for discharge at the destination port, the sealing is carried out after discharge of articles destined for the port.

Extracts from Customs Regulations:

It is allowed to bring in on arrival to the state:

1. Personal effects in quantities necessary for the trip.

2. Food-stuff, wine and/or alcohol, cigarettes/tobacco in quantities necessary for personal consumption during the trip, but duty free for 1 person not more than:

spirits-1 litre;
wine-2 litres;
250 cigarettes or 250 gm. of tobacco/tobacco articles.

Fresh, salted or smoked meat, fat, dressed poultry, smoked and home-made sausages, eggs, honey, milk and fish-products, but not canned fish – unless permit of the Ministry of Agriculture is available.

3. Foreign currency without restrictions on quantity.

Bringing in local currency from abroad (if not stipulated by special agreements), as well as State-loan bonds and lottery tickets is strictly prohibited.

4. Jewellery and every day necessities made of precious metals or jewels without restrictions in quantity (duty free.)

It is allowed to bring in not more than 2 jewellery articles for every day necessities made of pearl only or mixed with pearl having total weight not exceeding 100 gm.

It is prohibited to bring in natural pearl and seed-pearls.

5. Foreign currency, jewellery and every day necessities made of precious metals or jewels and pearl must be declared to the Customs.

6. It is *strictly prohibited* to bring in to the state:

Fire-arms and ammunition of any military kind;

Narcotics and psychotropic substances as well as appliances for Smoking opium and hashish;

Printed matter cliche, negatives, developed films, photos, video-cassettes and video-discs with films recorded on them, manuscripts, gramophone records and any other type of sound recording, drawings, pictures and articles of fine arts containing data which may do harm to political and economic interests of the state, State security, public order, human health and morals of the people.

It is allowed to take out when leaving the state:

7. Personal effects, foreign currency, jewellery and every day necessities made of precious metals, jewels and pearl that had been brought to the state earlier.

(Taking abroad state currency if not stipulated by special agreements, State-loan bonds and lottery tickets is strictly prohibited.)

8. Food-stuff, wine, spirits and cigarettes/tobacco in quantities necessary for personal consumption during the journey but not more for a single trip than:

spirits – 1 litre;
wine – 2 litres;
250 cigarettes or 250 gm. of tobacco/tobacco articles;
black or red caviar – 150 gm.;
ground or instant-coffee – 200 gm.;
spices 200 gm.

9. Articles bought for officially received Russian currency for personal use only, not more than 5 pieces of jewellery and/or every day necessities made of precious metals, jewellery or any kind of pearl in total; articles and decorations made of silver having total weight not more than 400 gm.

10. It is allowed to take out without quantity restrictions any articles (except forbidden ones) bought for foreign free currency in specialised shops on the state territory on producing corresponding bills (receipts) given by shops.

11. It is *prohibited* to take out of the state:

1. Fire-arms and ammunition of any military kind as well as military outfits.
2. Narcotics and psychotropic substances.
3. Nullified securities.
4. Works or art, antiquities (paintings, sculptures, china, articles made of crystal, ceramics, wood, leather, precious and non-precious stones and metals, bone, hand-work, carpets, gobelins, furniture, fancy clothes and footwear, numismatics, works of art, weapons, books, manuscripts, gramophone records, musical instruments, stamps, etc.) and other articles being a high artistic, history making, scientific or other cultural valuables.

Note.: Articles mentioned above may be taken out of the state with special permission of the Ministry of Culture provided an export duty equal to 100% of the value stated in the Export Permit has been paid.

5. Antlers and hides of stags.

(l) Berthing: Berthing can only be effected with tug assistance and a State Pilot on board. Likewise, no vessel shall leave or shift berth without employing the services of a Pilot authorised by the Port Administration to make the voyage in question.

Vessels must take up the berths assigned to them and conform strictly to the Obligatory Harbour Regulations in force.

A Pilot or the Agent shall provide the Master with all necessary information as regard to depths, tugs, conditions in the Harbour, etc., before mooring and shifting berth starts.

The responsibility for the safety of a vessel during her manoeuvring and berthing as well as for possible damages to a berth or other port facilities shall always rest with the Master.

No vessel is allowed to change berth due to handling of cargo or for any other reason unless the main engines, the mooring winches, the steering gear, etc., are in good working order and there is sufficient number of the members of the crew to ensure shifting berth when required.

It is strictly prohibited to work with vessel's propellers when lying alongside berth. To avoid damage to the underwater parts of a berth while mooring or unmooring every vessel must have the main engines going "dead slow" until her stern is 10 m. from the quay.

When berthing, Masters should use strong and reliable mooring lines and make them fast over the quay pile-moorings and bollards only. It is strictly prohibited to make fast mooring lines over any part of the quay equipment which has not been intended for that purpose.

When lying alongside berth, every vessel must have a gangway or a gangway board with a lifeline secured, led ashore and made fast. There should be a net under the gangway platform and a lifebuoy nearby. Gangways must be sufficiently illuminated at night.

(m) Stay in port at berths: When lying alongside berths, all vessels to be moored by long safe ropes which are to be kept fast at all times, and constant watch should be kept by day and at night.

All mooring ropes must be fitted with rat-guard plates.

From sunset to sunrise all vessels' decks, cargo decks and gangways must be illuminated.

Every vessel, whether in the outer roads or in the harbour, must always have on board a sufficient number of crew to be able to ensure both the ship's safety and her everyday routine. Vessel's fire-fighting and life-saving equipment must always be ready for use on board or to render assistance to other vessels or shore objects in case of emergency.

When in port, no vessel is allowed, without having obtained the Harbour Master's permission, to make repairs to the main engines or to the ship's auxiliary equipment thus depriving her of the opportunity to shift berth at short notice in case of emergency.

It is not allowed, without the permission of the Port Administration, to use vessel's boats, underwater oxygen and any underwater apparatus of other types.

No vessel is allowed to clean boilers or discharge any sort of chemicals or organic products into the water, giving off smoke and sparking from vessels' funnels.

(n) Ship's movement in the harbour and shifting berths: No vessel shall leave or shift berths without the permission of the Port Authorities. In case there are no provisions in the Contract of Carriage of Goods by Sea or in the Bill of Lading, a vessel shall accomplish one shifting from berth to berth during the course of her loading and shifting upon unloading to the loading berth at the Owners' risk and expense. Any subsequent shifting shall be at the expense of the goods.

All shiftings in the port connected with a vessel's needs, viz. bunkering, loading supplies and/or provisions, making repairs, etc., shall be at the expense of the vessel.

All haulings both during the course of loading and unloading shall also be at vessel's expense.

(o) Tugs' assistance: Tugs, if necessary, are usually ordered by the Master according to a Pilot's advice.

In some ports use of tugs during mooring and shifting berths is compulsory due to the heavy conditions of navigation.

Ordering of tugs and payment for the assistance rendered is made in accordance with the tariffs in force. Masters of vessels shall order tugs through a local Inflot Shipping Agency.

A tug's detention time at a vessel's side while waiting for her readiness for the towage is considered to be as the working time and therefore is to be paid accordingly.

For cancellation of a tug, a vessel shall be charged full rate, including detention time and time of passage of a tug from the berth to the vessel and vice versa.

When ordering a tug for unmooring, Master should fill in and sign a special application form given by the Agent. The actual time of completing the towage shall be approved by the Master of a towed vessel.

In ports where the towage is compulsory when mooring and shifting berths, the Master shall be charged for the tugs' assistance whether used or not, and having refused tugs shall be held responsible for the consequences thereupon.

(p) Notice of Readiness: In case there are no special provisions in the Contract of Carriage of Goods by Sea, the Master shall, during the established office hours upon the accomplishment of Customs formalities and having obtained Free Pratique, deliver a Notice of the ship's readiness for loading or unloading to the shipper or the consignee through the Inflot Shipping Agency.

The Notice of the vessel's readiness shall be considered accepted if she is actually ready to load the cargo into or unload it out of all the vessel's holds or tanks.

(q) Handling of Cargo: All cargo handling areas in the ports are under control of the Port Administration which shall provide vessels with labour, tally staff, sheds and warehouses, employees, etc.

To ensure successful handling of cargo the vessel shall, when required by shippers or consignees, receive or discharge cargo day and night, as well as on Sundays and holidays, furnishing free of charge all necessary cargo handling gear. Though in most ports the cargo handling is done by port cranes both from the quays and lighters, a vessel shall, in some ports, use her own cargo handling equipment, which has to be in good working condition.

In the latter case, the Master shall produce to the Agent the Cargo Equipment Certificate which must be valid.

Loading or unloading time is calculated as to the rates stipulated in a Charter Party or according to the Customs of the Port in the absence of same.

Should the port labour participate in the opening or closing of hatches, a vessel's administration shall be responsible for the rules of safety engineering to be complied with.

Opening and closing of mechanised ship's hatches shall always be done by the ship's crew.

Should shore cranes be used for loading or unloading instead of a vessel's cargo-handling equipment, the Master shall beforehand remove aerials, aerial halyards, stay rods, wires, etc., crossing the air space over a ship's hatches and preventing the shore cranes' derricks from free circulation.

The vessel's derricks shall not project over the sides.

(r) Agency: All foreign vessels upon arrival at the ports are attended by the Maritime Agencies Inflot, or by one of the local port shipping Agents.

Shipping Agencies provide foreign vessels with the following services:

Inform the Port Authorities and other organisations about vessels' expected time of arrival (ETA), nature and quantity of cargo to be handled, expected time of loading or discharging, etc.;

Render assistance to the Masters in obtaining Pilots, tugs, berths, launches, etc.;

Perform all the necessary formalities connected with the vessels' arrival and departure;

Ensure that Masters are acquainted with the Port Rules, Obligatory Harbour Regulations as well as other documents and instructions issued by the Port Authorities;

Give advice to the Shipowners and other interested parties regarding vessels' movement and the prospects for the handling of cargo;

Render help in speeding up cargo handling operations;

Provide vessels with supervisors and tallymen;

Prepare time sheets and submit them to the Masters, Port Authorities and Shippers (Consignees) for their further approval;

Sign on Masters' behalf cargo and other documents;

Arrange bunkering, delivery of fresh water, provisions, technical supplies and all kinds of ship-repairs;

Render help to the members of the crews in obtaining medical assistance;

Make payment of dues, charges, fines (if any), etc., on behalf of the Shipowners and for their account;

Take all necessary measures for improvement of the handling of cargoes and ships' services;

Look after the Court (Arbitration) cases and cargo claims on behalf of the Shipowners;

Make Sea Protests as well as translation and duplicating of any documents on Masters' requests;

Repatriate members of the crews from the state to their home ports;

Invite surveyors qualified by the State Register of Shipping to conduct vessels' surveys;

Make extension of ships' documents;

Render help to the Shipowners in delivering and redelivering of their vessels on time charter;

Assist in arranging cargo fumigation on board;

Perform any commissions on the instructions of the Shipowners in regard to the ships' services and protection of their interests before any Authorities.

It is in the interest of the Master to advise Port Agent timely information as regard to a vessel's name and flag, ETA, gross register tonnage; draft fore and aft; position of cargo in hold (stowage plan); number, weights and location of heavy lifts, number and length of oversized (over 9 m.) pieces and Owners' cable address and telex number thus putting the Agent in a position to calculate the approximate sum of the disbursement expenses and ask the Shipowners to remit same (disbursement accounts are to be paid before vessel's departure).

Note: Bearing in mind the fact that most of the shore offices are closed on Sundays and holidays, the Master shall cable to Inflot Agency well in advance his order for bunkers, repairs, technical supplies and cash to enable the Agent to make necessary arrangements.

All branches of Inflot Agency work round the clock, including Sundays.

Cable address of any branch of Inflot Agency is "Inflot", e.g. "Inflot St.Petersburg".

(s) **Fire safety measures:** Fire safety measures at ports must comply with the provisions of the International Code for the Carriage of Dangerous Goods by Sea. Every vessel upon arrival at a port must keep constant fire watch day and night and have fire-fighting and life-saving equipment always ready for action. Members of the crew must keep strictly to the Fire Safety Regulations especially during vessels' stay at oil and timber berths. Giving off smoke out of the funnels is strictly prohibited. In all the ports a fire brigade could be called over the phone by dialling 01 in case of fire.

(t) **Medical assistance:** Medical assistance, if required, is available, including vaccination and inoculation as well as dispensary and hospital treatment in all the ports. In case of emergency an ambulance or a doctor should be called for by telephone – 03 in all the ports.

(u) **Customs of the ports:** Customs of the ports should apply in case:

(1) there is no Contract of the Carriage of Goods by Sea at all;

(2) there are no provisions in a Charter Party or in the Bills of Lading in respect of items covered by these Customs;

(3) a Charter Party or a Sale contract and/or any other Contracts of the Carriage of Goods by Sea specially refer to these Customs of the Ports.

(v) **National and general holidays:**

5 days working week with 2 holidays has been introduced for most of the industrial enterprises, government and commercial offices and other institutions. Saturdays and Sundays are weekly holidays.

(w) **Places of Recreation for foreign seamen:** In the majority of the commercial sea ports foreign seamen can spend their spare time in the International Seamen's Clubs which can offer concerts by professional and amateur actors and singers, evenings of public hearing of recorded Russian and foreign music, films, etc. Sightseeing is usually organised by the local excursion bureaux.

(x) **Summer Time:** 1st April to 1st October – clocks advanced 1 hour at 0000 hrs.

DEEP-SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

ARCHANGEL: 64.34 N. 40.30 E.

LOCATION: A White Sea port. Archangel is situated at the mouth of the Severnaya Dvina River, in the S.E. corner of Dvina Bay. A part of the harbour is situated at the Northern end of the Povrakulsky Island, at the junction of the Maimax River and the Kuznechikha River, and is called the Economia Avant-port. The total length of the port area is about 30 miles.

DOCUMENTS: Refer to beginning of Russian section.

PILOTAGE: Compulsory. Notices of ETA in accordance Soviet Wood Charter Party. Pilot boat located in area of the light buoy "Mudyugsky I". VHF Channel 16. Pilot boat is tug-boat with word "Pilot" on wheelhouse. Vessels awaiting Pilot may anchor at safe distance to North from pilot boat location. In event bad weather pilot boat goes to shelter, being available by VHF radio.

While waiting for a Pilot, vessels may lie at anchor at a safe distance to the North from the pilot boat location.

In the event of bad weather a Pilot shall board a vessel at a sheltered place shown by him.

When a Pilot is not able to board a vessel due to weather conditions, a pilot boat is usually situated on the Southern side of the Mudyug Island. In this event vessels should anchor at the entrance of the channel from seaward and wait for a Pilot's arrival.

ANCHORAGES: There are several places which can be used by foreign vessels for anchorage. They are:

(1) The outer roads with depths from 10.0 m. to the North and N.W. from the reception buoy "Mudyugsky I".

(2) Customs formalities are carried out alongside the berth or at Solombala roadstead immediately after vessel's arrival, and half an hour prior to vessel's departure.

(3) The Solombala roadstead with depths of 5.0 m. – 9.0 m. is used by vessels for anchorage while awaiting a berth for loading cargo.

The ground at all roadsteads – mud and sand; anchoring is performed according to the Pilot's recommendations.

RESTRICTIONS: Ice breaks up in April. Port area open from end of April through to November. From November till April, ice classed vessels sail with assistance of ice-breakers.

During the time of high water vessels can enter the port through the approach channel Berezovy Bar if having length not more than 160 m. and draft not exceeding 9.0 m. Changes of passage drafts are published in the Notices to Mariners. Vessels going to Timber Mills No. 2 and No. 3 as well as to the cargo area Bacariza pass through the central draw span of the railway bridge once during 24 hours. Vessels having air-draft less than 13.7 m. pass through the bridge throughout 24 hours. During bad visibility (less than 5 cables) movement of vessels within the port is not allowed.

In the Approaches to the Port there is an overhead power cable between:

(a) 64° 37.91' N., 40° 29.05' E. and
(b) 64° 37.72' N., 40° 29.03' E.

The vertical clearance is 45.0 m.

HEALTH: All vessels coming from foreign countries inspected by Sanitary Office. If no diseases vessel obtains Free Pratique. If vessels entering after calling at another Russian port, Pratique automatic.

RADIO: All information from sea may be routed through Murmansk Radio (UMN) and Archangel Radio (UGE), A1 500 kHz, A3 2182 kHz.

All vessels when approaching the port of Archangel should establish radio contact through the coastal "Archangel Radio" station which operates 24 hours per day on the following frequencies:

	Frequencies (kHz)		*Type of*		
Call Sign	*Working*	*Calling*	*trans-mission*	*Time*	*Remarks*
UGE	500/476	500/480	A1A	H24	
"Archangel-Radio"	2182	2182	H3E	H24	
"Archangel-Radio-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24	
"Archangel-Radio-8" (Inflot Shipping Agency)	156.375*(67)	156.8*(16)	F3E	H24	Operates during period of navigation only
"Archangel-Radio-5"	156.700*(14)	156.8*(16)	F3E	H24	
Vessels' movement control (VMC)	156.700*(14)	156.7*(14)	F3E	H24	

*Frequencies are given in MHz.
**CPR – Central Port Radio station.

The storm signals station is situated in the Solombala area on the embankment of the Severnaya Dvina River named after George Sedov (Lat. 64° 35' N., Long. 40° 30' E.).

Storm signals are shown by the International Code of Signals by day and by Morse system at night.

Masters of vessels proceeding to the port of Archangel should advise ETA and all necessary information to the Inflot Agency as per conditions of the "Soviet Wood" Charter Party.

24 hours prior to arrival advise ETA to Inflot Agency. Four hours prior to approaching the "Mudyugsky I" Masters should advise more precise time of arrival.

TUGS: If necessary ordered 2 hours before arrival and normally join vessel near berth. Usually use ship's lines.

BERTHING: To certain extent depends upon tides. 37 berths available with depths alongside up to 9.2 m.

There are a large number of berths in the port along the river front, as well as at the Economia Avant-port.

Berths are equipped to handle timber, wood-pulp, paper, bulk, liquid, machinery and general cargo. There are enclosed warehouses and concrete floor sheds in the port.

CARGO HANDLING FACILITIES: Berths of the commercial port are equipped with mobile electric cranes of up to 32 tons capacity. Loading of timber from berths of timber mills is effected by shore cranes and vessels' cargo gear. There are also floating cranes from 5 to 100 tons capacity as well as other cargo handling equipment and interport transport means. Container crane of 30 tons capacity and back-up facilities.

BRIDGES: Vessels proceeding to load cargo at Timber Mills 2 and 3 have to pass under bridge which is opened once a day. Vessels with air-draft less than 13.7 m. can pass throughout 24 hours.

STEVEDORES: No particular ETA advices to stevedores/shippers required except those mentioned in Soviet Wood C/P. Loading rates, etc., also stipulated by Charter Party.

Mobile electric cranes of up to 20 tons capacity are operated on the quays. There are also floating cranes of up to 50 tons capacity, other cargo handling equipment and intra-port transport facilities. Sometimes, cargo handling is by vessels' gear.

MEDICAL: If any medical attention or prompt assistance required, Master has to contact Agent. No advance notice required. Clinic and hospital available.

TANKERS: Report 1994.

Terminal:

Name: Arkhangelsk Oil Terminal. Tel: (81800) 478157.
Telex: 242132 OVIS SU.

Shore tanks:

Product	No.	Total Capacity (cu.m.)
Gas Oil	9	90,000
Jet Fuel	3	30,000
Jet Fuel	2	2,000
L.C.G.O.	6	30,000
S.N.O.	2	10,000
S.N.O.	1	1,000
Heptane-Hexane Fraction	4	20,000
Lubricating Oils	6	6,000
Lubricating Oils	13	5,200
Gasoline	4	20,000
Gasoline	5	2,000
Gasoline	1	1,000

Shorelines: Length for all products 1,500 m. (approx.).
Diameter 530 mm. – Gas Oil/Jet, Fuel/Gasoline/L.C.G.O./S.N.O./HH.Fraction.
Diameter 219 mm. – Gasoline, Lubricating Oils.
Berths: There are 2 berths being used for all mentioned products. Both berths: Maximum draft 9.0 m., length 150 m. and loading rate about 600 cu.m./hr.

DENSITY: Fresh water practically throughout port.

FRESH WATER: Usually delivered by self-propelled barges. A few berths are equipped with shore water lines.

FUEL: Bunkers not available.

FIRE PRECAUTIONS: While lying alongside timber berth vessel to take maximum fire precautions.

CONSULS: No Consuls in Archangel.

REPAIRS: All types of repairs possible, also underwater surveys.

DRY DOCKS: There are floating docks with capacity up to 7,000 tons.

SURVEYORS: Register of Shipping of Russia.

GANGWAY/DECK WATCHMEN: Not available from shore. Usual watch kept by ship's crew.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES:

Seaworthiness.
Measurement.
Loading Line.
Cargo Equipment.
Safety Equipment Certificates.
Radio Telegraphy.
Radio Telephony.
Oil Pollution Prevention.
Sewage Pollution Prevention.
Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco/wine: No quantity limits, but can only to be brought ashore in limited quantities.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport near town. Served by regular airlines.

TIME: GMT plus 3 hours, October 1st to April 1st. GMT plus 4 hours April 1st to October 1st.

HOLIDAYS: General holidays: (Subject to change in near future.) All Sundays and Saturdays: January 1st (New Year's Day); March 8th (World Women's Day); May 1st, 2nd (World Labour Day); May 9th (Victory Day); October 7th (Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work on these days at shippers' discretion.

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

EMERGENCY CO-ORDINATION CENTRE: None.

TELEPHONES: Can be arranged on board.

SERVICES: Compass adjusting, radar and radio repairs, etc.

BANKS: Commercial Bank "Pomorskiy". Telex: 613815 Pomor Ru. Fax: (47) 789-16028 via Norway.

STORING: See "Prelims".

1. Barge or truck.
2. Vessels can be stored during loading.
3. Trucks can proceed alongside.
4. No.
5. Customs permission required.
6. No.

SHORE LEAVE: Each crew member properly signed in Ship's Articles and having valid Seaman's Book allowed ashore.

IDENTIFICATION CARDS: Only Seamen's Books required.

GARBAGE DISPOSAL: Collection of garbage is available. It is collected by special lorries ordered via "Inflot" Agency during office hours. Dry garbage must be packed in bags. Charge: 1 container (75 cu.m.) U.S.$ 36.00 (Prices are subject to change).

Disposal of bilge water into barges. U.S.$ 43.00 per ton. Minimum charge U.S.$ 630.00.

WASTE OIL DISPOSAL: Collection available via "Inflot".

SEAMAN'S CLUBS: One Seamen's Club available. All services available apart from international telephone and church services. Tel: 94847, 94776.

CURRENCY: Roubles.

Any European currency can be exchanged in State Bank, or in other commercial banks.

DELAYS: On account of rain when loading timber.

NAVIGATION: Masters proceeding for loading timber should bear in mind that the swing bridge on their way to Timber Mills No. 2 and No. 3 is open once daily.

All vessels with drafts of less than 3.6 m. especially when engaged in towing timber rafts, should keep out of the way of deep-drafted vessels when passing through narrow places and approaching channels both at sea and in the river, and should not hamper their safe passage in such places. They should also safely pass vessels engaged in dredging of a channel.

When approaching a bend in a channel, every vessel should beforehand give a signal by 1 prolonged blast on her whistle or siren, reduce her speed and when it is safe and practicable, keep to that side of the channel which lies on the starboard side of such vessel.

Every Master when passing through a narrow channel, or approaching a bend in a channel should take positive early action prescribed by the International Regulations for Preventing Collisions at Sea to avoid a risk of collision with a vessel approaching from the other direction.

Deep draft vessels shall not overtake each other when navigating in the channel of the Beresovy Bar. A vessel proceeding to the port along the course of the channel must keep out of the way of another vessel leaving the port.

No vessel shall navigate in the port harbours in restricted visibility when navigational lights, marks, leading lights, buoys, etc. are not visible.

Ice: At the head of Dvina Bay drift-ice extends as far as 12 miles from the shore by the end of November. The Severnaya Dvina estuary usually gets frozen over at the beginning of November. At Dvina Bay the ice usually breaks up in April and at the Severnaya Dvina estuary – at the beginning of May. Thus, navigation in the port area lasts all year round for vessels with ice-class for White Sea.

Powerful ice-breakers, ice-strengthened vessels and tugs are maintained by the Port of Archangel Authorities to assist in navigation of the Dvina Bay waters and off the coast when ice conditions prevail.

Tide: The tidal range at the head of Dvina Bay reaches 0.8 m. – 1 m. and at Mudyug Island 0.1 m. – 0.5 m.

The in-going flood stream is usually stronger and about 1 hour longer in duration than the out-going ebb stream.

Sometimes the in-going stream at the bar of Severnaya Dvina may be hardly observed, being reduced to a few minutes of slack water. It may run steadily for some time then gradually attains its usual strength and goes on to set up to the time of high water.

The tidal streams in the Severnaya Dvina are considerably influenced by both strength and direction of the wind.

Moderate Northerly and Westerly winds increase the height of the tide and hold the fall of the water.

Only the in-going flood streams have been observed at the Severnaya Dvina estuary at springs. The extreme tidal range of the water level observed there is about 4 m.

DEVELOPMENTS: For the immediate future no draft increase expected. Some berths under reconstruction and cranes being installed to load timber.

AUTHORITY: Chief of the Port of Archangel, R.Luxemburg St. 5, 163061 Archangel, Russia. *Tel:* 445426, 437494. *Cables:* 242278 Morport Archangel. *FAX:* (8182) 441114. *Contact:* Via VHF.

DE KASTRI: 51.29 N. 140.47 E.

SHIPMASTER'S REPORT: July 1991:

LOCATION: The port of De Kastri lies at the head and on the Western shore of the Gulf of Tartar and handles approximately 120 ships a year, split evenly between Russian and foreign ships.

Exports from De Kastri consist almost entirely of timber and oil products. Prior to our vessel's visit, all oil cargoes had been handled by Russian vessels. The timber trade is open to foreign traffic. The principal oil cargo handled was gas oil.

The population of De Kastri is about 4,000.

The port is affected by ice during the Winter season. Pack ice up to 2.0 m. thick blocks De Kastri Bay between November and May. The port authorities endeavour to keep the port operational during this period by the use of ice breakers, and timber exports are maintained. Oil export is suspended though, as the river traffic which supplies De Kastri is unable to operate in the Winter months when the Amur is frozen over.

PILOTAGE: Pilotage is compulsory for the inner harbour and quarantine anchorage. Pilot is not required for anchoring in the outer part of the bay. Pilot was requested but did not come out to vessel.

Pilotage is normally arranged through Inflot (Government Agency). The pilot station will respond to calls on VHF Channel 16.

ANCHORAGES: The designated quarantine anchorage is situated approximately 4 miles inside De Kastri Bay, 2.5 miles S.E. of De Kastri town jetty. Charted depths of between 6.0 m. and 8.6 m. make it unsuitable for foreign going tankers. Indeed, the largest size of vessel that reputedly uses this port is 10,000 d.w.t. However, it is suitable for smaller vessels as it is sheltered and offers good protection in all except E'ly. winds.

We anchored with Alekseeva Point (Lat. 51° 28.3' N., Long. 140° 51.5' E.) bearing 352°(T)×0.87 miles in 15.0 m. of water, one mile inside of the bay. We were not equipped with Soviet charts and had to rely on B.A. Chart No. 3340 for approach, which is designed for offshore navigation only. No Pilot boarded vessel so anchoring was carried out by the Master.

We put 6 shackles in the water and vessel swung predominantly to the prevailing wind. There was little current evident. The holding ground was good, with bottom consisting of soft mud and shells. Very little shelter is afforded in this location, but it would not be recommended to take a vessel of our size (30,000 d.w.t.) further into the bay without more detailed knowledge of the depths and nature of the bottom.

APPROACHES: *Navigational Aids:* Navigational aids in the port consist of lighthouses, lightbuoys and transit marks. Lights are unreliable. Of the 4 cardinal marks around Buruny Shoal (51° 27.6' N., 140° 51.7' E.), only the North and South buoys were lit. Davydova Lighthouse, with a nominal range of 9 miles, was barely visible from the vessel's anchored position, 1.3 miles to the S.S.W.

TUGS: The port is understood to have 2 tugs, one of which is the pilot cutter. No information was available on power or size.

BERTHING: The town's wharf consists of a single jetty, about 200 m. long and was observed to handle up to 2 vessels at one time.

Charted depths range from 6.7 m. to 7.5 m., although local information suggests that 5.0 m. may be the maximum draft a vessel can draw and still safely use the wharf.

Fresh water and diesel oil bunkers are available for local vessels alongside the wharf, but it was not clearly established whether this also applied to foreign ships. Provisions may also be purchased in limited quantities, although the variety available is not large.

Cargo Handling Facilities: The wharf is used primarily for the export of timber. Seven cranes of around 10 tonnes capacity are available.

There are no special facilities for containers, Ro-Ro, etc.

ANKERS: Transfer of petroleum products is mainly carried out by ship-o-ship (STS) transfer at the Quarantine Anchorage. The ships to be ghtered (STBL) rely on the lightering vessels (LV) to provide cargo oses. From our observations, barges are built with wood rubbing bands. The supplementary fendering consisting of 3 or 4 rubber tyres was rigged nly at our request.

Oil and Gas Facilities: There are no oil or gas facilities in De Kastri itself. Oil products are handled at the Quarantine Anchorage for export argoes, and limited shipments are probably brought into the port for ocal consumption. Twelve oil storage tanks were observed, about miles from the town.

. Berth Operator/User: The Amur River Shipping Company Limited ppears to be the only local carrier involved in the transportation of oil argoes from the Komsomolsk Refinery on the Amur to De Kastri. Export hereafter has been by Soviet vessels. No other oil carriers are known o operate from the port.

. This vessel (30,000 d.w.t.) is probably about the largest class of essel that can safely use De Kastri Bay for STS operations at this time. The accuracy and type of survey on which the existing Soviet charts are ased are not known, and it is not therefore possible to comment on he safety of anchorages further inside the bay. However, it does appear hat a safe and more sheltered anchorage can be found for STS perations in about 12.0 m. of water, about 1 mile to the S.W. of our nchored position.

. The maximum safe draft for a vessel loading at De Kastri anchorage s about 10.0 m.

. The tides are diurnal, with a spring range of about 2.0 m.

. Water density as measured by vessel on arrival was 1022.

. Berthing and unberthing at the anchorage is carried out day and night.

. The only limitation on freeboard would be length of cargo hoses arried by some of the river barges. The barge "Poronaysk" would be nable to discharge to a ship whose freeboard was much greater than 5.0 m.

EPAIRS: No repair facilities are available at present.

IRPORT: The nearest airport is about 3 hours drive by car. It offers nternal flights only, to Harborosk and Moscow. Obtaining tickets for ights is reported to be time consuming, with lengthy delays likely. This s borne out by the independent surveyors whose journey from Odessa o De Kastri took 4 days.

ENERAL: *Distress and Rescue:* There is no Coastguard, lifeboat or alvage services available. In the event of an incident the Soviet navy s called upon to provide assistance. During our visit a fishing vessel an aground within the port. The navy took on the responsibility for towing he vessel off the mud.

Communications: Communications are difficult and unreliable.

Services: There is a boat service to Vladivostock and a road link to Harborosk.

No services, such as tank cleaning, compass adjustment, consuls, tc., are available at present.

GARKA: 67.27 N. 86.35 E.

(See Plan)

ENERAL: A sea and river port, Igarka is situated about 344 miles Southward of the mouth of the Enisei River which flows into the Enisei Gulf of the Kara Sea.

The port is open for navigation about 130 – 135 days from July till mid-November. Ice first begins to form in the second half of October.

No tidal range is observed in the port waters.

The port of Igarka specialises in timber exports.

PORT LIMITS: Port limits include the inner roads, riverside adjoining he berths and territory of the timber depots. Laytime as per conditions of the Soviet Wood Charter Party.

DOCUMENTS:

- 2 copies General Declaration.
- 2 copies Notice of Readiness.
- 2 copies Cargo Declaration.
- 5 copies Crew List.
- 5 copies Passenger List.
- 2 copies Currency List.
- 2 copies List of Articles.
- International Certificates of Vaccination.
- Maritime Declaration of Health.
- Derat Certificate.
- Crew's Navigation Cards.
- Seamen's Passports.
- Ship's Register.
- Tonnage Certificate.
- Load Line Certificate.
- Safety Radio Certificate.
- Safety Equipment Certificate.
- Safety Construction Certificate.
- Pollution Prevention Certificate.

PILOTAGE: Compulsory for Yenisei River and entering port. Pilotage is carried out round the clock. Pilot vessel "Yenisei" (the hull is orange coloured and has the international lights, flags and sirens signals) is located in the following position: Lat. 71° 42' N., Long. 83° 30' E. (Buoy No. 4). Masters of vessels approaching from seaward have to order a Pilot via the Chief of the Igarka Hydrobase and the Master of the pilot vessel 48 hours prior to arrival at the river mouth, where the River Pilots usually meet vessels. Vessel to confirm ETA 6 hours before arrival.

In case of bad weather, Pilot boards vessel at a place as directed by the pilot vessel. Since the distance of pilotage from the pilot station up to the port of Igarka is about 360 miles, 2 Pilots are usually required for the service. The Master of a vessel should use VHF Channel 16 or radio-telephone (calling frequency 500 kHz) for establishing radio contact with a pilot vessel, in order to check the time and the place of boarding of a Pilot.

After navigating the river, vessels will normally be required to anchor in the outer roads, according to the Pilot Master's advice. Berthing Pilots and Pilots for departing vessels are arranged by Agent ("Inflot").

ANCHORAGE: Information on best location of anchorage, if required, will be given by the pilot vessel, or Pilot, if he is on board. The anchorage in the outer roads of Igarka is bounded on the East by the leading lines of Igarsky and Severny (Northern) Igarsky leading marks, on the West by the left bank of the Yenisei River, on the North by the beam line of the Buoy No. 78 (Igarka Oseryodok), on the South by the leading line of Vkhodnoi (Entrance) Igarsky leading marks. Depths 11 m. – 22 m.

In the event of bad weather or main engine trouble, a vessel should lie at anchor in a place as directed by a River Pilot, who shall advise the Master of all necessary data about the anchorage.

RESTRICTIONS: Vessels can enter or leave the port 24 hours per day.

To ensure safe passage across the Lipatnikovsky and Turushinsky Bars of the Enisei River, vessels proceeding to the port of Igarka must have draft not exceeding 7.0 m. (See "Max. Size")

MAX. SIZE: Max. LOA 150 m., draft 8.0 m.

HEALTH: Not later than 6 hours before arrival, Master to radio "Inflot" advising health condition on board. International code quarantine signals to be shown on arrival at port limits. No one, except Pilot and Port Authorities, may board or leave the ship until Free Pratique is given after port health inspection.

RADIO: Radio communication is effected through the "Igarka Radio" port radio station operating on the frequencies given below.

Name	*Call Sign*	*Frequencies* Calling (kHz)	Working (kHz)
Igarka Radio	UFR	500	470
Yenisei (Pilot vessel)	UGZU	500	468

VHF:	*Call Sign*	*Calling Channel*	*Working Channel*
Harbour Master	Portnadzor	14	14
Shipping Agent	Inflot	6	6
Port Controller	Pogruzka	16	12

RADAR: Not available.

TUGS: Compulsory for all mooring and berthing manoeuvres. Ship's tow lines used. Tugs normally join vessel with Harbour Pilot on approaching port. Vessels at anchor order tugs through Inflot. 2 tugs of 1,200 h.p. available.

BERTHING: A berthing Pilot boards a vessel from a tug either in the outer roads or in the port.

After having approached a berth at a safe distance, a vessel, in most cases, should cast 2 anchors and then with tug assistance, turn stern to the Island and moor with 3 mooring ropes led from the stern. When mooring, a vessel should have ready on board 4 mooring ropes each not less than 100 m. in length (3 ropes to be led ashore and 1 rope prepared for a tug.).

Vessels moored in the inner roads must have strong ropes which should be made fast over the pile moorings only.

If 4 or 5 vessels are moored at the quay, the outside ones should have a red light exhibited in the middle of each mooring rope led ashore.

Notice of Readiness and other conditions of loading – as per the "Soviet Wood" Charter Party.

Loading is done by ship's wire strops, with a test label attached to every strop.

CRANES: There are floating cranes with 5 tons capacity.

BULK CARGO FACILITIES: 12 berths for vessels in the inner roads, stern to the island. Minimum depth is 9.0 m.

4 timber wharves:

No. 1: Length 137 m., min. depth alongside 8.0 m.
No. 2: Length 209 m., min. depth alongside 8.0 m.
No. 3: Length 133 m., min. depth alongside 7.5 m.
No. 4: Length 130 m., min. depth alongside 8.0 m.

The port is specialised in timber exports. Loading/discharge rates as per Soviet Wood Charter Party.

SPECIALISED CARGO HANDLING FACILITIES: In the inner roads, vessels are loaded for lighters. At the Timber Wharf, vessels are loaded from the timber yard. The cargo is packaged timber. Warehousing and covered sheds are available. There is cargo handling machinery and equipment for intra-port transport facilities.

BRIDGES: None.

STEVEDORES: As per Soviet Wood Charter Party.

MEDICAL: Medical assistance is free, hospital facilities available – all arrangements made by "Inflot".

TANKERS: No facilities.

DENSITY: Fresh water.

FRESH WATER: Fresh water for technical needs may be taken from the river in places indicated by the Pilot, but not in the port area.

FUEL: Not always available.

FIRE PRECAUTIONS: The vessel is to take maximum fire precautions while lying alongside the Timber Berth.

CONSULS: None.

REPAIRS: Only minor repairs can be effected.

DRY DOCKS: None.

SURVEYORS: None available.

GANGWAY/DECK WATCHMEN: Ship's crew to provide watchmen services.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: Only reasonable quantities for personal consumption may be taken ashore.

CARGO GEAR: When a vessel is moored in the inner roads, stern to the Island, loading is by floating cranes; when at berth – ship's derricks are used.
REPATRIATION: No facilities.
AIRPORT: Situated 1.5 km. away, 1 daily flight to Krasnogarsk and 1-2 flights a week to Moscow.
TIME: GMT plus 6 hours, GMT plus 7 hours in Summer.
HOLIDAYS: No official holidays are observed during the navigation season.
POLICE/AMBULANCE/FIRE: Police, Tel: 02; Ambulance, Tel: 03; Fire, Tel: 01.
EMERGENCY CO-ORDINATION CENTRE: Situated in Krasnoyarsk: Tel: (822) 234424. Fax: (822) 222232.
TELEPHONES: Telephones cannot be connected on board vessel.
SERVICES: Radio and radar repairs – only minor repairs possible. Notice of Mariners, some nautical publications and supply of charts through the Pilot.
BANKS: Branch of Joint-Stock Financial Bank Yenisei, Tgarka, 2 m/r,3. Tel: (39112) 21322.
STORING: The vessel can be stored by barge. No trucks available.
SHIP SUPPLY SERVICE: Through Inflot.
SHORE LEAVE: Permitted during 0600 – 2400 hrs. subject to police control.
IDENTIFICATION CARDS: Required for crewmen going ashore.
GARBAGE DISPOSAL: No facilities.
WASTE OIL DISPOSAL: No facilities.
SEAMAN'S CLUBS: Available.
CURRENCY: Rouble.
REGULATIONS: Available through Inflot.
DELAYS: As per Soviet Wood Charter Party.
GENERAL: See "Fire Precautions".
DEVELOPMENTS: No draft increase expected in near future.
AUTHORITY: The Port of Igarka Authority, 47 Gorky Street, 663200 Igarka, Russia. *Tel:* (39112) 2-13-16. *Contact:* J.D. Rudenko, Chief Harbour Master. N.A. Marinenko, Acting Harbour Master.

AGENT: Archangel Inflot Shipping Agency, Troitsky Street 61, Archangel 163061, Russia. Tel: (8182) 435874, 438573. Telex: 242115 Inf Ru. Cables: Igarka Radio. Fax: 4778916032 (Through Norway). 242115.

KALININGRAD: 54.42 N. 20.29 E.

PORT LIMITS: From the entrance of Morskoi Canal to railway bridge across River Pregel.
DOCUMENTS:
7 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Ship's Stores List.
7 copies Passenger List.
1 copy Cargo Declaration.
1 copy Certificate of Health.
PILOTAGE: Compulsory. Pilot usually boards from pilot boat 1.5 miles seaward of the entrance to Morskoi Canal.
ANCHORAGES: Anchorages No. 686 and No. 68 in Outer Roads. See Chart No. 25051.
RESTRICTIONS: Vessels may not enter in bad weather or in thick fog.
MAX. SIZE: *Cargo Vessel:* LOA 140 m., beam 25 m., draft 7.9 m. (in Summertime).
Tankers: Same as cargo vessels, but draft limitation in Winter is 7.5 m.
HEALTH: All vessels coming from foreign ports are inspected by Sanitary Office. If no disease on board, Free Pratique is granted.
TUGS: Available. Tugs join at jetty entrance.
BERTHING: Quays available with depths up to 8.0 m. are equipped to handle fertilisers, oil, general, 20 ft. and 40 ft. containers, bulk and other cargoes.
Warehouses and solid floor sheds available.
CRANES: Electric cranes up to 20 tons capacity.
BULK CARGO FACILITIES: Handled at Berths No. 05, 07 and 09.
STEVEDORES: Arranged by Agent.
MEDICAL: Requirements should be arranged in advance with Agent (Inflot).
TANKERS: One berth with length 160 m. and depth 8.0 m.
DENSITY: Fresh water.
FRESH WATER: Supplied by barge.
FUEL: Supplied by barge.
REPAIRS: Facilities available.
DRY DOCKS: Floating dock for vessels up to 10,000 d.w.t. and LOA 170 m.
SURVEYORS:
1. Cargo Inspectors available.
2. Inspectors of The Shipping Register of Russia.
GANGWAY/DECK WATCHMEN: Not compulsory.
OPENING/CLOSING HATCHES: According to Charter Party.
CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: Electric cranes 5 tons – 20 tons capacity and forklift trucks 1 ton – 10 tons capacity.
REPATRIATION: Possible.
AIRPORT: Kaliningrad.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer (1st April – 1st October).
HOLIDAYS: General holidays are all Saturdays and Sundays, January 1st, March 8th, May 1st, 2nd and 9th, November 7th and Christmas Day.
POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03, Fire 01.
TELEPHONES: Can be arranged on board.
STORING: Vessels can be stored by trucks. Customs Regulations are in force.
SHORE LEAVE: Possible from 0800 hrs. – 0000 hrs.
IDENTIFICATION CARDS: Required.
GARBAGE DISPOSAL: All ship's garbage must be landed before departure.
WASTE OIL DISPOSAL: Collection service available.
SEAMAN'S CLUBS: None.
REGULATIONS: See "General" before first port.
DELAYS: Only weather conditions.

SHIPMASTER'S REPORT: June 1996.
Vessel:

LOA	159 m.
Beam	22.8 m.
Summer draft	9.76 m.
G.T.	12,474 tonnes
D.W.T.	20,700 tons

Pilotage: Pilot boarded vessel about 3 miles from breakwater. Pilot ladder port side 2.0 m. above sea level.

Canal from outer roads to Kaliningrad is very narrow, so vessel proceeded at dead slow ahead.
Loading: Berthed at Ro-Ro berth (Terminal GMB). Good shore installations, but not suitable for vessels of 10,000 tonnes or more.

We had many problems with air draft, and spout would not reach as far as centre of each hold.

Despite Agents/Terminal request to load to 7.9 m. (FW), it is absolutely imperative to load to 7.7 m. (FW) and not more.

We resumed loading operations at Baltysk (40th Point). Vessel berthed starboard side to dolphins, and resumed loading by barge on port side with floating crane. Barge capacity is about 2,500 tonnes. One barge was not enough to complete loading and barge returned to Kaliningrad for more cargo. Terminal GMB wanted to load to 11.0 m., but it is absolutely imperative to load to no more than 9.4 m., due to draft restrictions in the channel.
Cargo: Prilled Urea in bulk (stowage factor about 48 cu.ft./tonne).
Loading Rate: 3,000 tonnes/24 hours (working throughout).
Density: 1002.
Fresh Water: Available by barge. Cost U.S.$4.41 per tonne.
Spares: Very difficult to obtain.
Shore Leave: Crew allowed to go ashore with Seaman's Book.
Bonded Stores: Sealed.
Radio: "Kaliningrad One" on VHF Channel 16, then change to Channels 03 or 07.
Tugs: 2 tugs. Ship's lines used.
Documents: Crew Effects Declaration to include foreign currency.
Hull Painting: Only after permission obtained from Port Authority.

AUTHORITY: Maritime Administration of the Port of Kaliningrad, Kaliningrad Portovaya 24, Kaliningrad, Russia. *Tel:* 47-22-17, 47-21-92. *Telex:* 209684 Map.

KANDALAKSHA: 67.08 N. 32.25 E. (See Plan)

GENERAL: The port of Kandalaksha is situated in the N.W. extremity of the Kandalaksha Bay of the White Sea. Year round navigation is possible with the assistance of the ice-breakers for ships that have no Super-Ice Class. Vessels that have Super-Ice Class can go to and from the port. Only in the coldest of Winters may the assistance of ice-breakers be necessary, as during the period February-March-April the floating ice of the basin of the White Sea drifts and is pressed by the S.E. winds into Kandalaksha Bay, and it makes it difficult to pass strips of the hummock ice. However, in warm Winters, the basin of the sea may have no ice and navigation for vessels is not difficult. The port Kandalaksha and its anchorage are protected from waves of all directions. The difference between the high and low water is a maximum of 2.8 m.
PILOTAGE: Compulsory inward and outward. The distance of the compulsory pilotage is 8 nautical miles. The Pilot usually boards and disembarks the vessel at the distance 1.0 nautical miles S.E. from Garely Islands (Lat. 67° 03' N., Long. 32° 39' E.). Communication with the Pilot is on VHF Channel 16 throughout 24 hours. Call sign "Kandalaksha Radio 5". Masters of the vessel going to the port should order a Pilot by sending a telegram or telex to Kandalaksha via "Inflot" Murmansk 24 hours before arriving at the port and corrected 4 hours before arrival (by VHF) at the above mentioned position. On request of the Master, pilotage may commence or be completed in any position in Kandalaksha Bay. The Pilots are highly qualified. Anchorage for vessels waiting for a berth is situated in the Outer Roads of the port (position approx. Lat. 67° 08' N., Long. 32° 23' E.). The depths of water in the Roads are 35 m. – 40 m. and the bottom is mud.
RESTRICTIONS: The port of Kandalaksha can accept vessels with a draft of not more than 9.3 m. Inward and outward vessels with the draft of more than 8.0 m. are permitted, with the permission of the Harbour Master, to start 2 hours before the high water in the port.

All vessels navigating within the Inner Roads and Outer Roads must keep strictly to the following port regulations:

Vessel's speed must not exceed 4 knots.

Anchorage in the Inner Roads is prohibited.
MAX. SIZE: The length of the berths permits mooring of vessels with length up to 200 m. The depth at the berth permits vessels to moor with a draft not more than 9.0 m. (using 2 pontoons between berth and the body of the vessel) at low water.
HEALTH: The Master of a vessel coming from a foreign port should report every sickness of the crew. The Health Authorities board together with Customs and Immigration, and if they find everything in order, Free Pratique is granted. Each vessel shall produce a Derat Certificate and Sanitary Certificate.

RADIO: Cable via "Inflot" Murmansk, ETA, draft, length, breadth and moulded depth of the vessel, according to the vessel's certificate.

All vessels, when approaching the port of Kandalaksha, should establish VHF contact with the port, operating around the clock on the following channels:

1. Sea Inspection and Pilot Office of the port:
   Call sign "Kandalaksha Radio 5".
   Calling Channel 16. Working Channel 13.
2. Operator of the port and Controller:
   Call sign "Kandalaksha Radio 2".
   Calling Channel 16. Working Channel 14.

TUGS: Port has tugs up to 1,600 h.p. Use of tugs for mooring, unmooring and shifting is compulsory, according to port rules. Master should order the number of tugs according to the Pilot's advice.

BERTHING: The port has 5 berths:

Two berths with a total length of 250 m. that permit loading and discharging of vessels with draft of not more than 9.0 m. (providing 2 pontoons with the breadth 12.0 m. are used).

Two berths with a total length of 200 m. that permit handling of cargoes of vessel with draft not more than 7.0 m. (providing 2 pontoons with the breadth 12.0 m. are used).

A fifth berth has been built for the river vessels with a draft of 3.6 m.

CRANES: The capacity of the cranes is 20 tonnes, and with joint operations of two cranes, the capacity is 40 tonnes.

STEVEDORES: Ordered by the Agent. Port Working Hours: 0800 hrs. - 1600 hrs., except Sunday and holidays.

MEDICAL: Master has to advise Agent prior to arrival if medical attendance is required aboard. The Port Clinic has dental facilities and medical first aid.

DENSITY: 1001.6.

FRESH WATER: Available at Berths No. 3 and 4.

FUEL: Not available.

FIRE PRECAUTIONS: No smoking in the port area, except in the places specially allocated.

CONSULS: None.

SURVEYORS: Should be ordered via Jurinflot International Moscow (Fax: 212-8074) or via International Maritime Agence (Fax: 915-80-62).

REPAIRS: Port can undertake welding, metal work and turning work.

AIRPORT: The nearest airport is situated 100 km. from Kandalaksha own.

CUSTOMS ALLOWANCES: No restrictions on board.

TIME: The local time is Moscow time, which is GMT plus 3 hours. In he Summer (May-September), Summertime is kept.

HOLIDAYS: 1st, 2nd and 7th January, 8th March, 1st May, 9th May, 12th June.

POLICE/AMBULANCE/FIRE: Police Tel: 002. Fire Tel: 001. First Aid Tel: 003.

TELEPHONES: Available on board at Master's request. The cost of using the telephone is U.S.$ 5.00 per day.

BANKS: Arctic Promstroybank, Pronina Street, Building 4, Kandalaksha 184040. Tel: 2-23-05, 2-44-85. Telex: 12661202 BANK.

Kandalaksha Office of Seuzapcombank, Spekova Street, Building 32, Kandalaksha 184040. Tel: 2-20-90, 2-25-91. Telex: 126618 SEVER.

SHORE LEAVE: Crew members are allowed ashore. Identification cards will be issued on arrival.

DELAYS: Awaiting berth if there is port congestion.

DEVELOPMENTS: The Port Authority has a plan of reconstruction for he next 5 years. As a result of the expansion, the port handling capacity will increase to one million tons from the current capacity of 250,000 ons. This reconstruction will permit entering of the vessels to the port with a draft of 12.0 m.

AUTHORITY: Port of Kandalaksha, 19 ul. Belomorskaja, Kandalaksha, 184040 Russia. *Tel:* (812) 164-18-35. *Telex:* 126604 Strop. *FAX:* (812) 164-18-35. *Contact:* Zakharov Valentin Nikolaevich, General Director. Rintcin Vasiliy Alexandrovich, Deputy General Director. Mjagkov Vladimir Andreevich, Harbour Master.

KHOLMSK: 47.03 N. 142.03 E. (See Plan)

GENERAL: The seaport of Kholmsk is situated on the Western coast of Sakhalin Island, in the Tartarsky Strait of the Japan Sea and at the head of Nevelskoy Bay.

The port is open for navigation all the year round.

The outer roads of the port are bounded by an arc of 7 cables length radius, the centre of which is marked with a light located on the Southern mole of the Commercial Harbour.

The port is divided into 3 parts: The Kovsh (a basin), The Commercial and Fishing Harbours. The Commercial Harbour is situated in the centre of the port area. It is protected by the Southern and Northern moles. The entrance to the Harbour 150 m. wide, is situated between these 2 moles. Due to shoal water along the coast, there is not much space for vessels manoeuvrability in the Commercial Harbour. Cargo berths are situated in a basin (The Kovsh) of the Southern part of the Harbour.

The Port of Kholmsk, due to its position, size and weather conditions in the area, cannot be used as a sheltering port.

During Westerly and N.W'ly gales, particularly in the Autumn and Winter (October — March) the heavy sea swell penetrates into the Kovsh (mainly from the N.W.) causing the variable current with surge (the "Tvagun"). Due to this phenomena the stay in port is not safe therefore Masters of all vessels are recommended to leave the port for sea after having received a storm warning of a gale coming from Westerly or N.W. directions.

All vessels proceeding to the port of Kholmsk in the Autumn and/or Winter must have available on board a sufficiency of fuel, fresh water, provisions and strong manila ropes, be seaworthy in all respects, thus ensuring vessel's safety during a possible stay in the open sea roadstead.

In case there are no vacant berths in the port, vessels are not allowed to enter the harbour without prior permission.

It is also prohibited to enter the harbour after a storm warning has been received by vessel despite the fact that there are vacant berths in the port.

DOCUMENTS: Refer to beginning of the Russian section.

PILOTAGE: Compulsory. Pilot meets a vessel in the outer roads. In the event of bad weather, when Pilot is unable to come on board, vessel should follow in the wake of pilot boat.

ANCHORAGES: There are no anchorages protected from the wind in the Nevelskoy Bay.

During off-shore winds vessels may anchor in the outer roads situated opposite the port entrance. The outer roads are open to Westerly winds.

Masters should bear in mind that during the period of navigation fish nets are usually laid in the outer roads. The seaward side of the border of the fish nets, situated about 8 cables length off-shore, is usually marked by wooden buoys with flags.

Anchorage in the outer roads may also be obtained at 4 – 6 cables length off shore. Depths are from 18 m. to 20 m. Holding ground sand and stone.

A vessel should proceed to the anchorage along the leading line of the port of Kholmsk leading lights. At a distance of half a mile off the port entrance, a vessel should steer off the leading line at 2 – 3 cables length and then drop anchor.

The holding ground is better in the Southern part of the outer roads than in the Northern part.

When at anchor, a vessel may not approach the leading line closer than 1.5 cables length.

RESTRICTIONS: Vessels may enter the port at any time of day or night.

MAX. SIZE: The maximum permissible draft for entry to the port is 6 m. Length not over 105 m. and beam up to 20 m. Since depths in the channel may vary at times, the Port Authorities shall undertake to advise the Masters of incoming vessels accordingly.

HEALTH: Not later than 6 hours before arrival, Master to radio "Inflot" advising health condition on board. Health Authorities board together with Customs and Immigration and if all found in order Free Pratique is granted. If vessels enter after calling at another Russian port, Pratique is automatic.

RADIO: Ship-shore radio link can be established through the port radio-station Kholmsk Radio operating 24 hours a day on the following frequencies:

Call sign	Frequencies (kHz) Working	Calling	Type of trans-mission	Time of Work
UFO	500	500	A1A	H24
"Kholmsk Radio"	2182	2182	H3E	H24
"Kholmsk Radio-2"	2720	2720	H3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24
"Kholmsk Radio-5"	156.7*(14)	156.8*(16)	F3E	H24
"Kholmsk Radio-1"	2720	2720	H3E	H24
(Vessel movement control post)				

*Frequencies are given in MHz.

RADAR: No shore based radar.

TUGS: Two tugs of 300 h.p. and two tugs of 1,200 h.p. are available. Number of tugs required for assistance is usually agreed between Pilot and Master. Tugs normally join the vessel in the inner area of the port.

BERTHING: Berths with depths up to 7.3 m. alongside, are equipped to handle general and bulk cargoes, metals, timber, food products, etc., as well as passenger traffic.

Fishing Port: Max. LOA 132 m. Max. draft 6.0 m.

CRANES: Cranes of up to 40 tons capacity are operated on the quays. There are also other cargo-handling equipment and inter-port transport facilities. There are enclosed warehouses and open concrete floor sheds.

STEVEDORES: Arranged through "Inflot".

MEDICAL: All requirements should be ordered in advance through "Inflot" if medical assistance required aboard.

FRESH WATER: Available from berth, road delivery not possible.

FUEL: Not available.

CONSULS: None.

REPAIRS: Only minor repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: Inspectors of the Shipping Register of Russia only.

GANGWAY/DECK WATCHMEN: Gangway watch compulsory and carried out by crew.

HATCHES: Opening and closing of mechanised hatches is always done by the ship's crews.

CUSTOMS ALLOWANCES: No restrictions on tobacco and alcohol on board ship. Only tobacco required for personal consumption may be taken ashore.

AIRPORT: No local airport.

TIME: GMT plus 11 hours. Summertime (April 1st - October 1st) GMT plus 12 hours.

HOLIDAYS: New Year's Day; March 8th (World's Women's Day); May 1st, 2nd (Labour Day); May 9th (Victory Day); October 7th (Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work can be arranged on these days.

POLICE/AMBULANCE/FIRE: Police Tel: 602. Ambulance Tel: 603. Fire Tel: 601.

TELEPHONES: Can be arranged on board.

TIDE: Changes in the water level are of small account. They are mainly due to the irregular diurnal tides. The maximum range of the water level observed is 0.4 m.

AUTHORITY: The Port of Kholmsk Authority, 39 Sovetskaya Street, 694620 Kholmsk, Sakhalin Is., Russia. *Tel:* 96-3-05. *Telex:* Via Morflot Kholmsk 412613 SSC SU. *Cables:* Morport Kholmsk. *Contact:* Harbour Master.

AGENT: The Sakhalin Main Maritime Agency Morflot. 6 Morskaya Street, Port of Kholmsk, Sakhalin Island 694620, Russia. Cables: "Morflot Kholmsk". Tel: 222-86; 220-80. Telex: 412613 SSC SU.

MEZEN: 65.50 N. 44.04 E.

GENERAL: A commercial seaport, Mezen is situated at a distance of 22 miles to the South of the mouth of the Mezen River flowing into the head of the Gulf of Mezen, in the White Sea.

The port area is bounded on the North by a line connecting the Ryabinov and the Nerpinsky points and on the South by the parallel of 65° 50' N., Northward of the town of Mezen. The anchorage at the Kuloi river mouth is also included at the port of Mezen area.

Vessels drawing 3.9 m. – 4.2 m. are usually grounded when loading timber alongside a floating berth of the timber-mill at low water.

The port is open for navigation from the end of May until October.

Tidal streams are observed in the Mezen river. The tide is semi-diurnal with two high waters and two low waters a day.

DOCUMENTS: Refer to beginning of the Russian section.

PILOTAGE: Compulsory. A Pilot meets a vessel at an anchorage buoy, at the Mezen River bar (Lat. 66° 12' N., Long. 44° 04' E.), at a distance of 22 miles off the port of Mezen. In the event of bad weather a Pilot at his discretion, may board a vessel in the outer roads.

Pilotage cannot be effected at night.

A Pilot cannot board a vessel earlier than 2 hours before the high water in the Semzha River, and a vessel may be piloted into the port not later than 1 hour before the water in the river reaches its high level.

Pilots do not board vessels in rough water (if the wind is over Force 6 Beaufort scale).

In case Pilot cannot embark a vessel in the outer roads, Master should follow in the wake of pilot boat up to Tolstic Point (Lat. 66° 04' N., Long. 44° 05' E.) where a Pilot will board ship. After leaving the port Master should disembark Pilot on to pilot boat at Tolstic Point and then follow it up to the outer roads of the port of Mezen.

ANCHORAGES: Anchorage can be obtained in the outer roads and in certain places of the Mezen River situated between the outer roads and the Kamenka settlement.

The outer roads are situated at the Mezen River mouth. They are bounded on the South by a line connecting the Ryabinov and the Maslyany Points.

Vessels in the outer roads are subject to effects of the N.W. and N.E. winds and heavy waves caused by them. The depths in the outer roads are about 7 m. The holding ground is sand, mud and rocks. Anchorage can be obtained in the inner roads with depths at low water of up to 4.5 m. – 5 m. (length of area is 1.5 mile and width up to 150 m.).

The inner roads are situated opposite the Kamenka settlement. A good anchorage can be obtained there by two vessels simultaneously. The anchorage at Burnovsky Point with depths from 4.5 m. – 5.5 m. can be used by two loaded vessels drawing up to 4.2 m.

RESTRICTIONS: Vessels may enter port only in daytime on high water. Masters have to pay full attention to Pilot's advice as river has varying bends.

MAX. SIZE: The permitted draft for the entry to the port is announced monthly by the Port Authorities. It should not exceed 3.9 m. – 4.2 m. The maximum permitted length is 70 m.

HEALTH: As for "Archangel".

RADIO: Vessels can establish radio contact through the port radio station Mezen Radio operating 24 hours a day on the following frequencies:

	Frequencies (kHz)			
Call sign	*Working*	*Calling*	*Type of transmission*	*Time*
UZT	500	500	A1	HX
"Mezen-Radio"	2182	2182	P3E	H24
			J3E	H24
"Kamenka-2"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24
"Kamenka 5"	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.6*(12)	156.6*(12)	F3E	H24

*Frequencies given are in MHz.

Notice of Arrival: As per conditions of the "Soviet Wood" Charter Party.

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

FRESH WATER: Fresh water can be supplied at the berths and by road tankers.

FUEL: Supplies not guaranteed.

BERTHING: The floating dams are used as mooring berths in the port. The depths alongside at low water are about 3.5 m. Vessels drawing 3.9 m. – 4.2 m. are usually grounded while loading at low water.

The port of Mezen specialises in timber exports but other cargoes are also handled at berths. Covered warehouses and open concrete floor sheds are available.

Tug assistance for mooring berths is not compulsory. Berthing is usually done in the daytime. Tugs, if necessary are ordered by Master according to the Pilot's instructions.

Rendering of Notice of Readiness and opening and closing of hatches are usually done in accordance with the "Soviet Wood" charter party.

Loading of timber is done by ship's winches and floating cranes with capacity 5 tons.

TIDE: The difference between two successive high waters and low waters is small but the range of the tide changes considerably. At the Kamenka settlement the mean range of the tide is 2.8 m. and the mean range of the spring tide is 3.1 m. At the Semzha River the mean range of the spring tide reaches 7.7 m. Everywhere in the Gulf of Mezen the differences in the duration of falling and of rising water are big and in some places of the Gulf of Mezen they may reach 5 hours.

Considerable changes in the water level are observed in the Spring. They are usually caused by the seasonal increase in the amount of water (due to melting snow) brought down by the rivers.

TIME: GMT plus 3 hours (all year round).

AUTHORITY: The Port of Mezen Authority, Morport, 164652 – Kamenka Settlement, Mezen, Archangel Region, Russia. *Tel:* 9-43-41 (Chief of the Port), 9-40-81 (Harbour Master). *Cables:* Morport Mezen.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Mezen.

Port – "Inflot", Kamenka Settlement, 164650 – Mezen, Archangel Region, Russia. Cables: "Inflot Mezen-Kamenka". Tel: Exchange – 94391. Inflot – 94126.

MURMANSK: 69.00 N. 33.03 E. (See Plan)

GENERAL: A Barents Commercial Seaport and Fishing Port, Murmansk, is situated at the Eastern coast of the Southern elbow-shaped bend of the Gulf of Kolsky, between the latitude of Mishukov Point in the North and Lat. 68° 55' 33" N. in the South. It is the last unfrozen port of the Northern seas route.

In very severe Winters the Southern and middle elbow-shaped bends of the Gulf get frozen over for a short period of time in February or March, during calm and frosty weather. In mild Winters drift ice is observed. The Northern part of the Gulf never gets frozen over. The port of Murmansk is open for navigation all the year round. In the event of ice conditions in the Gulf of Kolsky, ice-breaker assistance will be effected in compliance with the Harbour regulations in force.

The port area occupies nearly all Southern elbow-shaped bend of the Gulf of Kolsky. The port of Murmansk consists of 2 harbours: the Commercial and the Fishing Harbours.

DOCUMENTS: Also refer to beginning of the Russian section.

General Declaration, 5 copies (IMO Form).
Crew List, 6 copies (IMO Form).
Passenger List, 6 copies (IMO Form).
Crew Effects Declaration, 2 copies (IMO Form).
Cargo Declaration, 3 copies (IMO Form).

PILOTAGE: Compulsory. Pilot station is situated at Kislaya Gooba (position Lat. 69° 11.5' N., Long. 33° 31.6' E.) in Kolsky Bay, 9 miles South of the entrance. ETA to be given to Agents before arrival (see "Radio"). Since Pilots are not available at the pilot station any time, it is vital that ETA is duly given to the Agent to arrange a Pilot by indicated time. Pilot launch is distinguished by word "Pilot" in black letters on boat's superstructure. Pilots can be contacted on VHF Channel 16. Every vessel should drift whilst waiting for Pilot since depths in the Pilot station are too big to permit anchorage.

During rough sea Pilot is not able to board a ship at the Pilot station area. In this event vessel should follow the Pilot boat in the wake of it up to the Salny Island and embark a Pilot Southward of the Island at a place indicated by Pilot boat.

ANCHORAGES: At the pilot station depths are too great to permit anchorage, but there is sufficient sea room for vessel to await Pilot with engines stopped. Anchorage with depths from 20 m. – 35 m. is situated in the Southern elbow-shaped bend of the Gulf of Kolsky, Westward of the Kievaraksky leading line (the port inner roads). The holding ground is good.

Every vessel waiting for mooring berth should anchor Westward of the Kievarasksky leading line but not obstructing other vessels' traffic.

It is strictly prohibited to lie at anchor Eastward of the Kievaraksky leading line. If, in case of emergency, a Master has to lie at anchor in the prohibited area, he should immediately report the fact to the Harbour Master of the Commercial port of Murmansk.

RESTRICTIONS: Vessels can enter the inner roads of the port at any time of day or night.

The speed of vessels navigating within the limits of the Gulf of Kolsky is restricted by the following limits:

(a) It shall not exceed 14 knots in the area bounded by the parallels of the Letinsky Point and the Northern side of the Salny Island.
(b) It shall not exceed 10 knots in the area bounded by the parallels of the Northern side of the Salny Island and Pinagory Point.
(c) It shall not exceed 6 knots in the area Southward of Pinagory Point.
(d) In case the wind is over Force 6 Beaufort Scale all movements of ships within the port basin and roads may be carried out with the Port Authorities' permission only.

MAX. SIZE: LOA 200 m., draft 12.0 m.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting Pratique which will be given on arrival.

RADIO/RADAR: Murmansk Radio operating 24 hours on 2182 kHz. Coastal radio station UMN operating 24 hours on 500 and 472 kHz. Coastal radio station UMV operating 24 hours on 13080 kHz.

Radio contact can be established through the port radio station Murmansk Radio, operating 24 hours a day on the following frequencies:

	Frequencies (kHz)			
Call sign	*Working*	*Calling*	*Type of transmission*	*Time*
UMN	500	500	A1A	H24
"Murmansk Radio"	2182	2182	H3E	H24

Radar/VHF Link:

In the South circular bay, movement of all vessels is severely controlled by Coastal Radar Station (Murmansk Radio 9 – VHF Channels 12, 18 and 67). All vessels under way must make contact with it and carry out the recommendations received.

All vessels when at anchor or navigating in the Gulf of Kolsky must keep constant VHF watch on Channel 16.

The port radar station gives all possible information to any vessel navigating in the Gulf in the restricted visibility. Radar navigation is usually controlled by a Pilot on board a vessel.

Storm predictions are transmitted on Channel 16 VHF for vessels in the vicinity. Vessels at moorings are warned through the Agent.

Notice of Arrival: Every foreign vessel on approaching the Gulf of Kolsky must ask for entry permission into the Gulf from the Toros Island signal station by exhibiting her International Code letters by day and at night her call sign should be made in Morse code by searchlight.

Advice to Agent: ETA first notice be given to Agent by Shipowner 10 days prior to ship's arrival. Master has to inform Port via Agent 48 hours and 12 hours before ship's arrival.

VHF: Port VHF maintains contact between ship and shore. Calling on Channel 16 working channel will be according to instructions from shore (Channels 7, 26 and 27).

TUGS: 4 tugs 1,200 h.p. – 2,300 h.p. Normally join vessel in the inner area of the port. Ship's lines as well as tug's lines can be used, the latter being supplied free of expense to vessel.

BERTHING: Main berths, depth alongside 32 ft. at low water. Average height of tide about 3.9 m. Vessels berth port or starboard side alongside at Master's and Pilot's discretion. The berths of the Commercial Harbour with depths alongside of up to 12.0 m. are equipped to handle general and bulk cargoes, metals, machinery, chemicals, foodstuff, etc.

There are enclosed mechanised warehouses for apatite including open concrete floor sheds.

Berths of the port are equipped with mobile electric cranes of up to 40 tons capacity and other cargo handling equipment and intra-port transport. Since loading/unloading is usually done by the port cranes, there are no specific requirements to vessel's cargo gear.

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

MEDICAL: Hospital and medical facilities available. Vaccination can be arranged. If doctor required on board Master should inform Agents by radio or VHF.

TANKERS: See "Shipmaster's Report".

DENSITY: At the berth varies between 1006 and 1025.

FRESH WATER: Available from most berths, otherwise supplied by barge. To avoid delay recommended to order before arrival.

FUEL: All grades available. Delivered by barge. Advance notice required.

CONSULS: There is no local representation.

REPAIRS: All kinds of repairs can be carried out for vessels of up to 30,000 dwt.

DRY DOCKS: Large dock; length 225 m., width 45 m. Small dock; length 141 m. width 30 m.

GANGWAY/DECK WATCHMEN: Not obligatory.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: At first Russian port of call certificates of tonnage and those required by International Convention will be required for examination.

CUSTOMS ALLOWANCES: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

TIDE: Changes of the water level in the Gulf are due to the tides. The tide is semi-diurnal with two high waters and two low waters a day. The difference in time of high and low water is about 6 hours. The range of the tide at mean neap is about 2.4 m. and at mean spring 4.5 m. The extreme range of water level is usually observed during the Autumn months and the lowest during Spring.

TIME: GMT plus 3 hours in Winter. GMT plus 4 hours in Summer. (April 1st – September 30th).

TELEPHONES: Ambulance, Tel: 003, 2395 and 2422; Fire service, Tel: 2252 and 2524.

GARBAGE DISPOSAL: Collection service available. Containers are placed alongside the ship, telephone number of garbage service is 21-26 (this number to be used within the port only). Cost for one container of 0.75 cu.m. capacity is U.S.$ 36.00. 24 hours notice required for garbage disposal. Garbage removed between 0800 hrs. – 1600 hrs. from Monday to Friday.

WASTE OIL DISPOSAL: Collection service available with barges only. One barge is available of about 350 tons capacity to receive bilge water and oily water. Telephone number of the service is 23-55. Charge for removal of one ton is U.S.$ 43.20.

SEAMAN'S CLUBS: None.

CURRENCY: Russian Roubles. Import of currency is unlimited, but amount of currency brought into the country must be declared.

DEVELOPMENTS: Reconstruction is being carried out in order to speed up loading of iron-ore and other cargoes.

SHIPMASTER'S REPORT: May 1993.

Vessel:

LOA	176.8 m.
Beam	21.8 m.
Max. draft	9.72 m.
Summer d.w.t.	19,350 tonnes.
B.R.T.	12,587 tons.
N.R.T.	6,641 tons.

Jetty: Murmanol – Berth No. 2/4.

Max. Draft: 6.80 m. at L.W. (Pilot's advice).

Position: Lat. 68° 55.9' N., Long. 33° 02' E.

Berthing: Vessels berth port side alongside (at Master's and Pilot's discretion).

Restrictions: Vessels may berth and unberth at any state of the tide.

Tugs: Tugs' lines normally used.

Telephones: Available at berth. No connections on vessels.

Density: 1000 – 1010.

Loading: Loading rate for Gas Oil is 500 – 550 tonnes/hr. and for Fuel Oil and Motor Fuel Oil 220 – 260 tonnes/hr., using 100 mm. diameter shore hoses.

Ballast: Ballast water to be pumped to shore slop tank via 100 mm. shore hose at max. pressure 3 kg./sq.cm. – 4 kg./sq.cm.

AUTHORITY: The Port of Murmansk Authority, 19 the Port Passage, 183027 Murmansk, Russia. *Tel:* 2-22-60, 2-23-10, 2-55-65 (Harbour Master). *Cables:* Mortorgport Murmansk. *FAX:* 789-10732. *Contact:* Captain V. Avdyukov, Harbour Master.

NAKHODKA: 42.48 N. 132.53 E. (See Plan)

GENERAL: A commercial port, Nakhodka is situated in Nakhodka Bay, in the N.W. part of the Japan Sea.

Sometimes Nakhodka Bay is covered with sludge which is frequently driven out by winds into the sea.

From the beginning of January to March the Nakhodka Bay is usually covered with thin ice which can easily be broken by vessels and driven out into the sea by favourable winds.

The port is open for navigation all the year round.

Changes of the water level in the Nakhodka Bay are of small account but the rise of the water level caused by strong Southerly winds blowing for considerable periods of time, may reach quite a high level.

The Northern part of the Nakhodka Bay from the entrance up to the line connecting the Lindgolm and Basnin Points is occupied by the Commercial port. The fishing port is situated Southward of this line.

The most dangerous wind for vessels lying in the Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to the water level and produces waves of up to 3 m. height in the Bay.

DOCUMENTS: Refer to beginning of the Russian section.

PILOTAGE: Pilotage in the port of Nakhodka is compulsory for all vessels irrespective of nationality and ownership with the exception of the local coasters.

Since 1981 the following Traffic Scheme has been established in the Nakhodka Bay (Navarea XIII No. 28 04.04.81).

1. All vessels arriving at Nakhodka Bay ports from sea are requested to proceed to Nakhodka Bay lighted pivot mid channel Buoy No. 1 (Lat. 42° 43' 31" N., Long. 132° 56' 26" E.) which is the pilot boarding place.
2. Main Ship Channel No. 1 (740 m. wide) leads from lighted Buoy No. 1 along Nakhodka Bay entrance range axis 180° – 000°.
3. Channel No. 2 (740 m. wide) 050° – 230° leads from lighted Buoy No. 1 to Nakhodka Bay lighted pivot mid channel Buoy No. 2 (Lat. 42° 46' 00" N., Long. 133° 00' 06" E.) to Vostochny Port Channel No. 3 (250 m. wide) leads along axis of Vrangel Bay entrance range 297° – 117°.
4. Channel No. 7 (740 m. wide) leads from lighted buoy No. 2 along axis of Vrangel Bay entrance range 297° – 117° up to crossing the Main Ship Channel No. 1 to Nakhodka Bay.
5. Channel No. 4 (740 m. wide) leads from Main Ship Channel No. 1 along axis of Novitsky Bay range 089.3° – 269.3° up to crossing the Channel No. 7 to Vrangel Bay and Channel No. 5 (250 m. wide) leads to Novitsky Bay.
6. Entrance Channel No. 6 (250 m. wide) leads from main ship Channel No. 1 along axis of Torgovy Port range 087.9° – 267.9° to Nakhodka Bay.
7. All vessels 50 m. and more in length are requested to proceed via above mentioned channels.

Channels No. 1, 2, 4, 7 have two-way traffic. Vessels are requested to proceed along the right side of channel axis.

Channels No. 3, 5, 6 have one-way traffic. Vessels to proceed along the channel axis, according to Traffic Centre instructions.

8. Vessels that proceed from sea are requested to contact Traffic Regulation Centre on Channel 12 call sign "Kamensky-17" not less than 2 miles before approaching Nakhodka Bay lighted pivot Buoy No. 1.

Vessels at berth or anchored within Nakhodka Bay water area are requested to seek permission of the Traffic Regulation Centre before unmooring or weighing the anchor.

Vessels anchored are requested to keep continuous watch on Channel 16.

To avoid damage to a vessel and/or any port installation, vessels should be moored/unmoored by the method of parallel mooring/unmooring with tug assistance.

Being at 10 m. distance from a berth a vessel is allowed to use her main engine in case of emergency only.

ANCHORAGES: A safe anchorage can be obtained in Areas No. 305, 306 and 307, with depths from 13.0 m. – 28.0 m. and in the anchorage "10" area with depths from 18.0 m. – 28.0 m. The holding ground in both anchorages is mud, sand, sand with mud, stone.

The "3" area is a quarantine anchorage which serves as the Pilots' boarding place and an anchorage for deep sea-going vessels over 3,000 d.w.t.

The "10" anchorage area is an anchorage for tankers proceeding to the oil port situated in the Novitsky Bay. Boundaries of the anchorages are shown on the chart.

To lie at anchor in the Nakhodka Bay, in the fairway and in the dredged harbours, except in emergency, is strictly prohibited.

Masters to advise Port Director of time of anchoring and position, and on departure, time of weighing anchor.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. There are no size restrictions for entry to the port, except for vessels having the maximum permitted draft.

Anchorage for tankers is allowed only in the "10" area.

MAX. SIZE: The permitted draft for vessels proceeding to the Commercial port is 9.10 m., the Fishing port 8.0 m. and the Passenger Terminal 8.6 m.

Vessels drawing over the permitted draft must obtain Harbour Master's permission prior to entry to the port.

HEALTH: Advise "Inflot" by radio in advance if there is any case of quarantine illness on board the ship. If vessel is arriving from a cholera area, then cholera inoculations are required.

TUGS: Tug and mooring launch assistance available. 2 tugs used. Tugs join the vessel in Nakhodka Bay as directed by Master or Pilot. Ship's tow lines are used.

RADIO: Radio communication can be effected via the radio station of the Primorsk Shipping Company – "Nakhodka-Radio" some data of which is given in the table below.

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UKI	500	500	A1A	H24
Nakhodka Radio–1	156.100*(2)	160.700*(2)	F3E	
"Novitsky-2"	157.65*(33)	157.65*(33)	F3E	†H24
(Oil Harbour controller)	157.7*(34)	157.7*(34)	F3E	H24
"Kamensky-17"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement	156.7*(14)	156.7*(14)	F3E	H24
control post)	156.375*(67)	156.375*(67)	F3E	H24

*Frequencies are given in MHz.
0100–1300 (Moscow Time)

VTMS in operation, call "Kamenskiy 17".

BERTHING: May be effected at any time of day or night. In daytime vessel's mooring position will be marked by a flag and at night by a red lantern. These signals mark the point where the ship's bow should be at the mooring.

The berths of Cargo Handling Port Area No. 1 have depths alongside from 8.6 m. up to 10.2 m. and are equipped to handle grain, equipment, cables, wire ropes, metals, phosphorus, etc.

The berths of Cargo Handling Port Area No. 2 have depths alongside from 9.1 m. up to 10.2 m. and are equipped to handle grain, coal, cement, foodstuff and general cargoes.

The berths of Cargo Handling Port Area No. 3 have depths alongside from 8.8 m. up to 11.8 m. and are equipped to handle timber, sawn timber, equipment, machinery and other cargoes.

Passenger vessels are handled at two berths with depths alongside 8.8 m. and 6.1 m.

Electric cranes of up to 41 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 300 tons and other cargo handling equipment, intra-port transport included.

2 grain handles available, rate 300 tonnes/hr. each.

Loading and/or unloading is usually done in accordance with conditions and rates stipulated by Charter Parties and Sales Contracts.

STEVEDORES: Arranged through "Inflot".

MEDICAL: Medical service is free. All requirements should be ordered in advance through "Inflot".

TANKERS: Slop reception facilities are available.

Report: 1994.

Terminal: Nakhodka Oil Terminal (Neftebaza). Tel: (266) 22531, (266) 22737. Telex: 213804 NEFTO SU.

Shore tanks:

Product	No.	Total Capacity (tonnes)
Ethyl Gasoline	12	34,800
Aviation Gasoline	10	10,500
Aviation Kerosine	3	9,700
Diesel Fuel Oil	20	61,600
Marine Diesel Oil	4	13,600
Fuel Oil M-40/100	2	13,000
Light Fuel Oil F-5	2	8,000
Motor Fuel Oil	2	8,000
Lubricating Oil	13	12,600

Shore lines:

Product:	Length (m.)	Diameter (mm.)
Gasoline	760	500
Diesel F.O.	1,500	600
Heavy F.O.	1,420	600
Ethyl Gasoline	960	500

Berthing Facilities: The port has 1 pier with 5 berths. Vessels are being moored alongside Berths No. 1 and 2 with a max. draft of 12.0 m. and Berths No. 3 and 4 with a max. draft of 6.8 m.

Berth No. 5 is for stern mooring with a max. draft aft of 6.8 m.

Loading Rates:

Product	Rate (tonnes/hr.)
Ethyl Gasoline	750 – 800
Aviation Gasoline	360
Aviation Kerosine	720
Diesel Oil	860 – 880
MDO	700 – 720
Fuel Oil M-40/100	500 – 800
Motor Fuel Oil	570 – 800

FRESH WATER: Can be supplied by barge only.

FUEL: Available.

CONSULS: North Korea, Tel: 55310. Japan, Tel: 56360.

WIND: The most dangerous wind for vessels lying in Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to water level and sends heavy waves of up to 4 m. height into the Bay.

REPAIRS: All kinds of repairs for vessels of up to 25,000 d.w.t. can be carried out.

SURVEYORS: Saybolt (Vladivostok).

OPENING/CLOSING HATCHES: Can be carried out by stevedores.

CUSTOMS ALLOWANCES: No restrictions on tobacco and alcohol on board ship. Only tobacco required for personal consumption may be taken ashore.

REPATRIATION: Can be arranged during the Summer months provided passport and documentation in order. During Winter months there are no facilities for foreigners to reach nearest international airport so repatriation is only possible via infrequent passenger ships to Japan.

AIRPORT: Nearest international airport is at Khabarovsk, 1,000 kilometres away. Vladivostok is now closed to foreigners or international traffic, though sometimes used for air freight.

TIME: GMT plus 10 hours. GMT plus 11 hours in Summer.

SHORE LEAVE: Permitted subject to police control.

DEVELOPMENTS: Port under reconstruction. On completion vessels with draft of 11.6 m. will be able to berth.

SHIPMASTER'S REPORT: April, 1983.

Documents: 2 copies of Camera List on plain paper signed by the Master giving Make and Serial No. of cameras in possession of crew members.

Also see "Regulations".

Anchorage: All tankers must anchor, while awaiting berth, in the anchorage with the following co-ordinates:

	Lat.	Long.		Lat.	Long.
(a)	42° 45.80' N.	132° 54.71' E.	(b)	42° 45.80' N.	132° 55.27' E.
(c)	42° 55.57' N.	132° 55.44' E.	(d)	42° 44.37' N.	132° 55.44' E.
(e)	42° 44.39' N.	132° 54.56' E.	(f)	42° 44.73' N.	132° 54.56' E.
(g)	42° 45.16' N.	132° 55.08' E.	(h)	42° 45.39' N.	132° 54.71' E.

VHF: "Nakhodka Port Radio Control" maintains continuous watch on Channel 12. This station can be used for conveying messages to Agents. It is not possible to talk directly with Agents.

Medical: 10 Roubles per person for medical consultation.

Fuel: Owner must contact Bominflot London (Telex No. 23830. Fax: (071) 734 3370) for supply of fuels.

Tankers: All ballast (including clean ballast) in cargo tanks must be pumped ashore. Installation can receive ballast at the rate of 300 t.p.h. to 400 t.p.h. Gas oil loading rate about 700 t.p.h. Interruptions in loading due to shortage of cargo ashore. Vessel took about seven days to load 20,700 tonnes of gas oil.

Surveyors: Russian Register of Shipping Surveyor can carry out hull and machinery surveys on behalf of Lloyd's Register of Shipping.

Customs: All pornographic literature and films must be kept sealed during the vessel's stay in port.

Shore Leave: From 4 tanker berths, shore leave possible by boats only. Same arranged by Agents.

All seamen are welcomed in the local Seaman's Club.

Regulations: Photography strictly prohibited within port limits.

SHIPMASTER'S REPORT: May 1984.

See "Vostochny".

SHIPMASTER'S REPORT: October 1994.

(A) Documents to be prepared for arrival: (Editor's Note: Same documents required for arrival Vladivostok).
1 copy General Declaration.
10 copies Crew List.
3 copies Stores List.
3 copies Crew Personal Effects List.
3 copies Currency List.
1 copy Health Declaration.
3 copies List of Port of Calls.

(B) Prior to approaching Fairway Buoy, vessel must call Port Control through VHF Channel 13. Report shall include vessel's name, max. draft, vessel's intention either to load or discharge and name of Agent. If berth not available on arrival, Port Control will advise vessel to drop anchor at Quarantine Anchorage, and there, Boarding Authorities/Agent will come on board for inspections, such as ship's Certificates, documents, Seaman's Books, Bonded Stores.

Prior to departure, Immigration Officers/Agent will board the vessel and Seaman's Books will be distributed to each crew member and will remain in their respective cabins while inspection is being undertaken, after which, if all found clear, they will issue Outward Clearance.

(C) Pilotage is compulsory for all vessels, irrespective of nationality and ownership.

(D) Anchorage depth is 13.0 m. – 28.0 m.

(E) Restrictions: Vessel can leave anytime day or night.

(F) Health: Advise Agent by radio in advance if there is any case of quarantineable illness on board. If vessel arrives from a Cholera area, then Cholera inoculation is required.

(G) Tugs: Tugs and mooring assistance available. 2 tugs used and ship's tow line used.

(H) Stevedores to be arranged by Agent.

(I) Fresh water supplied by barge only. Cost is U.S.$ 7.90/ton.

(J) Fuel available.

(K) Customs Allowances: No restrictions on tobacco and alcohol onboard.

(L) Consuls: North Korea and Japan.

(M) Wind: The most dangerous wind for staying in Nakhodka Bay is the strong Southern wind of long duration caused by typhoons.

(N) Repatriation: Can be arranged during Summer months, provided documentation is in order.

(O) Time: GMT plus 10 hours (GMT plus 11 hours in Summer).

(P) Shore Leave: Every crew member going ashore must carry their Passport. No time limit.

(Q) General: While at berth in Nakhodka, we experienced ground swell which caused the vessel to move fore and aft. 3 of our mooring ropes parted. On berth, we had 5 head/stern lines, 3 fore/aft spring lines and 2 fore and aft breast lines.

SHIPMASTER'S REPORT: November 1995.

On approach to the port, several attempts were made to contact "Kamensky-17" on VHF Channels 12 and 16, but without success. Eventually, we received an answer from "Nakhodka Port Control" on Channel 16, and were instructed to change to the working channel (13). We were then informed to call back when 2 miles from Buoy No. 1. Upon calling back, we were instructed to proceed to a position 165° – 2.6 miles from "Mys.Shvedova" Lighthouse and anchor there, without a Pilot. This position is situated in the anchorage area designated for foreign tankers (0.6 miles East of the North East point of "Ostrov Lisiy" Island). It was intended that the vessel obtained port clearance in this position on the same morning as we arrived, but there was a significant Southerly swell running (quite common in this bay), which prevented the port officials boarding until the following day.

Clearance of the vessel took nearly 2 hours and involved a lot of paperwork. There was one Customs official, two Immigration officials and three Health Inspectors, one each for meat, vegetables and personnel. The Health officials inspected the ship's store rooms and hospital. The Immigration officials wanted all crew members to be in their cabins with their Seaman's Books in hand for identification purposes.

There are two suitable berths for a vessel of this size (38,000 d.w.t.). Berths No.1 and 2 are situated at the end of the oil terminal pier. The depths alongside are as per chart, 13.0 m. at No. 1 and 12.6 m. at No. 2. Vessel's berth with bow facing outwards to the bay. This vessel was berthed starboard side alongside at Berth No. 1. Although the green Buoy No. 1 is crossed out on the chart, this buoy was situated approximately 350 m. abeam of the end of the jetty and was unlit. There was no sign of Buoy No. 3. The vessel dropped the port anchor with the port side parallel to Jetty No. 1 and the bow at approximate distance and bearing from the end of the pier of 045° × 120 m., speed of approach 1.5 knots. Both tugs were fast at this time, with ship's lines on the port shoulder and just forward of the accommodation block. The vessel was swung to port on the port anchor and cleared Buoy No. 3 at the stern by 50 m. We eventually came alongside Berth No. 1 with 6 shackles out on the port anchor. Mooring arrangement was 3,2,2 – fore and aft. Maximum sailing draft alongside this berth is 11.5 m.

1×12 in. Chicksan was provided throughout the loading operation. Loading was by gravity with frequent interruptions and without informing the ship. Vessel loaded 34,200 tonnes from 10 shore tanks (shore tanks are small and old). The oil is transported to the terminal by railroad tankers from a refinery situated 600 km. away.

When we anchored at the "foreign tanker anchorage", Berth No. 1 was occupied by an apparently fully loaded tanker.

It was a further 43 hours before this vessel sailed. If the nominated cargo is not ready, there might be long delays awaiting its arrival. The densities used for the Bills of Lading quantities are determined by taking a composite sample from the ship's tanks at the end of loading. The calculations are based upon Table 54B, but calibrated to a temperature of 20°C instead of the normal 15°C.

Communications between ship and shore were poor. The standard of English of the terminal personnel was also poor. There was no pre-agreed Safety Procedures or Safety Checks.

There was a lack of professionalism about all operations, with the exception of the "Saybolt" Surveyors.

Shore leave was obtained by taking Seaman's Book to the end of the jetty and exchanging it for a shore pass. A terminal bus arrives every half hour and connects with the main gate. From the main gate, take a No. 5 bus to the city centre.

The agency could be contacted on VHF Channel 16, working Channel 74. Once contacted, they proved to be helpful. However, prior to arrival, there was no communication to the ship about berthing prospects or any other matters.

Clearance for leaving was done alongside the berth, and was as meticulous as the Clearance Inward.

The Pilot left the vessel just off the berth, after anchor aweighing.

AUTHORITY: The Port Authority of Nakhodka, 22 Port Street, 692900 Nakhodka, Primorsky Krai, Russia. *Tel:* 5-77-02, 5-79-38, 5-78-15. *Cables:* Mortorgport Nakhodka Primorskogo.

AGENT: The Far Eastern Main Maritime Agency – "Inflot". Postal address: ul Leninskaia 2, Primorski Kray, Nakhodka, 692900 Russia. Telephone: 56155, 56233, 59773. Telex: 213826. Telegraphic address: Inflot Nakhodka. Fax: (266) 5-99-50.

NARYAN-MAR: 67.38 N. 53.00 E.

GENERAL: A commercial port, Naryan-Mar is situated in the S.E. part of the Barents Sea, at a distance of 70 miles from the Pechora River mouth on the right bank of the Gorodetsky Shar Creek.

The port is open for navigation for a period of 120 – 130 days in the year.

In the Pechora River Inlet first ice usually begins to form between 20th and 25th October, but sometimes appears at the beginning of the month.

The inlet becomes completely frozen over at the middle of December. Ice finally disappears at the end of June or sometimes beginning of July. Changes in the water level in the Pechora Inlet, due to melting of ice in Spring, have not been observed.

The formation of ice in the rivers flowing into the Pechora Inlet usually depends upon the time of the appearance of ice in the Inlet itself. Rivers, as a rule, become frozen over by the middle of October. The ice in the rivers usually breaks up earlier than it finally disappears in the Pechora Inlet.

The Pechora River at the Kuya settlement area becomes frozen over at the end of October, and the ice finally disappears by the end of May.

DOCUMENTS: Refer to beginning of the Russian section.

PILOTAGE: Compulsory. Besides information stipulated in Soviet Wood Charter Party, vessels approaching Pilot Buoy may contact Port Authorities or Pilot in first 15 minutes of any odd hour from 0700 till 2300 hrs. (Moscow time), frequency 2182 kHz. Signals for Pilot to be given in accordance with International Code. Pilot boat wooden, standard type, white painted, with word "Pilot" in black letters on wheel-house. Pilot usually boards vessel at the Pilot Anchorage light buoy (Lat. 68° 30' N., Long. 54° 32' E.). In case of bad weather, and in extraordinary circumstances Pilot shall embark vessel in the Srednevskie Islands area. In this event a vessel approaching the port from seaward should follow pilot boat in the wake of it, up to the Srednevskie Islands leading line where Pilot will be able to board ship.

Master of a vessel proceeding to the Port of Naryan-Mar should order a Pilot through the Harbour Master 24 hours prior to arrival at the Pilot Anchorage light buoy and advise more precise ETA not later than 4 hours before approaching it.

Master should order Pilot not later than 2 hours prior to shifting berth and/or leaving the port.

ANCHORAGE: A recommended anchorage for foreign vessels is situated in the area with the central point Lat. 68° 30' N., Long. 54° 33' E. The depths in the anchorage are from 5.4 m. – 6.6 m. Also Inner Roads where anchorage will be indicated by Pilot.

An anchorage can be obtained at the right bank of the Pechora River off Urpinsky leading line No. 24. Depths are from 4 m. – 17 m. The bottom is sand and mud.

Good anchorages with depths from 5 m – 10 m. can also be obtained opposite Zakhrebetny Bay and N.E. of the town of Naryan-Mar.

All vessels arriving from abroad or leaving the port for abroad, must anchor opposite Zakhrebetny Bay for port formalities.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night.

The permitted draft for entry to the port is about 4.5 m. but it is usually advised by the Port Authorities at the beginning of navigation. The maximum permitted length of a vessel is 125 m.

The entrance to the port is by the fairway leading from the Pilot Anchorage light buoy across the Pechora River Bar.

The bar itself is the extensive shoal water area extending Northward of the Bolvansky Nos. Point. Three channels are dredged across the bar: The Receiving Channel, the Bar Channel and the Povorotny Channel. The last one serves as turning-point from the Receiving Channel into the Bar Channel. Vessels drawing not more than 4.9 m. can pass across the bar only at high water level.

It is prohibited to enter or leave the port through the Bar Channel and/or Receiving Channel as well as to navigate in the port area during dense fog, heavy rain and snow falls, strong winds of over Force 6 and absence of floating marks.

With the appearance of ice in the Pechora Inlet and in the Pechora River, entry to the port is not allowed without Harbour Master's permission.

The speed of a vessel navigating from the Pilot Anchorage Light Buoy through the Receiving Bar Turning, Alekseevsky, Polovsky, Kuisky, Urpinsky and other Channels shall not exceed 6 knots, with the exception at the part of the Pechora river between the Zakhrebetny and Srednevsky Channels where it is allowed to navigate with speed not exceeding 12 knots.

When passing floating cranes nearby, lighters and vessels lying alongside the port quays, every ship should proceed at dead slow speed.

MAX. SIZE: Draft declared by Port Authorities after being checked in the beginning of the season, and is about 15 ft.

HEALTH: Vessels inspected by Sanitary Officer. If no diseases, vessel obtains Free Pratique. Pratique automatic when vessel arrives from another Russian port.

RADIO: Naryan-Mar Radio.

Call Sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time of work*	*Remarks*
UOY	500	500	A1	HX	
Naryan-Mar Radio 1	156.8*	156.8*	F3E	H24	Operates during period of navigation only
Port Controller	156.7*	158.0*	F3E	H24	

*Frequencies are given in MHz.

Storm warnings for vessels' traffic in the Pechora Inlet area for the coming 24 hours are transmitted via both the Central Port Radio and VHF radio.

Notice of Arrival: Should be given in accordance with the "Soviet Wood" Charter Party conditions.

BERTHING: The Port of Naryan-Mar specialises in timber exports. Depths at the berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds.

The necessary number of tugs for entering or leaving the port as well as for shifting berth shall be agreed upon between Pilot and Master.

A mooring berth is usually indicated by a Pilot. Shifting berths without having obtained Harbour Master's permission is not allowed. Ship's tow lines are usually used during towage.

Diesel mobile cranes of up to 6 tons capacity are operated on the quays. There are also track-laying cranes of up to 12 tons and floating cranes with lifting capacity from 35 tons – 40 tons.

STEVEDORES: As per "Soviet Wood" Charter Party.

MEDICAL: No advance notice required. Clinic and hospital available.

DENSITY: Fresh water irrespective of tide.

FRESH WATER: Available from shore.
FUEL: Not guaranteed.
CONSULS: No Consuls.
REPAIRS: Small repairs only.
DRY DOCKS: None.
SURVEYORS: State Register of Shipping.
GANGWAY/DECK WATCHMEN: To be provided by vessel.
OPENING/CLOSING HATCHES: According to "Soviet Wood" Charter Party.
CERTIFICATES:

Seaworthiness.
Measurement.
Load Line.
Cargo Equipment.
Safety Equipment.
Radio Telegraphy.
Radio Telephony.
Oil Pollution Prevention.
Sewage Pollution Prevention.
Derat Certificates.

CUSTOMS ALLOWANCES: Tobacco/Wine – No quantity limits.
REPATRIATION: Repatriation and crew changes require visa formalities.
AIRPORT: Airport served by regular lines and situated near town.
TIME: GMT plus 3 hours. No seasonal alterations.
TIDE: Changes in the water level in the port area depend upon tides and effects of the wind.

The tide is semi-diurnal with 2 HW and 2 LW a day. The range of the tide varies from 0.9 m. – 1.8 m. Changes in water level are caused by the effects of the wind and may reach 1 m. – 1.5 m.

HOLIDAYS: See "Archangel".
POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.
EMERGENCY CO-ORDINATION CENTRE: Not available.
TELEPHONES: Can be arranged on board.
BANKS: None.
STORING: See "Prelims".

1. By truck when alongside.
2. Vessels stored by truck only.
3. Yes.
4. No.
5. See "Archangel".
6. Normally carried out by ship's crew.

SHORE LEAVE: Each crew member properly signed in ship's Articles and having valid Seaman's Book is allowed ashore.
IDENTIFICATION CARDS: Only Seamen's Books.
DELAYS: Caused by rains, when vessel loading cargo of sawn goods.
AUTHORITY: The Chief of The Port of Naryan-Mar, Ul. Naberezhnaya 11, 164700 Naryan-Mar, Russia. *Tel:* 26-95. *Telex:* 24211. *Cables:* Morport Naryan-Mar.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Naryan-Mar. Pechora Timber Mill 164700, Khatanzeisky, the Port of Naryan-Mar, Archangel Region, Russia. Cable: "Inflot Naryan-Mar". Tel: "Inflot" via the timber mill switchboard 30-70, 31-05.

NEVELSK: 46.40 N. 141.51 E. (See Plan)

GENERAL: The sea fishery port of Nevelsk is situated in the Tatarsky Strait, in the Southern part of the Nevelsky Bay. The port is open for navigation all the year round.

Changes of the water level are mainly caused by in and off-going tidal floods.

The port consists of two parts. The Outer part includes a part of the Nevelsky Bay water area with the imaginary boundaries drawn by an arc of 1.5 mile radius from the light mark installed on the Southern point of the Western breakwater. The Inner port consists of the harbour of the fishing port, the Small and the Northern Scoops. The boundary of the Inner is the line connecting the points of the Southern and the Western breakwaters.

The Master of a vessel when entering the port should keep on the leading line of the green leading light marks located at a distance of 5.5 cables to the North of the Southern point of the Naga Reef. The true direction of the Leading line is 259° – 079°.

The Port of Nevelsk, bearing in mind its position, size, weather and hydrological conditions, is not and cannot serve as a sheltered port as it is only partially protected from the effects of the sea swell and winds blowing from South, West and N.W. directions and is not protected from S.W. winds at all. Therefore deep sea-going vessels cannot be allowed to enter the port during storm warnings. It is dangerous to stay in the port when heavy S.W. winds are expected.

PILOTAGE: Effected round the clock. The Master of a vessel should order a Pilot via the Harbour Master's office.
ANCHORAGE: Situated in the Outer port to the South of the leading line and to seaward of the 20 m. contour. The anchorage is not protected from West and North winds and waves. The bottom is sand. The anchorage in the inner area is dangerous as the ground there (stone plate) does not hold anchors well.
RADIO: Communications can be effected through the port radio station "Nevelsk Radio-1".

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans- mission*	*Time of work*
UFM-2	500	500	A1A	H24
"Nevelsk-31"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.

RESTRICTIONS: The permitted draft is determined by the Harbour Master. Vessels having draft over 5.8 m. are allowed to enter the port after having obtained the Harbour Master's permission.
TUGS: Tugs ordered by the Master for mooring and unmooring meet vessels within the boundaries of the Inner port.
BERTHING: All vessels entering the port are moored to the berths according to instructions of a port controller.

The berths of the port with depths alongside of up to 6.5 m. are equipped to handle general, bulk liquid and other cargoes.

There are closed warehouses, open concrete floor sheds and a cold store in the port.

It is recommended to use manila mooring ropes due to insufficient protection of the port from effects of winds, waves and strong variable current with surge (the so called "tyagun".).

Opening and closing of hatches is usually done by the crew. All deep draft vessels are loaded/unloaded in the roads.

The berths of the port are equipped with 5 ton portal cranes. There are other cargo handling facilities and intraport transport.

FRESH WATER: Available in limited quantities.
FUEL: Diesel oil available.
CONSULS: None.
REPAIRS: Possible for vessels up to 4.0 m. draft.
TIME: GMT plus 11 hours. Summertime (April 1st – October 1st), GMT plus 12 hours.
AUTHORITY: The Port of Nevelsk Authority, 32 Rybatskaya Street, 694740 Nevelsk, Sakhalin Island, Russia. *Tel:* 20-06 (Port Director). *Telex:* Via "Inflot", Kholmsk. *Cables:* Morport Nevelsk. *Contact:* Port Director.

AGENT: Sakhalin Main Maritime Agency, Inflot, at Kholmsk, Sakhalin Island, Russia.

NOVOROSSIYSK (Including Sheskharis Oil Harbour): 44.43 N. 37.47 E. (See Plan)

GENERAL: In Winter, strong, gusty N.E. winds (called "Bora"), reaching hurricane force at times, blow from the coastal mountains. Due to these winds, vessels lying at anchor in Novorossiysk Bay may very quickly become covered with ice when the temperature of the air is cooled below freezing-point.

It is impossible to enter the port when "Bora" blows, therefore, all vessels are recommended to leave Novorossiysk Bay for the open sea beforehand or lay at anchor in the Yuzhnaya Ozereika Roads, at a distance of 8.5 miles Westward of the entrance to the port of Novorossiysk or in Anchorage Area No. 416, to the South of the Doob Point, until the weather improves.

The range of water level in Novorossiysk Bay caused by the effect of the winds, does not exceed 0.6 m. The changes of water level, due to variation in atmospheric pressure ("Seish" effects), are observed at times. The "Seish" may last up to several days. The maximum range of water level, due to the "Seish", observed in Novorossiysk Bay is 0.6 m.

The port consists of 2 harbours – the Dry Cargo Harbour and Sheskharis Oil Harbour.

The inner roads are situated at the head of Novorossiysk Bay are divided from the outer roads by the Western and Eastern Moles. The outer roads are situated between the moles and the Southern border of the port.

The Dry Cargo Harbour situated inside the inner roads is protected by 2 (Western and Eastern) moles.

Two passages, the Western and Eastern, divided by Penaisky Shoals, lead to the inner roads through the port area. The Western passage is wider in comparison with the Eastern, and vessels may enter outer roads passing through it by one course.

DOCUMENTS: Refer to beginning of the Russian section.
Shipmaster's Report: (1975) Notwithstanding the instructions for documentation for all Russian ports referred to at the beginning of the section, the Novorossiysk Port Authorities require the following:

General Declaration (IMO FAL Form 1)	4 copies
Cargo Declaration (IMO FAL Form 2)	4 copies
Ship's Stores Declaration (IMO FAL Form 3)	3 copies
Crew Effects Declaration (IMO FAL Form 4)	2 copies
Crew List (IMO FAL Form 5)	8 copies
Passenger List (IMO FAL Form 6)	8 copies
Money List	2 copies

PILOTAGE: Compulsory: 96 hours prior arrival cable Agent giving ETA, name of vessel, gross tonnage, exact draft, type of engine. Flag, sound and Morse signal G. Pilot meets vessel at Lat. 44° 37′ N., Long. 37° 52′ E. Movement of vessel within inner harbour – only under Pilot guidance. If Pilot is not available vessel should anchor in Area No. 415, opposite the Kabardinka settlement, recommended as an anchorage (No. 416), and wait until Pilot arrives.

Procedure: Send request for Pilot to Port Dispatcher 2 hours before arrival. Establish contact with Control Post (SUDS) on VHF Channel 9, 30 minutes before entering Regulated Movement area. Message should include:

(a) Type and name of vessel.
(b) Time of approach to zone (Regulated Movement area).
(c) Nationality and name of owners.
(d) N.r.t. and g.r.t.
(e) Length and max. draft.
(f) Type and quantity of cargo.

A continuous listening watch should be maintained on Channel 9 whilst within the area (vessels at anchor on Channel 16).

ANCHORAGES: Anchorage in the outer roads of the port is allowed almost everywhere but most convenient places for the purpose are to be considered the following 3 areas. The first one is Area No. 415 situated to the North of the Doob Point.

Depths there vary from 12 m. to 27 m., the holding ground is mud. In the event of winds blowing from seaward Masters of all vessels are recommended to leave this area for the open sea. Area No. 414 is the second anchorage place, situated 8 cable lengths Westward of the Penai Point. Depths there are from 13 m. to 27 m., the holding ground is mud and mud with shell. The third place is Area No. 412 situated 6 cable lengths South-Eastward of the port entrance. Depths there are from 20 m. to 24 m.

Vessels approaching the port of Novorossiysk with N.E. gales ("Bora") blowing, or caught by the storm whilst lying in the outer or inner roads, or after having received storm warning, should use every opportunity to proceed to sea or lay at anchor in the Yuzhnaya Ozereika Roads (Anchorage Points No. 408 and 410), having the main engines ready and keeping constant anchor watch.

Under the circumstances, every vessel should keep regular radio contact with port radio station.

Masters of vessels lying at anchor in the outer roads and/or in the port, are usually warned beforehand about the forthcoming N.E. winds. Since these winds may reach hurricane force during a very short period of time, particularly in Winter, all Masters lying at anchor in Novorossiysk Bay are recommended to pay careful attention at every change of the weather, to watch position of vessel to be able to prevent her drifting about anchor and proceed to sea in due time.

RESTRICTIONS: No restrictions on night entry into the Inner Roads. Mooring and/or unmooring, both in the Dry Cargo Harbour and the Sheskharis Oil Harbour cannot be effected during Southerly or N.E. winds over Force 7.

MAX. SIZE: The permitted length for entry into port is 250 m., draft 11 m. for dry cargo vessels.

Tankers: 250,000 d.w.t., 19 m. max. draft.

HEALTH: Free Pratique automatic for vessels coming direct from Russian port. From other countries, usual procedure of sanitary inspection applies.

RADIO: Vessels can establish radio contact through port radio station Novorossiysk Radio operating 24 hours a day.

Tugs and Berthing		6

All vessels passing through the traffic controlled zone and/or anchored there have to keep constant VHF radio watch on Channel 16.

The port signal station is equipped with radar which gives all possible information for ensuring safe pilotage, and also helps Pilots in shifting vessels within the port inner roads.

TUGS: A sufficient number of tugs of between 600 h.p. and 5,000 h.p. are available in the port.

While manoeuvring ships to the Sheskharis Berths two more tugs of 150 i.h.p. are engaged regardless of the ship's size in view of the constructive features of the berths.

BERTHING: When proceeding in inner harbour, vessels must keep both anchors ready to let go; ships to be moored by safe ropes which to be kept tight at all times. Also be ready to use anchor chain over bollard according to Pilot's recommendation. Strictly prohibited to work with propellers lying alongside berth. All mooring ropes must be fitted with rat-guard plates.

The quays of the Dry Cargo Harbour with depths alongside of up to 11.5 m. are equipped to handle general, 20 ft. and 40 ft. containers and bulk cargoes (coal, ore), metals, timber, sugar, grain, cement, fruit and vegetables.

Berths of the port are equipped with modern cargo handling facilities. There are portal cranes of up to 40 tons capacity, floating cranes with lifting capacity of up to 100 tons, automatic and electric cargo lifters and other equipment.

Opening and closing of hatches is usually done by ship's crew with the help of portal cranes at dry cargo berths, if ordered by Master, grain berth excluded.

Ores are loaded in compliance with the Temporary Regulations for Carrying Ores handed over to the Shipmaster by Agents during inwards clearance.

Following are the basic requirements of above Regulations to the ores being loaded *(a)* moisture contents not higher than 12% (if other percentage is not stipulated by Charter Party); *(b)* angle of repose is not less than 35°.

Grain and other bulk cargoes are to be loaded in strict conformity with the International Convention.

STEVEDORES: All necessary services including stevedoring work available under Port Authority guidance. Port cargo-handling regions where ships berth managed by Port Authority and used for stevedoring, tallymen service, storage, etc. On the matters connected with services available, foreign vessels have to apply to Port Authority through Agent.

MEDICAL: In case of accident (emergency), medical attendance rendered at any time. Hospital facilities available. Also inoculation, vaccination, etc.

TANKERS: Bearing in mind N.E. gales, oil carriers lying alongside oil pier must have boat-ropes lowered to water and illuminate them at night. All scupper holes on main deck must be closed tightly. Master responsible for overflow of oil in the vicinity of harbour and has to bear harbour cleaning costs. No repair work can be done on tankers lying alongside oil pier. No ballast water may be pumped out, no garbage or refuse thrown overboard. Ballast to be pumped into shore slop tank.

The Sheskharis Oil Harbour is situated in the Eastern part of the outer roads, 2.2 miles N.W. of the Penai Point. It is protected by a mole from the South and oil jetty from the North. The base of the jetty is used as a berth for fire-fighting boats.

Since it is not safe to stay alongside berths in the Sheskharis Oil Harbour during strong winds blowing from any direction, all tankers, after having received a storm warning should take urgent measures to leave for sea.

Depths at the berths of the Sheskharis Oil Harbour are from 4.5 m. up to 19.0 m.

To ensure safe loading/unloading of oil products as well as to expedite the vessel's turn around time, every tanker should be equipped with cargo manifolds capable of fitting 8 in. – 16 in. shore-loading connections.

These manifolds should allow the upward connection with shore cargo flanges of not less than 1 m. in height and located on deck at 3 m. – 5 m. length from side of vessel.

Deepwater Berth No. 1: Accepts vessels of 80,000 to 250,000 d.w.t. Arrival and departure draft not to exceed 19.0 m.

A tanker is to have a site 3.0 m.×3.0 m. on cargo deck free of pipe-lines/deck openings and other constructional elements to secure end platform of shore gangway. The centre of site to be 5.5 m. from starboard side and 12.0 m. – 13.0 m. from cargo manifold in forward direction.

To ensure normal contact with shore fenders vessel's fully loaded freeboard should not be less than 6.3 m. Cargo manifold flanges should have thickness 30 mm. – 32 mm.

Report: 1994.

Terminals:

Name: Sheskharis Oil Terminal. Tel: 62104, 93685.
Sheskharis Oil Base. Tel: 93330, 93333.
Black Sea Oil Pipelne Co. Tel: 52513, 93420, 93422.
Fax: 51401.

Shore tanks: "Grushovaya" Oil Base (Storage): Crude Oil:
37 underground ferro concrete shore tanks, each approximately 10,000 cu.m.
9 steel shore tanks with floating roofs, each approximately 50,000 cu.m.
Fuel Oil: 10 underground ferro concrete shore tanks, each approximately 10,000 cu.m.
"Sheskharis" Oil Base (Loading Terminal): Crude Oil: 5 ferro concrete shore tanks, each approximately 10,000 cu.m.
Fuel Oil: 2 ferro concrete shore tanks, each approximately 10,000 cu.m. and 2 shore tanks of approximately 2,000 cu.m.

Loading Rates: Berth No. 1: Crude oil 10,100 t.p.h.
All other Berths: 3,500 t.p.h.
Fuel Oil: 700 t.p.h. (All Berths).
All loading arms are 12 in. or 16 in.

Shore lines from Tanks to Jetty:

Product	Berth No.	Length (m.)	Diameter (mm.)
Crude Oil	1	1,966	1,000
	1	1,230	1,200
	2/3	910	800
	2/3	910	800
	5/6/7/8	1,222	1,000
	5/6/7/8	1,200	800
Fuel Oil	2/3	910	500
	2/3	910	500
	5/6/7/8	1,222	500
	5/6/7/8	1,222	500
Gas Oil	2/3	910	300
	5/6/7/8	1,210	300

Max. Size:

Berth No.	Max. Draft (m.)	D.W.T. (tons)
1	forw'd 19.5 / aft 19.5	250,000
2	forw'd 13.7 / aft 15.8	60,000
3	forw'd 10.7 / aft 11.3	30,000

6	forw'd 12.8 / aft 12.8	60,000
7	forw'd 12.8 / aft 12.8	60,000
8	forw'd 8.7 / aft 10.6	12,000

Berth Length:

Berth No.	Length (m.)
1	500
2	220
3	150
4	Bunkering
5	120
6	220
7	220
8	120

Facilities: Slops may be discharged at a rate of 3,000 tonnes/hr. at all berths.
Bunkers and fresh water are available at all berths.

DENSITY: About 1010 – 1014.

FRESH WATER: Available from shore; minimum quantity invoiced at 15 tons. Fresh water also available from lighters.

FUEL: Most grades available. Fuel for tankers can be supplied ex-shore. Bunkers for dry cargo vessels are usually delivered by lighters.

FIRE PRECAUTIONS: All operations involving open fire and sparks are prohibited on oil pier. Two fire extinguishers, thick felt and sand must be ready beside hose connection.

CONSULS: No Consulates in port or its vicinities.

REPAIRS: All kinds of repairs for vessels of up to 60,000 d.w.t.

Cargo Superintendent's Report: 1975.

The Novorossiysk Shiprepair Yard is capable of carrying out any ship repairs, and is equipped with 3 floating docks. I was unable to obtain information on the size of these docks, but estimate they are capable of handling vessels in the 100,000 ton range.

SURVEYORS: Saybolt.

GANGWAY/DECK WATCHMEN: Gangway watch compulsory and carried out by crew.

OPENING/CLOSING HATCHES: Normally by crew, otherwise according Charter Party.

CUSTOMS ALLOWANCES: No quantity limits but nothing allowed to be taken ashore.

REPATRIATION: No facilities exist for effecting crew changes. A crew member may be repatriated due to family reasons or sickness but repatriation requires visa formalities.

AIRPORT: Nearest airport is at Anapa, which is 50 km. from the port. Daylight flights only.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: New Year's Day, 8th March (World's Women's Day); May 1st, 2nd (Labour Day); May 9th (Victory Day); January 7th (Christmas). Cargo work can be arranged on those days.

POLICE/AMBULANCE/FIRE: Police, Tel: 02; Ambulance, Tel: 03; Fire, Tel: 01.

TELEPHONES: Can be arranged to be fitted on board.

SHORE LEAVE: Crew members are allowed ashore. Crew members of foreign vessels get shore passes which grant them permission to stay ashore till 2400 hrs. Crew members who lose their shore passes as well as those late from ashore, are not granted shore leave any longer in conformity with local regulations.

IDENTIFICATION CARDS: Crew members get shore passes.

SHIP SUPPLY SERVICE: Local consignment centre may supply marine oils and lubricants, manufactured by Mobil Oil, Castrol, Elf-Aquitaine and Esso.

Marine paints and coatings of Hempel, Sigma, Interpaints, as well as chemicals and treatments manufactured by Perolin, Unitor, Rochem.

Spares are available for Sulzer, B&W, MAN main auxiliary diesel engines, for Magnavox, Mx-1102 satellite navigator.

Address: Consignment Centre, 8 Portovaja Street, Novorossiysk 353901, Russia. Tel: 6-28-97. Telex: 27243, 412629.

The Russian-American joint venture Soyuz Marine Service began servicing of the Russian and foreign ships in Novorossiysk in 1990.

The following kinds of underwater technical works are possible:

Cleaning of ship's hull, photography, using TV-cameras, inspection for Register's control, repairing of outboard fittings, electro/oxygen cutting and welding, polishing of propellers, fitting of the cathode protection and other kinds of underwater works.

Payment for foreign vessels to be made in U.S. dollars.

Vessels are requested to make their requirement known by radio not later than 15 days before arrival to "Novorossiysk Inflot SMS" (for foreign vessels) and "Novorossiysk Transflot SMS" (for Russian vessels).

Office: Soyuz Marine Service, 93 Lenin Avenue, Novorossiysk 353918. Tel: 3-42-10. Contact: Captain Yury Yashny.

SHIPMASTER'S REPORT: December 1991.

Anchorage: On arrival, vessel had to anchor off the port as the cargo was not ready. The anchorage for tankers (No. 416) was well sheltered from the North and N.E. sides with high mountains. The anchorage area was rather small and too close to the shore (a maximum of 2 ships could stay keeping a safe distance from each other). Caution is to be exercised approaching the anchorage as the centre is just about one mile away from the nearest land.

Formalities: Port officials, including Customs, Immigration, Port Health and Agriculture officials along with the agent boarded the vessel upon berthing. Immigration authorities assembled everyone so that they could see them 'in person'. Otherwise proceedings were quite quick.

Berthing: The berth (See "Plan") is meant for large tankers as stated in the agent's telex. Vessel approaches starboard side to the jetty with 4 tugs assisting (2 tugs forward and 2 tugs aft). First lines to go ashore were backsprings. Vessel's backspring winches, forward and aft, could not be utilised for sending the lines as the 'lead' would have been too short (a longer vessel would have no difficulty). Mooring was slow as only one mooring boat available for both forward and aft. Mooring lines consisted of 4 headlines, 2 breast ropes and 2 backsprings forward and 4 sternlines, 2 breast ropes and 2 springs aft. This was sufficient moorings to withstand a wind, usually from the North and N.W. of up to 40 knots. The harbour is well sheltered with high mountains (2,500 ft.) on the North and N.E. sides.

The gangway was a hydraulic one provided by the jetty and placed forward of the manifold in a clear space.

There is another tanker berth for smaller vessels on the other side of the jetty with max. draft 12.5 m.

Cargo: Vessel presented 16 in. connection by way of 3 'Y' pieces connected to 6 manifolds on the vessel.

Although the vessel's presentation flanges were 38 mm. thick and requirement was 30 mm. – 32 mm., the Chicksan could still be hydraulically locked on to the vessel's flanges without any difficulty. Otherwise vessel met all requirements for the connection, i.e.:

(1) Distance from vessel's presentation flange to the railings to be between 4.5 m. and 5.0 m.

(2) Vertical distance from flanges to the top of the manifold tray to be between 0.6 m. and 1.2 m.

(3) Flanges to be in one line.

(4) Distance between the flanges to be between 2.0 m. and 3.0 m.

Loading rate required by the terminal is minimum 7,200 cu.m./hr. and maximum 10,000 cu.m./hr. Vessel maintained a rate of 7,000 cu.m./hr.

Ballast: Ballast cannot be discharged into the waters of the harbour and has to be discharged ashore. As the vessel had segregated ballast tanks it could discharge into the harbour freely, but the Port Authorities are very serious and concerned about clean ballast and the quantity of it.

Dry Tank survey carried out prior to loading, but the surveyor did not seem to be concerned about the fitness of the tanks.

Generally, the cargo operation was smooth and authorities co-operative. Language and communications are a problem if no interpreter present.

After completion of cargo loading, it took nearly 6 hours for the pilot to board. Prior to departure the Customs and Immigration boarded the vessel to give clearance.

After leaving berth the vessel turned through 180° in the basin with the assistance of tugs. This is difficult for a fully laden vessel, especially if the wind is strong.

General: Russian Rouble is quite low compared to U.S. Dollar. There were 48 Roubles to U.S.$1.00.

The main city is about 17 km. from the port and it does not provide much for seamen, except for the Seaman's Club.

SHIPMASTER'S REPORT: August 1993.

Approaches/Anchorages: Port Control should be contacted on VHF Channel 9. They will then advise the vessel the area to anchor in. No Pilot is required for vessel's anchoring in Area 416, which is outside the designated Port Limit, and sometimes for Area 415. However, for other anchorage areas within the Port Limit, pilotage is compulsory.

Formalities: For clearing grain ships, vessel is boarded by Quarantine Inspectors, Cargo Inspectors from the Agriculture Department, Customs and Immigration Officials.

Formalities take about 2 hours. Samples of cargo are taken for analysis.

The following documents are required:

7 copies Crew List.
4 copies Personal Effect Declaration.
4 copies Stores List.
4 copies Currency Declaration (Crew and Ship's cash).
2 copies List of Ports of Call.
2 copies Stowage Plan, Hatchwise Cargo.

On departure, the Customs Officials, who board the vessel for clearing purposes, are quite particular in checking the Currency Declaration against receipts of foreign currency exchanged by individual crew, and the balance remaining.

Restrictions: No restriction on night entry. Permissible drafts are as follows:

Berth No. 5: 12.50 m.
Berth No. 10: 11.50 m.
Berth No. 16: Forward 11.50 m., aft 11.80 m.
Berth No. 18: 11.50 m. (Evacuator discharge).
Berth No. 22: 11.80 m. (Evacuator discharge directly to Silo). Maximum length 275 m. (Vessel of this length was alongside Berth No. 5).

Pilotage: Pilots are fairly efficient and capable.

Radio/Communications: Very poor. To make an international call, 3 days prior booking is required. Radio Novorossiysk can connect to local numbers only.

Telex communication is possible. However, Agents appear rather reluctant to use this facility.

Agents operate on VHF Channel 67. Most of the time they answer after repeated attempts at calling them.

Berths: There are a number of shore cranes which are fairly modern. Crane operators are sufficiently efficient. All grain cargo is discharged directly into rail wagons, hence the discharge rate is directly related to the supply of wagons, each wagon is about 90 cu.m. capacity.

During the Summer season (July – September), the supply of wagons is less, as they are used for their own harvest season elsewhere in Russia. During our stay, supply of wagons was very poor. The average discharge rate for evacuator discharge can be about 8,000 tonnes/day, and grab discharge about 6,000 tonnes/day.

The berths are well fendered with bollards at 25 m. interval.

Agency: There are few private agencies in operation, and some others to be opened shortly. "Economou Shipping" and "Transflot" are in operation at present, and I understand that an Italian firm is bidding to open an agency soon.

Inflot Agency is the Government controlled agency and the most influential at present. Fortunately, we did not have any unusual requirements, so the need to use them beyond the normal port formalities did not arise.

Private surveying firms are also opening their offices at Novorossiysk, with foreigners manning them. The bunker survey was conducted by Inspection Services International, Head Office at Beluederegasse 2, 1040 Wein, Vienna, Austria. Tel: 505-3060. Fax: 505-3070. Telex: 113268 Isi A.

Stevedores: Directly under the Port Authority. The port is divided into 3 sections, Eastern, Central and Western, each with a Chief Foreman who is supposed to board the vessel daily. For grain vessels, it appeared the vessel had NO control over the number of gangs to employ, though the discharge sequence is controlled by the ship. The stevedores did a fairly good job of hold cleaning, leaving no sweepings behind. All holds were swept clean. Bob Cats, tyred bulldozers were used for final collection of cargo. All cargo, spilt on deck by grabs, was also swept and collected.

Outturn Report: An Outturn Report is given to the vessel daily, which states the total cargo discharged and the balance remaining onboard. It is important to sign this report as "for receipt only". We were fortunate to have this report quite well squared off eventually, but there was an occasion where the difference had accumulated to as much as 3,000 tonnes. As the final Outturn Report was not presented to the vessel prior to departure, the Agent was given a written authority to sign the same on our behalf, with this remark inserted: "Vessel is not responsible for any shortage of weight, as all cargo onboard was discharged into barges and wagons supplied by consignees, and neither the vessel's Officers nor the vessel's representative participated in reweighing of cargo ashore. All cargo discharged is in good condition and the quality and quantity as per Bills of Lading.

On completion of loading, the vessel's holds were sealed by a NCB surveyor. On arrival at this port, seals were found intact and were opened in the presence of Agent and various boarding officials, including Agriculture Department Officials. On completion of discharge, vessel's holds were empty and free of cargo".

Medical: The need to use their services did not occur. However, Cholera Vaccination could not be procured.

Density: At outer roads and at berth: 1008.

Fresh Water: Available by barge at U.S.$ 12.00/ton. There are no fresh water connections at the berths, and the supply is made through barge only. We procured 55 tonnes for cash payment of U.S.$ 100.00. Fresh water can be supplied at anchorages within Port Limits at the same price.

Repairs: There are floating dry docks. Vessels upto 100,000 d.w.t. can by dry docked. A fair amount of repairs could be carried out, subject to availability of spares, etc. All stevedore damage was attended to on completion of cargo, with each dock section having their own workshop and repair team dealing with their damage alone. However, the quality of work was rather shoddy and needed a thorough check by ship's staff.

Gangway Watchman: A border guard stands by the gangway at all times. Ship's crew have to deposit their Passport in exchange for a shore pass at the gangway. No outsiders can board the ship without proper documents/pass. Hence security onboard is fairly good.

Repatriation: This is possible. However, the Agents appear very reluctant to arrange repatriation. Two passport size photographs are required to get Exit Visa, which takes about 2 days. The nearest airport is Krasnadar, about 100 km. away, which is connected by a daily flight to Moscow. All ticketing is done through Aeroflot. The fare to Moscow is U.S.$ 100.00. However, at Moscow, one has to change from the Domestic to International Airport. At Moscow, it appears there is uncertainty of getting connections.

Ship Chandler: Only one ship chandler is available. Fresh provisions are available at reasonable price. Some meat products (chicken, pork and beef) are available.

Some dairy products, like longlife milk, cheese, etc., are imported from Italy.

It is possible to obtain bonded items, which again are imported from Italy. A cash discount is available on bonded items only.

All fresh provisions are obtained on a day to day basis. Some produce may be available on one day, and not be seen in the market for a few days.

AUTHORITY: The Port of Novorossiysk Authority, 14 Port Street, 353901 – Novorossiysk, Krasnodarsky Krai, Russia. *Tel:* 6-21-31 (Chief of the Port), 6-22-41, 6-25-16, 5-46-44 (Harbour Master). *FAX:* 62203. *Cables:* Morport Novorossiysk. *Contact:* Valeriy Bykov, Port Manager (Tel: 62131). Georgy Popov, Harbour Master (Tel: 62516).

AGENT: Economou International Shipping Agencies, 2 Mira Street, Off. 313, 353900 Novorossiysk, Russia. Tel: (7-86134) 50283. Telex: 279186 Ceco Ru. Fax: (7-86134) 54107.

ONEGA: 63.54 N. 38.06 E. (See Plan)

GENERAL: The port of Onega is situated on the right bank of the Onega River (3 – 4 miles up from the mouth), flowing into Onezhsky Bay off the White Sea.

Port open for navigation for about 6 – 7 months per year, starting from May. The port is closed for foreign flag vessels from 1st of September to 31st of December annually. In Autumn, when the river is covered with ice, assistance of ice-breaker is required but may not be rendered regularly.

Opening and closing of the port for navigation as well as turn and order of entering the port is usually regulated by the Port Authorities.

Changes of water level in the river depend on tide, spring floods and effects of the wind.

The tide is semi-diurnal with two high and two low waters a day. At the Onega river mouth the range of the tide at mean springs may reach 2.7 m.

The rises of the water level are due to North-Westerly, Northern and North-Easterly winds. The falls of the water level are usually caused by South-Easterly, Southerly and South-Westerly winds.

The Onega River becomes frozen over at the beginning of November. Ice begins to form in October and usually breaks up at the end of April or early May.

A vast area of shoal waters is situated at the mouth of the Onega River.

Access into the Onega River is by the Karelsky Fairway. Vessels drawing up to 6.1 m. may pass through it at high water.

Since depths in the river vary, Masters are recommended to get in touch with the Harbour Master to make enquiries about the existing least depth in the fairway before entering the river.

The port specialises in timber exports.

DOCUMENTS: Refer to beginning of the Russian section.

PILOTAGE: Compulsory. A Pilot should be ordered by the Master 24 hours prior to arrival at the Letny Orlov Pilot Station. A Pilot meets a vessel at a distance of 0.7 mile Westward of the Letny Orlov Point.

ANCHORAGES: Not more than 2 vessels drawing up to 4.5 m. can obtain anchorage in the Town Roadstead below the Severoles Wharf. The roadstead situated opposite Timber Mill No. 32 – 33 can be used as anchorage by vessels drawing up to 3.55 m.

During winds blowing from the N.W., vessels are recommended to anchor in the Petchak area of the Solovetskie Islands, with depths of 10 m. at 1 mile distance offshore.

During Southerly winds of Force 5-6, a safe anchorage with depths of 10 m. can be obtained in the Konyukhov Inlet, 1 mile offshore.

In case of North-Westerly storms, vessels lying on the Karelsky Roads should anchor in the Purnema area with depths from 6 m. to 10 m. where an anchorage light buoy is installed (Lat. 64° 20' N., Long. 37° 27' E.).

The recommended anchorages for vessels proceeding to the port of Onega along the fairway are situated in the following places:

1. On the line of the Town of Onega leading marks and on the beam line of the front mark of Pikhnemsky No. 2 leading line. Depths are from 3.7 m. – 4 m., the bottom – mud and small stone.
2. In the area of the Onega River, a short distance Northward of the town of Onega leading marks, opposite the Export quay. The least depth in the area is 4 m., its length – 700 m., the bottom is mud and small stone.
3. Southward of the Pristansky (Quays) leading line but not passing over the line of the Pristansky Sekushchy (Quays Crossing) leading marks to the Eastward of it. The depths are from 3 m. – 3.7 m., the holding ground – mud, small stone and stone.

RESTRICTIONS: Vessels having draft not more than 3 m. may enter port at any time, but with draft more than 3 m. only 1 hour before high water.

The speed of vessels having the maximum draft should not exceed 8 knots. The movement of vessels within the port area is not allowed during restricted visibility.

MAX. SIZE: The maximum permitted draft is usually announced at the beginning of the navigation season after sounding of the fairway has been accomplished. It varies from 4.0 m. – 5.8 m. Approach Channel – Depth 6.1 m. at H.W. Maximum permitted length is 125 m.

HEALTH: Alongside or on the Roads all vessels coming from abroad inspected by Sanitary Office representative. If no diseases, vessel obtains Free Pratique. If vessel enters directly after calling at another Russian port, Pratique automatic.

RADIO/VHF: Besides Murmansk and Archangel, Onega Radio (UZS), 500 kHz; VHF of pilot office at port of Onega (Channel 16).

Vessels can establish radio contact through the port radio station Onega Radio operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans- mission*	*Time of work*	*Remarks*
UZS	500/441	500/425	A1A	H24	
"Onega-2" (Port controller)	156.7(14)	156.8*(16)	F3E	H24	Operates during navigation
"Onega-5"	156.45*(9)	156.45*(9)	F3E	H24	Operates
(Harbour Master)	156.8*(16)	156.8*(16)	F3E	H24	during navigation

*Frequencies are given in MHz.

The Onega Storm Signals Station is located on the roof of the Harbour Master's office. Day signals warning about forthcoming storms and strong winds in the Onega Bay area are exhibited at mast of the signal station.

TUGS: The number of tugs required for mooring/unmooring and shifting berths is determined by the Master after having consulted the Pilot. Tugs should be ordered 6 hours prior to leaving the port for sea.

BERTHING: Depths at the port berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds. Loading of timber usually by ship's gear.

STEVEDORES: No particular ETA advices to stevedores/shippers. Loading of timber usually carried out by ship's winches at average rate of 275 cbm per hatch per weather working day.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available. Usually delivered by tug.

FUEL: Availability not guaranteed.

REPAIRS: Small repairs only.

GANGWAY/DECK WATCHMEN: Usually by ship's crew.

OPENING/CLOSING HATCHES: In accordance with "Soviet Wood" Charter-Party conditions.

CUSTOMS ALLOWANCES: No restriction on quantity, but nothing to be taken ashore.

REPATRIATION: Subject to visa formalities.

AIRPORT: Nearest at Archangel.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: See "Archangel".

SHORE LEAVE: Allowed up to midnight.

IDENTIFICATION CARDS: Only Seamen's Books required.

AUTHORITY: The Port of Onega Authority, Kirova Street 107, 164880 Onega, Archangel Region, Russia. *Tel:* 2-21-33 (Harbour Master); 2-24-91 (Port Controller); 2-21-51 (Chief of the Port). *Cables:* Morport Onega. *Contact:* Vladimir Malygin, Harbour Master.

AGENT: A branch of the Port of Archangel, Main Maritime Agency "Inflot" at the port of Onega. Postal address: 164880 – The Port of Onega – Archangel Region, Russia. Cables: "Inflot Onega". Tel: Timber Mill Switchboard 33-33, "Inflot".

ST.PETERSBURG: 59.53 N. 30.13 E. (See Plan)

GENERAL: A Baltic Sea port, St.Petersburg is situated on the islands of the Neva Delta, at the head of the Nevskaya Guba (Neva Bay), in the Eastern extremity of the Gulf of Finland. Year-round navigation is possible with ice-breaker assistance from the end of November until middle of April. Ice first begins to form in the middle of November, when usual Winter frosts come, and in January (time varies with the season) all the area becomes completely covered with fast ice.

DOCUMENTS: Refer to beginning of Russian section.

APPROACHES: The Kronstadt Korabelny Farvater (Kronstadt Ship's Channel) which is about 12 miles in length, extends from the port of St.Petersburg Entrance light buoy to the St.Petersburg Morskoi Canal, which is about 15 miles in length, and leads to the entrance of the sea commercial port of St.Petersburg. The least bottom width of about 80 m. is in the part of the Canal which is protected by 2 dams (moles).

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: Pilots usually board and disembark vessels at the port of St.Petersburg approaching light buoy (Lat. 60° 02' N., Long. 29° 26' E.). In case of bad weather a vessel should follow the pilot boat up to the Kronstadt Roads where a Pilot will come aboard the ship.

St.Petersburg pilot boat on VHF Channel 16 and 9 throughout 24 hours. Call sign "St.Petersburg Pilot".

There is a Port Coastal Radar Vessels' Movement Control System ensuring vessels' radar pilotage along the Kronstadt Korabelny Fairway and the St.Petersburg Morskoi Canal in case of low visibility and during absence of floating navigational marks. Radar pilotage is carried out by a Pilot on board a vessel.

St.Petersburg Deep-Sea Pilot Services: Licensed Pilots are always available 24 hours a day, 365 days a year, for safe navigation in Baltic waters.

All Pilots are highly qualified, reliable and experienced Ice-Pilots. To obtain a Pilot send a telegram or telex to Agent.

ANCHORAGES: Vessels approaching the port from seaward should take anchorage off the port of St.Petersburg Entrance Light Buoy. The depths in the Roads are between 20 m. – 25 m. and the holding ground is mud and sand.

Vessels anchored at Outer Roads and berthed in the port are requested not to operate VHF on Channels 6, 8, 9, 11, 12, 13, 14 or 26 for intership communications.

RESTRICTIONS: No restrictions on night entry, no tide in St.Petersburg. Vessels with drafts 8.5 m. and more, and length 170 m. and more, must be towed when proceeding in the St.Petersburg Morskoi Channel from the Lesnoi Mole Roads (Timber Mole Roads) up to the Neva Gates.

All vessels navigating within the port must keep strictly to the following regulations:

(a) Vessel's speed should not exceed 10 knots when navigating in the Kronstadt Korabelny Farvater and in the open part of the St.Petersburg Morskoi Canal (from the entrance up to the moles).

(b) When navigating in the channel between the moles of the St.Petersburg Morskoi Canal as well as in the Bolshaya Neva River from the Neva Gates up to Lieutenant Schmidt Bridge and also in the Ekateringofka River, vessels speed should not exceed 3 knots.

(c) In the Inner Roads and in the port harbours, Masters should navigate with a speed ensuring the safety of vessel but never exceeding 3 knots.

MAX. SIZE: Draft restriction 11.0 m. in fresh water under normal weather conditions. Length not over 260 m. Breadth up to 40 m.

HEALTH: Master coming from foreign port shall report every sick passenger or crewman; Health Authorities board together with Customs and Immigration and if find all in order grant Free Pratique. Each vessel shall produce Derat Certificate and Sanitary Patent.

RADIO: Cable Agent ETA, draft and other data, information required via St.Petersburg Radio Station (call sign URD). All vessels when approaching the port of St.Petersburg should establish radio contact via the St.Petersburg Coastal Radio Station operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)*		*Type of transmission*	*Time of work*
	Working	*Calling*		
"Sanct Petersburg-Radio"	2182	2182	J3E	H24
"Sanct Petersburg-Radio"	156.8*(16)	156.8*(16)	F3E	H24
(CPR)**	161.9*(26)	157.3*(26)	F3E	H24
"Sanct Petersburg-Radio"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Note: Emergency calls with regard to collisions, fire on board and dangers to human life may be given on VHF Channel 9. Call sign of Traffic Controller is "St.Petersburg Port Control".

Port radar station gives all possible information to any vessel navigating in the Kronstadt Korabelny Farvater and St.Petersburg Morskoi Canal during restricted visibility, from the St.Petersburg Entrance Light Buoy (Lat. 60° 02' N., Long. 29° 26' E.) up to the dams (moles) of the St.Petersburg Morskoi Canal. Navigation is usually controlled by a Pilot on board the vessel.

Signals for vessels approaching the entrance to the Commercial Port of St.Petersburg from seaward are hoisted at the pilot vessel.

Traffic prohibition signals, when the pilot vessel is absent from her usual position may be exhibited at a vessel specially designated for this purpose.

RADAR: Pilot in contact with radar service. Also see "Radio".

TUGS: Tugs up to 5,000 h.p. are available. Normally join incoming vessels at Inner Road. Ship's lines usually used.

The number of tugs a Master should order for inward and outward towage as well as for shifting berths in the harbour depends on Pilot's advice.

BERTHING: There are more than 50 berths, used for loading, discharging and waiting in the port. Total length of quays is more than 8.0 km., project depths alongside the working berths are from 8.1 m. up to 11.0 m.

Almost all berths have railway alongside the quay.

There are 4 cargo regions and 1 handling complex in the port, which can handle bulk, general, unitised, refrigerated and forest product cargoes.

The leading import commodities are: Cereal and raw sugar in bulk, containers, coffee in bags, steel, machinery, equipment, refrigerated fruits and meat.

The main export cargoes are: Steel, non-ferrous metal, containers, round timber, coal and fertilisers.

Note: Cereals, raw sugar, ore, fertilisers in bulk and also refrigerated cargoes are transferred direct from ship to rail wagons. There is no storage for these cargoes in the port.

Marine passenger terminal, situated on Vasiliyevsky Island, belongs to the Baltic Shipping Company. Sometimes passenger vessels can moor at the port berth.

Storage: Warehouses and concreted open storage areas are available.

Total storage area is about 54.0 ha., closed storage area 8.8 ha. and open storage area 45.2 ha.

CRANES: Multi-purpose gantry cranes capacity 6 tons – 40 tons (more than 100 units). Floating cranes capacity 15 tons, 100 tons, 300 tons (3 units).

Note: Floating crane capacity 350 tons belongs to the shipbuilding yard and can be used in case of necessity.

Forklifts with capacity 1 ton – 10 tons (more than 600 units).

BULK CARGO FACILITIES: For cereals: Mobile pneumatic machine "Noero" (about 15 units). Pneumatic cereal unloader at berth "Hartmann" (6 units) with rate of 300 t.p.h. can discharge cargo at 2 berths.

Gantry crane with grabs 3.0 cu.m. – 7.0 cu.m.

Raw sugar, coal, fertilisers, ore can be handled with cranes and grabs.

Bucket loaders with capacity 0.6 tons – 3.5 tons (more than 40 units).

CONTAINER FACILITIES: Container crane with capacity 30.5 tons (8 units) – 4 for ships and 4 for wagons.

Straddle carriers with capacity 30.5 tons – 35.0 tons (12 units) and forklift trucks with capacity 16 tons – 25 tons (20 units).

Stuffing/stripping is possible with forklift trucks with capacity 1.5 tons – 2.0 tons.

Note: No electric points for reefer containers available.

RO-RO FACILITIES: About 10 berths can be used for Ro-Ro vessels. Four of these berths are equipped with ramps. Terminal tractors "Sisu", "Terberg" (25 units) and wheel tractors (40 units) can be used for transporting.

TIDE: Considerable rises of water level may be caused by strong Westerly winds – and falls by Easterly winds. Usually the changes in water level are greater during the Autumn and Winter months. During Autumn and Winter the range of level may reach 1.2 m. from the MWL and sometimes even more.

During Spring and Summer it is never more than 0.5 m. The greatest rises in the water level are observed in the Neva Bay. The extreme difference in level between the maximum rise and the minimum fall of these seasonal changes observed is about 3.5 m. At the mouth of the Neva River the greatest changes in the water level are caused by the S.W. Autumn gales. The difference in level usually reaches 0.2 m. – 0.3 m. and only sometimes up to 1 m.

STEVEDORES: Ordered by Agent.

MEDICAL: Masters to advise Agent prior arrival if medical attendance required aboard.

TANKERS: Report: 1994.

Tankers up to 15,000 tonnes d.w.t. handled at Berth No. 112. Max. draft 9.6 m. 6 tanks of 3,000 tonnes each for gas oil, and 4 tanks of 2,500 tonnes capacity for fuel oil. Pumping rate per hose 300 cu.m./hr. through 12 in. line.

DENSITY: Fresh water in port area.

FRESH WATER: Most berths supplied by shore installations, otherwise barges. Also available at Outer Roads Anchorage.

FUEL: Bunkers available, usually delivered by lighters.

FIRE PRECAUTIONS: No smoking allowed in port area, except in places specially allocated.

CONSULS: Consulates of the following countries are situated in St.Petersburg: Bulgaria, China, Cuba, Czech Rep., Finland, France, Germany, Hungary, Italy, Japan, Netherlands, Poland, South Africa, Sweden, U.K. and U.S.A.

DRY DOCKS: *Floating Docks:*

No.	*Length* (m.)	*Depth* (m.)	d.w.t.
1	130	6.2	6,000
2	90	6.2	4,000
3	140	6.2	8,000
4	168.5	6.2	15,000

SURVEYORS: 1. There are independent maritime surveyors Joint Stock Company "Morservice" performing all kinds of surveyor works and tallying of cargoes. Tel: 251-06-46 (24 hours), or by Telex via Agent.

2. There is an Inspector of the Shipping Register of Russia.

REPAIRS: All types of repairs for vessels of up to 20,000 d.w.t. can be carried out in the port.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: According to charter party.

CERTIFICATES:

Passenger Ship Safety.
Safety Equipment.
Safety Radiotelephony.
Safety Radiotelegraphy.
Exemption Certificate.

CUSTOMS ALLOWANCES: No restrictions on board.

TIME: GMT plus 3 hours in Summertime from last Sunday in March until last Saturday before last Sunday in September.

HOLIDAYS: 1st January; 2nd January; 7th January; 8th March; 1st, 2nd and 9th May; 12th June; 7th November.

POLICE/FIRE/AMBULANCE: Police 9692; First-Aid from Port 503; from Town 03; Port Fire 8509, 8536, 8973; Town Fire 01.

EMERGENCY CO-ORDINATION CENTRE: Contact Agent or St.Petersburg Radio Station on the VHF Channel 16 and 26.

STORING: See "Prelims".

1. Vessels may be stored by barge or truck.
2. No restrictions.
3. Trucks may proceed alongside.
4. Forklift trucks may be used.
5. No exceptions from Russian laws.
6. As a rule riggers are available.

IDENTIFICATION CARDS: Needed, will be given on arrival.

GARBAGE DISPOSAL: The collection of garbage is effectuated by Environment Protection Department. Tel: 114-90-92. Application is via Agent.

WASTE OIL DISPOSAL: The collection of waste oil is effectuated by special types of ships. These ships deliver waste oil to port's oil station. Application is via Agent.

SEAMAN'S CLUBS: There is an International Seaman's Club. Tel: 216-40-44. There is also the House of Friendship. Tel: 216-96-88.

CURRENCY: Local currency is the Rouble.

AUTHORITY: Sea Port of St.Petersburg Ltd., Mezhevoi Kanal 5, St.Petersburg 198035, Russia. *Tel:* 251-02-90. Timber Port: 114-97-75. *Telex:* 621101. *FAX:* 1868544. *Cables:* Seaport St.Petersburg. *Contact:* Anatoly P. Bilichenko, General Manager. Captain F.Podanev, Harbour Master.

AGENT: Economou International Shipping Agencies, 16 Dvinskaya Street, Building 2, 198035 St.Petersburg, Russia. Tel: (7-812) 2590956. Telex: 621032 Ceco Ru. Fax: (7-812) 1140687.

SOCHI: 43.35 N. 39.43 E. (See Plan)

GENERAL: The Port of Sochi is an ice-free port, situated at the mouth of the Sochi River, S.E. of the Uch-Dere Point, in the Eastern part of the Black Sea.

The port is protected by the Caucasian chain of mountains from cold N.E. winds but it is open to winds blowing from Southerly and Westerly directions when heavy waves may roll over the port moles causing heavy swell in the harbour.

The port mostly handles passenger traffic.

There are passenger terminals, one of which serves hydrofoil ships only. About 3 million passengers visit the port yearly.

A cargo pier is equipped to handle fruit, building materials and cars. There are enclosed warehouses on the cargo pier and on one of the passenger terminals.

DOCUMENTS: Upon arrival, the Master is to submit to representatives of the Port Authorities the following documents: All Ship's Certificates, Ship's Plan, Last Port Clearance, Official Master's Declaration confirming complete absence on board of any stowaways, narcotics, weapons.

The following clear and accurate documents (IMO FAL Forms) duly signed by the Master shall also be provided:

On Arrival:

2 copies General Declaration (Form 1).
2 copies Cargo Declaration (Form 2).
2 copies Ship's Stores Declaration (Form 3).
8 copies Crew List (Form 5).
4 copies Passenger List (Form 6).
2 copies Crew Personal Effects Declaration.
2 copies List of Monies in vessel's safe.
1 copy Maritime Declaration of Health.
2 copies Bill of Lading.
4 copies Cargo Manifest.
2 copies Cargo Stowage Plan.
2 copies Check List for Cargo Operations (Prepared by the Port).

For all foodstuffs and vegetables cargoes additional:

2 copies Certificate of Origin.
2 copies Veterinary Certificate.
2 copies Phytoquarantine Certificate.

Upon Sailing:

1 copy Special Master's letter to the Harbour Master concerning the vessel's stability and the vessel's readiness to put out to sea (The blank form is prepared by the Port).
4 copies Bill of Lading.
4 copies Cargo Manifest.
2 copies Cargo Declaration.
1 copy Crew List.
1 copy Crew's Personal Effects Declaration.
3 copies Passenger List.
1 copy Ship's Stores Declaration.

The Master Must:

1. Before entering the port and before sailing from the port arrange careful examination of all parts of his vessel to find any stowaways or strangers on board, who are not included in the Crew List or Passenger List.
2. On arrival and before sailing grant to the representatives of the Port Authorities, duly signed by the Master, the Official Master's Declaration certifying complete absence of any stowaways, weapons, arms, guns, narcotics and any kind of contraband or smuggling.
3. From mooring until unmooring, provide a compulsory gangway/deck watch to control all ship's visitors.

If any direct violation of these demands occurs, the Master and all crew may lose the right to go ashore and/or vessel could be seriously fined.

Also see "General" before first port.

PILOTAGE: Pilotage is compulsory for all foreign vessels, entering and leaving, as well as when mooring, unmooring or shifting berth.

A Pilot should be ordered on VHF Channel 16 through "Inflot Sochi" on arrival.

The pilot boat or the tug usually meets a vessel at a distance of about 1 mile from the breakwater in daytime. In the event of bad weather or restricted visibility, vessel should anchor or drift at a safe distance from the port, until Pilot arrives. Pilotage may occasionally be carried out by leader method.

According to the Merchant Shipping Code of the Russia, the Master shall be obliged to pay a fine in an amount of double the rate due as pilotage fee for incorrectly declaring the draft, length, breadth or depth of the vessel, irrespective of the liability established by law for the consequences which may occur, as a result of incorrect information.

ANCHORAGE: Vessels only anchor under instructions of Sochi Control Post (VHF "Sochi-5").

Anchorage No. 1:	Lat. 43° 34.8' N.,	Long. 39° 42.6' E.
Anchorage No. 2:	Lat. 43° 35.0' N.,	Long. 39° 42.2' E.
Anchorage No. 3:	Lat. 43° 35.0' N.,	Long. 39° 40.6' E.
Anchorage No. 4:	Lat. 43° 34.2' N.,	Long. 39° 41.7' E.

The depths are 11 m. – 12 m.

Anchorage outside of these limits is prohibited. The bottom is mud with sand, and small stones closer to the shore.

No boats or rafts shall be launched and no swimming is allowed.

Any swimmers must not be allowed to come on board of a ship.

It is prohibited to change a vessel's anchorage by drifting. Masters of all vessels when at anchor are not allowed to move without the Authorities' consent (except in emergency), to give anybody permission to come alongside in a private launch or a small rowing boat (whether under oars or sail) to board the vessel.

RESTRICTIONS/MAX. SIZE: There are no time restrictions for entry into the port, but the Port Authorities recommend mooring of foreign vessels in daytime only.

During stormy weather, when entry into the port is difficult due to the swell caused by heavy waves in the approach and in the narrow entrance to the port, and in the event of heavy surf, vessels must anchor in the outer roads, as entry into the port is impossible.

Entry into the port is not allowed with heavy waves over 1.25 m. high and winds over 14 m./sec.

During the Autumn-Winter period, the Port of Sochi cannot be used as a shelter port, because lying in the port is dangerous due to the strong variable current ("Tyagun") usually caused by gales blowing between S.E. and N.W. Under these circumstances, the Port Authorities cannot guarantee safety to a vessel which, after having received a storm warning, does not go to sea, and bears no responsibility for the consequences.

No shore connection is allowed to a vessel until Free Pratique is obtained.

No vessel is to get under way without having obtained Port Clearance and the permission of the Harbour Master.

The maximum ship's sizes permitted to enter are:

Pier	*Length* (m.)	*Draft* (m.)	*Breadth* (m.)
1 and 2	190	7.5	25
13	120	6.5	15

The Harbour Master may not allow a vessel to leave the port if:

1. The Cargo Loading Regulations have not been fulfilled, i.e. a vessel is considered overloaded or wrongly loaded in case:
   (a) A vessel's load lines corresponding to the maximum draft to which she should have been loaded are under water without any list.
   (b) The cargoes loaded in the hold and/or on deck have not been secured in a proper manner or have not been secured at all.
   (c) A vessel has a bad list (exceeding 5°) caused by faulty loading or her stability does not correspond with the ship's documents.
   (d) A vessel loaded with bulk or liquid cargoes has not used the necessary materials or accommodation to prevent the cargoes from shifting or overflowing in case of vessel's pitching and rolling.
   (e) The deck cargo is considered a danger to the safety of a vessel and to the safety of life onboard caused by faulty loading.
   (f) The corresponding regulations for loading of dangerous cargoes or cattle to be carried by vessel have been broken.
   (g) Other loading regulations have not been followed in the course loading.
2. Under other circumstances which may cause a danger to the safety of a vessel and to the safety of life onboard, as well as when the ship's documentation regulations have been infringed.
3. When the port dues, tolls and fines have not been paid.

Disbursement account is calculated strictly according to the port's tariffs without any other supporting vouchers or documents attached and covering D/A.

All expenses, which may occur due to a vessel's possible delay in the port in connection with the reasons stated above, are to be for the Owner's account only.

HEALTH: Free Pratique is granted after port formalities when alongside or at anchorage, if weather permits.

Sanitary and Quarantine Requirements: It is prohibited by law to contaminate the inner and territorial waters of Russia with any kind of substances which are considered to be unhealthy for people or harmful to live resources of the sea. It is also strictly prohibited to discharge into the sea any oil, fecal, washing waters and residues; rubbish or waste foodstuff.

Not later than 48 hours before arrival, Masters of all vessels coming from foreign countries to Russian ports shall advise Quarantine Authorities by radio through "Inflot Agency" giving full details of health conditions onboard, as well as sanitary conditions at the last port of call. If no sick persons onboard, cable "Answers six health questions no".

Veterinary Certificates of Good Health are required for the livestock, all kinds of meat, animal food and raw meat stuff brought to Russian ports from abroad. Certificates should be issued by the proper Authorities of the country from which the cargoes have been exported. Master should have a Phytoquarantine Certificate for the goods of vegetable nature.

It is prohibited to take ashore fruits, vegetables, grain seeds, plants, plant products, etc., without a certificate issued by a local branch of the Russia Agricultureal Quarantine Inspection; animals and birds are also not allowed to be brought ashore without getting permission from the Veterinary Authorities.

RADIO/VHF: Vessels can establish ship-shore radio contact through the port radio station Sochi Radio, operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Calling*	*Working*	*Type of trans-mission*	*Working hours*	*Range Miles*
"UGA-9"	500	500	A1A	0000-2400	600
"Sochi-Radio"	2310	2310	H3E	0700-1900	200
VHF "Sochi-2"	16	12,14	F3E	0000-2400	10
VHF "Sochi-5"	16	9,12,14	F3E	0000-2400	10
VHF "Inflot-Sochi"	16	10,6	F3E	0900-1600	5

Whilst at anchor in the roads, all vessels should keep a continuous watch on VHF Channel 16.

Notices:

12 days prior to arrival, it is necessary to inform Inflot through Telex No. 191121 Flot Ru the following:

Ship's Name, Flag, G.R.T., N.R.T., LOA, Breadth, Depth, Draft, Number of Decks, Last Port of Call, Nature of Cargo and Total Quantity, Shippers/Consignees' full Names and Telephone Numbers at Sochi, ETA Sochi.

3 days prior to arrival: ETA and words "Answers six health questions no".

48/24 hours, Master's and/or Owner's ETA and radio notices are compulsory.

As a general Custom of the Port, the Notice of Readiness is usually accepted at a moment when Free Pratique is granted, and the ship is in all respects ready to discharge or load the cargo.

TUGS: Tug's assistance is compulsory for all foreign vessels and for all Russian vessels with length over 50 m. and G.R.T. over 300 tons. Tugs are operated by the Pilot, same price irrespective of one or two tugs used.

BERTHING: A vessel intending to enter port with tug assistance should keep the Sochi mid-channel leading marks (176.8° – 356.8°) in line ahead and stop the main engines in due time to allow vessel to come to the state of "no motion" at a distance of 1 mile from the port entrance. Only under these conditions is a tug allowed to approach a vessel and receive or cast-off the tow rope if any. Shifting berth is allowed during winds not exceeding Force 5 Beaufort Scale.

Cargo Berth No. 13: There are 2 portal cranes of up to 10 tons lifting capacity, forklifts and other cargo handling equipment.

CRANES: See "Berthing".

FRESH WATER: Can be supplied by pipelines at every berth. Cost U.S.$ 6.00/tonne.

FUEL: Not available.

CONSULS: None.

REPAIRS: Not available.

HATCHES: Opening and closing of hatches is carried out by the crew with Authorities' permission only.

CUSTOMS ALLOWANCES: No limits on quantities, but nothing allowed to be taken ashore, as per Russian Custom House Regulations.

REPATRIATION: No facilities exist for effecting crew changes.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer (Last Sunday in March until last Sunday in October).

HOLIDAYS: January 1st, 2nd and 3rd; March 8th; May 9th; June 12th and November 7th.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without any special permission with Seaman's Passport only.

GENERAL: *Pollution:* Pollution of any kind must be avoided by all means.

Any oil spills must immediately be reported to the Port Authorities and to the Agent. Any oil spot or slick noticed on the sea surface near your vessel should also be immediately reported to the Port Authorities and entered in ship's Log Book, which should be kept up-to-date and ready for inspection.

The penalty for pollution, littering or throwing of rubbish onto quay or into sea incur a heavy fine, detention or lien on the vessel. All expenses which may be occurred therefrom are to be for the Owner's account only.

AUTHORITY: Maritime Administration of the Port of Sochi, 1 Voykova Street, Sochi, Russia 354000. *Tel:* (8622) 99-95-90, 99-66-366. *Telex:* 191121 Flot Ru. *FAX:* (8622) 99-95-90.

Commercial Port: 1 Voykova Street, Sochi, Russia 354000. *Tel:* (8622) 92-22-71, 99-66-364. *Telex:* 191121 Flot Ru. *FAX:* (8622) 92-68-63. *Contact:* Petr T. Manushin, Head Master of Maritime Administration. Ivan L. Lyutikh, Harbour Master. David M. Stoupelman, Port Director.

AGENT: Independent private Maritime Agency "Inflot-Sochi" Ltd., 1 Voykova Street, Sochi, Russia 354000. Cables "Inflot Sochi". Tel: (8622) 92-30-29, 99-66-272. Telex: 191121 Flot Ru. FAX: (8622) 92-30-29.

TUAPSE: 44.06 N. 39.04 E. (See Plan)

The port of Tuapse is situated between the mouths of rivers Tuapse and Pauk and the depths of 40 m. Year round navigation.

DOCUMENTS: Refer to beginning of Russian section.

PILOTAGE: Compulsory in and out, possible at any time. Vessels await Pilot at anchorage. Pilots board and leave vessels in the Outer Roads behind the Pervomaisky Breakwater if the sea (swell) up to Force 4. When leaving harbour during bad weather Pilot leaves vessels in the Inner Roads. Communication with Pilots on VHF Channel 6.

ANCHORAGES: Depths 13 m. – 22 m. Position of anchorage, bearing to the entrance red light and distance is radioed by Harbour Master through Agent to each vessel prior to arrival (unless berth available). When at anchor, vessel shall keep VHF watch on VHF Channel 16.

MAX. SIZE: See "Berthing".

HEALTH: Sanitary Officer boards on arrival or when berthed. No automatic Free Pratique. In the event of fever or any suspected epidemic disease onboard Masters shall inform the sanitary service immediately on arrival.

RADIO/VHF: Radio communication can be effected through the port radio station "Tuapse-Radio".

Station	*Call Sign*	*Channel*
Port Controller	Tuapse 1	16, 1
Port Dispatcher	Tuapse 2	14
Port Control		9
Pilots		6

All movements in the port area require permission from the Port Director. Such permission for small vessels expires after 15 minutes and should be renewed.

Arrival Advice: Masters shall send 96/72/48 and 24 hours' ETA notices to Agent, advising also quantity of ballast onboard and time required for deballasting ashore. Masters shall also advise quantity and grade of cargo, stowage plan, LOA and maximum draft, number of passengers, health condition of crew.

TUGS: Tugs are compulsory for berthing/unberthing or shifting, as well as when lying at inner anchorage. Tugs normally join vessels at the buoy marking the Pervomaisky breakwater. Ship's lines to be used.

MEDICAL: First medical aid at any time; hospital facilities available.

TANKERS: Report: 1994.

Terminals: Crude Oil Terminal. Tel: (86261) 21342.
Products Terminal. Tel: (86261) 22551/75330/75321.
Oil Refinery. Tel: (86261) 23615.
Oil Terminal. Tel: (86261) 71294.

Shore tanks:

Product	No. of Tanks	Total Capacity (tonnes)
Gas Oil	16	56,000
Kero	4	17,690
Naphtha	6	18,000
Fuel Oil	3	7,500
Crude Oil	7	51,100
(Crude tanks are concrete underground tanks).		
A-76	4	14,000
Kerosene	5	20,000
Dirty ballast tanks available.		
Under construction	4	

Shore lines:

Product	Shore lines No.	Diameter (mm.)
Gas Oil	2	500
Kero	1	500
Naphtha	1	400
Fuel Oil	1	400
	1	500
Crude Oil	1	1,000

Length varies from 1.5 km. to 2.8 km.

Berthing:

Berth No.	Length (m.)	Max. Draft (m.)	Products handled	Loading Rate (tonnes/hr.)	Shore Connection (in.)
1	230	12.0	Fuel Oil	700	10
			Gas Oil	1,050	
			Crude Oil	1,200/2,400 (1 or 2 lines)	
2	170	11.2	Fuel Oil	700	10
			Gas Oil	1,050	
			Crude Oil	1,200/2,400 (1 or 2 lines)	
3	186	9.75	Naphtha	750	10
			A-76	600	
			Kero	1,200	
			Fuel Oil	850	
			Gas Oil	850/1,730 (1 or 2 lines)	
4	186	11.5	All Products/Crude Oil (Out of Service).		
5	200	12.0	Kero	1,200	10
			Gas Oil	850/1,730 (1 or 2 lines)	
			Naphtha	750	
			Fuel Oil	850	
6	165	9.75	Gas Oil	1,500	10
			Kero	1,200	
			Naphtha	750	
			Fuel Oil	850	

DENSITY: 1011/1015.

FRESH WATER: Available from any berth, road delivery not possible.

FUEL: Fuel oil and gasoil available at oil berths or ex-lighters. Masters giving 72 hours' notice.

FIRE PRECAUTIONS: Conventional rules for oil ports.

CONSULS: None.

REPAIRS: Emergency repairs. Floating docks subject to special arrangement.

BERTHING: At any time with winds up to Force 7. The port consists of 2 harbours, with 3 berths for dry-cargo ships (max. draft 12 m. (brackish water), LOA up to 220 m.) and 6 berths in the oil harbour for tankers (max. draft 12 m. (brackish water) LOA up to 235 m.). Oil harbour, shore cargo manifolds diameter 250/400 mm. All dry-cargo berths are equipped with portal cranes of 10-32 tons capacity. Loading/unloading usually by shore cranes. The port is not sheltered for vessels during strong S.E./S.W. winds. During strong gales from these directions lying in port is dangerous due to strong swell, especially the one called "tyagun". In this event vessels must leave harbour when recommended by the Port Authority. When lying in port the main engines shall not be immobilised without special permission by Harbour Master.

SURVEYORS: Leading world classification societies are represented by the Register of Russia. Saybolt have office in Tuapse.

POLLUTION: Marine pollution shall be avoided by all means, specially due to proximity of health resort area. Any pollution is subject to heavy fines.

OPENING/CLOSING HATCHES: Normally by crew.

GANGWAY/DECK WATCHMEN: Not required. Gangways shall be lighted up and protected by nets.

CUSTOMS ALLOWANCES: No restrictions. Export/import of state currency is forbidden.

REPATRIATION: Possible in emergency.

AIRPORT: Sochi – 120 km. Served by regular airlines.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: 1st January, 8th March, 1st, 2nd May, 9th May, 7th October, 7th and 8th November. Work during holidays can be arranged.

FIRE/AMBULANCE/POLICE: Telephones: Fire – 301; Fire-boat – 231; Ambulance – 003; Militia (Police) – 002. *Office Hours:* 0800 – 1700 hrs. (Monday to Friday).

TELEPHONES: Available for all vessels.

SERVICES: Compass adjusting, radar and radio repairs, gyro compass repairs, lubricants, paints and chemicals of Mobil, Castrol, Esso, Elf-Aquitaine, Rochem and Perolin Unitor also spares for Sulzer, M.A.N. and Burmeister and Wain engines also for Magnavox Satellite Navigators available from consignment centre of Novorossiysk (Tel: 62897. Telex: 279113/412629). Deliveries made with 3 days prior notice to Agent.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Seaman's Books are sufficient.

NOTICES:

Brief Information for Masters:

ETA: ETA messages shall also contain quantity of ballast and time for deballasting ashore.

Anchorage: Anchorage position is obtained from Agent prior to arrival, if no immediate berthing is expected. No boats, rafts or other objects shall be launched from vessels. No swimming is allowed.

Bad Weather: S.W. gales develop heavy swell in harbour and vessels may be recommended to leave berth. Main engine shall not be immobilised when alongside berth without Harbour Master's permission. If permitted a tug-boat shall be hired to stand-by.

Bunkers: Small quantities of gas oil and IFO available ex-barge.

Free Pratique: Free Pratique will be granted after Custom's and other formalities are completed, which are normally carried out at all times when alongside berth, otherwise in day time at anchorage, weather permitting.

Fresh Water: Available ex-cargo berths only.

Garbage and Wastes: Any garbage, food wastes, etc. should be collected by crew into special containers placed on board each vessel by a boat upon arrival. Landing of garbage is compulsory.

Launch: Launch for crew at Master's request between 0800 hrs. and 2400 hrs., subject to availability of boats, weather permitting.

Meat Rooms: Meat rooms on board shall be sealed by the Vet Inspector during Custom's visit upon arrival in roads or upon berthing and the seal should not be removed before sailing. Meat of Russian origin is allowed for use.

Pollution: Oil spillage must be avoided. In case of a spill, all operations must be stopped immediately and the accident reported to the Port Authority and your Agent at once. Any oil spot or slick noticed on the sea surface near your vessel should also be immediately reported to your Agent and entered in the log.

All outboard sea valves should be locked up upon arrival in Russian territorial waters and kept securely closed until sailing. Port seals may be placed on the said valves after docking.

Oil Record Book should be kept up to date and always ready for inspection by Port Authority or Pollution Control.

Radio: Transmission on any frequency to any station except Tuapse Port Radio is not allowed within 12 mile limit. VHF Channel 16 is to be monitored continuously while in roads. This Channel shall be used for calling only. Channels 1, 3, 6, 8, 9, 12, 14, 26 and 27 shall not be used by vessels for ship-to-ship communication.

Steel Ropes: Steel ropes are not allowed when mooring in the Oil Harbour. All mooring lines shall be kept tight at all times.

Salinity: The sea water in harbour is brackish (salinity 1.011–1.014).

Sick Crew: Seamen with fever and symptoms of infectious disease should be reported to Port Sanitary Doctor on ship's arrival and without delay.

Duty Free: Shop is run by Shipchandler and is open 0800 – 1200 hrs., 1300 – 1700 hrs., Monday through Friday (Tel: 398).

Smoke: Emission of smoke from funnel in harbour is prohibited.

Smoking: No smoking is allowed on all decks when alongside at oil berth or when bunkering from a barge.

Telephone: Shore telephone set will be placed on board for fire-safety and business only when alongside a berth.

Useful Phone Nos.: "Inflot" – 322/836/288/427; "Nafta" – 357/282; Pilot – 338; Harbour Master – 323/235/223/503; Seamen's Club – 269; Shipchandler – 398; Pilot – 338.

Shore Leave: Shore leave allowed around the clock.

Attention of Chief Officers: All mooring ropes and lines are to be equipped with *rat-guards* immediately upon completion of mooring or shifting.

Failure to comply with this regulation will incur a heavy fine by the Port Sanitary Service without further warning.

Safe Draft: Safe permissible draft alongside berths:

Berth No. 1	12.00 m.	Berth No. 7	7.40 m.
No. 2	11.20 m.	No. 8	6.20 m.
No. 3	9.75 m.	No. 9	11.00 m.
No. 4	11.50 m.	No. 10	11.00 m.
No. 5	12.00 m.	No. 11	12.00 m.
No. 6	9.75 m.	No. 11A	9.75 m.

Safe Trim and List: Vessels alongside berths should always maintain seaworthy trim and list (not exceeding 2°), and always remain afloat.

Tugs: Tugs are compulsory, ship's lines used. Masters should avoid using ship's propellers when approaching berth and should inform tugs of each manoeuvre to avoid damage. During S.E. gales vessels with a small quantity of cargo or ballast on board at Berths No. 1, 2, 5 and 6 are recommended to call tugs for safety.

Rat Guards: Compulsory for each rope, even tankers. Failure to comply will bring heavy fine.

Sewage: Must be discharged, whenever feasible, into a special craft before sailing.

Notice to Masters of Vessels: Additional Compulsory Regulations at the Port of Tuapse.

With the aim of preventing sea pollution following additional rules should be strictly complied with:

1. A reliable communication with shore organisations should be maintained during the whole period of vessel's stay in the port, by VHF on Channel 16, or by shore telephone placed on board when alongside berth. The use of such telephone for non-official conversations is prohibited.

2. Upon berthing all overboard valves, except those of the engine cooling systems, should be sealed by the ship's personnel.

3. Before commencement of any operations with oil products, drip pans should be placed under the manifold flanges, all scuppers and other openings on deck should be properly plugged, and all sounding pipes and air pipes checked. No oil operation shall start before all ship systems are ready and the vessel is reported to the representative of the oil harbour or the bunkering craft.

4. In case of an oil spillage, all oil operations should immediately be stopped, and the accident reported at once to the Port Authority by VHF from the roads or by telephone when alongside a berth: Telephone Nos.: Inflot – 322/836. Nafta – 357. Harbour Master's Office – 223/503. Pilot – 338.

All measures to prevent further discharge of oil overside and deck cleaning should be taken without delay.

5. Discharge of any liquids (oil products, domestic and fecal/bilge or sewage waters, etc.), garbage and wastes overboard is prohibited.

6. No ballast can be discharged overside into the sea without permission of the Hydrochemical laboratory and without their representative being present.

7. No chemicals are allowed to be used for neutralising spilled oil or oil products.

8. The administration of any vessel which has polluted the sea and the territorial waters of Russia, and failed to undertake necessary measures to prevent a discharge of substances harmful to human health or living resources and marine life, as well as failed to report such incidents, shall be responsible in accordance with the law and regulations in force.

9. All ships should collect any garbage (food wastes, etc.) into special containers placed on board upon arrival, and see that the garbage is removed from the vessel before sailing.

Fire Fighting and Emergency Procedures:

Instructions on Fire Fighting Safety and Emergency Procedures at Oil Berths and on Tankers lying at Loading Berths at the Port:

1. Smoking in the Oil Harbour is prohibited.

Use of open fires and hot work without special permission of the Oil Harbour Fire Guard is not allowed.

2. In case of fire or emergency, inform Fire Guard (Tel. 301) immediately; at the same time start fire-fighting.
3. In case of oil spillage on the quay or on a tanker, cease all cargo operations immediately until the spilled oil is removed.
4. Stop loading during electrical storms.
5. Stop loading when another tanker is underway to an adjacent berth until her mooring is completed.
6. Connecting hoses and loading operations are prohibited when ship to shore bonding cable is missing.
7. The following fire-fighting equipment should be located near the ship's main cargo manifolds on deck:

2 fire extinguishers; a felt sheet, a container with sand and shovel; foam and water hoses with jet nozzles laid out.

8. If a fault or a condition threatens to create a fire is discovered, stop loading immediately until the hazard is eliminated.

Use of tools that may produce sparks is not allowed.

Principal Rules of Anti-Fire Safety for Tankers lying Alongside in the Oil Harbour:

In order to ensure the fire safety of the Oil Harbour and of vessels lying alongside, it is strictly forbidden:

(a) To pump out ballast and water with remains of oil products out of tanks/bilges;
(b) To carry out work with a naked flame;
(c) To throw overboard lighted cigarettes, matches, garbage, also to use signal rockets, fireworks, fire, etc.;
(d) To maintain fire in the galley, to use portable electric fire appliances, cabin ventilators and smoke on board during loading/discharging of oil cargoes. Smoking is allowed only in ship's smoking rooms;
(e) To perform steam scavenging of the smoke or exhaust pipes which may cause sparking;
(f) To use unprotected electric lights, pocket electric torches for lighting decks, tanks or ladders;
(g) To use on deck wire ropes while mooring, if the vessel is carrying 1st. category cargo;
(h) To load/discharge during thunderstorms;

(i) To use tools made of ferrous metal when connecting hoses to avoid sparking.

The vessel's administration are obliged to take all necessary measures to avoid any possible leakage of cargo from pipes and fittings onboard or pump out or spill on deck and in to the sea.

3. All scuppers on the loading/discharging deck section are to be plugged.

4. It is absolutely necessary that the vessel's hull should be connected to the shore earthing appliances if the vessel is loading/discharging a 1st. Category cargo.

5. The manholes of the cargo tanks are to be closed and the sight holes to be covered with Davy's nets.

6. Before commencing loading/discharging all the anti-fire appliances are to be ready for immediate use.

7. In case of fire on board the fire brigades should be called without delay, the vessel's Administration organising the extinguishing of fire by crew also.

8. The vessel's Administration must acquaint the crew with the above rules.

9. Master is responsible for the observance of the above rules.

GENERAL: Deballasting or discharge of tank-washings facilities (slops) at a rate of up to 2,000 t.p.h., craft for discharge of bilge water. Food waste and garbage, etc. shall be collected into special containers placed on board upon berthing. Laundry facilities. No boats, rafts, etc. shall be launched from vessels without special permission. All mooring ropes to be provided with rat-guards immediately upon mooring or shifting berths. Local representative of the Insurance Company of Russia (Ingosstrakh) Ltd., and experts of the Russian Chamber of Commerce and Industry.

DEVELOPMENTS: Reconstruction works including dredging underway.

AUTHORITY: The Port of Tuapse Authority, 2 Maxim Gorky Street, 352800 Tuapse, Russia. *Tel:* 7-15-15, 2-19-15. *Telex:* 191115 Volna Su. *Cables:* Morport Tuapse. *FAX:* (86261) 2-18-35. *Contact:* O. Antonov, General Director (Tel: 7-12-35, 2-72-64).

AGENT: "Inflot," Shipping Agency, 25, Gagarin Str., 352800 Tuapse. Cables: Inflot. Telex: 279116 Inf Su. Tel: 7-13-22, 7-18-36, 28-1-54.

VANINO: 49.05 N. 140.16 E. (See Plan)

SHIPMASTER'S REPORT: May 1994 (Updated 1996).

VESSEL: Bulk carrier of 26,000 d.w.t. LOA 177 m. Beam 22.9 m. The vessel is equipped with cranes.

GENERAL: Situated along the Vanino Bay. It is the prime commercial port for the Sovetskaya Gavan area, Khabarovsk Region, on the N.E. coast of the Russian mainland adjacent to Sakhalin Island. The port is open all year round. It is a natural coastal harbour and a first port of entry.

DOCUMENTS:

7 copies General Declaration (I.M.O. FAL Form No. 1).
3 copies Cargo Declaration (I.M.O. FAL Form No. 2).
2 copies Ship's Stores Declaration (I.M.O. FAL Form No. 3).
2 copies Crew's Effects Declaration (I.M.O. FAL Form No. 4).
7 copies Crew List (I.M.O. FAL Form No. 5).
2 copies Passenger List (I.M.O. FAL Form No. 6).
4 copies List of Last Ports of Call.
2 copies Money List.
2 copies Arms and Ammunition List.
2 copies Drugs and Narcotics List.

APPROACHES: Coming from the South (usually), steer to position Lat. 49° 05' 05" N., Long. 140° 38' 06" E. then steer to course 261° up to position Lat. 49° 04' 08" N., Long. 140° 31' 05" E., through the zone of deviation, thence contact "Vanino Port Control" on VHF Channel 14 for further instructions. Prior to this, when about 10 nautical miles from the port, contact "Vanino Port Authority" on VHF Channel 16 for instructions and to be plotted and programmed by their local traffic control. Also, there is a Traffic Separation Scheme to be followed along the approaches to the port.

Traffic Separation Scheme: The T.S.S. is an IMO adopted scheme. It is recommended for all ships, both during day and night and in all weather conditions. All ships should steer and keep to the right hand side of the T.S.S. There is a roundabout (circular traffic lane), 1.2 miles in width, centered in position Lat. 49° 03.6' N., Long. 140° 24.5' E., which is marked by a red and white banded buoy.

PILOTAGE: Compulsory for all ships. Pilot boards within 2 cables of position Lat. 49° 05.03' N., Long. 140° 18.87' E. (in rough weather, Pilot boards in inner harbour), and disembarks just off the breakwater. Pilot boat is a motor launch with blue hull and white superstructure. Pilot ladder is usually rigged on the leeward side at 1.0 m. off the waterline.

ANCHORAGE: Anchorage at the outer roads of Vanino Bay is considered at 13 anchor points, odd numbered sectors North of the Bay and even numbered sectors South of the Bay. Depths between 13 m. and 19 m., sandy bottom and sheltered from West to N.W. winds during the Winter, and/or South to S.E. winds in the Summer.

HEALTH: Pratique usually granted when alongside, after being boarded by Health/Quarantine inspectors.

RADIO: Morflot-Vanimo working frequencies for cablegrams:

Shore	Ship
3605 kHz	4183 kHz
6380 kHz	6278 kHz
8675 kHz	8367 kHz
12678 kHz	12551 kHz

TUGS: 1×3,000 h.p., 2×1,500 h.p. and 1×700 h.p.

BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)	*Cargo Handled*	*Cranes Capacity* (tonnes)
PPK-2

16	150	8.9		
17	150	9.4		
18	120	4.9	For barges	
19	175	8.9	Wood products	25-40
20	175	10.2	Wood products Bulk cargo Steel products General cargo	

CRANES: Gantry and mobile type on tracks, capacity from 5 tonnes to 40 tronnes.

MEDICAL: Limited facilities available.

TANKERS: Berth No. 1: Length 78 m., depth 15.0 m. Max. size: LOA 230 m., 60,000 d.w.t. Berth for loading fuel oil and gas oil.

DENSITY: 1015, varies because of tide flow from river upstream.

FRESH WATER: Available by barge only, rate 30 tons/hr. 24 hours notice to Harbour Master through the local Agent in writing. Cost U.S.$ 6.10 per ton, excluding barge fee.

FUEL: H.F.O. and M.D.O. available by barge, various grades/rates, with ample notice to concerned parties.

REPAIRS: Small repairs can be undertaken.

DRY DOCKS: Capacity for coastal vessels only.

SURVEYORS: Russian Register of Shipping available.

OPENING/CLOSING HATCHES: Performed by the ship's crew.

REPATRIATION: Not possible.

AIRPORT: Nearest international airport is at Khabarovsk City, about one hour's drive by car.

TIME: GMT plus 10 hours in Winter. GMT plus 11 hours in Summer.

HOLIDAYS: Cargo operations are carried out regardless of the occasion.

SHORE LEAVE: Permitted. Passport necessary for issue of landing permit by the Immigration Office, and to be shown at the gate. Immigration Police were not stationed at the gangway this time (as is usual in all Russian ports by agreement with Immigration local office and Port Authority).

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUB: Not available.

GENERAL:

Weather:

April to June	Foggy season.
June to August	Rainy season.
September to October	Fine season.
November to April	Ice season.

Ice is firmest from mid-January to mid-February, and is in abundance from mid-February to mid-March.

Coastal and tidal currents are generally Southerly in direction, at about 0.5 – 1.0 knots.

Provisions: Limited foodstuffs available and very expensive.

Communications: Telephone, facsimile, telex, telegraph and VHF radio facilities available at the local Agent's office.

Inmarsat facilities also possible and available at Agent's office.

Charts:

British Admiralty Charts No. 4511 (General).

5 copies Cargo Declaration (if loaded),
2 copies Cargo Declaration – (if without cargo).
Information for Agency (special form).

PILOTAGE: Pilotage is mandatory for foreign vessels. Pilot boarding areas: Waiting Area "175-B" in the Ussury Gulf and the one in the Amur Gulf 3.5 miles West of the Tokarevski Light.

ANCHORAGES: Prior to setting up contact with the Radar Centre of Vladivostok Traffic Control System (VTCS) and obtaining the latter's permission to enter, inbound vessels shall anchor at one of the following waiting areas: "175-B" in the Ussury Gulf, No. 2 in the Amur Gulf (A circle of 10 cables radius, centred on Lat. 43° 06.60' N., Long. 131° 51.40' E.).

MAX. SIZE:

Length Overall (including bulbous bow): 260.00 m.
Extreme Breadth: 36.00 m.
Max. Draft (All year round): 11.50 m.
Also see "Berthing".

RADIO: Vessel traffic is governed by the Radar Centre of the Vladivostok Traffic Control System (VTCS). The centre maintains round-the-clock operations; and can be contacted on VHF Channel 67 by calling "Vladivostok Port Control".

TUGS: Available.

CRANES: The following equipment is available:

Electric cranes.
Reloaders.
Container reloaders.

BERTHING: Berthing, unberthing, reberthing and shifting operations in the port are provided by the Bereg Co.Ltd. All services mentioned above are carried out by the workers at the berth. Ship's Agent should organise an order for berthing operations through the dispatching office 2 hours prior to the berthing operation.

The order should include:
(1) Ship's name, type and Owner.
(2) Berthing or other place of operation.
(3) Starting time.
(4) Berthing peculiarity, if any.

Berth No.	Max. LOA (m.)	Max. Draft (m.)
1	200	9.0
3	160	9.0
5	160	9.2
6	150	9.4
7	150	8.9
8	185	10.5
9	160	11.5
10	160	10.0
12	150	9.1
13	260	11.5
14	180	10.5
15	150	9.8
16	220	11.5
17	300	11.0

MEDICAL: Territory Clinical Hospital, Aleutskaya Street 57.
Far Eastern Central Basin Hospital, Vladivostok's 100 Years Prospect 161.
Stomological Hospital, Morozova Street 7.
Out-Patient Clinic of Far Eastern Basin Hospital, Beregovaya Street 3.

FRESH WATER: Available.

FUEL: Available.

CONSULS:

Consulate General of Republic of Korea, 45-a Aleutskaya Street, Vladivostok 690009, Russia. Tel: +7 4232 227822. Fax: +7 4232 229471.

Consulate General of India, 14 Aleutskaya Street, Vladivostok 690090, Russia. Fax: +7 4232 228666.

Consulate General of Japan, 12 Mordovtseva Street, Vladivostok 690091, Russia. Fax: +7 4232 267541.

Consulate General of USA, 32 Pushkinskaya Street, Vladivostok 690001, Russia. Tel: +7 4232 300070, 300071.

REPAIRS: There is a ship repair yard close to the Commercial Port of Vladivostok territory. It can provide hull, engine, electrical and electronic equipment repair services on Master's order. Address: 3 Nizhneportovaya Street, Vladivostok 690600, Russia. Tel: +7 4232 221063, 219185.

SURVEYORS: Sea Register of Russia, Traffic Inspection of Russia and State Port Inspection.

CUSTOMS ALLOWANCES: The crew may bring in goods to the value of U.S.$ 2,000 without Customs duties.

CARGO GEAR: The port handles general cargo, breakbulk and dry bulk, containers, steel, etc.

AIRPORT: Vladivostok Airport is 40 km. from the port.

TIME: GMT plus 10 hours. Summer-time GMT plus 11 hours.

HOLIDAYS: January 1st, 2nd and 7th; March 8th; May 1st, 2nd and 9th; June 12th; December 12th. The holidays have no effect upon port working.

BANKS: All payments in favour of the Commercial Port of Vladivostok should be affected in U.S.Dollars or Japanese Yen.

Payments in U.S.Dollars should be to: Bank of Tokyo, Global Service Banking Divison, Tokyo with the Far Eastern Bank, Vladivostok, Russia, Cor. account No. 653-0452106, in favour of the Commercial Port of Vladivostok, Account No. 910070508.

Payments of U.S.Dollars should be to: Bank of Tokyo, Global Service Banking Division, Tokyo with the Far Eastern Bank, Vladivostok, Russia, on the account No. 653-0405744, in favour of the Commercial Port of Vladivostok, account No. 9124070608.

DEVELOPMENTS: In order to expand the port capacity, the following measures are planned:

1. Expansion of the container terminal area and cargo berths by constructing a wider quay.
2. Reconstruction of 2 berths, in order to increase water depth and expand the warehousing areas in their vicinity.
3. Construction of extra railtracks at the new port premises.
4. Reconstruction of the existing oil terminal and increasing its capacity up to 1.5 million tons, thus allowing not only bunker vessels but also tankers.

AGENT'S REPORT: 1995.

Documents:

1 copy Maritime Declaration of Health.
10 copies Crew List.
6 copies General Declaration.
3 copies Cargo Declaration.
2 copies Crew Effects Declaration.
2 copies Crew Money List.
2 copies Ship's Money List.
2 copies Ship's Deck/Engine Stores List.
2 copies Ship's Bonded Stores List.
2 copies Ship's Provisions List.
2 copies Voyage Memo (Ports of Call).
2 copies Camera List.
2 copies Drugs/Narcotic/Ammunition List.

Pilotage: Pilotage is compulsory for all foreign vessels. Pilot boards vessel at the Quarantine Anchorage within the following limits:

Lat. 43° 03.30' N., Long. 131° 58.40' E.
Lat. 43° 04.20' N., Long. 131° 58.40' E.
Lat. 43° 04.20' N., Long. 132° 00.10' E.
Lat. 43° 03.30' N., Long. 132° 00.40' E.

Approaches/Anchorage: At the approaches to anchorage, please call Port Control Station on VHF Channel 67 to obtain permission for movement.

Vessel should proceed in direction of Askold Island, and at a distance of 5 miles steer a course of 325°. On this course proceed to Skryplyov Island, and at a distance of 6 miles contact Port Control on VHF Channel 67. Port Control Operator will give a point to anchor.

Also see "Pilotage".

Restrictions: Navigation in Ice: Vladivostok is open for navigation all year round. From December until March, vessels may encounter some broken ice. Ice breaker assistance is available upon request. Generally, the ice situation is very similar to the ports of Nakhodka and Vostochniy.

Max. Size: LOA 250 m., beam 27 m. and draft 11.3 m.

Health: Guidance re Asian Gypsy Moth (A.G.M.) Inspection: The examination and issuing of special certificate, that the vessel is free of A.G.M., is available in ports of Vladivostok, Nakhodka, Vostochniy, Kholmsk, Vanino and Korsakov.

Special phitosanitary inspectors are working on board during vessel's stay at the port to prevent any infection. Upon completion of discharge, the certificate will be issued which confirms that vessel is free of A.G.M. It will take about 4 hours after completion of discharge.

Estimated expenses: U.S.$ 3,500.00 if vessel is bound for American/Canadian ports. U.S.$ 4,600.00 if vessel is bound for New Zealand/Australian ports.

Because New Zealand and Australian Port Authorities require all ships accommodation, including crew cabins inside superstructure to be checked, the cost is greater.

All vessels calling at Russian Far East ports throughout the year are to be examined against A.G.M., if they are bound for American, Australian, Canadian and New Zealand ports after discharging or loading.

Night loading/discharging is not prohibited at any time or season.

Vessels, when staying at Vladivostok roadstead (anchorage) during night-time, are recommended to switch out all lights (except navigation lights) on upper decks.

There are no other special instructions for Masters.

Radio/VHF: Inflot (Call sign "UFL") operate on 8,515/8,369.5 kHz and 12,955/12,553 kHz throughout 24 hours.

Port Control on VHF Channel 69.

ETA message to include: ETA, max. draft on arrival (in order to fix suitable berth), number of crew (including Master) and nationality. Any change in ETA is also to be sent.

Berthing: 16 berths with a total length of 4,190 m. available for handling general cargo, containers, grain, sugar, Ro-Ro, passengers, bananas, coal, scrap and LASH barges with depths 9.5 m. – 11.0 m.

Handling Rates: Containers: 400 per day. Grain: 7,000 tonnes/day. Sugar: 1,000 tonnes/day. General: 500 tonnes/day. Scrap: 700 tonnes per day.

Cranes: Floating crane with capacity 250 tonnes – 500 tonnes available. 2 gantry cranes of 30.5 tons for containers. Quay cranes of 5 tons – 32 tons capacity used for general cargo handling.

Fresh Water: Available by barge at U.S.$ 5.94/tonne.

Fuel: Available (via Bominflot in Tokyo).

Surveyors: Available.

Gangway/Deck Watchmen:

Notice: Issued by Feskontrakt & K Co.Ltd., 8 Mordovtseva St., Vladivostok, 690065 Russia. Tel: 7-4232-219-630. Fax: 7-4232-266-845.

This is to inform you that from 1st March 1994 there have been some changes in the rules of Immigration Control as far as it concerns servicing foreign vessels. Coast Guard Authorities, which had provided control over visitors onboard the vessels (including stevedores, dockers, supervisors and other strangers), cancelled their service near the accommodation ladder of foreign vessels.

The above mentioned reorganisation will influence negatively the interests of foreign shipowners, because according to the requirements of Immigration Authorities, all the formalities connected with vessel's departure will be performed during daytime only (not paying attention to the time when the cargo handling works are completed). This will result in unjustified delays in performing formalities.

Specialised guarding company "Feskontrakt & K" works in good cooperation with the Immigration Authorities. The Immigration Authorities trust "Feskontrakt & K" and recommend their services to agency companies.

Watchmen service is supposed to help to avoid the problems with the Immigration Authorities. In case the watchmen are not on board the vessel, there must be regular 24 hour control by the crew members, that will prevent them working and resting.

The above mentioned restrictions on performing immigration formalities for vessel's departure at daytime only are not extended to vessels whose Masters have ordered the watchmen service.

Taking into account unfavourable criminal situations at the ports in the Far East of Russia (especially in Vladivostok), watchmen service help to avoid the criminal accident onboard. In case of emergency, the watchmen persistantly defend the shipowners' and charterers' interests and may also be reliable witnesses.

Watchmen service rates are:

From 1 to 5 days: U.S.$ 5.00 per hour.

From 6 days to ship's departure: U.S.$ 4.00 per hour.

General: Ballast: Deballasting in port area is strictly prohibited. In order to avoid any problems and additional expenses, please take clean ballast water as far as possible out from port area prior to arrival.

Ship Chandler: All kinds of marine supplies available.

Divers: Underwater inspections are available.

SHIPMASTER'S REPORT: July 1995.

We arrived at the roads at 2400 hours and dense fog was prevailing.

We were directed by Port Control (VHF Channel 67) to anchor position and anchored at 0100 hours. Port Control must be contacted when 6 miles from Skryplev (Skryplyov) Island. If vessel calls earlier, they ask to be called again at the said position.

The given anchor position was 6 cables from 2 anchored vessels, unseen due to fog.

Although there is no restriction on day/night movement, Pilot boarded at 0900 hrs. same day., again in dense fog. When we entered the bay, the fog cleared.

Two tugs assisted berthing alongside Berth No. 50 in the Fishing Port.

This vessel is a double hull tanker of 46,536 d.w.t., and called to discharge 5,000 tons of soybean oil.

Formalities took one hour, and were relaxed.

Discharging was very slow, and it was their first import of vegoil in this place.

Although we were advised of high rate of crime and violence in the area, we witnessed nothing of the sort.

Agents "Inflot" joint stock company now, proved to be very helpful and efficient.

The area is infected by "Asian Gypsy Moth" (See "Agent's Report" – "Health" – above), and a vessel destined for U.S.A., Canada, Japan, New Zealand or Australia must obtain a Phytosanitarian Certificate.

When departing, the Pilot disembarks well into the bay, but the way out is clear. Overtaking is not permitted in the bay, either with or without Pilot on board.

The vessel has to report to Port Control when crossing the line between Skryplev (Skryplyov) and C.Bassargin.

AGENT'S REPORT: February 1996.

Port Limits: Golden Horn Bay and area of Bosfor-Vostochny Strait between Muravyov-Amurski Peninsula and Russki Island, as well as Quarantine Anchorage Area No. 175-B in Ussuri Gulf (See "Anchorages").

Documents: Basic Customs documents for entry:

1 copy Maritime Declaration of Health.
10 copies Crew List.
6 copies Passenger List.
6 copies General Declaration.
3 copies Cargo Declaration.
2 copies Crew Effects Declaration.
2 copies Crew's Money List.
2 copies Ship's Money List.
2 copies Ship's Stores List.
2 copies Bonded Stores List.
2 copies Provisions List.
2 copies Camera List.
2 copies Voyage Memo.
2 copies Drugs and Narcotics List.
2 copies Ammunition List.

Traffic Control: All movement operations within port limits are covered by Centre of Vessel's Traffic Management System. To obtain permission to enter the port, inbound vessel shall contact "Vladivostok Port Control" on VHF Channel 67 beforehand. All vessel operators shall comply with the directions by the Centre relating to vessel's movement, anchorage positions, ship's movement routes in the port.

Pilotage: Compulsory. Pilot boarding in "175-B" area in Ussuri Gulf, or anchor Points No. 60, 63, 64 in Amur Gulf. Request for Pilot usually made by ship's Agent.

Anchorages: There are two anchorages for foreign vessels:

1. Area No. 175-B in Ussuri Gulf:

Lat. 43° 03.30' N., Long. 131° 58.40' E.
Lat. 43° 04.20' N., Long. 131° 58.40' E. For vessels bound for Commercial and Fishery Ports.
Lat. 43° 04.20' N. Long. 132° 00.40' E.
Lat. 43° 03.30' N., Long. 132° 00.40' E.

2. Anchorage points in Amur Gulf:

No. 60: Lat. 43° 09.40' N., Long. 131° 49.50' E. For tankers bound for Oil Terminal.
No. 63: Lat. 43° 09.08' N., Long. 131° 49.29' E.
No. 64: Lat. 43° 09.04' N., Long. 131° 49.80' E.

Anchorage is designated by Centre of Vessel's Traffic Management System. Vessels anchored shall keep watch on VHF Channel 67 at all times.

Restrictions:

For Commercial Port: Max. permissible draft 11.5 m.
For Fishery Port: See "Berthing".
For Oil Terminal: Tankers up to about 30,000 tonnes d.w.t.

Max. Size: See "Berthing".

Health: Free Pratique for all foreign vessels provided upon berthing within vessel Inward Clearance.

Radio: Port has no communications equipment. Normally all communications maintained via ship's Agent.

VHF: Centre of Vessel's Traffic Management System can be reached on VHF Channel 67.

"Inflot" Shipping Agency can be reached on VHF Channel 67 during office hours.

Radar: See "Traffic Control".

Tugs: Available. Type and number of tugs for berthing/unberthing/shifting are determined by Pilot. Towage expenses do not depend on types and quantity of tugs used. Tugs normally join vessel near Fairway Buoy. Vessel's lines normally used.

Berthing: The following berths available for foreign vessels:

Berth No.	*Length* (m.)	*Depth* (m.)	*Shore Cranes × Capacity* No. (tons)
Commercial Port:			
1 Passenger Terminal	230	7.0 – 8.1	2×5 + 1×10-20 for Berths No. 1 and 2.
2 Passenger Terminal	260	8.6 – 9.3	
3 Reefer/General	220	7.6 – 7.7	2×10 + 1×5
4 Auxiliary	129	7.5 – 10.9	
5 General	220	9.3 – 9.6	4×10 + 2×5
6 General	200	8.9 – 9.1	2×5 + 1×10 + 1×16
7 General	200	8.9 – 10.0	2×16 + 5×10 for Berths No. 7 and 8.
8 General/Bulk	225	10.4 – 10.5	
9 General	175	8.0 – 8.8	2×10 + 1×16
10 General	150	7.8 – 8.0	1×5 + 1×10
11 Auxiliary	117	8.0 – 8.1	
12 General/Bulk	175	9.8 – 9.9	2×16
13 Bulk	265	10.8 – 10.9	3×16
14 Steel Products	210	7.2 – 8.0	4×16
15 Steel Products	220	10.8 – 12.4	4×16
16 Container Terminal	303	10.8 – 12.6	2×16 + Container Gantry Cranes 2×30.5
42 General/Reefer	200	7.5	4×5
Fishery Port:			
44 Auxiliary	102	8.5 – 9.5	1×3.2
45 General	137	8.6 – 9.2	4×6
46 Reefer/General	220	7.9 – 9.8	3×6 + 3×3.2
47 Reefer	192	7.2 – 10.2	5×6
48 Reefer	240	8.3 – 9.0	3×6 + 1×3.2
49 General	265	9.0 – 10.0	3×6 + 1×3.2
50 General/Reefer/Oil	300	10.1 – 10.6	5×6 + 3×3.2
51 Auxiliary	99	9.4	1×3.2
52 General/Container	202	7.4 – 9.3	2×6 + 1×32 + 1×40 for Berths No. 52/53.
53 General/Container	155	8.1 – 8.9	
54 Auxiliary	40	8.0 – 8.4	

Oil Terminal:

Pier No. 1 and 2: Vessel's LOA and beam unlimited, depth 9.5 m.
Pier No. 3: Vessel's LOA and beam unlimited, depth 8.0 m.

Cranes: See "Berthing".

Bulk Cargo Facilities: Commercial Port: Shore cranes at Berths No. 8, 12 and 13 equipped with grabs. Cargoes handled: Grain, coal, coke and raw sugar.

Max. Load/Discharge Rate: 3,000 – 5,000 tonnes/day.

Specialised Cargo Handling Facilities: Commercial Port: Berth No. 16 – Container terminal equipped with 2 container gantry cranes with 30.5 tons lift capacity each. See "Berthing".

Fishery Port: Berth No. 50 – There are shore tanks for discharging/storage 2,875 cu.m. of vegetable oil and 10,800 cu.m. of fuel oil.

Berth equipped with one shore discharging/loading line with international flange diameter of 89 mm. Average discharging rate 180 cu.m. per hour. Average loading rate 60 cu.m. per hour for vegetable oil, 50 – 80 cu.m. per hour for fuel oil.

There are no specially equipped berths for handling liquid chemicals, LPG and Ro-Ro carriers.

Bridges: None.

Stevedores: Working time in port is round the clock. Sundays 50% overtime from 2000 hrs. – 0800 hrs., and 100% overtime applied when working during holidays.

Average load/discharging rates:

General cargoes: Bagged 400 – 500 tonnes/day; steel products 1,500 – 3,000 tonnes/day; bulk cargoes 3,000 – 5,000 tonnes/day; containers 150 – 200 units/day.

No particular ETA advices required in order to arrange gangs.

Medical: Full hospital facilities available. Prior notice not necessary, but advisable. Dentists available during office hours. Vaccination/fever certificates required, inoculations and vaccinations can be carried out.

Tankers: Oil Terminal is located in Amur Gulf on the Western coast of Muravyov-Amurski Peninsula (Lat. 43° 08.50' N., Long. 131° 53.70' E.).

Tankers up to about 30,000 tonnes d.w.t. can be accommodated for loading and discharging operations. Mooring method: Stern to the pier. See "Berthing" and "General".

Each pier is equipped with 7 load/discharge lines, diameter of each is 150 mm. – 325 mm., equipped with international flange. Average receiving rate 200 – 350 tonnes/hr.

Capacity of shore slop (residue) facilities is about 200 tonnes, receiving rate up to 350 tonnes per hour.

Prevailing wind: North winds during Winter season (October-February). Amur Gulf usually covered by ice from December to March, but local icebreaker makes fairway/approaches to the piers accessible.

Shore gangway not available, ship's gangway is normally used.

Facilities to combat oil spills. Floating barrage and spill collecting barge.

Shore steam and water are available.

Ship-to-ship transfer facilities not available.

Density: 1025.

Fresh Water: Available from barge during vessel's stay at berth. Price U.S.$ 5.94/tonne, rebate 20% if 50 – 100 tonnes ordered; 40% for quantity over 100 tonnes.

Fuel: Available from barge during stay at berth. Bunkers to be ordered via "Bunkerflot", Vladivostok or "Bominflot, Tokyo". Prepayment compulsory.

Fire Precautions: Smoking available only in special determined places. Storage of LPG cylinders, hazardous and highly inflammable commodities is prohibited at Fishery Port. Non-degassed tankers or tankers loaded with petrol products are prohibited to pass through the Strait of Bosfor-Vostochniy. Washing and degassing of tanks is prohibited for vessels berthed at Oil Terminal.

Consuls: There are consulates of India, Japan, South Korea and USA. There are also representatives of Australia and Vietnam.

Repairs: All types of deck and engine repairs are possible, but subject to preliminary agreement.

Dry Docks: Two dry docks available for foreign vessels: Largest dock: 150.0 m. × 25.5 m. for vessels up to 8,500 tonnes weight. Smallest dock: 131.8 m. × 22.5 m. for vessels up to 6,000 tonnes weight.

Surveyors: Cargo Inspectors:

Saybolt, Room 616, 45-A Aleutskaya Street, Vladivostok, 690009 Russia. Tel: (4232) 269655, 267026. Fax: (4232) 268631. Telex: 612466 Vld Ru. Sprint Mail: Saybolt.Vlad.

Surveyors: SGS:

"SGS Vostock Ltd. Head Office in Nakhodka, 30 Nakhimovskaya Street, Nakhodka, 692913 Russia. Tel: (42366) 21197, 21814. Tel: 7 (50491) 52178 Intelsat. Telex: 213859 SGS VS RU. Fax: 7 (50491) 52179 Intelsat.

Vladivostok Branch: 9 Strelnikova Street, Vladivostok, 690600 Russia. Tel: (4232) 283992.

Gangway/Deck Watchmen: Necessary for foreign vessels during stay at berth. Cost, U.S.$ 7.0/hr., depends on watchmen company chosen.

Hatches: Opening/closing normally carried out be crew.

Customs Allowances: Russian Federation Customs Regulations.

Cargo Gear: Loading/discharging normally effected by shore cranes. Heavy lift floating cranes up to 100 tons lift capacity available.

Repatriation: Facilities exist for changes of crew and repatriation of seamen.

Airport: Airport is 42 km. from port, served by regular airlines. Flights to foreign countries mostly carried out via Moscow (several flights per day). Direct flights from Vladivostok to Seattle, Niigata, Toyama, Seoul and Pusan, once a week.

Time: GMT plus 10 hours. Summertime GMT plus 11 hours (last Sunday of March up to last Sunday of September).

Holidays: January 1st (New Year's Day); January 7th (Russian Christmas); March 8th (International Womens Day); March 31st (Establish Day, Commerical Port only); May 1st and 2nd (International Solidarity Day); May 9th (Victory Day); June 12th (Independence Day); November 7th (Memory Day); December 12th (Constitution Day).

Cargo works can be arranged on above holidays.

Police/Ambulance/Fire: In cases of emergency, inform "Vladivostok Port Control" on VHF Channel 67 or ship's Agent.

Emergency Co-Ordination Centre: Tel: (4232) 283248. Fax: (4232) 222726. Telex: 213115 MRF RU. Cables: Vladivostok Morflot.

Telephones: Berths not equipped with appliances.

Services: All kinds of services available, but prior notice preferable.

Banks: No foreign Banks in Vladivostok.

Russian Banks:

Dalrybbank, 51 Svetlanskaya Street. Tel: (4232) 264473.

Far Eastern Bank, 27-A, Verkhne-Portovaya Street. Tel: (4232) 516000. Fax: (4232) 516444. Telex: 213252 FESBA RU. E–Mail: dcbank@stv.iasnet.com

Storing: Can be arranged by ship chandlers, who are to arrange storing in compliance with Customs Regulations.

Ship Supply Service: Can be undertaken during vessel's stay at berth. Transfer of stores or crew to the anchorage by craft can be arranged by ship's Agent, even in case of vessel's call in port without berthing.

Shore Leave: Crew members are allowed ashore when vessel stays at berth. Immigration Control at Port Gate checks time of leaving and coming back. Crew members are not allowed to stay ashore for more than 24 hours.

Identification Cards: Seaman's Book should be changed to Shore Pass at Port Gate by Immigration Officer when crew member goes ashore.

Garbage/Oil Waste Disposal: All vessels calling at the Commercial Port/Oil Terminal are charged Environment Dues, irrespective of whether or not they have garbage/oil waste onboard. Garbage is collected by barge, normally after vessel's berthing, and vessel is provided with garbage removal certificate. Oil waste disposal can be arranged by ship's Agent, if necessary. Vessels not to pay for above works. 50% rebate from Environment Dues is granted for vessels equipped with environment protection facilities for the complete recovery of all kinds of wastes and pollution and which supplied with appropriate international certificates.

Garbage/oil waste disposal at Fishery Port can be arranged by ship's Agent for current charges.

Seaman's Clubs: None.

Currency: Rouble. All port dues, charges and expenses are charged in U.S.Dollars. Exchange offices available.

Regulations: Deballasting in port is strictly prohibited.

Delays: Sometimes, owing to heavy ice conditions (one time in 4-5 years).

General: Special precautions should be taken while vessels berth alongside Berths No. 13, 14, 15 and 16 of Commercial Port. When S.E. wind is up to Force 7, and/or sea swell from S.E. is up to Force 4, all vessels berthed at above berths must keep main engine on stand-by and be ready to leave for outer roads. Masters and crew must stay onboard. Storm warning notice is normally delivered on board by Port Control Officer beforehand.

Oil Terminal – Method of berthing: Mooring is stern to the pier, with 2 anchors with 6 shackles on each, at least. Main engine and mooring gear must always be ready for use during whole stay at pier. If wind speed reaches 12-17 m./sec., all cargo operations must be stopped and vessel must be ready to leave berth. Master or Chief Officer should stay onboard during all times vessel berthed.

AGENT'S REPORT: August 1996.

Location: The port is located on the Southern extremity of Muravyov-Amurski Peninsula in the Gold Horn Bay.

Port Limits: N.E. shore of Bosfor-Vostochnyi Strait, shore of the Gold Horn Bay from the Tokarevski Light to Egersheld Peninsula and then in the same direction to Berth No. 30.

Documents:

6 copies General Declaration.
1 copy Declaration on Arrival.
5 copies Cargo Declaration (if loaded).
2 copies Cargo Declaration (if without cargo).
5 copies List of Last Ports of Call.
2 copies Ship's Stores Declaration.
2 copies Ship's Bonded Stores List.
2 copies Crew's Effect Declaration.
10 copies Crew List.
2 copies Passenger List.
2 copies Crew Money List.
2 copies Ship's Money List.
2 copies Camera List.
2 copies Weapon, Drugs, Porno Declaration.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
1 copy Fito Sanitary Certificate.
1 copy Veterinary Certificate.

Approaches: Vladivostok is open for navigation year round. From December until March, vessels may encounter some broken ice. Ice-breaker assistance is available upon request. The deep water harbour is easily accessible to large ocean-going vessels. A large island, named Russki, offers the harbour an excellent natural protection at its entrance.

The depths on the roads are from 20 m. – 33 m. Tides vary from 0.3 m. up to 1.4 m.

Pilotage: Pilotage in the port is compulsory. The services rendered by Pilots are carried out round the clock.

Pilot boarding areas: 175 "B" in the Ussury Gulf and the one in the Amur Gulf 3.5 miles West of the Tokarevski Light (a circle of 10 cables radius, centred on Lat. 43° 06.60' N., Long. 131° 15.40' E.). Pilot launches exhibit international code pilots flag and, at night, lights and signals.

The port is equipped with radar centre of the Vladivostok Traffic Control System (Radio call sign "Vladivostok Port Control" on VHF Channels 16 and 67).

Anchorages: Vessels are allowed to anchor at one of the following waiting areas: 175 "B" in the Ussury Gulf and the one in the Amur Gulf 3.5 miles West of the Tokarevski Light (a circle with 10 cables radius, centred on Lat. 43° 06.60' N., Long. 131° 15.40' E.). Vessels anchored are requested to keep continuous watch on VHF Channel 16. Vessels at berth or anchored within port areas are requested to seek permission of the Centre (VTCS) before unmooring or weighing anchor.

Restrictions: Vessels can enter or leave the port at any time of day and night.

Max. Size: Max. draft 11.5 m., max. LOA 260 m., max. beam 36 m.

Health: All vessels coming from abroad are inspected by Sanitary Office. On arrival of the ship, the Master should have Maritime Declaration of Health and Vaccination Certificates available. Free Pratique given on berthing or at the anchorage. No shore connection is allowed to a vessel until Free Pratique is obtained. If no diseases, vessel obtains Free Pratique.

Free Pratique cannot be granted automatically.

Radio/VHF: Cable Agent ETA, draft and information required via Vladivostok Radio Station.

All vessels when approaching the port should establish radio contact via the Port Radio Station, operating 24 hours a day on the following frequencies:

Station	*Call Sign*	*VHF Channel*
Port Controller	Vladivostok Radio 2	14
Harbour Master	Vladivostok Radio 5	12
Traffic Control	Vladivostok Port Control	16, 67
Agent	OSA	71
Tugs		10

Radar: Vessels are governed by the Radar Centre of Vladivostok Traffic Control System (VTCS), located on Goldobin Promontory. The Centre maintains round the clock operation. It can be contacted on VHF Channel 16 and 67 by calling "Vladivostok Port Control".

Berthing, unberthing operations and movements to the pier are governed by the Port Controller after coordination with State Supervising Port Inspection. Any vessel operator shall comply with the directions by the Centre relating to:

(a) Vessel's movement.
(b) Order of movement in the channels and precautionary areas.
(c) Ship's movement routes in the port.
(d) Anchorage positions.

Use of radar by vessel operator is mandatory within the VTCS's operational range. Prior to setting up contact with the Centre and obtaining the latter's permission to enter, inbound vessels shall anchor at one of the waiting areas.

Tugs: 4 tugs with capacity from 1,200 h.p. – 2,500 h.p. available. Tug assistance for mooring and unmooring is compulsory. The number of tugs and their horsepower is determined by the Pilot with the Master's consent.

Berthing: There are 16 berths with total berthing space of 4,190 m. and depths alongside up to 13.0 m.

Berth No.	*Length* (m.)	*Depth* (m.)	
1	230	9.75	Passengers
2	260	9.75	Passengers
3	220	9.75	Bananas, fruit
4	129	9.75	Service
5	220	11.5	General cargo
6	220	11.5	General cargo
7	200	11.5	General cargo
8	225	11.5	General cargo
9	175	7.75	General cargo
10	150	7.75	General cargo
11	117	7.75	Bunkers
12	175	9.75	General cargo
Berth No.	*Length* (m.)	*Depth* (m.)	
13	265	11.5	Grain, steel
14	210	11.5	General cargo
15	220	13.0	Coal, scrap
16	303	13.0	Containers

Mooring, unmooring and shifting operations are provided by "Bereg Co.Ltd.". Ship's Agent should organise order for berthing operations through the dispatching office 2 hours prior to the berthing.

Facilities: A wide range of equipment and storage facilities are available for handling a variety of conventional type general cargo, including machinery, metal products, cargo in cases, bags or LASH cargo.

Description	*Quantity*	*Capacity* (tons)
Port electric cranes	54	5.0 – 32.0
Container gantry cranes	2	30.5
Crawler cranes	6	16.5
Truck mounted cranes	7	6.3– 50.0
Reloaders	5	16.0
Berth container reloaders	2	30.5
Warehouse container reloaders	2	30.5
Lift trucks	131	1.5 – 25.0
Electric loaders	27	1.35
Port tractors	10	
Bucket loaders	20	
Bulldozer	1	
Timber grabs	9	5.0
Cast iron grabs	15	5.0 – 8.0
Ore grabs	8	5.0
Grain and sugar grabs	17	5.0
Bauxite grabs	7	5.0
Fertiliser bulk loading plant	1	60 tons/hr.

Heavylifts of up to 100 tons are handled by self-propelled floating cranes. Barges can be provided on Master's order. Loading capacity from 100 tons – 500 tons.

Total area of available covered warehouses is 54,100 sq.m., open areas 71,700 sq.m.

Bulk Cargo Facilities: Two berths are devoted to grain handling. The grain is mainly unloaded by grabs, and Hartman pneumatic unloaders are employed during bad weather periods. The grain transfer is direct between ship and railcar. Grain is being loaded for inland distribution.

Specialised Cargo Handling Facilities: There is a 303 m. container terminal, equipped with 30.5 ton portainers, 25 ton transtainers, SISU tractors, forklift trucks and electric loaders of various capacities. 70,000 containers (TEU) move across the terminal annually. The Port Computer Centre monitors the container traffic.

Stevedores: Ordered by Agent. Usual ETA advice required. Cargo handling is round-the-clock.

Medical: Hospital and medical facilities available, also inoculation, vaccination, etc. Advance notice for medical attendance required. Notice should be given to Agent. In case of an accident (emergency), medical attendance rendered at any time. If doctor required on board, Master should inform Agents by radio or VHF.

Fresh Water: Available from shore. It can also be supplied by barge.

Fuel: Bunkers available. Usually delivered by barge. Advance notice required.

Consuls: North Korea, Tel: 22-78-22. USA, Tel: 26-84-85. Japan, Fax: 26-75-41. India, Fax: 22-86-66.

Repairs/Dry Docks: There is a ship repair yard in the Commercial Port Vladivostok territory. It can provide hull, engine, electrical and electronic equipment repair services on Master's orders.

Ship repair yard has a number of floating docks for vessels of up to 8,000 d.w.t. and dry dock up to 30,000 d.w.t.

Surveyors: Inspectors of Sea Register of Russia. Traffic Inspection of Russia and State Port Inspection available.

Gangway/Deck Watchmen: Not compulsory.

Opening/Closing Hatches: Usually performed by ship's crew.

Customs Allowances: No restrictions on tobacco and alcohol on board ship. It is forbidden to take these items ashore, except for personal consumption.

The crew may bring any goods in the sum of U.S.$2,000 without Customs Duties.

Repatriation: Can be arranged.

Airport: Nearest airport is at Vladivostok, 40 km. away.

Time: GMT plus 10 hours. GMT plus 11 hours in Summer.

Holidays: 1st, 2nd and 7th January; 8th March; 1st, 2nd and 9th May; 12th June; 12th December. They have no effect on port working.

Police/Ambulance/Fire: Police Tel: 02. Ambulance Tel: 03. Fire Tel: 01.

Emergency calls with regard to collision, fire on board and dangers to human life may be given on VHF Channels 16 and 67. Call sign is "Vladivostok Port Control".

Telephones: Can be arranged on board.

Services: Port does not carry out the fumigation, but it can provide the following services: Mooring for fumigation time; provide crew with comfortable hotel; place order for fumigation with other companies.

Banks: All payments in favour of the Commercial Port of Vladivostok should be affected in U.S. Dollars or Japanese Yen.

Payment in U.S. Dollars should be done to: Bank of Tokyo, Global Service Banking Division, Tokyo, with the Far Eastern Bank, Vladivostok, Russia, on the Account No. 653-0452106, in favour of the Commercial Port of Vladivostok Russia.

Payment in Japanese Yen should be done to: Bank of Tokyo, Global Service Banking Division, Tokyo, with the Far Eastern Bank, Vladivostok, Russia, on the Account No. 653-0405744, in favour of the Commercial Port of Vladivostok Russia.

Storing: See "Prelims".

1. Vessel may be stored by barge or truck.
2. Vessel can be stored during loading.
3. Truck can proceed alongside.
4. Forklift trucks can be used.
5. Customs permission required.
6. Local riggers can be employed.

Shore Leave: Crew members go ashore with their certificates and passes issued by Immigration Authority. They can stay ashore without returning to the vessel for up to 24 hours.

Waste Oil/Garbage Disposal: All operations on sea and air pollution control are carried out by "Portovik Co. Ltd.". Valves should be sealed by the laboratory assistant from "Portovik Co.Ltd.". You can call the laboratory assistant through ship's Agent.

Release of following items is prohibited in the Port:

Any petroleum products or other substances detrimental for people's health.

Bilge water, ballast oil water from cargo and hopper tanks and feacal waters.

Water used for washing holds (tanks) after perilous substances.

"Portovik Co.Ltd." can provide ship with waste containers, ballast, bilge and feacal waters collectors.

Developments: Berth No. 9 reconstruction and expansion to 11.0 m. is underway. Berths No. 10 and No. 11 reconstruction is proposed to start. By 1998, there will be a new container terminal with capacity about 200,000 TEU's annually; a complex for handling perishable goods; a new cargo terminal at Vladivostok suburb for handling of cargo.

AUTHORITY: Commercial Port of Vladivostok, Strelnikova Street 9, Vladivostok 690600, Russia. *Tel:* (4232) 219388, 7-50985-12275 (Sat. Tel.). *Telex:* 213855 Ru. *FAX:* (4232) 222364. *Contact:* M.F. Robkanov, President. V. Pertsev, Vice President. Y. Sidorenko, Marketing Department.

VOSTOCHNY: 42.44 N. 133.03 E.

LOCATION: The commercial port of Vostochny is situated in the Vrangel Inlet, on the North-Western coast of the Nakhodka Bay, in the Sea of Japan. Navigation at the port continues all the year round.

DOCUMENTS: See "General" before first Russian port.

PILOTAGE: Pilotage in the port of Vostochny is compulsory. The services rendered by Pilots are carried out round the clock. In case the Pilot is not able to board a vessel due to bad weather, Master should follow recommendation given by the Pilot from the Pilot boat.

The port is equipped with a shore automatic vessels' movement control system (radio call sign "Kamensky-17"), on VHF Channels 16 and 12.

ANCHORAGES: Vessels are allowed to anchor in the port Inner Roads, the Vrangel Inlet, after having obtained the Harbour Master's permission only.

RESTRICTIONS: There are no entry restrictions in regard to vessel's length. Vessel's speed should not exceed 12 knots while proceeding through the main fairway and 6 knots when approaching the Vrangel Inlet. Under all circumstances Master shall choose the vessel's speed bearing in mind current navigational conditions.

The mooring of vessels having deadweight of 10,000 tonnes and over and length of more than 150 m. in ballast is not allowed during winds having velocity 10 m./sec. and over.

MAX. SIZE: The maximum draft of vessels mooring at the Coal Pier is 15 m. and 9.7 m. when mooring at other berths.

HEALTH: A vessel having arrived in the port Outer Roads and having no contact with the shore may not need to go through the clearance formalities. Vessels, having arrived in the port Inner Roads (the Vrangel Inlet) irrespective of the fact that they are to carry out cargo handling or not, shall go through all the necessary formalities for the clearance of the ship both on arrival and departure.

RADIO: Notice of Arrival – see "General" before first Russian port.

VHF: Radio communication can be effected through the Port Radio Station "Vostochny-Radio", some details of which are given in the table below.

Call Sign	Frequencies (MHz) Working	Frequencies (MHz) Calling	Type of transmission	Time of work
"Vostochny-2"	156.7(14)	156.7(14)	F3E	H24
(Port controller)	157.775(95)	157.775(95)	F3E	H24

VTMS in operation.

TUGS: 3 powerful tugs available. Masters of vessels are to use minimum of 2 tugs when mooring/unmooring and shifting berths at the port of Vostochny. The use of a third tug is compulsory during absence of a tug-pusher when mooring/unmooring bow-towed barges.

The number of tugs and their horse-power is determined by a Pilot with the Master's consent.

BERTHING/CRANES: Berths of the port with depths of up to 10 m. are equipped to handle bulk, liquid, general and timber cargoes as well as various kinds of vehicles. There are also specialised systems for the handling of coal and containers.

STEVEDORES: The official working breaks at coal terminal are:

0700 – 0800 hrs.,1200 – 1300 hrs., 1900 – 2000 hrs., 0000 – 0100 hrs.

At all the other terminals official working breaks are:

0800 – 0900 hrs., 1200 – 1300 hrs., 1700 – 1800 hrs., 0000 – 0100 hrs.

FRESH WATER: Can be taken at berths.

FUEL: Can be taken from lighters only.

REPAIRS: No facilities.

DRY DOCKS: None.

HATCHES: Opening and closing hatches is carried out by dockers.

TIME: GMT plus 10 hours in Winter; GMT plus 11 hours in Summer.

GENERAL: *Charts:* Russian Chart No. 700.

Ship chandler's shop and restaurant available.

NOTICE:

To Masters of Foreign Vessels calling at Russian ports:

1. On arrival of the ship, the Master is to submit to the representatives of the Port Authorities the following documents (IMO Forms) duly signed by ship's administration:

General Declaration (Form I) – 5 copies
Filling in of points 8 and 11 is not compulsory.
Cargo Declaration (Form II) – 2 copies
Filling in of point 6 is not compulsory
Points 7, 8 and 9 are to be filled in only for:
(a) Cargoes for which Bills of Lading were not issued (names of Shippers and Consignees to be stated).
(b) Transit cargoes;
(c) Cargoes for other Soviet Ports;
(d) Agricultural cargoes.
Ship's Stores Declaration (Form III) – not required.
Crew's Effects Declaration (Form IV) – 2 copies.

Amount of Master's and crew members' valuables (gold, silver, platinum, jewellery, bonds, travellers' cheques, etc.), personal firearms and cartridges are to be stated in point 2.

Crew List (Form V) – 6 copies.
Passenger List (Form VI).

2. The Master of a ship is to instruct all members of the ship's crew that in accordance with the Rules in force in Russian Ports:

Exportation and importation of state currency is forbidden;

No articles are permitted to be taken ashore or brought on board the ship without permission of the Customs House Authorities;

Articles taken ashore or brought on board the ship and concealed from Customs Control shall be regarded as smuggled goods, shall be confiscated and a fine shall be imposed;

Likewise, the sale of any articles of foreign origin on the territory of Russia will be regarded as smuggling;

No rubbish shall be thrown into the water or on the quay. The discharge of oil contaminated water and/or oil residue is prohibited;

All mooring ropes must be fitted with rat-guards;

At night only one gangway must be ashore when loading or discharging is not carried out;

It is prohibited to take ashore grain, seeds, plants, plant products, soil, etc., as well as animals and birds;

Violation of the above-mentioned rules will entail penalty in accordance with the laws of Russia.

NOTICE: *Extracts from the Obligatory Decrees of Vostochny Port:*

Port Limits: Inner roadstead-Vrangel Bay, a line drawn between Kamensky Point and Petrovsky Point.

Pilotage: Pilotage is compulsory for all craft exceeding 20 m. LOA, day and night. Request for a Pilot shall be made to "Vostochy-2" on VHF Channel 16, working on Channels 14, 9 and 6.

Navigation: Navigation in Nakhodka Bay and fairway leading to inner roads is one-way only. Max. speed is up to 8 knots if over 150 m. LOA, 10 knots up to 150 m., and 12 knots if less than 50 m. The overtaking of craft is prohibited at the inner roadstead. Navigation in the inner road by all craft exceeding 50 m. LOA must be at dead slow speed.

Mooring: Mooring must be made with not less than 2 tugs.

Draft: Permissible draft by Coal Berth is to 15.0 m. and at other berths 9.7 m.

Anchorage: Anchorage is temporily prohibited at Vrangel Bay.

Declarations: All declarations with regards to damage done to the ship while loading (unloading) or mooring shall be made by the Master through "Inflot" to Port Authorities in writing within 4 hours of the accident and in any case, before the ship leaves the port. Failing this the port shall consider no claims and shall bear no liability for any damage.

Prohibition: The following are prohibited at the port:

(a) pouring of sanitary water overboard and any smoking.
(b) using of the any chemical means in order to neutralise the spilled waters alongside.

For infringement of the abovementioned Master or his Owner shall be punished (fine to 25,000 roubles or deprivation of freedom for 5 years in accordance with Russian legislation).

Signed: Harbour Master.

SHIPMASTER'S REPORT: May 1983.

The Port of Vostochny is a relatively new port, and lies in Nakhodka Bay, at the extreme N.E. end in a smaller Bay, known as Vrangel Bay.

Documents:

On Arrival:
5 General Declarations (IMO Form)
4 Cargo Declarations (IMO Form)
2 Stores Lists
2 Crew's Personal Effects Lists
6 Crew Lists
4 Passenger Lists
2 Money Lists
2 Marine Declarations of Health
1 Vaccination List
1 List of Ports Visited

Prior Departure:
1 Cargo Time Sheet
1 General Declaration
1 Cargo Declaration
Cargo Manifests,
(Prepared by Agent)

Port Authorities board the ship at any time to effect clearance. They use the accommodation ladder. Frequently a moderate swell runs into Nakhodka Bay from the South, making boarding from even quite large launches very difficult. Immigration Authorities inspect all Crew Seamens' Books. Process of clearance takes about 1.5 hours.

Approaches: When about 4 hours from the port call "Nakhodka Port Control", on Channel 16, Working Channel 12. Nakhodka Port Control has the whole of Nakhodka Bay (Amerika Bay on some charts) under radar surveillance. All shipping movement within the Port Limits are controlled by them. They give direct steering and sailing orders over VHF Channel 12 to vessels under way after passing Buoy No. 1 (Lat. 42° 43.3' N., Long. 132° 56.3' E.) inward bound, also anchor berth given with bearing and distance from Mys Shvedova Lt. Ho. usually in the Quarantine Anchorage indicated on Chart BA. 3198 and Anchorage No. 3 on Chart BA. 3041 (Nakhodka Bay). Anchorage good in clay and mud in about 19 m. of water. After anchoring, report to Nakhodka Port Control, and revert to listening watch on Channel 16.

Berthing: Vessel proceeded to the Coal Berth at Vostochny under guidance from Nakhodka Port Control. Fairways well defined on BA Chart No. 3041. Pilot meets vessel off the entrance to Vrangel Bay, just after passing Buoy No. 2. (Lat. 42° 46.0' N., Long. 133° 00.6' E.). Pilot normally boards by pilot ladder or accommodation ladder, port side. 2 tugs used for berthing, which is nearly always port side to.

Berth is new and very modern (Japanese construction). Very well fendered with large rubber fenders at regular intervals. Usable length of quay is about 275 m., bollards at regular intervals all the way along the quay. Although two berths are shown on the Coal Jetty on BA Chart No. 3041 (Nos. 49 and 50) only No. 49, is in fact, used. This is because the loaders (two in number) only serve Berth No. 49. Depth of water alongside reported as 15 m. and 14 m. guaranteed. No restriction on air draft for loaders, ample clearance for vessel of this size (Panamax).

Departure presents few problems, as plenty of room and water immediately off the berth. Two tugs used as for berthing. These tugs are small, and not really big enough for a vessel of this size, and take a long time to get the ship moving off the berth. However, when clear of berth, vessel can be turned short round with engines and also with the aid of the tugs. Immediately vessel is turned and heading outwards Pilot disembarks. Vessel proceeds outwards to fairway buoy, listening out for Nakhodka Port Control on Channel 12 until passing Buoy No. 1.

Bulk Cargo Facilities: There are 2 large loaders on the Berth, rated at 2,000 tonnes per hour, self trimming. We loaded bituminous steam coal, SF given as 42, but no real check possible on this figure. Vessel loaded 55,000 tonnes in 32 hours., and would have been even faster, but for plant breakdowns. Shore cargo personnel helpful as possible, but somewhat limited due to language problems. Informed by them that cargo delays are common due to availability of cargo lacking. All coal brought by rail to port from some considerable distance. Draft and deadweight survey carried out by shore foreman and ship's staff. Cargo documentation and port clearance by Authorities takes about 4 hours, from time of finishing loading.

Density: Density range of water from 1025 to 1028.

Regulations: Many regulations are in force as is common with most Russian ports, below are listed some of the most important ones.

1. Soviet currrency must not be brought in or out of the country.
2. No goods may be imported or exported without permission of Customs.
3. No goods may be taken ashore and sold or brought aboard concealed from Customs Control, as this will be construed as smuggling and heavy fines will be imposed.
4. No dumping of rubbish or pollution of any kind may take place into the harbour waters.
5. All moorings to be fitted with rat guards.
6. Only one gangway to the shore. No ladders to be put out on off side, and off side to be lit by lights at night.
7. No boats to be swung out or lowered.
8. No swimming or fishing allowed whilst alongside.
9. Ship's radio station not to be used in port and VHF not to be used for other than official messages with Shore Authorities or Marine Authorities.
10. Radar must not be used alongside. If radars are to have maintenance carried out by ship's staff, Inflot should be contacted for permission to be granted by Shore Authorities.
11. No photography is allowed.
12. No persons other than the ship's crew and fare paying passengers to be on board at any time. All shore personnel coming on board must be vetted by the Authorities.

SHIPMASTER'S REPORT: March 1984 (Updated 1988).
Vessel loaded coal for Japan.

The Coal Jetty is modern with a conveyor system and 2 moving shiploaders fitted with excellent trimmers. Several delays occurred.

In addition to the coal jetty, which is numbered 49 and 50, there is a container terminal, Berths No. 6, 7 and 8 and a timber wharf, Berths No. 10, 11 and 12, where logs of coniferous trees are loaded. Berth No. 9 is for small passenger vessels.

Documents prepared were as follows:

Customs Lists
Money/Currency List showing each crew members balance
Money/Currency List in Master's possession
Camera List (very important)
Passenger List (if no passengers state "Nil")
List of Narcotics
Arms and Ammunition List (state "Nil" if nothing on board) and List of Vessel's Port of Calls within the last year.

The Quarantine Doctor asked for Vaccination List, but these were not available on board vessel as several vaccinations concerning the crew had already expired. No difficulties occured because of this and it seems not to be compulsory.

All Authorities and Inflot Agent came from Nakhodka, the Agent was the only English speaking person and acted as interpreter.

SHIPMASTER'S REPORT: May 1984 (Updated 1988).
Port of Nakhodka and Vostochny (English translation of Vostochny is Eastern).

Chart: B.A. Chart No. 3041.

Arrival: Prior arrival Agents will instruct vessel to proceed to position Lat. 42° 27.2' N., Long. 132° 56.3' E. and steer a course of 000° true, which is the Southern entrance to Separation Zone. Also Agents require state of crew health.

As vessel passes Buoy No. 1, Master must report same to Nakhodka Port Control on Channel 16, transferring to Channel 12, at which point vessel will be radar controlled to anchorage, Port Control gives vessel course to steer and anchorage position, vessel remains on Channel 12 and instructions passed to vessel regularly. Even to number of cables to anchorage position, at which time vessel is instructed to drop anchor. If berth is available vessel proceeds to Buoy No. 2 as instructed and onto Fairway No. 3 along which the Pilot will board quite close to Entrance Buoys of the Bukhta Vrangelya (Vostochny Port).

Vessel berths port side alongside assisted by 2 tugs, head inwards, pier well fendered with large hard double rubber fenders (size 1 m. long by 0.5 m. deep and high). Normal securing to berth is 4 lines and 1 spring each end. Rat guards are required and must be fitted prior to Quarantine Clearance.

On berthing, 2 guards are placed at bottom of gangway and Agent boards with 2 Quarantine Officers, 2 Customs Officers and 2 Immigration Officers.

The following papers are required and best to give Agent all documents to sort out:

5 copies General Declaration (IMO Form 1).
5 copies Crew List (IMO Form).
3 copies Passenger List ("Nil" returns required if no passengers).
2 copies Vaccination List (Cholera and/or Yellow Fever).
*2 copies Crew Effects Declaration.
*2 copies Crew and Ship's Currency Declaration.
*2 copies List of Cameras with type and serial Nos.
*2 copies Drugs in Master's Safe.
1 copy Ship's Stores List (Bond, etc.).
1 copy Parcel List ("Nil" return required).
1 copy Delivery Bill of Mail ("Nil" return required).
1 copy Declaration of Arms/Ammunition List ("Nil" return required).
1 copy Maritime Declaration of Health (Japanese form accepted).
4 copies Cargo Declaration (if cargo onboard).

*One of each taken ashore, other copies stamped and retained onboard for clearance check before sailing.

Ensure crew declare all goods, watches, radios, firearms, gold, jewelry, etc.

All Discharge Books checked by Immigration, Customs have random check on cabins. Quarantine only check Derat Certificate and Vaccination List. Note *all* types of "magazines" are forbidden and must be collected and sealed up before clearance.

When all paperwork is completed and Officials leave vessel taking Discharge Books ashore and clearance is given, cargo work can commence after draft survey. Discharge Books are returned to vessel after a few hours and are required to be handed to the gangway guards when any crew go ashore, even to read the draft.

Draft Surveyor checks everything and quite thorough, even with hold cleaning. Once surveyor has completed he arranges cargo operations to commence as per ship's instructions.

Vessel loaded two grades of coal:

1. Partizensky (J-6) 40,000 tonnes.
2. Nerjungrin (SS) 15,000 tonnes.

At consignee's request cargo was loaded with 20,000 along bottom, then 15,000 of SS and complete with 20,000 J-6 on top. Reason being the 15,000 SS was very powdery and mixed would be easier to discharge. This entailed a draft survey at the end of each layer of coal. Loading rate up to 1,200 tonnes/p.h. per loader.

Details of Berth, Loader, Etc.:

Berth: A pier built out from shore with length of 400 m. and width 56 m. of which only 340 m. is used for mooring. Depth of water at forward end of vessel 16 m. and at pier end about 18 m. Max. draft allowed 15 m. Cement constructed pier of 10 cement pontoons driven into sea bed on each side, with horn bollards on top of each pontoon (2 bollards). Then double horizontal rubber fenders on face.

Loader: Two units, travelling type with elevation boom, has outreach from fender face of 28.2 m. and airdraft of 18 m. Telescopic head Spoon or Fast Belt.

Belt Conveyor: Two belts from yard to pier at 180 m. per second.

Stocks: Two yards approx. area each 730 m. by 45 m. and plenty of stockpiles.

Max. Size Allowed: 100,000 d.w.t. (LOA 300 m., beam 43 m. and draft 15 m.).

Steam Line: On quay for ice melting.

Yearly Production: 6.2 million tons per year.

Future: Increase production by 5 million tons when other side of pier is developed as presently no loaders, although pier is complete in all respects.

Stowage Factor of Coal: About 42 cu.ft. per ton.

Bunkers: Available ex-coaster.

Fresh Water: Available ex-barge from Nakhodka (very expensive).

Stores: Not available.

Shore Leave: Allowed between 0800 hrs. and 2400 hrs. (Master not restricted). There is nothing to see at Vostochny but 1 hour by car/mini bus to Nakhodka where a Seaman's Mission and export shop are located.

Time: GMT plus 10 hours. Between 1st April and 1st October GMT plus 11 hours.

Radio Station: Nakhodka Radio used. 8510 kHz call sign "UKK3" and 500/435 kHz call sign "UK1" and answered first call. Other frequencies as per Radio Station Signals Vol. 1.

Tugs: Two tugs used of about 1,000 h.p. and 2,000 h.p. (Local Regulations require any vessel berthing to use 2 tugs).

Pilot: 24 hour berthing allowed.

Agents: "Inflot" are available on demand, visit the vessel at least once a day and are very helpful.

Cargo Weights: This is done by electronic weights scale ashore and on draft surveys. Weights in each hatch are not correct, as seen from our Facts Sheet vessel same quantities each run, yet time in each hatch varied from 40 minutes to 90 minutes for same quantity. Final draft survey agreed with ship's figures which were used for Bill of Lading (ship only signs "Mate's Receipt").

Other Berths: Across bay are 3 general cargo berths and 3 container berths with a maximum draft allowed of 9.7 m. Gantries are only suitable for the smaller container vessel of about 1,000 boxes.

Departure: Once cargo completed all paper work done on vessel, Agent attends to cargo papers after which Customs and Immigration board. Immigration check each crew member with Discharge Book photograph, Customs check bond seal and break it. Apart from papers given to Master they require a Cargo Declaration (IMO Form) completed. Ship has to request a Port Clearance, otherwise none is given.

Stevedores: Continuous working of cargo with meal breaks between 0700 – 0800 hrs., 1200 – 1300 hrs., 1900 – 2100 hrs. and 2300 – 2400 hrs.

Sailing: Once vessel clear of berth vessel is swung 90° to port and lined up between Entrance Buoys at which time Pilot disembarks and vessel reports to Nakhodka Port Control who advise course to steer and watch you on radar until passing Buoy No. 1. Then vessel steers 180° until clear of separation scheme.

SHIPMASTER'S REPORT: August 1984.
Vostochny Approach.
B.A. Chart Nos. 2511, 3198, 3041.

The main port of Nakhodka handles all traffic routing inside the bay. Contact Nakhodka Traffic Control on Channel 12 not less than 2 miles prior to arrival Buoy No. 1, Control will give you anchoring position and course to steer. When approaching anchoring position Control gives you run down and distance to go for dropping anchor.

Officials board at anchorage (6 people). When vessel is cleared listen on Channels 16 and 12 for berthing instructions. When berth is free, Control informs you to heave up and proceed towards berth.

Vostochny Pilot (Channel 16) boards at Fairway Buoys off berths. 2 tugs assist berthing. Buoys have no numbers but mark the entance to Vrangelya Bay, where coal berth is situated. We berthed Berth No. 49, port side to. Depth at berth is 16.5 m., max. draft 15 m., airdraft 18.4 m. Max. ships size 260,000 d.w.t. (100,000 tonnes), beam 38 m. Loading rate 3,000 t.p.h. by 2 loading booms. This rate depends on availability of coal. Most of cargo comes from Siberia and requires 10 days passage from mines.

Vostochny Facilities: Fresh water available on jetty, use your own hose and coupling. Fuel and diesel available by barge. Ship chandler if required, also hospital and dental treatment available. Shore leave is by mini-bus or launch to Nakhodka. The mini-bus can only carry 10 people and the journey by launch takes approximately 75 minutes. An International Seaman's Club, souvenir shop and 4 restaurants are available at Nakhodka.

Documents: We made out our own forms which included:

6 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
2 copies Currency List.
2 copies Dangerous Drugs List.
2 copies Passenger List.
2 copies Arms and Ammunition List
6 copies Notice of Readiness.
1 copy Port Health.

Any health forms will do, score out country of origin, they provide you with "Inflot" Agency Information Form.

4 copies General Declaration (IMO Form 1).
2 copies Cargo Declaration (IMO Form 2).

On completion of loading, Officials board for documentation of cargo loaded. When this is finished the Agent arranges for the Pilot via VHF. The Pilot takes vessel out of berth, using 2 tugs. Vessel proceeds, assisted by Port Control towards Buoy No. 1 off Mys. Krylova.

AUTHORITY: The Port of Vostochny Authority, Postal address: P.O.Box Vrangel-1, Port of Nakhodka Area, Primorsky Krai, 692907 Russia. *Tel:* (266) 52-3-71, 52-2-71, 52-4-00. *Telex:* 213816. *Cables:* Port of Vostochny.

AGENT: See "Nakhodka".

VYBORG: 60.42 N. 28.44 E. (See Plan)

For Saimaa Canal see "Finland".

GENERAL: A Baltic Sea port Vyborg is situated at the head of the Gulf of Vyborg in the N.E. part of the Gulf of Finland.

The port area consists of a harbour protected from the North by the Castle bridge passing over the strait nearby the Castle of Vyborg and by the Smolyanoy point – from the West.

The port is open for navigation all year round (from December till April with icebreaker assistance). Ice in the Gulf of Vyborg begins to form normally about the middle of November. The Gulf usually becomes frozen over by the middle of December and the last ice finally disappears in April.

Whilst tidal range in the Gulf of Vyborg is of small account, considerable changes in the water level may be caused by strong winds (up to 1.6 m.), variation in atmospheric pressure (up to 1 m.), and the seasonal increase of the amount of water brought down from the land. The rise of the water level is usually caused by South, S.W. and sometimes by North winds. The maximum range of the water level in the Gulf is about 2.0 m.

The Vyborg Fairway (least depth 7.3 m.) leads from the entrance to the Gulf of Vyborg across the Transund roadstead up to the entrance of the Inner Vysotsky Roads. The Vyborg Sea Channel (least depth 6.5 m.) leads from the Inner Vysotsky Roads into the port, situated at the head of the Gulf. Both of these and the Fairway and the Channel, are open for navigation any time of day or night.

PORT LIMITS: The sea waters of the port are the fairways and anchorages to the East from 28° 23' E. and to the North from 60° 34' N.

DOCUMENTS:

1 copy Master's Oath.
5 copies General Declaration.
6 copies Arrival Crew List.
6 copies Passenger List.
1 copy Stores List.
2 copies Crew's Effects Declaration.
1 copy Manifest of all Foreign Cargo onboard.
4 copies Manifest of Cargo for Discharge.
4 copies Dangerous Cargo Manifest.

PILOTAGE: Pilotage in the port area is carried out round the clock. It is compulsory for all types of vessels. Pilots board and disembark vessels in the following places:

1. At the port of Vyborg;
2. At the Reception Buoy, 5.1 cables Westward of the Northern point of the Mayachny Island (pilot station of the Vikhrevoy Island);
3. At the Brusnichnoe Lock berth or in the Lock itself.

In the case of rough weather when safe boarding or disembarkation of a Pilot at the Reception Buoy of the Vikhrevoy Island pilot station is impossible, a vessel, with the Master's consent, may follow a pilot boat, in the wake of it from the Reception Buoy up to the Large Transund Roadstead or as the case may be, from the Large Transund Roadstead up to the Reception Buoy.

The radio communication between pilot boat and vessel is effected through VHF radio, Channel 12.

In case the Master of a vessel does not agree to follow a pilot boat, he can:

(a) When approaching the port from the seaward lie at anchor at the Reception Buoy area until the weather changes for the better;

(b) When leaving the port for sea, anchor at the Large Transund Roadstead at a place indicated by the Port Administration and wait until Pilot is able to disembark at the Reception Buoy area.

Vessels approaching the port from seaward should order a Pilot at the same time as they notify the Port Administration of the time of their arrival at the point of meeting a pilot boat.

ANCHORAGES: There are 5 anchorages at Vyborg Fairway and at Vyborg Sea Channel areas.

Two are situated at the Large Transund Roadstead area, one – at the Small Transund Roadstead, one – S.E. and one – N.W. of the channel. Anchorage positions are shown on the chart.

The holding ground in the anchorages is sand, mud, stone and clay. The depths are from 11 m. to 17 m.

RESTRICTIONS: Vessels are allowed to enter or leave the port when winds do not exceed Force 6. During daytime, when a vessel's length is not more than 135 m. and her draft does not exceed 6.5 m. (at the Kronstadt datum);

At night time, when a vessel's length is not more than 125 m. and her draft does not exceed 6.0 m., and 105 m. and her draft does not exceed 6.2 m. (at the Kronstadt datum).

Before entering or leaving the port Masters of vessels having length and draft exceeding those indicated above must obtain the Harbour Master's permission.

HEALTH: International code quarantine signals to be shown on arrival. Vessels placed in quarantine will be instructed where to anchor by the pilot station.

RADIO: Radio contact can be established through the Vyborg Radio port radio station operating 24 hours daily on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	*Time of work*
Call Sign	*Working*	*Calling*		
UNN	500	500	A1A	H24
"Vyborg Radio"	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.6*(12)	156.6*(12)	F3E	H24
"Vyborg Pilot" (Pilot Station)	156.5*(10)	156*(10)	F3E	H24
"Vyborg Inflot"	156.8*(16)	156.8*(16)	F3E	H24
(Inflot Shipping Agency)	156.7*(14)	156.7*(14)	F3E	H24

*Frequencies are given in MHz.

Every vessel whilst proceeding along the Fairways and the Channel must have VHF radio-telephone in good working order, being able to ensure a reliable radio contact with the port of Vyborg and between vessels. If a vessel is not equipped with VHF radio, a Master can hire a VHF portable radio-set from a pilot station (via Pilot) for a fixed charge.

TUGS: Available, ordered through "Inflot". Compulsory for vessels over 80 m. LOA.

BERTHING: Can only be effected with Pilot on board. Berths of the port with depths alongside of up to 23.8 ft. are equipped to handle general and bulk cargoes, timber, etc., as well as passenger traffic. There are enclosed warehouses and open concrete floor sheds.

Berths are equipped with electric cranes of up to 20 tons capacity. There are floating cranes of up to 15 tons capacity and other cargo-handling equipment and machinery.

Berth No.	*Length (ft.)*	*Depth (ft.)*
1	405	14.6
6	343	23.3
7	426	22.6
8	426	23.0
9	426	23.0
10	426	23.0
11	246	20.0
12	492	22.3
13	492	23.8

MEDICAL: "Inflot" to be advised in advance if any medical attention required.

DENSITY: Salinity 5%.

FRESH WATER: Available. Can be supplied by pipelines at all berths or delivered by barges.

FUEL: Available by barge only.

REPAIRS: Minor repairs can be effected.

SURVEYORS: Surveyors and Cargo Inspectors may be ordered through "Inflot" Agency or through Cargo Receivers' Agents V/O "Soyuzvneshtrans" (telex 121 541).

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually opened and closed by crew. Can be operated by stevedores on request.

CUSTOMS ALLOWANCES: No control on board the vessel. All items taken off vessel subject to Customs control.

TIME: GMT plus 3 hours from 1st October until 31st March, GMT plus 4 hours from 1st April until 30th September.

HOLIDAYS: Cargo operations can be carried out on all holidays.

EMERGENCY CO-ORDINATION CENTRE: Salvage Division of the Baltic Steamship Co., St.Petersburg. Tel: 259-03-55, 216-99-65. Telex: 121 501.

TELEPHONE: Connection to vessels is not possible.

BANKS: Vneshtorgbank in St.Petersburg.

STORING: Under Customs control from trucks alongside at the berth. Bunkers from a tanker or from trucks.

SHORE LEAVE: Permitted subject to police control.

DEVELOPMENTS: Three berths at Vysotsk of total length of 360 m. and draft 7.5 m. are under construction.

Dredging and deepening to take place to allow vessels of 12,000 d.w.t. to enter.

AUTHORITY: The Port of Vyborg Authority, Ulitsa Yuzhny Val 1, 188900 Vyborg, Russia. *Tel:* 24750, 99677. *Contact:* V. Kirillov, Harbour Master of Vyborg Sea Port (Tel: 93145. Fax: 20477).

AGENT: The Port of Vyborg Maritime Agency "Inflot". Postal address: Inflot, P.O. Box 40, Vyborg, Russia. Cables: "Inflot Vyborg". Tel: 21400, 21735, 24818. Telex: 121521 Infl Su.

St. Christopher and Nevis

BASSETERRE, St.Kitts: 17.18 N. 62.43 W. (See Plan)

DOCUMENTS:
5 copies of Crew List.
6 copies of Passenger List.
1 copy High Duty Cargo List.
1 copy Crews' Personal Effects List.
1 copy Clearance from last port.
2 copies Ship's Stores List.
7 copies Manifest.
2 copies Bills of Lading.
1 copy Port Officer's Report.
1 copy Boarding Officer's Form.
1 copy Coast Guard Form.
1 copy Unmanifested Cargo.
1 copy Maritime Declaration of Health.

PILOTAGE: Pilot not compulsory, but all vessels of 100 g.r.t. and over have to pay piloting fees, even if service not used.

ANCHORAGES: Harbour at Basseterre is an open roadstead and safe anchorage will be found at a distance of 0.25 miles to 0.5 miles from the shore opposite the piers in the centre of the town.

RESTRICTIONS: None.

HEALTH: The Customs Boarding Officer boards all vessels on arrival at port and inspects the clearance from the last port. If there are no health problems the vessel is immediately granted Pratique. If there is suspected disease or fever on board pre-notification is recommended. If this is done the Customs Boarding Officer will have a Medical Officer with him when he boards the ship on arrival.

RADIO: Contact is through Saba Radio, call sign PJA.

VHF: Port and Police on Channel 16 throughout 24 hours.

BERTHING: Main Berth: Length 400 ft., depth 30 ft. Max. LOA 700 ft.

Ro/Ro Berth: Length of berth 385 ft. Depth of water 16.5 ft.

Sugar Loading: Mobile unloaders rated at 150 t.p.h.

Berthing on ships without thrusters is achieved against off-shore wind by using port anchor to snub in and swing stern onto quay. Mooring boat runs lines ashore and stern line to buoy, aft breast lines sent to bollard in middle of end of quay.

CRANES: 1 Grove TM 8100 mobile crane with capacity 100 tonnes. 1 container lifter capable of lifting 20 ft. and 40 ft. containers of up to 35 tonnes.

STEVEDORES: ETA should be advised 24 hours before arrival of vessel, also tonnage to be discharged and number of gangs required. Discharging rate: 15 tons per gang per hour on bags. 6 tons per gang per hour on general cargo.

MEDICAL: Advance notice if possible – hospital facilities available. Valid Vaccination Certificate for passengers disembarking but not for in transit or cruise ship passengers.

TANKERS: See "Shipmaster's Report".

DENSITY: 1025. Tides negligible (maximum 1 ft.).

FRESH WATER: Available alongside main berth and Ro-Ro Berth.

FUEL: Limited supply available by road tanker.

CONSULS: France, Netherlands, Spain, Trinidad and Tobago.

REPAIRS: The sugar factory has a well-equipped shop for machine, welding and maintenance work. They can assist with most engine repairs.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by stevedores.

CUSTOMS ALLOWANCES: Half pound tobacco or 200 cigarettes. Wine and/or Spirit, 1 bottle.

REPATRIATION: Crew changes and repatriation can be arranged.

AIRPORT: 2 miles from town with regular daily connections to Antigua and Puerto Rico where onward passages to Canada, U.S.A., Great Britain and Europe can be arranged.

TIME: GMT minus 4 hours; no alteration.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Queen's Birthday (date fixed by announcement annually); August Monday; Independence Day (September 19th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Police Tel: 911; Fire Tel: 911; Ambulance Tel: 911; Hospital Tel: 465-2551.

TELEPHONES: Available on request.

IDENTIFICATION CARDS: Not needed, however, crew members are liable to be checked by Port Authority on entry and exit by security guard.

SHIPMASTER'S REPORT: November 1989 (Updated 1994).

Chart: BA. Chart No. 487

Approaches: Basseterre is conspicuous with Fort Thomas to the West and deep water jetty to the East.

The Shell Berth is marked as lighter moorings on B.A. Chart No. 487 insert plan.

The jetties in the centre section of the shoreline are now in a state of disrepair.

Vessels approach the Shell Berth from the S.W. and at a broad angle.

Pilotage: Pilotage is optional at oil berths (Shell and Texaco), available from 0630 hrs., VHF facilities available.

Shell charge a standard pilotage fee if taken or not. Vessel should make an early request as port is busy early in the morning berthing ships alongside the deep water jetty.

It is advisable to take Pilot on first visit. The new Texaco Berth, S.E. of Shell Berth is a bit more awkward.

Anchorage: In bay as marked on plan insert of Chart No. 487, anchorage is fairly sheltered.

Berthing: Approach Shell Berth from S.W. at a broad angle, and let go starboard anchor, when port forward mooring buoy on port bow is about 30 m. away. We found 6.5 m. datum throughout length of vessel.

Mooring: The performance of boatmen varies. Joshua, the main harbour boatman, is reported to be very good, he has a launch with a blue hull and white cabin. If he is busy elsewhere, a person with an open fishing boat will attend. Joshua will normally be available to run boat service, but the other person will not be available.

Stern buoys and port head buoy have hooks.

The LPG hose mooring buoy is the Easterly of the set of hoses.

Cargo Operations: Shell have 100 tonnes' capacity LPG, Texaco have 50 tonnes' capacity at present.

Hose Buoys:	1.	East	LPG end of hose (LPH)
	2.		LPG end of pipe (LPP)
	3.		White oils
	4.	West	Road Bitumen (RC2)

Shell generally like 50/50 mix, unfortunately Trinidad generally supplies 70/30 mix which is not liked, as butane is used up too fast in cookers.

Submarine hose with 4 in. flange with valve, port side derrick. Pumping rate 50 t.p.h.

The Supervisor is very helpful, he boards on commencement and completion of operations.

Agent: The Supervisor often acts as Agent and Customs Official as no officials board the ship.

Clearance was given during discharge as we had to wait for Mr. Wade to find a Customs Officer.

Documents:
5 copies Crew List.
1 copy Unmanifested Cargo.
2 copies Ship's Bonded Stores.
2 copies Crew Manifest.
1 copy Maritime Declaration of Health.
1 copy Port Officer's Return.

General: Definitely no night pumping. Berthing operations commence at 0600 hrs.

Shell use VHF Channel 9, we lent them our Motorola.

The boatman can be hired for about U.S.$35.00 per day for shore leave.

Texaco have a new installation on the East side of the Bay with 2 mooring buoys (1 head, 1 stern), with ship's hose to dolphin, about 350 m. hose run to dolphin connection.

Texaco handle LPG and white oils.

The dolphin has a red flashing light (Lat. 17° 17.43' N., Long. 62° 42.7' W.), visible 3.5 miles.

Unable to raise Saba Radio from Basseterre. Contacted Barbados at 1330 hrs. GMT on Channel 1213.

The bay is fairly well sheltered, except for ground swell.

AUTHORITY: The St. Christopher – Nevis Port Authority, P.O.Box 963, Bird Rock, Basseterre, St. Kitts. *Tel:* (809) 465-8121, 8122, 8123. *FAX:* (809) 465-8124. *Contact:* The General Manager.

NOTES

Please also advise Shipping Guides Ltd.

St. Helena

JAMESTOWN: 15.56 S. 05.40 W. (See Plan)

PORT LIMITS: Within 3 miles radius of the port. Laytime commences at the anchorage.

DOCUMENTS:
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Maritime Declaration of Health.
2 copies of Ship's Manifest.
1 copy of Crew Declaration.
1 copy of Ship's Stores, including Shops and Bars.

PILOTAGE: No Official Pilot.

ANCHORAGES: The harbour consists of an open roadstead with anchorages shown on charts.

MAX. SIZE: Any size vessel can enter the port. Maximum tide variation approximately 1 m.

HEALTH: Pratique will be granted by the boarding party or by telegram from Port Health Officer. If disease or fever suspected, Port Health should be informed by telegram 24 hours before anchoring so that the necessary precautions can be taken.

RADIO: Frequencies: 500 and 461 kHz A1A. 12963.5 kHz A1A. Working Hours: 500 and 461 kHz – Weekdays from 0800 to 1600 GMT. Sundays and public holidays from 0800 to 1300 GMT. 12963.5 kHz – Daily, except Sundays from 1200 to 1300 GMT. Listening watch on Channel 5 and Channel 6.

Call sign for R/T working – St. Helena Radio. Frequencies: 2182 kHz H3E, 3162 kHz H3E, J3E and R3E. 4396.0, 8737.0 and 13125.0 kHz. J3E and R3E. Working hours: 2182 and 3162 kHz – Weekdays from 0800 to 1600 GMT. Sundays and public holidays from 0800 to 1300 GMT. 4396.0, 8737.0 and 13125 kHz are only opened on request and ships should answer on Channels 414, 807 and 1217 respectively.

SITOR – Radio Telex Service: SELCAL 4635, A/B 4635 CWZHH. Frequencies: 4212.5, 8423.5. 12584.0 and 16811.5 kHz F1B. Working Hours: Weekdays 1000 to 1030 GMT 16811.5 kHz, ship answers Channel 1610. 1030 to 1100 GMT 12584.0 kHz, ship answers Channel 1210. 1500 to 1530 GMT 16811.5 kHz, ship answers Channel 1610. 1530 to 1600 GMT 12584.0 kHz, ship answers Channel 1210. 4212.5 (Channel 405) can be opened on request.

Call sign for VHF working – St.Helena Radio. Frequencies: Channels 16, 10, 12, 14, 22, 24, 25, 26 and 27. Working Hours: Continuous.

VHF: Harbour Master has VHF facilities. Call sign "Port Control"; Channel 16, working Channel 14, Monday to Friday 0830 hrs. – 1600 hrs.

TUGS: None.

BERTHING: Vessels anchor in 18 – 20 fathoms of water.

CRANES: 2×10 ton and 1×30 ton heavy lift crane.

STEVEDORES: 48 hours' notice required by Agents Messrs. Solomon & Co. (St. Helena) plc, also particulars of tonnage of cargo.

MEDICAL: Harbour Master, via Agent, should be notified if medical attention is required.

TANKERS: No facilities available.

FRESH WATER: Delivered by floating pipeline at approximately 10 t.p.h.

FUEL: Limited stocks of diesel oil held for local use only.

CONSULS: French Consul. Appointed representatives for Denmark and Norway.

REPAIRS: Small repairs can be carried out (welding or turning, etc.).

DRY DOCKS: None.

SURVEYORS: Messrs. Solomon & Co. (St. Helena) plc as Cargo Surveyor Agents for Lloyd's.

CERTIFICATES: Vaccination Certificates required for all crew. Derat Certificate should be valid.

CUSTOMS ALLOWANCES: Duty free stores will be sealed by Customs. An amount may be levied to cover the duty payable on the duty free stores consumed by passengers and/or crew aboard a visiting vessel whilst in port.

CARGO GEAR: All discharge carried out by vessel's derricks into lighters and barges.

GANGWAY/DECK WATCHMEN: Supplied by Messrs. Solomon & Co. (St. Helena) plc. on request.

HATCHES: Opening/closing of hatches normally carried out by crew.

REPATRIATION: No facilities for crew changes. Only for those left behind for hospitalisation.

AIRPORT: No airport on St. Helena.

TIME: GMT throughout the year.

HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; St. Helena Day (21st May); Whit Monday; Queen's Official Birthday; August Bank Holiday; Christmas Day (25th December); Boxing Day (26th December). Cargo work can be arranged except on Christmas holidays.

POLICE/FIRE/AMBULANCE: Police and Fire, Tel: 999. General Enquiries, Tel: 2626. Ambulance, Tel: 2500. Fax: (290) 2530.

SHORE LEAVE: No restrictions unless imposed by Immigration Department.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No Seamen's Club, but telephone – Payphones (card/coin) available at the Post Office and throughout the Island. There is a Public Fax Bureau situated at the "Moon" on Napoleon Street near the Post Office.

Anglican and Catholic church. Sports arranged through agents.

CURRENCY: Own currency, pounds on par with UK Sterling. Will accept UK notes, not coins.

DELAYS: No delays in berthing. Loading or discharge can be delayed due to bad weather.

SHIPMASTER'S REPORT: November 1996.

Vessel Data:
Type of vessel: Chemical Tanker.
Gross tonnage: 4,988.
LOA: 115.2 m.
Breadth: 18.0 m.
Main engine: 4,560 h.p.
Bowthruster: 620 h.p.
Propeller: Right-handed controllable pitch propeller acting like a left-handed propeller on astern (stern turns to starboard).
Draft at time: Forward 6.85 m. Aft 7.60 m.

Approach: The approach from the N.W. caused no problems. The island was sighted at a distance of about 32 nautical miles.

Weather at the time: Fair, wind S.E., Force 5, overcast sky and moderate S.E.'ly sea and swell. As soon as a lee from the island was experienced, the sea state became smooth.

VHF contact with Saint Helena Radio (Call sign ZHH) could be made at long range.

Port Control called about 3 hours before arrival on VHF Channel 16 for confirmation.

Pilotage is not available.

Tugs are not available.

The metric Chart B.A. No. 1771 provides coverage for the approach to the island as well as for Rupert's and James Bays.

For the approach to Rupert's Bay, however, a copy of the old fathom Chart B.A. No. 1769 was used as a reference, since that chart provided more details and a better scale.

Both the yellow mooring buoy and the orange floating cargo hose were sighted very early, but except for some small orange fishing buoys, no other buoys were sighted, although 4 buoys in total are charted on B.A. No. 1771, and mentioned in the Admiralty Sailing Directions for Rupert's Bay.

The yellow mooring buoy, however, proved to be in the position as charted on B.A. No. 1771, i.e. Lat. 15° 55.02' S., Long. 5° 42.82' W.

Approach course to Rupert's Bay 123°(T) with the conspicuous Munden's Point dead ahead.

Speed about 2 knots, which is minimum speed for steering. At a distance of 2 cables off Munden's Point, course was altered to a heading of 090°(T). As soon as Munden's Point was on starboard beam (distance 0.7 cables), the vessel was turned to port to a heading of 042°(T), parallel indexing at Chubb's Point, distance 0.5 cables.

We dropped port anchor as soon as the distance from stern to Chubb's Point was 0.4 cables. Manoeuvring at dead slow ahead, P/S rudder, the stern swinging free from the obstructions/rocks near Chubb's Point, meanwhile slacking port anchor chain till 3 shackles on the windlass.

The 2 yellow leading beacons, as charted on B.A. No. 1771 and mentioned in the Admiralty Sailing Directions, were hardly visible, so of no use while positioning the vessel.

With a heading of about 000°(T), we dropped starboard anchor, while pitch was set to half astern, in order to swing the vessel in to position, i.e. on a heading of 282°(T). Slacking starboard anchor chain till 3 shackles on the windlass, whereupon the vessel had the yellow mooring buoy astern somewhat on starboard side. Both anchor chains were now slacked simultaneously.

When the vessel was about 50 m. off the buoy, 2 stern lines were given out from port quarter to the mooring boat "Wide Awake", in order to position the vessel towards the yellow mooring buoy. After these 2 lines, 2 more stern lines were given out from starboard quarter, thus preventing the stern swinging too much to starboard (the effect of having the pitch on astern).

The vessel ended up with 5 shackles in the water on both anchors and 4 stern lines tight, with the yellow mooring buoy dead astern at a distance of about 15 m., in position Chubb's Point bearing and distance 220°(T), 0.11 nautical miles off, heading 285°(T).

In Port: During stay in port, the vessel experienced good weather and was laying quietly moored at anchor. We did not experience the high swell as mentioned in the Admiralty Sailing Directions.

Authorities, Agent, Surveyor and Loading Master boarded upon arrival at 1810 hrs.

Discharge operations commenced 0600 hrs. the next day.

The floating hose (at the shoreside supported by a gantry crane, extending approximately 10 m. over the water) was connected by a shore gang. The hose (diameter 3 in.) had a non-return valve at its free end. Reducers (3 in. – 6 in.) were provided by shore, since the hose had a special type of lock coupling.

Maximum discharge pressure was 6 bar at shore's request.

After discharge of the first parcel, the hose was blown from the vessel to the shore in about 5 minutes.

Discharge operations took a little less than 12 hours. A shore watchman with radio stayed on board during the whole operation.

Documents:
Crew List.
Cargo Manifest.
Transit Cargo Manifest.
Maritime Health Declaration.

The Authorities were very friendly and did not ask for Personnel Effects List or any certificates.

AUTHORITY: Harbour Master, The Wharf, Jamestown, Island of St. Helena, South Atlantic Ocean. *Tel:* (290) 2287, 2750. *Telex:* 4202 Govt Hl. *FAX:* (290) 2598 or 2297. *Contact:* D.E. Bennett, Harbour Master.

St. Christopher and Nevis

BASSETERRE, St.Kitts: 17.18 N. 62.43 W. (See Plan)

DOCUMENTS:
5 copies of Crew List.
6 copies of Passenger List.
1 copy High Duty Cargo List.
1 copy Crews' Personal Effects List.
1 copy Clearance from last port.
2 copies Ship's Stores List.
7 copies Manifest.
2 copies Bills of Lading.
1 copy Port Officer's Report.
1 copy Boarding Officer's Form.
1 copy Coast Guard Form.
1 copy Unmanifested Cargo.
1 copy Maritime Declaration of Health.

PILOTAGE: Pilot not compulsory, but all vessels of 100 g.r.t. and over have to pay piloting fees, even if service not used.

ANCHORAGES: Harbour at Basseterre is an open roadstead and safe anchorage will be found at a distance of 0.25 miles to 0.5 miles from the shore opposite the piers in the centre of the town.

RESTRICTIONS: None.

HEALTH: The Customs Boarding Officer boards all vessels on arrival at port and inspects the clearance from the last port. If there are no health problems the vessel is immediately granted Pratique. If there is suspected disease or fever on board pre-notification is recommended. If this is done the Customs Boarding Officer will have a Medical Officer with him when he boards the ship on arrival.

RADIO: Contact is through Saba Radio, call sign PJA.

VHF: Port and Police on Channel 16 throughout 24 hours.

BERTHING: Main Berth: Length 400 ft., depth 30 ft. Max. LOA 700 ft.
Ro/Ro Berth: Length of berth 385 ft. Depth of water 16.5 ft.
Sugar Loading: Mobile unloaders rated at 150 t.p.h.

Berthing on ships without thrusters is achieved against off-shore wind by using port anchor to snub in and swing stern onto quay. Mooring boat runs lines ashore and stern line to buoy, aft breast lines sent to bollard in middle of end of quay.

CRANES: 1 Grove TM 8100 mobile crane with capacity 100 tonnes. 1 container lifter capable of lifting 20 ft. and 40 ft. containers of up to 35 tonnes.

STEVEDORES: ETA should be advised 24 hours before arrival of vessel, also tonnage to be discharged and number of gangs required. Discharging rate: 15 tons per gang per hour on bags. 6 tons per gang per hour on general cargo.

MEDICAL: Advance notice if possible – hospital facilities available. Valid Vaccination Certificate for passengers disembarking but not for in transit or cruise ship passengers.

TANKERS: See "Shipmaster's Report".

DENSITY: 1025. Tides negligible (maximum 1 ft.).

FRESH WATER: Available alongside main berth and Ro-Ro Berth.

FUEL: Limited supply available by road tanker.

CONSULS: France, Netherlands, Spain, Trinidad and Tobago.

REPAIRS: The sugar factory has a well-equipped shop for machine, welding and maintenance work. They can assist with most engine repairs.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by stevedores.

CUSTOMS ALLOWANCES: Half pound tobacco or 200 cigarettes. Wine and/or Spirit, 1 bottle.

REPATRIATION: Crew changes and repatriation can be arranged.

AIRPORT: 2 miles from town with regular daily connections to Antigua and Puerto Rico where onward passages to Canada, U.S.A., Great Britain and Europe can be arranged.

TIME: GMT minus 4 hours; no alteration.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Queen's Birthday (date fixed by announcement annually); August Monday; Independence Day (September 19th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Police Tel: 911; Fire Tel: 911; Ambulance Tel: 911; Hospital Tel: 465-2551.

TELEPHONES: Available on request.

IDENTIFICATION CARDS: Not needed, however, crew members are liable to be checked by Port Authority on entry and exit by security guard.

SHIPMASTER'S REPORT: November 1989 (Updated 1994).

Chart: BA. Chart No. 487

Approaches: Basseterre is conspicuous with Fort Thomas to the West and deep water jetty to the East.

The Shell Berth is marked as lighter moorings on B.A. Chart No. 487 insert plan.

The jetties in the centre section of the shoreline are now in a state of disrepair.

Vessels approach the Shell Berth from the S.W. and at a broad angle.

Pilotage: Pilotage is optional at oil berths (Shell and Texaco), available from 0630 hrs., VHF facilities available.

Shell charge a standard pilotage fee if taken or not. Vessel should make an early request as port is busy early in the morning berthing ships alongside the deep water jetty.

It is advisable to take Pilot on first visit. The new Texaco Berth, S.E. of Shell Berth is a bit more awkward.

Anchorage: In bay as marked on plan insert of Chart No. 487, anchorage is fairly sheltered.

Berthing: Approach Shell Berth from S.W. at a broad angle, and let go starboard anchor, when port forward mooring buoy on port bow is about 30 m. away. We found 6.5 m. datum throughout length of vessel.

Mooring: The performance of boatmen varies. Joshua, the main harbour boatman, is reported to be very good, he has a launch with a blue hull and white cabin. If he is busy elsewhere, a person with an open fishing boat will attend. Joshua will normally be available to run boat service, but the other person will not be available.

Stern buoys and port head buoy have hooks.

The LPG hose mooring buoy is the Easterly of the set of hoses.

Cargo Operations: Shell have 100 tonnes' capacity LPG, Texaco have 50 tonnes' capacity at present.

Hose Buoys: 1. East LPG end of hose (LPH)
2. LPG end of pipe (LPP)
3. White oils
4. West Road Bitumen (RC2)

Shell generally like 50/50 mix, unfortunately Trinidad generally supplies 70/30 mix which is not liked, as butane is used up too fast in cookers.

Submarine hose with 4 in. flange with valve, port side derrick. Pumping rate 50 t.p.h.

The Supervisor is very helpful, he boards on commencement and completion of operations.

Agent: The Supervisor often acts as Agent and Customs Official as no officials board the ship.

Clearance was given during discharge as we had to wait for Mr. Wade to find a Customs Officer.

Documents:
5 copies Crew List.
1 copy Unmanifested Cargo.
2 copies Ship's Bonded Stores.
2 copies Crew Manifest.
copy Maritime Declaration of Health.
copy Port Officer's Return.

General: Definitely no night pumping. Berthing operations commence at 0600 hrs.

Shell use VHF Channel 9, we lent them our Motorola.

The boatman can be hired for about U.S.$35.00 per day for shore leave.

Texaco have a new installation on the East side of the Bay with 2 mooring buoys (1 head, 1 stern), with ship's hose to dolphin, about 350 m. hose run to dolphin connection.

Texaco handle LPG and white oils.

The dolphin has a red flashing light (Lat. 17° 17.43' N., Long. 62° 42.7' W.), visible 3.5 miles.

Unable to raise Saba Radio from Basseterre. Contacted Barbados at 1330 hrs. GMT on Channel 1213.

The bay is fairly well sheltered, except for ground swell.

AUTHORITY: The St. Christopher – Nevis Port Authority, P.O.Box 963, Bird Rock, Basseterre, St. Kitts. *Tel:* (809) 465-8121, 8122, 8123. *FAX:* (809) 465-8124. *Contact:* The General Manager.

NOTES

Please also advise Shipping Guides Ltd.

St. Helena

JAMESTOWN: 15.56 S. 05.40 W. **(See Plan)**

PORT LIMITS: Within 3 miles radius of the port. Laytime commences at the anchorage.

DOCUMENTS:
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Maritime Declaration of Health.
2 copies of Ship's Manifest.
1 copy of Crew Declaration.
1 copy of Ship's Stores, including Shops and Bars.

PILOTAGE: No Official Pilot.

ANCHORAGES: The harbour consists of an open roadstead with anchorages shown on charts.

MAX. SIZE: Any size vessel can enter the port. Maximum tide variation approximately 1 m.

HEALTH: Pratique will be granted by the boarding party or by telegram from Port Health Officer. If disease or fever suspected, Port Health should be informed by telegram 24 hours before anchoring so that the necessary precautions can be taken.

RADIO: Frequencies: 500 and 461 kHz A1A. 12963.5 kHz A1A. Working Hours: 500 and 461 kHz – Weekdays from 0800 to 1600 GMT. Sundays and public holidays from 0800 to 1300 GMT. 12963.5 kHz – Daily, except Sundays from 1200 to 1300 GMT. Listening watch on Channel 5 and Channel 6.

Call sign for R/T working – St. Helena Radio. Frequencies: 2182 kHz H3E, 3162 kHz H3E, J3E and R3E. 4396.0, 8737.0 and 13125.0 kHz. J3E and R3E. Working hours: 2182 and 3162 kHz – Weekdays from 0800 to 1600 GMT. Sundays and public holidays from 0800 to 1300 GMT. 4396.0, 8737.0 and 13125 kHz are only opened on request and ships should answer on Channels 414, 807 and 1217 respectively.

SITOR – Radio Telex Service: SELCAL 4635, A/B 4635 CWZHH. Frequencies: 4212.5, 8423.5. 12584.0 and 16811.5 kHz F1B. Working Hours: Weekdays 1000 to 1030 GMT 16811.5 kHz, ship answers Channel 1610. 1030 to 1100 GMT 12584.0 kHz, ship answers Channel 1210. 1500 to 1530 GMT 16811.5 kHz, ship answers Channel 1610. 1530 to 1600 GMT 12584.0 kHz, ship answers Channel 1210. 4212.5 (Channel 405) can be opened on request.

Call sign for VHF working – St.Helena Radio. Frequencies: Channels 16, 10, 12, 14, 22, 24, 25, 26 and 27. Working Hours: Continuous.

VHF: Harbour Master has VHF facilities. Call sign "Port Control"; Channel 16, working Channel 14, Monday to Friday 0830 hrs. – 1600 hrs.

TUGS: None.

BERTHING: Vessels anchor in 18 – 20 fathoms of water.

CRANES: 2×10 ton and 1×30 ton heavy lift crane.

STEVEDORES: 48 hours' notice required by Agents Messrs. Solomon & Co. (St. Helena) plc, also particulars of tonnage of cargo.

MEDICAL: Harbour Master, via Agent, should be notified if medical attention is required.

TANKERS: No facilities available.

FRESH WATER: Delivered by floating pipeline at approximately 10 t.p.h.

FUEL: Limited stocks of diesel oil held for local use only.

CONSULS: French Consul. Appointed representatives for Denmark and Norway.

REPAIRS: Small repairs can be carried out (welding or turning, etc.).

DRY DOCKS: None.

SURVEYORS: Messrs. Solomon & Co. (St. Helena) plc as Cargo Surveyor Agents for Lloyd's.

CERTIFICATES: Vaccination Certificates required for all crew. Derat Certificate should be valid.

CUSTOMS ALLOWANCES: Duty free stores will be sealed by Customs. An amount may be levied to cover the duty payable on the duty free stores consumed by passengers and/or crew aboard a visiting vessel whilst in port.

CARGO GEAR: All discharge carried out by vessel's derricks into lighters and barges.

GANGWAY/DECK WATCHMEN: Supplied by Messrs. Solomon & Co. (St. Helena) plc. on request.

HATCHES: Opening/closing of hatches normally carried out by crew.

REPATRIATION: No facilities for crew changes. Only for those left behind for hospitalisation.

AIRPORT: No airport on St. Helena.

TIME: GMT throughout the year.

HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; St. Helena Day (21st May); Whit Monday; Queen's Official Birthday; August Bank Holiday; Christmas Day (25th December); Boxing Day (26th December). Cargo work can be arranged except on Christmas holidays.

POLICE/FIRE/AMBULANCE: Police and Fire, Tel: 999. General Enquiries, Tel: 2626. Ambulance, Tel: 2500. Fax: (290) 2530.

SHORE LEAVE: No restrictions unless imposed by Immigration Department.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No Seamen's Club, but telephone – Payphones (card/coin) available at the Post Office and throughout the Island. There is a Public Fax Bureau situated at the "Moon" on Napoleon Street near the Post Office.

Anglican and Catholic church. Sports arranged through agents.

CURRENCY: Own currency, pounds on par with UK Sterling. Will accept UK notes, not coins.

DELAYS: No delays in berthing. Loading or discharge can be delayed due to bad weather.

SHIPMASTER'S REPORT: November 1996.

Vessel Data:

Type of vessel:	Chemical Tanker.
Gross tonnage:	4,988.
LOA:	115.2 m.
Breadth:	18.0 m.
Main engine:	4,560 h.p.
Bowthruster:	620 h.p.
Propeller:	Right-handed controllable pitch propeller acting like a left-handed propeller on astern (stern turns to starboard).
Draft at time:	Forward 6.85 m. Aft 7.60 m.

Approach: The approach from the N.W. caused no problems. The island was sighted at a distance of about 32 nautical miles.

Weather at the time: Fair, wind S.E., Force 5, overcast sky and moderate S.E.'ly sea and swell. As soon as a lee from the island was experienced, the sea state became smooth.

VHF contact with Saint Helena Radio (Call sign ZHH) could be made at long range.

Port Control called about 3 hours before arrival on VHF Channel 16 for confirmation.

Pilotage is not available.

Tugs are not available.

The metric Chart B.A. No. 1771 provides coverage for the approach to the island as well as for Rupert's and James Bays.

For the approach to Rupert's Bay, however, a copy of the old fathom Chart B.A. No. 1769 was used as a reference, since that chart provided more details and a better scale.

Both the yellow mooring buoy and the orange floating cargo hose were sighted very early, but except for some small orange fishing buoys, no other buoys were sighted, although 4 buoys in total are charted on B.A. No. 1771, and mentioned in the Admiralty Sailing Directions for Rupert's Bay.

The yellow mooring buoy, however, proved to be in the position as charted on B.A. No. 1771, i.e. Lat. 15° 55.02' S., Long. 5° 42.82' W.

Approach course to Rupert's Bay 123°(T) with the conspicuous Munden's Point dead ahead.

Speed about 2 knots, which is minimum speed for steering. At a distance of 2 cables off Munden's Point, course was altered to a heading of 090°(T). As soon as Munden's Point was on starboard beam (distance 0.7 cables), the vessel was turned to port to a heading of 042°(T), parallel indexing at Chubb's Point, distance 0.5 cables.

We dropped port anchor as soon as the distance from stern to Chubb's Point was 0.4 cables. Manoeuvring at dead slow ahead, P/S rudder, the stern swinging free from the obstructions/rocks near Chubb's Point, meanwhile slacking port anchor chain till 3 shackles on the windlass.

The 2 yellow leading beacons, as charted on B.A. No. 1771 and mentioned in the Admiralty Sailing Directions, were hardly visible, so of no use while positioning the vessel.

With a heading of about 000°(T), we dropped starboard anchor, while pitch was set to half astern, in order to swing the vessel in to position, i.e. on a heading of 282°(T). Slacking starboard anchor chain till 3 shackles on the windlass, whereupon the vessel had the yellow mooring buoy astern somewhat on starboard side. Both anchor chains were now slacked simultaneously.

When the vessel was about 50 m. off the buoy, 2 stern lines were given out from port quarter to the mooring boat "Wide Awake", in order to position the vessel towards the yellow mooring buoy. After these 2 lines, 2 more stern lines were given out from starboard quarter, thus preventing the stern swinging too much to starboard (the effect of having the pitch on astern).

The vessel ended up with 5 shackles in the water on both anchors and 4 stern lines tight, with the yellow mooring buoy dead astern at a distance of about 15 m., in position Chubb's Point bearing and distance 220°(T), 0.11 nautical miles off, heading 285°(T).

In Port: During stay in port, the vessel experienced good weather and was laying quietly moored at anchor. We did not experience the high swell as mentioned in the Admiralty Sailing Directions.

Authorities, Agent, Surveyor and Loading Master boarded upon arrival at 1810 hrs.

Discharge operations commenced 0600 hrs. the next day.

The floating hose (at the shoreside supported by a gantry crane, extending approximately 10 m. over the water) was connected by a shore gang. The hose (diameter 3 in.) had a non-return valve at its free end. Reducers (3 in. – 6 in.) were provided by shore, since the hose had a special type of lock coupling.

Maximum discharge pressure was 6 bar at shore's request.

After discharge of the first parcel, the hose was blown from the vessel to the shore in about 5 minutes.

Discharge operations took a little less than 12 hours. A shore watchman with radio stayed on board during the whole operation.

Documents:
Crew List.
Cargo Manifest.
Transit Cargo Manifest.
Maritime Health Declaration.

The Authorities were very friendly and did not ask for Personnel Effects List or any certificates.

AUTHORITY: Harbour Master, The Wharf, Jamestown, Island of St. Helena, South Atlantic Ocean. *Tel:* (290) 2287, 2750. *Telex:* 4202 Govt Hl. *FAX:* (290) 2598 or 2297. *Contact:* D.E. Bennett, Harbour Master.

St. Lawrence Seaway

ST. LAWRENCE SEAWAY (See Plan)

DOCUMENTS: Vessels intending to transit the St.Lawrence Seaway from Montreal, Lat. 45° 32' N., Long. 73° 32' W., to abeam of Long Point in Lake Erie, Lat. 42° 30' N., Long. 80° 03' W., must be pre-cleared by a representative, who shall assume responsibility to the St.Lawrence Seaway Authority for payment of all tolls and charges to be incurred.

Application for Pre-Clearance Form S-VM 429-07-90 may be obtained from the St. Lawrence Seaway Authority, 202 Pitt Street, Cornwall, Ontario, K6J 3P7, or from the St. Lawrence Seaway Development Corporation, P.O.Box 520, 180 Andrews Street, Massena, N.Y. 13662-1763.

In addition, the St. Lawrence Seaway Authority requires 1 Transit Declaration Form, and for cargo to or from overseas 1 unfreighted copy of the complete manifest.

A Ballast Water Exchange Report will be presented to the Master by the Pilot who boards at Les Escoumins. This should be completed and given to the Lockmaster prior to the ship departing St.Lambert Lock.

In first U.S. port, a "Traveller" is made up by the Customs Inspector with the following documents:

2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form 1-418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:

5 sets Manifest of Cargo for that port.
The Traveller and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 Sets Bills of Lading.
3 copies Stowage Plan.

Vessels navigating St. Lawrence Seaway are required to complete applications for:

Certificate of Financial Responsibility,
Certificate of Insurance, Form FMC 225,
Oil Discharge Assurity Bond, Form FMC 226,
Guarantee in respect of liability for discharging oil, Form FMC 227.

These applications have to be filed with the Secretary of the Federal Maritime Commission before a certificate is issued. The oil pollution liability certificate should be retained aboard the vessel.

ICE ADVISORY SERVICE: Ships inbound from seaward between December 15th and April 15th should advise the Ice Information Officer, Sydney, 36 hours prior to entering Cabot Strait, stating their position, destination, whether loaded or in ballast. This procedure will facilitate the passing of ice information to the ship as necessary. Ice information is also available from radio stations at Halifax, Seven Islands, Wiringate and Grindstone. The Canadian Broadcasting Corporation Maritime Network also broadcasts ice information daily during the Winter navigation season. Supplementary ice information may also be obtained from the Canadian Marine Service Icebreakers.

During the ice season, radio broadcasts of ice information are made twice daily from Marine radio stations as follows: Cape Race, Newfoundland; Fox River, Quebec; Mont-Joli, Quebec; Halifax, Nova Scotia.

PILOTAGE: The first Pilot Station when entering the St. Lawrence River is at Les Escoumins, 80 miles West of Pointe au Pere. This Pilot will take the ship to the Quebec Pilot station 121 miles to the West. Off Quebec a new Pilot boards to take the ship to Trois Rivieres, where there is another change of Pilot for the remaining trip to Montreal.

ANCHORAGES: *Anchorage Areas:* Except in an emergency, or unless authorised to do so by the Vessel Traffic Controller, no vessel shall drop anchor in any part of the Seaway, except in the following designated anchorage areas:

(a) Point Fortier (Lake St. Louis).
(b) Melocheville (Beauharnois Canal).
(c) St. Zotique, Dickerson Island and Stonehouse Point (Lake St. Francis).
(d) Wilson Hill Island and Morrisburg (Lake St. Lawrence).
(e) Prescott and Union Park (St. Lawrence River).
(f) Off Port Weller (Lake Ontario).
(g) Off Port Colborne (Lake Erie).

RESTRICTIONS: The average navigation season in the Montreal-Lake Ontario section of the St. Lawrence River is from April 1st to December 15th.

Montreal to Lake Ontario – Lock Nos. 1 to 7: Length between the breast wall and ship arrester 233.48 m., width 24.38 m., depth 9.14 m., channel depth 8.23 m.

Welland Canal – Lock Nos. 1 to 7: Length between the breast wall and ship arrester 233.47 m. to 234.21 m. Lock No. 8: Length 365.76 m., width 24.38 m., depth 9.14 m., channel depth 8.23 m.

Sault Ste. Marie – Canadian Lock: Due to a major structural failure in July 1987, the Canadian Lock at Sault Ste. Marie will be closed until further notice. Mariners are advised to use the U.S. Locks.

Information for U.S. Locks may be obtained from U.S. Corps of Engineers, Detroit District.

Speed Limits: 9.0 knots upbound, 10.5 knots downbound in the Beauharnois Canal; 8 knots in the Welland Bypass Channel and 6 knots in all other canals. The speed limits vary from 8.5 knots to a maximum 13 knots in remaining sections of the St. Lawrence River. Maximum speed limits for vessels in excess of 12 m. in length are contained in the Seaway Handbook. Changes are indicated through Seaway Notices.

For information relating to speed limits, on the Detroit, St. Clair and St. Mary's rivers contact the U.S. Coast Guard, Cleveland, Ohio or the Canadian Coast Guard, Sarnia, Ontario.

MAX. SIZE: Length 222.5 m., beam 23.16 m., draft 79.2 dm. Masts must not exceed 35.5 m. above water level. Other limiting dimensions are contained in the Seaway Regulations.

HEALTH: All ocean-going vessels must obtain Free Pratique before entering the Seaway. Vessels entering the Seaway direct may receive quarantine inspection and clearance from the Canadian Authorities at Montreal while at anchor awaiting entrance to the Seaway.

RADIO: *Notice of Arrival:* Master must give at least 24 hours' notice to Commander, 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours' notice of ETA at first U.S. discharge port is required.

St. Lawrence Seaway Authority: Every vessel shall provide at least 24 hours' notice of arrival to the nearest Seaway Station, prior to an initial transit or in case reinspection of the vessel is required.

Calling In requirements are detailed in the Seaway Regulations.

Great Lakes: It is recommended that vessels within radius of 30 nautical miles of a shore station use their FM transmitting and receiving equipment to ensure better connections. This pertains especially to vessels at anchor or in the proximity of a port or berth.

Radio Stations: Buffalo, New York, marine operator. Port Burwell, Ontario, marine operator. Geneva, Ohio, marine operator. Lorain, Ohio, marine operator. Rogers City, Michigan, marine operator.

VHF: *Listening Watch and Notice of Arrival:*

(1) Vessels shall be on radio listening watch on the applicable assigned frequency while within a Seaway traffic control sector as shown on the General Seaway Plan, and shall give notice of arrival in the manner prescribed in "Calling-In" (see below) upon reaching any designated calling in point.

(2) Notice of arrival shall be deemed to have been given when it is acknowledged by a Seaway station.

Assigned Frequencies: The Seaway stations operate on the following assigned VHF frequencies:

(a) 156.8 MHz (Channel 16): Distress and calling.
(b) 156.7 MHz (Channel 14): Working (Canadian stations in Sector 1 and the Welland Canal).
(c) 156.65 MHz (Channel 13): Working (U.S. stations in Lake Ontario and Sector 4 of the River).
(d) 156.6 MHz (Channel 12): Working (U.S. stations in Sector 2 of the River), and
(e) 156.55 MHz (Channel 11): Working (Canadian stations in Sector 3, Lake Ontario and Lake Erie).

Seaway Stations: The Seaway stations are located as follows:

VDX20 (Seaway Beauharnois)	Upper Beauharnois Lock	Traffic Control Sector 1
KEF (Seaway Eisenhower)	Eisenhower Lock	Traffic Control Sector 2
VDX21 (Seaway Iroquois)	Iroquois Lock	Traffic Control Sector 3
WAG (Seaway Clayton)	Clayton, N.Y.	Traffic Control Sector 4
WAG (Seaway Sodus)	Sodus, N.Y.	Traffic Control Sector 4
VDX72 (Seaway Newcastle)	Port Hope, Ontario	Traffic Control Sector 5
VDX70 (Seaway Newcastle)	Port Weller, Ontario	Traffic Control Sector 5
VDX22 (Seaway Welland)	St.Catharines, Ontario	Traffic Control Sector 6
VDX68 (Seaway Long Point)	Port Colborne, Ontario	Traffic Control Sector 7

Radio Procedure: Every vessel shall use the channels of communication in each control sector as listed below:

	Control Sector		*Channels of Communication*		
Station	*No.*	*Sector Limits*	*Call in*	*Work*	*Listening Watch*
Seaway Beauharnois	1	C.I.P. No. 2 to C.I.P. No. 6-7	14	14	14
Seaway Eisenhower	2	C.I.P. No. 6-7 to C.I.P. No. 10-11	12	12	12
Seaway Iroquois	3	C.I.P. No. 10-11 to Crossover Island	11	11	11
Seaway Clayton	4	Crossover Island to Cape Vincent	13	13	13
Seaway Sodus	4	Cape Vincent to Mid Lake Ontario	13	13	16
Seaway Newcastle	5	Mid Lake Ontario to C.I.P. No. 15	11	11	16
Seaway Welland	6	C.I.P. No. 15 to C.I.P. No. 16	14	14	14
Seaway Long Point	7	C.I.P. No. 16 to Long Point	11	11	16

Calling-In:

(1) Every vessel, intending to transit or in transit, shall report on the assigned frequency to the designated Seaway station when opposite any calling-in point or check point (indicated on the General Seaway Plan) and, when reporting, shall give the information indicated in Schedule III (Not reproduced).

(2) Changes in information provided under subsection (1), including updated ETAs that vary from the ETAs provided under the subsection by 30 minutes or more, shall be reported to the appropriate Seaway station.

(3) A downbound vessel in St. Lambert Lock shall switch to Channel 10 (156.5 MHz) for a traffic report from Montreal Vessel Traffic Management Centre.

(4) After obtaining the situation report referred to in subsection (3), the downbound vessel shall return to guarding Channel 14 (156.7 MHz) and remain on that channel until it is clear of St. Lambert Lock chamber.

(5) When the downbound vessel has cleared the downstream end of the lower approach wall of St. Lambert Lock, the Master or Pilot of the vessel shall call "Seaway Beauharnois" and request permission to switch to Channel 10 (156.5 MHz).

(6) Seaway Beauharnois shall grant the permission requested pursuant to subsection (5), and advise the downbound vessel of any upbound traffic that may be cleared for Seaway entry but not yet at C.I.P. 2.

(7) In the event of an expected meeting of vessels between the downstream end of the lower approach wall and C.I.P. 2, the downbound vessel shall remain on Channel 14 (156.7 MHz) until the meeting has been completed.

(8) After the meeting, the downbound vessel shall call "Seaway Beauharnois" before switching to Channel 10 (156.5 MHz).

Communication – Ports, Docks and Anchorages:

(1) Every vessel entering or leaving a lake port shall report to the appropriate Seaway station at the following check points:
(a) Toronto and Hamilton: 0.87 nautical miles outside of harbour limits; and
(b) other lake ports: When crossing the harbour entrance.

(2) Every vessel arriving at a port, dock or anchorage shall report to the appropriate Seaway station, giving an estimated time of departure if possible, and at least 4 hours prior to departure, every vessel departing from a port, dock or anchorage shall report in the same way, giving its destination and the expected time of arrival at the next check point.

(3) Every vessel departing from a port, dock or anchorage shall report to the appropriate Seaway station its destination and the expected time of arrival at the next check point and, if carrying dangerous cargo as indicated on the manifest, the nature, quantity, IMO classification and stowage location of that cargo.

TUGS: Whistle signals differ from those in international usage and are as follows:

1. Ship to Tug: 1 Long and 1 short (– ·) = ship ready to proceed, O.K. or all right. 1 Long and 2 Short (– · ·) = let go the bow tow-line. 1 Long and 3 Short (– · · ·) = let go the stern tow-line.
2. Both Ship to Tug and Tug to Ship: 1 Short(·) = work propeller ahead when stopped, *or,* stop propeller when working, either ahead or astern. 2 Short (· ·) = work propeller astern. 3 Short (· · ·) = slow down or check. 4 Short (· · · ·) = work propeller strong in the same direction it is working at the time the signal is blown. 5 or more Short blasts (· · · · ·) = the standard danger signal.

SEAWAY EQUIPMENT: *Radio-telephone Equipment:* All vessels, other than pleasure craft of less than 19.80 m. in overall length, must be equipped with VHF radio telephone equipment, in addition to the FM equipment otherwise required. The radio transmitters must have sufficient power output to enable the vessels to communicate with Authority Stations from a distance of 48 km. and must be fitted to operate from the wheelhouse and to communicate on 156.55 (Channel 11), 156.6 (Channel 12), 156.65 (Channel 13), 156.7 (Channel 14) and 156.8 MHz (Channel 16).

Stern Anchors: Every vessel of more than 110 m., the keel of which was laid after January 1, 1975 is required to be equipped with a stern anchor.

Propeller Direction Alarms: Every vessel of 1,600 g.r.t. or more shall be equipped with:
(a) propeller direction and shaft r.p.m. indicators located in the wheelhouse and the engine room; and
(b) visible and audible wrong-way propeller direction alarms located in the wheelhouse and the engine room, unless the vessel is fitted with a device which renders it impossible to operate engines against orders from the bridge telegraph.

Pitch Indicators and Alarms: Every vessel of 1,600 g.r.t. or more equipped with a variable pitch propeller shall be equipped with:
(a) A pitch indicator in the wheelhouse and the engine room; and
(b) effective April 1, 1984, visible and audible pitch alarms in the wheelhouse and engine room to indicate wrong pitch.

Steering Lights: Every vessel shall be equipped with:
(a) A steering light located on the centreline at or near the stem of the vessel and clearly visible from the helm; or
(b) Two steering lights located at equal distances either side of the centreline at the forepart of the vessel and clearly visible from the bridge along a line parallel to the keel.

Disposal and Discharge Systems: Every vessel not equipped with containers for ordure shall be equipped with a sewage disposal system (enabling compliance with applicable laws relative to sewage disposal).

Garbage on a vessel shall be:
(a) destroyed by means of an incinerator or other garbage disposal device; or
(b) retained on board in covered, leakproof containers, until such time as it can lawfully be disposed of.

No substance shall be discharged or disposed of onto a lock or tie-up wall by any means, including overboard discharge pipes.

Vessels not fitted in accordance with Seaway Regulations will not be accepted for transit until the fittings have been modified as necessary and approved by a Seaway Officer.

POLLUTION:

1. No vessel shall
(a) emit sparks or excessive smoke; or
(b) blow boiler tubes.
2. No vessel shall discharge into Seaway waters any substances not in conformity with applicable United States Federal Regulations and Canadian Regulations with the exception of the waters of the Welland Canal where two specific zones are established in which no substances shall be discharged, namely:
(a) from Lock 7 (Thorold) to Mile 17 (Welland); and
(b) from Lock 8 (Port Colborne) to the outer Port Colborne piers (Lake Erie).
3. A record shall be kept of each location within the Seaway or adjacent waters where bilge water has been discharged.
4. Except as authorised by the Authority or the Corporation, no vessel shall discharge garbage, ashes, ordure, litter or other materials.

IDENTIFICATION CARDS: In the first U.S. port, the Immigration Officer requires an alphabetical Crew List made up on Form 1-418 and visaed by the American Consul in the last overseas port. This Crew List should contain the name of every crew member on board. Also needed are 3 copies of this Crew List on the same form. The Immigration Officer will require all Seamen's Books and Passports, to issue the completed Crew Landing Permits made out on Form 1-95A. The Master will be given a Crew List receipt which will indicate the names of crew members detained on board, if any. In case a crew member is detained on board, he cannot go ashore, and at irregular times an Officer of the Immigration Service will check if the crew member is on board. A fine of $1,000 will be imposed on the vessel for each detained crew member who is not on board.

REGULATIONS: Detailed requirements are contained in the Seaway Handbook (obtainable from the St. Lawrence Seaway Authority, Constitution Square, 360 Albert Street, Ottawa, Ontario K1R 7X7), or in the Seaway Notices. An updated edition of the Handbook must be retained on board the vessel.

Additional information regarding Seaway equipment, regulations or transit requirements can be obtained from the St. Lawrence Seaway Authority by contacting Captain Joseph Craig, Chief, Marine Services, The St. Lawrence Seaway Authority, 202 Pitt Street, Cornwall, Ontario, K6J 3P7. Tel: (613) 932-5170. Telex: 05-811517. Fax: (613)932-5204.

SHIPMASTER'S REPORT: September 1990 (Updated 1994).
Route: St. Lawrence Seaway. Great Lakes: Ontario, Erie, Huron and Michigan.
Port Visited: Burns Harbour, Indiana.

St. Lawrence Seaway and Great Lakes: Ballast Control Guidelines: Before entering Cabot Straits, ECAREG asked for details concerning location and depth of water where any ballast was taken on. Any ballast taken from depths of less than 2,000 m. should be exchanged. This was no comfort to us, as we had 1,800 tonnes of ballast on board for stability reasons. Following an exchange of telexes with ECAREG and Montreal Agents, common sense prevailed. The Canadian Coast Guard confirmed, it was not necessary to exchange ballast, if in any way deballasting affects ship stability. Subsequently we deballasted in Burns Harbour before lifting a steel cargo without further concern.

Ballast Water Exchange regulations became mandatory under U.S.Law on 10th May 1993, and are strictly enforced by the U.S. Coast Guard. If possible, it is recommended to carry out Ballast Exchange twice on tanks containing low salinity ballast water to ensure the minimum 30 parts per thousand salinity of all ballast water retained on board.

Seaway Inspection: This took place at anchor off Montreal and lasted for 2.5 hours, while the 3 Inspectors completed (a) Ship Inspection Report, (b) Radio Inspection Certificate and (c) Food Inspection. Item (a) is mainly concerned with compliance with the particular equipment requirements for the Seaway, such as rigging of seaway wires, landing booms, stern anchor, anchor marker buoys and air drafts. The Inspector was particularly helpful and tolerant, which was welcome, as only one officer had transited before. Item (b), compliance with the Canadian Radio Telephone Regulations. Item (c), the Food Inspection brought its own problems for this ship, with only one freezer room in use, concerning the sealing up of meats. Even our U.K. meat was found to originate from the Argentine, and had to be sealed with the pork and poultry from Spain. We still had 6 days to go before taking any local stores in Burns Harbour was possible, so had to make some grill doors for the shelving for a locker space within the meat room.

Ballast adjusted to meet the max. draft requirement of 26 ft. even keel before departure from the anchorage and approved by the Inspector.

Seaway Transit: The Seaway max. draft of 26 ft. is rigidly enforced. Even lying alongside the dock brings its own problems, when a large Laker passes in the narrow canal, causing the vessel to surge on her moorings (large Lakers use fresh water sprinklers on deck from the cold lake waters, to avoid an increase in drafts due to hogging in the Summer). An upright ship is equally important in the high sided locks. Port side Man Overboard Signal and bracket torn off when the port bridge wing nearly made contact with lock wall. The steel chafing bars, as fitted to the sides of this ship, were invaluable to prevent further damage and so thoroughly recommended for any vessel using the Seaway.

Shiphandling in Locks and Seaway: Tugs are not used in the Seaway to transit the 7 locks or Welland Canal for the other 8 locks to clear the Niagara Falls. Pilots normally "slide the wall", a term for placing the bow on the approach wall for positive control before entering a lock. The alternative of making a lock "on the fly" is sometimes used in fine weather, but more risky and applicable to this vessel, when our port shoulder landed heavily with consequent damage, making the last of 30 locks. The loss of paintwork, when "sliding the wall" on the timber fendering, is therefore much preferred. Quartermaster's steering on the downward run was in marked contrast to that on the way up, after they had learnt to use bold wheel movements in keeping with the slow speeds. Mooring in the locks varies from port to starboard, using the 4 ship's wires secured to winch barrels. Particular care should be taken when slacking away wires quickly, when dropping down in the locks, to avoid breaking. A further precaution is not to try to hold the stern against the "cut" of the screw, when coming astern for a starboard side landing. Better to let the Pilot control the swing, or else risk breaking the stern wire as we did.

Approximate Distances and Time Scale:

	Distance miles	*Time allowed* hours
Escoumins Pilot to Quebec.	122	12
Quebec to Montreal, with Pilot change halfway at Three Rivers.	138	12 plus 3 for inspection
Montreal through 7 Seaways locks and Thousand Islands, "Narrows" to Cape Vincent Pilot change.	160	24
Lake Ontario.	138	12
Welland Canal (8 locks to by-pass Niagara Falls).	28	12
Lake Erie to Detroit Bridge Pilot change.	213	22
Detroit Bridge to Lake Huron.	63	6
Lake Huron to Mackinac Bridge.	215	20
Lake Michigan to Burns Harbour (S.E. Chicago).	314	24
Total	1,253	6 days 3 hours.

The above times erred on the slow side to avoid engine problems caused by slowing down too quickly. In particular, the open water passages from Escoumins Pilot to Montreal and across the smaller Lakes (Ontario and Erie), were made at manoeuvring full speed instead of the more usual Sea Speed on both occasions, up and down. Engine ran on gas oil for the Seaway and Welland Canal locks passages only with our controllable pitch propeller.

AUTHORITY: The St. Lawrence Seaway Authority (See "Regulations").

NOTES

Please also advise Shipping Guides Ltd.

St. Lucia

CASTRIES (including Vieux Fort): 14.01 N. 61.00 W.

(See Plan)

PORT LIMITS: From Lat. 14° 01' 24" N., Long. 61° 00' 05" W. thence in the direction of 301°T for 1 mile, thence in the direction of 211°T for 1.2 miles, thence in the direction of 121°T for 0.88 miles to La Toc Point at Lat. 14° 30' 00" N., Long. 61° 00' 46" W. thence along foreshore at the average HW mark from La Toc Point around La Toc Bay to Tapion Point, thence along to the Castries River mouth and thence to the opposite bank including all marine works, wharves and property vested in the Crown. All around the bay to Seraphin Point, thence all around the bay to Veille Ville Point, thence to St. Victor Point and thence all around the shore to Vigie Point and then to Lat. 14° 01' 24" N., Long. 61° 00' 05" W.

DOCUMENTS:

Report of Ship's Stores. Form 1.
Crew Members' Stores List. Form 2.
List of Unmanifested Cargo. Form 3.
Report of Ship's Manifest. Form 4. (4 copies).
Passenger Lists. (5 copies).
Steamship Company Release. (1 copy).
Crew List. (5 copies).
Clearance from Last Port of Call.
Outbound Cargo.
Loading List.
Customs Report Outwards (Form A7)
Vessel Manifest (Contents of Ship). Form 16. (3 copies).
Entry Outwards and Certificate of Rummage. Forms 9 and 10.
Loading Licence. Form 14.
Clearance. Form 17. Form 18 (Steamship).

Where possible, Cargo Manifests and Stowage Plans should be forwarded by Airmail, ahead of the vessel to the local Agents.

PILOTAGE: Pilotage is compulsory for all craft except for ships of less than 100 g.r.t., Her Majesty's ships, pleasure yachts and fishing vessels.

Notice of ETA and request for a Pilot must be made to the Harbour Master not less than 24 hours before ETA. Cable address: "Paslu". Telex: 6355 Paslu LC. Confirmation of ETA is required 2 hours before arriving at the Boarding Station. Channel 16 VHF is continuously watched and ETA may be confirmed or adjusted on this frequency. Pilot boats (2) are: (1) A "Cheverton" built, 8.2 m. LOA, fibreglass hard top, with a "V" hull, single inboard 4236 Perkins diesel engine, complete with navigation and pilot lights. Painted black all around with letter "P" painted in white on both sides of bow. Name of pilot launch "Charles" painted in white at the stern. (2) A "Cheverton" built 8.73 m. LOA aluminium hard top pilot house aft. Single inboard 6.3544 Perkins diesel engine. Complete with navigation and pilot lights. Painted black all round with the words "Pilots" painted white on both sides of the pilot house. Name of second pilot boat is "Esperance" painted in white on stern.

The usual International Signals may be employed by vessels requiring a Pilot. The usual pilot boarding point 0.5 miles off Vigie Point. Ships that are 3 hours away are requested to call Vigie Lighthouse on S.S.B. 2182, VHF Channel 16, informing of ETA, draft and length.

Pilot boat stands by on Channel 16 VHF. Pilot station stands by on Channels 14 and 16 VHF.

Pilot boards vessels on the starboard side and for ships outward leaves on the port side.

In the event of bad weather ships will be advised accordingly.

Vessels awaiting Pilot may anchor between 1 and 2 miles N.W. of Vigie Point in 22 m. of water. Rock and sand bottom, very good holding ground, no shelter.

ANCHORAGES/APPROACHES: Deep and sheltered anchorage exists off Castries Harbour entrance. The approach channel is 91.44 m. wide with minimum depth of 14.75 m. to the port proper, which lies within an all protected harbour. The turning basin is 457.20 m. in diameter at a depth of 14.0 m.

Masters familiar with the Port of Castries may be invited to proceed to the Northern Anchorage/Quarantine Area not less than 3 cables off the Vigie promontory.

Care must be taken to drop anchor clear of the entrance range which is for in-going ships, 121°T on the Castries leading lights.

Also see "Pilotage".

RESTRICTIONS: Petroleum tankers are not moved during the hours of darkness except in emergency conditions.

MAX. SIZE: Ships up to 213 m. LOA and 9.1 m. draft can be accepted. No restriction on beam.

Also see "Tankers".

HEALTH: Pratique is usually granted by the Pilot or Boarding Officer and Immigration Department alongside on behalf of the Ministry of Health. In the event of any suspected disease or fever on board, the vessel is not allowed within 91.4 m. of the wharves until Pratique has been granted by the Medical Officer.

RADIO/VHF: Port Control on VHF Channels 16, 6, 12 and 14. Also 2182, 2146, 2381, 2527, 2582 and 2638 kHz.

TUGS: Tug "Chale", 2,000 h.p. and tug "Dogger Bank", 2,000 h.p., with twin Voith-Schneider propulsion, available to assist in berthing if required. Towage compulsory for vessels over 400 ft.

BERTHING: There are six berths numbered 1 to 6 inclusive.

Berth Nos. 1 to 3 are general cargo berths and have a total length of 356.6 m. The draft varies from 5.5 m. at Berth No. 1 to 8.5 m. at Berth No. 3. Berth Nos. 4 and 5 are of recent construction and consist of a reinforced concrete platform supported on concreted piles.

Berth No. 4 is a container berth equipped with a heavy lift mobile crane for handling 20 ft. and 40 ft. ISO containers. It has a length of 152.4 m. (depth 9.75 m.) and storage capacity for approximately 3,500 containers.

Berth No. 5 is a break bulk cargo berth as well as Ro/Ro facilities with a ramp 14.6 m. wide. It has a length of 159 m. and a depth of 9.75 m. below LW. A transit shed with an area of 6,882 sq.m. with cold storage facilities of 2,265.60 cu.m. for reefer cargo.

Berth No. 6 is a reinforced concrete deck supported on steel cased piles. The berth is 137 m. long and can accommodate vessels of 9 m. draft. It is a general purpose berth and handles banana traffic.

Within the port area there is a total shedded storage capacity of 17,205 sq.m. with a total upland of 15 – 17 acres.

Dock water density 45.7 gm./cu.m. with prevailing winds from a N.W'ly direction.

Pointe Seraphine: Information relating to the recently opened cruise ship berths at Pointe Seraphine:

Berths No. 1 and 2 are located at Pointe Seraphine, Castries Harbour and are dolphin type berthing facilities.

1. Each pier consists of:
   (a) Two reinforced concrete breasting dolphins.
   (b) Reinforced concrete walkways 8 ft. wide supported on steel "H" and spun concrete piles linking the berth to the shore.
2. Height of pier above M.S.L. = 7 ft. 0 in.
3. Overall length of pier = 174 ft. 2 in.
4. Bollards – there is one "T" head bollard on each breasting dolphin, and 4 single pillar bollards on the shoreline. Average distance apart is 145 ft.
5. Fendering – primary fendering consists of one "W" shaped rubber fender fixed to each dolphin.
   Two "D" shaped 12 in.×12 in. cover fenders fitted to the outer corners of each dolphin provide secondary protection.
6. Construction – each dolphin is 15 ft. 7.5 in. square reinforced mooring concrete structure supported by 14 in. diameter spun concrete piles. The landing stage of the berthing facility is 160 ft. long × 8 ft. wide.
   The landing stage is a reinforced concrete structure supported by steel "H" piles.
   The approach to the landing stage is 63 ft. long× 8 ft. wide and is of similar construction.
7. Average depth alongside Berth No. 1 35 ft.
   Berth No. 2 32 ft.

Vieux Fort: Depth of 8 fathoms at the entrance and 5 fathoms within the Port. 2 berths, 535 ft. long, 32 ft. – 35 ft. deep. Also see "Shipmaster's Report".

BRIDGES: There are no bridges or other restrictions to prevent access to the port by vessels of not more than 9 m. draft.

STEVEDORES: The normal working hours are from 0700 – 1600 hrs. Mondays to Fridays. Special arrangements are required outside of the above hours and for Saturdays, Sundays and Statutory Holidays. The hiring or calling of labour are as follows:

Monday to Fridays for work commencing from 0700 – 1100 hrs. request to reach Union before 1500 hrs. previous day.

1100 – 1600 hrs. before 0900 hrs. on the same day.

After 1600 hrs. before 1400 hrs. on the same day.

For vessels working on weekends request to reach Union by 1530 hrs. on Fridays.

Average rate on break bulk general is 15 t.p.h. per gang.

MEDICAL: Full hospital facilities available without prior notice.

FRESH WATER: Good quality potable water available in unlimited quantities at 20 t.p.h. per connection ex-quay.

FUEL: Limited quantity for yachts and small vessels only.

TANKERS: See "Shipmaster's Reports" and "Cul de Sac Bay".

CONSULS: *Embassies/High Commisions:* British High Commission, Venezuela, Organisation of American States, Germany and France. *Consuls:* Denmark and Netherlands.

REPAIRS: No facilities for large vessels. Routine maintenance or minor repairs are carried out. There is no foundry in the port.

DRY DOCKS: None available.

SURVEYORS: Lloyd's Agents are available and represent other Classification Societies and Surveyors. Others can be obtained from outside at short notice.

GANGWAY/DECK WATCHMEN: Gangway and gate watchmen can be supplied at Union award rates. Hold watchmen are required during discharge/loading operations. Shed watchmen are not necessary.

OPENING/CLOSING HATCHES: Ship's crew shall be required to raise and lower and position beams to the required height, opening and closing of MacGregor and pontoon hatches. Wooden hatches are normally handled by stevedores while alongside.

CUSTOMS ALLOWANCES:

1. Wine or spirits not exceeding one quart in all, and
2. Tobacco, not exceeding half a pound, or
3. Cigars not exceeding 50 in number, or
4. Cigarettes, not exceeding 200 in number, or
5. Goods to the aggregate of E.C.$50.00 belonging to a passenger, which accompany that passenger and when acquired abroad by him for his personal or household use or as souvenirs or gifts and admitted as such by the Comptroller of Customs.

CARGO GEAR: Discharge of general cargo is usually by ship's gear. Containers, if vessels are not self contained, may be handled by P&H crane 9125TC – 140 ton lorry mounted crane owned and operated by the Ports Authority. Manitowoc 230W crawler crane rigged for 41 ton lift also available (Tropical Lines).

REPATRIATION: Scheduled aircraft connect with all the English speaking islands of the Lesser Antilles several times daily from Vigie Airport which is 2 km. distant from Port Castries. Direct overseas flights arrive and leave from Hewanorra International Airport, Vieux-Fort at least once a week for the United Kingdom, New York, Miami and Caracas, Venezuela.

TIME: Local time is GMT minus 4 hours. Summertime is not used. All ETAs and other messages should be made in local time.

TELEPHONES: This service is available aboard ships at all berths by prior arrangement through the Agents. Standard rates apply.

HOLIDAYS: New Year's Day, New Year's Holiday, Independence Day (22nd February), Carnival Monday, Good Friday, Easter Day, Easter Holiday, May Day (Labour Day) (1st May), Whit Monday, Corpus Christi, Emancipation Day (1st Monday in August), Thanksgiving Day (1st Monday in October), St.Lucia Day (13th December), Christmas Day, Boxing Day.

The port is closed for work on Christmas Day, Good Friday and May Day (Labour Day).

POLICE/AMBULANCE/FIRE: All emergency services are available through Port Police Station on Jeremie Street, within walking distance from the port.

Emergencies can be reported to Vigie Lighthouse on Channel 16 at any time. Emergency Police dial 999; emergency Ambulance dial 999; emergency Fire dial 999.

EMERGENCY CO-ORDINATION CENTRE: The Headquarters of the Central Emergency Organisation is the Prime Minister's Office, Government Buildings, Castries, St. Lucia. Tel: 3203 and 3016. Telex: 6394 Foraff LC.

BANKS: Bank of Nova Scotia, P.O.Box 301, William Peter Boulevard, Castries, St. Lucia. Tel: 22292/95. Telex: 6385 Scobank L.C.

Barclays Bank plc., Bridge Street, Castries, St. Lucia. Tel: 23306/23300. Telex: 6348 Bacladom L.C.

Canadian Imperial Bank of Commerce, P.O.Box 350, William Peter Boulevard, Castries, St. Lucia. Tel: 23751/23753/23739. Telex: 6352 Canbank L.C.

Caribbean Banking Corp. Ltd., Micoud Street, Box 1531, Castries. Tel: 452-1668. Fax: 452-7484.

Royal Bank of Canada, William Peter Boulevard, Castries, St. Lucia. Tel: 22245. Telex: 6309 Royalbk L.C.

St. Lucia Cooperative Bank, 21 Bridge Street, Castries, St. Lucia. Tel: 22881/22882. Telex: 6308 Coopnk.

National Commercial Bank of St. Lucia Ltd., P.O. Box 1031, Bridge Street, Castries, St. Lucia. Tel: 23562/22103. Telex: 6300 Natbank L.C. Cable: NATBANK.

SHORE LEAVE: When Immigration and Customs requirements have been satisfied there is no restriction on crew shore leave so long as they rejoin the vessel before departure. They should carry some sort of identification card or shore passes for security purposes especially for non-English speaking persons.

GARBAGE DISPOSAL: Skips are provided alongside the vessel. This service is undertaken by Castries City Council. Tel: 809-45-22121/31153. The rate charged is EC$500/skip. Prior arrangements have to be made for delivery and collection.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Eastern Caribbean Dollar (EC$).

DELAYS: There are no delays for want of a berth. Berthing delays are very infrequent and no labour shortages.

REGULATIONS: Castries is within the Northern zone of tropical storms. The hurricane season usually extends from May to October each year and the port may be more or less affected at any time during that period. When a storm is expected to pass over the island, ships may be placed on short notice for sea in such circumstances and required to maintain themselves in seagoing condition at all times.

SHIPMASTER'S REPORT: 1979 (Updated 1986).

Pilotage: Compulsory. Pilot boards 0.75 miles West of Vigie Light, ladder usually on the port side.

Restrictions: Vessel is able to enter and leave at any stage of the tide, day or night.

Max. Size: Max. draft 10 m.

VHF: Pilot on Channel 16.

Berthing: No. 6 Berth, West Wharf: Distance from entrance to berth 1 mile. Max. LOA (Approx.) 550 ft. Max. draft 10 m. There is mechanical equipment available to handle palletised cargoes, adequate storage space for breakbulk cargoes and palletised cargoes. The loading rate for bananas is 15 t.p.h. per gang with ship's derrick and the labour was satisfactory. Accommodation ladder required.

Services: Fresh water, fresh provisions, repair facilities, machine shop, Airport, laundry services, bunker fuel oil, diesel oil, lubricating oils, doctor, hospital, groceries and meats.

SHIPMASTER'S REPORT: Vieux Fort. 1979 (Updated 1986).

Pilotage: No ship exceeding 100 n.r.t. must enter without a Pilot. Pilot boards 0.5 miles S.W. of Mathurin Point (there is a strong N.W. current off Mathurin).

Restrictions: Vessel may enter and leave at any stage of the tide, day or night.

Max. Size: Max. LOA 520 ft.

Tugs: Tugs are not available and are not necessary for docking and undocking.

VHF: Available.

Berthing: One berth only available. Distance from entrance to berth 0.5 miles. Nature of bottom at the berth is mud. All banana loading is carried out by the side doors. Vessels berth port side to the quay. A very high rate of loading is attained (100 t.p.h.). A limited amount of mechanised equipment for handling palletised cargoes is available and also limited storage space for palletised and breakbulk cargoes. No equipment for handling containers is available. Accommodation ladder required.

Services Available: Only fresh water, airport and doctor available (i.e. no fuel or provisions available).

SHIPMASTER'S REPORT: Coconut Point. October 1989.

Charts: B.A. Charts No. 197, 499 and 1273.

Documents:

2 copies Crew Manifest.
2 copies Stores List.
6 copies Crew List.
1 copy Unmanifested Cargo.
6 copies Cargo Manifest.

Pilotage: Daylight pilotage only. They are busy 0600 hrs. – 0800 hrs. with cruise ships. Pilot boards due North of Tapion Rock Lighthouse.

Anchorage: North of Vigie Pt. in 15 fathoms, with Vigie Point 158° × 0.7 miles. We first anchored to await daylight with Vigie Point 104° × 0.3 miles, just North of the leading line. We were told to move to the North by the Signal Station. No appreciable set.

Radio/Signal Station: Vieux Fort on the South Coast will transmit information to Castries Signal Station. Both stations operate 24 hours. Call sign "Vieux Fort" or "Castries Lighthouse".

Signal Station on VHF Channels 12 and 14.

Tugs: One tug available.

Berthing: Ship's hose used. Coconut Point serves both Texaco and Shell depots. The usual ship rate is 300 bbls./hr. Maximum length of vessel 100 m., maximum draft 12 m.

Vessels berth stern to, with 2 shackles on port anchor and 2 stern lines to a buoy.

General: Pointe Seraphine: Berths No. 1 and 2 – New complex for cruise liners. Berth No. 6 for Geest banana ships. Other berths for general cargo. Vigie Airfield only used for local flights. International Airport in the Southern part of the island.

It is possible to telephone overseas from the Texaco office (via Cable and Wireless operator), payment to be made to the Texaco Manager.

Port Authorities trying to get Shell and Texaco to move to Cul de Sac Bay, just South of Castries, so that Coconut Point can be developed as a cruise terminal.

SHIPMASTER'S REPORT: Vieux Fort. December 1989 (Updated 1992).

Charts: B.A. Charts No. 499 and 1273.

Documents:

2 copies Crew Manifest.
2 copies Bond Stores List.
1 copy Health Declaration.
2 copies Inward Declaration.
6 copies Crew List.
2 copies Unmanifested Cargo.

Officials: Officials board on all occasions.

Pilotage: Pilotage is compulsory for all vessels over 100 g.r.t. Permanent Pilot based at Vieux Fort and is available 24 hours a day. Order Pilot at least 6 hours' in advance through Agent or Oil Company (Shell).

Contact can be made through Vieux Fort Lighthouse or Castries Lighthouse. No night berthing at sea berth. Berthing from 0600 hrs. onwards at sea berth.

We engaged a Pilot who boarded from fast green dugout fishing craft, about 0.25 miles West of Promontory. On next visit, I will undertake anchoring and mooring.

Approaches: Port conspicuous with Moule A Chique Promontory.

Beware of shoals off George Point.

Found counter current down West coast of St. Lucia (South-going).

Anchorage: About 3.5 cables off jetty, it is fairly well sheltered.

Berthing: It is best to use the port anchor. It is dropped when South mooring buoy and tank marked 'Shell' are in transit, after which vessel backs up between mooring buoys. Put hose buoys just on port quarter.

About 4 shackles on port anchor is normal. The depth alongside for the whole ship's length is 10.0 m.

There is no swell but wind is very gusty, shifting between North and East off the hills, which did not help berthing.

It is best to double lines to both buoys which have hooks. Boat used for Pilot acts as mooring/hose boat. On this visit it was a green hulled boat, previously blue hulled.

Cargo: Only ambient LPG handled at sea berth. Oils handled on South side of jetty.

The undersea 6 in. hose to buoys was lifted by the aft crane on port quarter, clear of water. Ship's hose coupled up to sea hose valve with the aid of a mooring boat, after which it is hung off by crane over port quarter. Standard 4 in. connection used.

Shore capacity 100 tonnes. Rate about 30 t.p.h.
Often large ship/shore differences.
Shipment received every 2 weeks.
No night discharge between 1800 hrs. and 0600 hrs.
Vessel can stay on buoys if pumping suspended overnight.
Shell operated on VHF Channel 9, we landed own Motorola.
Shell like a 50/50 mix.

General: Vessels cannot berth at the Banana Jetty between Tuesday night and Wednesday as banana ships have priority.

The berth is near to St. Lucia International Airport.

Agent: Available. The Shell Manager acts as Agent, and also acts for customs when they do not board.

If vessel advises Shell 24 hours in advance, they will obtain stores for the vessel. Apples, meat and frozen food available. Heineken beer was E.C.$ 22.00/case. Friday is a good day for the market.

Vessel called again 2 weeks later and made the following observations.

The call sign for Vieux Fort Lighthouse is "Moule A Chique Lighthouse".

We anchored and awaited daylight with Mathurin Pt. Lighthouse bearing 162° × 0.3 miles.

We called Mathurin Lighthouse, who advised us that a boat was ready but no pilot available. We berthed at 0645 hrs. without a Pilot.

We berthed with Battery Point ahead (bearing 060°), and then swung hard to starboard with the Banana Pier bearing 120° and the South mooring buoy in transit with the 'Shell' tank. We dropped the port anchor and then backed up to the stern mooring buoys, one on each quarter, until the hose buoy (first orange buoy) was under the crane. On completion of mooring operation we had 6 shackles of cable out on the port anchor.

For stores this time we requested 6 cases of apples, grapes and 25 cases of Heineken but only received the beer due to a failed delivery from Castries.

As provisions did not arrive we made a last minute visit to a local wholesaler (Inter Island Supply), who are on the road to the airport, about 0.5 miles from the Shell Terminal. We obtained 6 cases of apples at U.S.$38.00/case and grapes at U.S.$50.00/pallet. We also obtained additional cases of beer at U.S.$8.68 per case.

AUTHORITY: Saint Lucia Air & Sea Ports Authority, P.O.Box 651, Bridge Street, Castries, St. Lucia, West Indies. *Tel:* (809) 45-22893/4, 4521182. *FAX:* (809) 45-22062. *Telex:* 6355 Paslu LC. *Contact:* Gregory St.Helen, General Manager.

CUL DE SAC BAY: 13.59 N. 61.02 W. (See Plan)

LOCATION: The facilities of Hess Oil St. Lucia Limited (HOSLL) are located in Cul de Sac Bay (Lat. 13° 59' N., Long. 61° 02' W.) on the West coast of the island of St. Lucia, West Indies. Ready access for all vessels coming in from the Atlantic is provided by the St. Lucia Channel which lies between St. Lucia and Martinique. This channel is 17 miles wide and has general depths of 914 m. (500 fathoms).

PORT LIMITS: For tendering purposes a vessel will be considered as having taken arrival when it reaches the Pilot Station 2.5 miles due West of Bananes Point. A vessel's "Notice of Readiness" will not be accepted until the vessel has initially reached this point and notified HOSLL by VHF.

DOCUMENTS: The following documents are required for entry and clearance and are to be presented to the respective officers on boarding:

General Declaration for Ships.
Cargo Declaration.
List of Unmanifested Cargo.
Crew List.
Crew Members' Stores List.
List of Packages or Parcels Intended for discharge by Crew Members.

Normally it is necessary to have Customs entry completed before cargo operations can commence.

Customs clearance is accomplished by the vessel's Agent, cargo documents are placed onboard by the Terminal Department.

APPROACHES: *Harbour Entrance:* Cul de de Sac Bay is entered from the open sea between Bananes Point about 1 mile North of Marigot Point, and Ciceron Point about 0.75 miles farther Northeast of Bananes Point. Harbour entrance is 3,000 ft. wide.

Navigation Aids: The approach into Grand Cul de Sac Bay is marked by a range on a true heading of 131.1°. The front range showing fixed green, visible 7 miles, is on a 90 ft. cylindrical tower, alternate black and yellow bands, 168 ft. above sea level, in position Lat. 13° 59.02' N., Long. 61° 01.03' W.

The rear range light 1,910 ft. from the front range, in position Lat. 13° 58.82' N., Long. 61° 00.83' W., showing fixed green, visible 7 miles, is on a 25 ft. cylindrical tower, alternate black and yellow bands, with red and white vertically striped, 4 ft. × 16 ft. daymark, is 202 ft. above sea level.

Both front and rear range lights have a 6° arc of visibility, 3° on each side of the range line.

Ciceron Point, on the North side of the harbour, is marked by a flashing green light on a 25 ft. cylindrical tower, 40 ft. above sea level, with a 7 ft. × 7 ft. square daymark.

Ciceron Point rear range is located 1,130 ft. × 105.3° from Ciceron Pt. Light. The rear range is fixed green on a 45 ft. black and yellow banded square daymark. Arc of visibility 3° each side of range line.

The South side of the harbour is marked by Bananes Pt.Light, showing flashing red on a 15 ft. tower, 85 ft. above sea level, with a 7 ft. × 7 ft. × 7 ft. triangular red daymark.

A safe water buoy has been established in the Northwest sector of the harbour, showing a flashing white light, vertically striped red and white, radar reflector. This buoy marks the Southwest projection of a shoal area. South of this buoy are depths of at least 90 ft.

PILOTAGE: Service is available 24 hours a day (also see "Restrictions") and is compulsory for all vessels entering or leaving Cul de Sac Harbour. A HOSLL Pilot will assist the Master of any vessels docking or undocking at the Hess facilities, however, the Master of each vessel retains full responsibility for his ship at all times.

Vessels must remain at the Pilot Station 2.5 miles due West of Bananes Point until boarded by the HOSLL Pilot who will be placed aboard by a company tug.

The HOSLL Marine and Terminal Office is equipped with a VHF radiotelephone having the following channels:

Initial Contact: Channel 16.
Working: Channel 9.

Ships must call the HOSLL marine office on VHF at least 3 hours before arrival at the Pilot Station and advise of any change in their ETA.

Pilot Ladders: If the following regulations are not complied with, HOSLL Pilots may refuse to embark or disembark thus delaying the vessel.

(i) The Officer responsible for the embarkation and disembarkation of the Pilot is to be a Deck Officer.

(ii) The pilot ladder is to be properly secured and adequately lit at night.

(iii) The Pilot should be able to pass safely and conveniently from the head of the ladder onto the ship's deck. Where portable stanchions and bulwark ladders are used for this purpose, the portable stanchions must be rigidly secured to the ship's structure to prevent being unshipped and supported at not less than two points to prevent lateral movement. The bulwark ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow a firm grip.

(iv) The ladder is to be in good condition and its treads are to remain horizontal. The treads are to have a rough upper surface.

(v) The length of the ladder should not exceed 30 ft. Whenever the distance from sea level to a point of access on the ship is more than 30 ft. access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

(vi) The ladder is to be rigged so that each step rests firmly against the ship's side. Spreaders are to be provided not more than 10 ft. apart to prevent the ladder twisting.

(vii) A manrope or a safety line is to be secured at the vessel's rail and lowered over the side adjacent to and for the full length of the pilot ladder. A lifebuoy with self-igniting light is to be readily available.

(viii) The ladder is to be rigged well clear of any overboard discharges and at a place where the best lee can be provided to the boat carrying the Pilot.

(ix) Use of mechanical hoists not allowed.

ANCHORAGES: No anchoring is permitted in Cul de Sac Bay.

RESTRICTIONS: Only vessels inbound or outbound from Cul de Sac Bay may use or be present in the Cul de Sac approach area. No vessel shall enter Cul de Sac Bay except for the purpose of using the facilities located therein and then only in compliance with the directions of the HOSLL Marine Manager.

Ballast Drafts:

Vessel d.w.t.	*Forward*	*Aft*
Under 20,000	12 ft.	18 ft.
20,000 to 35,000	14 ft.	20 ft.
35,000 to 50,000	15 ft.	21 ft.
50,000 to 85,000	18 ft.	24 ft.
85,000 to 150,000	21 ft.	28 ft.
150,000 to 200,000	32 ft.	36 ft.

These are minimum draft guidelines. Vessels over 270,000 d.w.t. must have not less than 3 ft. of water over the ship's propeller and not more than 10 ft. of trim by the stern.

These guidelines will be adjusted as weather and vessel handling characteristics dictate. Advice concerning any variance will be provided to the vessel by the Pilot in ample time to prevent any unnecessary delays to vessel's ballasting.

Entry/Departure: Vessels up to 300,000 tons d.w.t. are berthed 24 hours a day. Vessels over 300,000 tons d.w.t. are berthed during daylight only. Sailing possible at any time for any size vessel.

MAX. SIZE:

Dock No. 2 (VLCC Berth):

Length	– 1,300 ft. LOA.
Beam	– No restrictions.
Draft	– 82 ft.
DWT	– 400,000 long tons.

Larger vessels can be accommodated, however, each such move must be discussed on an individual basis prior to entry.

Largest vessel handled: 508,000 tons d.w.t., draft 84 ft.

Dry Cargo Dock:

Length	– 650 ft. LOA.
Beam	– No restrictions.
Draft	– 37 ft. 6 in.
DWT	– 50,000 long tons.

HEALTH: Pratique is required and will be granted by the Customs/ Immigration or Health Official boarding the vessel.

All vessels arriving from a foreign port will be boarded by Customs and Immigration Officers. VESSEL PERSONNEL ARE NOT ALLOWED ASHORE UNTIL PERMISSION IS GRANTED FROM THESE OFFICERS.

Quarantine is required only if vessel is coming from a plague infected area or if illness of a suspicious nature or there is a death (from any cause) onboard. The Master is obligated to report to the HOSLL Marine Office any of the above circumstances well in advance of the vessel's arrival at the Pilot Station in order that the Health Officials may be notified – failing which the vessel may be delayed.

RADIO: Masters must advise both HOSLL – St. Lucia and their Agents by radio 72, 48 and 24 hours in advance of their ETA giving the vessel's name, date and hour of arrival (local time) and the name of their past port of call otherwise delays to the vessel may result.

VHF: VHF radio frequencies:

1. Calling only	–	Channel 16
2. Hess Oil	–	Channel 1
3. Pilotage	–	Channel 9 and 65
4. Agency	–	Channel 9

Harbour tugs and the HOSLL Marine Dispatchers monitor VHF frequencies 24 hours a day. VHF call sign: Hess St. Lucia.

TUGS: Tug assistance in the harbour, docking and undocking is mandatory and is provided by diesel tugs, stationed in the port to provide this service. Additional tugs are available when required.

When tugs are alongside or assisting a vessel, all cargo tank openings must be closed, unless the cargo tanks are gas-free.

BERTHING:

Dock No. 2 (VLCC Berth): Vessels using this berth will be turned in Cul de Sac Bay and docked port side to.

This dock is equipped with 4×16 in. Chicksan arms for handling crude oil and 1×16 in. Chicksan for dirty ballast.

Dry Cargo Dock: Vessels using this berth will dock port side to.

This dock is equipped with:

1×6 in. hose for Jet Fuel.
1×6 in. hose for Gasoline.
1×6 in. hose for Distillates.
1×4 in. hose for Spraytex.
1×4 in. hose for Avgas.
1×3 in. hose for LPG.

Also see "Max. Size".

Moorings: A line handling vessel and personnel will be provided for mooring.

Vessels shall at all times remain adequately secured alongside the berth by the use of ropes or wires which are in good condition and properly sized for the load they are likely to incur. Mooring lines shall be regularly tended and kept taut.

The use of automatic tensioning winches to hold mooring lines is forbidden.

Immediately on docking, emergency towing wires of sufficient length to reach the water's edge, with eyes on the outboard ends, must be paid out from the offshore bow and the after quarter. The inboard ends must be made fast to the vessel's bitts.

Wires shall be in good condition, of adequate strength and adjusted as necessary throughout loading/discharging operations to keep the eyes at or above the waterline at all times.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Gangway: HOSLL will provide a gangway.

NOTICE OF READINESS: Notice of Readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge, and that all of the vessel's equipment (including, but not limited to tanks, pumps, valves and pipelines) is ready and fit to load or discharge petroleum and/or petrochemical products. HOSLL reserves the right to refuse acceptance of such Notice of Readiness unless the vessel is in all respects ready to load or discharge.

A vessel will not be deemed ready to load or discharge and pumping will not commence until the Senior Deck Officer shall have executed and delivered to HOSLL the "Declaration of Inspection Prior to Bulk Cargo Transfer".

LOADING/DISCHARGING: Loading or discharging must not start until the Master or Chief Officer has:

(a) Signed a certificate acknowledging receipt of HOSLL's Terminal Regulations.
(b) Displayed in prominent positions on board "No Smoking", "No Naked Light", "No Visitors" notices.
(c) Jointly executed a HOSLL "Declaration of Inspection" with the Terminal Representative certifying that all necessary valves ashore and aboard are properly set; that the agreed loading/discharging signals are understood, and that all other matters relating to safe cargo transfer operations are being carried out.

Bonding Cable: A ground wire from the dock grounding system shall be connected to all vessels or barges loading/discharging petroleum before any hose connections are made. This cable is not to be disconnected until after all hoses or Chicksan arms have been disconnected and blanked off properly.

Connecting and Disconnecting Hoses: A crew will be provided by the terminal to connect and disconnect hoses and Chicksan arms on the vessel. Vessels should have blinds removed from the cargo lines, reducers installed and drip pans in place on arrival at the dock. The HOSLL Dispatcher will advise on arrival the size and number of hoses or arms to be connected. Also see "Berthing".

Communications: HOSLL will supply a VHF radio to the vessel for emergency communication between the vessel and the dock watch during loading/discharging operations.

Cargo Handling Signals: All vessels loading or discharging petroleum cargoes shall fly a red (bunker) flag between the hours of sunrise and sunset and during the night show a red light visible from all parts of the horizon at a distance of not less than 1 mile.

Weather Conditions: The loading and discharge of all crude petroleum and its products will be stopped during any severe electrical storm.

Loading of low-flash products will be stopped during periods of calm when the heavy vapours cannot be dispersed readily enough to prevent hazards from accumulating gas pockets. Vessel's Officers are cautioned to be on their guard during such conditions.

In the event of abnormal weather conditions in the area such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters may be instructed to suspend all operations and proceed to sea until normal weather conditions again prevail.

Demurrage: Vessels are required to vacate berths promptly upon completion of cargo handling operation (loading or discharging operations as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the Marine Superintendent.

If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be responsible as follows:

(a) To pay dock demurrage at the rate as specified by HOSLL per hour or a *pro rata* share thereof for a fraction of an hour.
(b) To hold HOSLL harmless for any demurrage and damages incurred as a result of other vessels awaiting berth or for any other consequences of its failure to properly vacate the berth.

The following rules shall govern the determination of demurrage:

(a) One hour free laytime will be allowed after completion of cargo loading operations. This free time will start at the time cargo hoses are disconnected from the vessel's manifold on completion of loading or discharge of cargo. Vessels awaiting cargo papers and/or Customs Clearance must vacate the berth within 1 hour of such completion and move outside to wait for their papers.
(b) Four hours' free laytime will be allowed for ballasting after discharge operations.
(c) Ballasting times for VLCCs will be handled on an individual basis for each vessel.

Overloading: Masters are advised that the international laws regarding overloading are strictly enforced and they should be guided accordingly.

Vessels shall not arrive or sail overloaded. All expenses incurred in discharging or lightering overloaded cargo will be for the vessel's account. Vessels departing to zones requiring lighter draft may sail with the draft permitted in that zone plus an allowance for fuel and water consumption to the zone limit.

Sea Suctions: Pumproom sea suctions and discharge valves are to be sealed on arrival. Seals are not to be broken while the vessel is in the harbour area. If it becomes necessary to break a seal, permission must be received first from the HOSLL dock representative who will check and record the seal numbers.

MEDICAL: Limited emergency medical attention is available from the public hospital at any hour of the day or night. The vessel's Agency Representative should be contacted by the Master with any requests for crew medical attention.

For routine medical treatment, a Doctor will board the vessel when requested through the vessel's Agency. Dental treatment is available weekdays.

All crew members requiring medical attention should be available upon vessel's arrival.

BALLAST: St. Lucia laws prohibit the pumping of dirty ballast overboard while a vessel is within their coastal waters. All dirty ballast must be pumped to the facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump overboard at the dock after the ballast tanks have been inspected and approved by a Marine Department Representative.

In pumping dirty ballast ashore, the ballast is received through a 36 in. shoreline at a maximum discharge pressure to the shore installation of 120 p.s.i.

Also see "Restrictions".

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Limited supplies of marine hardware are available on the island.

There are no facilities for major repairs closer than Puerto Rico or Curacao.

SURVEYORS: Representatives of the American Bureau of Shipping, Lloyd's Register and other marine classification societies are available from Puerto Rico and Curacao on 72 hours' notice. The vessel's Agent will assist Masters in soliciting their services.

Representatives of SGS (Societe General de Surveillance S.A.) will be available for cargo quantity and quality inspection as required. Other outside inspectors can be arranged upon adequate notice.

TIME: St. Lucia uses Atlantic Standard Time which is 4 hours slow of GMT all year round.

SHORE LEAVE: Under normal circumstances, no restrictions are imposed by the Immigration authorities on shore leave. Masters are requested to have all crew members on board at least 1 hour prior to departure time to avoid delay "waiting crew members".

HOSLL will provide the Master of each vessel with gate passes for the crew upon arrival.

Crew members are not permitted to walk through the terminal. HOSLL will supply transportation between the docks and the main gate at regular intervals. Crew members must make their own arrangements for transportation outside the main gate.

GARBAGE DISPOSAL: Service not available.

WASTE OIL DISPOSAL: Service not available.

SEAMAN'S CLUBS: None.

CURRENCY: Eastern Caribbean Dollar.

GENERAL:

Winds: The trade winds normally blow from an Easterly direction ranging from N.N.E. to S.S.E. Night winds are generally lighter than the daytime winds. About daybreak the wind speed begins to pick up, reaching maximum strength in the late morning or early afternoon. A return to the lighter night-time winds begins during the late afternoon, usually around 1600 hrs.

In past years, hurricanes have occasionally passed close to and over the Island. Hurricane season runs normally from June through October of each year peaking in late August and September. For details see U.S. DMA Hydrographic Center – Sailing directions for the Caribbean Sea – Pub. 144.

Tides and Current: The tides are diurnal and small, the mean range being about 0.5 ft. and the diurnal range less than a foot.

Normally there is a current of 1 knot to 2.5 knots moving along the West coast of the Island in a Northerly direction.

Charts: Island of St. Lucia, U.S. DMA Hydrographic Center Chart No. 25521.

Anchorage in St. Lucia Island, U.S. DMA Hydrographic Center Chart No. 25528, and Harbours in St.Lucia Island – B.A. No. 449.

Flags: Vessels entering Cul de Sac Bay during daylight shall fly their national flag and continue to do so during daylight hours when moored. All vessels of foreign registry shall fly the St. Lucian flag when in the harbour.

Visitors: No visitors are permitted in the dock area. Only persons on official vessel's business are permitted on the docks.

Mail: Official and personal mail will be delivered onboard by the vessel's Agent upon vessel's entry.

Mail received for vessels while in port will be delivered onboard prior to sailing. Outgoing mail is accepted from Master provided it is accompanied by a mail transmittal slip or support disbursements.

Laundry: Limited vessel's laundry facilities are available.

Liquor: The transportation of alcoholic beverages inside HOSLL's property is strictly prohibited; consequently, no liquor or beer may be brought or removed from vessels. The only exception to the foregoing is the delivery of bonded stores ordered by Masters for their vessels.

Swimming: Swimming in the dock area is strictly prohibited as sharks and barracuda frequent the harbour.

AUTHORITY: Hess Oil St. Lucia Ltd. (HOSLL), P.O.Box 811, Castries, St.Lucia. *Tel:* (809) 452-3105 and 452-3904. *Telex:* 341-6346 A/B 6346 Hess Stl LC. *Cable:* Hess Oil St.Lucia. *FAX:* (809) 452-5688.

Contact: General Manager.

St. Pierre and Miquelon

SAINT-PIERRE: 46.47 N. 56.10 W. (See Plan)

DOCUMENTS: Formalities completed on arrival. Advise Port Service beforehand of vessel's ETA, length, tonnage and draft 12 hours before arrival.

Declaration of Health.
Derat Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests of any cargo to be discharged.
2 Crew Declarations (tobacco, liquor, souvenirs).
Certificate of Registry.

APPROACHES: *North East Passage:* Max. draft 8.5 m. Vessels approach on a heading of 209° T.

South East Passage: Used by vessels not exceeding 25 m. LOA and 5.0 m. draft.

24 hours' notice required if using this entrance.

PILOTAGE: Contact Pilot 1 hour before arrival calling TXU by radio telephone on 2182 kHz or VHF Channel 16. Permanent watch kept. Pilot boats equipped with VHF Channel 12, radar, and radio-telephone. Pilot launch available at entrance to N.E. channel in position Lat. 46° 48.3' N., Long. 56° 07.7' W., in the vicinity of the Land Fall Buoy.

Pilot launch named *Radar,* length 45 ft. The hull is black and superstructure white with "Pilote" painted on each side. Pilot launch carries the International Signals for pilot launch day and night.

When the weather is bad contact Pilot on Channel 12 for instructions.

Pilot is compulsory for vessel of 100 g.r.t. and over.

Pilot Tel. 41.20.68 (office), 41.24.87 (residence).

ANCHORAGES: In the roads, depth 13 m., not secure in strong East winds.

Shipmaster's Report: The anchorage in the roads where fish is loaded ex-trawlers is not secure, even with moderate winds from any direction, and engines should be on stand-by continuously. Several ships have gone on the rocks in a matter of minutes.

MAX. SIZE: New Quay: Max. LOA 200 m. Max draft 10 m. Also see "Berthing".

HEALTH: If suspected disease on board contact Saint-Pierre Health Service. Tel: 41.21.11. (office), 41.21.17 (residence).

Masters of vessels arriving at Saint-Pierre may obtain Free Pratique via TXU. Message to be sent to Harbour Master Saint-Pierre at least 12 hours before arrival.

In the message the Master has to specify name of vessel, total number of crew members, where ship coming from, and if everybody on board healthy; in these conditions flag "Q" is not necessary on arrival, but if any suspected disease or fever on board, advise Health Authority as well as Agent, and stand by instructions for berthing. Flag "Q" has to be flown on arrival in the roads.

RADIO: Saint-Pierre Radio, call sign TXU, receiving on 2182 kHz. transmitting on 2410 kHz.

Masters of vessels arriving are requested to send their ETA to Harbour Master Saint-Pierre at least 12 hours before arrival and corrected by a further message if necessary. The ETA should be given in GMT. Also advise maximum draft and length.

VHF: Saint-Pierre Radio is equipped with VHF Channels 16 and 25 and maintains permanent watch on Channel 16. Port Captain on Channels 12, 10, 9 and 16. Keeps watch on Channel 12.

TUGS: 1×500 h.p.

BERTHING: Mole du Commerce: Length 170 m., depth alongside 8.50 m. 2 sheds (total area 2,700 sq.m.), water and bunkers.

Quai de Peche: Length 134 m., depth alongside 5.2 m. to 9 m. Roll-on/Roll-off terminal, one ramp, max. capacity 50 tons, 6,000 sq.m. open storage.

Mole Frigorifique: 3 berths; No. 1: 120 m. length, 7 m. depth over length of 92 m. No. 2: 85 m. length, 6 m. depth. No. 3: 123 m. length, 5.5 m. depth. Cold store of 15,000 cu.m. at −30°C. Open storage area of 15,000 sq.m. Water and bunkers available at all berths.

Quai de la Douane: South Side: Length 72 m. Depth 6.0 m. Water, electricity and telephone available. West Side: Length 49 m. Depth 6.0 m. Customs office located at berth. East Side: Length 75 m. Depth 5.0 m.

Quai de l'Alysse: Length 50 m., depth 5.6 m. – 6.0 m. Water and electricity available. Berth used by fishery research vessels.

Quai du Frigorifique: New quay of length 56.4 m. with 2 mooring dolphins 100 m. to the East and West. Depth alongside 12.0 m. The berth can accept vessel of 200 m. LOA with draft of 10.0 m. Water and bunkers available.

Pilot will inform Master of berthing prospects and any special requirements.

STEVEDORES: ETA notices are to be sent to Agent 24 hours prior arrival. Stevedore in Saint-Pierre is Paturel Freres (Tel: 41.32.95 and 41.32.96). Cable Address "Reltupa Saint-Pierre". Telex: Reltupa 20 QN.

Approximately 60 men are available for working on board vessels when loading/discharging or transhipping in the port. Crew are allowed to work only when no gangs are available.

One normal shift 0730 to 1600 hrs. every week-day, Saturday 0730 to 1200 hrs. Day overtime, every day 1600 hrs. to 1900 hrs. Saturday 1200 to 1600 hrs.

Work done with ship's derricks.

It is requested that a net be put under gangway before starting work.

EQUIPMENT:

1 mobile crane, 10 tons at 18 m.
3 forklifts, 2 tons capacity.
2 forklifts, 7 tons at 3.5 m.
2 forklifts, 3 tons at 3.5 m.
1 tractor for 40 ton containers.
1×30 ton MAFI container trailer.

MEDICAL: All facilities available.

TANKERS: 1 berth (New Quay) alongside dolphins in depth of 12 m.

FRESH WATER: Available at berths. Supplied by hoses, rate 25 cu.m.p.h.

FUEL: Only diesel oil SG 825/840 at 15°C available at all berths.

CONSULS: Local representatives for Canada, Netherlands, Norway, Portugal and Spain.

REPAIRS: Small repairs can be effected. Floating dock, capacity 550 tons, for vessels up to 13 ft. 6 in. draft.

SURVEYORS: Bureau Veritas, Tel. 41.28.72.

OPENING/CLOSING HATCHES: Normally carried out by crew.

REPATRIATION: Can be arranged.

AIRPORT: Connections from Saint-Pierre to Halifax (Nova Scotia) International Airport.

TIME: GMT minus 3 hours all the year round.

AMBULANCE: Tel: 41.21.11 and 41.21.13 (switchboard).

TELEPHONES: Possible to place telephones on board at certain berths. It is possible to contact the shore on Channel 16 via Saint-Pierre Radio.

SERVICES: Compass adjusting, radar repairs, radio, Decca, Loran and gyro-compass repairs and maintenance possible.

BANKS:

Banque des Iles. Tel: (508) 41.22.17. Fax: (508) 41.25.31.
Credit St.Pierrais. Tel: (508) 41.22.49. Fax: (508) 41.25.96.

IDENTIFICATION CARDS: Each man to carry Passport or Seamen's Book.

GARBAGE DISPOSAL: Compulsory, daily collection of garbage carried out by a private company. Tel: (508) 41.41.17.

WASTE OIL DISPOSAL: Service effected by Speg-Oil. Tel: (508) 41.26.84, 41.21.98, 41.41.80. Fax: (508) 41.24.09.

SEAMEN'S CLUBS: No seamen's club, but following are available: Post office, sailing club, cultural centre, skating rink, football pitches, dance hall, bus and minibus.

Contact: Regional Tourism Agency. Tel: (508) 41.23.84.

CURRENCY: French Franc.

AUTHORITY: Direction du Port, Direction de l'Equipement, 6 Place Lieutenant Colonel Pigeaud, B.P. 4217, Saint-Pierre, 97500 Saint-Pierre et Miquelon. *Tel:* 41.32.01, 41.32.02. *Telex:* DDE SPM 914439 Qn. *Contact:* Jean Urtizberea, Port Captain. Tel. 41.24.10 (Office). 41.28.31 (Residence).

NOTES

Please also advise Shipping Guides Ltd.

St. Vincent and the Grenadines

KINGSTOWN: 13.09 N. 61.14 W. (See Plan)

PORT LIMITS: The imaginary line joining Old Woman's Point and Cane Garden Point.

DOCUMENTS:

Customs:

2 copies Ship's Stores List.
2 copies Crew's Stores List.
1 copy Crew List (in).
1 copy Crew List (out).
1 copy Passengers List (in).
1 copy Passengers List (out).
1 copy List of Unmanifested Cargo.
Clearance from Last Port.

Immigration:

1 copy Passenger List (in).
1 copy Passenger List (out).
1 copy Crew List (in).
1 copy Crew List (out).

Health Authorities:

1 copy Animal Declaration.
1 copy Derat Certificate.
1 copy Declaration of Health.

Harbour Master:

1 copy Passenger List (in).
1 copy Passenger List (out).
1 copy Crew List (in).
1 copy Crew List (out).

PILOTAGE: Agent to be notified of request for Pilot 24 hours prior to ETA. Boarding by Pilot at harbour entrance about 2 miles from anchorage. By day pilot boat flies pilot flag, by night shows signal-lights. Ship to fly "Request for Pilot" – flag by day and signal-lights by night. Also two long and one short blast (Morse Code "G").

ANCHORAGES: Well protected anchorages. Large vessels lie to in basin 90 ft. – 100 ft. depth. Average sized vessels berth at pier in 27 ft. – 40 ft. depth.

RESTRICTIONS: None.

HEALTH: Port Health Officer boards vessel at anchorage. Requires Bill of Health or Master's Declaration, and a copy of Passenger List. Vaccination Certificates are no longer required. Passenger and Crew Muster no longer required. No one allowed to embark or disembark before Pratique granted and Immigration Officials have boarded vessel.

RADIO: Cables should be routed through Cable and Wireless (West Indies) Ltd. Tel: 71901. Telegrams and Telex: 93. Signal Station maintains watch on SSB 2182 kHz throughout 24 hours.

VHF: The Fort Charlotte Signal Station should be contacted on VHF Channel 16 by vessels approaching, entering, manoeuvring in and departing from the Port.

RADAR: None.

TUGS: None.

BERTHING: One berth 900 ft. long. Max. draft approx. 30 ft. (salt water). Loading/discharging by ship's gear. Break-bulk (palletised) cargo handled. 10 ft., 20 ft. and 40 ft. containers handled on a limited scale (max. gross weight 10 tons).

CRANES: 35 tonne mobile crane available.

BULK CARGO FACILITIES: None at Kingstown.

Campden Park Bay, 2 miles North along the West coast – flour mill complex for receiving grain (bulk) and shipping flour. Max. draft 36 ft. One berth 300 ft. Loading gear – conveyor belt, height adjustable. Discharging into receiving hopper 25 ft. high. Loading: Max. 1,200 bags flour/feed per hour. Average rate 750 bags/hour. Discharge rate: Max. 60 t.p.h. per vacuator, average 40 t.p.h. Two vacuators normally used.

SPECIALISED CARGO HANDLING FACILITIES: No specialised berths for containers or Ro/Ro traffic.

Arnos Vale, a bay situated about 2 to 2.5 miles S.E. of Kingstown, features a buoy with a 4 in. floating line for LPG. Draft 14 ft.

BRIDGES: None.

STEVEDORES: 24 hours' notice of ETA required. Advise type of cargo, number of hatches to be worked, this required for arranging gangs of stevedores and longshoremen. Average discharge rate 3 – 5 tons per gang/hour.

MEDICAL: Advance notice to Agent of medical requirement is helpful. Hospital facilities available.

TANKERS: No facilities at Kingstown.

Arnos Vale (See "Specialised Cargo Handling Facilities") has available 3 buoys. Draft 24 ft., 17 ft. 6 in. and 14 ft. Serviced by floating and submarine line 6 in. and 4 in. Fuels available: White Products – Gasoline 93 R Octane, Kerosene Oil, Light Diesel Oil, Aviation Fuel; Black Products – R.C. 2 and Colas. Rate of discharge: White Products: 500 bbls./hr. Black Products: 300 bbls./hr.

Also see "Shipmaster's Report" dated February 1990.

DENSITY: Average 1025 oz/cu.ft.

FRESH WATER: Available. $5.00 (E.C.) per 100 gallons (I.G.). Delivery ex-pier by 3 in. line reduced by 1.5 in. nozzle – 2,500 gall./hr.

FUEL: Grades available. See "Tankers". 2 or 3 hours' notice during normal working hours required. Delivery ex Land-Tanker. Convenient to smaller craft only.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Consulate of the Netherlands (Mr. K. Boyer, P.O.Box 354. Tel: 84222, 72677).

French Consular Agent (Mr. Clifford Frank, P.O.Box 364. Tel: 61615).

Deputy British High Commissioner (Mr. M. D'ath, P.O.Box 132. Tel: 71701).

Embassy of the Republic of Venezuela. (Sr. Escobar C. Hernani, P.O.Box 852. Tel: 61374).

REPAIRS: Minor facilities only, e.g. minor mechanical repairs and simple welding, etc.

DRY DOCKS: There is a small mechanised dry docking cradle (privately owned) for small to medium sized yachts at Union Island, an island of the Grenadines chain 40 miles South of St. Vincent.

New dry dock at Super Yacht Base can accept vessels up to 65 m. length, 12.0 m. beam, 4.3 m. draft and 1,000 tons displacement. Tel: (809) 45-72178. Fax: (809) 45-61302.

SURVEYORS: Lloyd's Insurance (London). London representative: Messrs. Hazells Ltd., Kingstown. Tel: 61201. Telex: Hazells 7512.

GANGWAY/DECK WATCHMEN: Watchmen recommended. Rates fixed per day.

CARGO GEAR: Loading/discharging effected by ship's gear.

REPATRIATION: Facilities for crew changes and repatriation available.

AIRPORT: Arnos Vale Airport 2 miles from Port. Scheduled flights.

TIME: GMT minus 4 hours. No alterations to clock during the year.

HOLIDAYS: New Year's Day, (1st January); St. Vincent and Grenadines Day, (22nd January); Good Friday; Easter Monday; Whitsun Monday; Labour Day, (1st May); Caricom Day, (1st Monday in July); Carnival Day, (1st Tuesday in July); August Monday, (1st Monday in August); Independence Day, (27th October); Christmas Day, (25th December); Boxing Day, (26th December).

BANKS: Caribbean Banking Corporation, Middle Street, Kingstown, P.O.Box 118. Tel: 61501, 61502, 61503. Telex: 7513.

The Canadian Imperial Bank of Commerce, Halifax Street, Kingstown, P.O.Box 212. Tel: 71587. Telex: 7532 VQ.

Barclays Bank International Ltd., Halifax Street, Kingstown, P.O.Box 604. Tel: 61706. Telex: 7520.

The Bank of Nova Scotia, Corner White Chapel and Halifax Street, P.O.Box 237. Tel: 71601. Telex: 7546 VQ.

National Commercial Bank.

St. Vincent Agricultural and Loan Bank.

St. Vincent Co-operative Bank.

STORING: See "Prelims".

1. Vessels stored by truck.
2. No barges available.
3. Trucks allowed alongside.
4. Fork lift trucks can be used on jetty to handle stores.
5. Customs regulations regarding storing allows stores to be exported duty-free under Customs supervision, and sometimes Customs seals while in port.
6. Local Riggers available for assisting with storing.

POLICE/FIRE/AMBULANCE: Police Headquarters/Fire Department, Tel: 71211. Emergency: 99. General Hospital, Tel: 61185.

EMERGENCY CO-ORDINATION CENTRE: The Royal St. Vincent Police Station, Kingstown. Tel: 71211. Emergency: 99.

TELEPHONE: Two telephones available, $25.00 per day per phone.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Seaman's Book adequate.

GARBAGE DISPOSAL: Collection service is available. Skips are provided alongside ship. Contact Waste Masters, Kingstown, St.Vincent. Tel: (809) 457-1657. Fax: (809) 457-2768.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No seaman's clubs. There is an International Telephone Service at Cable & Wireless, Kingstown. Church services held Saturday/Sunday. Minibuses run up to 10 pm daily.

CURRENCY: East Caribbean Dollar (EC$).

REGULATIONS: No unusual regulations.

DELAYS: Normal delays in berthing etc., as a result of limited docking area.

GENERAL: *Charts:* BA. 501 and BA. 791.

DEVELOPMENTS: Deep Water Berth to be extended by 300 ft. – 400 ft. to the North and by 150 ft. to the South. No schedule available at present.

SHIPMASTER'S REPORT: January 1979 (Updated 1994).

Pilotage: Compulsory for vessels over 180 n.r.t. Pilot boards 0.5 miles South of Fort Charlotte Light. A heavy swell may be experienced and vessel is always rolling.

Restrictions: Vessel may enter and leave at any stage of the tide, however, berthing is not recommended during hours of darkness. Unberthing may be carried out at any time.

Max. Size: LOA 550 ft. Max. draft approximately 30 ft.

Radio: Fort Charlotte on VHF Channel 16 and SSB 2182 kHz.

Berthing: One berth only available, vessels always dock port side to. Wharf is concrete with hard rubber fenders. There are storage facilities for breakbulk cargoes and palletised cargoes, there is also mechanised equipment for handling bananas. Container stowage in the container park. Two toplifters for handling 20 ft. and 40 ft. containers, max. weight 30 tons. Loading rate for bananas 15 t.p.h. per gang using ship's derricks. Vessel's accommodation ladder required.

Facilities Available: Fresh water, fresh provisions, airport, laundry services, doctor, hospital, groceries, fish and meats.

SHIPMASTER'S REPORT: February 1990.

Berth: Shell and Texaco Terminal at Greathead Bay (Arnos Vale).

Approach: For Shell and Texaco oil terminals in Greathead Bay, vessels are first required to clear Customs and Immigration at Kingstown.

From the North West, Kingstown is easily passed by being rather inconspicuous, a small city tucked away at the head of its own bay.

Best landmark is Fort Charlotte on the promontory to the West of the town.

From the East, the airfield runway is easily seen on the N.W. side of Greathead Bay.

Anchorage: Vessels either anchor for clearance in Kingstown Bay if Greathead Bay berth is occupied, or at night, or just lie in the bay for clearance.

The water is deep and the only shallow area is within 1 cable of the harbour wall.

We anchored with 4 shackles in water with Cane Garden Point bearing 160° at a distance of 0.65 miles.

Pilot: Pilotage inwards to Greathead Bay is compulsory (0600 hrs. to 1800 hrs.). Pilot is embarked from a black hulled launch in Kingstown Bay. Pilot not required outwards. Vessels may leave at any time.

Signal Station: Fort Charlotte on VHF Channels 16/11 throughout 24 hours. Port Office on VHF Channels 16/11 from 0800 hrs. – 1600 hrs.

Oil Moorings: Position Lat. 13° 08.2' N., Long. 61° 13.2' W., in the Eastern end of the bay tucked under the promontory.

Depth at moorings about 8.0 m. minimum.

Vessels finally moor less than 1 cable from the cliffs.

The starboard anchor is let go abeam of cliff head (13° 08.08' N., 61° 13.13' W.), headland unnamed. Then one port breast line sent to buoy and 2 starboard stern lines sent to inshore buoy of two. Stern being pulled over to port quarter buoy so that buoy finishes up just forward of stern.

It is advisable to send port line first (use best available), then one stern line, gradually warping vessel into position.

There are 3 buoys, all painted white, the third buoy ends up on the starboard quarter and is generally not used.

Buoys only have eyes and require mooring shackles.

Vessel ends up with about 5 shackles in water, ship's head 190°.

Boatman has a dugout with outboard and also handles hoses.

Weather/Tides: Strong Easterly winds are prevalent which makes mooring difficult, particularly in heat of day.

Tides can be strong. The flood was observed running to East and ebb to West as at HW Kingstown. Flood is much stronger than ebb.

Due to prevailing wind, vessel does not, as a rule, set onto cliffs.

Best to moor at first light or at dusk.

Hose: At present the ship's floating hose of about 240 m. is run to Shell, slightly more to Texaco. Port side run off.

In June 1990, 3 submarine lines will be commissioned – 1×6 in. white oils, 1×6 in. RC250 (Bitumen) and 1×4 in. LPG. Pumping rate expected to be around 300 tonnes/hr.

Terminals: Shell centred in position Lat. 13° 08.28' N., Long. 61° 13.05' W. Texaco nearby to the West.

Shell tankage:

M 93	2,800 bbl.
ULG	2,800 bbl.
Av. Jet	3,400 bbl.
Av. Gas	1,000 bbl.
Gas Oil	6,000 bbl.
RC250	1,100 bbl.
No LPG tanks.	

Texaco has similar tankage plus LPG facility.

Shell normally use VHF Channel 9, so if not available on ship's Motorola, ship has to land ship's set.

Water plugs between grades.

Agent: Shell agent not seen at Kingstown. Texaco use St.Vincent Motors.

Documents: Officials require 6 Crew Lists, 2 Crew Manifests, 2 Bonded Stores Lists, 2 Stores Lists and Health Declaration.

No problems were encountered and the bond was not sealed.

AUTHORITY: The St. Vincent Port Authority, P.O.Box 1237, Kingstown, St. Vincent, W.I. *Tel:* (809) 45-61830, 72719. *Telex:* 7500 Cwagency. *FAX:* (809) 45-62732. *Contact:* Harbour Master: Captain Brenan B. King, Tel: 61830, 61400. Port Manager: L. Kirby, Tel: 72719. Chairman: Kevin Gibson, Tel: 45-64487. Chester Charles, Administration Officer.

Republic of Sao Tome and Principe

SAO TOME: 00.21 N. 06.44 E.

SHIPMASTER'S REPORT: May 1984.

DOCUMENTS:

6 copies Crew Lists.
6 copies Animal Lists.
6 copies Passenger Lists.
6 copies Arms and Ammunition Lists.
6 copies Ports of Call.
2 copies Personal Declaration.
2 copies Stores Declaration.
3 copies Cargo Manifests.

PILOTAGE: No service available.

ANCHORAGE: On the leading line shown on the chart, about 8 – 9 cables from the breakwater. By day or night the leading light structures are not easily recognisable. Vessels lie at anchor heading in a S.S.E.'ly direction and do not swing around to the tide. The ground, which is clearly visible when the sea is calm, is sand and holds well.

RADIO: Although Sao Tome has a listed radio station, it is not regularly attended and does not function properly. Masters are advised to send ETA messages via one of the major coast stations such as Cape Town. There is supposed to be a VHF station in port but this is also mostly unattended. There is telex connection to Europe.

BERTHING: *Cargo Handling:* If no other vessel in port, up to 200 tons per day in lighters of 40/60 tons each.

MEDICAL: There is a hospital and medical attention is available.

FRESH WATER: Not available.

AIRPORT: Sao Tome has regular flight connection with Luanda only. A once a month service to the Cape Verde Islands started in April 1984, on an experimental basis.

SHORE LEAVE: Crew members may go ashore but must return on board before 2000 hrs. They must carry their Passports with them.

GENERAL: *Provisions:* There is no ship chandling service. Some small amounts of fresh vegetables can be purchased.

Customs: The ship's bonded stores are not sealed by Customs.

Immigration: One policemen stays on board throughout the ship's stay in port.

Currency: The local currency is Dobras, about 33 Dobras = $1.00 (April 1984).

Mail: Because of the lack of direct flight connections, it is advisable not to send mail to or from Sao Tome.

SHIPMASTER'S REPORT: January 1989.

PILOTAGE: Not available.

ANCHORAGE: The anchorage is on the leading line shown on the chart, about 5 cables from the breakwater. The minimum depth of water is 10.0 m. and the holding ground is good. The vessel swings with the tide but generally heads in a South-Southeasterly or North-Northwesterly direction.

RADIO: Sao Tome Naval Radio Station is the local station, but is not regularly attended. None of the operators understands English. They will only reply if the vessel calls in the Portuguese language.

There is a manual telex connection with Europe, however ETA should be sent via a major coast station.

BERTHING: The length of the jetty is 200 m. and the maximum depth alongside at LW is said to be approximately 2.50 m.

CARGO HANDLING FACILITIES: Ocean-going vessels load and unload at anchor. There is a long Southeasterly swell and this makes operations dangerous. Vessel must have sufficient fenders for carrying out cargo operations.

The local stevedores are able to handle conventional derricks, but it is not recommended that they be allowed to handle sophisticated container cranes or other modern cargo handling gear.

There are approximately 10 lighters available for handling cargo of vessels at anchor and if only one vessel is discharging, a rate of up to 300 tonnes per day for breakbulk cargo can be achieved.

There are 4 lighters which are capable of carrying 1×20 ft. container at any one time and 1 lighter capable of carrying 1×40 ft. container.

The jetty is equipped with a fixed crane with 23 tonnes capacity and a mobile crane of 5 tonnes capacity.

There is only one lorry capable of carrying 40 ft. containers, therefore the discharge rate for 40 ft. containers is a maximum of 5×40 ft. containers per day. The discharge rate for 20 ft. containers is a maximum of 20×20 ft. containers per day.

As there is a lack of lorries to handle containers the harbour can become congested.

SHORE LEAVE: Crew members are allowed ashore, but must return aboard the vessel before 2300 hrs. Whilst on shore, crew must carry their Seaman's Books.

GENERAL: Sao Tome is a suitable place for conventional vessels, but is not recommended for pure container vessels, especially if they are not equipped with a powerful bow thruster, in order to work against the swell while unloading containers by own cranes.

NOTES

Please also advise Shipping Guides Ltd.

Saudi Arabia

GENERAL

NOTICE:

Saudi Arabia – Bahrain Causeway

The following Navigation Warning issued by the Saudi Seaports Authority – Riyadh is circulated to all concerned:

Date: 23.7.1407/25.11.1986

Subject: Navigation Warning "A" 172/25.11.1986

Saudi Arabia – Arabian Gulf – Saudi Arabia – Bahrain Causeway.

1. A causeway linking Saudi Arabia and Bahrain has been constructed and the following positions represent the centreline and general direction of the causeway:

A. Lat. 26° 13.17' N., Long. 50° 13.27' E.
B. Lat. 26° 13.20' N., Long. 50° 13.87' E.
C. Lat. 26° 13.15' N., Long. 50° 14.38' E.
D. Lat. 26° 12.83' N., Long. 50° 15.63' E.
E. Lat. 26° 12.70' N., Long. 50° 16.00' E.
F. Lat. 26° 11.33' N., Long. 50° 18.82' E.
G. Lat. 26° 11.02' N., Long. 50° 19.55' E.
H. Lat. 26° 10.92' N., Long. 50° 20.17' E.
I. Lat. 26° 10.83' N., Long. 50° 22.20' E.
J. Lat. 26° 10.17' N., Long. 50° 24.07' E.
K. Lat. 26° 10.05' N., Long. 50° 25.25' E.
L. Lat. 26° 10.28' N., Long. 50° 27.00' E.

2. Four Navigation Spans have been provided in the causeway, 1 main (Bridge No. 3) and 3 secondary (Bridge Nos. 1, 4 and 5).

(a) Main Navigation Span Bridge No. 3.
Centre of Span in position: Lat. 26° 12.10' N., Long. 50° 17.23' E.
Clearance Under Span: 28.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 122 m.
Depth of Water Under Span: 7 m. at Admiralty Chart Datum.

(b) Secondary Navigation Span Bridge No. 1.
Centre of Span in position: Lat. 26° 13.18' N., Long. 50° 13.58' E.
Clearance Under Span: 15.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 45 m.
Depth of Water Under Span: 5.5 m. at Admiralty Chart Datum.

(c) Secondary Navigation Span Bridge No. 4.
Centre of Span in position: Lat. 26° 10.87' N., Long. 50° 21.10' E.
Clearance Under Span: 15.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 45 m.
Depth of Water Under Span: 5.5 m. at Admiralty Chart Datum.

(d) Secondary Navigation Span Bridge No. 5.
Centre of Span in position: Lat. 26° 10.12' N., Long. 50° 25.75' E.
Clearance Under Span: 15.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 45 m.
Depth of Water Under Span: 4.5 m. at Admiralty Chart Datum.

3. (a) The North and South piles on the Eastern side of each navigation span are marked with red lights, while green lights mark the Western sides. These lights show over an arc of 40°, that is 20° either side of a line at right angles to the bridge span.

(b) Main Navigation Span Lights:
Characteristic: Occult 5 secs.
Height: 5 m.
Nominal Range: 5 miles.

(c) Secondary Navigation Span Lights:
Characteristic: Fixed.
Height: 7 m.
Nominal Range: 5 miles.

(d) The piles at either side of the navigable spans are also illuminated from above with floodlights.

4. Light beacons, Lateral System "A" with a height of 5 m., nominal range 5 miles and fitted with radar reflectors are to be inserted as follows:

Lat. 26° 12.87' N.,	Long. 50° 17.50' E.	Fl. Green 4 secs.
Lat. 26° 12.85' N.,	Long. 50° 17.58' E.	Fl. Red 4 secs.
Lat. 26° 12.48' N.,	Long. 50° 17.35' E.	Fl. Green 8 secs.
Lat. 26° 12.47' N.,	Long. 50° 17.43' E.	Fl. Red 8 secs.
Lat. 26° 11.73' N.,	Long. 50° 17.03' E.	Fl. Green 8 secs.
Lat. 26° 11.70' N.,	Long. 50° 17.12' E.	Fl. Red 8 secs.
Lat. 26° 11.35' N.,	Long. 50° 16.88' E.	Fl. Green 4 secs.
Lat. 26° 11.32' N.,	Long. 50° 16.97' E.	Fl. Red 4 secs.

5. All positions are referenced to the International Spheriod Datum Ain Al Abd (1970).

TRAVEL TO SAUDI ARABIA: *Crew Members' Wives' Passports:* We have been informed that the Director General of Passports, Riyadh, has notified Director of Passports (Eastern Province) Dammam, that wives of crew members arriving in Saudi Arabia and wishing to join their husbands on board vessels, are required to obtain, prior to arrival, valid Saudi Entry Visas from Royal Saudi Consulate in their countries.

The visa endorsed in passport must state the intention of joining the particular ship to obtain exit via seaport.

AUTHORITY: The Ports Authority of the Kingdom of Saudi Arabia formulates policy for and supervises the management and operation of the following ports:

	Lat.	*Long.*
East Coast:		
King Abdul Aziz Port, Dammam	26° 30' N.	50° 12' E.
King Fahd Industrial Port, Jubail	27° 04' N.	49° 40' E.
Jubail Commercial Port	27° 01' N.	49° 40' E.
Qatif	26° 34' N.	50° 00' E.
Darin	26° 32' N.	50° 04' E.
Al Khobar	26° 17' N.	50° 13' E.
Al Ugayr	25° 39' N.	50° 13' E.
Ras Tanura	26° 39' N.	50° 10' E.
Ras Al Khafji	28° 25' N.	48° 32' E.
Ras Al Ju'aymah	26° 56' N.	50° 03' E.
West Coast:		
Jeddah Islamic Port	21° 28' N.	39° 10' E.
Yanbu, King Fahd Industrial Port	23° 56' N.	38° 15' E.
Yanbu, Commercial Port	24° 05' N.	38° 03' E.

INERT GAS SYSTEM: Saudi Aramco has been informed that the Government of Saudi Arabia has ratified the Solas Convention of 1974 and its 1978 Protocol on May 29th, 1984. Therefore, Saudi Aramco is now obliged to enact the provisions of the said convention as soon as possible.

All Ship Owners/Operators to comply with the following:

1. Effective January 1st, 1985, all vessels of 70,000 d.w.t. and larger calling at any of Saudi Aramco's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.
2. Effective May 1st, 1985 all vessels of 20,000 d.w.t. and larger calling at any of Saudi Aramco's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.

Vessels not so equipped will not be accepted for loading as of the effective dates mentioned above.

The Solas Convention of 1974 represents a significant contribution to safety of tankers and oil installations and Saudi Aramco recommends that Ship Owners take immediate steps to comply with provisions of this convention as soon as possible and no later than the effective dates mentioned above. No exceptions will be allowed except in the most unusual circumstances.

Note: Saudi Aramco will follow the terms of the Solas Convention of 1974 and its 1978 Protocol *including* sections pertaining to exemptions. Any vessels exempted under this Convention will still, however, be required to comply with all Saudi Government Port Regulations as well as Saudi Aramco Safety Rules.

RULES/REGULATIONS: The Co-operation Council for the Arab States of the Gulf has issued a set of Rules and Regulations Valid for Saudi Arabian Seaports. These Rules and Regulations became effective on March 22nd, 1985.

EVERY VESSEL ARRIVING IN A PORT OF THE KINGDOM MUST HAVE A COPY OF THESE ON BOARD OR MUST OBTAIN ONE IMMEDIATELY ON FIRST ARRIVAL.

The Port Inspectors make periodical inspections and in the event of non-possession of the said Rule Book by a vessel, she may be penalised. If you already have one or after you get one, it is recommended that you read pages, 66-75, 163-172, 220-233 and 260.

Hereunder follows an EXTRACT from these Rules and Regulations:

General Regulations for Cargo Stowage and Handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum number of hatches compatible with the requirements of seaworthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge when shipped to the Kingdom of Saudi Arabia in conventional vessels.

3. Exceptions to palletisation:

(a) Bagged cargoes may be pre-slung.

(b) Bagged cargoes arriving in full ship-loads may be discharged loose provided that such cargo is taken by direct delivery and a minimum discharge rate of 1,200 tons per 24 hours is guaranteed.

Bagged cargoes arriving in part ship-loads may be discharged loose provided that such cargoes are taken by direct delivery and a minimum discharge rate of 250 tons per hook per 24 hours is guaranteed.

(c) Foodstuffs, if palletisation would adversely affect the total distribution costs, but the stowage must be arranged to obtain optimum discharge rates.

(d) Cargo carried on schooners and small craft of less than 70 m. in length which are engaged in coastal trade within the Arabian Gulf, the Red Sea and to/from Somali ports.

The weight per bag shall not exceed 50 kg.

4. Tyres should be in bundles of appropriate size or pre-slung.

5. Bundled steel, profile iron, rebars, etc., shall be fitted with slings or lifting points suitable for multiple handling before commencement of handling this type of cargo, the ship's Master or Agent must present to the Port Management a Certificate precisely stating the safe loading capacity of the relevant slings and lifting points. Failing to comply with this requirement will subject the vessel to financial penalties in addition to legal liabilities to third parties.

6. Steel sheets shall be strapped and stacked in bundles of approximately 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

7. Pallets must be stowed in a ship's hold in a manner to facilitate discharge and make the best use of cargo handling equipment within the holds.

8. All cargo listed on the dangerous cargo list according to IMO Rules must be stowed and handled as prescribed.

9. Masters and shipping Agents are to instruct their stevedoring contractors at loading ports to execute complete separation in accordance with Bills of Lading and the Manifest, and will be held responsible for non-compliance with this regulation.

10. Comprehensive regulations govern the carriage of livestock by sea and their handling at ports in the Kingdom of Saudi Arabia, also the carriage and handling of bagged oil cake and scrap.

Unitisation of Timber:

11. Sawn timber, plywood and veneer is to be unitised. Timber cargoes shall be properly strapped to withstand multiple handling. Bundles shall be separated by skids or dunnage to facilitate lifting or handling by forklifts. Each bundle should weigh between 2 and 3 tonnes.

Bagged Cement, Lime, Gypsum and Similarly Packed Cargo:

12. Bagged cement in paper bags must be packed in 5-ply strengthened paper supported by an inner skin of polythene or similar waterproof material. If there is no synthetic layer, the bag must be made of extra-strengthened paper (minimum 6-ply), or of materials whose proven strength is at least equivalent to the above.

In the square of each workable hatch opening within the plumb of the ship's discharging gear, a block of bagged cement must be left in pre-slung form in flat straps capable of lifting the bagged cement in safe working loads without damaging the packaging. This block must have dimensions of at least 6 m. × 9 m. horizontally and these dimensions must be maintained down to the bottom layer.

(Additional regulations apply.)

13. The Master of any vessel carrying grain to a port, whether in bulk or in bags shall present an official certificate from the country of origin stating that the cargo was free from infestation and that it has been fumigated either before or after loading, in addition to a Certificate stating that the vessel was free from infestation prior to commencement of loading. Without these certificates the vessel will not be permitted to discharge and will be liable to the imposition of a fine.

14. The discharge of cargo for transhipment to another port, whether local or foreign is strictly forbidden without the prior permission of the competent authority.

The transfer of cargo from one vessel to another at anchorage or alongside berths within the port boundaries is strictly forbidden without the permission of the competent authority.

PORT REGULATIONS:

ARRIVAL:

1. Notification to the Port Management

1.1 The Owners of vessels bound for a port in the Kingdom of Saudi Arabia with cargo must give preliminary notice of the vessel's intended arrival to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents on arrival at the first or sole loading port, before loading commences. Estimated time of arrival and estimated quantity of cargo by type must be given with the preliminary notice.

1.2 On completion of loading cargo for Saudi ports the following information must be sent to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents:

(a) Vessel's name and former names, if any.
(b) Flag, port of registry and call sign.
(c) Length overall, g.r.t., n.r.t. and d.w.t.
(d) Expected draft on arrival.
(e) Expected time of arrival.
(f) Cargo particulars, including nature, weight, tonnage and stowage by hatches. Car carriers, Ro-Ro and container vessels to give both number and weight in tonnes of each type of unit.
(g) Any other cargo being carried for other destinations.
(h) If dangerous cargo is being carried, the quantity and class must be indicated in accordance with the IMDG Code and it must be stated whether this cargo is to be discharged or is in-transit.
(i) Number, position and S.W.L. of derricks and/or cranes, and particulars and positions of ramps.
(j) The number and nationalities of passengers to be disembarked or in transit.
(k) Expected requirements for bunkers and water.
(l) Name of vessel's Agent.
(m) Not less than 48 hours before the vessel's arrival a detailed List of Arms and Ammunition carried on board purely for self-defence. Failure to comply with this requirement will result in heavy fines and seizure of the arms by the concerned authorities.

1.3 A vessel bound for a port in the Kingdom of Saudi Arabia for loading or bunkering must notify the Port Management immediately orders have been received to proceed to Saudi Arabia giving the information as in 1.2 above but relevant for loading or bunkering.

1.4 A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Also see "Advance Notice Requirements".

2. Vessels Failing to Give Required Notifications

2.1 Any vessel failing to comply with the requirements under section 1 above or arriving later than expected under the revised ETA, may lose its berthing registration and will be held responsible for all expenses incurred by the Port Management.

2.2 Exemption from the requirements listed under paragraph 1 above may be granted by the Port Management to vessels engaged in coastal trading or which have departed from a neighbouring country, depending on the availability of proper communication between the relevant ports, and the duration of the vessel's voyage.

3. Permission to Enter Port

3.1 The Master of a seagoing vessel must have prior permission of the Port Management to enter the port. Such permission may be subject to special restrictions or conditions if:

(a) The vessel arrives before or after the given ETA;
(b) The vessel is in danger of sinking;
(c) The vessel or the cargo is on fire or if there is the possibility of a fire, or if after a fire, it is uncertain whether it is completely extinguished;
(d) The vessel is a tanker;
(e) On account of the vessel's size or construction its movements or that of any other vessels or the port operations are endangered, hindered or impeded;
(f) On account of the condition of the cargo, the vessel is dangerous;
(g) The vessel arrives under tow;
(h) The vessel is over-loaded;
(i) The vessel has any person or animal on board suffering from an infectious or contagious disease, or if the presence of such infection, contagious or epidemic disease is suspected on board;
(j) The vessel is powered by nuclear energy, the arrival of such a vessel must be notified in accordance with the requirements as prescribed in section 1;
(k) If the vessel carries deck cargo which extends beyond her side.

4. Registration for Berthing

4.1 Vessels will be registered for berthing in accordance with the time given for arrival in the revised ETA. The Port Management reserves the right to refuse registration or to cancel the registration of any vessel already registered if required by port operations or for any infringement of these regulations by the vessel.

"Sambuks, schooners, yachts or any craft not registered in the port without radio transmitting equipment, shall stay first in "Small Craft Anchorage" for the visit of Authorities before proceeding inside the port."

5. Priority for Berthing

5.1 Allocation of berths shall be under the control of the Port Management who, in case of excess demand on facilities, shall have the power to use their discretion to give priority to:

(a) Vessels carrying passengers or pilgrims;
(b) Vessels carrying livestock;
(c) Vessels carrying essential or perishable foodstuffs;
(d) Vessels carrying refrigerated cargo;
(e) Any other vessel for special reasons.

6. Papers and Documents Required (see also special requirements for individual ports).

6.1 *Vessel's Papers and Documents*

6.1.1 On arrival at any port in the Kingdom of Saudi Arabia, the Master of each vessel shall present or make available for inspection the following papers and documents:

(a) Log Books;
(b) Registration Certificate;
(c) Classification Certificate;
(d) Load-line Certificate;
(e) Building Safety Certificate;
(f) Safety Equipment Certificate;
(g) Radio and Wireless Certificate;
(h) Cargo Gear Certificate;
(i) Marine Health Declaration;
(j) Vaccination List;
(k) Rat–Free Certificate;
(l) Clearance from the Last Port of Call;
(m) Israel Boycott Declaration;
(n) Ship's Stores List;
(o) Grain Shipping Certificate if the vessel is carrying a grain shipment;
(p) Mail Transport documents in accordance with the "International Postal Treaty" if any mail is carried aboard;
(q) 5 copies Crew List including name, nationality, date and place of birth, Passport number and rank;
(r) 5 copies of the Passenger List including name, nationality, date and place of birth, Passport number, port of embarkation, port of disembarkation;
(s) 2 copies of the List of Personal Effects of Crew and Passengers.

6.1.2 To obtain port clearance the Master of the vessel shall present or make available for inspection the following papers and documents to Port Management:

(a) Log Book;
(b) Registration Certificate;
(c) Classification Certificate;
(d) Load Line Certificate;
(e) Building Safety Certificate;
(f) Safety Equipment Certificate;
(g) Radio and Wireless Certificate;
(h) Port Stevedore Outturn Reports;
(i) Receipt for Payment of Custom's Duties;
(j) Shipping Note and Cargo Manifest for any cargo loaded.

6.2 *Cargo Papers and Documents*

6.2.1 The following papers and documents must be submitted to the Port Management not later than 48 hours prior to arrival (exemptions may be granted under certain circumstances at the discretion of the Port Management):

(a) 5 copies of the Cargo Manifests for Discharge, including any additions or amendments in English; 10 Copies of the original manifests accurately translated into Arabic;
(b) 2 copies of the Cargo Stowage Plan;
(c) 2 copies of the Hatch List or Bay Plan;
(d) 2 copies of the List of Dangerous/Hazardous Cargo for Discharge;
(e) 2 copies of the List of Dangerous/Hazardous Cargo in Transit;
(f) 2 copies of the List of Heavy and/or Awkward Cargo which requires special equipment;
(g) 2 copies of the List of any Wine, Spirits and Narcotics or Cargo of such nature on the vessel and its location or, in the absence of which, a nil return;
(h) A Declaration of type of reefer cargo;
(i) An Application for discharge permit;

6.2.2 *Specifications*

(a) All copies of the Manifests must be taken from the Master Manifest.
(b) The consignee column in all cargo manifests shall include the full name and address of the consignee. If for legal/commercial reasons a bank or financial institution appears as consignee in the Cargo Manifest, the name of the final consignee, if known, has to be shown beside the name of the bank.

(c) In case of transhipped cargo, the Cargo Manifest must show the name of the pre-carrying vessel, the port of transhipment and the bill of lading number for each consignment.
(d) The List of Dangerous/Hazardous Cargo must show:
  (i) The technical name;
  (ii) The IMDG Code class and UN number;
  (iii) The Quantity of each consignment;
  (iv) The location on board and bay number, if stowed in containers, or lash barges or on trailers.

6.2.3 *Exceptions*
(a) Vessels will be allowed to produce the aforementioned papers on arrival, provided the Port Management has received the following details by telex not less than 24 hours prior to arrival:
  (i) Name and flag of vessel;
  (ii) Port(s) of loading;
  (iii) Bill of Lading numbers;
  (iv) Marks and numbers as per Bills of Lading;
  (v) List of dangerous/hazardous cargo;
  (vi) List of heavy packages above 3 tonnes and/or awkward cargo lifts;
  (vii) Total number of Bills of Lading. LASH operators shall relate bills of lading to specific barge numbers;
  (viii) Statement of wine and spirit shipments for other ports showing where stowed or in the absence of which a nil return.
(b) A vessel carrying more than 200 Bills of Lading consignments for discharge in any one Saudi port is requested to submit cargo manifests not later than 72 hours prior to arrival.

7. Exempted Vessels

Exempted from the provision of Regulations 1, 2 and 4 are vessels entering in case of:
(a) Distress;
(b) Emergency refuge;
(c) Force majeure;
(d) Need of medical assistance.

8. Signals and Approach

8.1 Every vessel approaching the limits of a port must hoist the following flags:
(a) Ship's signal letters (in case of VHF failure);
(b) International code 'Q'-flag(s) in accordance with international health and safety regulations;
(c) International code 'B'-flag if the vessel is carrying dangerous goods or hazardous materials;
(d) The national flag of the country to which the vessel belongs.

9. The Flag of the Kingdom of Saudi Arabia

9.1 Every vessel entering a Saudi port must hoist the flag of the Kingdom of Saudi Arabia and keep it flying at all times throughout the stay in the port.

10. Pilotage

Pilotage is compulsory for all vessels entering or navigating within or leaving the pilot zones in the Kingdom of Saudi Arabia.

10.1 *Exempted Vessels*

The following vessels are exempted from the provisions of compulsory pilotage:
(a) Saudi Warships;
(b) Vessels of the government of the Kingdom of Saudi Arabia not designated for commercial use;
(c) Vessels under 150 net registered tons;
(d) Craft employed solely within port limits;
(e) Yachts and pleasure craft;
(f) Vessels operated by Port Management.

10.2 *Pilot Signals*

Every vessel subject to compulsory pilotage as above and which requires a Pilot shall:
(a) From sunrise to sunset hoist the international code flag "G";
(b) From sunset to sunrise give the letter "G"(– – ·) by a signal lamp;
(c) In the event of poor visibility caused by rain, fog or dust, sound the signal "G" (– – ·).

Vessels equipped with VHF should call the Port Control Signal Station on frequencies published by the port as soon as the vessel enters within VHF range.

Vessels having a Pilot on board must hoist the international code flag "H".

11. Valid Cargo Gear Certificate

11.1 All vessels must have a valid Cargo Gear Certificate issued by one of the following societies approved by the Ports Authority:
1. American Bureau of Shipping.
2. Bureau Veritas.
3. Det Norske Veritas.
4. Germanischer Lloyd.
5. Lloyd's Register of Shipping.
6. Nippon Kaiji Kyokai.
7. Polski Rejestr Statkow.
8. International Cargo Gear Bureau Inc.
9. Jugoslavenski Registar Brodova
10. China Corporation Register of Shipping

or any other competent authority recognised by the Government of the country in which the certificates are issued.

11.2 No rope, tackle, block, chain, hook or any other gear which is worn, damaged or otherwise unsuitable shall be used for the purpose of hoisting, lowering, heaving or otherwise handling of slung cargo or other articles. All cargo handling gear is to be tested and inspected according to Schedule B to these Regulations.

11.3 Vessels of more than 15 years of age at the start of a voyage as determined by the date of the first or sole Bill of Lading must carry out a cargo gear inspection of all cargo gear including deck machinery and the supply of power thereto, prior to loading for a Saudi Arabian port, and an appropriate inspection certificate should be issued.

This Certificate is valid for a period of 6 months. No general statements will be accepted. The Surveyor has to state that the inspection has been carried out on each part of the gear, deck machinery and its power supply, that he has observed each derrick, crane, winch, etc., in operation and each part has been found in good working order, and that all required current inspections as per Schedule B in this part have been fulfilled.

The Inspection Certificate must be provided by an approved Survey Bureau, Classification Society or an approved Government Department. *Exemptions:* 11.3 above does not apply to vessels less than 70 m. LOA engaged in coastal trades.

ADVANCE NOTICE REQUIREMENTS: The information below has to be telexed twice to respective Port Authority (with copy to Agent). The first telex to be sent (with estimated details) at the time vessel arrives at first port of loading, to be called 'preloading advice'. The second telex to be sent (with correct details) at the time vessel sails from the final port of loading, to be called 'final advice'.
1. Call Sign.
2. Vessel's name.
3. Owners/Line.
4. Nationality.
5. Agent.
6. LOA (m.).
7. Max. Draft (m.).
8. Hatches/holds.
9. G.R.T.
10. N.R.T.
11. D.W.T.
12. Vessel's previous name.
13. Vessel type.
14. Cargo type.
15. Total cargo weight tonnes.
16. Total cargo freight tonnes.
17. No. of containers/units.
18. No. of livestock.
19. ETA.
20. Actual arrival draft.
21. Hatchwise tonnage.
22. Year built.
23. No. of LCL containers and quantity showing each Bill of Lading number in that container.
24. Fumigation and Cleanliness Certificates in case of foodstuff cargoes.
25. Each loading port name where cargo loaded for Saudi port.
26. Economic Speed.
27. Vessel position 48 hours before arrival.
28. Last 3 ports of call.
29. Next port after Saudi port.
30. Vessel's Lloyd's Registered Number.
31. Port of Registry.
32. Hazardous cargo for Saudi port.
33. Hazardous cargo in transit for other ports.
34. P & I Club name and local correspondents.
35. Confirm that 5, 2, 1 day ETA notices with Call Sign, draft, cargo for Saudi port, hatchwise distribution, Master's name, crew number, nationality, previous/next port, vessel's position 48 hours' prior arrival and radar data will be supplied to port by the Principals/Master.

If the undermentioned information has not previously been given it is to be included in the advices:
(a) Type of radar.
(b) Frequency.
(c) Scan rate.
(d) Pulse width.
(e) Pulse peak power.
(f) Pulse repetition frequency.
(g) Beam width.

If the vessel is equipped with several radars the characteristics of each radar must be given.

Upon receipt of such information, the relevant Port Authority will give clearance date for the vessel to enter the port.

The following documents should arrive with the Agent in Saudi Arabian port latest 7 days prior to vessel's arrival date and subject to Arabic translation be submitted to Authorities latest 72 hours prior to vessel's arrival:

18 copies Cargo Manifest.
18 copies Freight Manifest.
18 copies Dangerous Cargo Manifest.
4 copies Hatch List.
4 copies Stowage Plan.
4 copies each Bill of Lading (3 Non-Negotiable)
4 copies Heavy Lift Cargo separately.

POLLUTION: Fines and penalties for not complying with the International Convention for the Prevention of Pollution of the Sea by Oil, 1975 are:
(a) Discharging oil or oily-mixture within 100 miles from the Kingdom's Coasts – one year imprisonment or S.R.20,000 (Saudi Riyals) or both.
(b) Saudi Flag Ships discharging oil or oily-mixture in any prohibited zones or areas mentioned in the conventions, the same fine and penalty as in (a).
(c) Not keeping the oil record book in the ship – 6 months imprisonment or S.R.2,000 (Saudi Riyals), or both.
(d) Not keeping the oil record book up to date – fine up to S.R.5,000 (Saudi Riyals).

SHIP'S FUEL TANKS: *Circular No. SEAPA – 15335/85.*
To: All Shipping Agents.
cc: All Ports.
From: The President and Chairman of the Board, SEAPA.
Date: 14.7.1405/04.04.1985
Subject: Flammability Check of Ship's Fuel Tanks.

With immediate effect you are advised to inform all concerned parties that the Port Management of all SEAPA ports will require additional flammability checks on fuel tanks of O/B/O carriers and tankers excluding tankers engaged solely in the transport of chemicals.

The purpose of this extra precaution is to deter the use of cargo oil as fuel supplement, and will be required on a random basis as advised by the Port Operations Department. The results are to be incorporated (when applicable) on the Gas Free Certificate.

When such random test is required by the Port Management, it will be necessary for the ship's Agent to arrange for the services of a surveyor.

For your information, if the atmosphere in any fuel oil bunker tank is discovered at more than 15 per cent (LEL), then the ship's Master will be required to engage a surveyor to provide an exact flashpoint analysis of the tank contents.

Furthermore, should the flashpoint be less than the prescribed limits stipulated in Regulation 33 of SOLAS, the Port Management reserves the right to remove the ship from the berth.

Regards:
Fayez I. Badr,
President and Chairman of the Board,
Ports Authority,
Kingdom of Saudi Arabia.

NAVIGATION INFORMATION: The Agents have the responsibility to deliver to the Master the updated copies of the Radio Navigational Warnings and Notices to Mariners issued by the Ports Authority, covering Saudi Waters.

AL KHOBAR: 26.17 N. 50.13 E.

ALSO SEE "GENERAL" BEFORE FIRST PORT.

PORT LIMITS:
Harbour Boundaries:
All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Latitude: 26° 16' 12" N.,	Longitude: 50° 12' 54" E.
Latitude: 26° 16' 12" N.,	Longitude: 50° 13' 18" E.
Latitude: 26° 12' 00" N.,	Longitude: 50° 13' 36" E.
Latitude: 26° 12' 00" N.,	Longitude: 50° 19' 20" E.
Latitude: 26° 17' 12" N.,	Longitude: 50° 19' 20" E.
Latitude: 26° 17' 12" N.,	Longitude: 50° 13' 06" E.

DOCUMENTS: Crew List required by Port Authority 48 hours prior to vessel's arrival.

PILOTAGE/ANCHORAGE/RADIO: There are no official anchorages, Pilots or radio facilities at Al Khobar port, which is only used by small craft.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
Total	500	3.4	General cargo and passenger, including a 10 m. wide quay ramp.

Total shed area (3 sheds): 8,200 sq.m.
Total open storage area: 6,900 sq.m.
Vehicle parking area: 6,900 sq.m. (inside security).
11,400 sq.m. (outside security).
Passenger terminal: 750 sq.m.

EQUIPMENT:
Forklifts: Forklifts up to 10 tons available.
Mobile cranes: 3 up to 20 tons, 1 between 20 and 40 tons.

AUTHORITY: Al Khobar Port Management, *Contact:* Rabah Al Hazeemi, Port Director.

AL QADIMAH: 22.21 N. 39.05 E.

ALSO SEE "GENERAL" BEFORE FIRST PORT.

PILOTAGE: The Pilot boarding place is West of the inner coastal reef in position Lat. 22° 20.5' N., Long. 39° 01.6' E. Pilotage undertaken during daylight only.

ANCHORAGE: To the North of the entrance channel in depth of 15 m. – 20 m.

VHF: Before entering the approach channel permission should be obtained from Qadimah Port Control, calling Channel 16 and working on Channels 72 and 74.

TUGS: 2 tugs available.

BERTHING: The port is used for unloading military cargoes. Vessels berth alongside 2 pontoons (150 m.×25 m. each) with depths of 13 m. – 14 m. alongside. Ro/Ro facilities available.

CRANES: Floating crane with lifting capacity 150 tonnes and mobile cranes available.

FRESH WATER/FUEL/PROVISIONS: Not available. Vessels should arrive with sufficient for their needs, making allowances for delays which may be experienced.

AUTHORITY: Ministry of Defence and Aviation.

DAMMAM (King Abdul Aziz Port): 26.30 N. 50.12 E. (See Plan)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: Situated approximately mid way along the Eastern coast. It is the principal port of Saudi Arabia in the Arabian Gulf.

PORT LIMITS: The Seaward Limits of the Port of Dammam are bounded by a line joining the following positions:

Latitude	Longitude
26° 28.76' N.,	50° 10.85' E.
26° 29.24' N.,	50° 09.05' E.
26° 34.14' N.,	50° 09.05' E.
26° 34.14' N.,	50° 10.05' E.
26° 34.47' N.,	50° 10.78' E.
26° 37.89' N.,	50° 14.25' E.
26° 37.89' N.,	50° 16.05' E.
26° 26.64' N.,	50° 16.05' E.
26° 26.64' N.,	50° 11.86' E.
26° 24.90' N.,	50° 11.04' E.

and thence to the shoreline. A circular 95 m. high Marine Control Tower comprising 3 storeys at a height of 74.4 m. above ground level is located at Lat. 26° 30.65' N., Long. 50° 12.17' E.

Within the Port Limits the approach channel to the port is marked by buoys in accordance with IALA "System A". Depth of the approach is 15 m.

FLAG: In addition to the quarantine signals (See "Health") which are to be shown until Pratique is granted, the Saudi Arabian Flag must be flown from vessel's foremast while in port of Dammam. Saudi flags can be hired or purchased locally.

DOCUMENTS: In order to comply with Port, Customs and Agent's requirements, the following documents should be submitted to the Port Management via the Agent, at least 48 hours prior to arrival of vessel at Dammam port:

5 copies of the Cargo Manifest for discharge, including any additions or amendments in English; 10 copies of the original Manifest accurately translated into Arabic.
2 copies of Hatch List.
2 copies of Stowage Plan.
2 copies of List of Heavy Lifts.
2 copies of List of Long Length Cargo.
7 copies of List of Dangerous Cargo on board, if any.
Arms and Ammunition List, or "Nil" return.
Crew List showing Nationality.
Fumigation Certificate for Vessel and Cargo (if required).

The particulars of the Certificates required by the SOLAS regulations are entered on the Port's Form on the arrival of the vessel at the anchorage and the certificates are sighted after berthing.

Also see "Health", and "General" before first port.

APPROACHING: *Directions and Regulations for Vessels Entering or Leaving Dammam Port:*

Dry cargo vessels drawing 10.4 m. (34 ft.) or less should approach and leave by the East Channel.

Vessels in excess of 10.4 m. draft and vessels from Northward should use the Main Channel.

Prior to vessels entering the Ras Tanura Channel they must contact "Ras Tanura Radar Control" on VHF Channel 10, identify themselves and state where bound. Normal listening watch should then be maintained on Channel 16.

Vessels bound for Dammam Port must call "Dammam Port Control" 1 hour before the vessel's arrival at Buoy "D1" and give the following information:

(i) Vessel's name.
(ii) Length overall.
(iii) Maximum draft.
(iv) Cargo tonnage and main commodity.
(v) Hazardous cargo, if any.
(vi) Whether the vessel has a list.
(vii) Whether the vessel has any mechanical defects.

Vessels must not enter or navigate within the Port Limits without the permission of "Dammam Port Control". Inward vessels shall report the time of passing Buoy "D1" and shall keep a listening watch on Channel 16.

The speed of vessels within the buoyed channel is limited to 8 knots and overtaking other vessels within the channel is prohibited.

Anchoring within the buoyed channel is prohibited.

Upon arrival, if a vessel is instructed not to anchor in the Holding Anchorage, the Pilot will board abeam of Buoy "D13".

PILOTAGE: The pilotage area commences at Buoy "D1" (i.e. the channel entrance). Pilotage is compulsory and the normal Pilot Boarding Area is between Buoys "D11" and "D13". The only vessels allowed to proceed South of this position without a Pilot are exempted vessels, and vessels which would, under normal circumstances, require the services of a Pilot but have been instructed by "Dammam Port Control" to anchor in the Holding Anchorage.

Vessels bound for Dammam must contact "Dammam Port Control" 1 hour before arrival at Buoy "D1", giving details of ship (See "Approaching"), and must not enter the channel until permission has been given by "Dammam Port Control".

"Dammam Port Control" operates on the following VHF Channels: 16, 12, 13, 19 and 22.

Vessels Exempted from Compulsory Pilotage: These include:

(i) Vessels of the Royal Saudi Navy.
(ii) Vessels of the Saudi Government which are not assigned for commercial use.
(iii) Vessels whose nett tonnage is less than 150 tonnes.
(iv) Port craft.
(v) Pleasure yachts.

Also see "Radio".

Vessels less than 150 tonnes, port craft and pleasure yachts shall wait at Small Craft Anchorage for authorisation to proceed to the port.

ANCHORAGES: The following anchorages are allocated as necessary for vessels:

(i) *Holding Anchorage:* (Depth 15 m.) bounded by a line joining the following positions:

Latitude	Longitude
26° 31.64' N.,	50° 11.75' E.
26° 32.00' N.,	50° 10.05' E.
26° 33.54' N.,	50° 10.05' E.
26° 34.04' N.,	50° 11.83' E.
26° 33.03' N.,	50° 10.78' E.
26° 32.38' N.,	50° 11.00' E.

This anchorage is marked by Buoys.

(ii) *Working Anchorage:* (Depth 10 m.) bounded by a line joining the following positions:

26° 32.59' N.,	50° 12.10' E.
26° 32.28' N.,	50° 11.63' E.
26° 31.14' N.,	50° 12.76' E.
26° 31.59' N.,	50° 13.01' E.

(iii) *Explosive Anchorage:* (Depth 8 m.) bounded by a line joining the following positions:

26° 31.42' N.,	50° 13.60' E.
26° 31.50' N.,	50° 13.12' E.
26° 31.01' N.,	50° 12.96' E.
26° 31.01' N.,	50° 13.60' E.

(iv) *Small Craft Anchorage:* (Depth 6.5 m.) bounded by a line joining the following positions:

26° 30.89' N.,	50° 14.05' E.
26° 30.89' N.,	50° 12.88' E.
26° 30.14' N.,	50° 13.60' E.
26° 30.14' N.,	50° 14.05' E.

Anchoring in the channel is strictly forbidden.

MAX. SIZE: See "Berthing".

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dammam port. These signals shall be displayed continuously until Pratique granted. Signals are as follows: Sunrise to sunset – Quarantine Flag; Sunset to sunrise – Signal Lights – red over white.

The Quarantine Officer will board the vessel either at anchorage or at pier.

Documents required for immediate inspection are the following:
International Maritime Health Certificate (from the last port).
Valid Derat or Derat Exemption Certificate.
Crew List (3 copies).
Passenger List, if any.
Valid Cholera Certificates (of a date not exceeding 6 months) for all crew members and passengers.
Valid Yellow Fever Certificates for all crew members and passengers.
Certificates of Inoculation against any communicable diseases prevailing at the ports of departure.
Ship's Log Books.

RADIO: (Also see "Pilotage" and "Vessel Appointments").

Dammam Port has a modern radio communications system as follows:

(i) *VHF* – (Call sign "Dammam Port Control"). A continuous listening watch on Channel 16.
Working Channels are: Channels 12, 13, 19 and 22.
(ii) *Radio Telephone* – Facilities are available.

Note: International VHF Channels 01, 68, 71 and 73 are used for port and pilotage operations. Vessels must NOT use these Channels when in the vicinity of Dammam Port.

Telex: Dammam Port is connected to the International Telex network. The telex numbers are 801138 or 801139 Dapm SJ. Fax: 857-1727 (Director General), 858-3113 (Operations), 858-3340 (Marine Department).

Information is available from "Dammam Port Control" covering local weather conditions and any local hazards to navigation that may be appropriate from time to time. Suitable radar coverage is being provided in the Marine Tower.

Coast radio station at Dammam officially known as "Dammam Radio" with call sign "HZG". Tel: 826-5456, 826-5526. Fax: 827-4529. Telex: 802600 DMRD SJ, 802603 DMRD SJ. It is already in service employing radiotelegraphy, radiotelephony and radiotelex to provide radio communication link between vessels at sea and land based concerns.

VESSEL APPOINTMENTS: (See also "Radio").

It is a pre-requisite for all vessels trading to any Saudi Arabian port to give the appropriate Port Management the undermentioned information by telex on arrival at the first port of loading for Saudi Arabia:

In the case of Dammam Port, telexes should be sent to: The Port Director General, Dammam Port Management. Telex Nos. 801138 DAPM SJ, 801139 DAPM SJ.

(a) The information must be updated on leaving the final port of loading bound for Saudi Arabia:

1. Radio Code (Call sign).
2. Vessel's name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. Length overall (metres).
7. Maximum draft (metres).
8. Number of hatches.
9. Gross registered tonnage.
10. Nett registered tonnage.
11. Deadweight tonnage.
12. Previous name (if any).
13. Type of vessel.
14. Type of cargo.
15. Total cargo weight tonnes.
16. Total cargo freight tonnes.
17. Number of containers/units (where applicable).
18. Number of livestock (where applicable).
19. Estimated time of arrival.
20. Actual arrival draft.
21. Tonnage to hatch.
22. Year built.
23. LCL containers and/or ships convenience containers.
24. Fumigation Certificates (vessel and cargo).
25. Ports of loading for Dammam discharge.
26. Economic speed of vessel
27. Vessel's position 48 hours before arrival.
28. Previous port prior to Dammam call.
29. Next port of call on departure from Dammam.
30. Vessel's Lloyd's Register Number.
31. Port of Registry.
32. Arms and ammunition for vessel's self-defence.
33. Declaration of all transit cargo calling at Dammam port.
34. Last 3 ports visited by vessel.
35. Ramp position (if any).
36. Has the vessel specialised container handling gear.
37. Does cargo include hazardous/toxic waste.

Radar Details

1. Name of the vessel.
2. Flag.
3. Vessel's agent (name and address, telephone, telex).
4. Economic speed of vessel.
5. E.T.A.
6. Type of radar.
7. Frequency.
8. Scan rate.
9. Pulse width.
10. Pulse peak power.
11. Pulse repetition frequency.
12. Beam width.

Radar details are required to be passed on to Dammam Port Management 48 hours prior vessel's arrival Dammam.

Vessels equipped with more than one radar should give the information in Items 6 to 12 for each radar.

The name of vessel *and radio code* should be given in every subsequent telex for reference.

The absence of any of the above information may delay the granting of an entry date to the subject vessel.

(b) The above information must be backed up by further confirmation of ETA at 5 days, 2 days and 1 day prior to arrival at each port of call in Saudi Arabia.

Note: Penalties may be imposed by the Saudi Ports Authority if the above rules are not strictly adhered to.

Berthing Arrangements: Providing the requirements above have been complied with, vessels will be allocated to berths, dependent upon type of cargo carried, prior to arrival. Berthing will then take place immediately upon arrival, weather permitting.

VHF: See "Radio".

TUGS: King Abdul Aziz Port has the necessary tugs, ranging from 460 h.p. to 4,600 h.p., mooring launches, pilot boats, fire fighting vessels, survey launch and specialised anti-pollution craft, booms and material, covering all the needs of marine operators and safety requirements.

Tugs operate within the Harbour Limits only for the purpose of assisting vessels in berthing and unberthing. Tugs join vessels inside the Inner Gate Beacons and normally require the use of ship's lines. Where the latter are considered inadequate, the tug's lines are used at the vessel's expense.

BERTHING: (Also see "Vessel Appointments").

The following categories of berth with a water depth from 7.8 m. to 13.2 m. are available, Ro-Ro, Container Terminals, Multi-Purpose, General Cargo, Grain, Explosives/Dangerous Cargo, Loading Fertiliser. Bulk edible oil and bulk white and grey cement handled.

In the main port there are 39 working berths for deep-sea vessels. They are located on 4 quays as follows:

East Port: *West Quay:* (King Abdul Aziz Pier, total length 2,500 m. approximately).

Berth No.	*Nominal Length* (m.)	*Depth* (m.)	*Berth Facilities*	*Type of Operation*
1	240	13.2	Grain Silos & Flour Mill	Grain/Dir. Dly GC
2	240	12.9	Zone-Barn	General Cargo and Bulk Grain
3	240	12.2	Zone-Barn	General Cargo and Bulk Grain
4	180	10.8	Shed-Zone	General Cargo
5	180	11.0	Shed-Zone	General Cargo
6	150	8.4	Shed-Zone	General Cargo

Berth No.	*Nominal Length* (m.)	*Depth* (m.)	*Berth Facilities*	*Type of Operation*
7	150	8.0	Shed-Zone	General Cargo
8	150	7.8	Shed-Zone	General Cargo
9	179	8.1	Shed-Zone	General Cargo
10	215	9.4	Zone	Load Fertiliser
11	180	10.1	Zone	General Cargo
12	180	11.2	Shed-Zone	General Cargo
13	180	11.0	Shed-Zone	General Cargo

Notes: 1. Where there is a shed on the berth the distance from the quay edge to the shed is 30 m.

2. Berths No. 1 – 13 are rail connected.

3. There are 21 portal cranes on Berths 1 to 13, with capacities from 6 tonnes to 15 tonnes.

East Quay: (Total length 1,750 m. approximately).

Berth No.	*Nominal Length* (m.)	*Depth* (m.)	*Berth Facilities*	*Type of Operation*
14	180	11.3	Shed/Zone-Barn Ro-Ro Ramp	General Cargo/ Ro-Ro
15	180	11.0	Shed-Zone-Barn	General Cargo
16	180	11.2	Shed-Zone-Barn	General Cargo
17	180	11.2	Zone	General Cargo
18	180	10.9	Shed-Zone-Barn	General Cargo
19	180	11.0	Zone	General Cargo
20	180	11.0	Shed-Zone-Barn	General Cargo
21	240	13.0	Zone	General Cargo
22	240	13.2	Zone/Ro-Ro Ramp	Multi-purpose

Notes: 1. Where there is a shed on the berth, the distance from the quay edge to the shed is 40 m.

2. Currently 28 portal cranes are in use on Berths No. 14 – 20 inclusive. Their capacities vary from 6 to 15 tonnes.

3. Berth No. 22 is a Multi-Purpose Terminal. The terminal is equipped with 2×30 tonne gantries.

West Port: *East Quay:* (Total length 2,800 m. approximately).

Berth No.	*Nominal Length* (m.)	*Depth* (m.)	*Berth Facilities*	*Type of Operation*
23	240	13.2	Zone Ro-Ro Ramp	Containers/Ro-Ro
24	240	13.0	Zone	Containers
25	240	13.0	Zone	Containers
26	240	13.2	Zone	Containers
27	240	13.0	Zone	General Cargo
28	240	13.2	Zone	General Cargo
29	240	13.0	Zone	General Cargo
30	180	13.1	Shed-Zone-Barn	General Cargo
31	180	13.1	Shed-Zone-Barn	General Cargo
32	180	11.6	Zone	General Cargo
33	180	10.9	Shed-Zone-Barn	General Cargo
34	180	11.0	Shed-Zone-Barn	General Cargo
35	205	11.2	Cold Store Terminal	Reefer Cargo/Ro-Ro Ramp

Notes: 1. Where there is a shed on the berth, the distance from the quay edge to the shed is 40 m.

2. Berths No. 23 – 26 make up Dammam Container Terminal (DCT).

West Quay: (Total length 960 m.).

Berth No.	*Nominal Length* (m.)	*Depth* (m.)	*Berth Facilities*	*Type of Operation*
36	180	9.8	Zone Ro-Ro Ramp	Bulk Cargo/Ro-Ro
37	180	10.4	Zone	Bulk Cargoes, including Cement
38	180	11.0	Silos/Bagging Plants	Bulk Cement/ Edible Oil
39	180	12.5	Apron and Explosion Chamber	Explosives/ Dangerous Cargo/ Livestock

Notes: 1. All berths are rail connected.

2. The quay, North of Berth No. 39, can be extended by 2,200 m. when additional berths are required in the future.

Updated information on available depths within the Port Limits can be obtained from the Harbour Master's Office.

In addition to the berths in the main port, a Small Craft Harbour is situated to the South of the East Port where small vessels, dhows, fishing vessels are handled. The depth of water varies from 6 m. to 4.5 m. The purpose-built facilities provide in excess of 1,600 m. of quay, large back-up areas and covered storage.

SPECIALISED CARGO HANDLING FACILITIES: *Grain Terminal:* This terminal provides purpose built facilities for loading/discharging all types of grain. These can be distributed to silo storage, or delivered direct to road, rail or to the adjacent flour mills. Discharge rate 480 t.p.h. with 2 pneumatic unloaders.

Ro-Ro Berths: All Ro-Ro Berths have ramps fitted with bow or stern access.

Dammam Multi-purpose Terminal: This terminal provides facilities for handling multi-purpose vessels (i.e. Ro-Ro, containers and general cargo). It is equipped with 2 container gantries.

Damman Container Terminal (DCT): This comprises Berths No. 23, 24, 25, and 26.

The terminal has 6 container gantries and its own rail terminal, with 2 rail-mounted, wide-span gantries and container storage area.

Extensive covered facilities are available for Customs inspection and clearance purposes. A purpose-built container freight station (CFS) for handling LCL shipments is also available.

Bulk Cement: Dammam Port has 2 allocated berths for the handling of cement in bulk (Berth No. 37 for grey cement and Berth No. 38 for white cement).

Berth No. 38 provides facilities afloat and on the quay. The terminal is rail connected.

Fertiliser Loading Berth: A berth is allocated for loading urea which is manufactured locally by the Saudi Arabian Fertiliser Co. (SAFCO). The bagged urea is transported by rail from the factory to the quayside where it is loaded directly into the vessel alongside by ship's gear or quayside portal cranes.

Dangerous Cargo Terminal: This 240 m. long berth has a depth alongside of 12.5 m. It consists of an open quay fitted with blast walls for direct delivery only and is road and rail connected.

Refrigerated and Frozen Cargo Terminal: 2 spiral conveyors unload reefer cargo into a 6,000 tonne capacity Cold Store.

CRANES: See "Cargo Handling Equipment".

STORAGE AREAS: Adequate covered and open storage space is available in the form of warehouses, transit sheds, dangerous goods warehouses and zones, container terminals, container freight station, vehicle park and general cargo storage areas.

CARGO HANDLING DISCHARGE RATES: A strong and positive set of Port Rules is in operation. This guarantees high discharge rates and high standards of efficiency. Co-operation in observance of these rules by Shipowners and Agents makes a substantial contribution to the port's effectiveness. The most important of these rules are summarised below:

1. Every vessel calling at Dammam must make an appointment.
2. Every vessel, or Agent, must submit appropriate documentation prior to a vessel's arrival.
3. Any vessel over 15 years old shall obtain and submit a certificate issued by a competent and approved Authority that her cargo gear is in good working order before being allowed to discharge.
4. All cargo that is suitable shall be presented in unit loads on pallets or pre-slung.
5. No cargo shall be received into port premises in a damaged condition.
6. Every vessel shall be ready to discharge upon berthing. She shall continue discharging uninterrupted until all Dammam cargo is completed, whereupon she shall leave the berth without delay.
7. Overstowing Dammam cargo with cargo destined for another port is prohibited.
8. Transhipping cargo in Dammam for other ports is not allowed.
9. Cargo which is not removed from the Port by Consignees within 15 days is liable to be auctioned and sold.

The port's efficiency and handling rates are high, as indicated in the table below:

Indicative Handling Rates of Main Commodities during the Year 1993:

Cargo	*Weight Tonnes per Gang Hour* Gross	Nett
Bulk Grain	4,000/6,000	4,000/6,000
	(per 24 hours)	
Timber	31.7	25.9
Bagged Cargo	23.8	17.1
Steel Pipes	52.3	39.5
General Cargo	29.3	21.2

STEVEDORES: Stevedoring operations on all berths except grain silo, bulk cement and the container terminals (DCT and Dena Marineco) are performed by 2 contracted stevedoring companies.

CARGO HANDLING EQUIPMENT: Dammam Port has an extensive fleet of equipment including:

Mobile Cranes up to 136 tonnes.

Gantry Cranes up to 30 tons with an outreach from the quay wall of 32 m.

Gantry Cranes up to 40 tons and a Floating Crane of 200 tons capacity.

RTG and RMG Straddle Carriers, terminal tractors, towing tractors, trailers.

MEDICAL: Masters may obtain medical attention for ship's personnel from Port Doctor who may, in case of serious illness or injury recommend treatment to a local hospital. Normally the Port Doctor will treat minor illness on board ship.

Urgent hospitalisation can also be arranged via the ship's Agent. Masters of vessels at sea may use services of Dammam Port Radio to obtain medical advice at any time.

DENSITY: The average density (salinity) of the sea-water in the Port of Dammam is 1030.

WATER: Water is available. Vessels requiring a supply of water should make arrangements through their Agent.

FUEL: There are several private Bunkering companies who operate in Dammam Port. By arrangement through the ship's Agent, bunkers can be supplied by barge at anchorage or alongside. Road tankers are also used for bunker deliveries. Various grades of fuel are available. Strict rules apply and severe penalties will be imposed should any oil spillages occur during bunkering operations or from any other cause. Anti-oil pollution equipment and dispersants are available.

Also see "Ras Tanura".

CONSULS: The U.S. Consulate General resides at Dhahran (approximately 20 km. inland from Dammam). A British Consular Official resides locally.

REPAIRS: King Fahd Ship Repair Yard (KFSRY), located within the port contains 2 floating dry docks, with capacities of 22,000 tonnes and 10,000 tonnes, together with all necessary facilities to provide a complete range of ship repairs and maintenance services.

Deep sea divers, operating from modern and well equipped diving boats, are available at Dammam.

Repair and maintenance services for electronic equipment are available at Dammam Port.

DRY DOCK: Main particulars:

Lifting capacity 22,000 tonnes.

Length overall 215 m.

Outside width 43 m.

Clear inside width 36 m.

Moulded depth to upper deck 16.30 m.

Immersion depth over keel blocks 7.55 m.

SURVEYORS: Available.

CUSTOMS: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The importation of the following articles is completely banned:

(a) Alcoholic beverages, including beer and wines.
(b) Narcotics.
(c) Pornographic material.

Trafficking of the above items between ship and shore is strictly prohibited, regardless of whether vessels are alongside at berths or at anchor. Consumption of alcoholic beverages is prohibited during a ship's stay in port. All alcoholic beverages must be placed in bond (Master's, officers, crews and bar).

The following articles can be imported after obtaining permission from the authorities concerned:

(1) Explosives.
(2) Firearms.
(3) Antiques.
(4) Religious material not pertaining to the Muslim faith.

REPATRIATION: Possible, but not encouraged.
AIRPORT: Very good airline facilities are available from Dhahran Airport. Daily departures take place for many parts of the world.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Dammam Port offers continuous cargo handling operations through the year and sufficient manpower is always available.

All ships must be dressed if they are in port, or entering port, on the following official holidays or events:

1. Eid Al Fitr.
2. Eid Al Adha.
3. Saudi Arabian National Day.
4. Royal visits to the port.

Port staff will advise vessels in port prior to any forthcoming event, and vessels approaching port will be advised by the Port Radio Control.
EMERGENCY CO-ORDINATION: In the event of marine emergencies in the area, the Dammam Port Harbour Master should be contacted.
TELEPHONE: The port's telephone number is 833-2500 and is open for 24 hours. Expansion is planned which will include ship to shore communications at all berths.
STORING: Vessels may take stores on board and arrangements should be made through the ship's Agent.
SHORE LEAVE: Ship's personnel and passengers are not normally permitted ashore unless special permission is granted by Immigration and Police Authorities. The necessary arrangements can be made by ship's Agent upon receiving the Master's request and Seaman's Books. While in port, the vessel's personnel are under jurisdiction of the Law of Saudi Arabia.
WEATHER: The peninsula of Saudi Arabia is almost of an equatorial climate. Summertime rising to over 45°C. Rain is generally scarce. During major part of year, but especially during Summer, the relative humidity is high. From July to September it frequently exceeds 85%.

Winds in this area are not predictable for more than a few hours. They vary in strength and direction, although prevailing winds are from N.W.
TIDE: The Diurnal tide range at Dammam Port is approximately 2.00 m. – 2.45 m. at Springs, and 0.80 m. at Neaps. The flood tide sets to the S.E. across the harbour entrance and the ebb tide sets to the N.W. The rate of flow is very much dependent on the wind force and direction but seldom exceeds 2 knots.
AUTHORITY: Dammam Port Management, P.O.Box 28062, Dammam-31437, Saudi Arabia. *Tel:* (03) 833-2500 (24 hours). *Telex:* 800138, 801139 Dapm SJ. *FAX:* 857-1727. *Contact:* H.E. Naeem Ibrahim Al-Naeem, Port Director-General. Abdullah Al-Hamad, Assistant Port Director General.

AGENT: Gulf Agency Company Saudi Arabia, P.O.Box 335, Dammam 31411, Saudi Arabia. Cables: "Confidence Dammam". Ship-shore traffic via Dammam Radio/HZG. Telex: 801069 ("GAC SJ") Tel: 8328762-4, 8323425/7. Port Office 8583152, 8583196, 8583209; After office hours 8320877, 8583152. Fax: 8323035.

DHUBA: 27.21 N. 35.42 E. (See Plan)

LOCATION: 25 km. N.W. of Dhuba and 500 km. North of Yanbu.
PILOTAGE: Compulsory. Pilot station is located at Lat. 27° 34.3' N., Long. 35° 29.7' E. Pilot on VHF Channel 16.
ANCHORAGE: S.E. of Sila Shoal Buoy in position Lat. 27° 37' 50" N., Long. 35° 19' 20" E.
RESTRICTIONS: *Channel:* Width 100 m. Depth 11.0 m.
MAX. SIZE: Max. draft 9.5 m.
TUGS: 3 tugs, 1,000 h.p. – 3,000 h.p.
BERTHING: 3 berths with total length of 600 m. and depth 10.5 m. Ro/Ro located at South end.
CRANES: 1×20 tonne mobile crane.
STEVEDORES: Available. Contact Siyanco. Tel: (966-4) 432-1862.
TANKERS: See "Shipmaster's Report".
AIRPORT: At Tabuk, 180 km. N.E. of Dhuba.

SHIPMASTER'S REPORT: May 1994.
Location: Dhuba Tanker Terminal is situated on the Northern part of the West coast of Saudi Arabia in Red Sea.
Documents:
5 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
Approaches: Approach to the pilot boarding area is not difficult. For vessels coming from South, it is important to follow a course (approx. 031°) between An Nu'Man Island Reef and the reef situated at 4.5 nautical miles N.N.E. of 16 m. anchorage (B.A.Chart No. 8, Saudi Arabian Chart No. 13).
Pilotage: Compulsory. Pilot boards in the vicinity of the mooring buoys (Lat. 27° 19' 18" N., Long. 35° 43' 48" E.).
Anchorage: Good anchorage available in depths of 16.0 m. to 45.0 m.

The anchorage in 16.0 m. is located at Lat. 27° 10' 36" N., Long. 35° 39' 30" E. No Pilot required for anchoring.
Restrictions: Mooring and unmooring during daylight only.
Max. Size: 10,000 d.w.t. No draft limitation.
Radio: Send ETA 72 hours, 48 hours and 24 hours before arrival.
VHF: "Aramco Dhuba" on Channel 11 throughout 24 hours.
Tugs: One small tug (1,200 h.p.) assists with mooring. Tug on VHF Channel 11.
Mooring: There are 5 mooring points (unlit). Three points are buoys anchored to the sea bottom and 2 points are piles on the reef. All ropes are from buoys and piles (See "Plan").
Hoses: There are 2×12 in. floating hoses, one for diesel and one for premium gasoline. The hoses are connected by ship's crew.
Medical: No facilities.
Fresh Water: Not available.
Fuel: Not available.
Repairs: No facilities.
Repatriation: No facilities.
Shore Leave: Not permitted.
Services: No telephone. No stores or provisions.

AUTHORITY: Saudi Port Authority, P.O.Box, Dhuba, Saudi Arabia. *Tel:* (966-4) 4321683. *Telex:* 672019 Port SJ. *FAX:* (966-4) 4322679. *Contact:* Mr. Atiya Al-Mowailhy, Director General.
AGENT: See "Jeddah".

GIZAN (Jizan): 16.54 N. 42.32 E. (See Plan)

ALSO SEE "GENERAL" BEFORE FIRST PORT.
LOCATION: 390 nautical miles South of Jeddah and 360 nautical miles North of Aden.
PORT LIMITS:
Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to line running between the following points:

	Latitude	Longitude
Qarn Ash Shurra	16° 50' 36" N.	42° 33' 00" E.
Um al Kuthib	16° 48' 30" N.	42° 27' 12" E.
Jazirat Hibar	16° 54' 12" N.	42° 22' 42" E.
Ferafer Island	17° 00' 00" N.	42° 23' 36" E.
Qarn al Wada	17° 02' 24" N.	42° 28' 18" E.

DOCUMENTS: See "Health" and "General before first Port."
APPROACHES: The Northern Approach Channel, is 82 nautical miles long, marked by 18 light buoys and 3 beacons and provides a minimum depth of 24 m. between Gizan North and Buoys N.13/S.18.

Positioned navigational marks are in accordance with "IALA System A" and fitted with radar reflectors.

The Approach Buoy "Gizan North" Lat. 16° 56' 45" N., Long. 41° 17' 28" E. is fitted with Racon code "B". Beacon "No. 2" "Middle Beacon" Lat. 17° 16' 47" N., Long. 41° 33' 25" E. is fitted with Racon code "N". "North Ghurab Island" Beacon Lat. 17° 06' 20" N., Long. 42° 03' 58" E. is fitted with Racon Code "B".

"Sail Makawa Island" Beacon is equipped with white light Fl. 4 secs. and white daymark.

A range light, true bearing 096.5°, leads into the port basin through an inner fairway dredged to 13.5 m. depth. For further details refer to B.A. Chart No. 15 and Notices to Mariners.

Southern approach closed.
PILOTAGE: Compulsory, no offshore Pilot Station. Ships for Gizan should contact Gizan Port Control on VHF Channel 16, 2 hours before arrival.
Pilot Boarding Position:
Lat. 16° 53' 48" N., Long. 42° 27' 00" E.
ANCHORAGES: *Anchorages within the harbour boundaries:*

Anchorage A. (Cargo vessels).

Lat. 16° 56' 00" N.,	Long. 42° 27' 00" E.
Lat. 16° 54' 30" N.,	Long. 42° 27' 00" E.
Lat. 16° 54' 30" N.,	Long. 42° 25' 48" E.
Lat. 16° 56' 00" N.,	Long. 42° 25' 48" E.

Anchorage B. (Petromin tankers).

Lat. 16° 53' 00" N.,	Long. 42° 27' 42" E.
Lat. 16° 51' 30" N.,	Long. 42° 27' 42" E.
Lat. 16° 51' 00" N.,	Long. 42° 26' 12" E.
Lat. 16° 53' 00" N.,	Long. 42° 26' 12" E.

There are no anchorages outside the harbour boundaries.
ARRIVAL ADVICE: Send ETAs to Gizan Port Management, Telex: 911018 Ports Sj and 911030 Ports Sj.
MAX. SIZE: Max. Length 250 m., Max. Draft 11.75 m. at high tide, 11.50 m. at any time. Max. Beam no limit.
HEALTH: All vessels should abide by Health Regulations and present necessary documents to the Authorities in accordance with International Laws. Quarantine signals must be displayed by all vessels approaching Gizan Port. These signals must be displayed continuously until Pratique is granted. These signals are:

Sunrise to sunset: Quarantine flag – Yellow.
Sunset to sunrise: Signal lights – Red over white.

RADIO: Masters should give their Agents an ETA not later than 48 hours before arrival. There is no radio station in Gizan Port.

VHF: A base station operates in Gizan Port using the call sign "Gizan Port Control". All calling should be on Channel 16. A 24 hours watch is maintained on Channel 16. Arriving vessels should contact "Gizan Port Control" entering the Northern Approach Channel. Working channels are 14, 12 and 9. Tugs are working on Channel 12 during operations.
RADAR: Harbour Radar System and Port Control Tower are under construction.
TUGS: Tugs are available, ranging from 800 h.p. to 2,500 h.p. Tugs usually join the vessel 3 miles West of breakwaters.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
1	205	12	Bulk Cement Terminal
2	176.5	12	
3	176.5	12	
4	171	10	
5	171	10	
6	184	10	
7	122	10	General
8	175	10	General and Ro-Ro
9	175	10	Cement
10	143	10	Container Terminal
11	217	12	Container Terminal
12	217	12	Ro-Ro Terminal

Total Shed Area: 12,000 sq.m.
Total Open Storage Area: 140,000 sq.m.
Weighbridges: 1×60 tonnes.
CONTAINER FACILITIES: Multi-purpose quay side cranes, capacity 45 tons. Equipment to handle containers available including straddle carrier, front loader and trailers. 48 power sockets for reefer containers.
BULK HANDLING FACILITIES: Mobiie grain dischargers plus conveyors and hoppers for direct bulk delivery, bagging units for bagged delivery.
EQUIPMENT: *Floating Equipment:* Pilot Boats, Mooring Launches, Fire Fighting Launch, Buoy Maintenance Vessel, Anti-Pollution equipment. *Handling Equipment:* Floating Crane 200 tons capacity, Mobile Tower Cranes capacity 45 tons, Yard Cranes from 16 tons to 45 tons, Forklifts from 2 tons to 36 tons, Head Trucks, Trailers and Chassis.
STEVEDORES: Sufficient number of gangs available, working 2 shifts of 12 hours, from 0700 hrs. to 1900 hrs. and 1900 hrs. to 0700 hrs.
MEDICAL: Doctors and hospital are available. Agents should be advised in advance of any medical attention required.
DENSITY: Average 1026.
FRESH WATER: Available from quay only.
FUEL: Marine diesel available by road tanker. Advance notice to be given to Agent.
FIRE PRECAUTIONS: According to Rules and Regulations of Seaports.
CONSULS: None in Gizan. See "Jeddah".
REPAIRS: Minor repairs possible by local contractors.
SURVEYORS: The main Classification Societies are available in Jeddah.
GANGWAY/DECK WATCHMEN: 1 Coast Guard is stationed permanently on board. Coast Guards keep constant check on liquor seals and may search personnel going ashore.
CUSTOMS ALLOWANCES: The consumption of alcohol, including beer, is prohibited. Ship's bonded stores are sealed by the Customs after the vessel has been granted Free Pratique. Any alcohol found after this will be confiscated and a fine imposed of Riyals 1,000 per bottle and possible imprisonment for the offender(s).
AIRPORT: Situated approximately 3 km. North East of Gizan Port. Several domestic flights daily.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Gizan Port offers continuous cargo handling operations throughout the year and sufficient manpower is always available.
POLICE/AMBULANCE/FIRE: Emergency Telephone Numbers:

Fire Brigade	322 0555
Ambulance	322 1692/1930
Hospital	322 1205
Police	322 1872

BANKS: Almost all national banks available.
STORING: No ship chandlers available. Small quantities available through Agent.
SHORE LEAVE: Possible during daylight hours.
IDENTIFICATION CARDS: Shore passes issued on request.
DELAYS: There are no delays in berthing and discharging.
AUTHORITY: Gizan Port Management, P.O.Box 16, Gizan, Saudi Arabia. *Tel:* (07) 317–1000, 312–1145. *Telex:* 911018 and 911030 Ports Sj. *Cables:* Porta Gizan. *Contact:* Dr. Hammoud A. Saadi, Director General.
AGENT: Gulf Agency Co. Saudi Arabia. Telex: 601047 ("Gaship SJ"). Also see "Jeddah".

JEDDAH: 21.28 N. 39.10 E. (See Plan)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

PORT LIMITS: *The boundaries of the harbour and anchorages of Jeddah Islamic Port:* The harbour boundaries are given below and include the tanker terminals and the adjacent waters between Ras Al Jahhas and Ras Al Aswad.

From an onshore position on Ras al Jahhas:

to	Lat. 21° 31' 36" N.	Long. 39° 07' 54" E.
	Lat. 21° 31' 36" N.	Long. 39° 06' 00" E.
	Lat. 21° 22' 00" N.	Long. 39° 06' 00" E.

To an onshore position on Ras al Aswad:

	Lat. 21° 22' 00" N.	Long. 39° 07' 50" E.

DOCUMENTS: See "General" before first port.
Circular: Dated December 1983.

Vessels carrying dangerous cargo, arms, ammunition for discharge at Jeddah or any other ports in transit are requested to provide the following information:

(a) A prior notification including the following information:
1. The name of the vessel, her flag and the Shipping Agent's name.
2. ETA.
3. Voyage number.
4. The particulars and the types of dangerous cargo, ammunition, weapons.
5. The quantity.
6. Number of parcels or packages.
7. The weight.
8. Cell location and stowed.
9. The Shipper's name.
10. Port of loading.
11. Consignee's name and address.
12. Port of discharge.
13. Next port for the vessel after departure Jeddah.

(b) The documents such as Manifest, Stowage Plan and Cell Number, Bay Plan, etc., are required to be submitted to the Port Authority 48 hours prior to arrival of vessel.
(c) In case vessel not carrying any dangerous cargo/arms/ammunition/weapons/Military hardware, the Agent should submit the written declaration as 'nil'.
(d) The Master of the vessel is also required to submit declaration for arms/ammunition/weapons to the Port Authority along with cell position, stowage position and how stowed. In case the vessel is not carrying above mentioned Cargo the Master is also required to submit same declaration as 'Nil'.
(e) The in-transit dangerous cargo/arms/ammunition should be stored separately so that Jeddah cargo can be discharged without disturbing in-transit cargo.
(f) The Port Management will hold you fully responsible for incorrect information.

Signed:
Acting Director General
Jeddah Islamic Port.

VESSEL APPOINTMENT SCHEME:
Vessels bound to Jeddah Islamic Port with cargo must provide the following information:

AA. By telex or cable either directly or through the vessel's Agents on arrival at the first or sole loading port, before loading commences:
1. Radio Code (Call Sign).
2. Vessel's Name.
3. Owner and Line.
4. Nationality.
5. Agent.
6. Length Overall (m.).
7. Maximum Draft (m.).
8. Number of Hatches.
9. Gross Registered Tonnage.
10. Nett Registered Tonnage.
11. Deadweight Tonnage.
12. Previous Names (if any).
13. Type of Vessel.
14. Type of Cargo.
15. Total Cargo Weight Tons.
16. Total Cargo Freight Tons.
17. Number of Containers/Units (where applicable).
18. Number of Livestock (where applicable).
19. Estimated Date of Arrival.
20. Actual Arrival Draft.
21. Hazardous Cargo for Jeddah.
22. Hazardous Cargo in Transit for Other Ports.
23. Tonnage to Hatch for Jeddah Discharge.
24. Year of Construction.
25. Lloyd's Register Number.
26. All Ports at which Cargo has been loaded for discharge at Jeddah.
27. Number, Position and S.W.L. of Derricks and/or Cranes, and particulars and positions of ramps.
28. Economic Speed of Vessel.
29. Next Port of Call after Jeddah (irrespective of whether vessel has cargo for that port).
30. All other Ports at which the Vessel will have called between arrival at the first port of loading and arrival at Jeddah Islamic Port.
31. Last 3 Ports of Call before Jeddah.
32. (i) Type of Radar.
    (ii) Frequency.
    (iii) Scan Rate.
    (iv) Pulse Width.
    (v) Pulse Peak Power.
    (vi) Pulse Repetition Frequency.
    (vii) Beam Width.
33. Alcoholic cargo on board for optional ports enroute Jeddah.
34. Arms/Ammunitions/Weapons/Exlosives cargo on board in transit.
35. Arms and bullets with Master for self-defence.
36. Name of the Protection and Indemnity Club.
37. Terms of Discharge.

Both the Registered Owner and the Operating Line or Charterer must be shown in item 3. If these are the same company this fact must be confirmed.

All previous names of the vessel must be declared in item 12, or a 'Nil' declaration must be shown. Items 21 and 22 must include the tonnage of each. IMDG Class for discharge and in transit which will be on board the vessel at Jeddah.

On completion of loading cargo, items 15, 16, 17, 18, 19, 20, 21, 22, 23, 26, 29, 30 and 31 must be updated as necessary.

BB. A further notice of ETA is to be sent 5 days, 3 days, 2 days and 1 day prior to arrival at the port. The 3 day notice is to include the vessel's position (Latitude and Longitude or port) 48 hours before arrival.

CC. Vessels will not be cleared to call at Jeddah solely for the purposes of bunkering, taking stores or repairs unless the following information is supplied to the Port Management, *not less than 72 hours in advance of their arrival*. (Also see "Reports"):

1. Radio Code.
2. Vessel's Name.
3. Owner and Line.
4. Nationality.
5. Agent.
6. Length overall.
7. Maximum Draft (m.).
8. Gross Registered Tonnage.
9. Nett Registered Tonnage.
10. Deadweight Tonnage.
11. Previous Names.
12. Estimated Time of Arrival.
13. Actual Arrival Draft.
14. Hazardous Cargo in Transit for other Ports.
15. Lloyd's Register Number.
16. Expected Requirements for Bunkers and Water.
17. Economic Speed of Vessel.
18. Next Port of Call after Jeddah.
19. Last 3 Ports of Call before Jeddah.

Prior to the provision of any services being authorised an approval must be obtained from the Office of the Director (Traffic and Operations).

The final ship's Clearance Certificate will not be signed by the responsible Jeddah Port Management Officer prior to sailing unless it is accompanied by the original Advice Notice bearing Jeddah Port Management's stamp and the signature of the Clearing Officer.

DD. If the undermentioned information has not been previously given to the Port it is to be included in the Advices mentioned in AA and CC above:

(i) Type of Radar.
(ii) Frequency.
(iii) Scan Rate.
(iv) Pulse Width.
(v) Pulse Peak Power.
(vi) Pulse repetition frequency.
(vii) Beam Width.

If the vessel is equipped with several radars the characteristics of each radar must be given.

NOTE: With effect from 5th September 1986 all telex communications with Jeddah Islamic Port must be in Arabic.

EE. Master's Declaration of Arrival to be completed on berthing. A statement of all ports of loading for current voyage and all ports of discharge, including ports after Jeddah.

PILOTAGE: Pilotage is compulsory for all vessels above 150 n.r.t. entering, navigating within, or leaving the port, and is available 24 hours a day. Every vessel subject to compulsory pilotage and which requires a Pilot must:

(a) from sunrise to sunset hoist the International Code Flag 'G';
(b) from sunset to sunrise give the letter 'G' (– – ·) by a signal lamp;
(c) in the event of poor visibility caused by rain, fog or dust, sound the signal 'G' (– – ·).

Vessels equipped with VHF should call the Port Control Signal Station on Channel 12 or 16, 2 hours before arrival. Vessels having a Pilot on board must hoist the International Code Flag 'H'. The pilot boarding area is one mile West of the Middle Gate beacons in position Lat. 21° 28' 00" N., Long. 39° 06' 00" E. The pilot boat is orange hulled with white upperworks with the word "Pilot" painted in black letters along each side of the cabin.

The Master of every vessel, when approaching the pilot boat for the purpose of picking up a Pilot, must reduce speed to the minimum steerage way, maintain VHF contact with the pilot boat and provide a good lee if necessary. Vessels must have rigged and ready for use a pilot ladder in good repair and provided with reliable manropes and in accordance with the specifications and terms described in the International Convention for the Safety of Life at Sea 1974. The ladder is to be well illuminated between dusk and dawn, and a lifebuoy with a lifeline is to be available at the ladder for immediate use. A boat rope, ready rigged from the break of the forecastle to abaft the pilot ladder, must also be provided.

Once the Pilot is on board, the Master must advise him of:

(a) The draft, length, beam and manoeuvring speeds of the vessel. Such information is also to be displayed in a conspicuous place in the wheelhouse;
(b) Any peculiarity, defect or factor which may affect the manoeuvrability of the vessel;
(c) Any dangerous and/or hazardous cargo on board.

Vessels awaiting Pilot or documentation, anchor in "D" Anchorage. Vessels with dangerous and/or hazardous cargo on board anchor in "C" Anchorage. All tankers and vessels calling only for bunkers in "E" Anchorage.

APPROACHES: The lights of the new airport North of Jeddah shine brightly. These should not be confused with the correct approach to Jeddah port which is South of the airport.

PROHIBITED AREA: The area bounded by following positions:

A — 21° 33.50' N., 39° 06.60' E.
B — 21° 33.50' N., 39° 05.00' E.
C — 21° 28.58' N., 39° 07.08' E.
D — 21° 29.87' N., 39° 09.85' E.

ANCHORAGE: Anchorages A, B, W1 and W2 are within the pilotage area and vessels may not enter, or leave these anchorages without a pilot. The boundaries of the anchorages are as follows:

Anchorage A:

From	Lat. 21° 29' 13" N.	Long. 39° 08' 40" E.
To	Lat. 21° 28' 18" N.	Long. 39° 08' 40" E.
	Lat. 21° 28' 18" N.	Long. 39° 08' 02" E.
	Lat. 21° 29' 13" N.	Long. 39° 08' 40" E.

Anchorage B:

From	Lat. 21° 27' 39" N.	Long. 39° 06' 54" E.
To	Lat. 21° 27' 39" N.	Long. 39° 07' 26" E.
	Lat. 21° 26' 04" N.	Long. 39° 07' 26" E.
	Lat. 21° 26' 04" N.	Long. 39° 06' 54" E.
	Lat. 21° 27' 39" N.	Long. 39° 06' 54" E.

Anchorage W1: (Working anchorage).

From	Lat. 21° 27' 46" N.	Long. 39° 08' 10" E.
To	Lat. 21° 27' 46" N.	Long. 39° 08' 42" E.
	Lat. 21° 26' 45" N.	Long. 39° 08' 42" E.
	Lat. 21° 26' 45" N.	Long. 39° 08' 22" E.
	Lat. 21° 27' 46" N.	Long. 39° 08' 10" E.

Anchorages outside the harbour boundaries:

Anchorage C: (Anchorage for vessels with dangerous cargoes).

From	Lat. 21° 28' 00" N.	Long. 39° 03' 46" E.
To	Lat. 21° 27' 46" N.	Long. 39° 04' 40" E.
	Lat. 21° 26' 47" N.	Long. 39° 04' 22" E.
	Lat. 21° 27' 02" N.	Long. 39° 03' 28" E.
	Lat. 21° 28' 00" N.	Long. 39° 03' 46" E.

Anchorage D: (Anchorage for dry cargo vessels).

From	Lat. 21° 28' 16" N.	Long. 39° 04' 50" E.
To	Lat. 21° 27' 28" N.	Long. 39° 05' 58" E.
	Lat. 21° 26' 10" N.	Long. 39° 04' 29" E.
	Lat. 21° 26' 24" N.	Long. 39° 04' 15" E.
	Lat. 21° 28' 16" N.	Long. 39° 04' 50" E.

Anchorage E (Tanker and bunkering anchorage):

From	Lat. 21° 23.5' N.	Long. 39° 04.25' E.
To	Lat. 21° 24.75' N.	Long. 39° 05.00' E.
	Lat. 21° 23.8' N.	Long. 39° 06.00' E.
	Lat. 21° 23.5' N.	Long. 39° 06.00' E.

Prohibited Anchorage Area:

From	Lat. 21° 23.5' N.	Long. 39° 04.0' E.
To	Lat. 21° 23.5' N.	Long. 39° 06.0' E.
	Lat. 21° 22.0' N.	Long. 39° 03.35' E.
	Lat. 21° 22.0' N.	Long. 39° 06.00' E.

RESTRICTIONS: There are no restrictions imposed upon entry for vessels of not more than 13.5 m. draft.

MAX. SIZE: The maximum permissible draft is 13.5 m. No restriction on beam. Vessels up to 300 m. in length are handled regularly at Jeddah Container Terminal and Bulk Animal Feed Berths.

HEALTH: Masters of vessels are required to notify Jeddah Port Health and Quarantine Department via Jeddah Radio prior to the vessel's arrival as follows:

(a) Vessel's name, ETA, purpose of visit;
(b) Complement and General Declaration of Health of crew:
(c) Declaraton of Vaccination Certificates held, if any;
(d) Declaration of Last Port and date of sailing;
(e) Possession of valid Deratisation Certificate or valid Deratisation Exemption Certificate.
(f) Any other certificate that may be required as determined by Health Authorities.

Additionally, the Agent is required to submit an arrival notice to the Port Health and Quarantine Department 48 hours prior to the vessel's expected arrival.

On arrival, the doctor boards and grants Free Pratique.

(a) *Yellow Fever:* All arrivals from infected or endemic areas are required to submit a valid Vaccination Certificate in accordance with International Sanitary Regulations.
(b) *Makkah:* All Muslim crew members who wish to visit Makkah and Madinah should have in their possession 2 recent Passport-size photos. These should bear the crew member's name and C.D.C. Number to enable Agent to obtain permission for the pilgrimage. Crew members must also have in their possession the above-mentioned medical certificates, otherwise permission may not be granted to them to visit Makkah and Madinah.

RADIO: The Coast Radio Station, Jeddah Radio, call sign HZH (Telex No. 603799 RDJD SJ), can be called up at any time on 500 kHz. All vessels send telegrams to Agents, receivers and Port Authorities, etc. through Jeddah Radio.

Jeddah Radio is also on VHF Channel 16 for telephone calls to Agents and Jeddah Ship Repair Yard.

VHF: Jeddah Port Control Signal Station has 4 VHF Channels:

(a) Channel 16 (international distress, safety and calling Channel);
(b) Channel 14 (Working Channel);
(c) Channel 12 (Working Channel);
(d) Channel 9 (Working Channel).

Vessels bound for Jeddah Islamic Port contact the Port Control Signal Station on Channel 16, then shift to a working Channel as advised to pass on ETA and other relevant information. When necessary, weather reports, notices regarding navigational aids etc., are broadcast to vessels on Channel 12 after having first been advised on Channel 16. In the event of distress or emergency, vessel traffic is controlled by the Port Control Signal Station as far as circumstances permit.

Control Tower: The Control Tower (height 132 m.) is situated on the North side of the Approach Channel to the port at the inner gate in position Lat. 21° 28.1' N., Long. 39° 08.95' E. with light characteristic Gp.Fl.(3) every 20 secs., distance 25 miles.

RADAR: A port surveillance radar system is in operation.

TUGS: There are tugs available operated by the Port.

Tugs operate within the harbour limits only for the purpose of assisting vessels in berthing and unberthing. Tugs join vessels inside the Inner Gate Beacons and normally require the use of the ship's lines. Where the latter are considered inadequate, the tug's lines are used.

BERTHING: The following categories of berth, with a draft range from 7.5 m. to 13.5 m., are available: Bulk Grain, Bulk Edible Oil, Ro-Ro, Container Terminal, Cold and Frozen Terminal, Livestock Terminal, Autocarriers, General Cargo and Passenger vessels.

Storage: Adequate covered and open storage space is available in the form of Warehouses, Transit Sheds, Livestock Sheds, Dangerous Goods Warehouses plus Reefer Points, Cool and Cold Stores, Container Terminals, Ro-Ro Terminal, Container Freight Station, Vehicle Parks, General Cargo Storage and edible oil Storage Facilities.

CRANES: Rail-mounted electrical level luffing cranes of up to 15 tons capacity are available with an outreach from the quay wall of 25 m.

The port also has available mobile cranes of up to 250 tons capacity, including a floating crane of 200 tons capacity. Other equipment includes forklift trucks of up to 33 tons capacity and trailers and chassis of up to 40 ft./200 tons capacity.

General cargo vessels must be adequately geared at each hatch. Port cranes may be hired on request.

BULK CARGO FACILITIES:

Bulk Grain (Common User Facility):

Max. permissible ship-draft: 13.5 m.
Unloading: Gantry booms/vacuum pipes and conveyor.
Height of gantry boom: 16 m.
Outreach: 28 m.
Discharge capacity: 200 tons per hour per unit.

Bulk Edible Oil (Private User Facility):

Max. permissible ship-draft: 11 m.
Unloading point: A pump station pit and manifold is located on the quay for hose connection.

SPECIALISED CARGO HANDLING FACILITIES:

Ro-Ro Terminal (Common User Facility):

Max. permissible ship-draft: 13.0 m.
Mobile cranes: Up to 40 tons capacity.
Forklift trucks: Up to 33 tons capacity.
Trailers/Chassis: Up to 40 ft./200 tons capacity.

Jeddah Container Terminal East (Common User Facility): Transhipment and CFS facilities available.

Max. permissible ship-draft: 11.5 m.
Container cranes: 30.5 tons capacity with an outreach from the quay wall of 25.5 m./28.5 m.
Forklift trucks: Up to 33 tons capacity.
Trailers/Chassis: Up to 40 ft./200 tons capacity.
Electricity supplies: 'Plug in' points for 192 reefer containers.

Jeddah Container Terminal West (Common User Facility): (Ro-Ro facility also available).

Max. permissible ship-draft: 13.5 m.
Container cranes: Up to 40 tons capacity with an outreach from the quay wall of 34.5 m.
Straddle carriers: Sufficient number.
Forklift trucks: Up to 25 tons capacity.
Head trucks: Sufficient number.
Electricity supplies: 'Plug in' points for 360 reefer containers.

BRIDGES: There are no bridges or other restrictions to prevent access to the port by vessels of not more than 13.5 m. draft.

STEVEDORES: The port provides stevedoring services 24 hours a day, 7 days a week. For vessels wishing to discharge cargo at Jeddah Islamic Port, Shipowners or their Agents should provide ETA advice in accordance with the Rules and Regulations for Seaports, issued by the Co-operation Council for the Arab States of the Gulf, as follows:

(a) Before loading for Jeddah;
(b) On sailing last load port;
(c) At 5, 2 and 1 day intervals before the vessel's ETA;
(d) On revising the vessel's ETA.

MEDICAL: Full hospital facilities are available. The Agent should be informed of any medical attention required. Vaccination Certificates should be provided as previously specified (See "Health").

TANKERS: The Petromin facility has 2 berths in the oil basin and 2 in the inner harbour. Petromin provide their own tugs and launches.

The port does not have facilities for the handling of liquid chemicals or LPG carriers.

Jeddah Port Authority Circular: Vessel calling for bunkering supply or for repair will not be cleared/berthed unless following information is furnished to Jeddah Port Management before ship's arrival:

1. Radio Code.
2. Vessel Name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. LOA.
7. Max. draft in metres.
8. G.R.T.
9. N.R.T.
10. D.W.T.
11. Previous Name.
12. ETA.
13. Arrival Draft.
14. Hazardous cargo transit.
15. Lloyd's Register Number.
16. Requirements bunker and fresh water (approx.).
17. Last 3 ports of call before Jeddah.

Before providing any facilities, a Permit Certificate has to be obtained from office of the Assistant General Manager for Traffic.

Ship will not be cleared by Port Authority unless above Permit Certificate attached with Original Arrival Notice signed and stamped by party concerned is submitted to Jeddah Port Management.

DENSITY: 1025.

FRESH WATER: Fresh water can be supplied by the port at all berths and at Livestock Terminal. Fresh water is also available from private suppliers.

FUEL: There are several suppliers in Jeddah who normally require between 1 and 2 weeks' notice of nomination, either through a broker or directly. All types of bunker oils are available and are supplied by tanker at varying rates of delivery.

If bunkering at anchorage, proceed to "Anchorage E".

Also see "Reports".

FIRE PRECAUTIONS: Special rules apply concerning fire precautions and fire-fighting. Reference is made to the Rules and Regulations for G.C.C. Seaports, Part 1, Section 7, and Part 3, Section 4.

CONSULS: Most countries are represented in Jeddah.

REPAIRS: Several local agencies provide all types of shipboard repair work in the mechanical, electrical, electronic and refrigeration / air-conditioning fields.

The Jeddah Ship Repair Yard has complete facilities for drydocking vessels, conversion work and all types of repairs to hull and machinery.

DRY DOCKS: Jeddah Ship Repair Yard:

	Dock 1	*Dock 2*
Max. d.w.t. (Approx.)	45,000	16,000
Lifting capacity (tonnes)	19,000	11,000
Length overall (m.)	215.00	165.00
Length over keel blocks (m.)	200.00	150.00
Clear width (m.)	33.50	25.00
Water depth over top of keel blocks (m.)	7.55	6.95
Pumping times (minutes)	90	90
Cranage (tons SWL × radius reach (m.)	2×7 tons ×20.5 m.	2×7 tons ×20.5 m.

SURVEYORS: The following Classification Societies are represented in Jeddah: Lloyd's, A.B.S., B.V., D.N.V., N.K.K., G.L. and RINA.

Cargo surveyors also available.

GANGWAY/DECK WATCHMEN: 1 Coast Guard is stationed at the foot of the gangway of vessels alongside. Coast Guards keep constant check on liquor seals and may search personnel going ashore.

HATCHES: The opening and closing of non-mechanical hatches is normally carried out by the Port's stevedores.

CUSTOMS ALLOWANCES: Alcohol must be kept in bond and is not allowed to be consumed or landed within the Kingdom. There are no restrictions on tobacco.

CARGO GEAR: Discharge of general cargo and containers at non-specialised facilities is by ship's gear. However, a wide range of mobile cranes are available for hire at short notice (See "Cranes").

REPATRIATION: There are approximately 30 international flights daily to and from Jeddah. A visa is required for entering or leaving the country.

AIRPORT: The King Abdul Aziz International Airport is located approximately 30 km. North of the port.

TIME: GMT plus 3 hours.

HOLIDAYS: Friday is the weekly day of rest and prayer. The Hegira calendar of 12 lunar months consisting of 354 days provides for two Government holidays. The first, lasting one week between the end of the ninth month (Ramadan) and the beginning of the tenth month (Shawwal), represents the celebration of the end of the month of Muslim fasting. The second is for 10 days, from the 5th to the 15th of the twelfth month (Dhu-al-Hijjah). This is the period when Saudi nationals and Muslims from all over the world come to perform the pilgrimage in the Holy cities of Makkah and Madinah.

The port, however, operates continuously throughout the year, 24 hours a day, 7 days a week.

POLICE/AMBULANCE/FIRE: Masters of vessels should contact the Port Control Signal Station on VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: *Major Emergency Control:* In case of emergency, vessels should contact the Port Marine Control Tower on VHF Channel 16. Requirements will be relayed to the Port's Operations Co-ordination Centre.

TELEPHONES: Facilities are available for telephone connection at certain berths, although there are currently no arrangements for placing telephones on board.

Public pay phones are available in the port area.

SERVICES: *Tank Cleaning/Compass Adjusting/Life-Raft Servicing:* There are presently no facilities in Jeddah for tank cleaning or compass adjusting. Liferaft servicing facilities are available.

Fumigation: Fumigation services are available in Jeddah.

Garbage Disposal: The port has a waste incinerating vessel with one waste collection launch and one oil skimming launch. A charge is levied for this service at a rate of SR. 200 per vessel per day or part thereof. (These dues will be collected whether the vessel uses the service or not).

BANKS: All leading Saudi banks have branches in Jeddah.

STORING: Subject to approval from the Customs, Coast Guard and Health Authorities.

SHORE LEAVE: Permitted on Agent's application to the Immigration Authorities and the Coast Guard.

IDENTIFICATION CARDS: Shore passes are issued. However, Discharge Books or Passports must be left at the gate and collected when re-entering the port area.

GARBAGE DISPOSAL: Ships garbage is collected from vessels alongside or at anchor by a garbage boat. Garbage must be pre-packed in plastic bags. Charges SR.200 per day or part thereof, used or not used.

WASTE OIL DISPOSAL: Capacity: Slop tanks 2,000 tonnes. Waste oil tank 14 tonnes. Collection tanks 7 tonnes.

Vessel discharge rate: 100 tonnes/hour.

Contact Tel: (02) 6477781. Telex: 604237 JSRY. Fax: (02) 6485074.

SEAMAN'S CLUBS: None.

CURRENCY: Saudi Riyals (SR). U.S.$ 1.00 = SR 3.75 (fixed).

REGULATIONS: The Rules and Regulations for G.C.C. States Seaports are published in booklet form and are available on request from the Agent. Every vessel arriving at the port must have a copy on board or obtain one immediately on arrival.

Every vessel entering Jeddah Port must hoist the Flag of the Kingdom of Saudi Arabia and keep it flying at all times throughout its stay in the port.

Vessels wishing to unload cargo at Jeddah Islamic Port must apply to the Director-General by telex for a berthing appointment prior to loading for Jeddah.

DELAYS: Subject to the timely completion of clearance formalities, there are no delays in berthing, loading, discharging or bunkering.

GENERAL: *Other important information:*

(a) Mean height of quay surface from water alongside berth is 2.25 m.
(b) Width of fenders is 30 cm.
(c) Height between highest and lowest recorded tides is 1.02 m.
(d) For reference, please see BA. Charts No. 2599 and 2577 and Red Sea Pilot.

Other facilities include:

(a) Modern equipment to combat oil pollution, including an oil recovery vessel, oil separation barges and a full range of spraying equipment, absorbants, dispersants and oil containment barriers. Tugs with pollution control facilities are available.

(b) An integrated fire-protection and fire-fighting system incorporating a sophisticated control centre with electronic monitors for fire alarm and detection equipment, linked with a highly efficient network of sprinklers in all buildings, transit sheds and warehouses. In addition, the port has its own fire station equipped with a full range of appliances. Water-borne facilities are also available in the form of fire-fighting vessels up to 2,860 h.p.

(c) *Miscellaneous marine craft and equipment comprising:*

Pilot boats.
Service launches.
Barge towing launches.
Mooring launches.

REPORT: May 1984.

Operational instructions for Owners and Masters of vessels taking offshore bunkers from Bakri Bunker Trading Co. at Jeddah:

1. *Radio Contact/Operating Position:*

"al Bakry" (call sign HZGH) maintains continuous watch on VHF Channel 16. VHF range in this area is 300-400 nautical miles and Masters should therefore establish contact at least 24 hours ahead of arrival Jeddah. Working channel will be agreed between Masters when contact established, and rendezvous point will be advised by the Master of the bunker vessel, well in advance.

Please note that Customs/Waterguard operate only during the hours of daylight. Customs launches leave quay at 0900 hrs. daily and clear vessels in order of arrival through approximately 1700 hrs. Vessels arriving too late are not cleared until following day.

2. *Notice:*

A. Wherever feasible vessels taking bunkers from Bakri Bunker Trading Co. must send a cable at least 120 hours prior to arrival off Jeddah to 'best service Jeddah' giving following information in accordance with port management instructions:

(1) Radio code, (2) vessel's name, (3) owner/line, (4) nationality, (5) Agent, (6) LOA, (7) max. draft in metres, (8) g.r.t., (9) n.r.t., (10) d.w.t., (11) all previous names, (12) Jeddah ETA, (13) actual arrival draft, (14) details of hazardous cargo in transit for other ports, (15) Lloyd's Register number, (16) Expected requirements of bunkers and water, (17) quarantine requirements of port doctor – name of last 3 ports of call/no. of crew and their state of health/validity of vaccination certificates for cholera and yellow fever, confirmation that none of the crew will go ashore.

Please note: Prior to the provision of any services being authorised, an approval must be obtained from the office of the Assistant Director General (Traffic and Operations.)

The final ship's Clearance Certificate will not be signed prior to sailing by the responsible Jeddah Port Management officers unless it is accompanied by the original advice notice bearing Jeddah Port Management's stamp and the signature of the Clearing Officer.

B. Owners must also send a telex minimum of 72 hours prior to their vessel's arrival off Jeddah to Bakri Bunker Trading Co. (Telex: Jeddah 401557 "Bakri SJ" or Jeddah 402125 Penta SJ) repeating the information contained in the cable sent from their vessel. This telex must also confirm that none of the crew of vessel will go ashore. Failure to provide the above information in time could delay clearance by Jeddah Port Management and result in vessel being delayed.

C. Both messages A and B must be updated 48 hours and 24 hours ahead of arrival.

3. *Operating/Manoeuvring:*

Will be advised by Master of "al Bakry" on VHF.

4. *Supplies:*

Supplies are made subject to the general terms and conditions for the sale of marine fuels of Bakri Bunker Trading Co. Ltd.

5. All vessels calling for bunkers with Bakri Bunker Trading Co., must comply with the laws of Saudi Arabia, including courtesy flag requirements.

Vessels have recently been delayed by boycott office and Port Authority in Jeddah due belated receipt particulars, especially Lloyd's number/all former names. If this data not received minimum 72 hours ahead vessel's arrival, delay will ensue.

NOTICES: 1986.

Agents Notices to Masters.

Dear Captain,

To avoid any inconvenience to yourself and to your crew and in order that your vessel is not penalised we are listing below those requirements which you must follow and those which you must avoid during your stay in the Port of Jeddah.

(A) WHAT YOU MUST DO:

1. The Master of every vessel arriving at any Saudi Port for discharging/loading of cargo is required to possess one copy of the book "Rules and Regulations for Saudi Arabian Seaports". If you do not have it, please order through our representative. The Port Inspectors make periodical inspections and in the event of non-possession of the said Rules Book by a vessel, she may be penalised. If you already have one or after you get one, it is recommended that you please do read pages 66-75, 163-172, 220-233 and 260.

2. The National Flag of the Kingdom of Saudi Arabia must be kept hoisted round the clock on all days of the week from the time of entering into and sailing from the port of Jeddah.

3. In order to arrange vessels inward/outward clearance, following documents should be delivered to our representative against signed receipt.

1. Certificate of Registry.
2. Safety Equipment Certificate.
3. Safety Construction Certificate.
4. Load Line Certificate.
5. Hull and Machinery Classification Certificate.
6. Safety Radio Telegraphy Certificate.

These documents will be returned to you with the Port Clearance prior to your departure. Vessels arriving at the ports of the Kingdom, with expired certificates, are liable to penal action.

4. All the time, from the time of arrival, your vessel must be in a condition to sail within one hour's notice from the Ports Authorities.

5. From the time of berthing and until its sailing from the berth the Coastguard Police will stay at the gangway entrance.

6. Rat guards must be fixed on all mooring ropes and wires on vessel's berthing.

7. Opening of the hatches (also tween decks, where applicable) and rigging of your vessel's gear should be conducted by your crew to enable the port's stevedores to commence discharging/loading operations immediately upon berthing.

8. The ship's gangway should be protected by guide ropes and proper nets. Safety rails should be erected in tween decks during discharging operations in lower holds. Whenever possible, lashing should be temporarily removed from the deck cargo to facilitate passage for the shore labour to work. Port's Safety Officers inspect vessel from time to time and any contravention of Port's Safety Regulations is subject to penal action.

9. The vessel should be self-sustaining and the gear in proper condition to carry out the discharging/loading operations round the clock. Any delay in discharging/loading as a result of winch stoppages, will be recorded against the vessel and charged at SR.200/– per gang hour or part thereof will be treated as one hour. In the event of frequent winch breakdown or a breakdown whose repair may take a long time, a shore crane could be employed by the port for account of the vessel in case the ship/Agent's themselves do not arrange one. To arrange a shore crane our representative will need your authority. For idle gangs, from the time of winch stoppage until the shore crane physically arrives and discharge is resumed, vessel will be charged at the rate mentioned above.

Please note that Port Authorities have the right to employ shore cranes for account of the vessel to expedite discharge even if ship's gear is fully operational. The cost is debited to the ship whether or not the requisition form is endorsed by the ship's Master.

10. Your Duty Officers are required to supervise discharging/loading operations and any irregularity in handling of the cargo by the stevedores must be notified in writing to stevedores' representative on board with copy to Port Authorities.

Stevedores are employed by the Port Authorities and work as follows:

General and Bagged Cargo: 0100 hrs. – 0600 hrs., 0700 hrs. – 1200 hrs., 1300 hrs. – 1800 hrs., 1900 hrs. – 0000 hrs.

Frozen Cargo: 0700 hrs. – 1200 hrs., 1600 hrs. – 0000 hrs.

Citrus: At present citrus cargo also handled same as general and bagged cargo.

11. Except crew members from Communist Bloc and countries with whom the Kingdom of Saudi Arabia does not have diplomatic relations, all others are allowed to go ashore escorted by the Agents of the vessel and with a valid Shore Pass issued by the Immigration Department of the Seaport. Shore passes are arranged by the Agent against Master's written undertaking that all crew members will return to the ship and that the Master holds himself fully responsible for all the consequences if any crew fail to return to the ship. The Authorities permit crew members to go ashore for a maximum period of 3 hours during the day only and the permission is granted between 0900 hrs. – 1600 hrs. except on Fridays. The crew members should return to the ship escorted by the Agents before 1900 hrs.

In order to arrange shore passes, we will need your written confirmation at least 18 hours in advance on our prescribed form together with one black and white photograph for each crew member who will go ashore.

12. Application for repatriation of crew is accepted by Immigration Authorities only when it is accompanied with a ticket in the name of the crew member with a confirmed seat for leaving the Kingdom not later than 72 hours from the date of application. In order to arrange confirmed seats we must get an advance notice of at least 48 hours.

13. Completion of discharge must be supervised by ship's Officers who should ensure that no cargo bound for Jeddah is left in the ship except the cargo whose discharge was not allowed by Port Authorities. On completion of discharge of all sound cargo, Jeddah Signal Station should be contacted at Channel 16/12 through VHF to request for a Pilot who is available at short notice. You can notify the Authorities to provide a Pilot as soon as you have on board, the Port Clearance and you are ready to sail. Normally 1 to 2 hours following completion of discharging/loading are allowed to prepare a vessel for sailing.

Following is the allocation of VHF Channels by the Jeddah Islamic Sea Port.

Channel 9 – Marine Pilots.
Channel 11 – Petromin Marine Operations.
Channel 67 – Pilots/Tugs/Berthing Operations/Safety in event of fire.
Channel 69 – Pilots/Tugs/Berthing Operations.

14. In order to keep the parties concerned informed of the daily progress of discharging/loading operations including any other details/information, you will be required to fill-in the "daily position" form left with you by our representative upon your vessel's berthing. It should be kept ready every morning for collection by our representative at about 0800 hrs.

15. Personnel of our Operations Department will be in very close contact with you during vessel's stay in port and shall present to you the prescribed form for SERVICES REQUIRED THE FOLLOWING DAY. This form may be filled in and kept ready for delivery to the Officer on the evening shift who will collect it from you at about 1700 hrs. This procedure will apply from the day following the berthing of your vessel.

However, should the vessel berth before mid-day then our Boarding Officer can be asked to attend to services required the same day.

16. To ensure that ships under our Agency are attended to the satisfaction of our Principals, our Operations Department's Officers are advised to present to you the "Service Form" of the previous day, on the following day so that in case some service that you had asked for has not been rendered, then a remark to that effect could be endorsed on it by you to receive the attention of the Management. We shall greatly appreciate your co-operation in this regard and if for any reason this form is not presented to you for remarks then the Duty Officer may please be reminded of it.

(B) WHAT YOU MUST NOT DO:

1. Manoeuvring of vessels within the port limits without a local Pilot on board, is prohibited.

2. Immobilisation without valid permission from the relevant Authorities, is prohibited.

3. Engine repairs/burning/painting/chipping while at berth, is not allowed without prior permission.

4. Lowering of lifeboats while alongside berth or at anchorage, is not allowed except in an emergency.

5. Spillage of oil and disposal of garbage within the port limits, is prohibited.

6. Unauthorised photography is strictly prohibited.

7. Possession of spirits/alcoholic beverages, weapons, drugs, obscene literature or nude – semi-nude pictures is strictly prohibited which please note advise all your crew members accordingly. The Coastguard Authorities conduct searches and if any crew member is found in possession of any of the above articles, he would be liable to punishment as per local laws.

8. In case of shifting to anchorage, prior to your final sailing, you must inform the signal tower of your date and time of departure.

CIRCULAR: (1983). Please note the following Immigration Rules now prevail in the Port of Jeddah. Kindly see to it that these rules are strictly followed in order to avoid any problem to your crew and the vessel.

(AA) Shore Leave Pass Facilities:

1. Crew Shore Leave Pass will be issued by the Immigration Department for a maximum number of 10 crew members per day from any ship including crew requiring shore medical facilities and Master or other officers requiring consular service. Shore leave will be restricted to three hours only i.e. from 1100 hrs. to 1400 hrs.

2. Master should ensure that requisition for Crew Shore Leave Pass is handed-over to Agents' Crew Department in the afternoon of the preceding day so that necessary paper work is completed to avoid delay in obtaining permission next morning before 1100 hrs.

3. For vessels arriving during the day time, crew shore leave is not permissible the same day; passes will be issued the following day provided requisition is given to Agents as mentioned in No. 2 above.

4. For vessels arriving during the night, requisition must be given to the Agents in the morning and the passes will be arranged during the afternoon.

5. Emergency cases are exempted from the restrictions mentioned in 1, 2, 3 and 4 above.

6. In case of serious sickness of a crew member the Safety Department of the port of Jeddah must be informed immediately through Signal Tower instead of calling the Agents. Agents may also be informed for further assistance.

7. Crew shore leave is strictly prohibited after issuance of Sailing Permit.

(BB) Crew Sign-On:

1. Following particulars of crew arriving to join a vessel, must be communicated to the Agents at least 72 hours prior their date and time of arrival.
   (a) Full name of seaman.
   (b) Nationality.
   (c) Seaman's Book Number, date and place of issue.

2. Clearance by Airport Immigration Department of crew arriving without visa on international passport is strictly forbidden.

3. Crew arriving without visa to join a vessel must possess Seaman's Book otherwise they cannot be cleared by Airport Immigration Department.

4. Clearance by Airport Immigration Department of crew as mentioned in No. 3 above is granted only if the vessel which they are coming to join, has already arrived in the Port of Jeddah. If the vessel has not yet arrived the crew will remain in transit in the airport.

5. Crew arriving at night to join a vessel already in port, cannot be signed-on until next day and as such will have to stay for one night in an hotel. Crew arriving during the day but before noon, may be signed-on the same day.

(CC) Crew Sign-Off:

1. Following particulars for crew to be signed-off, must be communicated to the Agents at least 72 hours prior anticipated time of departure.
   (a) Full name of seaman.
   (b) Nationality.
   (c) Seaman's Book Number, date and place of issue.
   (d) Destination.

2. Because 72 hours' prior notice is required, as mentioned in No. 1 above, crew sign-off will not be possible from a vessel staying for less than 72 hours in the port unless the required repatriation of any crew has been communicated to the Agents prior to arrival of the ship.

3. Signing-off of crew without Seaman's Book is not permissible.

4. Any crew not holding ticket with confirmed seat, cannot be signed off.

5. Crew already signed-off by the Immigration Department will be cleared by the Customs a maximum of 6 hours before the departure time. With this restriction crew departing between 0100 to 0800 hrs., cannot be repatriated.

6. Vessel completing discharge prior completion of repatriation formalities of any crew, will have to stay at anchorage in order to disembark the crew member after completion of formalities.

(DD) The above Rules and Regulations will also be applied to vessels calling Jeddah for bunkers and/or provisions only.

SHIPMASTER'S REPORT: November 1986.

Report on Visit to Jeddah for Bunkers Only:

ETA Advice: Send ETA 96, 72, 48, and 24 hours in advance of arrival also update if ETA varying by more than 1 hour after 24 hour Notice is sent. Contact by VHF as soon as in range of Port Control.

Approach: Approach to the Port can be difficult, especially at night. There are a great deal of works in progress in and around the Port, which renders identification of navigational marks and shore characteristics difficult. The best aid to position fixing approaching the Port is Mismari Reef, which has a Racon on it, and shows up well on the radar. Approach is also made difficult by the fact that there were many ships at anchor on the occasion of this visit. (Over 50 vessels).

Anchorage: There are designated areas marked on Admiralty Chart No. 2599 (Approaches to Jiddah). The designated anchorage for vessels bunkering is Anchorage 'E'. However, due to the large number of vessels at anchor, anchorage has to be effected wherever there is sufficient anchor berth for the size of the vessel. (Port Control did not give any directions with regard to anchoring position, and only asked to be given time of anchoring and bearing and distance from Qaham Beacon, of anchor position).

Formalities: Agent and Customs board from a small tug size vessel, apparently used specifically for this purpose. They boarded more or less on arrival. Forms, etc. required are as detailed in final 'Notes'. Pilot ladder was used to embark and disembark these Officials. A heavy swell was running on the occasion of this visit, and it would have been impractical to have used the accommodation ladder only, although a combination rig could have been used.

Bunkering: Bunker barges of about 3,000 d.w.t. are used. These vessels operate from a much larger 'mother' ship. The barge that delivered this vessel's bunkers was rigged to come alongside starboard side to; but it can be ascertained by calling the 'mother' ship before arrival. Barge used 6 in. bunker hose, and midship bunker connection. (it would not be practicable to have used the after connection on this ship, due to the length of the bunker barge). On completion of bunkering, Bunker Receipts are signed and stamped in the usual way. Port Clearance is issued by bunker barge after bunkering formalities completed. Port Control must be informed of Port Clearance Number, after which vessel may sail.

Notes: On the occasion of this vessel's visit, a rather heavy swell was running at the anchorage. This rendered taking of dips in the bunker tanks rather difficult, and also due to ranging of the bunker barge alongside, it was not possible to check barge by ship's staff. Quantity of bunkers delivered is effected by using a flow meter on the barge. It was discovered after vessel had sailed, that there was a shortage of some 45 tonnes (in a consignment of 1,400 tonnes). However, at the time of taking the bunkers, it had not been possible to accurately gauge the vessel's bunker tanks due to the swell. (It may well be that the barge's meter was inaccurate, but in the light of the above, it is therefore important to check as closely as possible calculated quantity taken by ship's measurements, and any shortage, or suspected shortage noted).

Arrival Message: To be supplied to Port Management, Jeddah. (Either direct or through Agents).
1. Radio call sign.
2. Vessel's name.
3. Owner and Line – Ex-Owners, Charterers or Operators (full address, telex, cable, postal).
4. Nationality – flag, port or registry.
5. Agent at Jeddah.
6. Length overall.
7. Maximum draft (metres).
8. Gross registered tonnage.
9. Nett registered tonnage.
10. Previous names.
11. Build – year and place.
12. Type of vessel.
13. Deadweight tonnage.
14. ETA – changes of ETA.
15. Actual arrival draft.
16. Hazardous cargo in transit for other ports.
17. Lloyd's Register Number or other Registration Number.
18. The expected requirements for bunkers and water.
19. Economic speed of vessel.
20. Next port of call after Jeddah.
21. Last port of call before Jeddah – cargo on board.
22. Names of ports vessel called before arriving Jeddah (within last 2 months).

23. Vaccination Certificates valid against cholera.
24. Number of crew and their state of health.
25. Statement of Owner/Master that the vessel was never blacklisted by Arab League.
26. Master's Declaration for any arms and ammunition carried on board for cargo in transit or purely for the purpose of self defence, at least 48 hours prior vessel's arrival (failure to comply with these procedures will result in heavy fines and seizure of arms).
27. The following is also required:
    - (a) Type of radar.
    - (b) Frequency.
    - (c) Scan rate.
    - (d) Pulse width.
    - (e) Pulse peak power.
    - (f) Pulse repetition frequency.
    - (g) Beam width.

    If the vessel is equipped with several radars, the characteristics of each radar must be given.

Notes:

1. Send above as soon as possible after vessel receives orders for Jeddah.
2. No. 27, not required to be sent if this information has already been tendered on a previous occasion.
3. Above required even if making an off-limits bunkering call.
4. Vessels calling for bunkers only will also be required to submit the following Forms to Agent and Customs, who board on arrival.

4 Crew Lists.
2 Vaccination Lists.
2 Crew Effects Declarations.
2 Stores Lists.

All above documents can be presented on appropriate IMO Forms, except the Store Lists, which have to be on Saudi Arabian Forms for Customs. Forms will be provided if vessel not in possession.

5. Customs will seal bond and radio transmitter on clearing ship inwards.

SHIPMASTER'S REPORT: June 1988.
Vessel called in the Roads for bunkers.
The bonded stores are sealed. Crew are not allowed to have beer or personal refrigerators in their cabins. This includes the Master and all officers.
All beer and spirits must be placed in the bonded store prior to Customs boarding the vessel, otherwise severe fines may be imposed.

(B) LPG TERMINAL.

(A) JU'AYMAH CRUDE TERMINAL.

This section gives specific information regarding Ju'aymah Crude Terminal which includes the Single Point Mooring Berths and is to be read in conjunction with "Ras Tanura – Part A".

LOCATION: The Ju'aymah Crude Terminal loading facilities are located approximately 18 miles N.N.W. of the Ras Tanura Terminal and 7 miles offshore.

These facilities consist of an oil metering and manifolding platform, a terminal control platform and 6 Single Point Mooring Berths. The oil metering and manifolding platform is in the following position: Lat. 26° 54.8' N., Long. 50° 01.2' E.

Ju'aymah Crude Terminal: The terminal is a Saudi Aramco crude oil and fuel bunker loading facility designed for loading and topping-off deep draft tankers. The terminal consists of the following facilities:

An Oil Platform (130 ft. by 390 ft.) located in 50 ft. (15.24 m.) of water. This platform receives crude oil and fuel bunkers from the storage tanks on the shore to the S.S.W.

The platform is well lighted with general purpose lighting. In addition 1 fixed white light has been established on each corner of the platform with a range of visibility of approximately 5 miles. A Control Platform (70 ft. by 70 ft.) is located 150 ft. North of the oil platform and connected to it by a walkway bridge. This platform is marked by a fixed red aircraft warning light.

Single Point Mooring Buoys have been established between 1 and 4 miles to the N.E. of these platforms. Crude oil and bunkers are received at each buoy.

Each buoy is fitted with 2×24 in. floating crude loading hoses with 16 in. or 20 in. tail hoses and 1×12 in. floating bunker loading hose. The length of the string is approximately 1,100 ft. (335 m.).

When an SPM is removed ashore for maintenance, a marker buoy may be installed to indicate the position of the underwater pipeline and anchor chains.

PILOTAGE: *Pilot Boarding:* A Pilot/Mooring Master and an SPM Representative will board inbound vessels by helicopter if possible as advised.

They will advise the Master on all manoeuvres and operations relative to berthing, connecting and disconnecting hoses and unberthing. They will also provide all communications between vessels and shore during cargo loading and be the Saudi Aramco Representative with respect to safety observation and other requirements.

These two persons will remain on board the vessel throughout the loading and unmooring and suitable accommodation for them is to be provided.

Dependent on weather and other conditions, vessels will be advised by Ju'aymah Pilot/Radar to proceed to a position approximately 8 miles E.N.E. of Ju'aymah Platform and make a lee for the Pilot to board or for the launch carrying mooring and hose connecting equipment.
Pilot Boarding Position: Lat. 26° 53.5' N., Long. 50° 05.6' E.

INBOUND TRAFFIC PROCEDURE: See "Ras Tanura – Part B" – Traffic Regulations.
Vessels Proceeding Direct to Ju'aymah Crude Terminal: As per "Ras Tanura – Part A" – Navigation – Inbound Traffic Procedures to the Entry Buoy and to a position approximately 2.5 miles N.E. of Buoy 3A.
According to advice from Ju'aymah Radar should turn into the Ju'aymah Pilot Boarding Area to anchor or be berthed on arrival.
Vessels Proceeding from Northern Holding Anchorage to Ju'aymah Crude Terminal: Should enter the Separation Scheme under advice of Ju'aymah Radar and proceed as above.
Max. Draft in Arrival Channel: The max. draft is 70 ft. (21.34 m.) for vessels proceeding along the Inward Channel of the Ras Tanura Separation Scheme bound to Ju'aymah Crude Terminal.
Vessels Proceeding from Ras Tanura Terminal to Ju'aymah Crude Terminal: The vessel should then proceed, exercising due diligence, through the Caution Area and with the advice of Ras Tanura Port Radar and Ju'aymah Radar into the Ju'aymah Pilot Boarding Area either to anchor or be berthed on arrival.
Prohibited Area: No vessel shall enter the Prohibited Area without a Pilot on board. Under no circumstances shall anchors be used in the vicinity of the berths due to the existence of numerous submerged pipelines.

ANCHORAGE: The area West of Beacon No. 3 is used as a final holding anchorage and for vessels awaiting arrival clearance, cargo clearance, sailing documents, etc.
Vessels must leave the inbound route to the berths clear when selecting an anchoring position in this area.

RESTRICTIONS: Ships securing to Smit Mooring Brackets at Ju'aymah SPM Terminal will only be berthed in wind speeds of less than 25 m.p.h. Additionally, this parameter may be further reduced, at the discretion of the Berthing Pilot, should he consider that other forces, i.e. sea state, be prejudicial to a safe mooring operation.

MAX. SIZE: Max. arrival draft 21.34 m. No limitation on sailing.

HEALTH: *Pratique and Quarantine:* At Ju'aymah Crude Terminal, no person is permitted to board a vessel, nor is she permitted to proceed to the berth until inward clearance formalities have been completed and the Authorities have visited the vessel. Vessels topping off from Ras Tanura Terminal will already have completed these formalities.
However, during adverse weather conditions permission may be given by Government Officials for the Pilot to board and moor the vessel before clearance is given. If this occurs and weather conditions continue to preclude clearance during the loading operation, the vessel must when unmoored anchor and wait for clearance formalities to be completed.

RADIO: *Underway:* At all times when underway in the Arrival Channel and Pilot Boarding Area, vessels must maintain contact with Ju'aymah Radar on VHF Channel 13 and with Ju'aymah Pilots on Channel 16 or one of the following VHF working Channels: 10, 11, 12, 13, 14.
At Anchor: A good listening watch should be maintained on VHF Channel 16.
Vessels will be called by Ju'aymah Pilots or Ju'aymah Radar with berthing and other information and instructions.
Under Pilotage and at Berth: The Pilot/Mooring Master will carry a portable intrinsically safe multi-channel radio by means of which all communications regarding approach, mooring and cargo loading will be made. These radios are fitted with an emergency tag which activates an alarm at the Control Platform when removed.
He will also carry battery chargers for these radios during the vessel's stay in the terminal.
In addition, the vessel's VHF radio should be available on the bridge and in the Cargo Control Room for back-up communications.

BERTHING: *Preparations:* Line handling during mooring and unmooring is to be performed by the ship's staff under instructions of the Pilot/Mooring Master.
Vessels assigned to the Ju'aymah Crude Terminal SPMs must be fitted as recommended in the OCIMF publication "Standards for Equipment Employed in Mooring of Ships at Single Point Moorings".
Mooring to strops secured to bitts is not permitted.
During the approach, while mooring and while secured in the berth, the vessel's anchors MUST be secured by stoppers to prevent accidental dropping with subsequent damage to the undersea pipelines and equipment.
Both port and starboard derricks should be rigged ready to lift the mooring and hose connecting equipment from the launch on either side. A trolley should be available to transport this equipment about the vessel's deck.
The following vessel's equipment should be ready on forecastle head:

- (a) Two messenger lines 3 in. to 3.5 in. circumference (24 mm. to 28 mm. dia.) 500 ft. (150 m.) in length.
- (b) Sledge hammer, large crowbar, large marlin spike, adjustable wrench/spanner.
- (c) Bag of sawdust or sand.
- (d) Large flashlight (for night mooring).

Procedure – Mooring:

(a) Saudi Aramco mooring and hose connecting equipment will be lifted aboard the tanker from the launch on either the port or starboard side by means of the ship's derrick.
(b) Ship's staff will prepare the forecastle head for the mooring operation at the instructions of the Pilot/Mooring Master.
(c) As the vessel approaches the berth, a mooring boat will bring the port hawser pick-up rope (10 in. circumference – 80 mm. diameter) and make it fast to the messenger.
(d) At the boat's signal, the pick-up rope is hove on deck and by means of this, the chafing chain is lifted in the bow chock and to the mooring bracket.
(e) Under the direction of the Mooring Master, the chafing chain is secured in the vessel's mooring arrangement.
(f) Ease back on the pick-up rope until the weight is taken up.
(g) Repeat for the second mooring hawser.

Procedure – Unmooring:

(a) Take the weight of the mooring assembly on the pick-up rope, using the windlass.
(b) Disconnect the chafing chain from the mooring arrangement.
(c) Slowly slack the pick-up rope until the support buoy is in the water and taking all of the weight of the chain.
(d) Pay out the pick-up line either to a mooring boat or as the ship clears the berth.

BERTHING FACILITIES: At the berths, cargo hose connections are 16 in. or 20 in. and bunker hose connections are 12 in. arranged to be connected abaft the crude loading connections. All flanges are 150 ASA.

In order to avoid delays, vessels should have reducers ready at the port side manifold to adapt to these sizes. Maximum crude loading rate is 130,000 bbls.p.h., and maximum bunker loading rate is 5,000 bbls.p.h.

Berth No.	*Lat.* N.	*Long.* E.	*Minimum Water Depth* (m.)
31	26° 55.6'	50° 02.4'	32.1
32	26° 56.49'	50° 02.15'	33.8
33	26° 57.0'	50° 02.7	34.0
34	26° 56.6'	50° 04.3'	35.0
35	26° 55.6'	50° 03.6'	32.0
36	26° 55.6'	50° 04.9'	32.2

Note: The following crudes are available at Ju'aymah Crude Terminal: Arabian Light Crude, Arabian Medium Crude, Arabian Heavy Crude. Arabian Berri Crude is NOT available.

LOADING: *Loading Hose Connection and Disconnection:* In order to secure the floating hoses to the vessel's manifold, the manifold arrangements must be as recommended in the OCIMF publication – "Standard for Tanker Manifolds and Associated Equipment (May 1975)" and "Tanker Manifolds and Associated Equipment (3rd Edition 1981)".

Preparation – On the Port Side:

(a) Derrick rigged for maximum height and load lifting capacity (10 tons minimum for 16 in. hoses and 15 tons minimum for 20 in. hoses). If possible, the topping lift of the derrick shall be on its own winch.
(b) Two 16 in. or 20 in. 150 lb. ASA flange connections on selected cargo manifolds and one 12 in. 150 lb. ASA flange on the after bunker manifold.
(c) Drip trays, sawdust or sand, dispersant and fire fighting equipment in position.
(d) The following are normally supplied by Saudi Aramco but their presence will prevent delays in case of deficiency or malfunction: Chain block (not normally supplied), Handy Billy, heaving line, spare spanners, spare wire strop, spare bolts.

Procedure – Connecting Hoses: Connecting and disconnecting of cargo and bunker hoses is to be carried out by ship's staff under instruction of Mooring Master.

(a) Lower derrick hook to the mooring launch which will connect it first of all to the forward hose.
(b) Heave up until the blank flange is level with the hose rail.
(c) Unshackle hose snubbing wires and secure guy ropes to the flange.
(d) Continue heaving up the hose as directed by the Mooring Master.
(e) Secure snubbing wires in a manner to facilitate possible slackening as directed.
(f) Lower the hose to bring the hose flange to the manifold and check the alignment of the flanges.
(g) Lower the hose onto the drip tray and remove the blank flange.
(h) Using the nylon band sling supplied, lift the hose and connect it to the manifold. Never use a wire strop for lifting a cargo hose.

USE ALL OF THE BOLT HOLES AND A GASKET.

The second cargo hose and the bunker hose are connected in the same way.

After all hoses are connected, the cargo hoses must be supported in way of the vessel's side rail by means of the nylon bands supplied and the vessel's derrick.

Procedure – Hose Disconnecting: On completion of loading cargo or bunkers manifold valves must NOT be closed until the Mooring Master directs. This is important for line clearing.

(a) Strop the after hose to the derrick hook, take the weight and disconnect the flange.
(b) Replace the blank flange using *all* of the bolts and a new gasket. Tighten the bolts in sequence to avoid uneven tension on the flange.
(c) Lower hose to deck and secure.
(d) Repeat with forward hose and wait until backfilling of the hoses is complete.
(e) Bunker hose should be disconnected and securely blanked as soon as bunkering is completed and secured on deck until cargo loading is completed. It should be lowered into the water during backfilling of the cargo hoses.
(f) When backfilling is completed, secure the derrick hook to the lifting hook of the after hose and raise the hose until the weight is taken off the snubbing wires.
(g) Release the snubbing wires, lower the hose to rail level and shackle the snubbing wire to the flange.
(h) Lower the hose end into the water and trip the hook to release.
(i) Repeat for the forward hose.

Return all Saudi Aramco tools and equipment to the steel basket, stow in a seamanlike manner and prepare for lowering to the launch on either the port or starboard side dependent on weather conditions.

Loading Procedures: The loading operation will be controlled by radio voice communications between the Mooring Master on the loading vessel and the Control Platform.

All operations including switching of tanks and topping-off must be directly and personally supervised by a ship's officer. Upon being informed by the loading vessel's personnel that the vessel is ready to start loading, the Pilot/Mooring Master will request the loading to proceed according to the previously agreed plan with respect to start-up rates, maximum loading rates and topping-off rates.

Under no circumstances is the flow to the vessel to be stopped by the vessel whilst switching tanks, etc. Need for emergency shutdown of loading aboard the vessel must be communicated by radio from the loading vessel to the Control Platform.

In the event of failure of the radio communications system, the vessel will sound five long blasts on the vessel's whistle followed by 1, 2, 3, 4, 5 and 6 short blasts for a vessel at Berth 31, 32, 33, 34 or 36 respectively.

Loading operations will be stopped and will not be resumed until communications have been re-established.

It is the responsibility of the vessel to advise the Mooring Master to shut down cargo and bunker loading when the vessel's cargo and bunker requirements are met.

Cargo Calculations and Release: The American system of cargo measurement in Barrels with temperatures in fahrenheit degrees according to the ASTM-IP is used by Saudi Aramco and the Saudi Arabian Government for cargo measurement purposes. Ship's cargo loaded figures should be available in these units. Generally, if the difference between average normal ship measurement and official cargo measurement is satisfactory the ship will be released to sail, and the Pilot/Mooring Master will leave after unmooring is complete. If the ship/shore difference is large, the Pilot/Mooring Master will survey the cargo according to laid down Saudi Aramco inspection procedures after unberthing and report his findings to Saudi Aramco Terminal Planners. The ship is required to stay until released by Saudi Aramco if ship/shore difference occurs.

Departure: Upon completion of unmooring, the vessel will make a lee for the mooring and hose connecting equipment to be discharged into the launch on either port or starboard side. Depending upon conditions, the Pilot/Mooring Master and SPM Representative may leave on the launch or later by helicopter. A separate departure channel has been provided for all vessels using the Ju'aymah facilities. The vessel will proceed via the Departure Channel between Beacon J1 and Buoy J2 and thence towards the Exit Buoy JE. The vessel should then set an Easterly course North of JD Buoy to the Ju'aymah Light Float.

EMERGENCY PROCEDURES: In addition to the general principles described in Part A of "RAS TANURA", the following apply to Ju'aymah Crude Terminal:

(a) Should a fire or explosion occur at a buoy mooring, the Oil platform or Control platform, all cargo operations will be stopped and all vessels should stand by to disconnect and unmoor when so instructed by the Pilot/Mooring Master or Port Captain, or when the need to take such action becomes self-evident.

(b) The local signal for emergency is a continuous ringing of the vessel's alarm bells supplemented by more than 6 short blasts followed by 1 long blast of the vessel's whistle. Assistance may be summoned on VHF Channel 16. Location, nature of emergency and type of assistance required should be given. (See "RAS TANURA" Part B – EMERGENCY SIGNAL).

BALLAST: *Arrival Ballast Condition:* Due to the exposed location at the Ju'aymah berths, tankers should arrive with sufficient clean water ballast for safe handling having due regard to the existing sea and weather conditions. Unless otherwise instructed, vessels must arrive with propellers just covered and trimmed not more than 8 ft. (2.44 m.) by the stern.

GENERAL: *Boarding Vessels at Berth:* Small craft are not allowed in the vicinity of the vessel and no one is permitted to board or leave a vessel while cargo loading operations are in progress. Should it become urgent to board or leave for any reason during cargo loading, the Pilot/Mooring Master must be contacted to request permission to shut down the cargo loading operation while the small craft is alongside.

S.P.M. Maintenance: In addition to the mooring boats a larger maintenance vessel works on hoses, buoys and sub-sea systems.

In bad weather, this work is extremely difficult and involves possible danger to personnel.

For this reason, vessels are requested to give as much assistance as possible by taking seamanlike care of the mooring and hose equipment and returning it to the water ready for the next tanker and in such condition as they would like to find it.

Hose/hawser maintenance is expensive and if Saudi Aramco judges that a vessel has misused any hose or hawser the vessel will be liable for the expenditure incurred in making repairs.

AUTHORITY: Saudi Arabian Oil Company (Saudi Aramco), Room N-2004, Ras Tanura, 31311 Saudi Arabia. *Tel:* 966-3-673-4252. *Telex:* 801220 ASAO SJ/Raspilot. *FAX:* 966-3-673-1669.
Contact: Captain A.K.Al Yami, Port Captain.

(B) LPG TERMINAL

This section gives specific information regarding Ju'aymah LPG terminal loading facilities and is to be read in conjunction with "Ras Tanura" – Part A.

PILOTAGE: *Pilot Boarding Position:*
In normal conditions of weather and traffic, an arriving vessel will be advised to proceed from the Ju'aymah Pilot Boading Area by a route South of Buoy J4 to a position 1.5 miles S.E. of SPM 36 to make a lee to pick up the Harbour Pilot. The Pilot will then advise on manoeuvring the vessel to the assigned berth.

Harbour Pilot and Assistant Harbour Pilot will remain on board to assist with efficient turnaround of vessel and will require accommodated and meals.

INBOUND TRAFFIC PROCEDURES: See "Ras Tanura – Part B" – Traffic Regulations.
Vessel Proceeding Direct to Ju'aymah LPG Terminal: As per "Ras Tanura – Part A – Navigation – Inbound Traffic Procedures" to the Entry Buoy and make for a point approximately 2.5 miles N.E. of Buoy 3A. Under advice of Ju'aymah Pilots and Ras Tanura Port Radar turn into the Ju'aymah Pilot Boarding Area to anchor or to be berthed on arrival.
Vessel Proceeding from Northern Holding Anchorage to Ju'aymah LPG Terminal: Enter the traffic separation scheme under advice of Ras Tanura Port Radar and Ju'aymah Pilots and proceed as above.
Vessel Proceeding from Ras Tanura Terminal to Ju'aymah LPG Terminal: Should depart Ras Tanura Terminal and follow the departure channel toward the mid-channel marker RT 1. The vessel should pass through the Caution Area with the advice of Ras Tanura Port Radar and Ju'aymah Pilots into the Pilot Boarding Area either to anchor or to be berthed on arrival.

ANCHORAGES: *Ju'aymah Pilot Boarding Area:* The area West of No. 3 Beacon is used as a final holding anchorage and for vessels awaiting arrival clearance, cargo clearance, sailing documents, etc. as for Ju'aymah Crude Terminal. Ships must only use this anchorage when directed to do so by Ju'aymah Pilots and must leave the inward route to the SPM berths clear when selecting an anchoring position in this area.
Ju'aymah LPG Anchorage: This anchorage has been laid out approximately 2.5 miles N.E. of the loading pier to provide a tank cooling area for gas tankers. The depth of water varies between 16 m. and 30 m. (52 ft. and 98 ft.) and holding ground is fair.

MAX. SIZE: Max. arrival draft 16.37 m. Max. sailing draft 23.00 m.

RADIO: *General:* The onshore production facilities of the LPG Terminal are known as the NGL (Natural Gas Liquids) Plant, etc. This name is often used in reference to the Terminal. No LNG (Liquefied Natural Gas) is exported from the Terminal.
Underway: In the arrival channel, vessels must maintain contact with Ju'aymah Radar on VHF Channel 13.
At Anchor: A good listening watch should be maintained on VHF Channel 16 for information and instructions from any of the following sources:
(a) Ras Tanura Pilots,
(b) Ju'aymah Pilots,
(c) Saudi Aramco Terminal Planners,
(d) Ju'aymah Radar.
Under Pilotage: The Harbour Pilots carry portable, intrinsically safe radios for contact with tugs which operate on Saudi Aramco dedicated mooring frequencies. In addition, the ship's main VHF radio should stand by on Channel 13 for back-up communication.
At Berth: A portable intrinsically safe radio will be supplied to the vessel by the terminal. This radio operates on a UHF frequency dedicated to each berth by means of which constant communication can be maintained during loading. This radio is fitted with a pull-off tag which, when removed, activates an alarm on the radio console in the Control Room and the Pilot Office.

BERTHING: *Mooring Procedure:* Mooring boats are not used at Ju'aymah LPG Terminal. Vessels should have heaving lines ready to take the shore messenger after landing alongside. The messenger is then made fast to the vessel's mooring line which is then hove ashore by a capstan. Heavy wires should be sent one at a time and ropes two at a time. Jetty crews are continuously on duty to handle mooring lines but will not handle mooring lines aboard vessels.

BERTHING FACILITIES: The 2 loading berths are situated on opposite sides of a platform aligned 335° true compass bearing. Berth 51 being the East (outer) berth and Berth 52 being the West (inner) berth. Minimum water depth at the berths is approximately 78 ft. (23.8 m.) at ISLW (Indian Springs Low Water). There are 4 breasting dolphins at each berth and 6 mooring dolphins. The tower crane located in the centre of the platform is used for moving operational and maintenance equipment. RLPG is loaded via 16 in. LPG loading arms. Maximum loading rate is 15,000 bbls.p.h. per arm. Therefore combined maximum for 2 grades is 30,000 bbls.p.h. Each berth is equipped with 4 LPG loading arms each of which may be used for butane liquid, propane liquid or vapour return. The loading arm connections can be adjusted to fit 12 in., 14 in. or 16 in. 150 ASA flanges. All LPG loading arms are fitted with quick connect/disconnect hydraulic couplers (QCDC). Each LPG loading line has an associated circulation return line. The bunker loading connections can be adjusted to fit 6 in. or 8 in. 150 ASA flanges. One bunker/black diesel loading arm is located at each side of the LPG loading station.

Both fuel oil bunkers and marine diesel oil are available at the Ju'aymah LPG berths. The nominal loading rate for fuel oil bunkers is 5,000 b.p.h. and for marine diesel oil is 600 b.p.h. These can be loaded through both of the 8 in. loading arms located on either side of the LPG loading station.

LOADING: *Trim and Stability:* During loading and deballasting operations, the vessel should at all times be adequately stable and in good trim to leave the berth at short notice in the event of an emergency. Excessive lists and trims are not permitted.
Loading Arm Connections: Jetty crews are on duty continuously to handle loading arms and make all connections and disconnections. All loading connections are equipped with electrical insulated flanges therefore ship to shore bonding wires are not required.

Due to the size and bulk of the QCDC couplers, a clear area around each manifold flange of at least 60 cm. (24 in.) is required.The vessel should have suitable 150 ASA reducers and spool pieces fitted to the manifolds it is intended to use.
Loading Procedures: Vapour line must be connected prior to loading LPG cargo of coolant. All excess vapour which cannot be handled by the vessel's recovery equipment will be metered to flare. It is the responsibility of the vessel to advise the jetty operators to shut down cargo and bunker loading when the vessel's requirements of cargo and bunkers are met.

Special regulations govern the acceptance and loading of gas tankers in the Port of Ras Tanura which includes Ju'aymah LPG Terminal.
Cargo Calculations: The American system of cargo measurement in BARRELS with temperatures in fahrenheit degrees according to the ASTM-IP is used for cargo measurement at this Terminal. An independent Inspection Agency is appointed by the Offtaker/Buyer to determine cargo quantity loaded aboard.
Departure: Upon completion of loading, cargo calculation and disconnecting cargo arms, the vessel will be unmoored and the Harbour Pilot will disembark. The vessel will then be free to leave the Port via the Ju'aymah Departure Channel if Early Departure Procedure is used and all relevant documentation is on board. Otherwise, the vessel will proceed to the Ju'aymah Pilot Boarding Area or Cooling Anchorage to await document delivery by the Agent, at the direction of the Pilot.

Contact with Ju'aymah Radar must be maintained on VHF Channel 13 when in the Ju'aymah Crude Terminal Approach Area.

GENERAL: *Emergency Procedures:* In addition to the general principles described in Part A of "RAS TANURA" the following apply to Ju'aymah LPG Terminal.

In the event of a fire or explosion at the pier or on board a vessel which is berthed alongside at the Terminal, the local alarm signal will be a series of 10 short blasts on the ship's whistle at which an Emergency Shutdown system will be activated to immediately stop all cargo loading to vessels at the berths. (See "RAS TANURA – Part B" EMERGENCY SIGNAL). In case of a situation requiring urgent removal of a ship from the berth, a system of sequential automatic loading arm disconnection is fitted. This system will only be activated after very careful evaluation of the situation by all parties.
Duty Harbour Pilot and Tugs: Whenever a vessel is at one of the berths at the LPG Terminal, a Harbour Pilot will stand by on the loading platform in constant communication with the vessel(s) and jetty staff by means of the dedicated UHF radios. Pilots on duty for 8 hours (0600 – 1400, 1400 – 2200 and 2200 – 0600 hrs.).

Tugs stand-by moored in sight of both loading berths.

AUTHORITY: Saudi Arabian Oil Company (Saudi Aramco), Terminal Pilotage and Services Division, Room N-2004, Ras Tanura, 31311 Saudi Arabia. *Tel:* 966-3-673-4252. *Telex:* 801220 ASAO SJ/Raspilot. *FAX:* 966-3-673-1669. *Contact:* Captain A.K.Al Yami, Port Captain.

AGENT: See "Ras Tanura".

JUBAIL: 27.01 N. 49.40 E. (See Plan)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

(A) COMMERCIAL PORT.
(B) KING FAHD INDUSTRIAL PORT IN JUBAIL.

(A) COMMERCIAL PORT.

LOCATION: The Jubail Port Complex is located on the East Coast of the Kingdom of Saudi Arabia, approximately 80 km. North of Dammam. The Port Complex comprises 2 ultramodern facilities: The Commercial Harbour to the South and The King Fahd Industrial Harbour to the North. These harbours have separate entrances and are under separate port managements.

PORT LIMITS: The boundaries of the harbour and anchorages of King Fahd Industrial Port at Jubail and the Commercial Port of Jubail coincide and are given below:
Harbour Boundaries:

All Port property enclosed by a fence following the shore line and extending seawards to a line running between the following points:

Lat. 27° 01' 18" N.,	Long. 49° 38' 33" E.
Lat. 27° 00' 33" N.,	Long. 49° 40' 14" E.
Lat. 27° 00' 30" N.,	Long. 49° 40' 48" E.
Lat. 27° 01' 39" N.,	Long. 49° 42' 39" E.
Lat. 27° 02' 51" N.,	Long. 49° 43' 48" E.
Lat. 27° 04' 42" N.,	Long. 49° 46' 24" E.
Lat. 27° 11' 00" N.,	Long. 49° 53' 30" E.
Lat. 27° 14' 18" N.,	Long. 49° 58' 51" E.
Lat. 27° 16' 15" N.,	Long. 49° 57' 30" E.
Lat. 27° 17' 30" N.,	Long. 49° 55' 30" E.
Lat. 27° 15' 21" N.,	Long. 49° 51' 30" E.
Lat. 27° 12' 42" N.,	Long. 49° 52' 09" E.

Lat. 27° 06' 00" N.,	Long. 49° 45' 15" E.
Lat. 27° 05' 54" N.,	Long. 49° 42' 42" E.
Lat. 27° 05' 54" N.,	Long. 49° 40' 48" E.
Lat. 27° 05' 21" N.,	Long. 49° 40' 48" E.
Lat. 27° 03' 42" N.,	Long. 49° 36' 57" E.

DOCUMENTS: On arrival at the Port, the Master of the vessel shall present or make available for inspection the following papers and documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Cargo Gear Certificate.
Marine Health Declaration.
Vaccination List.
Derat Certificate.
Clearance from Last Port of Call.
Israel Boycott Declaration.
Ship's Stores List.
Grain Shipping Certificate (if the vessel is carrying a grain shipment).
Mail Transport Documents in accordance with the International Postal Treaty (if any mail is carried aboard).
5 copies of the Crew List.
5 copies of the Passenger List.
2 copies of the List of Personal Effects of Crew and Passengers.

To obtain Port Clearance the Master of the vessel shall present or make available for inspection the following papers and documents to Port Management:

Log Book.
Registration Certificate.
Classification Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Port Stevedore Outturn Report.
Receipt for payment of Custom's Duties.
Shipping Note and Cargo Manifest for any cargo loaded.

Cargo papers and documents: The following papers and documents must be submitted to the Port Management not later than 48 hours prior to arrival:

5 copies of the Cargo Manifests in English.
10 copies of the Original Manifests translated into Arabic.
2 copies of the Cargo Stowage Plan.
2 copies of the Hatch List or Bay Plan.
2 copies of the List of Dangerous/Hazardous Cargo for Discharge.
2 copies of the List of Dangerous/Hazardous Cargo in Transit.
2 copies of the List of Heavy and/or Awkward Cargo.
2 copies of the List of any Wine, Spirits and Narcotics, or in the absence of which a "Nil" return.
A Declaration of Type of Reefer Cargo.
An Application for Discharge Permit.

PILOTAGE: Pilotage is compulsory for all vessels of more than 150 n.r.t. Pilots available 24 hours a day, 7 days a week. Pilots will board in the vicinity of No. 7 Channel Buoy. Port Control Station is continuously manned, to be contacted on Channel 16, vessels requiring a Pilot shall use the International Signals. Notice of ETA refer to Rules and Regulations for Saudi Arabian Seaports, Part 1, Para 2.

Pilot Boarding Position:
Lat. 27° 07' 00" N. Long. 49° 47' 00" E.

ANCHORAGES: There are 3 anchoring places: Freighter Anchorage, Tanker Anchorage and Explosives Anchorage, areas between the following buoys and positions:

Inner Anchorage:

Light Buoy "7/ANCH"	Lat. 27° 06' 00" N.	Long. 49° 45' 15" E.
"ANCH 4"	Lat. 27° 08' 12" N.	Long. 49° 45' 06" E.
"ANCH 3"	Lat. 27° 10' 30" N.	Long. 49° 47' 03" E.
"5/ANCH"	Lat. 27° 10' 30" N.	Long. 49° 50' 00" E.

Outer Anchorage:

Light Buoy "3/ANCH"	Lat. 27° 12' 42" N.	Long. 49° 52' 30" E.
"ANCH 2"	Lat. 27° 15' 21" N.	Long. 49° 51' 30" E.
"ANCH 1"	Lat. 27° 17' 20" N.	Long. 49° 55' 30" E.
"1/ANCH"	Lat. 27° 16' 09" N.	Long. 49° 57' 21" E.

Explosives Anchorage:

Light Buoy "EXPL 1"	Lat. 27° 02' 00" N.	Long. 49° 50' 22" E.
"EXPL 2"	Lat. 26° 58' 19" N.	Long. 49° 51' 02" E.
"EXPL 3"	Lat. 26° 56' 49" N.	Long. 49° 52' 47" E.
"EXPL 4"	Lat. 26° 55' 41" N.	Long. 49° 51' 35" E.
"EXPL 5"	Lat. 26° 57' 32" N.	Long. 49° 49' 20" E.
"EXPL 6"	Lat. 26° 59' 50" N.	Long. 49° 49' 56" E.

RESTRICTIONS: The Port can be approached 24 hours a day.

MAX. SIZE: Berths No. 1 to 8: Max. acceptable draft 11.4 m.
Berths No. 9 to 16: Max. acceptable draft 13.6 m.

HEALTH: Quarantine Free Pratique as per International Rules and Regulations. Health Officer will board when the ship is moored.

VHF: Jubail Port Control continuous watch is maintained on Channel 16. Working on Channel 17. Radar Surveillance Channels 64 and 66.

RADAR: Surveillance and Control System Operational.
Position: Lat. 27° 11' 39" N., Long. 49° 57' 26" E.
Structure: Grey circular concrete tower with white radar scanners atop.
Height: 43 m. from ground to radar antenna.
Light: Fixed red warning light atop antenna.

Continuous radar surveillance is maintained by the Saudi Ports Authority over the whole extent of the modified Jubail Ports Approach Channel. All ships should inform Jubail Ports Control on VHF Channel 66 prior to entering or crossing this approach channel.

TUGS: Tugs ranging from 1,500 h.p. to 5,500 h.p. are stationed at Jubail, mooring launches assist in berthing manoeuvres. All tugs are fitted with fire fighting equipment.

BERTHING: The following categories of berth with a draft range from 12.0 m. to 14.0 m. are available — General Cargo, Multi-Purpose, Container Terminal, Ro-Ro for stern and quarter ramp vessels.

Adequate coverage and open storage space is available in the form of warehouses, transit sheds, container terminal with plug-in facilities for reefer and containers/trailers (480V, 60 Hz) Ro-Ro terminal, container freight station, vehicle parks, general cargo storage, empty container storage area.

Cargo Handling Facilities:
Forklifts ranging up to 35 tons.
Head trucks and tow motors.
Trailers.
Chassis and cargo dollies of up to 100 tons.
Weighbridges of 60 tons capacity.

Cranes:
Mobile Cranes up to 100 tons.
One crane 200 tons capacity.

Specialised Cargo Handling Facilities:
Container Gantry Cranes 30.5 tons under spreader.
Transtainers of 30.5 tons under spreader.
Container chassis.

STEVEDORES: First shift: 0700 – 1900 hrs., second shift: 1900 – 0700 hrs., 7 days a week. Sufficient gangs available to work 4 hatches on every vessel.

Minimum discharge rates breakbulk cargo: 1,000 tons per berth per day. Container terminal: 20 TEUs per workable crane per hour.

MEDICAL: Full hospital facilities available, arranged by the Agents.

DENSITY: 1030.

FRESH WATER: Available, arranged through Agent.

FUEL: Fuel oil, marine diesel and marine gas oil are available, arranged through Agent.

CONSULS: American Consul General at Dhahran.

SURVEYORS: International Marine Surveyors and Classification Society Surveyors are on call from Dammam.

GANGWAY/DECK WATCHMEN: The Coast Guard will station a guard at the gangway to prevent unauthorised boarding and landing.

CUSTOMS ALLOWANCES: Possession and/or consumption of alcoholic beverages including beer, table wines and liquors is strictly prohibited in Saudi Arabia. All alcoholic beverages, magazines and cameras are to be under lock and key during vessel's stay in port.

No restrictions on tobacco and cigarettes.

HATCHES: Opening and closing is carried out by stevedores.

AIRPORT: Dhahran Airport 90 km.

TIME: Local time is GMT plus 3 hours. All ETAs and other messages should be made in local time.

HOLIDAYS: No holidays apply for stevedores.

TELEPHONES: Available.

SHORE LEAVE: To be arranged through Agents.

REGULATIONS: See "Rules and Regulations for Seaports" issued by the Co-operation Council of the Arab States in the Gulf.

PORT PROCEDURES: Also see "General" before first port.

Notification to Jubail Port Management:

1. The Owners/Charterers of vessels bound for Jubail with cargo must give preliminary notice of the vessel's intended arrival to the Port Management by telex or cable either directly or through their Agents on arrival at the first or sole loading port, before loading commences. ETA and estimated quantity of cargo by type must be given with the preliminary notice.

2. On completion of loading cargo the following information must be sent to the Port Management by telex or by cable either directly or through the Agent.

(a) Vessel's name.
(b) Flag.
(c) Length overall.
(d) Expected draft on arrival.
(e) ETA.
(f) Cargo particulars, including nature, weight, tonnage and stowage by hatches.
(g) Any dangerous cargo being carried for other destinations.
(h) If dangerous cargo is being carried, the quantity and class in accordance with the IMDG Code whether to be discharged or in transit.
(i) Expected requirements for bunkers and water.
(j) Name of vessel's Agent.

3. A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Vessels Failing to give Required Notification:

Any vessel failing to comply with the requirements under paragraph 1, above, or arriving later than expected under the revised ETA, may lose its berthing registration.

Cargo Papers and Documents:

1. The following papers and documents must be submitted to the Port Management no later than 72 hours (for vessels with more than 200 Bills of Lading) or 48 hours (other vessels).

Prior to arrival:

(a) 5 copies of the Cargo Manifests for discharge, including any additions or amendments in English:
10 copies of the original Manifests translated into Arabic.
(b) 2 copies of the Cargo Stowage Plan.
(c) 2 copies of the Hatch List or Bay Plan.
(d) 2 copies of the List of Dangerous/Hazardous Cargo for discharge.
(e) 2 copies of the List of Dangerous/Hazardous Cargo in transit.
(f) 2 copies of the List of Heavy and/or Awkward Cargo which requires special equipment.
(g) 2 copies of the List of any Domestic Wine or Spirits or Cargo of such nature on the vessel and its location or, in the absence of which, a nil return.
(h) A Declaration of Type of Reefer Cargo.

2. All copies of the Manifests must be taken from the Master Manifest.
3. The List of Dangerous/Hazardous Cargo has to show:
   (a) The technical name.
   (b) The IMDG Class and UN number.
   (c) The quantity of each consignment.
   (d) The location on board respectively in each container or on each trailer or in each barge.
4. Non-compliance will lead to penalties and/or fines.

General Regulations for Cargo Stowage and Handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum numbers of hatches compatible with the requirements of sea-worthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge.

3. Bundled steel, profile iron, rebars, etc. shall be fitted with slings or lifting points suitable for multiple handling.

4. Steel sheets shall be strapped and stacked in bundles of approx. 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

5. Masters and shipping Agents are to instruct their stevedoring contractors at loading port to execute complete separation by Bills of Lading and the Manifest, and will be held responsible for non-compliance with this regulation.

6. No damaged package or item is to be discharged from any vessel, barge, pontoon or handling craft until it has been repaired or repacked in such a manner as to permit it to be handled without further loss or damage to contents of the package or the item itself.
   (a) Where the original outer carton, box or bag is replaced, the replacement carton, box or bag shall be made in the same manner to allow it to be identified with the Bill of Lading and the manifest.
   (b) The Port Management has the right, after notifying Customs, Authorities and ship's Agent concerned, to get rid of or destroy damaged good which may cause harm to installations or public health at the expense of the Owner of the goods or the ship's Agent.

Out-turn Report:

1. After completion of the discharging operation of a vessel the Port will furnish an out-turn report which shall indicate the cargo discharged. The out-turn report must be signed by the ship or ship's Agent. Refusal to sign does not invalidate the report.

2. The ship's Agent has the option of conducting his own counter-tally. Where this is not done, the Port tally must be accepted. If an independent counter-tally is undertaken by the shipowner/Agent, the Port tally supersedes.

3. The cargo handed over into the custody of the Port shall remain at the entire risk and responsibility of the shipowner or its Agents or owner of the goods while on the port premises. The Port Management shall not be responsible in any way for any damage or loss that may occur to goods while within the port premises, whether such damage or loss was the result of accident or negligence on the part of the Owner of the goods or not, except in the case of wilful or gross negligence of port employees.

Storage of Goods:

1. The goods will be stored by the port in accordance with marks and numbers and in Bill of Lading lots in those areas stated in the out-turn report.
2. The Port may store suitable cargo in the open areas.
3. The Port may refuse the storage of goods if:
   (a) There is insufficient space in the Port.
   (b) The inherent properties of the goods render it dangerous or impossible.
4. Except for Customs purposes, no goods or materials stored in the Port are to be unpacked on Port premises without the special permission of the Port Management and Customs.
5. Consignees or their Agents shall remove their goods from the Port within 15 days of completion of discharge of the carrying ship or such period as may be announced by the Port Authority.
6. All cargo, irrespective of whether it has been cleared through Customs or not, which has not been removed from the Port within 15 days of completion of discharge of the carrying vessel may be moved to a special area. All such cargo may be sold by public auction 21 days after completion of discharge of the carrying vessel. These periods may be changed by an announcement of the Port Authority.

GENERAL:

Rubbish: It is strictly prohibited to throw any garbage, rubbish or food leftovers into the port and territorial waters of the Kingdom.

Every violation of the provision of this article shall cause the ship's Master to be penalised with a fine of up to 10,000 Saudi Riyals.

Vessels calling at Jubail Port will be supplied with plastic bags for garbage disposal.

The stevedore's Ship Superintendent must be contacted before the vessel has finished loading/discharging operations to take care of disposal of the bags.

The charge for garbage disposal service will be SR. 200 – per vessel per day, whether the vessel uses the service or not..

Documentation: Jubail Port Management will not permit any vessel to berth if documents have not been submitted as follows:

1. Manifest for vessels with more than 200 Bills of Lading at least 72 hours before arrival.

2. Manifest for all other vessels, Stowage Plans, Hatch List, etc., at least 48 hours before arrival.

Jubail Port Management will grant berthing permission subsequently not earlier than 72 hours after receipt of documents as per case 1 and not earlier than 48 hours as per case 2.

Vessels Discharging Cargo to Aramco Overseas Company (AOC) at the Commercial Port:

General Instructions and Communications Procedures.

1. When carrying vessel leaves loading port, details of tonnage aboard for discharge to AOC and tentative ETA at Jubail should be cabled/telexed to Saudi Arabia telex 601220 (ARAMCO SJ) commencing message "DHAMDDSB/AOC TRAFFIC DHAHRAN".

2. 10, 5, 3 days and 1 day prior to arrival, Master of carrying vessel must transmit updated ETA to "DHAMDDSB/AOC TRAFFIC DHAHRAN" via Saudi Aramco radio station (call sign HZY) which operates the following receiving schedules:

Frequency (kHz)	Approx. Range (miles)	Daily Operating Time (GMT)
500	500	Continuous
8480	2,000	0400 – 1800
12811	2,000	0600 – 1800
16960	2,000	1000 – 1100

3. Vessel must proceed initially to Jubail Pilot Boarding Anchorage, contacting the Jubail Harbour Master on VHF Channel 16 upon arrival. The anchorage is approached from Al-Jurayed (Lat. 27° 12' N., Long. 49° 57' E.) and is bounded by the following co-ordinates:

(1) 27° 03' N., 49° 44.0' E.	(3) 27° 03' N., 49° 47.5' E.
(2) 27° 04' N., 49° 45.5' E.	(4) 27° 02' N., 49° 45.5' E.

4. Pilotage is compulsory. Coast Guard Officials will normally board with the Pilot to commence initial clearance procedures. Customs and Health Authority will complete clearance once the vessel is alongside berth. For guidance the Port currently offers 14 m. water depth in the approach channel and 12 m. alongside the berths (by prior arrangement, it may be possible to utilise the container berths which offer a depth of 14 m. alongside).

5. The AOC Port Master at Jubail, or his authorised representative, will attend on board alongside berth, once clearance has been completed, in order to accept Notice of Readiness for the vessel. AOC staff will be available on board or at shipside throughout the discharge period to protect the safe discharge of AOC cargo and the AOC Port Master, or his representative, will again attend on board prior to sailing in order to countersign the Statement of Facts for the discharge.

6. AOC discharges at Jubail will generally be on a "free-out" basis but will be accomplished by the Ports Authority stevedores. Charges for stevedoring on AOC free-out cargo will be settled directly between AOC and Saudi Ports Authority. Agents must nevertheless notify the Ports Authority of expected vessel arrivals, booking berth space and stevedoring in accordance with the normal customs of the Port. In submitting Manifests for AOC cargo to be the Ports Authority, however, Agents should attach to each Manifest written advice that stevedoring charges will be settled by AOC.

7. Certain material to be discharged by AOC at Jubail will have been ordered from Saudi vendors and will be consigned "C&F Jubail Commercial Port Free-Out Discharge" with "Ultimate Consignee Saudi Aramco" included in the body of the Bill of Lading. Such cargo will be accepted by AOC at Jubail in exactly the same way as cargo consigned directly to AOC and Bills of Lading duly endorsed by the original consignee will be presented.

8. In addition to the normal tallying of cargo by the Ports Authority stevedores, AOC will be carrying out a counter-tallying operation in their own interest. This will be aimed at eliminating the possibility of shortlanding, and recording the factual circumstances of cargo damage and at prompt and accurate reconciliation of discharged and manifested quantities. The co-operation of all Masters and Agents is sought in this activity, particularly in the countersigning of any relevant damage or out-turn reports.

9. All requirements stated in this Notice are those of AOC and are *in addition* to any other procedures required by the Saudi Ports Authority. Any Saudi Ports Authority requirements mentioned herein are for guidance only and should be verified with Saudi Ports Authority.

10. Direct enquiries on operational matters to the Terminal Operations Co-ordination Desk or, failing a reply, to the Assistant Superintendent. Address enquiries on policy matters to the Assistant Superintendent or, in his absence, to the Superintendent. Local liaison at Jubail Commercial Port will be handled by the AOC Port Master or his deputy who will also handle all *urgent* enquiries at night, weekends and holiday periods. Telephone connection to the AOC Port Office is expected in the near future.

11. Until further notice, AOC will be handling only duty exempt cargo through Jubail. Cargo which is dutiable, or subject to import permit restrictions, will normally be routed to Dammam. Exceptionally, if isolated dutiable consignments are inadvertently laden to Jubail instead of Dammam, they will generally be handled at Jubail. Similarly small shipments of duty exempt cargo consigned in error to Dammam will generally be handled at that port. It should no longer be necessary under normal circumstances, therefore, for any cargo to be diverted for discharge to a port other than the one to which it was originally laden.

AUTHORITY: Saudi Arabia Ports Authority, Port of Jubail, P.O.Box 276, Jubail, Kingdom of Saudi Arabia. *Tel:* (03) 361-0600. *Telex:* 831005 Jubpt Sj. *FAX:* (03) 361-3337. *Cables:* Ports Jubail. *Contact:* Engr. Ibrahim Bin Mohammed Al-Tayeb, Port Director General, Jubail Port Management.

(B) KING FAHD INDUSTRIAL PORT IN JUBAIL.

LOCATION: Lat. 27° 04' N., Long. 49° 40' E.
Also see "Commercial Port".

PORT LIMITS: See "Commercial Port".

DOCUMENTS: See "General" before first port, and "Radio" — "Vessel notification telex code from King Fahd Industrial Port to all Agents to be used henceforth".

PILOTAGE: Pilotage is compulsory for all vessels of more than 150 n.r.t. Pilot will board in the vicinity of Buoy No. 7 in position Lat. 27° 07' N., Long. 49° 47' E.

The Port Control Station (located at the Commercial Port) is continuously manned and is to be contacted on Channel 16. Vessels requiring a Pilot shall use the International Signals. Pilots will board from a fast launch and pilot boarding gear must comply with the International Convention for the Safety of Life at Sea (SOLAS) 1974. Vessels with a high freeboard must provide an accommodation ladder combined with a pilot ladder.

ANCHORAGES: See "Commercial Port".

RESTRICTIONS: The port is approachable and operational 24 hours daily throughout the year. Loaded LPG vessels are restricted to daylight movement only, within the entrance channel and harbour areas.

MAX. SIZE: See "Berthing".

HEALTH: See "General Rules for Saudi Arabia" before details of individual ports.

RADIO: Vessel Notification Telex code from King Fahd Industrial Port, Jubail to all Agents, to be used henceforth.

1. Call Sign.
2. Vessel's Name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. LOA.
7. Max. Draft.
8. No. of Hatches.
9. G.R.T.
10. N.R.T.
11. D.W.T.
11A. Displacement on Arrival.
11B. Max. displacement while on berth.
12. Previous Names.
13. Type of Vessel.
14. Type of Cargo to load/discharge.
15. Total cargo weight tons.
16. Total cargo freight tons.
17. No. of containers/units.
18. No. of livestock.
19. ETA.
20. Draft on arrival.
21. Tonnage to hatch.
22. Construction date.
23. Quantity of LCL containers.
24. Last 3 ports of call.
25. Beam of vessel.
26. Lloyd's Register Number.
27. Classification Society.
28. Crew number/Nationality.
29. Next port of call.
30. Hazardous cargo.
31. Is vessel gas free?
32 Inert gas system working.
33. Arms/Ammunition for self defence.
34. Economic speed of vessel.
35. Position 48 hours before arrival.
36. Radar details.

Items which do not apply should be answered N/A. All other items must be answered.

The telex, for vessels loading, should be sent 7/5/3/2/1 day in advance of expected arrival, or sooner. However for loading vessels sailing from ports or geographical positions near to King Fahd Industrial Port in Jubail, the telex should be received as soon as possible.

No Inward Clearance will be issued until the notification telex is received and processed.

Petromin Shell Refinery:

We quote below for Principal's information text of telex received from Petromin Shell Refinery Jubail in May 1988.

Quote

Please adjust PSRC arrival telex as quoted below. We like to stress the point that this information is required to ensure smooth export of products and expedite vessels. It will be appreciated if this information is passed on to PSRC as soon as possible.

1. Ballast on board.
2. Segregated ballast, if any.
3. Will vessel deballast ashore?
4. Quantity and type of slops, if any.
5. Will slops be discharged ashore?
6. Deballasting rate.
7. Can vessel deballast while loading.
8. Size and number of ship's manifold.
9. Indicate on which manifold what product will be loaded (number from stem to stem).
10. Maximum loading rate per connection.
11. Distance – manifold above deck.
12. Distance between manifold connections.
13. Height – manifold to rail.
14. Previous cargo.
15. Grade and approximate quantity to be loaded.
16. Can vessel load 2 grades concurrently, if required?
17. Preferred sequence of loading if grades cannot be loaded concurrently.
18. Is vessel fitted with I.G. installation?
19. Cargo tanks gas free or inerted on arrival.
20. Has vessel been instructed to arrive in gas free condition for visual tank inspection by either Charterers or independent surveyors?
21. Can vessel load and inert at same time?
22. Total time required for inerting.
23. Last port of call.
24. Sailing draft Jubail.
25. Any information relevant to this voyage/loading which vessel may want to convey.
26. The Port Authorities prohibit the discharge of any cargo tank ballast to sea. Clean cargo tank ballast to be pumped ashore on each occasion.

Unquote.

VHF: The Jubail Port Control maintains a continuous watch on Channel 16. Within the Industrial Port area a continuous watch is maintained on Channel 67.

A new control tower in the Industrial Port became operational early in 1986.

RADAR: A Radar Surveillance and Control System is in operation.

TUGS: All tugs are provided with fire fighting capabilities.

Tugs normally join the vessel in the vicinity of Buoy No. 9 and tug's lines are used.

BERTHING: The port is laid out in 5 distinct sections, namely:

1. *Service Facility:* With 6.0 m. depth quay for port craft and others; a module-input facility, depth 8.0 m., capacity 2,000 tonnes; a 1,000 tonnes slipway and marine repair facility.
2. *Dry Bulk Terminal:* Depth alongside 14.0 m. Max. draft 12.6 m. (13.3 m. HW.) with berths totalling 2,300 m., quay wall and a Ro-Ro stern ramp.
3. *Petro-Chemical Quay:* Depth alongside 16.0 m. Max. drafts 14.4 m. (15.2 m. HW.). Each berth 330 m. length and can take vessels up to 100,000, max. displacement. Shore gangways on all berths.
4. *Breakwater Berths:* Depth alongside 16.0 m. Max. draft 14.4 m. (15.2 m. HW). Each berth 330 m. length and can take vessels from 10,000 – 100,000 max. displacement. Shore gangways on all berths.
5. *Offshore Tanker Terminal (OSTT):* Depths alongside 26.0 m. – 30.0 m. Max. draft 25.0 m. Each berth 350 m. length and can take vessels from 30,000 – 330,000 max. displacement. Shore gangway provided.

Saudi Lube Terminal: Breakwater Berth No. 52 (BWB 52). The following has been received from Petromin Lube Oil Blending and Grease Manufacturing Plant (Saudi Lube).

The purpose of this information is to acquaint the Owners, Charterers and Masters of vessels with Saudi Lube's (Petromin Lube Oil Blending and Grease Manufacturing Plant) terminal facilities at King Fahd Industrial Port in Al-Jubail, Saudi Arabia.

The Industrial Port facilities are owned by the Royal Commission for Al-Jubail, a Government Authority of the Kingdom of Saudi Arabia.

The causeway is 9.39 km. long and has a width of 300 m. The open sea tanker terminal extends a further 3.5 km. beyond the end of the causeway, a total distance of almost 13 km. from the original coastline.

Saudi Lube is owned by Petromin (General Petroleum and Mineral Organisation for the Kingdom of Saudi Arabia).

1. *Breakwater Berth (BWB) No. 52 Particulars:*
   Raw material unloading berth, handling different grades of base oil. One unloading arm enables handling of one base oil at a time.
   Berth Limitations: Max. LOA – 284 m.
2. *Oil Spillage/Slops:*
   Oil spillage incurred during the unloading operation cannot be discharged in the sea, instead the vessel must provide its own means of collecting all spilled oil. BWB 52 is equipped with a slops tank to collect berth spillage only.
3. *Time of Arrival Advice:*
   Initial ETA – 5, 3, 2, 1 days.
   Revised ETA – As any changes.
4. *Communications:*
   Contact "Jubail Port Control" on VHF Channel 16 when passing Jubail Fairway Buoy which is located in position:
   Lat. 27° 22' N., Long. 50° 30' E.
   or as soon after as radio reception conditions permit. Once alongside, a portable VHF radio will be placed onboard by Saudi Lube to enable contact between the vessel and the Jetty Operator on the control room, (See "Appendix D").
   Saudi Lube: Telex: 831168 Sublub SJ.
   Phone: 03-3416072 or 341573.
5. *Pilotage:*
   In the port area is compulsory, pilots boarding in position: Lat. 27° 07' N., Long. 49° 47' E.
   Vessels proceeding from the Fairway Buoy to the tanker anchorage may do so without a pilot, but should keep in contact with the Port Authorities on Channel 16 for traffic/anchoring information.
6. *Berthing Criteria:*
   Vessels will normally be berthed on arrival at BWB 52. If the berth is not available, anchoring instructions will be given by the Port Authority.
7. *Tugs:*
   Tugs are available to assist in the berthing and unberthing operation.
8. *Mooring Arrangement:*
   Vessels normally berth portside to on BWB 52 Jetty. Mooring requirements will be advised by the Pilot and follow the recommendation made in the O.C.I.M.F. publication "Guidelines and Recommendations for the Safe Mooring of Large Ships at Piers and Sea Islands". Vessels equipped with both wire and synthetic mooring lines should avoid "mixing" to the same shore mooring point.
9. *Unloading Arm:*
   On BWB 52, the unloading arm connection to the vessel manifold is a hydraulic coupler for 6 in. or 8 in. ANSI 150 FF, DIN 16 or BS 1560 flange. Suitable reducers conforming to this type of flange should be fitted prior to berthing.
   Assistance from the vessel will be required to make the flange connections. The arm is equipped with proximity switches that will give alarm once the "maximum reach envelope" is reached. Vessels with manifold connections outside of this "maximum reach envelope" cannot be connected to the unloading arm.

10. *Unloading Rates:*
The following unloading rates are available at BWB 52 (a booster pump on the berth will be used in series with the ship's pumps).

Base Oil Grade	*Unloading Rate* (cu.m.p.h.)
100 SN	430
150 SN	440
300 SN	430
500 SN	451
700 SN	445
160 BS	150

11. *Ship/Shore Safety Check List:*
A Safety Check List,based on the list recommended by the International Maritime Organisation, will be completed prior to the commencement of cargo operations.

12. *Overboard Discharge Valves:*
Prior to the commencement of the unloading operations, all sea valves connected to the vessel's cargo handling line system should be closed and secured.

13. *Emergency Signal:*
In the case of fire or other emergency, in addition to advising terminal staff and the Jetty Operator on the control room, vessel should sound a series of long blasts on the ship's whistle, each blast being not less than 10 seconds in duration. For cargo unloading emergency procedures, see "Appendix D".

14. *Emergency Towing Wires:*
Fire wires must be positioned on the offshore bow and quarter of the ship. The eyes of these wires should be hung off above the water line and their height adjusted as necessary during cargo operations. The inboard end should be properly secured to a bollard with 5 or 6 fathoms of slack between bollard and fairlead. Means must be provided to prevent the slack accidentally running into the water.

15. *Ship/Shore Access:*
A shore gangway will be provided and tended by shore staff.

16. *Shore Leave:*
Not permitted, except for medical or repatriation reasons.

Appendix "D":

To: The Master SS/MV ....
In Port

Dear Sir,

Routine and Emergency "Stop Unloading" Procedure.

Throughout the unloading operation, you will be supplied with a portable VHF set which will enable continuous contact to be maintained between the Cargo Officer on board and the Jetty Operator on the Control Room.

Any change in the unloading rate, or anytime there is a need to stop unloading, it should be communicated via radio to BWB 52 Control Room. The Cargo Officer on board should notify the Jetty Operator 60, 30 and 5 minutes prior to the completion of the unloading of each grade of base oil.

In case of emergency, wherein the unloading arm needs to be disconnected from the vessel's manifold, inform immediately the Jetty Operator to stop unloading and make an emergency disconnection. The unloading control panel is equipped with an "Emergency Disconnection" push button that will disconnect the unloading arm from the vessel manifold in case of emergency while unloading.

Under no circumstances should the vessel's manifold or tank valves be closed while unloading, such action results in possible damage to our pump or line systems.

During the unloading operation, a Jetty Operator in radio or telephone contact with the tank farm control room is continuously on duty to assist you.

Please acknowledge receipt of this letter by countersigning the attached copy.

....

Master

For Petromin Lube Oil Blending and
Grease Manufacturing Plant (Saudi Lube)

Date ....

CARGO HANDLING EQUIPMENT: The industrial Port is provided with a limited number of mobile cranes and cargo handling equipment which are adequate for the project cargo handled by the port.

BRIDGES: None, air draft unrestricted.

STEVEDORES: 24 hour continuous operations in two shifts from 0700 hrs. – 1900 hrs. and 1900 hrs – 0700 hrs.

MEDICAL: Full hospital facilities are available. Arranged through Agents. The Port also has a fully equipped dispensary with doctor and nurses in 24 hour attendance for emergencies only.

TANKERS: See "Berthing".

Cargo Handling Capacities:

User	*Berth* No.	*Product*	*No. of Arms*	*Maximum Rate* (t.p.h.)
Kemya	41	Butane/Hexene (Imp)	1	275/375
Ar Razi	"	Methanol	3	2,675
Ibn Sina	"	Methanol	3	3,000
Sadaf	42	Benzene (Imp)	1	390

"	"	Urea (bulk)	(2 loaders)	700
Aramco	21	Sulphur	(1 loader)	2,200
Hadeed	24	Iron Ore	(2 unloaders)	1,600

Note: There are 5 arms on each Berth 51 and Berth 61. The arms marked * above can be used for either L.S. Gas Oil, Auto Diesel Oil, or Naphtha.

DENSITY: 1025 – 1034.

FRESH WATER: Available, but not to loading berths.

FUEL: Fuel oil, marine diesel and marine gas oil are available through Agents at anchorage. Pipeline supply to berths is planned for the future.

FIRE PRECAUTIONS: In view of the large volumes of cargo of a hazardous nature passing through the Port, great importance has been attached to all matters pertaining to fire and safety. Precautions to accepted international standards are practised and the Fire and Safety Department is on a 24 hour call out.

CONSULS: The American Consul-General resides at Dhahran. Other Consulates and Embassies are located in Riyadh and Jeddah.

REPAIRS: Minor repairs can be arranged through Agents.

DRY DOCKS: A slipway with 1,000 ton capacity is situated at the Services Quay.

SURVEYORS: International Marine Surveyors and Classification Society Surveyors are available. Arrangements through agents.

GANGWAY/DECK WATCHMEN: The Coast Guard station a guard at the gangway to prevent unauthorised boarding and landing.

HATCHES: Opening and closing of hatches is normally undertaken by the port users at their respective berths, stevedores can be provided if specially requested.

CUSTOMS ALLOWANCES: Possession and/or consumption of alcoholic beverages, including beer, table wines and spirits is strictly prohibited in Saudi Arabia. All alcoholic beverages are to be kept under lock and key during vessel's stay in port.

CARGO GEAR: See "Cargo Handling Equipment".

AIRPORT: International airport at Dhahran, distance 120 Km. A new airport is under construction at Jubail.

TIME: Local time is GMT plus 3 hours. ETA's and messages are to be expressed in LMT.

HOLIDAYS: The Industrial Port is fully operational for 365 days of the year.

POLICE/AMBULANCE/FIRE: Masters are acquainted with emergency telephone numbers upon arrival.

SERVICES: Limited services are available through Ship's Agents.

BANKS: There are a number of Middle East and foreign banks situated in Jubail.

STORES: Ship's stores available. To be arranged by the Agent. Supply of food items is limited and requires the approval of Coast Guard and Customs. Vessels should order fruit, vegetables and provisions in advance of arrival.

SHORE LEAVE: To be arranged by Agent.

REGULATIONS: See "General" before first port.

GENERAL: All vessels must ensure that they have on board upon arrival a copy of "The Rules and Regulations for Seaports", issued in March 1985 by The Co-operation Council for the Arab States of the Gulf.

SHIPMASTER'S REPORT: October 1990.

Berth: Vessel berthed portside alongside Berth No. 51 with the bow seaward.

Crew List: To be sent by telex or fax as soon as possible before ship's arrival. In absence of Crew List, port will not allow/grant permission to enter port area, and it will delay the vessel.

ETA: If possible, ETA to be sent 7/5/3/2/1 day before arrival.

VHF: As soon as contact is established with Jubail Port Control on Channel 16, we changed to Channel 64 and stayed on that channel, until vessel was close to the port, in the vicinity of Buoy No. 7. At this point, we changed to Channel 67 and stayed on this channel to keep in touch with Jubail Pilots.

Docking instructions are received early from Jubail Port Control.

Mooring: The moorings were as follows:

3 headlines, 2 breastlines and 2 springs forward and 2 springs, 2 breastlines and 3 sternlines aft.

Mooring and unmooring was carried out with the assistance of 2 tugs, tugs lines used, and 2 mooring boats. Spring lines were sent ashore first by means of heaving lines. All other ropes were passed ashore by the mooring boats.

Meeting: On completion of clearance formalities, representatives from the suppliers and the Port Safety Department boarded the vessel for a planning meeting.

Tank Atmosphere: Cargo tanks to be inerted prior to commencement of loading products with flashpoint below 60°C. For other products, like gas oil and fuel, it is up to Master's discretion, in which condition ship arrives.

Gas freeing and/or inerting is not allowed alongside berth.

Loading: The vessel loaded Naphtha at a rate of 5,000 cu.m./hr. through 2×16 in. Chicksan arms. The loading rate can be increased to a maximum of 8,000 cu.m./hr., but in our case one of the shore pumps was broken.

On completion of loading, we discharged slops through a separate 16 in. shore arm. On completion of discharge of slops, the shore line has to be flushed with approximately 1,000 cu.m. of salt water, but on this occasion there was no need, as our slops did not contain any waxy material. The flush is to be pumped by the ship.

The connection and disconnection of both reducers and hoses is undertaken by ship's personnel. Lifting arrangements have to be provided by the vessel, in order that the reducers are not manhandled.

During loading (every hour plus 5 minutes) a radio check is carried out with the shore to compare the ship/shore figures.

EDP: No Early Departure Procedure is in force. Cargo documents are placed on board about 3 hours after completion of loading. The pilot boards soon afterwards.

Fuel: Bunkering is done at anchorage.

Provisions: Provisions/vegetables/fruits are available at very reasonable prices. To be ordered as early as possible.

Fresh Water: Available, but not at loading berth.

Customs: Prohibited items, alcohol, pornographic material, cameras under bonded store. Cabins/rooms are subject to inspection by Customs. If any arms/ammunition on board, these also to be kept under bond. Radioroom/radiotransmitter was sealed.

Ballast: Port Authorities prohibit discharge of any cargo tank ballast to sea. Clean cargo tank ballast to be pumped ashore.

Garbage: Plastic bags for garbage are supplied at 0900 hrs. In our case, vessel arrived at 0950 hrs. and was cleared by Customs 1050 hrs. These plastic bags did not come the same day, but should come the next day. However, as we left at 0110 hrs. next morning, the plastic bags never arrived, nor was garbage collected.

AUTHORITY: King Fahd Industrial Port in Jubail, P.O.Box 547, Al-Jubail 31961, Saudi Arabia. *Tel:* (03) 357-8000. *Telex:* 832031 – Jupipt Sj. *FAX:* (03) 357-8133. *Contact:* Engr. Ibrahim Bin Mohammed Al-Tayeb, Port Director General, Jubail Port Management.

AGENT: Gulf Agency Company Saudi Arabia, P.O. Box 12, Jubail – 31951, Saudi Arabia. Cables: "Confidence", Jubail. Ship-Shore traffic via Dammam Radio/HZG. Telex: 831030 ("GAC SJ"). Tel: 3611064, 3611052, 3613072. After office hours: 3613458. Fax: 3612816.

RABIGH: 22.44 N. 38.59 E. (See Plan)

Also see "General" before first port.

LOCATION: The Commercial Port of Rabigh is situated on the East coast of the Red Sea in Saudi Arabia, about 150 km. North of the Jeddah Islamic Seaport, with geographical coordinates Lat. 22° 44' 02" N., Long. 38° 58' 57" E.

The industrial area includes a Crude Oil Refinery, supported by the Port and a new community established 20 km. to the North of the Port.

PORT LIMITS: A vessel is considered an "arrived ship" as soon as she anchors at one of the two anchorages S.E. of Tanda Rock Beacon.

DOCUMENTS: *Arrival Documentation Requirements:* The Rules and Regulations for Saudi Arabian Seaports specify that Master must present or make available for inspection the following papers and documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load-Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificates.
Cargo Gear Certificate.
Marine Health Certificate.
Vaccination List.
Rat-Free Certificate.
Clearance from last port of call.
Israel Boycott Declaration.
Ship's Stores List.
Grain Shipping Certificate, if the vessel is carrying a Grain Shipment.
Mail transport documents in accordance with the "International Postal Treaty", if any mail is carried aboard.
5 copies of the Crew List including name, nationality, date of birth, Passport Number, port of embarkation, port of disembarkation.
2 copies of the List of Personal Effects of crew and passengers.

In addition, the Rules and Regulations require that the Oil Record Book and the Certificate of Fitness (in cases of gas and chemical carriers) are available for inspection.

To obtain Port Clearance, the Master of the vessel shall present or make available for inspection the following papers and documents or copies of them to Port Management:

Log Book.
Registration Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Port Stevedore Outturn Report.
Radio and Wireless Certificates.
Receipt for payment of Custom's duties.
Shipping Note and Cargo Manifest for any cargo loaded.

Full details, regarding procedures and conduct of vessel and crew, must be checked with Rules and Regulations of Saudi Arabian Seaports. The vessel's Agent will provide all details of any changes in the Rules and Regulations.

APPROACHES: The Commercial Port of Rabigh is a deep water port protected by an offshore barrier reef running parallel to the coast.

The Entrance Channel has overall dimensions of 400 m. width and about 1,300 m. length.

The Deep Water Entrance Channel, with depth of 28 m. and width of 240 m., marked with lighted channel beacons, leads to the turning basin with depth 27 m. and diameter about 900 m.

The turning basin is also marked with lighted beacons.

The non-commercial area of the port extends Eastward, but at a depth of about 12 m.

The end of the port is marked by a special lighted marker beacon.

PILOTAGE: Pilotage is compulsory for all vessels entering and leaving the Commercial Port of Rabigh.

Pilots will be available on a 24 hours basis.

All vessels calling at Rabigh must comply with the international requirements concerning the reliable condition of the vessel's engines, equipment, etc., and have on board qualified officers and efficient crew.

The Pilot will board vessels by tug or pilot boat about 0.5 miles North of Tanda Rock Buoy.

Vessels will be accepted for berthing and unberthing only if they are in a very efficient ballast condition. Vessels, calling at Rabigh Port for loading products, should carry on board minimum quantity of ballast at least 30 % of the Summer deadweight, subject to further increase in case of weather deterioration as per Port Control instructions.

ANCHORAGES: The anchorage area for large vessels (VLCCs) is located South of the port entrance, and about 0.5 miles S.E. of the Fairway Buoy, where the average depth is 70 m.

Smaller vessels may anchor near to or S.E. of Tanda Rock Beacon, where depths of 10 m. – 30 m. are available.

AIDS TO NAVIGATION: The following Aids to Navigation have been installed in order to facilitate the safe approach and navigation of vessels to and from Rabigh Port.

(a) Name : Shi'b Al Khamsa Beacon No.12:
Position : Lat. 22° 44.9' N., Long. 38° 37.2' E.
Characteristics : White light flashing (1) every 5 seconds (1 second on – 4 seconds off).
Elevation : 20.40 m.
Luminous Range : 16.00 miles.
Structure : Iron column 90 cm. diameter on concrete base, painted yellow above black, with round railing platform on top.
Remarks (i) : Radar Reflector.
(ii) : Racon X+S Band, code letter "O" (dash-dash-dash) every 48 seconds, 360°, range 20 miles, solar powered.

(b) Name : Shi'b Al Abiyadh Beacon No.13 (South Cardinal Mark).
Position : Lat. 22° 42.7' N., Long. 38° 48.3' E.
Characteristics : White light, very quick flashing (6) plus long flash every 15 seconds (6×(0.35+0.65)+1.5+7.5 = 15 sec.).
Elevation : 12.00 m.
Luminous Range : 10.00 miles.
Structure : Iron column 75 cm. diameter on concrete base, painted yellow above black, with round railing platform on top.
Top Marks : Two black cones.
Remarks : Radar Reflector.
Important Notice : Deep draft vessels should pass not less than 0.7 miles South of Shi'b Al Abiyadh Beacon No.13.

(c) Name : Tanda Rock Beacon No.14 (North Cardinal Mark).
Position : Lat. 22° 43.6' N., Long. 38° 56.0' E.
Characteristics : White light quick flashing 60 f.p.m. (0.3 seconds on – 0.7 seconds off).
Elevation : 10.20 m.
Luminous Range : 8.00 miles.
Structure : Iron column 74 cm. diameter on concrete base, with round railing platform on top painted black above yellow.
Top Marks : Two black cones.
Remarks : Radar Reflector.

(d) Name : Tanda Rock Reef Buoy No.15. (North Cardinal Mark).
Position : Lat. 22° 44.6' N., Long. 38° 55.8' E.
Characteristics : White light very quick flashing 100 f.p.m. (0.2 seconds on – 0.4 seconds off).
Elevation : 3.40 m.
Luminous Range : 4.00 miles.
Structure : Iron buoy painted black above yellow.
Top Marks : Two black cones.

(e) Name : Fairway Buoy (safe water mark) Mid-Channel Mark.
Position : Lat. 22° 43.4' N., Long. 38° 58.0' E.
Characteristics : White light flashing one long flash every 10 seconds.
Elevation : 4.0 m.
Luminous Range : 5 miles.
Structure : Iron Buoy, painted red and white vertical stripes.
Top Marks : Single red sphere.

(f) Name : Port Hand Channel Buoy (Lateral Mark).
Position : Lat. 22° 44.1' N., Long. 38° 58.5' E.
Characteristics : Flashing red.
Elevation : 4.0 m.
Luminous Range : 3 miles.
Structure : Iron can buoy, painted red.

RESTRICTIONS: *Equipment Requirements:* No vessel shall be allowed to navigate within the port, unless it complies with the following equipment requirements:

(a) Efficient VHF radio telephone capable of working on the port frequencies.
(b) Efficient steering gear with fully operational rudder and helm indicators.
(c) Efficient propulsion, both ahead and astern and fully operational tachometer.
(d) Both anchors capable of being released and raised by the vessel.
(e) Efficient winches and adequate mooring gear to secure the vessel safely; an efficient mooring stations communication system.
(f) Sufficient crew on board at all times to operate the vessel safely and efficiently, with all officers properly qualified and certificated, as required by the flag nation and Saudi Rules and Regulations.
(g) All secondary power or mechanical systems on the vessel to be in operation, and immediately available in the event of failure of any primary system.

If any vessel cannot comply with any of the requirements listed above, Rabigh Port Management Control must be advised prior to arrival or departure. The vessel will then be subject to inspection and possible delay.

Failure to comply, or to notify Rabigh Port Management Control, may result in the vessel being fined or refused entry/departure to or from the port or both.

Draft Requirements: Vessels will not be permitted entry to the port unless they arrive at a draft consistent with safe manoeuvring and reasonably trimmed, to the satisfaction of the Pilot.

MAX. SIZE: Max. permissible draft alongside berth is 23.5 m. Max. LOA 400 m. Minimum parallel body 66 m.

HEALTH: A Doctor will board vessel on arrival at the berth, in order to expedite Quarantine Clearance.

International Certificates of Vaccination against cholera and yellow fever must be made available if required, in accordance with international or local health regulations.

Quarantine signals must be displayed upon approaching Rabigh Port in accordance with international practice, and shall be continously displayed until Pratique is granted. The signals shall be as follows:

Sunrise to Sunset – Quarantine Flag.
Sunset to Sunrise – Quarantine Signal Lights (Red over White).

VESSELS APPOINTMENT SYSTEM: The Saudi Arabian Ports Management requires Pre-Loading Advice on arrival at the first port of loading, and further notice of ETA with updated particulars of the cargo on sailing from the final loading port.

Revised ETA to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Vessels in ballast bound for loading at Rabigh should follow the same ETA procedures.

Dry Cargo Vessels: The vessel must send the following information to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and Vessel's Agent.

1. Radio Code (Call Sign).
2. Vessel's Name.
3. Owner/Charterer.
4. Nationality.
5. Agent.
6. LOA in metres.
7. Max. draft in metres.
8. Number of Hatches.
9. G.R.T.
10. N.R.T.
11. D.W.T.
12. Previous Name (if any).
13. Type of Vessel.
14. Type of Cargo.
15. Total Cargo Weight Tons.
16. Total Cargo Freight Tons.
17. Number of Containers/Units (where applicable).
18. Number of Livestock (where applicable).
19. E.T.A.
20. Actual Arrival Draft.
21. Hazardous Cargo for Rabigh.
22. Hazardous Cargo in Transit for other ports.
23. Tonnage to Hatch for Rabigh Discharge.
24. Year of Construction.
25. Lloyd's Register Number.
26. All Ports of Loading.
27. Number, position and S.W.L. of derricks and/or cranes and particulars and positions of ramps.
28. All Ports at which cargo will have been loaded for discharge at Rabigh.
29. All other ports at which the vessel will have called between arrival at the first port of loading and arrival at Rabigh.
30. All ports at which cargo remaining on board will be discharged after completion of discharge at Rabigh.
31. Last 3 ports ship visited before arrival, in proper order.
32. Economic Speed.
33. Total volume of vessel in tons.
34. Volume of hatches in cubic metres.
35. Reason of visit.
36. Estimated time and date of departure.
37. Ammunition and/or explosives in-transit to Rabigh.
38. Cargo of alcholic beverages in-transit to Rabigh.
39. Arms and ammunition on board, purpose of self defence.
40. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency and beam width).

The vessel's name and radio code should be given in every subsequent telex for computer reference.

The absence of any of the above information may incur delay to the vessel's port turnaround.

Questions not applicable to a particular vessel should be answered with the text "not applicable".

Tankers: As soon as the vessel receives orders to proceed to the port, the following information must be sent to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and vessel's Agent.

1. Name of vessel.
2. Former Names.
3. Port of Registry, Flag, Call Sign.
4. L.O.A., G.R.T., N.R.T.
5. Summer d.w.t., Arrival d.w.t.
6. Draft on arrival, forward and aft.
7. ETA.
8. Last Port.
9. Cargo on board and flash point, destination of cargo.
10. Cargo requirements.
11. Previous cargo and quantity of residues on board for load-on-top.
12. IMO Class.
13. Whether gas free or in inert condition.
14. Port of loading ballast and amount.
15. Quantity of ballast loaded on passage.
16. Quantity of segregated ballast on arrival.
17. Quantity of cargo tank ballast on arrival.
18. Time for deballasting, can ship load/deballast simultaneously.
19. Special conditions-difficulties-defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
20. Agent's Name.
21. Maximum loading rate.
22. Topping-off rate.
23. Bunker Requirements.
24. Cargo manifold connection size.
25. Bunker connection size.
26. Derricks.
27. Arms and ammunition on board for self defence.
28. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency, beam width).
29. Owners.
30. Operators.
31. Charterers.
32. Built.
33. Stowaways.
34. Alcoholic beverages as cargo on board.
35. Prohibited articles, if any, to be collected and placed in bonded stores prior to vessel's arrival.
36. P & I Club.
37. Master's name.

Gas Tankers: As soon as the vessel receives orders to proceed to the port, the following information must be sent to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and vessel's Agent.

1. Name of vessel, indicating any former names.
2. Port of Registry, Flag, Call Sign.
3. L.O.A., G.R.T., N.R.T.
4. Summer d.w.t.; Arrival d.w.t.; Arrival draft, forward and aft.
5. Last Port, ETA Rabigh.
6. Quantity of ballast on arrival, where loaded.
7. Quantity of dirty ballast on arrival.
8. Total cargo capacity in cubic metres and cargo required.
9. Grades and quantities of any part cargoes or cargo residues and where loaded. Grade and quantities of product in deck tanks.
10. Are part cargoes to be commingled with loadings?
11. Gauge pressures top and bottom and mean temperatures of each cargo tank.
12. Quantity of coolant required in addition to cargo requirements.
13. Maximum allowable relief valve settings for all cargo tanks.
14. Have any cargoes other than LPG been carried during last 3 loaded voyages. Specify?
15. Maximum oxygen content by volume per cent of each warm or inerted cargo tank.
16. If tank purging required, specify whether:
    (a) Parallel or in series.
    (b) Liquid from shore direct to cargo tanks.
    (c) Liquid from shore to vessel's vaporizers, specify vaporizer throughput in RLPG/hour.
17. If cooling down tanks is required, specify maximum cooling rate in terms of temperature reduction per hour and maximum temperature differential permitted between any 2 points in cargo tank.
18. Available total capacity of ship's reliquefaction plant for each nominated cargo product.
19. Type of ship's reliquefaction system, i.e., direct, cascade or other.

first by means of heaving lines. All other ropes were passed ashore by the mooring boats.

Meeting: On completion of clearance formalities, representatives from the suppliers and the Port Safety Department boarded the vessel for a planning meeting.

Tank Atmosphere: Cargo tanks to be inerted prior to commencement of loading products with flashpoint below 60°C. For other products, like gas oil and fuel, it is up to Master's discretion, in which condition ship arrives.

Gas freeing and/or inerting is not allowed alongside berth.

Loading: The vessel loaded Naphtha at a rate of 5,000 cu.m./hr. through 2×16 in. Chicksan arms. The loading rate can be increased to a maximum of 8,000 cu.m./hr., but in our case one of the shore pumps was broken.

On completion of loading, we discharged slops through a separate 16 in. shore arm. On completion of discharge of slops, the shore line has to be flushed with approximately 1,000 cu.m. of salt water, but on this occasion there was no need, as our slops did not contain any waxy material. The flush is to be pumped by the ship.

The connection and disconnection of both reducers and hoses is undertaken by ship's personnel. Lifting arrangements have to be provided by the vessel, in order that the reducers are not manhandled.

During loading (every hour plus 5 minutes) a radio check is carried out with the shore to compare the ship/shore figures.

EDP: No Early Departure Procedure is in force. Cargo documents are placed on board about 3 hours after completion of loading. The pilot boards soon afterwards.

Fuel: Bunkering is done at anchorage.

Provisions: Provisions/vegetables/fruits are available at very reasonable prices. To be ordered as early as possible.

Fresh Water: Available, but not at loading berth.

Customs: Prohibited items, alcohol, pornographic material, cameras under bonded store. Cabins/rooms are subject to inspection by Customs. If any arms/ammunition on board, these also to be kept under bond. Radioroom/radiotransmitter was sealed.

Ballast: Port Authorities prohibit discharge of any cargo tank ballast to sea. Clean cargo tank ballast to be pumped ashore.

Garbage: Plastic bags for garbage are supplied at 0900 hrs. In our case, vessel arrived at 0950 hrs. and was cleared by Customs 1050 hrs. These plastic bags did not come the same day, but should come the next day. However, as we left at 0110 hrs. next morning, the plastic bags never arrived, nor was garbage collected.

RABIGH: 22.44 N. 38.59 E. (See Plan)

Also see "General" before first port.

LOCATION: The Commercial Port of Rabigh is situated on the East coast of the Red Sea in Saudi Arabia, about 150 km. North of the Jeddah Islamic Seaport, with geographical coordinates Lat. 22° 44' 02" N., Long. 38° 58' 57" E.

The industrial area includes a Crude Oil Refinery, supported by the Port and a new community established 20 km. to the North of the Port.

PORT LIMITS: A vessel is considered an "arrived ship" as soon as she anchors at one of the two anchorages S.E. of Tanda Rock Beacon.

DOCUMENTS: *Arrival Documentation Requirements:* The Rules and Regulations for Saudi Arabian Seaports specify that Master must present or make available for inspection the following papers and documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load-Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificates.
Cargo Gear Certificate.
Marine Health Certificate.
Vaccination List.
Rat-Free Certificate.
Clearance from last port of call.
Israel Boycott Declaration.
Ship's Stores List.
Grain Shipping Certificate, if the vessel is carrying a Grain Shipment.
Mail transport documents in accordance with the "International Postal Treaty", if any mail is carried aboard.
5 copies of the Crew List including name, nationality, date of birth, Passport Number, port of embarkation, port of disembarkation.
2 copies of the List of Personal Effects of crew and passengers.

In addition, the Rules and Regulations require that the Oil Record Book and the Certificate of Fitness (in cases of gas and chemical carriers) are available for inspection.

To obtain Port Clearance, the Master of the vessel shall present or make available for inspection the following papers and documents or copies of them to Port Management:

Log Book.
Registration Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Port Stevedore Outturn Report.
Radio and Wireless Certificates.
Receipt for payment of Custom's duties.
Shipping Note and Cargo Manifest for any cargo loaded.

Full details, regarding procedures and conduct of vessel and crew, must be checked with Rules and Regulations of Saudi Arabian Seaports. The vessel's Agent will provide all details of any changes in the Rules and Regulations.

APPROACHES: The Commercial Port of Rabigh is a deep water port protected by an offshore barrier reef running parallel to the coast.

The Entrance Channel has overall dimensions of 400 m. width and about 1,300 m. length.

The Deep Water Entrance Channel, with depth of 28 m. and width of 240 m., marked with lighted channel beacons, leads to the turning basin with depth 27 m. and diameter about 900 m.

The turning basin is also marked with lighted beacons.

The non-commercial area of the port extends Eastward, but at a depth of about 12 m.

The end of the port is marked by a special lighted marker beacon.

PILOTAGE: Pilotage is compulsory for all vessels entering and leaving the Commercial Port of Rabigh.

Pilots will be available on a 24 hours basis.

All vessels calling at Rabigh must comply with the international requirements concerning the reliable condition of the vessel's engines, equipment, etc., and have on board qualified officers and efficient crew.

The Pilot will board vessels by tug or pilot boat about 0.5 miles North of Tanda Rock Buoy.

Vessels will be accepted for berthing and unberthing only if they are in a very efficient ballast condition. Vessels, calling at Rabigh Port for loading products, should carry on board minimum quantity of ballast at least 30 % of the Summer deadweight, subject to further increase in case of weather deterioration as per Port Control instructions.

ANCHORAGES: The anchorage area for large vessels (VLCCs) is located South of the port entrance, and about 0.5 miles S.E. of the Fairway Buoy, where the average depth is 70 m.

Smaller vessels may anchor near to or S.E. of Tanda Rock Beacon, where depths of 10 m. – 30 m. are available.

AIDS TO NAVIGATION: The following Aids to Navigation have been installed in order to facilitate the safe approach and navigation of vessels to and from Rabigh Port.

(a) Name : Shi'b Al Khamsa Beacon No.12:
Position : Lat. 22° 44.9' N., Long. 38° 37.2' E.
Characteristics : White light flashing (1) every 5 seconds (1 second on – 4 seconds off).
Elevation : 20.40 m.
Luminous Range : 16.00 miles.
Structure : Iron column 90 cm. diameter on concrete base, painted yellow above black, with round railing platform on top.
Remarks (i) : Radar Reflector.
(ii) : Racon X+S Band, code letter "O" (dash-dash-dash) every 48 seconds, 360°, range 20 miles, solar powered.

(b) Name : Shi'b Al Abiyadh Beacon No.13 (South Cardinal Mark).
Position : Lat. 22° 42.7' N., Long. 38° 48.3' E.
Characteristics : White light, very quick flashing (6) plus long flash every 15 seconds (6×(0.35+0.65)+1.5+7.5 = 15 sec.).
Elevation : 12.00 m.
Luminous Range : 10.00 miles.
Structure : Iron column 75 cm. diameter on concrete base, painted yellow above black, with round railing platform on top.
Top Marks : Two black cones.
Remarks : Radar Reflector.
Important Notice : Deep draft vessels should pass not less than 0.7 miles South of Shi'b Al Abiyadh Beacon No.13.

(c) Name : Tanda Rock Beacon No.14 (North Cardinal Mark).
Position : Lat. 22° 43.6' N., Long. 38° 56.0' E.
Characteristics : White light quick flashing 60 f.p.m. (0.3 seconds on – 0.7 seconds off).
Elevation : 10.20 m.
Luminous Range : 8.00 miles.
Structure : Iron column 74 cm. diameter on concrete base, with round railing platform on top painted black above yellow.
Top Marks : Two black cones.
Remarks : Radar Reflector.

(d) Name : Tanda Rock Reef Buoy No.15. (North Cardinal Mark).
Position : Lat. 22° 44.6' N., Long. 38° 55.8' E.
Characteristics : White light very quick flashing 100 f.p.m. (0.2 seconds on – 0.4 seconds off).
Elevation : 3.40 m.
Luminous Range : 4.00 miles.
Structure : Iron buoy painted black above yellow.
Top Marks : Two black cones.

(e) Name : Fairway Buoy (safe water mark) Mid-Channel Mark.
Position : Lat. 22° 43.4' N., Long. 38° 58.0' E.
Characteristics : White light flashing one long flash every 10 seconds.
Elevation : 4.0 m.
Luminous Range : 5 miles.
Structure : Iron Buoy, painted red and white vertical stripes.
Top Marks : Single red sphere.
(f) Name : Port Hand Channel Buoy (Lateral Mark).
Position : Lat. 22° 44.1' N., Long. 38° 58.5' E.
Characteristics : Flashing red.
Elevation : 4.0 m.
Luminous Range : 3 miles.
Structure : Iron can buoy, painted red.

RESTRICTIONS: *Equipment Requirements:* No vessel shall be allowed to navigate within the port, unless it complies with the following equipment requirements:

(a) Efficient VHF radio telephone capable of working on the port frequencies.
(b) Efficient steering gear with fully operational rudder and helm indicators.
(c) Efficient propulsion, both ahead and astern and fully operational tachometer.
(d) Both anchors capable of being released and raised by the vessel.
(e) Efficient winches and adequate mooring gear to secure the vessel safely; an efficient mooring stations communication system.
(f) Sufficient crew on board at all times to operate the vessel safely and efficiently, with all officers properly qualified and certificated, as required by the flag nation and Saudi Rules and Regulations.
(g) All secondary power or mechanical systems on the vessel to be in operation, and immediately available in the event of failure of any primary system.

If any vessel cannot comply with any of the requirements listed above, Rabigh Port Management Control must be advised prior to arrival or departure. The vessel will then be subject to inspection and possible delay.

Failure to comply, or to notify Rabigh Port Management Control, may result in the vessel being fined or refused entry/departure to or from the port or both.

Draft Requirements: Vessels will not be permitted entry to the port unless they arrive at a draft consistent with safe manoeuvring and reasonably trimmed, to the satisfaction of the Pilot.

MAX. SIZE: Max. permissible draft alongside berth is 23.5 m. Max. LOA 400 m. Minimum parallel body 66 m.

HEALTH: A Doctor will board vessel on arrival at the berth, in order to expedite Quarantine Clearance.

International Certificates of Vaccination against cholera and yellow fever must be made available if required, in accordance with international or local health regulations.

Quarantine signals must be displayed upon approaching Rabigh Port in accordance with international practice, and shall be continously displayed until Pratique is granted. The signals shall be as follows:

Sunrise to Sunset – Quarantine Flag.
Sunset to Sunrise – Quarantine Signal Lights (Red over White).

VESSELS APPOINTMENT SYSTEM: The Saudi Arabian Ports Management requires Pre-Loading Advice on arrival at the first port of loading, and further notice of ETA with updated particulars of the cargo on sailing from the final loading port.

Revised ETA to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Vessels in ballast bound for loading at Rabigh should follow the same ETA procedures.

Dry Cargo Vessels: The vessel must send the following information to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and Vessel's Agent.

1. Radio Code (Call Sign).
2. Vessel's Name.
3. Owner/Charterer.
4. Nationality.
5. Agent.
6. LOA in metres.
7. Max. draft in metres.
8. Number of Hatches.
9. G.R.T.
10. N.R.T.
11. D.W.T.
12. Previous Name (if any).
13. Type of Vessel.
14. Type of Cargo.
15. Total Cargo Weight Tons.
16. Total Cargo Freight Tons.
17. Number of Containers/Units (where applicable).
18. Number of Livestock (where applicable).
19. E.T.A.
20. Actual Arrival Draft.
21. Hazardous Cargo for Rabigh.
22. Hazardous Cargo in Transit for other ports.
23. Tonnage to Hatch for Rabigh Discharge.
24. Year of Construction.
25. Lloyd's Register Number.
26. All Ports of Loading.
27. Number, position and S.W.L. of derricks and/or cranes and particulars and positions of ramps.
28. All Ports at which cargo will have been loaded for discharge at Rabigh.
29. All other ports at which the vessel will have called between arrival at the first port of loading and arrival at Rabigh.
30. All ports at which cargo remaining on board will be discharged after completion of discharge at Rabigh.
31. Last 3 ports ship visited before arrival, in proper order.
32. Economic Speed.
33. Total volume of hatches in tons.
34. Volume of hatches in cubic metres.
35. Reason of visit.
36. Estimated time and date of departure.
37. Ammunition and/or explosives in-transit to Rabigh.
38. Cargo of alcholic beverages in-transit to Rabigh.
39. Arms and ammunition on board, purpose of self defence.
40. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency and beam width).

The vessel's name and radio code should be given in every subsequent telex for computer reference.

The absence of any of the above information may incur delay to the vessel's port turnaround.

Questions not applicable to a particular vessel should be answered with the text "not applicable".

Tankers: As soon as the vessel receives orders to proceed to the port, the following information must be sent to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and vessel's Agent.

1. Name of vessel.
2. Former Names.
3. Port of Registry, Flag, Call Sign.
4. L.O.A., G.R.T., N.R.T.
5. Summer d.w.t., Arrival d.w.t.
6. Draft on arrival, forward and aft.
7. ETA.
8. Last Port.
9. Cargo on board and flash point, destination of cargo.
10. Cargo requirements.
11. Previous cargo and quantity of residues on board for load-on-top.
12. IMO Class.
13. Whether gas free or in inert condition.
14. Port of loading ballast and amount.
15. Quantity of ballast loaded on passage.
16. Quantity of segregated ballast on arrival.
17. Quantity of cargo tank ballast on arrival.
18. Time for deballasting, can ship load/deballast simultaneously.
19. Special conditions-difficulties-defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
20. Agent's Name.
21. Maximum loading rate.
22. Topping-off rate.
23. Bunker Requirements.
24. Cargo manifold connection size.
25. Bunker connection size.
26. Derricks.
27. Arms and ammunition on board for self defence.
28. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency, beam width).
29. Owners.
30. Operators.
31. Charterers.
32. Built.
33. Stowaways.
34. Alcoholic beverages as cargo on board.
35. Prohibited articles, if any, to be collected and placed in bonded stores prior to vessel's arrival.
36. P & I Club.
37. Master's name.

Gas Tankers: As soon as the vessel receives orders to proceed to the port, the following information must be sent to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and vessel's Agent.

1. Name of vessel, indicating any former names.
2. Port of Registry, Flag, Call Sign.
3. L.O.A., G.R.T., N.R.T.
4. Summer d.w.t.; Arrival d.w.t.; Arrival draft, forward and aft.
5. Last Port, ETA Rabigh.
6. Quantity of ballast on arrival, where loaded.
7. Quantity of dirty ballast on arrival.
8. Total cargo capacity in cubic metres and cargo required.
9. Grades and quantities of any part cargoes or cargo residues and where loaded. Grade and quantities of product in deck tanks.
10. Are part cargoes to be commingled with loadings?
11. Gauge pressures top and bottom and mean temperatures of each cargo tank.
12. Quantity of coolant required in addition to cargo requirements.
13. Maximum allowable relief valve settings for all cargo tanks.
14. Have any cargoes other than LPG been carried during last 3 loaded voyages. Specify?
15. Maximum oxygen content by volume per cent of each warm or inerted cargo tank.
16. If tank purging required, specify whether:
    (a) Parallel or in series.
    (b) Liquid from shore direct to cargo tanks.
    (c) Liquid from shore to vessel's vaporizers, specify vaporizer throughput in RLPG/hour.
17. If cooling down tanks is required, specify maximum cooling rate in terms of temperature reduction per hour and maximum temperature differential permitted between any 2 points in cargo tank.
18. Available total capacity of ship's reliquefaction plant for each nominated cargo product.
19. Type of ship's reliquefaction system, i.e., direct, cascade or other.

20. Capacity of ship's gas blowers to shore vapour return line in volume per hour at reference temperature.
21. Maximum loading rate and approximate topping-off rate.
22. Bunker manifold size, bunker requirements.
23. Manifold presentation, function, A.S.A. rating, size, from forward.
24. Agent's Name.
25. IMO ship type, does vessel have valid Certificate of Fitness?
26. Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring – unmooring or during cargo operations.
27. Arms and ammunition on board for self defence.
28. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency, beam width).

RADIO *Pre-Arrival Information and Requirements:* The Rules and Regulations of Saudi Arabian Seaports require pre-loading advice, pre-arrival information from first loading port and further notification of ETA 5 days, 2 days and 1 day prior to arrival.

This information must be telexed to:
(a) Petromin Petrola Rabigh Refinery Co. Telex No. 612032 RABREF SJ.
(b) Rabigh Port Management.
(c) Rabigh Port Authority.
(d) Vessel's Agent.
either directly or through the vessel's Agent.

Vessels which fail to comply with this requirement may be delayed and/or be subject to a fine, as laid down in the Seaport Rules and Regulations.

VHF: All marine services and shipping movements within the Rabigh Port Area are monitored and controlled by Rabigh Port Control, which maintains VHF watch on Channel 16 and 66A.

Vessels should finally confirm their ETA and other particulars at least 3 hours before arrival.

VHF Channels 1, 3, 15, 16, 18A, 19A, 65A, 66A, 78A and 79A are continously available for use by the Rabigh Port Control.

In the event of a port emergency, Rabigh Port Control will designate a channel for use during the period of emergency.

RADAR: Port radar service not available.

TUGS: There are 5 Voith Schneider tugs available for berthing and unberthing operations, each of 4,700 h.p., bollard pull 52 tons. They are equipped with fire fighting equipment and remote controlled monitors for foam-water or water jet, ranging up to 70 m.

Two pilot boats are available.

Mooring boats will be utilised to run mooring lines to the mooring dolphins from the tankers.

BERTHING: Liquid Cargo Port: The Liquid Cargo Port is situated Southeastward of the turning basin with depth 26.5 m., width 690 m. and a length 960 m. at the East side and 760 m. at the West side of the port.

Berths and Equipment: Two berths (No.2 and No.3) are situated on the East side of the port, and are aligned 321°, with depth alongside the berths of 26.0 m. They are designed to service tankers from 30,000 d.w.t. to 325,000 d.w.t. The distance between the centre of the inner breasting dolphins is 66 m. The distance between the outer mooring dolphins is 430 m.

Each berth consists of a concrete platform with dimensions 30 m. × 50 m. at 3 m. above M.S.L., and a metal service platform on it at 6.75 m. above M.S.L. Each berth has 4 breasting dolphins with large flexible rubber fenders on the outer face and 6 mooring dolphins, all equipped with quick release hooks with electrically operated capstans. All quick release hooks can be remotely released from the berth control cabin.

There are 24 quick release hooks available for each berth with capacity ranging from 100 tons to 180 tons.

On each berth there is a multi-purpose tower with an automatic gangway and a 1.5 tons service crane.

Loading Arms: On each berth there are 8 FMC designed, hydraulically operated loading arms, with quick couplers which connect to the ship's flanges. Special adaptors for the 20 in. loading arms can be used for the connection to the 14 in. to 24 in. ship's flanges, as well as for the 10 in. loading arms for the connection to the 6 in. to 16 in. ship's flanges.

1×20 in. arm is dedicated exclusively for loading Jet Fuel.

2×20 in. arms for loading Naphtha or Gas Oil.

3×20 in. arms for loading Fuel Oil or unloading Crude Oil and for deballasting purposes.

2×10 in. arms for bunkering and deballasting.

The accepted minimum and maximum manifold heights above mean sea level are 2.5 m. and 28 m. respectively.

The maximum lateral drift is 3.5 m. forward and 3.5 m. aft, in the normal position of zero offset.

All loading/bunker connections are equipped with electrically insulated flanges. Therefore ship to shore bonding cables are not required.

Loading Rates: Product loading rates:

	Minimum (cu.m.p.h.)	*Maximum* (cu.m.p.h)
Naphtha	600	5,400
Jet Fuel	600	3,600
Gas Oil	600	5,400
Fuel Oil	600	5,400
Bunker	200	1,150

Crude Oil maximum unloading rate is 16,000 cu.m.p.h.

Ballast maximum unloading rate is 10,000 cu.m.p.h.

Crude is sampled during unloading from automatic Jiskoot samplers, while volumetric measurements are made at the tanks with the usual dipping method. Products are metered with calibrated and Customs checked Smith Meters.

Water Supply: Potable water is available at about 50 cu.m.p.h.

Fire Fighting Equipment: The berths are equipped with 4 remote controlled monitors, two on each side, throwing water or a foam mixture a distance of 65 m., and capable of covering the manifold area of the largest tanker. Underneath each berth there are foam dispensers, and on each berth 4 foam-water hydrants. Loading arms, multi-purpose tower and the monitor tower have water sprinklers for cooling in case of fire.

The fire water line is always under pressure.

The berth monitors are remote controlled from the berth control cabin, as well as from a fire fighting tower situated onshore halfway between the two berths.

Operational and Berthing Criteria:
(a) Limiting conditions for the Pilot to board the vessel:
Wave height of 2.0 m. Wind over 25 knots (Beaufort Scale Force 6).
(b) Limiting conditions for berthing and mooring operations:
Wind speed over 25 knots (Beaufort Scale Force 6).
(c) Limiting conditions for loading/unloading operations:
Wind speed over 40 knots (Beaufort Scale Force 8).
(d) Limiting conditions not permitting unberthing:
Wind speed over 30 knots (Beaufort Scale Force 7).

However, vessels can remain alongside the berth even with a 60 knot wind speed (Beaufort Scale Force 11).

Maximum berthing velocity: 20 cm./sec.

Maximum approach angle: 7°.

Mooring Arrangements: Recommended mooring diagrams are shown in the "Plan Section". However, in order to ensure the safety of personnel, tankers and loading facilities, and to prevent accidental oil spillages, the Rabigh Port Management strongly recommends that tankers utilise the minimum mooring lines and mooring wires as follows:

Up to 45,000 d.w.t. – minimum of 16 mooring lines.

45,000 d.w.t. to 70,000 d.w.t. – minimum of 16 mooring lines to include 6 wire lines for springs and/or breast lines.

VLCCs must provide an all wire mooring arrangement of minimum:
70,000 d.w.t. to 160,000 d.w.t. – 12 mooring wires.
160,000 d.w.t. to 250,000 d.w.t. – 16 mooring wires.
250,000 d.w.t. to 350,000 d.w.t. – 16 mooring wires.
350,000 d.w.t. to 400,000 d.w.t. – 18 mooring wires.

For mooring VLCCs, it is recommended that as a minumum a 42 mm. diameter 6 × 37 class IWRC preformed heavily drawn galvanised wire line (minimum tensile strength of 180 kg./sq.mm.) with a typical MBL of 115 tonnes be specified.

Vessels equipped with both wire and synthetic lines must avoid mixing such lines to the same dolphin (and same direction).

Vessels must be moored to the entire satisfaction of the Pilot.

Any known defects of vessel's mooring system should be reported to the Pilot and terminal before arrival.

As soon as tankers are secured, manual brakes should be set on the winches, and they should not be left on automatic tension.

An efficient watch must be maintained on the vessel's moorings at all times, to ensure that all lines have the required tension and the vessel is kept well close alongside.

Vessels must be ready to put out more lines if required by weather changes or at the direction of the Rabigh Port Management and Terminal Operator.

Pioneer Port: The Pioneer Port is situated on the South part of the harbour and West of the Oil Cargo Port, with a depth of 15.0 m. and a width of 350 m.

Four concrete finger piers on piles, with depths of minimum 7.0 m. – maximum 15.0 m. are available on the South side of the Pioneer Port for tugs, pilot boats, mooring boats and small craft.

Dry Cargo Pier: The Dry Cargo Dock is situated on the South coast of the harbour, near the port entrance and has a depth alongside of 6.5 m. and a length of 80 m.

All loading and unloading operations of dry cargo are carried out through the Dry Cargo Dock.

Bagged sulphur is loaded from Dry Cargo Dock. Maximum permissible depth is 6.5 m., length 120 m. Shore cranes available.

Dry Cargo Port: Presently used as a Yacht and Coast Guard Port.

BALLAST: *Ballast Discharge:* All ship's dirty or clean ballast should be discharged to the Refinery's shore reception facilities. Maximum rate of discharge is 10,000 cu.m.p.h. Discharging of ballast at sea is strictly prohibited.

In very exceptional cases clean ballast may be discharged to sea, from permanent or segregated ballast tanks, but only with the permission of the Rabigh Port Management and Port Authority. In this event the Master must state in writing that the oil content in the water ballast does not exceed 5 p.p.m.

Slop residue and ballast contaminated by leaded gasoline cannot be discharged ashore.

Slops may only be discharged into the ballast system with the express approval of the Petromin Petrola Rabigh Refinery after sampling. Prior to arrival, vessel should advise the terminal of the quantity and quality of slops held on board, and confirm that no chemicals or emulsifying agents have been used in previous tank cleaning.

MEDICAL: There is a medical room for first aid in the Refinery and a hospital in the village of Rabigh.

FRESH WATER: Available.

FUEL: Bunkers presently not available alongside berths but will be available in the future (there are loading arms for bunkering fuel oil and mixtures).

Bunkering at roads may be available with small vessels ex-Jeddah, if arranged through Agents and Coast Guard (Not available April 1994).

REPAIRS: There is no repair facility in the port. Vessels can make repairs in the roads.

SURVEYORS: Classification Society Surveyors are available from Jeddah on request of the Master to the Agent.

GANGWAY/DECK WATCHMEN: Not required.

Coast Guard: One Coast Guard is placed on board and requires accommodation and food during the vessel's stay in port.

CUSTOMS: Customs may board the vessel at the berth or at the anchorage. All alcoholic beverages must be placed under seal. Cigarettes, cigars and tobacco in excess of normal consumption during the expected duration of stay are placed under seal. Spirits are strictly prohibited.

Prohibitions:

(i) No photographs shall be taken in port.

(ii) Radio will be sealed and is not to be used during vessel's stay in port.

(iii) The importation of the following items is strictly prohibited: Explosives and firearms, including air rifles; implements of war of any kind, including antiques; alchoholic beverages; religious matter not pertaining to the Moslem faith; pig meat and products; playing cards and gambling games or devices; narcotics and pornographic photographs or magazines carrying such pictures.

AIRPORT: Jeddah Airport, 150 km. South of Rabigh.

REPATRIATION: Arranged by Ship's Agent.

HOLIDAYS: Tanker terminal operates 365 days a year including hoildays.

POLICE/AMBULANCE/FIRE Police: 4220300/4220304. Ambulance: 4221617. Fire 4221770. Coast Guard: 4223082/4221400.

TIME: GMT plus 3 hours.

SHORE LEAVE: Not permitted unless special arrangements are made through the Agents.

GARBAGE DISPOSAL: Garbage collection service is available for limited quantities after special Coast Guard permission obtained through ship's agent. Garbage should be collected in plastic bags and will be delivered by the vessel to a small craft carrying special bucket after the completion of Coast Guard formalities and provided that a 48 hours notice prior vessel's arrival has been given to the Marine Dept. of the refinery through the agent for approval.

WASTE OIL DISPOSAL: Slop residues and ballast contaminated by leaded gasoline cannot be discharged ashore. Slops may be discharged into the ballast system only with the express approval of the Petromin Petrola Rabigh Refinery after sampling. Prior to arrival vessel should advise the terminal of the quantity and quality of slops held on board and confirm that no chemicals or emulsifying agents have been used in previous tank cleaning.

SEAMAN'S CLUBS: None.

CURRENCY: Saudi Riyals (SR).

TELEPHONE: Not available for placing on board ship.

SAFETY: *Safety Inspections and Emergency Procedures:*

1. The Special Safety Regulations pertaining to tankers as quoted in the Regulations for Port Safety of the Rules and Regulations for Saudi Arabian Seaports as well as international regulations in respect of these matters should be strictly followed.
   (a) Ship/Shore Safety Check List should be completed jointly by a ship's officer, Terminal personnel and a representative of Safety Department, as soon as possible after the vessel is alongside the berth, and prior to commencement of any cargo/bunker operations.
   (b) Repeated safety inspections will be carried out by the Loading Master/Terminal Operator or Petromin's Safety Department during the vessel's stay alongside.
   (c) The Master and officers will be advised immediately in the event of any infringement of safety requirement on board, in order to take corrective measures.
   (d) If the violation continues, all operations on board may be suspended, the vessel may be ordered out of the berth and will be held responsible for all delays and consequences thereof. The Agent, Owner and Charterer will be advised accordingly.
   (e) Gas freeing, hot work and engine repairs are strictly forbidden in port.
   (f) Vessel's engines should be ready for use at all times.
2. Emergency procedures and actions which have to be taken, will be reviewed by the vessel's Chief Officer and the Loading Master or Terminal Operators, as soon as the vessel comes alongside the berth.

   An emergency situation may arise in the following cases:
   (a) Fire on board or on shore.
   (b) Pollution on board, around the vessel or on shore.
   (c) Collision, grounding, sinking.
   (d) Weather deterioration (strong wind and thunderstorm).
   (e) High gas concentration.
   (f) Any other serious event affecting the safety of personnel, the vessel or the port.
3. Emergency situations will be reported immediately to the Rabigh Port Control and Terminal Operator by:
   (a) VHF Channels 16, 66A or 9 or any other designated channel.
   (b) Telephone.
   (c) Continuous sounding of the ship's whistle.
   (d) Refinery Alarm System.
   (e) Any other convenient means of communication.

All operations at the port and on board the vessels will be immediately suspended, and all tugs will stand by.

All vessels will comply with the emergency reporting procedures as per Rabigh Port Management and Port Authority instructions.

In the event of an emergency, the vessel's crew and terminal personnel should take immediate action to stop loading/discharging, disconnect the loading arms and place fire facilities on stand-by.

Preparation should be made for the vessel to leave the berth, and to limit, if possible, the hazard to personnel, ships and/or installations. At the same time all concerned should maintain contact with the Rabigh Port Management and Port Authority for further instructions and coordination.

An efficient crew watch should be maintained on deck throughout the vessel's stay alongside the berth.

Direct contact by VHF must be maintained with the Terminal Operator.

Inert Gas Requirement: Saudi Arabia is a signatory to the International Convention SOLAS 74 and its amendments.

Vessels which are required to be inerted under the above convention will be checked by the Terminal Representative before loading commences, in order to attain an oxygen content of 6% or below in their cargo tanks. Also see "Shipmaster's Report" dated May 1991.

Oil Pollution Prevention: Oil spillages are viewed very seriously by the Rabigh Port Authority, Coast Guard and Rabigh Port Management.

Spillages will be investigated by the Authorities, and the Master and/or Owner will be liable to prosecution and heavy penalties including the cost of cleaning. Delay to the vessel's departure could well arise. Masters are requested to ensure that every measure has been taken to prevent oil spillages at or outside Rabigh Oil Terminal and must advise the Rabigh Port Management, if their vessel has sustained any damage at any time which could lead to oil pollution. Suitable absorbent material or other materials or equipment should be readily available and suitably located on deck in order to clean any spillage.

Prior to entry into the port, the Master is required to sign the "Instructions to Vessels and Conditions of Use of all Berths", presented to him by the Pilot, regarding his or his Owner's responsibilities for pollution originating from his vessel.

WEATHER:

Climate: Tropical desert, hot climate with humidity very high during Summer months. Winter is mild and pleasant.

The weather conditions can be divided into 2 seasons:

(a) November to February with average temperatures 30° C. in daytime and 18° C. at nightime and average humidity 65%. Rain may be experienced very rarely during December or January, and does not normally last more than 2 hours. The rainfall varies between 10 mm. and 65 mm. and has a monthly average of 5 mm.

(b) March to October with average temperatures 38° C. in daytime and 25° C. at nightime with average humidity of 82%.

August is the hottest month.

Wind – Sea Condition – Visibility: Generally the prevailing winds experienced in this area are North to Northwesterly which occur 70% of the time compared with winds from any other direction. The speed of these winds normally does not exceed Force 3 to Force 6, although rarely winds of higher speed have been recorded.

Usually the wind starts to blow at 1000 hrs., reaches its maximum strength at noon, and then reduces at about 1900 hrs.

The state of the sea with a Northwest wind is slight to moderate outside the port. Easterly wind can be experienced occasionally reaching Force 7.

Generally the port is not affected by the state of the sea and swell.

Winds of gale force may occur between December and March. The direction of these winds is usually South to Southwest; velocity usually reaches Force 7, although winds of Force 11 have been experienced in the area.

Visibility at this time is usually limited to 1 mile due to sandstorms, and the state of the sea is rough to very rough.

The signs of impending storm are clouds which begin to appear from South or Southwest. The storm breaks suddenly followed by heavy rain and thunder.

Poor visibility due to fog is rarely experienced, only occasionally during the morning hours. However throughout the year dust storms may occur, obscuring the coastline.

Tides and Currents: The tide cycle is semi-diurnal. Elevation of the tide levels in relation to the mean sea level are as follows:

L.L.W.L	−0.74 m.	M.S.L.	0.00 m.
H.H.W.L.	+0.74 m.	Mean Daily Tidal Range	0.34 m.

Local currents are affected by the general circulation of currents in the Red Sea. They usually flow in a N.W.'ly direction along the coast with a speed usually not in excess of 0.5 knots. The Rabigh Port is minimally affected by tides, and there are no significant currents produced by tidal flows.

Sea Temperature: Ranging from 22° C. to 29° C.

Sea Water Density: 1027.5 (Average).

GENERAL: *Charts and Publications:*

Charts:

(a) Saudi Arabian Charts	No.18, No.182
(b) British Admiralty Charts	No.63, No.926
(c) U.S.A. Chart (Omega)	No.62250

Publications:

(a) British Admiralty Tide Table, Volume 2, Atlantic and Indian Oceans.

(b) British Admiralty Red Sea, Gulf of Suez and Aden Pilot (plus supplement No.64.)

(c) British Admiralty List of Lights and Fog Signals, Volume E.

(d) Rules and Regulations for Saudi Arabian Seaports.

Rules and Regulations for Saudi Arabian Seaports: Full details regarding Port Rules and Regulations are included in the above book, which must be kept on board the vessel and in any case be obtained immediately on first arrival in a port of the Kingdom of Saudi Arabia.

The required procedure for the presentation of official papers and documents required are listed in "Documents", however, full details regarding procedures and conduct of vessel and crew must be checked with the above Rules and Regulations.

Government Entry Requirements: The Master will be responsible for complying fully with the requirement of Saudi Arabian Government Departments, Ministries, Agencies and Organisations. Particular attention should be paid to the requirements of Customs, Coast Guard, Immigration and Port Health Authorities. Masters requiring any advice on these requirements should contact their local Agents.

Instructions to Vessels and Conditions of use of all Berths: When the Pilot boards an inward-bound vessel, he will present the Master with a letter "Instructions to Vessels and Conditions of use of all Berths".

The Master is required to sign the letter, acknowledge receipt and agree to the instructions and conditions contained therein prior to entry into the Port.

No vessel will be allowed to enter the Port until this letter has been signed.

Agent: There are no Agents offices in Rabigh at the present time. Agent's business is carried out through Jeddah offices. For crew changes and other formalities, Agents should be contacted.

Provisions and Stores: May be available from Rabigh or Jeddah, on request to the Agents.

SHIPMASTER'S REPORT: July 1990.
Approaches: The port has made new charts and submitted them to publishers, but nothing official is available yet.

B.A. Chart No. 925 is inadequate, and has not been revised as yet. Nevertheless, it is not a difficult task to approach the port, and the existing aids and Port Handbook are sufficient.

On arrival, the pilot boards using a tug, 3 – 4 cables North of the Tanda Rock Buoy, preferably from starboard side. Accommodation ladder can be used.

On departure, the pilot disembarks as soon as the vessel clears the buoyed channel, and even without chart, one has no difficulties sailing outward.

Anchorages: Considered safe and easily accessible without pilot. Vessel has only to clear Tanda Rock Buoy, leaving it to starboard, and pass the Fairway Buoy at 0.5 miles, and there is the anchorage for large vessels.

Inertion: The refinery requires vessels, in order to load, to be inerted to 6% or less of oxygen content. If visual inspection of the tanks needed, this is carried out at the anchorage. Then inertion must take place before the ship is admitted to berth.

The O_2 content is checked alongside.

N.O.R. is "received" upon being all fast.

Medical: Facilities available.

Repatriation: Possible via Jeddah. Seaman's Book mandatory.

Radio Free Pratique Message: Not required. Doctor boards upon berthing.

Personnel: Cooperation with Refinery personnel considered very good.

Cargo Documents: Time for Bills of Lading, etc., after loading is minimal. Difference in ship/shore figures is negligible.

Chandlers/Stores: None of the usual type of chandlers available. In case of need (with a long trip ahead), arrangements can be made through agents, in advance, and someone from the vessel can go to Rabigh town market and buy the goods.

SHIPMASTER'S REPORT: April 1991.

Our vessel was advised by Agent, only a few hours prior to arrival, that the oxygen content of the tanks should be less than 6%, and that the vessel should be ballasted to at least 30% of Summer deadweight.

SHIPMASTER'S REPORT: May 1991 (Updated 1994).
Location: Rabigh Refinery is located some 90 nautical miles South of Yanbu.

The Eastern coast of Saudi Arabia from Yanbu to Jeddah and at Gizan is well covered by strong Racons.

Approaches: Shi'b al Khamsa (a low lying coral-reef) was picked-up on the radar on a range of 42 miles (Racon "O"/ 3 cm. and 10 cm.). About 9 miles further East, Shi'b al Bayada (low lying reef) was picked-up on the radar at about 10 miles. After passing Shi'b al Bayada, a course of 055° takes the vessel well clear of Tanda Rock and the extensive coral-reef just off the coast.

If berthing on arrival, the pilot will meet the vessel just North of Buoy No. 15. There is no pilot boat. One of the large harbour tugs takes the pilot out to the vessels. A combination of pilot ladder and gangway was used on the starboard side.

If the vessel has to anchor, a pilot will board on request at Buoy No. 15, and then bring the vessel into the well protected anchorage behind the reef.

Pilot is not compulsory for anchoring, but 'Rabigh Port Control' (VHF Channel 16) must be contacted prior to moving into the Large Vessel Anchorage.

Anchorage: The Large Vessel Anchorage is divided into 6 equal anchor positions. Holding ground is good (sand and coral). Water depth is between 65 m. – 80 m.

Pilotage: Pilotage available 24 hours for berthing and unberthing.

Health: Health authorities (local doctor) check De-Rat Certificate and issues Free Pratique.

Tugs: For mooring and unmooring, we used 3 tugs. Tugs (Voith Schneider) have a minimum power of 6,000 h.p.

Berthing: Rabigh Refinery is located in a natural bay with 4 pairs of buoys leading to the two berths.

Water depth alongside both berths is 27.8 m.

The Refinery and Loading Terminal is operated by Greek consultants and technicians, and most of the Loading Masters are ex-ship masters. Cooperation with the Terminal was good and professional.

Vessels berth starboard side alongside.

Hose connections were 3×16 in. Chicksans, very quick to connect.

There are facilities for pumping ballast ashore.

Imports are crude oil and exports are fuel oil, naphtha and jet fuel.

Shore gangway used.

Moorings are 3/3/2 each end. Two mooring boats take lines to quick release hooks. Spring lines of wire with rope tails are sent ashore first.

After loading, documentation takes 1.5 hours – 2 hours to complete.

Fuel: Not available.

Repatriation: Only possible when prior arrangements have been made by owners and Agent. Wives leaving and joining the vessel require valid Seaman's Books.

Shore Leave: Not permitted, even for reading draft.

General: No documents sighted by Authorities or Agent.

Military guard checks that all bonded stores are properly closed.

AUTHORITY: Petromin – Petrola Rabigh Refinery Company, P.O.Box 180, Rabigh, 21911 Saudi Arabia. *Tel:* (02) 4223200. *Telex:* 612032 RABREF SJ. *FAX:* (02) 4221794. *Contact:* Mr. Hussein Bahaa, Chief Executive Assistant. Mr. Samy Saad, Refinery General Manager. Captain Iraklis Dairopoulos, Harbour Master. Captain Constantinos Kamateros, Asst. Harbour Master. Dr. H. Al-Makhzangi, Asst. General Manager. Mr. Dionissios Routsis, Superintendent, Offsites/on Shore Marine.

AGENT: See "Jeddah".

RAS AL-KHAFJI: 28.25 N. 48.32 E. (See Plan)

The onshore base lies in position approximately Lat. 28° 25' N., Long. 48° 31' E., and within a distance of 7 miles (13 km.) offshore, the Company has two four-buoy system berths and two single-buoy-mooring system berths for loading tankers, and also an anchorage area for dry-cargo ships. Outside of this distance there is an anchorage area for tankers. These berths and anchorage areas are situated in the territorial waters of the Kingdom of Saudi Arabia.

APPROACHES: The approaches to Ras Al-Khafji are marked on the appropriate U.S.N.O. and British Admiralty Charts, and deep enough for the majority of vessels visiting the Port to proceed with normal caution using the buoys (Buoys No. 1 and No. 2) as centre line and both side markers (Buoys No. 3 – No. 8). A single patch with a depth of 56 ft. (17.07 m.) marked by Buoy No. 4 exists close to the passage. A patch of minimum depth of water 70 ft. (21.34 m.) exists in the passage 0.6 miles S.S.E. of Buoy No. 7.

All the geographical positions shown are intended for reference purpose only. Users are reminded that certain differences are known to exist between the positions herein and those on the U.S.N.O. and British Admiralty Charts of the area.

The U.S.N.O. Charts No. 62451 and 62430 and B.A. Charts No. 3774 and 2882 are recommended for navigational use in this area.

For oil tankers arriving at Ras Al-Khafji without the necessary charts, the full information will be given by telex upon request to Terminal and Shipping, the Company's Field Office (841011 AAB, 841011 ARBOIL SJ) or telegram upon request to "ARABIAOIL KUWAIT" (via "Kuwait Radio Station 9KK") a few days before arrival. Alternatively, if the vessel has VHF, the buoy positions will be given to them upon request to "Ras Al-Khafji Terminal" as the vessel approaches, but prior notice of requiring this service should be given in the vessel's arrival message. The navigation message used reads as follows:

"ON REACHING NUMBER ONE LIGHT BUOY LATITUDE 28° 36.0' NORTH LONGITUDE 49° 10.0' EAST RWVS ISOPHASE WHITE TEN SECONDS 10 MILES RAREFL – THENCE STEER 270 DEGREES TRUE FOR 9 MILES TO NUMBER TWO LIGHT BUOY LATITUDE 28° 36.0' NORTH LONGITUDE 49° 00.0' EAST RWVS LONG FLASHING WHITE TEN SECONDS 10 MILES RAREFL – THENCE STEER 254 DEGREES TRUE FOR 9.5 MILES TO POINT 0.8 MILE NORTHWARD OF NUMBER FOUR LIGHT BUOY LATITUDE 28° 32.6' NORTH LONGITUDE 48° 49.0' EAST RED GPFL FIVE RED TEN SECONDS 6 MILES RAREFL – THENCE STEER 270 DEGREES TRUE ABOUT 2 MILES TOWARD NUMBER SEVEN LIGHT BUOY LATITUDE 28° 33.4' NORTH LONGITUDE 48° 45.7' EAST GREEN FLASHING GREEN THREE SECONDS 4 MILES RAREFL – THENCE STEER 243 DEGREES TRUE TOWARD FOR 8 MILES NUMBER NINE LIGHT BUOY LATITUDE 28° 29.5' NORTH LONGITUDE 48° 37.8' EAST YELLOW GPFL FOUR YELLOW TEN SECONDS 7 MILES RAREFL MARKS TANKER ANCHORAGE WEST CORNER STOP NUMBER ONE AND TWO LIGHT BUOYS MARK CENTRE LINE OF APPROACH WHICH IS WIDE AND DEEP STOP TWO SHOAL PATCHES NORTHWARD OF APPROACH ARE MARKED BY NUMBER THREE LIGHT BUOY LATITUDE 28° 34.9' NORTH LONGITUDE 48° 51.5' EAST YELLOW ABOVE BLACK QUICK FLASHING SIX PLUS LONG FLASHING WHITE FIFTEEN SECONDS 10 MILES RAREFL AND NUMBER FIVE LIGHT BUOY LATITUDE 28° 33.8' NORTH LONGITUDE 48° 48.0' EAST YELLOW ABOVE BLACK VERY QUICK FLASHING SIX PLUS LONG FLASHING WHITE TEN SECONDS 10 MILES RAREFL STOP TANKER ANCHORAGE AND PILOT GROUND IS WITHIN 1 MILE RADIUS OF LATITUDE 28° 29.5' NORTH LONGITUDE 48° 39.0 STOP"

NAVIGATIONAL AIDS: *Conspicuous Marks:* The flare stacks in the offshore field and onshore are normally visible at a far distance, but may occasionally be extinguished, and a well structure located 4.5 miles Northward from Light Buoy No. 2 is conspicuous.

No. 1 Flare	Lat. 28° 28.3' N., Long. 48° 57.0' E.
No. 2 Flare	Lat. 28° 27.0' N., Long. 48° 54.8' E.
No. 3 Flare	Lat. 28° 29.8' N., Long. 48° 56.0' E.
No. 4 Flare	Lat. 28° 30.3' N., Long. 48° 58.0' E.
No. 5 Flare	Lat. 28° 28.5' N., Long. 48° 55.9' E.
Onshore Flare 1	Lat. 28° 24.5' N., Long. 48° 32.4' E.
Onshore Flare 2	Lat. 28° 23.7' N., Long. 48° 32.1' E.
Well Structure	Lat. 28° 40.4' N., Long. 48° 57.8' E.
Ex-Loading Dock	Lat. 28° 24.5' N., Long. 48° 32.4' E.
Valve Station Platform	Lat. 28° 26.9' N., Long. 48° 35.8' E.
Kaizu Maru Wreck	Lat. 28° 31.7' N., Long. 48° 34.6' E.

Ex-Loading Dock is out of use. Jetty structure with a light Fl.R. 3 sec.2M.RARE on tower at North end.

Valve Station Platform functions as berth loading control platform with a light Fl.R.10 sec.10M.RARE.

"Kaizu Maru" wreck is unlit.

DOCUMENTS: *(A) Clearance.* Master should submit following documents to Saudi Arabian Government through Agent (2 copies each):

Maritime Declaration of Health.
Health Condition of Crew.
Details of Air-conditioning.
Crew List.
Vaccination List.
Passenger List (if any).

Note: Forms 1 – 3 are supplied by the Agent.

(B) Cargo: All the documents listed below except the Ship's Statement of Cargo (Ullage Report) are prepared onshore, and this takes about 1.5 hours after loading completion. The tanker is requested to designate the type of documentation, either early departure or ordinary documentation by filling checkmark in the Designation of Documentation type. The Company usually recommends Early Departure Documentation. But ordinary documentation can also be requested. In this case, however, it takes a further 30 – 60 minutes before the documents arrive at the tanker. Whenever necessary, the Mooring Master will sign the documents on behalf of the Company.

The following cargo documents are usually to be prepared onshore except (4):

(1) Notice of Readiness
(2) Bill of Lading
(3) Tanker Time Sheet
(4) Ship's Statement of Cargo (Ullage Report)*
(5) Certificate of Discharge**
(6) Master's Receipt of Documents

Note: *Ship's Statement of Cargo includes the items for "Clean Ballast Declaration" and "Dry Inspection" both together in one form, and is to be completed always on board the tanker regardless of Early Departure Documentation.

**Certificate of Discharge should be handed over to the tanker's Agent at the port of discharge for certification by the Customs Authorities there. The Agent should then return the Certificates to the Company as soon as possible. Non compliance with this requirement could involve the tanker in serious difficulty as all the member states of the Arab League prohibit the export of any materials through their ports to Israel, and the purpose of the Certificates is to prove that the cargo was not discharged in Israel.

Masters are therefore advised to ensure that their Agents at each discharging port understand this and return the Certificates at the earliest possible moment.

The following is a copy of a letter to a ship's Agent from the Chief of Ras Al-Khafji Port. Dated September 1980.

We would like to advise you that effective 1st of Dhul-qadah, 1400 (September 10, 1980) in case you need a Port Clearance for any vessel under your agency please ensure that ship's Crew List consists of name, nationality, date of birth, place of birth, Passport/Seaman Book Number and rank. In the absence of this information we are unable to provide you with Departure Port Clearance and you will be held responsible for ship departure delays.

EARLY DEPARTURE DOCUMENTATION: This documentation system aims to assist ships to depart early from this port after they complete loading by saving time awaiting documents. For this reason, relevant tanker documents will be signed previously by ship's Master or signed by their Agents at this port, depending on Master's choice on the request sheet. Completed tanker documents, therefore, will not be despatched to ships after completion of loading.

It must be noted that this system is not compulsory at this port, but it is at Master's option on condition that ships can communicate on Harbour Service VHF Radio to receive shore figures any time before departure.

READINESS: The Master of each arriving tanker should present a Notice of Readiness to the Company's Mooring Master who will sign it on behalf of the Company. The Notice of Readiness should be tendered at the time of the tanker's arrival at the anchorage area, which is understood to be either the time of dropping the anchor in the anchorage, or if the tanker does not anchor, the time when the Mooring Masters board the vessel.

PILOTAGE: Pilotage is compulsory for arriving tanker's berthing and unberthing at Ras Al-Khafji and a Company's Mooring Masters will board the tanker at the anchorage area to take her to her assigned berth. The company shall assign 2 Mooring Masters for operation on the tanker for shipment. One is as Main and another is as Sub-Mooring Master. The Company's Mooring Master who is assigned on duty shall advise the tanker's Master on the manoeuvre and operations relating to berthing, unberthing, bunkering connecting and disconnecting the loading hoses, and communication between the tanker and Central Control Room (CCR) on shore. Necessary documents such as Ship's Statement of Cargo, Dry/Slop Certificates, Load-on-Top Certificate and Statement of Facts shall be signed by the Mooring Masters on behalf of the Company. After berthing, the Mooring Masters will remain onboard the tanker until she is unberthed and the cargo documents are completed.

Two separate cabins and food as per status to be provided to Mooring Masters during their stay on board.

Notwithstanding the presence of the Company's Mooring Masters onboard, the Master of the tanker remains responsible for his tanker at all times and in all respects.

In the event of any emergency, however, the necessary steps should be taken with the assistance of the Mooring Masters.

The Master of each tanker shall give the Mooring Masters all information necessary for the safe handling and the safe operation of the tanker while in the berth.

The Mooring Master will require the following information immediately on his boarding the tanker, to be relayed to CCR and Shipping Department prior to departure from tanker anchorage.

1. Name of Tanker.
2. Call Sign.
3. Flag.
4. Telex Number.
5. Summer D.W.T. in Long Tons.
6. N.R.T.
7. Arrival Time at Anchorage.
8. Notice of Readiness tendering time.
9. Arrival Draft.
10. Sailing Draft.
11. Documentation Type.
12. Cargo required in Net Barrels.
13. Maximum Loading Rate in Gross Barrels per hour.
14. Slow down time required.
15. Average ship/shore difference in Long Tons (Vessel Experience Factor).
16. Deballasting time prior to commencement of loading.
17. Master's Family Name and Initials.

BALLAST: *Prevention of Sea Pollution by Oil:* THE DISCHARGE OF DIRTY BALLAST and/or OIL RESIDUE, BILGE and WASTE OIL by any vessel in the GULF area is STRICTLY PROHIBITED. The Company strongly requests all vessels to observe this rule of sea pollution prevention by oil in conformity with the Saudi Arabian Government's policy objectives as well as their Ports, Harbours and Lighthouses Regulations along with the relevant rules, which are substantially as follows:

In the event of oil pollution of the sea by any vessel, Masters are liable to possible imprisonment and fine, in addition to the refundment of all clean-up costs and damages sustained by any party. Should Masters fail to comply, they may be detained by the Authorities. Shipping Agents will be required to warrant Master's compliance.

Since the terminal has no facilities to receive dirty ballast, oil tankers arriving with dirty ballast will be requested to collect dirty ballast into one tank of the tanker, otherwise load crude oil on top of oil residue.

Recommended Ballast Condition on Arrival: All tankers arriving at this port are required to have sufficient ballast to give a safe draft for manoeuvring in the port. Tankers arriving with insufficient ballast may be required to increase it if the Mooring Master considers it necessary to do so. In good weather conditions, the Mooring Master will permit arriving tankers to start deballasting as they approach the berth in order to save time.

BOARDING: For the benefit of people boarding at the anchorage area, vessels should provide a safe means of access on the lee side.

All vessels are required to provide a safe means of access for personnel boarding and leaving the vessel, and should have their accommodation ladder rigged on the port side. In the case of tankers assigned to Berth No. 3 or No. 4 an accommodation ladder which leads down forwards is liable to be blocked by the floating hoses, and in such a case the accommodation ladder should be rigged on the starboard side. An accommodation ladder leading aft is always suitable on the port side. Accommodation ladder should always be kept 5.0 m. above water and ready to be lowered whenever required. Pilot ladder is not required.

ANCHORAGE: *Ocean Tankers Anchorage Area:* The oil tankers anchorage area is designated within 1 mile radius from:

Lat. 28° 29.5' N., Long. 48° 39.0' E.

Two Light Buoys (No. 9 and No. 10) mark the Western limit and Southern limit of this area respectively. The depth of water varies from 70 ft. (21.34 m.) to 77 ft. (23.47 m.) with a good holding ground of clay mud. Oil tankers awaiting berthing should anchor as close as possible to these buoys.

Dry-Cargo Ships Anchorage Area: The anchorage area for dry-cargo ships is located about 5.5 miles to the S.W. of the oil tanker anchorage area, and is centred in position: Lat. 28° 26.8' N., Long. 48° 33.4' E. at which position a yellow Light Buoy (No. 14) showing a flashing yellow light every 3 seconds has been laid. Dry cargo ships should anchor within 0.5 mile radius of this buoy, where the depths are between 36 ft. (10.97 m.) to 50 ft. (15.24 m.) in a good holding ground of clay mud.

Prohibited Area from Navigation, Anchoring and Fishing: An area bounded by straight lines joining the following points is prohibited from anchoring and fishing.

The areas bounded by straight lines joining the following points are prohibited for anchoring and fishing, due to the presence of Wellheads, Flow Stations, Gathering Station, etc. and numerous pipelines and power transmission cables on the sea bed.

Additionally, the oil field areas A – C are prohibited from navigation of any oil tankers and vessels or crafts except these operating on direct instructions from the Company.

A. Khafji Oil Field area:

	Latitude	Longitude
(a)	28° 29' 36" N.	48° 52' 45" E.
(b)	28° 32' 00" N.	48° 54' 00" E.
(c)	28° 35' 00" N.	49° 00' 00" E.
(d)	28° 32' 00" N.	49° 04' 00" E.
(e)	28° 29' 00" N.	49° 04' 00" E.
(f)	28° 24' 00" N.	48° 52' 00" E.
(g)	28° 26' 10" N.	48° 52' 00" E.

B. Hout Oil Field and Dorra Gas Field area:

	Latitude	Longitude
(a)	28° 40' 30" N.	48° 54' 30" E.
(b)	28° 52' 30" N.	48° 59' 30" E.
(c)	29° 00' 15" N.	49° 07' 00" E.
(d)	28° 59' 45" N.	49° 13' 00" E.
(e)	28° 53' 00" N.	49° 08' 30" E.
(f)	28° 51' 00" N.	49° 04' 00" E.
(g)	28° 39' 00" N.	48° 59' 30" E.

However, the following area is exempted from prohibition of navigation.

(h)	28° 52' 30" N.	48° 59' 30" E.
(i)	28° 54' 30" N.	49° 01' 15" E.
(j)	28° 53' 00" N.	49° 08' 30" E.
(k)	28° 51' 30" N.	49° 05' 00" E.

C. Lulu Oil Field area:

The prohibited area from navigation is bounded within 1 nautical mile radius from the following locations.

	Latitude	Longitude
Well No. 1	28° 46' 35" N.	49° 28' 36" E.
Well No. 2	28° 38' 51" N.	49° 24' 39" E.

D. Area between Khafji Oil Field and Onshore Base:

	Latitude	Longitude
(1)	28° 24' 48" N.	48° 31' 57" E.
(2)	28° 25' 33" N.	48° 32' 55" E.
(3)	28° 29' 00" N.	48° 38' 00" E.
(4)	28° 27' 15" N.	48° 40' 00" E.
(5)	28° 29' 39" N.	48° 52' 45" E.
(6)	28° 26' 10" N.	48° 52' 00" E.
(7)	28° 22' 55" N.	48° 34' 00" E.
(8)	28° 23' 25" N.	48° 31' 50" E.

E. Area between Hout Oil Field and Khafji Oil Field:

	Latitude	Longitude
(9)	28° 32' 50" N.	48° 55' 30" E.
(10)	28° 39' 40" N.	48° 57' 00" E.
(11)	28° 39' 20" N.	48° 58' 10" E.
(12)	28° 33' 30" N.	48° 56' 50" E.

RESTRICTIONS: *Port Closure:* When the visibility is effected or when the weather and sea conditions develop worse than the below mentioned permissible criteria at the port, mooring operations normally become extremely difficult and unsafe. Therefore, in such circumstances, the Company advises that the port is closed to approaching tankers by VHF, and requests the tankers to wait at the Tanker Anchorage Area until the port is reopened.

The Company, however, reserves the right of selective berthing of some tankers with better manoeuvrability even during such period.

Permissible Criteria for all Berths:

Wind Velocity: Up to 20-25 knots depending on direction.

Sea Conditions: Up to 5 ft.

Visibility: Less than 1 mile.

MAX. SIZE:

Berth	*Depth of water at ISLW* (ft.)	*Max. Permitted draft* (ft.)	*Designed tanker size* (d.w.t.)
No. 1	53	47	100,000
No. 2	56	50	100,000
No. 3	62-64**	54*	300,000
No. 4	70-73††	64‡	300,000

*56 ft. permissible using rise of tide.

‡66 ft. permissible using rise of tide.

**59 ft. over the piplines.

††69.5 ft. over the piplines.

HEALTH: *Quarantine and Pratique:* Quarantine Office of the Saudi Arabian Government is maintained at the port, and a Quarantine Doctor or a Quarantine Officer may board the vessel, if he considers it necessary.

The Master is requested to submit the following documents for the Government filing through his Agent:

(a) Crew List
(b) Vaccination List } 3 copies each
(c) Passenger List (if any)

All arriving vessels should despatch the following cable to Quarantine Office at the port 48 hours before their arrival at Ras Al-Khafji Port:

"QUARANTINE KHAFJI (ship's Agent cable address)
vessel's name ETA RAS AL-KHAFJI time and date
FLAG LAST PORT DESTINATION
NO. OF CREW NO. OF PASSENGERS
ALL HEALTHY NO SICKNESS NO DEATH VALID CERTIFICATE
REQUEST FREE PRATIQUE.
MASTER "

Quarantine fee is collected from vessel according to her Nett Registered Tonnage other than tankers lifting hydrocarbon cargoes.

RADIO: *Notice of Arrival:* Arriving vessels should advise their ETA Khafji at least 72 hours before their arrival, (1) by telex to Terminal & Shipping, the Company's Field Office (841011 AAB, 841011 Arboil SJ) or (2) by telegram through Kuwait Radio Station (call sign: 9KK) via Singapore, Bombay or Bahrain Radio. Confirmation of ETA should be made well in advance before arrival by calling "Ras Al-Khafji Terminal" on Channel 16 VHF. Shorter notices may result in delays, and failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against the Company. "Ras Al-Khafji Terminal" VHF station works 24 hours every day.

Radio Communications: All radio communications between the Company at Al-Khafji and the vessel are made directly to the Company's Field Office by Telex or Telegram, through the Kuwait Radio Station (9KK).

All Telexes and cables should be addressed to 841011 (AAB 841011 Arboil SJ) for telex or ARABIAOIL KUWAIT for cable. The first message should be sent according to the following form, but any items which are the same as a recent previous voyage to this port may be omitted.

(1) ETA Ras Al-Khafji.
(2) Last port.
(3) Deballasting time.
(4) Quantity and type of cargo and bunker required.
(5) Prefered order of loading when batch loading required.
(6) Maximum loading rate.
(7) Mooring equipment (Bow Chain Stopper or Bollard).
(8) Diameter of cargo and bunker connections.
(9) Distance from manifold to ship's side.
(10) Derrick capacity.
(11) Estimated sailing drafts – fore and aft.
(12) Port Rotation of Ras Al-Khafji.

VHF: Short-range communication can be made with Terminal Office by calling "Ras-al-Khafji Terminal" on VHF Channel 16. Working Channels are 6,14,67 and 75. Vessels should call Ras Al-Khafji Terminal several hours before arrival to confirm ETA and receive berthing instructions. After anchoring they should advise their anchoring time and then maintain watch on Channel 16 until the Mooring Masters board. Terminal VHF Station works 24 hours every day.

RADAR No services available.

TUGS: Tugs up to 4,200 b.h.p. are available for mooring and unmooring purposes.

Mooring boats are used for handling ropes and hoses.

BERTHING:

Berths No. 1 and No. 2:

(a) Sea-Berth No. 1:

Manifold position:	Lat. 28° 26' 10" N., Long. 48° 34' 57" E.
Depth of water:	53 ft. (16.2 m.) at ISLW.
Permitted draft:	47 ft. (14.3 m.) max.
Type of berth:	The berth is a conventional 4-buoy system where the tanker moors with 2 anchors and 1 buoy forward and to 3 buoys aft.
Length of berth:	The berth is designed for tankers of 800 ft. (244 m.) length but can be used by tankers of any size, although tankers of less than 650 ft. (198 m.) overall length sometimes experience difficulty in mooring if their lines are less than a full 720 ft. (220 m.).
Hoses:	From the manifold 2×10 in. rubber hoses for crude oil and 1×12 in. rubber hose for fuel oil are connected, approximately 270 ft. (82 m.) long and the maximum lifting weight of the 2 crude oil hoses together is 4.5 tons – 5.0 tons. For bunkering purpose one section of 6 in. hose is attached to the end of the 12 in. fuel oil hose.

(b) Sea-Berth No. 2:

Manifold position:	Lat. 28° 25' 55" N., Long. 48° 35' 28" E.
Depth of water:	56 ft. (17.1 m.) at ISLW.
Permitted draft:	50 ft. (15.2 m.) max.
Type of berth:	Same as Berth No. 1.
Length of berth:	Same as Berth No. 1.
Hoses:	From the manifold 2×10 in. rubber hoses for crude oil and 1×6 in. rubber hose for bunker are connected to the ship's manifold. All these hoses are approximately 360 ft. (110 m.) in length, and the maximum lifting weight of 2 crude oil hoses (2 lengths) together is about 5.0 ton and that of bunker hose is about 3.0 tons.

(c) Loading Rates:

Crude oil loading rate at Berths No. 1 and No. 2 is 30,000 bbls./hr. or 4,000 tons/hr.

Fuel oil loading rate at Berth No. 1 is 5,300 bbls./hr. or 800 tons/hr., and at Berth No. 2 is 2,700 bbls./hr. or 400 tons/hr.

(d) Preparation on Board before Berthing: Tankers assigned to Berth No. 1 or No. 2 should have the following ready:

(i) Both Anchors.

(ii) 3 ropes forward and 9 ropes aft. Minimum circumference 10 in., length 720 ft.
Some wires are acceptable in place of the equivalent number of ropes.
Neither ropes nor wires are available from the buoys.
All ropes and wires should be in good condition and preferably without splices.

(iii) Port derrick rigged for a minimum lift of 5 tons, using a wire runner and hook.

(iv) Two 10 in. ANSI 150 hose connections for crude oil, and 1×12 in. ANSI 150 at Berth No. 1 and 1×6 in. ANSI 150 at Berth No. 2 for fuel oil cargo, at the ship's port side manifold. If reducers are not available, the company should be advised before arrival.

(e) Mooring and Unmooring: Mooring operations at Berths No. 1 and 2 are restricted to daylight hours only to prevent accidents.

On approaching the berth a ship's line is passed to one tugboat from the centre fairlead aft. This hawser should be of good strength and made well fast on board.

When in position off the berth, the starboard anchor is let go and slacked away easily to about 9 or 10 shackles on deck. The port anchor is then let go and paid out easily as the tanker swings round into the berth using the tugs and engines as required. At the same time, the starboard anchor is hove in to about 6 or 7 shackles on deck and then made ready for slacking away again.

As the tanker backs down the berth the anchors are slacked away as necessary, and the ropes are sent to the forward (No. 4) Buoy. When the stern passes close to the starboard quarter (No. 1) Buoy the ropes are sent away to this buoy, hove in tight and then put on the bitts ready for slacking if necessary.

Ropes are then run to the port quarter (No. 3) Buoy, hove tight, and the lateral position in the berth adjusted between the port and starboard quarter buoys.

Lastly, ropes are run to the stern (No. 2) Buoy and the tug line also passes to this buoy. The fore-and-aft position is then adjusted between the anchors and the sternlines. A second tug is used to assist in the lateral positioning of the tanker, and 2 mooring boats are used for running the lines to the buoys, these normally taking 3 ropes at a time.

When properly positioned in the berth, the distance from the ship's side to the manifold marker buoy should be about 50 ft. – 66 ft. (15 m.-20 m.).

One tug is on stand-by near berths as long as a tanker remains moored in berth.

When hose disconnection is completed, the tanker unmoors usually by letting go all the lines on Buoys No. 3 and No. 4, followed by those on Buoy No. 2 and lastly those on Buoy No. 1. The tanker then heaves both anchors as necessary until they are up and clear, and the tanker can leave the berth. The tugs are used as required to keep the tanker away from the manifold marker and the mooring buoys.

Mooring Masters may vary this procedure according to the prevailing weather.

(f) Hose Connection and Disconnection: After the completion of mooring, the mooring boat will pull the hose float buoys to the tanker, and connect them to the tanker's cargo hook of port derrick. The 2 crude oil hoses are lifted together from the seabed by the tanker's derrick, and connected directly to the manifold.

The fuel oil hose is lifted separately and connected in similar manner.

Derrick/Crane hook should be open type, suitable to slip through the ring of the float buoy. The inner diameter of ring is 8 in. Whenever derrick/crane hook is directly connected to lifting block, or when hook is of locking type, additional wire sling, length 6 ft., and open type hook of suitable S.W.L. is required to be provided by tanker.

The time taken for hose connection is about 1.0 – 1.5 hours depending on the number of hoses to be connected. Hose disconnection takes about 1 hour.

Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc. will be provided by the Company.

(g) Loading Restriction at Berth Nos. 1 and 2: (1) Due to only one crude oil pipeline being between the ex-loading Dock and the shore, it is not possible to load tankers with crude in Berths No. 1 and 2 simultaneously. (2) Due to refined products pipelines arrangement onshore, it is not possible to load tankers with fuel oil, bunker oil or crude comingled with refined products in Berths No. 1 and No. 2 simultaneously and also such loading in Berths No. 1 or No. 2 is not possible while those are being loaded in Berths No. 3 or No. 4.

Berth Nos. 3 and 4:

(a) Berth No. 3:

Position of buoy: Lat. 28° 27' 06" N., Long. 48° 36' 28" E.

Depth of water: 62 ft. – 64 ft. (18.9 m. – 19.5 m.), but 59 ft. (18.0 m.) over the pipelines, at ISLW.

Permitted draft: Normally 54 ft. (16.5 m.), but 56 ft. (17.1 m.) permissible using rise of tide.

Type of berth: The berth is designed for a type of tanker of 300,000 tons d.w.t. and has a single-buoy-mooring system consisting of a buoy 36 ft. (11.0 m.) in diameter, moored to 6 pendant legs of 3.75 in. (95 mm.) rod diameter extra high strength chain of 720 ft. (220 m.) long, and having a rotating deck carrying the pipeline and mooring connections.

Mooring: Mooring connection at SBM consists of 2.75 in. (70 mm.) rod diameter stud link chain extra high strength of 25 ft. (7.6 m.) long and breaking strength of 225 tons. Attached to the mooring connections on the buoy are 2 double 15 in. nylon ropes (120 mm. diameter, breaking strain 250 tons/line), these main ropes supported by floats are 160 ft. (49 m.) long, and have at their free end a 35 ft. (10.7 m.) long stud link chain which includes a "Sister-plate" and a "Slender-link" for connection directly to the tanker's bow chain stopper or for receiving the shackles used on the deck of the tanker. From the outer end of this chain there is connected a 10 in. (80 mm. dia.), polypropylene "Pick-up" rope about 165 ft. (50 m.) in length. The chain is hung by large iron buoys coloured red and green in the case of a tanker not equipped with the above chain stopper or a 12 in. nylon "Bollard rope" (97 mm. dia., breaking strain 150 tons/line) about 150 ft. (46 m.) in length is connected between each "Sister-plate" and ship's bollard while tankers moor in berth.

Above bollard ropes and shackles are provided by the Company.

Submarine Pipeline and Hoses: 1×36 in. crude oil line and 2×12 in. fuel oil lines are laid approximately 30,000 ft. (9,140 m.) from the shore to a position, of the underwater manifold close under the buoy through the Valve Platform which is located at about 4,000 ft. (1,220 m.) Westward of the buoy. From the underwater manifold the crude oil goes to the buoy through 1×20 in. submarine hose; the fuel oil lines are joined at the underwater manifold and the fuel oil is led to the buoy through 1×10 in. submarine hose. From the deck of the buoy the 20 in. crude oil hose and the 10 in. fuel oil hose, which are floating, have a length of 720 ft. (220 m.) to a hose raft, at which position the crude oil hose is divided into 3 strings of 12 in. floating hoses. These, together with the fuel oil hose, extend for a further 150 ft. (46 m.) making a total length of 876 ft. (267 m.) including the raft of 6 ft. (2.0 m.). At their free end the hoses are connected to 4 large marker buoys each 3.3 ft. in diameter. The maximum weight of one crude oil hose (2 lengths) with hose float buoy and chain is about 6.5 tons, and that of bunker hose is about 3 tons.

(b) Berth No. 4:

Position of buoy: Lat. 28° 27' 54" N., Long. 48° 38' 36" E.

Depth of water: 70 ft. – 73 ft. (21.3 m. – 22.3 m.), but 69.5 ft. (21.2 m.) above the pipelines, at ISLW.

Permitted draft: Normally 64 ft. (19.5 m.), but 66 ft. (20.1 m.) is permissible using rising of tide.

Type of berth: The berth is designed for a type of tanker of 300,000 Long ton d.w.t. and has a single-buoy-mooring system consisting of a buoy 33 ft. (10.0 m.) in diameter, moored to 6 pendant legs of 3.75 in. extra high strength chain of 855 ft. (261 m.) long, and having a rotating deck carrying the pipeline and mooring connections.

Mooring: The particulars of mooring are exactly the same as those of Berth No. 3.

Submarine Pipelines and Hoses: 1×36 in. crude oil line and 2×12 in. fuel oil lines from onshore are branched at the Valve Platform, which is located at about 16,000 ft. (5,060 m.) Westward of the buoy, by 1×48 in. crude line and 1×16 in. fuel line to Berth No. 4. There is also 1×30 in. connecting crude line between the Ex-Loading Dock and the Valve Platform to raise up the loading rate at Berth No. 4. The above 1×48 in. crude line and 1×16 in. fuel line are laid from the Valve Platform to a position of underwater manifold close under the buoy. From there the crude oil goes to the buoy through 1×24 in. submarine hose, the fuel oil is led to the buoy through 1×10 in. submarine hose. From the deck of the buoy the 24 in. crude oil hose and the 10 in. fuel oil hose, which are floating hoses, have a length of 810 ft. (247 m.) to a hose raft, at which position the 24 in. hose is divided into 3 strings of 14 in. floating hoses. These, together with the 10 in. fuel oil hose, extend for a further 150 ft. (46.6 m.) including the raft of 6 ft. (2.0 m.). At their free end, these hoses are connected to 4 large marker buoys each 3.3 ft. in diameter. The maximum lifting weight of one crude oil hose (2 lengths) with hose float buoy and chain is about 7.5 tons, and that of bunker hose is about 3.0 tons.

(c) Loading Rates at Berths No. 3 and 4: The maximum loading rates of crude and fuel oil at Berth No. 3 are 45,000 bbls./p.h. (6,200 t.p.h.) and 2,700 bbls./p.h. (400 t.p.h.) respectively. At Berth No. 4 these are 62,000 bbls./p.h. (8,500 t.p.h.) and 3,400 bbls./p.h. (500 t.p.h.).

(d) Preparation Onboard before Berthing at Berths No. 3 and No. 4: The Company strongly recommends to the owners of tankers that the tankers to be assigned to Berth No. 3 or Berth No 4, shall be fitted with Bow Chain Stoppers recommended by OCIMF, or alternatively equipped with a pair of Smit Type Brackets in a correct position, which can be accepted in place of the Bow Chain Stoppers so far as tanker has the Chafe Chains to be connected between her Smit Type Bracket and a Sister Plate of our mooring lines.

Before arriving at the anchorage, tankers assigned to Berth No. 3 or No. 4 should have ready the following:

(i) Two mooring hawsers as messenger ropes forward, together with 2×20 ft. rope stoppers, and also 1 or 2 crowbars.

(ii) Port derrick rigged for 10 tons, swung out 2.0 m. beyond the ship's side.

(iii) 3×12 in. ANSI 150 at Berth No. 3 or 3×14 in. ANSI 150 at Berth No. 4 hose connections for crude oil, and 1×10 in. ANSI 150 for fuel oil at the port side manifold. If above reducers are not available, the Company should be advised before arrival.

(e) Mooring at Berths No. 3 and No. 4: The Mooring Masters will board from a tugboat which carries the mooring and hose connection materials. Tankers should have their crew stand-by to receive these materials, and should maintain a port lee until this is completed.

The Mooring Master will instruct the crew in the setting up of the forward moorings, where 12 in. bollard ropes are made fast round the port and starboard bollard posts with their attached shackles about 12 ft. (3.7 m.) inboard from the panama leads or fairleads as far forward as possible. The size of the Panama leads or the fairlead opening should be at least 14 in. vertical and horizontal to prevent the chain jamming in the Panama leads or the fairlead.

On approaching the berth, the tanker should lower a mooring hawser as messenger rope from each bow with rope stopper attached. The mooring boat will take any rope first, and connect it to the appropriate "Pick-up" rope which should be hove in while the boat returns to take the other rope for connection to its "Pick-up" rope. These 2 ropes are then hove in until the chains come through the Panama leads or the fairleads, and the shackles can be made fast to the "Sister-plates". The "Pick-up" ropes are then slacked back until the bollard ropes have the weight.

On tankers fitted with Bow Chain Stoppers, the pick-up ropes are hove in until the chains come through the Panama leads or fairleads and then through the Bow Chain Stoppers. The tongues or hinge bars of Bow Chain Stoppers are then set in position to secure chain within Bow Chain Stoppers. The Pick-up ropes are then slacked back until Bow Chain Stoppers have the weight. Mooring is then completed, and the usual time from sending away the first line until all fast is about 30 minutes.

Immediately after the tanker moors to SBM, her stern line shall be given to the stand-by tugboat through her middle fairlead to help maintain the tanker in safe position while the tanker is in the berth. For this purpose, a hawser of 12 in. circumference, and 720 ft. length is required.

(f) Unmooring from Berths No. 3 and No. 4: After hose disconnection is completed, the weight is taken on the "Pick-up" ropes, the stoppers of the Bow Chain Stoppers and unlocked or the bollard ropes are unshackled, and as the tanker backs off the berth the "Pick-up" ropes are slacked off and then dropped into the water. The tug will come alongside either before or after the tanker backs off the berth, whichever is convenient, and the bollard ropes and the two big shackles are passed to the tug. Unmooring time is usually 10 minutes.

(g) Hose Connection and Disconnection at Berths No. 3 and No. 4: After the completion of mooring, the mooring boat which has been holding the hoses clear during berthing, will bring the hoses to the port side of the tanker and connect the pontoon rope to the hose raft and then proceed to the manifold to connect the hook to one buoy having 1 hose, which is lifted aboard and connected directly to the tanker's manifold.

Derrick/Crane hook should be open type suitable to slip through the ring of the float buoy. The inner diameter of ring is 8 in. Whenever derrick/crane hook is directly connected to lifting blocking, or when hook is of locking type, additional wire sling, length 6 ft., and open type hook of suitable S.W.L. is required to be provided by the tanker.

The hoses are hung off on 2.625 in. diameter nylon ropes and lashed to the rail to prevent shock load due to wave action being transmitted to the manifold flanges.

After the first hose has been connected, the second buoy is lifted and the remaining hoses are connected in similar manner. If an arriving tanker requires a loading rate of 36,000 bbls./hr. (5,000 t.p.h.) or less at Berth No. 3, and 44,000 bbls./hr. (6,000 t.p.h.) or less at Berth No. 4, only 2 crude oil hoses are connected. Hose connection usually takes 2 – 3 hours. Hose disconnection is done in a reverse manner to connection, and takes about 1.5 – 2.0 hours. Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc., will be provided by the Company.

(h) Loading Restriction at Berths No. 3 and No. 4: (1) Due to only one crude pipeline being between Valve Platform and shore, it is not possible to load tankers in Berths No. 3 and No. 4 simultaneously.

(2) Due to refined products pipeline arrangement onshore, it is not possible to load tankers with fuel oil, bunker oil or crude commingled with refined products in Berths No. 3 and 4 simultaneously, and also such loading in Berths No. 3 or 4 is not possible while those are being loaded in Berths No. 1 or 2.

LOADING: *Dry Inspection:* Upon completion of deballasting the Mooring Master will inspect the tanker's tanks. If the tanks are not satisfactory, he may require further pumping until they reach the required standard.

Loading Operations: Particulars of oil available for loading is as follows:

Grade	Estimated	Estimated	Temp. °F
	API	Summer	Winter
Khafji Crude	27 - 29	100	70
Khafji Blend	27 - 29	110	80
Khafji Special	27 - 29	110	80
Hout Crude	32 - 34	110	80
Hout Blend	32 - 34	110	80
Hout Special	32 - 34	110	80
Fuel	16 - 18	140	120
Naphtha	63 - 65	80	60

All submarine pipelines, submarine hoses and floating hoses meant for loading crude oil are at all times kept filled and pressurised with "Khafji Crude" oil. Pipeline contents of such "Khafji Crude" oil at each berth are as follows:

Berth 1 : 16,000 Gross Barrels.
Berth 2 : 16,000 Gross Barrels.
Berth 3 : 36,000 Gross Barrels.
Berth 4 : 68,000 Gross Barrels.

Whenever a tanker is to load any other grade, which does not have "Khafji Crude" oil, the tanker has to receive"Khafji Crude" oil pipeline contents according to berth, prior to commencement of any other grade which dose not have "Khafji Crude" oil.

Similarly, if the tanker is loading any grade other than "Khafji Crude" oil, the tanker has to receive final quantity of that grade equivalent to pipeline contents according to berth, as at that stage, "Khafji Crude" oil will be pumped into pipelines to keep all submarine pipelines, submarine hoses and floating hoses full of "Khafji Crude" oil by the time tanker receives final quantity.

The Mooring Masters on board will advise and guide tanker Master about procedure of such loading.

Fuel as cargo is loaded through bunker hose.

Pure Naphtha is not loaded.

When the tanker is ready in all respects for loading, the tanker's officer must inform the Mooring Master, who will transmit the necessary orders to the Central Control Room onshore.

Loading is started by one booster pump, at the rate of 10,000 bbls./hr., and after everything has been checked and found satisfactory on board, then the loading rate will be gradually increased by starting further booster pumps and then main pumps in sequence until the required loading rate is reached; provided always that the required loading rate is within the capacity of the pumps.

Loading rates can be varied at any time during loading upon 5 – 10 minutes advance notice to the Mooring Master on board. In case of EMERGENCY, the IMMEDIATE STOPPING of all loading can be accomplished.

During loading, any valve operation on the tanker should be reported to the Mooring Master in advance. Especially at the time of Topping Off, the tanker's officer on duty should request the Mooring Master to reduce loading rate prior to any valve closing, in order to avoid any pressure on rubber loading hoses.

When loading is completed, the rate is gradually reduced by stopping first the main pumps and then the booster pumps, one by one according to the request of the tanker's officer. At the final stage of loading only one booster pump should be on the line, and the tanker's officer should tell the Mooring Master to "Stand-by" at least 5 – 10 minutes before finishing loading.

Shore pumps will stop about 15 seconds after their control buttons are pressed, but the oil will continue to flow for several minutes.

Any stop notice of loading completion must be given by the tanker's officer as "Shore-stop" is NOT practised at this port.

Overflows and Spillage: In the event of an overflow or spillage during loading, loading will be stopped immediately and will remain stopped unless the Mooring Master is satisfied that all the overflowed oil has been cleared off the deck and there is no longer any unusual danger for resuming loading.

Ullaging and Gauging: After loading is completed, the Mooring Master will witness the final ullaging on board so that the tanker's figures can be calculated.

Onshore the Government and the Company gaugers will take manual gauges of the shore tanks before and after loading to calculate the figures of the Bill of Lading. Final API and Bill of Lading quantities will be communicated to the tanker Master by the Company through the Mooring Master prior to tanker's departure from port.

STEVEDORES: Dry-cargo vessels calling Ras Al-Khafji to give at least 72 hours notice to Agents to arrange labourers. Stevedores will be arranged from Kuwait. Ship's gear used for discharging which takes place at anchorage into barges.

MEDICAL: The Company has its hospitals at Ras Al-Khafji. Medical and dental treatment can be given in cases of emergency or serious illness or injury. Epidemic diseases or cases of serious injury or disease requiring operations, etc. are normally transferred to the hospitals in Dammam or in Kuwait. The Company's doctor will not normally attend on board unless the patient is incapable of attending the hospital. Requests for medical attention should be given to the ship's Agent as early as possible before arrival.

FRESH WATER: Not available except in cases of extreme emergency.

FUEL: *General Information:* Intermediate fuel oil (IFO) and marine diesel oil (MDO) are supplied as bunker oil to tankers calling at Ras Al-Khafji. Each loading berth has a pipeline which can deliver intermediate fuel oil. Marine diesel oil is supplied from a barge with a capacity of 200 tonnes for which no extra charge is made.

Bunker Nomination: Owners, Operators or Charterers should nominate their tankers' bunker requirements to the Company's Head Office in Tokyo.

Tankers are requested to confirm the grade and quantity of bunkers required to Terminal and Shipping, The Company's Field Office (841011, AAB 841011 Arboil SJ) by telex or telegram to "ARABIAOIL KUWAIT" via "9KK" through normal radio services at least 72 hours before arrival; or in cases where tankers receive their bunker instructions less than 72 hours away, they should advise their bunker requirements as soon as possible.

Bunkering Operation: Bunker supply to tankers in the berths is normally made while the tankers are discharging ballast and/or loading crude oil. MDO-supply from a barge will be done usually before loading cargo.

Tanker engineers are requested to give all necessary information and assistance to the shore staff attending the bunkering and to pay constant attention to the bunker supply.

Responsibility: Notwithstanding the presence of the shore staff attending the bunkering operation on board, the Master of the tanker remains solely responsible for his tanker at all times and in all respects.

Size of Bunker Connections and Bunkering Rates:

Berth	*IFO*	*MDO (supply from a barge)*
No. 1 (6 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 1 (12 in.)	800/300 t.p.h.	80 t.p.h. (4 in.)
No. 2 (6 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 3 (10 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 4 (10 in.)	500/300 t.p.h.	80 t.p.h. (4 in.)

Note: In Winter time the rate for IFO decreases due to the low sea-water temperature which increases the viscosity of the oil.

Bunkering for Dry-Cargo Ships: Bunker supply to dry-cargo ships is not available at this port.

CONSULS: None.

CUSTOMS: *Customs Formalities:* Upon arrival, the Master is required to submit to the Customs a Manifest of any cargo to be landed at Ras Al-Khafji and to sign a declaration that no intoxicating liquor or drugs will be landed.

A Coast Guard accompanied by the ship's Agent boards to seal bonded stores. Dry-cargo ships are boarded by a Customs Officer, a Coast Guard and a Quarantine Officer for sealing stores, checking valid certificates and health inspections.

Import of the following articles is strictly forbidden:

(a) Alcoholic beverages, including beer, wine and liquor.
(b) Pornographic literature, photographs, pictures and films.
(c) Explosives.
(d) Firearms or implements of war of any kind.
(e) Religious matters not pertaining to the Moslem faith.
(f) Gambling devices.

The Saudi Arabian Laws and Regulations: The Saudi Arabian Laws and Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their Agent. While in port, whether at anchorage or in the berth, the vessel's personnel are under the jurisdiction of Saudi Arabian laws. Taking of photographs while the ship is in the Port of Ras Al-Khafji is prohibited by the Saudi Arabian Government.

All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs authorities. The import of certain articles is strictly prohibited and such articles include but are not limited to the following:

(1) Explosives and firearms, including air rifles.
(2) Implements of war of any kind, including antique weapons.
(3) Narcotics.
(4) Religious matter not pertaining to the Moslem Faith.
(5) Playing cards and gambling devices.
(6) Printed photographic matter or video tape depicting what could be considered pornographic.
(7) Alcoholic beverages of any description.

Items (4), (5), (6), and (7) of the above items on board any vessel calling at the port of Ras Al-Khafji shall be secured in appropriate locked store rooms which will be sealed by the authorities who may carry out inspections, to ensure that the seal is intact and that none of the above articles are in use. The seal must remain intact during the entire period of the vessel's stay in the port of Ras Al-Khafji, and must not be broken until after the vessel has finally departed for the port in another country.

Trafficking in any of the above articles between vessel or vessel's crew and shore personnel is strictly prohibited. The baggage of crew joining and leaving vessels will be inspected to ensure that it contains none of the prohibited articles.

Penalties are severe and major delays to vessels can be incurred due to the Goverment investigations of violations.

REPAIRS: Some minor repairs on board vessels may be made using shore assistance in case of extreme emergency, but such Company's assistance will be provided only on the Master's and the shipping Agent's acceptance for undertaking to pay to the Company all expenses incurred. Preferably all repairs should be carried out at the anchorage area. In all cases when shore assistance is required, the Master should notify the vessel's Agent well in advance.

DRY DOCKS: None.

WATCHMEN: The tanker always has to post at least 2 watchmen on duty: one on the forecastle head to watch and monitor the condition of the mooring ropes and the behaviour of the tanker by forces of wind and tidal current, and another on deck near or within sight of the manifold. They have to report to the Master and the Mooring Master whenever they observe the tanker drifting too close to the berth, or the loading hoses twisted or whenever they recognise anything unusual, so that the Master and the Mooring Master may properly manoeuvre the tanker and any mishap may be averted.

AIRPORT: Crew joining must be routed through Dhahran Airport (325 km.). Kuwait Airport 110 km.

TIME: GMT plus 3 hours throughout year.

TELEPHONES: No facilities for placing on board.

SERVICES: *Provisions, Deck Stores:* Provisions and deck stores are available from ship chandlers at the Port in limited kinds and quantities. In all cases the ship's Agent should be advised of the requests at the earliest possible time before arrival.

SHORE LEAVE: Not normally permitted by Authorities except by arrangement through the ship's Agent.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Saudi Riyal.

WEATHER: The local weather at Ras Al-Khafji is hot and dry with little cloud during the long Summer from May to September and considerably colder in December and January.

The mean monthly maximum temperature is in the range of 18° C. – 41° C., and the daily highest was 48.9° C., which was recorded in August 1987 and the daily lowest was −1.4° C. in February 1971.

Rainfall concentrates during the period from October to May and annual precipitation in the area is 104 mm. on an average.

The prevailing wind in this area is Northwesterly, however winds of varying strength may come from any direction. In Summer, the diurnal sea breeze is light Easterly at about 5 m. – 7 m. per second (10 – 14 knots), and only rarely it increases to 12 m. per second (23 knots). In Winter South-Southeasterly winds of up to 20 m. per second (39 knots) may last one or two days and then veer suddenly to the N.W., often accompanied by gusts or squalls in excess of 20 m. per second. On occasion a type of line squall passes over and winds up to as much as 30 m. per second (58 knots) may be experienced for a short time before settling down to blow for longer periods at 20 m. per second. Little or no warning of these strong squalls is given; they just appear suddenly, often accompanied by thick sand and dust.

In the area of the Sea Berths, the waves are prevented from developing by the short fetch of the Northwesterly wind, but waves up to 5 ft. – 6 ft. do occur from this direction. Southeasterly winds raise a short steep sea which quickly reaches 7 ft. – 8 ft. high. This lengthens and increases as the wind freshens and has been known to reach 14 ft. – 15 ft. in the area of the Sea Berths. When the Southeasterly wind veers the swell rapidly decreases but persists for about 24 hours thereafter.

Visibility in the area is generally good, but Northwesterly winds cause rising dust and sand which may reduce visibility to almost zero at times. Haze is common, and on calm hot days mirages are frequent. "Steam fog" may occur at times in the early morning hours resulting in very poor visibility.

TIDES/CURRENTS: The depths shown on the chart are based on ISLW. The diurnal rise of tide is approximately 5 ft. at the Springs and 4 ft. at Neaps, and the ISLW is 4 ft. below the Mean Sea Level.

The heights of both high and low water are considerably affected by the prevailing weather conditions. Northerly winds tend to reduce the heights of tides and retard them, and Southerly winds increase the heights slightly.

Near the Sea Berths the current flows roughly parallel with the shore, and reverses its direction about 1 hour earlier than the time of high or low water inshore at Ras Al-Khafji. The velocity of the current is approximately 1.5 knots at the maximum.

Both the direction and velocity of the tidal current are much affected by the prevailing weather conditions.

The tidal data for Ras Al-Khafji as compared with that of Mina Al-Ahmadi is given as follows:

Flood tide: Occurs approximately 30 minutes later than Mina Al-Ahmadi.
Height approximately 2.13 ft. less than that of Mina Al-Ahmadi.
Ebb Tide: Occurs approximately 2 minutes later than Mina Al-Ahmadi.
Height approximately 0.16 ft. less than that of Mina Al-Ahmadi.

"Tide and Current Table" published annually is available from the Company upon request.

AUTHORITY: Port of Ras Al-Khafji, Port Officer, Ras Al-Khafji 31971 Kingdom of Saudi Arabia. *Tel:* (03) 766 1016. *Telex:* 841057 PORT KSJ. *Contact:* Mr. Abdul Dalem, Port Office.

Arabian Oil Company Ltd., Terminal & Shipping Dept., P.O.Box 256, Al-Khafji 31971, Kingdom of Saudi Arabia. *Tel:* (03) 766 0555, Ext.2650. *Telex:* 841011 (ABB: 841011 ARBOIL SJ). *FAX:* (03) 766 2001. *Contact:* Mr. Abdullah I. Attwaijri, Assistant Manager, Terminal and Marine Department.

AGENT: See "Ras Tanura".

RAS AL MISHAB: 28.13 N. 48.43 E. (See Plan)

APPROACHES: Do not use the old recommended track to Bandar Mishab shown on British Admiralty Chart No. 3774 and U.S. Hydrographic Chart 62422 unless corrected. Ships arriving should follow Ras al Khafji Approach Channel Buoy No. 1 (Lat. 28° 36' N., Long. 49° 10' E.) and Buoy No. 2 (Lat. 28° 36' N., Long. 49° 00' E.). From Light Buoy No. 2 proceed on a course of 253°(T) for approximately 5 miles and the following is the new approach channel to the anchorage and entrance channel of Ras al Mishab.

The dredged channel of 4 miles is well marked by the buoys and 2 pairs of ranges that lead vessels in and out of the port.

PILOTAGE: Pilotage is compulsory and only available in daylight hours (0600 to 1700 hrs.) 7 days a week with short notice prior to vessel's arrival.

Vessels calling at Ras Al Mishab are requested to contact Ras Al Mishab Harbour Office on VHF – Channel 16 prior to arrival at Pilot Buoy, (Buoy No. 5 of Ras Al Mishab Approach Channel) which is located at Lat. 28° 13' N., Long. 48° 43' E.; do not proceed beyond this point before consulting with Ras Al Mishab Harbour Office, which is available from 0600 to 1700 hrs. every day except Friday.

ANCHORAGE: Anchorage area is between Buoys No. 4 and 5.

RESTRICTIONS: Daylight berthing and unberthing only.

MAX. SIZE: Max. allowed draft at present time is 33 ft. However, after completion of works on expansion of the port, which is under way, port expected to accommodate vessels up to 35 ft. draft regardless of length and/or tonnage.

VHF: See "Pilotage".

TUGS: The port has 2 tugboats available to assist vessels in docking and undocking as well as any other service to be rendered in case of need for assistance. Each tugboat is capable of generating 2,000 h.p.

BERTHING: Ras Al Mishab is a deep water sea port with 2,400 ft. of berthing space. The turning basin of 1,250 ft. radius provides safe manoeuvring.

The pier is 18 ft. high above the water and accordingly not suitable for Ro/Ro cargo operation, however, the harbour is well equipped for receiving any type and size of cargo including heavy lifts and bulk cement up to 24,000 tons. Silo capacity 25,000 tonnes.

The harbour is fully equipped with forklifts, discharging gear, spreaders for 20 ft. and 40 ft. containers. portable cranes up to 300 tons capacity, all handled by professional stevedores.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: Provisions not available at this port, and it is suggested that vessels calling to Ras Al Mishab, secure their needs at other ports. Only emergency medical attention shall be provided if requested by Master.

No shore leave is permitted in this port except for the Master for business purposes, the Port Regulations are to be strictly observed by all vessels.

Any other matters such as crew changes, emergency repairs provisions, etc., shall be handled through local Agent.

SHIPMASTER'S REPORT: September 1980.

Pilotage: Pilot boards 3 miles South of Buoy No. 5G.

Berthing: A new berth built 2 years ago at right angles to land with dimensions about 1,000 m. length and 250 m. wide, accommodating 8 ships, 4 on each side. 1 berth is for cement in bulk, having silo. (Sea Island berth is severely damaged and abandoned).

Stevedores: Working day and night in 3 shifts.

Clearance: Vessels are cleared any time during day whilst alongside. (We arrived alongside Thursday 1600 hrs. and we were cleared).

Tugs: 2 tugboats available.

Port facilities: 1 mobile crane 300 tons and 1 mobile crane 50 tons.

Agent: On VHF Channel 16.

AGENT: See "Dammam".

RAS TANURA: 26.39 N. 50.10 E. (See Plan)

ALSO SEE "JU'AYMAH" SECTIONS A and B.

(A) GENERAL INFORMATION
(B) REGULATIONS
(C) RAS TANURA TERMINAL

(A) GENERAL INFORMATION

This section contains important information for all ships proceeding to any Terminal in the Port of Ras Tanura (Ras Tanura Terminal, Ju'aymah Crude Terminal and Ju'aymah LPG Terminal).

NAVIGATIONAL:

NAVIGATIONAL AIDS: In May 1981, the buoyage system in the Port of Ras Tanura was changed to the I.A.L.A. System (Region A).

Notices to Mariners have been promulgated concerning these changes.

INBOUND TRAFFIC PROCEDURES: All inbound vessels shall establish early radio contact with Saudi Aramco.

(a) A vessel with no special instructions or with instructions to proceed to the Northern Holding Anchorage should make for a position approximately 2 miles North of Ras Tanura Light Float (in position: Lat. 27° 05.6' N., Long. 50° 57.5' E.); enter the inward channel of the Separation Scheme and then pass the Approach Buoy and the Entry Buoy. The vessel should then proceed into the Northern Holding Anchorage and anchor. After anchoring, the vessel shall immediately advise Saudi Aramco by radio and Ras Tanura Pilots on VHF of anchoring time and keep a listening watch on VHF Channel 16 and traffic lists for further instructions.

(b) A vessel with instructions to proceed directly to Ras Tanura Terminal, Ju'aymah Crude Terminal or Ju'aymah L.P.G. Terminal should proceed as above to the Entry Buoy and as described under the individual terminal.

ANCHORAGES: The Port of Ras Tanura is an open roadstead but some protection is afforded by shoals and land to such an extent that vessels do not experience heavy movement.

Holding ground in all of the anchorages is fair and it is recommended that anchored vessels lie to a long scope of chain whenever the weather is unfavourable.

The Northern Holding Anchorage is located on the North side of the Ras Tanura Separation Scheme West of the Entry Buoy and North of No. 3 beacon (Racon). This anchorage covers an area of approximately 30 square miles with depths between 82 ft. and 150 ft. (25 m. and 46 m.).

This anchorage is intended as an initial holding area for incoming vessels which, because of berthing prospects, congestion or other reasons will not be berthed on arrival and for loaded tankers taking bunkers or adjusting departure sailing time into the Gulf. Anchorages for the individual terminals are described in Ras Tanura Section (B) and Ju'aymah.

MAXIMUM DRAFT IN ARRIVAL CHANNEL: See Section (B) for maximum arrival draft Ras Tanura Terminal (16.37 m. + Height of Tide). See Ju'aymah Section (A) for maximum arrival draft Ju'aymah Crude Terminal (21.34 m.). Masters of vessels arriving partly loaded or deeply ballasted should navigate with caution in the vicinity of position: Lat. 26° 50' 30" N., Long. 50° 10' 30" E.

RADAR SURVEILLANCE ADVISORY SYSTEM:

See "Regulations" – Traffic Regulations.

This system is available to provide information and to continuously monitor the movement of all ships in the Port of Ras Tanura.

In addition to identifying, tracking and monitoring ship movements to and from the Terminal areas by means of computer assisted radar and video tape recording, the following services may be provided to vessel Masters:

(a) Advice on channel and port conditions, congestion, weather, tides, navigational aids, etc.
(b) Advice upon the movement of other vessels, dangerous manoeuvring situations and vessels violating port regulations.
(c) Advice upon port regulations regarding the movement of deep draft vessels and the priorities of vessels movements. (It may be necessary for vessels arriving in ballast to reduce speed to permit safe passage for outgoing deep draft vessels).
(d) Advice on berthing prospects and anchoring conditions.

The service has been established in order to increase the safety of ships navigating in the Port of Ras Tanura. However, it is an information and advisory service only and in no way assumes control of or responsibility for ships navigating in the area.

CHARTS AND PUBLICATIONS: Surveys by American and British Authorities in recent years have resulted in the publication of a number of charts of the Port of Ras Tanura and its approaches:

U.S. 62414 or B.A. 3788
U.S. 62415 B.A. 3777
U.S. 62416 B.A. 3776
B.A. 3813

Vessels proceeding to the Port of Ras Tanura should be in possession of the latest issues of the above charts or their equivalent. "Sailing Directions" and "Lists of Lights" are published by American and British authorities; these publications should also be available on board.

Navigational Warnings and weather forecasts are broadcast by Saudi Aramco "HZY" Radio and by commercial radio stations in the Arabian Gulf.

These should be copied well in advance of arrival.

The Saudi Ports Authority is in charge of issuing navigational warnings and Notices to Mariners covering the Saudi Waters. These Navigational Warnings and Notices to Mariners are broadcast by Dammam Radio on a 24-hour basis. Updated copies of these Radio Navigational Warnings and Notices to Mariners are sent to the Agents for delivery to the Masters at their ports of arrival.

METEOROLOGICAL INFORMATION:

Winds in the area are not predictable for more than a very few hours and may come from any quarter at varying strength. The prevailing wind is from the N.N.W.

Winds of any strength tend to create short steep seas coming up quickly and calming down just as rapidly. Easterly winds however cause heavy seas and swells which can last for a considerable period. For a more complete description of the winds of the Arabian Gulf, refer to "Sailing Directions".

Visibility in this area of the Arabian Gulf is generally fair to excellent, but at times fine dust is held in suspension in the atmosphere and visibility is reduced to a very short distance. This phenomenon is more deceptive than fog in that mariners are apt to believe visibility to be greater than it actually is. Dense fog with or without sand or dust may occur in the morning hours.

Climate of Ras Tanura is comparatively favourable for the Arabian Gulf. The exposed position of the port permits the winds to mollify the heat of Summer. Temperatures have been recorded in previous years as follows: Absolute Maximum 45.6°C (114°F) in June, Mean Maximum 38.4°C (101.1°F) in August, Mean Minimum 12.5°C (54.5°F) in January, Absolute Minimum 0.0°C (32°F) in January.

During most of the year, the relative humidity is high and during late Summer and Fall it frequently exceeds 85%.

Proper precautions should be taken to avoid sunstroke and heat exhaustion particularly during the Summer and early Fall months. Air conditioning plants aboard ships should be in good working condition at these times in view of the necessity to close down accommodation whilst loading dangerous cargoes.

TIDES AND CURRENTS: The depths quoted in all "Sailing Directions" and charts of the Arabian Gulf and the datum used by Saudi Aramco is based on lowest astronomical tides (LAT) from 1st January 1986.

Locally the diurnal tide rise is approximately 8 ft. (2.44 m.) at Springs and 5 ft. (1.52 m.) at Neaps. More detailed description of tides and currents in the locality can be found in the "Sailing Directions".

Due to the configuration of the coastline, a system of tidal currents prevail with flood tide setting towards South or S.S.E. and ebb setting towards North or N.N.W.

DOCUMENTS:

GENERAL: All contact between ships and the Saudi Arabian Government and Officials is to be made through the ship's Agent who will advise on specific requirements and documentation.

The following sections are for guidance only.

ARRIVAL DOCUMENTS: The following must be available to the Agent and boarding Government Officials:

(a) Maritime International Declaration of Health.
(b) Valid Deratting or Exemption Certificate.
(c) Crew List (including supernumeraries) up to 6 copies. Agent to submit 1 copy of Crew List 48 hours prior to arrival.
(d) Valid Vaccination Certificates.
(e) Valid Inoculation Certificates against communicable diseases prevailing at previous ports of call.
(f) A complete set of log books for the period since the vessel's last visit to Ras Tanura OR for the period since new OR since April 25th, 1952.

NOTICE OF READINESS: At all terminals in the Port, to be addressed to Saudi Aramco Ras Tanura.

EARLY DEPARTURE PROCEDURE: Use of this special service is encouraged and should be requested at the earliest opportunity.

Close co-ordination with the Agent is required in order to expedite the delivery of the required documentation to the ship.

It is essential that Radio contact with Saudi Aramco be maintained after departure until cargo quantities are received and the Agent has been authorised to sign documents.

DEPARTURE DOCUMENTS: The following 3 documents MUST be on board before the vessel departs even though the ship has been RELEASED to sail by Saudi Aramco.

(a) Bill of Lading: Completed by Saudi Aramco except for the cargo quantities. The Agent will deliver a copy to the Master who will enter the quantities as advised by radio after departure. The Master will then authorise his Agent to sign the original on his behalf.

(b) Permit of Departure: Completed by Agents with information supplied in the quarantine radio message and delivered by them to the vessel prior to departure.

(c) Port Clearance (Sailing Report): Completed in Arabic with information gathered by the Agent and delivered by them to the vessel prior to departure.

PILOTAGE:

CHANNELS: The channels of the Ras Tanura Separation Scheme are marked by lighted radar-reflecting beacons and buoys. Channel Pilots are not provided.

BERTHING: The use of Harbour Pilots is compulsory for all vessels calling at the Port of Ras Tanura to use any of the terminal facilities.

Harbour Pilots moor, unmoor and supervise the movements of al vessels in the vicinity of the berths. Saudi Aramco Harbour Pilots are on duty continuously and at present their services are provided without charge for normal operations, although Saudi Aramco reserves the right to charge for these services.

PILOT BOATS: An 87 ft. steel hull dedicated launch with about 6 ft. freeboard is usually available to transfer Harbour Pilots to and from tankers using South Pier, North Pier, the Sea Islands and Ju'Aymah LPG Terminal. Transfer of Harbour Pilots to and from tankers using the Ju'aymah Crude Terminal is usually by helicopter.

Pilot boats carry regulation signals, are equipped with radar, VHF radio and are painted white with green hull.

Also see "Regulations".

RADIO COMMUNICATIONS AND MESSAGES: *General:* The Saud Arabian Oil Company owns and operates a marine radio coast statio call letters HZY, Ras Tanura Radio. The station is maintained fo transacting Company business with inbound and outbound vessels an operates 24 hours a day. Ship's Agents are not allowed to sen messages to Masters via HZY Radio. There is no charge for incomin or outgoing message or radio telephone service. Personal messages o calls are not allowed.

HZY Transmitting Antenna: The coast station transmitting antenna i located at: Lat. 26° 18' 36" N., Long. 50° 07' 12" E.

Due to its inland location, Masters are strongly advised NOT to us this antenna for radio direction finding since inaccurate bearings will b obtained due to coastal refraction.

Required Arrival Information: Vessels must advise via Radio of estimat and/or actual arrival times at Ras Tanura Entry Buoy. It is required th vessels provide HZY with a minimum of three notices of ETA informatio at about 72, 48 and 24 hours steaming time from Ras Tanura. Shor notices may result in berthing delay. If loading part cargoes at other Gu ports prevents a vessel from furnishing an accurate ETA, steps shou be taken to advise by message (direct or through the ship's Agent) givi the best possible estimate. This message should then be followed b an accurate ETA immediately upon departure for Ras Tanura. Failu to give at least 24 hours' notice will result in an addition to allowab laytime. Vessels should advise last 3 ports of call and next port of ca

Standard Messages: Upon contact with all inbound tankers HZY Rad will transmit 2 standard messages:

It is important that the Master send a reply to the above 2 messages as soon as possible after receipt.

Notice: Issued by Saudi Aramco on 1st October 1994.
Quote:

SHIP'S STANDARD MESSAGE

Effective December 1st, 1994, Communication will apply the attached standard message to all ships calling Saudi Aramco Terminals at Ras Tanura, and Yanbu as well. Hence, we appreciate communicating this to all your customers. It is mandatory to answer back all information required, in order to eliminate any conflicts, usually caused by shortage of information received from ships.

From: Saudi Aramco Ras Tanura. No. . . . . . UTC/Date and time. . .
Master . . . . .

Please contact "HZY" on CW or Inmarsat Telex 801919 Amar SJ with following information:

One ETA UTC Ras Tanura Entry Buoy, any later changes.
Two Ship's former name if any, present flag, net registered tonnage.
Three Agent's name, last dry dock MM/DD/YY and Master's name.
Four Cargo requirements in net barrels and destination of cargo.
Five Bunker requirements in net barrels fuel and/or diesel bunker.
Six Arrival/departure draft fore and aft, arrival displacement tonnage, derrick capacity, number and size of connections.
Seven If loading Arab Medium for the account of Banoco and/or Arab Extra Light, your ship must arrive with a maximum arrival draft of 54 ft. plus tide, and a maximum sailing draft of 64 ft. plus tide.
Eight If loading LPG, advise if ship's tanks sufficiently cooled for normal loading, otherwise advise if you require coolant.
Nine Whether gas-free or in inert condition.
Ten Deballasting hours, loading rate, if can load cargo concurrent with deballasting, maximum loading rate after deballasting.
Eleven Previous cargo, also quantity and quality of part cargo or residue or slops aboard, if any, and whether to be mixed with Ras Tanura cargo or not.
Twelve If loading more than one grade, which grade to be loaded first, or if can load simultaneously, and loading rate for each grade.
Thirteen Does your vessel comply with SOLAS Conventions regarding the fitting and use of a fully operational Inert Gas System.
Fourteen It is a requirement of the port that the propeller remains immersed and stern trim does not exceed 1.5% of the ship's length when at berth. Confirm that your vessel will comply.

If VHF aboard, call Ras Tanura Pilots on Channel 16 or 14 for anchoring, boarding and berthing instructions when 100 miles out. On arrival anchorage, advise "HZY" offical readiness time and anchored position. Radio messages without charge. Pilots require sufficient clean ballast for manoeuvring with propeller covered and trim limited to 15 ft. for Ras Tanura Terminal, and 8 ft. for Juaymah Terminal. Imperative all vessels operating under Early Departure Procedure, copy "HZY" traffic list after departure until cargo quantities are resolved and Agent is authorised to sign cargo documents.
Saudi Aramco.

From: Saudi Aramco Ras Tanura. No. . . .UTC/Date and time. . . .
Master . . . . .

Please advise any epidemic disease or illness on board. Status of crews International Certificates of Immunisation. All ports called past 30 days. Destination. Flag. Net registered tonnage. Vessel will not be allowed to berth until this information is received.
Saudi Aramco.
Unquote.

Advisory Notices sent by HZY Radio: Navigation Warnings, port closure information and hydrographic notices are broadcast on 430 kHz, 4308.5 kHz and 8480 kHz at 0430 GMT and 1630 GMT.

Port closure information is also broadcast on 430 kHz along with traffic list every odd hour when in force.

Weather for offshore areas is dual broadcast on 430 kHz, 8480 kHz and 12811.3 kHz at 0800 GMT and on 430 kHz, 4308.5 kHz and 8480 kHz at 0430 and 1630 GMT.

A tentative berthing schedule of ships is broadcast at 0700 GMT and 1900 GMT daily on 430 kHz. This schedule is not firm and subject to change at any time. MASTERS MUST NOT MAKE ANY VESSEL MOVEMENTS WITHIN THE PORT BASED ON THIS SCHEDULE. The Saudi Aramco Pilot will individually alert vessels for final berthing instructions.

Aircraft Radio Beacon: There is an aircraft radio beacon transmitting on 335 kHz located at: Lat. 26° 37' 36" N., Long. 50° 09' 47" E. The beacon call sign is – RT.

HZY Coast Station Procedures – MF and HF: HZY Ras Tanura Radio provides W/T service in accordance with the schedules shown on CHART – 1 and CHART – 2. Traffic lists are transmitted on working frequencies after a preliminary announcement on 500 kHz on the MF band and on the working frequency in the HF band. Ships may begin calling HZY when the traffic list is completed.

During watch periods, HZY monitors 500 kHZ in the MF band and Common Channels 5 and 6 in the scheduled HF band. When HZY is open for service on HF, the identifying signal CQ CQ CQ DE HZY HZY HZY is transmitted approximately every 30 seconds. Ships may call on Channel 5/6 at any time.

HZY also provides HF Radio Telephone service in accordance with the frequency assignment in CHART – 3. The mode of operation is simplex using upper sideband. This service is restricted to telephone calls with Saudi Aramco representatives. Initial contact to establish service is via W/T. HZY will designate the frequency for radio telephone use at the time contact is made on W/T.

VHF Radio Communications with Saudi Aramco: Ras Tanura Pilots maintain a listening watch on VHF Channel 16 which is used as the calling channel. The following VHF working channels are available – 11, 13, 14, 18, 20, 78.

Saudi Aramco Terminal Planners monitor VHF Channels 13, 14 and 16 and can also be contacted via Ras Tanura Pilots.

VHF contact with Ras Tanura Pilots should be established within 100 miles of the port (or more in good propagation conditions) and maintained when anchored.

Use of VHF at the berths in the Port of Ras Tanura to contact Saudi Aramco Terminal Planners, Pilots or Agents is permitted.

VHF radio services are provided as a separate service and not from the HZY Radio Ras Tanura facility.

Communications with Saudi Aramco – Other than via HZY Radio: In the event that difficulties are encountered in communicating with Saudi Aramco via HZY Radio, a coast station is available at Bahrain Radio, call sign A9M. Messages are forwarded to Saudi Aramco via International Telex facilities. All such messages are at the ship's expense and subject to a delay of one day or more. There is a Saudi Arabian Government Maritime Coast Radio Station at Dammam call sign HZG.

Vessels calling at Ras Tanura or Yanbu Ports can contact HZY on Telex No. 801919 SHEIKO SJ, using Marisat. HZY does not initiate any call to contact vessels by telex.

Radio Silence at Berth: The use of Wireless Telegraphy and Radio Telephone transmitting equipment (with the exception of VHF equipment) is prohibited when secured to any Saudi Aramco Terminal facility.

Departure from Ras Tanura: It is important that for several days after departure from Ras Tanura vessel maintains communications with and copy HZY traffic lists.

Saudi Aramco NGL Terminal Yanbu: Vessels bound for the Saudi Aramco NGL Terminal at Yanbu should address radio messages to "SAUDI ARAMCO RAS TANURA/YANBU" and communicate with HZY on HF channels only.

CHART – 1:
HZY W/T Watch and Answer Frequencies

Listening Frequency Ships Transmit	*Reply Frequency HZY Transmit*	*Scheduled Times GMT*
—	430 kHz	H24
500 kHz	500 kHz	H24
—	521 kHz	On Request
*4181.6 to 4182.4 kHz	4308.5 kHz	1600 – 0600
†4186.8 to 4187.2 kHz		
—	4230 kHz	On Request
—	4275.5 kHz	On Request
*8632.2 to 8364.8 kHz	8480 kHz	1400 – 1000
†8373.6 to 8374.4 kHz		
*12544.8 to 12547.2 kHz	12811.3 kHz	0600 – 1600
†12560.4 to 12561.6 kHz		
*16726.4 to 16729.6 kHz	16960 kHz	1000 – 1400
†16747.2 to 16748.8 kHz		

*Corresponds to common Channel 5/6

†Corresponds to common Channel 18, monitored immediately following lists until all ships cleared.

Notes: (1) HF transmit frequencies are HZY working frequencies.
(2) During watch periods, CQ CQ CQ DE HZY HZY HZY is transmitted, indicating band is open for service.

CHART – 2
HZY W/T Working Frequencies and Traffic List Times

Frequencies HZY Transmit	*Schedule*	*List Times GMT*
430 kHz	H24	Every Odd Hour
521 kHz	On Request	—
4308.5 kHz	1600 – 0400	Every Even Hour
4230 kHz	On Request	—
4275.5 kHz	On Request	—
8480 kHz	1400 – 0800	Every Even Hour
12811.3 kHz	0600 – 1400	Every Even Hour
16960 kHz	1000 – 1200	1000 and 1200

Lists are broadcast on the odd or even hour.

CHART – 3 HZY Radio Telephone Frequencies

Carrier Frequency	Assigned Frequency
4143.6 kHz	4145 kHz
6218.6 kHz	6220 kHz
8291.1 kHz	8292.5 kHz
12429.2 kHz	12430.6 kHz
16587.1 kHz	16588.5 kHz
22124.0 kHz	22125.5 kHz

Notes: (1) HZY maintains a constant listening watch on international distress and calling frequency 2182 kHz.
(2) Initial contact via W/T, Channels are not monitored.
(3) HZY transmits on upper side band, A3A/A3J.
(4) Ships may specify their own authorised send frequency if desired.

TUGS: DESCRIPTION OF TUGS: Saudi Aramco operates the following harbour tugs:

1 single screw conventional tug of 4,000 h.p. with Bollard Pull of 55 tons.

3 twin screw flanking rudder tugs of 6,000 h.p. with Bollard Pull of 72 tons.

3 Voith Schneider propulsion tugs of 4,000 h.p. with Bollard Pull of 40 tons.

METHOD OF USE: These tugs may be encountered at any of the terminals in the Port of Ras Tanura.

Tug's lines are used but vessels should have good quality ropes available to supplement these in periods of bad weather.

At present no charge is made for the tugs when used in normal mooring and unmooring operations but a charge is made for additional or unusual services.

BERTHING: FACTORS: Vessels calling at the Port of Ras Tanura are assigned berths based on a variety of factors including but not limited to the following: nomination date, time of arrival, product to be loaded, vessel size, available berths and loaded draft. If there are no immediate berthing prospects vessels will be directed to anchor in the Northern Holding Anchorage.

DOUBLE BERTHING: Saudi Aramco reserves the right to advise vessels at which berth or berths and/or Terminals the loading will start and finish.

MOORINGS: All arriving vessels of 75,000 d.w.t. and over shall comply with the wire mooring line requirements detailed in Part "B" – Mooring Regulations.

During periods of unsettled weather, arriving vessels of under 75,000 d.w.t. fitted with wire moorings are preferentially berthed.

BALLAST: Vessels shall complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is permitted provided that the vessel has positive segregation between the two operations. Owners/Operators or Charterers of vessels requiring time to deballast in excess of what Saudi Aramco considers standard will be so notified by letter with a copy to the Master.

No facilities for the reception of dirty ballast are available in the Port of Ras Tanura.

HELICOPTER OPERATIONS: GENERAL: Helicopter operations in the Port of Ras Tanura are carried out according to the "International Chamber of Shipping – Guide to Helicopter/Ship Operations" All ships using the service should have a copy of this information and the Safety Check List on board.

DESCRIPTION OF HELICOPTERS: The helicopters used to transport Saudi Aramco personnel and equipment to and from tankers in the Port of Ras Tanura are Bell Model 212 and 214 which are twin-engined, kerosene fuelled, carry 11 to 18 passengers.

They are fully equipped for night operations and operate both day and night, with capability for either landing or winching operations as required and permitted.

In addition to being fitted with radar and radios which operate on aeronautical frequencies, the helicopters are fitted with International Marine VHF Ship/Shore Channels 11, 12, 13, 14 and 16.

SHIP INFORMATION: The following ship information should be available to the pilot of the helicopter:

1. Ship's name and call sign.
2. Owner.
3. Port and Country of Registry.
4. Type and Size.
5. Inert gas system installed.
6. Type of deck operating area provided for helicopters.
7. Type, size, markings and location of "Manoeuvring Zone" and "Clear Zone" provided for helicopters.
8. Obstacle types, sizes, markings and locations within and adjacent to helicopter operating area including antennae, handrails, davits, catwalks, valves, piping, etc,
9. Floodlight locations and wattage.
10. Communication frequencies available and those which are guarded continuously.
11. Special conditions, limitations and precautions applying to the particular vessel.

This information is kept on file in the Helicopter Dispatch Office and will be regularly updated.

If the conditions aboard the ship do not agree with the file, the differences must be resolved before a helicopter is dispatched to a ship.

COMMUNICATIONS: (a) **The Initial Contact** will be made by the helicopter Pilot with the ship on VHF Channel 16 and the working Channel 12 as soon as practicable to confirm the rendezvous time and location, type of service intended, etc.

(b) In the event of **Radio Communication Failure** the helicopter will circle the ship and the ship should reply by signalling lamp with:

1. Steady white light: Ready to receive helicopter
2. Series of short flashes: Reception of helicopter delayed for a period not greater than 15 minutes.
3. Prolonged series of "N" signals: Reception of helicopter delayed for a period in excess of 15 minutes. In this case the helicopter will return to base.

(c) **Initial Navigation Contact.**

The helicopter Pilot will at the appropriate time use the agreed VHF working frequency to request the ship to transmit its call sign on 410 kHz and then to transmit a continuous signal (Locked Key) for a sufficient time to determine the bearing to the ship and identify it on the radar.

SAFETY: The Port of Ras Tanura maintains a vigorous cargo handling safety programme.

Saudi Aramco is a member of the Oil Companies International Marine Forum (O.C.I.M.F.) and as such follows the procedures and safety practices recommended by this international organisation.

As is the practice in other Arabian Gulf Ports, each ship's Master is presented with a form entitled "Declaration by Master" which lists Saudi Aramco safety regulations. After a detailed review of each safety item with the Saudi Aramco Safety Representative, the Master must sign the form. Prior to start of loading and later at several times during the loading, Saudi Aramco Safety Representative will visit the ship and accompanied by one of the ship's officers will check to ensure that safe loading practices are being observed by both the ship and the shore crews.

In cases of blatant or repeated infringements of the Safety Regulations ships will be removed from the berth and will not be reberthed until a thorough inspection has been satisfactorily carried out by a Saudi Aramco Safety Representative.

Also see "Safety Regulations".

EMERGENCY PROCEDURES: The course of action to be followed by Saudi Aramco Personnel in the event of a fire or explosion on board a vessel while berthed in this Port will be dictated by the particular facts and circumstances of the incident. Although it is impossible to indicate exactly what practices will be applied during an emergency before an evaluation of the specific situation can be made by the responsible Saudi Aramco representative, his decisions will be based on the following principles:

1. An evaluation of the particular emergency will be made by the responsible Saudi Aramco Representative to determine the course of action to be taken. His decision as to the course of action will take into account the location, type and extent of fire or explosion, the berth location and proximity of other vessels, and the tidal and wind conditions.
2. A burning vessel will not be permitted to remain at the berth. Where possible, the fire will be fought with available berth fire-fighting facilities until the arrival of tugs. After hook-up of the tugs to the vessel's fire wires, if the fire is not controllable or extinguished, the vessel will be released or cut free and removed from berth under controlled conditions.
3. Where communication facilities permit, the Master or responsible ship's officer will be advised prior to releasing or cutting free a vessel from berth. The Master should designate a responsible senior ship's officer with whom the senior Saudi Aramco Representative present can communicate in case of a fire or explosion aboard the vessel. Where possible, this officer will be advised of the actions to be taken in releasing or cutting the vessel free from the berth.
4. Although a vessel may have no power it may be released or cut free from the berth prior to arrival of the tugs and hook up to the vessel's fire wires, if in the opinion of the senior Saudi Aramco Representative present it is a greater hazard at the berth than drifting free. Normally, however, a burning vessel will be removed by tug boats under controlled conditions.

NOTE: The above mentioned Principles are intended to provide the guidelines of action to protect terminal personnel and facilities, and other vessels at the Saudi Aramco loading berths.

The handling of gas tankers loading LPG at Saudi Aramco berths is governed by separate sets of rules with the mnemonic "Gasrul 9:86", copies of which are provided to all gas tankers.

POLLUTION: Saudi Aramco adopts a vigorous policy of pollution prevention, detection, and clean-up which is required and supported by the Saudi Arabian Government.

Vessels using terminals operated by the Company are required to observe the IMO conventions relating to the pollution of the sea by oil and are advised that violations will involve the Master/Owner/ Agent Operator in severe penalties.

Saudi Aramco does not tolerate pollution and will clean oil spills with whatever men, equipment, and material that are required considering the size of the spill, time of day, sea state and weather conditions. The Master, Owners and Operators shall be liable for all expenditure incurred by Saudi Aramco.

The equipment and material used in the clean up effort is dictated by on site judgement of qualified professional personnel whose goal is to protect the environment and prevent hazardous conditions.

Masters of vessels involved in a pollution incident shall immediately contact their Agent who will arrange the necessary Government contact

Also see "Pollution Regulations".

SHIP'S AGENTS: Vessels calling at any terminal in the Port of Ras Tanura should address all messages concerning ship's business to the Agents. Matters concerning provision supply, minor repairs, local medical or hopital services, mail, crew changes, etc., are to be handled by the ship's Agent.

SURVEYORS: Independent oil inspection service is available at the terminals in the Port of Ras Tanura by the following companies:

(a) Redwood Petroleum Division,
1 Place des Alpes,
1201 – Geneve 1, Switzerland.
Telephone: 312250
Telex: 22140 SGS CH
(for local information contact Gulf Agency Company)

(b) Caleb Brett & Son Limited,
International House, Mitre Square, 26-28 Greenchurch La
London EC3A 5ED

(c) E. W. Saybolt and Co. S.A.
400, Swenson Drive,
Kenilworth, New Jersey 07033, U.S.A.

(d) Watson Gray (Saudi Arabia) Limited,
c/o Yusuf Bin Ahmed Kanoo,
Saudi Aramco Box 711 or P.O.Box 71,
Ras Tanura, via Dhahran, Saudi Arabia.
Telephone: (03)6670180/6670903
Telex: 651012 KANOO SJ

(e) Services et Transports,
Route du Hoc, Gonfreville L'orcher,
Harfleur 76700, France.
Telephone: (35) 26 40 18
Telex: 190634 F.

(f) SPACO (Saudi Petroleum Analytical Company)
c/o SNAS, P.O.Box 5641, Riyadh, Saudi Arabia.
Telephone: (01)4766589
Telex: 201406 SJ

Marine and Engine Surveyors of various companies are available locally. They may be contacted through the vessel's Agent.

INERT GAS REQUIREMENTS – CARGO TANKS: All vessels are required to be fitted with an inert gas system under the provisions of the SOLAS Convention 1974 and its 1978 Protocol shall have the cargo tanks in the inerted condition prior to berthing at any Saudi Aramco Terminal in the Port of Ras Tanura.

The Berthing Pilot will check the oxygen content of cargo tanks with a ship's officer using ship's equipment. If the oxygen content of any tank exceed 8% by volume, the vessel shall not be berthed until the oxygen content of all tanks meet the requirements of the convention.

The Saudi Aramco Form "Inert Gas System – Check List" must be satisfactorily completed prior to berthing.

FACILITIES:

BUNKERS: Saudi Aramco fuel bunkers are available at all berths in the port. Black diesel is not available at the Ju'aymah Crude Terminal. Vessels taking only bunkers are urged to call at Ras Tanura *prior* to loading elswhere to avoid delays caused by draft and berthing assignment problems.

Non-Saudi Aramco bunkering services are available. Vessels employing these services are generally required to carry out their bunkering operations at the Northern Holding Anchorage.

FRESH WATER: Drinking and boiler water are NOT available in the Port of Ras Tanura. In cases of emergency, ships' Agents may be able to arrange delivery by barge of small quantities.

LUBRICATING OILS: Lubricating oils are available in limited quantities of drums if ordered through ship's Agents well in advance.

STORES: The shipping of any stores at Saudi Aramco berths is prohibited.

REPAIRS: Repair services are available from local business concerns. Saudi Aramco will not assist in making emergency repairs on vessels.

It is suggested that Masters discuss repair charges with the ship's Agent prior to requesting or authorising repair work.

DIVERS: Deep sea divers, operating from modern and well-equipped boats are available. Ship's Agents must be contacted for this service.

MEDICAL/HOSPITAL FACILITIES: No medical facilities are available at any of the terminals in the Port of Ras Tanura. Requirements for medical assistance or hospital services must be made through the ship's Agent, who can arrange treatment at one of the government or private clinics or hospitals in Rahima, Al Khobar or Dammam.

The ship's Agent is able to arrange for the Port Doctor to visit vessels to treat minor injuries or illnesses. In serious cases requiring hospitalisation the Port Doctor must attend to certify the necessity. Saudi Aramco medical facilities are made available in emergencies only when other facilities are not available.

A charge will be made for all such services furnished by Saudi Aramco. The Saudi Aramco radio station "HZY" may be used at any time without charge by vessels at sea to obtain medical advice.

REPATRIATION/SHORE LEAVE: All matters relating to crew changes, repatriation of crew personnel or shore leave are to be arranged through the ship's Agent. There is no Seaman's Recreation Centre at any terminal in the Port of Ras Tanura.

DRY CARGO AND FREIGHT: No dry cargo facilities exist in the Port of Ras Tanura and all Saudi Aramco freight is handled through Saudi Arabian Government Ports in the area.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Saudi Riyals (SR). U.S.$ 1.00 = SR 3.75 (fixed).

(B) REGULATIONS

The regulations shall be observed by all vessels proceeding to any terminal in the Port of Ras Tanura.

The Rules and Regulations for Ras Tanura Port (and Ju'aymah) are published by the Co-operation Council for the Arab States of the Gulf (March 1985).

Every vessel which arrives in Ras Tanura or Ras al Ju'aymah must have a copy of these Regulations on board, or must obtain a copy immediately on first arrrival.

Neither non-possession nor ignorance of these Regulations will be considered a reason for non-imposition of a penalty for violation of these Regulations.

EXTRACTS FROM SAUDI ARABIAN GOVERNMENT REGULATIONS: Saudi Arabian Government Regulations are strictly enforced and Masters having any doubts concerning the interpretation of these regulations are urged to consult their agent. At all times while in the Port of Ras Tanura whether at anchor, at the berth in any terminal or in transit between terminals, the vessel and its personnel are under the jurisdiction of Saudi Arabian laws.

QUARANTINE SIGNALS: Quarantine signals shall be displayed by all vessels approaching the Port of Ras Tanura in accordance with International practice. These signals shall be displayed continuously until Pratique is granted.

Sunrise to Sunset – Quarantine flag (Q)
Sunset to Sunrise – Red over White signal lights.

SAUDI ARABIAN FLAG: The flag of The Kingdom of Saudi Arabia shall be flown from the foremast of the vessel by day and by night while in the Port of Ras Tanura. The flag shall be clean and in good condition. Masters should obtain this flag before arrival but if circumstances render this impossible a flag must be obtained from the ship's Agent. Vessels not correctly flying the flag of Saudi Arabia will not be berthed. The flag is properly displayed when the Arabic writing appears on the top and the sword on the bottom.

PROHIBITED ARTICLES: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The import of certain articles is strictly prohibited and such articles include but are not limited to the following:

Explosives and firearms including air rifles.
Implements of war of any kind including antique weapons.
Religious matter not pertaining to the Moslem faith.
Playing cards and gambling devices.
Narcotics.
Printed, photographic matter or video tapes depicting what could be considered pornographic.
Alcoholic beverages of any description.

Any of the above items on board any vessel calling at the Port of Ras Tanura shall be secured in appropriate locked storerooms which will be sealed by the Authorities who may carry out inspections to ensure that the seals are intact and that none of the above articles are in use. The seals must remain intact during the entire period of the vessel's stay in the Port of Ras Tanura and must not be broken until after the vessel has finally departed for a port in another country.

Trafficking in any of the above articles between vessels or between vessel's crew and shore personnel is strictly prohibited.

The baggage of crews joining and leaving vessels will be inspected to ensure that it contains none of the prohibited articles.

PHOTOGRAPHY: The use of photographic equipment of any kind is strictly prohibited within the Port of Ras Tanura. Cameras are liable to seizure by the Authorities.

SHORE LEAVE: Vessel's personnel are not permitted ashore nor on the wharves for ANY PURPOSE WHATSOEVER (this includes reading the vessel's draft) until pratique is granted and then only if actually engaged in operational duties. No visiting between vessels at berths is permitted. Shore leave is not normally granted and ship's Agents must be consulted for advice.

PENALTIES: Penalties for violations of Saudi Arabian Government Regulations are severe and considerable fines and/or delays to vessels may be incurred.

Note: Saudi Aramco fully endorses and complies with these Rules and Regulations. Questions concerning these Rules and Regulations, from Ship Owners or Masters using Saudi Aramco Marine Terminal Facilities, should be addressed to the appropriate Authority through the ship's Agents.

SAFETY REGULATIONS: Prior to arrival at berth the Master must make a Safety Declaration of the conditions he will maintain when the vessel is at berth. (Saudi Aramco Form 8812 – 2/84) – See "Appendices" – Master's Safety Declaration.

RESPONSIBILITY FOR SAFETY: The vessel's Master and crew shall be responsible at all times for the safety of the vessel and shall make provision to exercise all necessary precautions.

Saudi Aramco Terminal personnel are authorised to suspend oil handling operations in the event that any of the Safety Regulations are violated or if any other hazardous situation is observed.

SAFETY REQUIREMENTS:

Notes:

(a) All of these requirements shall be complied with at all times that a vessel is berthed at any Saudi Aramco facility.
(b) Requirement No. 14 is to be complied with at other times as stated.
(c) The title of each requirement is numbered to correspond with the questions in the Safety Check List.
(d) Guidance on methods of complying with these requirements is contained in the ICS/OCIMF publication "International Safety Guide for Oil Tankers and Terminals"

1. *Moorings:* Moorings shall be frequently monitored and carefully tended to maintain the vessel in position and alongside at all times. (See "MOORINGS REGULATIONS").

Anchors shall be effectively secured in the hawse pipe to prevent letting go accidentally.

2. *Emergency Towing:* Towing off wires shall be made fast to bitts as far forward and aft as practicable on the side of the vessel opposite to the cargo connections. The wires shall be in good condition of not less than 3.5 in. in circumference (28 mm. diameter) and secured with a minimum of 5 turns on the bitts.

The wire shall lead directly to the chock with no slack on deck and a heaving line made fast to the eye shall be used to maintain the eye of the wire between 3 ft. and 6 ft. (1 m. and 2 m.) above the water at all times.

3. *Ship/Shore Access:* Personnel shall use only the designated access. Gangways shall be carefully tended at all times and safely illuminated at night.

4. *Readiness To Move:* The vessel's boilers, main engines, steering machinery and other equipment essential for manoeuvring shall be maintained so as to enable the vessel to be unberthed under full engine power at short notice.

A suitable trim shall be maintained for the same reason.

5. *Deck Watch:* A responsible Ship's Officer and sufficient crew shall be on watch to attend to the safe operation of the vessel.

A member of the crew shall be continuously on watch on the loading deck in view of the manifold and access to the vessel.

6. *Ship/Shore Communications:*
(a) A reliable communication system shall be established and tested for control of the cargo handling operation. This shall consist of suitable UHF/VHF radios, telephone or direct voice communication.
(b) The responsible Ship's Officer and the shore operator shall confirm with each other that the communications system and signals for controlling the operations are understood by them and by other personnel on duty at the start of operations and at each change of watch or shift.
(c) A responsible member of the vessel's crew with adequate command of the English language shall man the agreed communication medium.

7. *Operating Procedures:* The procedures for cargo, bunker and ballast operations shall be agreed in writing by the responsible Ship's Officer and the Terminal Representative.

8. *Emergency Shutdown:* Whenever an emergency situation develops aboard the vessel which may require that the cargo loading operation be suspended the vessel's tank/manifold valves shall not be closed against the flow rate under any circumstances until the berth operator has been advised. In order to prevent pressure surges in the loading system the period of valve closure shall be not less than 30 seconds and to prevent accidental closure of power operated butterfly valves they shall be locked or otherwise secured in the open position.

9. *Fire Fighting Equipment:* Fire fighting and emergency equipment shall be kept in readiness at all times.

Vessel's fire hoses fitted with combination jet/spray nozzles shall be connected to the fire main and laid out on deck forward and abaft the loading manifold.

If practicable, a pump shall maintain pressure on the fire main otherwise the fire pump shall be on standby ready for immediate use.

Monitors shall be ready for use and portable fire extinguishers preferably of the dry powder type shall be available in the proximity of the manifold area.

10. *Loading Connections:*
(a) The Master shall ensure that cargo and bunker hoses or arms are visually inspected and in good condition.
(b) The Master shall ensure that the loading connection is made to his satisfaction.
(c) Adequate safe fixed lighting arrangements shall be provided at the manifold at night to ensure a safe working area for personnel engaged in making the connection and to detect any leakage or spillage of cargo.
(d) Cargo hoses and arms at Saudi Aramco loading facilities are fitted with insulating flanges or joints. Ship/shore bonding cables shall *NOT* be used.

11. *Cargo Spillage and Leakage:*
(a) All deck scuppers shall be effectively plugged and cemented if necessary to prevent spilled oil from escaping overside.
(b) Accumulations of water shall be periodically drained and the scuppers secured immediately after the water has been drained. A crew member shall be in attendance during this operation.
(c) All cargo pipeline and pumproom valves when not in use shall be closed.
(d) Adequate drip trays shall be provided at the loading connections.
(e) Loading rates shall be regulated to avoid oil being drawn into the gas venting system.
(f) If leakage occurs from a pipeline, valve, hose or arm, or any connection, operations through that system shall be suspended until the cause has been ascertained and the defect remedied. If a pipeline, hose or arm ruptures or if there is an overflow, all cargo and bunker operations shall be stopped immediately and shall not be restarted until the fault has been rectified and all hazards from the released oil or product eliminated.
(g) In the event of any spillage of cargo on deck or overside, the Representative of the Terminal Superintendent shall be notified immediately.

12. *Unused Cargo and Bunker Connections:*
(a) All unused cargo and bunker connections shall be properly blanked, fitted with a gasket and bolted with one full-size bolt in every hole.
(b) The stern discharge line if fitted shall be isolated forward of the after accommodation by blanking with a spectacle piece or by removal of a spool piece.
(c) Unused inert gas system connections to machinery spaces shall be properly sealed to prevent entry of cargo or vapour.
(d) Any part of a crude oil washing or slop transfer system which extends into machinery spaces shall be securely blanked and isolated on the tank deck.

13. *Sea Valves:*

At the start of and at regular intervals throughout deballasting and loading, a deck watch shall be maintained to ensure that oil is not escaping through sea and overboard discharge valves (Also see "Pollution Regulations").

When not in use, sea and overboard discharge valves connected to the cargo or ballast systems shall be closed and lashed. When lashing is not practicable as with hydraulic valves, a suitable means of locking shall be used to indicate that the valves are to remain closed. (For further guidance refer to the ICS/OCIMF publication "Prevention of Oil Spillage through Cargo Pumproom Sea Valves").

14. *Tank Lids:*
(a) All cargo tank lids ullage and sighting ports shall be securely closed **before berthing or unberthing operations commence.** To maintain watertight integrity **when manoeuvring in the loaded condition** all cargo, ballast and bunker tanks, cofferdams and pumproom entrances shall be securely closed.
(b) During cargo handling operations all cargo, ballast and bunker tank lids and tank washing openings shall be securely closed.

15. *Tank Venting:*
(a) All vessels shall ensure that vapour displaced by cargo shall be vented in accordance with the written agreement with the Terminal Representative.
(b) All vessels fitted with an Inert Gas System shall ensure that the oxygen content throughout the atmosphere of cargo tanks has been reduced to 8 per cent or less by volume.
(c) Flame arrestors will be employed in accordance with the design features of the venting system.
(d) The loading rate shall be controlled to prevent excess pressure in the cargo tanks.
(e) If ullage ports are required to be open for operational purposes the opening shall be protected by efficient flame arrestors. Ullage ports shall not be left partly covered but shall be fully open in such a way that vapour may leave the tank in the form of a vertical unimpeded jet.
(f) In vessels not fitted with automatic ullaging devices ullage ports may be opened intermittently for short periods for the purpose of ullaging or sighting only.

16. *Hand Torches and Battery Powered Equipment:*
(a) Battery operated flashlights shall be in good condition and of a type certified to be safe for use in hazardous locations.
(b) Portable domestic radios, photographic flash equipment (See "Prohibition of Photography"), portable electronic calculators, recorders and other battery-powered equipment of non-approved type shall not be used on deck or in any place where petroleum vapour may be encountered.

17. *Portable Radio Transceivers:* Portable VHF/UHF transceivers shall be of an intrinsically safe type which is approved by a competent authority. When used this equipment shall be in good condition.

18. *Radio and Radar Transmitters:*
(a) Main radio equipment shall not be used and main transmitting aerials shall be disconnected and grounded.
(b) Radar scanners shall be switched off.
(c) The servicing of radio and radar equipment shall not be permitted without written agreement of the Terminal Representative.

19. *Electrical Equipment:*
(a) The use of portable electrical equipment on flexible leads is prohibited on the tank deck. Supply cables for such equipment shall be disconnected and removed from the tank deck.
(b) All electrical installations on board vessels shall be in good condition. Modifications which have not been approved by an appropriate authority shall not be accepted.

20. *Amidships Accommodation:* All doors, ports and windows in amidships accommodation shall be closed and every effort shall be made to prevent entry of petroleum vapour into this accommodation.

21. *Aft Accommodation:*
(a) All doors, ports and openings in the after accommodation (other than pumproom) which lead directly to the loading deck or which overlook the loading deck at any level shall be kept tightly closed.
(b) Doors that are required to be closed shall be clearly marked but under no circumstances shall they be locked.
(c) Machinery space openings by means of which petroleum vapour may enter shall be closed.
(d) Consideration shall be given to the suspension of cargo operations when weather conditions support the entry o petroleum vapour into spaces which cannot be closed.

22. *Air Conditioning Intakes:*
(a) Central air conditioning or mechanical ventilation systems shall be adjusted to prevent intake of petroleum vapour if possible b recirculation of air within enclosed spaces so that a vacuum i not created.
(b) Any intake within the range of possible petroleum vapour releas shall be closed.
(c) If at any time it is suspected that petroleum vapour is being draw into the accommodation, central air conditioning and mechanica ventilating systems shall be stopped and intakes closed o covered.

23. *Window Type Air Conditioning Units:*

Window type air conditioning units shall be disconnected from th power supply.

24. *Smoking:*

Smoking shall only be allowed in places in the after accommodatio which have been jointly approved in writing by the Master and th Terminal Representative and suitable notices shall be posted at th entrance to designated smoking rooms.

No place will be considered suitable for smoking unless:
(a) It is in enclosed accommodation abaft the cargo tanks.
(b) It has no doors which open directly onto the outside deck.
(c) It has no doors or ports which open directly onto or over the car deck or onto decks overlooking cargo spaces.
(d) All ports are kept closed and doors into passageways are ke closed except when in use.

25. *Galley Stoves and Cooking Appliances:*
(a) Galleys which use only steam or immersed electric heaters sh be considered suitable for use.
(b) The use of galley stoves and cooking appliances with no immersed elements such as electric hot plates and toasters m be permitted in galleys and properly designated pantries with written agreement of the Terminal Representative.

(c) Approved galleys and pantries shall be situated in the after accommodation and shall have no doors or ports which open directly onto the cargo deck.

(d) All galley and pantry doors and ports shall be kept closed.

(e) Ventilator trunkings and filters of extractor fans in galleys shall be kept clean and free from accumulated oil and fat.

26. *Naked Lights:*

Open flames or fires, exposed incandescent material and any other unconfined sources of ignition are prohibited on deck and in other places where there is a risk that petroleum vapour may be present.

27. *Emergency Escape:*

Means for emergency escapes shall be provided on the side of the vessel opposite to the loading connections. For security reasons such means is to be stowed at deck level in such a manner as to be ready for expeditious use in an emergency. Such means shall be of adequate length to reach the water at all times.

VOLATILE AND NON-VOLATILE PETROLEUM:

Due to the variety of petroleum products available for loading at Saudi Aramco facilities in the Port of Ras Tanura, all vessels arriving to load crude oil or any petroleum product whether volatile or non-volatile at any berth shall be required to observe the Safety Regulations.

See also "Gasrul 9:86" for Saudi Aramco Rules governing the handling of gas tankers at berth.

PRECAUTIONS AGAINST STATIC IGNITION: Tanks not properly inerted (See "Safety Requirement") prior to loading static accumulator oils (kerosene, kerosene type jet fuel, white diesel and under certain conditions heavy naphtha and gasoline type jet fuels) shall be gas free within 40% of the lower flammable limit. The following restrictions shall also apply to vessels loading static accumulator oils:

(a) Tanks and pipelines shall be free of water.

(b) Loading overall (splash filling) shall not be permitted.

(c) No conducting equipment (ullage tapes, sample cans, thermometers) shall be introduced into a cargo tank until 30 minutes have elapsed after loading has been stopped to that tank.

(d) No loose floating objects shall be present in tanks to be loaded.

(e) Initial loading rates shall not exceed 1,000 bbls.p.h. per tank. Above soundings of 20 ft. loading rates of up to 1,500 bbls.p.h. shall be permitted.

(f) Properly bonded and grounded automatic ullaging equipment may be used at any time.

Vessels with tanks which are properly inerted (See "Safety Requirement") shall not be required to comply with the specific requirements for loading static accumulator oils. However, normal safety precautions shall be observed.

HYDROGEN SULPHIDE HAZARDS: Saudi Aramco crudes may contain dissolved hydrogen sulphide (H_2S) in concentrations which may be hazardous. It is recommended that Owner's instructions and the ISGOTT recommendations in respect of H_2S hazards are reviewed.

EMERGENCY SIGNAL: In the event of a fire or other emergency, the vessel shall sound a series of 10 short blasts on the ship's whistle.

GAS FREEING: No gas freeing or tank washing shall be carried out at berth.

BOILER TUBE CLEANING: Funnel uptakes and boiler tubes shall not be cleaned while the vessel is at berth. Every precaution shall be taken to ensure that sparks do not escape from the funnel.

REPAIRS: Repairs or maintenance of any kind which may produce a source of ignition shall not be undertaken without the agreement in writing of the Terminal Representative.

PENALTIES: Disregard of or failure to fully comply with any of the Safety Regulations or any safety regulations generally accepted and practised in the marine transport industry will result in the suspension of all operations and the vessel may be required to leave the berth.

Vessels presented for loading with deficient equipment or machinery whether by design or by lack of maintenance will not be berthed. If such deficiency becomes apparent after berthing the vessel will be removed from the berth.

Safety violations due to negligence on the part of the vessel's personnel will result in the suspension of loading operations for investigation and correction. Repeated violations may result in a vessel being removed from the berth.

Removal from the berth as a result of safety violations or deficiencies will be at vessel's expense and Saudi Aramco will not accept responsibility for any resulting delay to the vessel.

Vessels with unacceptable safety performances will not be permitted to berth at Saudi Aramco facilities on future visits.

POLLUTION REGULATIONS: Vessels using the Port of Ras Tanura shall exercise every precaution to prevent the pollution of the sea by oil.

1. A crew member shall be stationed on deck to sight the overboard discharge during deballasting operations to ensure that no oil or oil-based products escape into the sea.

   Particular vigilance shall be exercised at any time that a change of operation takes place, e.g. starting of stripping pumps or eductors, change of tanks, commencement of loading, etc.
2. At sea island type berths, all ballast shall be discharged from the side of the ship nearest the berth.

   At pier berths, all ballast shall be discharged from the offshore side of the ship.

   At night, the discharge and the sea area in its vicinity shall be adequately illuminated.
3. No domestic or other rubbish shall be dumped into the sea.
4. In the event of an oil spill the Master shall notify the Terminal Representative on duty.
5. Excessive smoke from the funnels or exhaust gas lines of vessels is prohibited.

PILOTAGE REGULATIONS:

BOARDING ARRANGEMENTS: In order to permit the harbour Pilot to safely embark and disembark from a vessel a pilot ladder shall be provided in accordance with the following requirements:

1. The ladder shall be kept clean and in good order and shall be of adequate length and strength.
2. The vertical distance between the steps must not exceed 15 in. The outboard edge of the step shall project from 5 in. to 6 in. from the hull. Ladders shall be so constructed that the steps will remain flat at right angles to the hull while supporting the weight of a person.
3. Spreaders at suitable intervals shall be provided to prevent the ladder from twisting and the ladder shall be properly secured with the steps level.
4. The deck in the vicinity of the ladder shall be clean and free of oil and grease or other slippery substances.
5. When possible, on vessels so equipped, the pilot ladder shall be made fast next to an area where there is a break in the rail or an opening in the bulwark. Otherwise, suitable arrangements for safe access to the deck from the top of the pilot ladder shall be provided.
6. The boarding position should be as near amidships as possible so that the whole length of the ladder rests against the ship's flat side, clear of all possible discharges from the ship.
7. Adequate lighting shall be provided at night so that the pilot ladder and the deck area close by the head of the ladder shall be adequately and properly illuminated.
8. Manropes, a safety line and lifebuoy with self igniting light should be rigged ready for use if required.
9. The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible deck officer of the vessel.
10. The vessel's propeller shall be stopped during the approach of the pilot boat and the embarking of the Pilot.
11. Whenever the distance from the water to the deck of the vessel exceeds 30 ft. (approximately 9 m.) the pilot ladder shall be rigged in combination with the accommodation ladder.
12. In any small vessel in which the bulwark rails are below the level of the deck of the pilot boat (approximately 6 ft. or 2 m.) a safe boarding position on each side of the forward end of the poop shall be provided and equipped with manropes.
13. Pilot hoists of the double drum, double-wire type are permitted after inspection and approval by Ras Tanura Pilots.

Failure to provide a safe method of boarding for the Pilot will result in the vessel being ordered to anchor until the fault is rectified.

REMOVAL OF WRECKS AND OBSTRUCTIONS: If any vessel founders or otherwise becomes in the opinion of the Company, an obstruction or danger to navigation in the Port of Ras Tanura and its Owner or his Agent fails to remove the obstruction or danger so caused within the period of written notice served by the Port Captain, or immediately in an emergency, the Company may, for the purpose of safeguarding the Port, take action to remove the obstruction or danger.

The Owner of any vessel at the time of its becoming an obstruction or danger to navigation in the Port of Ras Tanura shall be liable for the expense incurred in removing the obstruction or danger to navigation.

Also see Standard Terms and Conditions where Master requests Saudi Aramco to provide assistance to refloat vessel stranded in waters of the Arabian Gulf.

Also see "Appendices" – Refloating/Stranding.

TRAFFIC REGULATIONS: The following regulations apply to all vessels entering or leaving the Port of Ras Tanura or Dammam by way of the Ras Tanura Channel.

The separation zones and routes shown on the charts of the Ras Tanura Channel are approved by IMO. Violators of the routeing recommendations will be reported to their Owners/Operators/Agents/Charterers.

1. All vessels shall monitor VHF Channel 10 when under way in the Ras Tanura Channel and its vicinity and in the anchorage areas of Ras Tanura Terminal.
2. All vessels using the inbound or outbound channels shall have an underkeel clearance of at least 5 ft. (1.52 m.).
3. Under no circumstances shall inbound vessels navigate in the departure channel nor shall outbound vessels navigate in the arrival channel.
4. Inbound vessels shall:
   - (a) report to Ras Tanura Port Radar on VHF Channel 10 when passing Beacon No. 3 and Buoy No. 7.
   - (b) not exceed a speed of 5 knots after passing Buoy No. 9.
   - (c) not overtake and shall mantain a distance of one mile from vessels proceeding in the same direction after passing Buoy No. 9.
   - (d) navigate with extreme caution and give way to vessels departing from the berths and anchorages.
5. Outbound vessels:
   - (a) departing from Ras Tanura Anchorage shall advise Ras Tanura Port Radar on VHF Channel 10 of their intentions 30 minutes before weighing anchor.
   - (b) shall not overtake and shall maintain a distance of at least one mile from vessels proceeding in the same direction until both vessels have passed clear of Buoy No. 5.
6. Vessels manoeuvring in the area between the South extremity of the Tanker Anchorage and the entrance to the Departure Channel (Buoys 17 and 18) shall limit speed to a maximum of 5 knots.
7. Vessels bound to and from the Port of Dammam shall keep to the Eastern part of the Tanker Anchorage and avoid the manoeuvring area from the anchorage to the sea islands and piers. Outbound vessels from Dammam shall, when passing Dammam Channel Buoy No. D 37, alert Ras Tanura Port Radar of their ETA at the Southern extremity of the Tanker Anchorage.

MOORING REGULATIONS:

GENERAL: The use of nylon or other highly elastic mooring ropes is discouraged.

If a vessel with synthetic mooring ropes is alongside when squall conditions arise, loading to that vessel shall be stopped and loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation.

Vessels shall be moored to the entire satisfaction of the Harbour Pilot and shall be ready at all times to put out more lines as required by terminal personnel and as may be dictated by weather conditions.

All vessels at berth shall have all deck winches in readiness for immediate use.

All vessels with tension winches shall set the manual brakes on these winches.

MIXED MOORINGS: Vessels equipped with both wire and synthetic lines shall avoid mixing moorings to the same bollard or dolphin.

WIRE MOORINGS: In order to ensure the safety of personnel, vessels and loading facilities and to prevent accidental oil spillages, the following requirements (used as springs and breast lines) are mandatory for all vessels permitted to use the Saudi Aramco fixed berth loading facilities.

Vessel Size	*Required*	*Recommended*
75–160 m.d.w.t.	8 wires	12 wires
161–250 m.d.w.t.	10 wires	12 wires
251–300 m.d.w.t.	12 wires	14 wires
301–350 m.d.w.t.	12 wires	16 wires
351 m.d.w.t. and above	14 wires	16 wires

The wire size, winch power and winch braking power shall in all cases be adequate for the size of the vessel. All lines shall be properly reeled onto winch drums and the winch brakes shall be set to hold to a minimum load of 60% of the minimum breaking load of the line.

After obtaining the permission of the Port Captain, vessels may use mooring lines other than wire, constructed of a substitute material provided that the elongation of the substitute material does not exceed 3% at 55% breaking load. Tails, if used, should preferably be made of nylon line (3 strand construction should not be used) about 11 m. long overall, and have a breaking strength at least 25% greater than the MBL of the wire to which they are attached. They should be replaced at least every 18 months unless experience and/or inspection indicates more or less frequent replacement is necessary.

Additional information is contained in the O.C.I.M.F. publication "Guide Lines and Recommendations for the Safe Mooring of Large Ships at Piers and Sea Islands".

All vessels shall utilise all of the wire mooring lines with which they are equipped unless the number exceeds that recommended above.

APPENDICES:

SHIP/SHORE SAFETY CHECK LIST

VESSEL:……………………………………………………………

BERTH:……………………………………………………………

Instructions for completion:

The safety of operations requires that all questions should be answered affirmatively after checking by both ship and terminal representatives. If an affirmative answer is not possible, the reason should be given and agreement reached upon appropriate precautions between the ship and the terminal.

Questions	Yes/No	Remarks
1. Is the ship securely moored and anchors secured?		
2. Are emergency towing wires correctly positioned?		
3. Is there safe access between ship and shore?		
4. Is the ship ready to move under its own power?		
5. Is there an effective deck watch in attendance on board?		
6. Is the agreed ship/shore communication system operative?		
7. Have the procedures for cargo, bunker and ballast handling been agreed?		
8. Has the emergency shut down procedure been agreed?		
9. Are fire hoses and fire fighting equipment ready for immediate use?		
10. Are cargo and bunker hoses and/or arms in good condition and properly rigged?		
11. Are scuppers effectively plugged, and drip trays in position?		
12. Are unused cargo and bunker connections, including the stern discharge line, if fitted, blanked?		
13. Are sea and overboard discharge valves, when not in use, closed and lashed?		
14. Are all cargo and bunker tank lids closed?		
15. Is the agreed tank venting system being used?		
16. Are hand torches of an approved type?		
17. Are portable VHF/UHF transceivers of an approved type?		
18. Are the ship's main radio transmitter aerials earthed?		
19. Are electric cables to portable electrical equipment disconnected from power?		
20. Are all external doors and ports in the amidships accommodation closed?		
21. Are all doors and ports in the after accommodation leading on to or overlooking the tank deck closed?		
22. Are air conditioning intakes which may permit the entry of petroleum gas closed?		
23. Are window-type air conditioning units disconnected?		
24. Are smoking requirements being observed?		
25. Are the requirements for the use of galley and other cooking appliances being observed?		
26. Are naked light requirements being observed?		
27. Is there provision for emergency escape?		

Declaration

We have checked with each other the items listed on this Check List in the course of a joint inspection, and have satisfied ourselves that the entries we have made are correct to the best of our knowledge.

INSTRUCTIONS TO MASTERS AND CONDITIONS OF USE OF PORT
SAUDI ARAMCO Form 3032 (6/84)
Ras Tanura Terminal
Port of Ras Tanura, Kingdom of Saudi Arabia

Pilot Boarded:………. Local Time Date…………………

To the Master S.S./M.V……………

1. Your vessel; will be moored to Berth No. ………. North/South Pier/Sea Island Port/Starboard side to the berth.
2. The Local Time is GMT plus 3 hours.
3. Low water will be at approximately ……… Local Time and will be approximately ………………ft./m. above LAT.

BERTHING/UNBERTHING AND MANOEUVRING

1. All movements of vessels to and from berths and in the proximity of Saudi Aramco facilities shall be under the direction of a Saudi Aramco Harbour Pilot.
2. All tank openings, ullage and sighting ports shall be closed before berthing or unberthing operations commence.
3. Saudi Aramco tugs shall assist in berthing and unberthing.
4. Steering gear, engine room telegraph, whistle and all navigational and communications equipment shall be tested before any manoeuvring to or from the berth is commenced.
5. Full main engine power shall be available for berthing and unberthing.
6. Any special conditions present in the vessel which may effect manoeuvring, berthing or cargo handling capability shall be notified to the Harbour Pilot before operations commence.
7. The Harbour Pilot shall refuse to berth vessels with unsatisfactory equipment.
8. The vessel shall be moored to the entire satisfaction of the Harbour Pilot.
9. The crew of the vessel shall be ready to employ additional mooring lines as required by weather changes or as requested by the Harbour Pilot or terminal personnel.
10. Winches shall be ready at all times for immediate use.
11. No mooring lines shall be cast off except in emergency without the permission of the Harbour Pilot.
12. When at berth the vessel shall be ready in every respect to leave the berth at short notice with full engine power.
13. The Master of every vessel shall in circumstances which threaten the safety of the vessel, its crew, or the port installations be prepared to unberth the vessel subject to the advice of the Port Captain with or without a Harbour Pilot on board.
14. The Harbour Pilot will board on completion of loading and/or bunkering and the vessel shall vacate the berth immediately after the disconnection of hoses or arms.
15. The expenditure incurred in any delay or towage resulting from failure to comply with any of the provisions of these instructions shall be the liability of the Master and Owners of the vessel concerned.

KINGDOM OF SAUDI ARABIA

1. The National Flag of the Kingdom shall be displayed by day and night in the appropriate position on every vessel when in loca waters.
2. The International Quarantine signals shall be exhibited until th vessel is granted Free Pratique.
3. All prohibited items shall be secured before entering the territoria waters of the Kingdom. Contravention will entail severe penalties.
4. Ship's personnel are NOT permitted ashore nor on the wharves FOR ANY PURPOSE WHATSOEVER (this includes the reading of the ship's draft) until Pratique is granted and then are allowe on the wharves only if actually engaged in duties connected wi ballast and cargo handling operations.
5. Shore leave is not permitted except by special arrangement wi Government officials through the Agent of the vessel.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for th safety and the proper operation of the vessel at all times. Neithe Saudi Aramco nor its personnel shall be responsible for any los or damage arising in consequence of any assistance or advic given or tendered in respect of the vessel.
2. The use of Saudi Aramco premises, facilities and equipment subject to the express understanding and condition that Sau Aramco and its personnel shall be held harmless from all liabili loss or claim thereof arising out of such use. In amplifications the foregoing, the vessel, its Owners and/or Charterers shall liable to and shall reimburses Saudi Aramco promptly and in t for any Saudi Aramco liability to third parties and any cost, los delay, or expense incurred by Saudi Aramco as a consequen of any breach or non-compliance with these Instructions Masters and Conditions of Use of Port on the part of the vess its Master, Owner(s) and/or Charterer(s).
3. All vessels transiting the "Deep Water Departure Channel" sh maintain a minimum of 5 ft. keel clearance.

4. The Harbour Pilot is provided upon the condition that when boarding or assisting the vessel he becomes the Agent and Servant of the Owner and/or Charterers of the vessel in every respect. Saudi Aramco shall not be responsible and shall be held harmless from all liability for any damages resulting from or caused by any action taken, order given, or decision made (for any omission thereof) by the Harbour Pilot or in respect of his handling of such vessel.
5. When the assistance of tugs is provided, the Master and crews of tugs shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and Servants of the Owners and/or Charterers of the vessel assisted, and Saudi Aramco shall not be responsible and shall be held harmless from all liability for any damage that may be done by the tugs or their crews while assisting the vessel, whether occasioned by any act or omission of the tug Master or crew by defect or inadequacy of the tug, its machinery or gear. This condition shall not, however empower the Master to detain such tugs should Saudi Aramco require their services elsewhere.
6. Vessels and the Owners and/or Charterers of vessels from which oil, oily residue, oily ballast water or any other pollutant escapes or discharged for any reason at any location within the Port shall be liable to and shall reimburse Saudi Aramco promptly and in full for the cost of all clean-up, containment and removal measures taken in response to such escape or discharge by or on behalf of Saudi Aramco which, in Saudi Aramco's sole discretion, are prudent or necessary in order to protect human life, vessels, installations and the environment. Such cost shall constitute a joint and several debt due from the vessel and the Owners and/or Charterers to Saudi Aramco. Further, the vessel and her Owners and/or Charterers shall be jointly and severally liable for all and any loss, damage and expense sustained by Saudi Aramco by reason of such escape or discharge and shall hold Saudi Aramco harmless from and indemnify Saudi Aramco against any and all claims related to or arising out of such escape or discharge.
7. Repair to the main engines or deck machinery shall not be permitted when the vessel is secured to any berth.
8. Harbour Pilots shall not berth any vessel at Saudi Aramco facilities without the Master's signature of acknowledgement.

MASTER'S ACKNOWLEDGEMENT

I hereby acknowledge receipt of a copy of this document and agree to the instructions and conditions set out therein.

(DATE) (MASTER)

(HOUR LOCAL TIME) (VESSEL)

INSTRUCTIONS TO VESSELS AND CONDITIONS OF USE OF **JU'AYMAH** LOADING FACILITIES

THE MASTER S/S — M/V

1. Vessel will be moored at Ju'aymah Berth No..............
2. Discharge into sea of oil base products in combination with ballast water is not allowed. Ships which release oil or oily ballast water in either the berth or anchorage area will be held responsible for all clean-up costs.
3. Prior to loading, the Pilot/Mooring Master will inspect the vessel for conformity with safety requirements and will review in detail each item on Saudi Aramco Form 5626 "Declaration by Master". This form will be acknowledged and signed by the Master.

MOORING AND MANOEUVRING

1. Full power must be available for manoeuvring in and out of the berth. Manoeuvers with other than full power available shall be performed only after the consent of both the Port Captain and Pilot/Mooring Master have been obtained.
2. The Pilot/Mooring Master will advise the Master during the mooring and unmooring of the tanker and will supervise the connecting and disconnecting of cargo and bunker hoses by the tanker's crew. The loading operation will be performed to the complete satisfaction of the Pilot/Mooring Master.
3. Mooring will be accomplished with the assistance of marine craft assigned to the vessel by Saudi Aramco.
4. All tank tops, ullage plugs and sighting ports shall be closed before berthing.
5. The vessel's Master shall notify the Mooring Master of any special conditions, difficulties, defective equipment or gear which could impose special hazards when mooring, unmooring or loading cargo.
6. All navigational equipment such as the engine, telegraph, whistle, steering gear, etc., shall be tested prior to getting underway to moor and unmoor. Testing of the tanker's engine when berthed shall be done only after the Pilot/Master has been duly informed and his consent has been obtained.
7. The Mooring Master may decline to moor a vessel with unsatisfactory mooring equipment.
8. No repairs are permitted while the vessel is berthed. The engine and deck machinery will be kept ready to permit the vessel to get underway on an emergency basis.
9. Any vessel delay resulting from failure to comply with any of the provisions of this document shall be for the vessel's account.
10. Upon completion of loading and the disconnection of hoses, the vessel will be unmoored and, if using Early Departure Procedures, the Master should make ready to depart as soon as possible. Otherwise, vessels are to await cargo and Port Clearance documents while lying in stream.

SAUDI ARABIAN GOVERNMENT PORT REGULATIONS

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ju'aymah in accordance with international practice and shall be continuously displayed until Pratique is granted. These signals shall be as follows:
   Sunrise to Sunset – Quarantine Flag
   Sunset to Sunrise – Quarantine Signal Lights
   (Red over White)
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available from the ship's agent. The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.
3. Importation and/or use of liquor or contraband items, or trafficking in such items, is absolutely prohibited. The Saudi Arabian Government rigidly enforces these regulations and penalties are severe. In the event of violation considerable delay to the vessel involved could occur.
4. Ship's personnel are not permitted to leave their vessel.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for the safety and proper operation of the vessel at all times. Neither Saudi Aramco nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect to the vessel.
2. The use of Saudi Aramco premises, facilities and equipment is subject to the express understanding and condition that Saudi Aramco and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. The Pilot/Mooring Master is supplied upon the condition that when boarding or assisting the vessel he becomes the agent and the servant of the owners and/or charterers of the vessel in every respect. Saudi Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Pilot/Mooring Master or in respect to his handling of the mooring or cargo loading operations.
4. When the assistance of small craft is supplied (mooring launches and/or a utility boat), the craft, Master and Crew thereof shall, in the performance of such services as they render to the vessel, become and be deemed to be the agents and servants of the owners and/or charterers of the vessel assisted. Saudi Aramco shall not be responsible and shall be held harmless from all liability for any damage that may be done by or to the craft or their crews while assisting the vessel, whether occasioned by any act or omission of the crafts or their crews or by any defect or inadequacy of the craft or the craft's machinery or gear. This shall not give the tanker's Master the right to detain such craft for duties other than mooring, unmooring or hose work nor shall this prevent the craft from being reassigned during mooring, unmooring or hose work.
5. No vessel may berth without a Saudi Aramco Pilot/Mooring Master on board.
6. Pilots/Mooring Masters will not assist in the mooring of any vessel unless they have the Master's signature on the acknowledgement below.

MASTER'S ACKNOWLEDGEMENT

I hereby acknowledge receipt of a copy of this document and agree to the instruction and conditions set forth therein.

DATE MASTER

_________GMT

HOURS (VESSEL)

REFLOATING/STRANDING

SAUDI ARABIAN OIL COMPANY
Ras Tanura, Saudi Arabia

MASTER
S.S./M.V. ....

The Saudi Arabian Oil Company hereinafter referred to as Saudi Aramco has been requested to provide assistance to refloat your vessel which is stranded in the waters of the Gulf.

Saudi Aramco is prepared to provide personnel and such equipment and materials as may be available to assist in the refloating of your vessel subject to the following conditions:–

1. That you as Master shall have sole responsibility for your vessel at all times.
2. That Saudi Aramco and any personnel, equipment or crafts that may be provided shall be deemed to be the Agents and Servants of you as Master and the Owners and/or Charterers of your vessel.
3. That you will accept liability on behalf of the Owners and/or Charterers of your vessel for all the expenditure incurred by Saudi Aramco in providing assistance to your vessel.
4. That Saudi Aramco shall not be responsible for and shall be held harmless from and against any damage that may be done by any personnel and equipment, including tugs and their crews, whether occasioned by any action or omission of Saudi Aramco personnel or by any defect or deficiency of Saudi Aramco equipment and is hereby released from any such liability.
5. That Saudi Aramco shall not be responsible for any oil pollution damage that may result from the stranding and/or refloating of your vessel and any oil pollution clean-up expenditure that may be incurred shall be the liability of you as Master for the account of the Owners and/or Charterers of your vessel.
6. That in the event that the assistance provided by Saudi Aramco proves to be inadequate to refloat your vessel you will expeditiously arrange and obtain on your own such assistance as may be necessary to refloat your vessel as soon as possible.

7. That Saudi Aramco will move in immediately without further permission other than this letter and take whatever corrective action is deemed necessary to respond to pollution, fire or any other kind of incident that may endanger your ship, Gulf environment or other vessels and facilities in the area, or to effect rescue of endangered people. You as Master and the Owners and/or Charterers of you vessel will be charged for all expenditures incurred by Saudi Aramco for the above services.

DECLARATION BY MASTER

I agree to the terms and conditions set out hereto.

Master ....

SS/MV .... For SAUDI ARABIAN OIL CO.

Date ....

MASTER'S SAFETY DECLARATION
SAUDI ARAMCO Form 8812 (2/84).

I DECLARE THAT WHEN MY VESSEL IS AT BERTH:

1. MOORINGS AND ANCHORS – the vessel will be moored in accordance with the standards of the port and the anchors will be secured in the hawsepipes.
2. TOWING WIRES – towing wires for emergency use will be rigged at the forward and after ends of the vessel in accordance with the standards of the port. The eyes of the towing wires will be maintained at a height of 3 ft. – 6 ft. (one to two metres) above the water at all times.
3. GANGWAYS – the gangway will be tended and maintained in a safe condition throughout.
4. MAIN ENGINES – the main engines will be ready for use at short notice to leave the berth in the event of an emergency condition. A suitable trim will be maintained for the same purpose. At SBM berths the main engines will be on continuous stand-by.
5. DECK WATCH – an effective deck watch will be maintained.
6. COMMUNICATIONS – an effective ship/shore communications system will be agreed to efficiently control the cargo handling and bunkering operations throughout.
7. CARGO, BUNKER AND BALLAST OPERATIONS – the procedures for cargo, bunker and ballast handling operations will be agreed with the Terminal Representative.
8. EMERGENCY SHUTDOWN – the emergency shutdown procedures will be agreed with the Terminal Representative.
9. FIREFIGHTING EQUIPMENT – all firefighting equipment will be ready for immediate use and fire hoses equipped with jet/spray nozzles will be prepared for use one forward and one abaft the manifold.
10. CARGO AND BUNKER CONNECTIONS – cargo and bunker hoses or arms will be inspected to confirm that they are in good condition and correctly connected.
11. SCUPPERS AND DRIP TRAYS – scuppers will be effectively plugged or otherwise secured (except when the vessel is a gas tanker) and drip trays will be in position.
12. UNUSED CARGO AND BUNKER CONNECTIONS – all unused cargo and bunker connections will be effectively blanked.
13. SEA AND OVERBOARD DISCHARGE VALVES – all sea and overboard discharge valves when not in use will be effectively closed and lashed.
14. CARGO BUNKER AND BALLAST TANK LIDS – all cargo, bunker and ballast tank lids will be closed and secured except as may be permitted by the Terminal Representative.
15. VENTING AND INERT GAS
    (a) Venting Agreement – the method by which tanks will be vented during cargo and ballast operations will be in accordance with that contained in the written agreement with the Terminal Representative.
    (b) Flame Arresters – flame arresters will be employed in accordance with the design features of the venting system.
    (c) Ullage Ports – ullage ports will be fitted with efficient flame arresters on every occasion when they are not secured in the closed position.
    (d) Inert Gas – all cargo tanks will be maintained in an inert condition if the vessel is equipped with an inert gas system. In gas tankers the cargo tanks will be inerted and/or purged.
16. HAND TORCHES – hand torches will be in good condition and approved for use in hazardous zones.
17. PORTABLE TRANSCEIVERS – portable UHF/VHF transceivers will be in good condition and certified as being intrinsically safe.
18. RADIO AND RADAR AERIALS – radio transmitting aerials will be earthed and radar scanners will be switched off. The servicing of such equipment will not be undertaken without the permission of the Terminal Representative.
19. PORTABLE ELECTRICAL EQUIPMENT – all portable electrical equipment on deck will be disconnected from the power supply.
20. DOORS AND PORTS AMIDSHIP ACCOMMODATION – all external doors and ports in the amidship accommodation will be closed and every effort will be made to prevent the entry of dangerous gas.
21. DOORS AND PORTS AFTER ACCOMMODATION – all doors and ports in the after accommodation, which overlook or are adjacent to the tank deck or other potentially hazardous zones, will be maintained in the closed position.
22. CENTRAL AIR CONDITIONING – any central air conditioning or fresh air intakes which may permit the entry of petroleum gas will be closed.
23. WINDOW TYPE AIR CONDITIONING UNITS – all window type air conditioning units will be disconnected from the power supply.
24. SMOKING – smoking will be prohibited except in those spaces which have been jointly approved with the Terminal Representative.
25. GALLEY AND COOKING APPLIANCES – the use of cooking appliances wherever situated will require the approval of the Terminal Representative.
26. NAKED LIGHTS – naked lights will not be used on the tank deck or in other hazardous zones.
27. EMERGENCY ESCAPE – provision for emergency escape will be provided.
28. GAS FREEING – gas freeing will not be undertaken under any circumstances.
29. WATER BALLAST – water ballast discharged will be free of oil or any other contaminant which may pollute the waters of the port.
30. REPAIRS – repairs or maintenance of any kind which may produce a source of ignition will not be undertaken without the agreement in writing of the Terminal Representative.
31. BOILER TUBE CLEANING – boiler tubes will not be cleaned and every precaution will be taken to prevent the emission of sparks from the funnel.
32. EMERGENCY SIGNAL – in the event of a fire or other emergency arising, the emergency signal consisting of TEN (10) SHORT BLASTS will be sounded on the ship's whistle.
33. PENALTIES – any failure to observe the safety requirements contained in this declaration will entail the following penalties:
    (a) A suspension of all cargo handling, bunkering and ballast operations, and
    (b) the vessel may be required to vacate the berth until such time as corrective action has been undertaken to the satisfaction of the Terminal Representative.

All infringements will be brought to the attention of the vessel's Owners, Operators and/or Charterers.

MASTER'S SAFETY DECLARATION (TERMINAL RECEIPT)

...................................Master M.V./S.S. ....

BERTH .... DATE .... TIME ....

(C) RAS TANURA TERMINAL

This section gives specific information regarding RAS TANURA TERMINAL which includes Sea Island, North and South Piers and is to be read together with **Part (A) and (B).**
NOTE: Sea Island No. 1 is presently not in use.

LOCATION: The Ras Tanura Terminal, refinery and tank farms are located on a peninsula, the Southern end of which forms a sand spit, the tip of which is officially known as (RA'S) AT TANNURAH.

South Pier: The South Pier is connected to the East side of the peninsula by a causeway and trestle 2,300 ft. in length. The "T" Pier has 4 berths (1 to 4) and is 1,200 ft. long and 105 ft. wide.

North Pier: The North Pier is located about 0.75 miles to the North of the South Pier. This Pier is 2,645 ft. long and 110 ft. wide and comprises 6 berths (6 to 11). Crude oil, products and RLPG are available at North Pier.

Sea Islands: A complex of 4 Sea Islands interconnected by walkways is located approximately 5,600 ft. N.E. of the North Pier. Each of the 4 sea islands consists of 2 berths with a loading station on the platform, 4 to 6 mooring dolphins and 2 to 4 breasting dolphins per berth. The lengths of each pair of berths between outer mooring dolphins are (from South) Sea Island 1, 1,250 ft., Sea Islands 2 and 3, 1,400 ft., Sea Island 4, 1,750 ft.

The berths are numbered from South, on the East side 12, 15, 17, 20, on the West side 14, 16, 18, 19.

The loading stations at each of the Sea Island berths are equipped with steel, hydraulically operating loading arms and all berths are equipped with quick release hooks.

Refrigerated Liquefied Petroleum Gases (R.L.P.G.): Facilities for loading refrigerated liquefied Butane and Propane are located at the North Pier Berths 6, 8 and 10.

PILOTAGE: *Vessel from Arrival Channel:* Pilot will normally board South of Buoy 17 and 18, as advised by Port Radar.

Vessel at Tanker Anchorage: After heaving anchor, the vessel will be advised by Port Radar towards a position approximately 1.5 miles S.E. of the South end of Sea Island dependent on weather and tidal conditions.

Vessels must not approach any closer than 1.5 miles to the piers or Sea Islands without a Pilot on board due to the tidal streams in the area.

Sea Island Pilots: Saudi Aramco maintains Pilots on continuous Duty on the Sea Islands. They are stationed on the Sea Islands by Saudi Aramco to provide marine advice to the Loading Masters, to assist in the safe and efficient mooring and loading of vessels berthed at this facility and carry out emergency unmooring. Masters of vessels may contact the Sea Island Pilot through the Pier Operator or by calling the Ras Tanura Pilot Office on VHF Channel 16. Masters of all vessels berthed at the Sea Islands are encouraged to discuss any vessel-related problems with the Duty Sea Island Pilot.

Informing Pilots of Finishing Time: As an aid to planning and expediting ships' movements and also to give adequate notice to vessels scheduled to berth, vessels loading at the berths in Ras Tanura shall call the Ras Tanura Pilot Office on VHF Channel 16 one hour before completion of loading.

INBOUND TRAFFIC PROCEDURE: (See Part B) – "Traffic Regulations".

Vessels proceeding direct to Ras Tanura Terminal: As per Inbound Traffic Procedures in Part (A) "Navigation" to the Entry Buoy and following the separation scheme to Buoys 17 and 18 according to advice from Port Radar and Pilots either to anchor in the Ras Tanura Tanker Anchorage or to berth on arrival.

From Northern Holding Anchorage to Ras Tanura Terminal enter the separation scheme under the advice of Port Radar and follow the channel as above.

Maximum Draft in Arrival Channel: The maximum draft for transit of channel immediately South of Buoy No. 5 is 16.46 m. plus predicted rise of tide up to a maximum draft of 18 m.

See "Berthing – Depths of Water at Berths".

Masters of vessels arriving partly loaded or in deep ballast should navigate with caution in the vicinity of Channel Buoys No. 5 and 7.

From East Holding Anchorage and East Channel: Follow the buoyed route to RTE 7 and RTE 8. Turn North into the Tanker Anchorage at Port Radar and Pilot's advice.

East Channel Caution: It is recommended that vessels of over 800 ft. (244 m.) length or 35 ft. (10.67 m.) draft do not use the East Channel.

Sea Islands' Submerged Pipe-lines: All traffic must pass East of the Sea Islands due to the existence of numerous submerged oil pipelines between all of the Sea Islands and the shore.

Abu Safa Submerged Pipe-line: All vessels are urged to navigate with caution between Channel Buoys 9 and 11 in the arrival channel and are forbidden to drop anchor in their vicinity due to the existence of the submerged oil pipeline which crosses the channel.

ANCHORAGES: *Tanker Anchorage:* The Tanker Anchorage lies approximately 2 miles East of the Sea Islands and is used as a final holding area for vessels which have immediate berthing prospects or for vessels awaiting cargo clearance, release, sailing documents, etc. and whose draft does not exceed 60 ft. (18.3 m.). Under normal circumstances, no more than 10 vessels are allowed to use this anchorage at one time.

Freighter Anchorage: This anchorage, South East of the "SPIT" buoy is used as holding ground for coastal tankers intended to load at South Pier and miscellaneous small vessels and craft inbound for Saudi Aramco Marine facilities at the West Pier.

Deep Draft Anchorage: Vessels whose draft is 60 ft. or more and which are required to anchor upon completion of loading must normally do so in the area approximately 0.7 miles North of the Sea Islands. This anchorage has a swept depth of 72 ft. (21.9 m.) and holding ground is only considered fair due to variations in character of the bottom. It is recommended that vessels lie to a long scope of chain in adverse weather. No more than 2 vessels are allowed to use this anchorage at one time.

RADIO: COMMUNICATIONS WITH THE TERMINAL.

Under Way: At all times when under way in the arrival channel and anchorage areas with no Pilot aboard, vessels must watch VHF Channel 10 to keep in contact with Port Radar.

At Anchor: A good listening watch should be maintained on VHF Channel 16. Vessels will be called by Ras Tanura Pilots with berthing and other information and instructions. Port Radar should be called on VHF Channel 10 prior to heaving anchor.

Under Pilotage: Pilots carry portable, intrinsically safe radios which operate on Saudi Aramco dedicated mooring Channels for contact with tugs and jetty staff. In addition, the vessel's VHF Radio should stand by on Channel 13 for back up communication.

At Berth: An exchange of intrinsically safe portable radios will be made between vessel and jetty personnel in order to assist constant communication whilst loading.

BERTHING: *Mooring Procedures:* Mooring boats are not used at Ras Tanura Terminal.

Vessels should have heaving lines ready to take the shore messenger after landing alongside. The messenger is then made fast to the ship's mooring line which is hove ashore by means of a capstan. Heavy wires should be sent one by one and ropes two at a time. Jetty crews are on duty continuously to handle mooring lines. Mooring lines on board vessels will not be handled by Saudi Aramco Personnel.

BERTHING FACILITIES:

Safe Loading Depths: If at any time a vessel's draft approaches to within about 3 ft. (1 m.) of the depth of water at the berth at North and South Piers, loading will be suspended until a rising tide increases the depth to permit resumption of loading and provide for a safe draft of the fully loaded ship on departure.

At the Sea Island Berths, the maximum sailing draft is 19.48 m. plus the height of tide at the time of transitting the Deep Water Channel.

Depths of Water at Berths:

Pier	*Berth* No.	*Depth at LAT* (m.)	*Max. Draft Arrival* (m.)	*Max. Draft Sailing* (m.)
South Pier	1	10.1	9.0	9.1+tide
	2	10.1	9.0	9.1+tide
	3	10.1	8.0	9.1+tide
	4	9.0	8.0	8.0+tide
North Pier	6	14.2	13.2	13.1+tide
	7	12.0	8.84	11.0+tide
	8	14.8	13.8	13.8+tide
	9	13.0	8.84	12.0+tide
	10	15.0	14.0	14.0+tide
	11	14.5	8.84	13.5+tide
Sea Islands	12 14 15 16 17 18 19 20	26.0	17.98	19.48+tide

Gangways: At North and South Pier, all vessels are required to provide their own gangways which should be ready prior to berthing.

At the Sea Islands, shore gangways are provided at each berth.

LOADING:

	Berth No.	*Product*	*Manifold Size* (in.)	*Maximum Loading Rate* (bbls.p.h.)
Sea Islands	12 to 18	Crude	16	40,000 to 280,000
	19 and 20	Crude	16 to 24	
	12 to 18	Bunker Fuel Oil	10	12,000
	12 to 18	Bunker Diesel	10	900
	19 and 20	Bunkers	12 to 16	12,000
North Pier	6 to 11	Crude	12	15,000 to 90,000
	6 to 11	Fuel Oil (Cargo)	12	12,000 to 22,000
	8, 9, 10	White Diesel	12	12,000
	8, 9, 10	Kerosene	12	6,500
	6 to 10	Naphtha	12	30,000
	6 to 11	Bunker Fuel Oil	8	5,000
	6 to 11	Bunker Diesel	8	1,200
	6, 8, 10	RLPG	12	30,000
South Pier	1 to 4	Fuel Oil (Cargo)	8	12,000 to 15,000
		Black Diesel (Cargo)	8	5,000
		White Diesel	8	8,500 to 15,000
		Gasoline	8	6,000
		Kerosene	8	6,500
		Jet Fuel	8	10,000
		Bunker Fuel Oil	6	5,000
		Bunker Diesel	6	1,200

Notes:

1. All vessels calling at Ras Tanura Terminal should be equipped with reducers to fit these loading connections which all have 150 lb. ASA flanges. These reducers should be fitted before berthing to help expedite ship turnaround time.

2. It is expected that most vessels will be able to accept any cargo as fast as it can be delivered. Officers in charge of loading must have due regard for all safety precautions as well as for individual vessel hazards.

If loading of crude or products is too slow, Saudi Aramco will so advise the vessel.

Should a demurrage claim be filed against Saudi Aramco, the slow loading rate may result in an addition to allowed lay time.

3. Special regulations govern the acceptance and loading of Liquefied Petroleum Gas tankers in the Port of Ras Tanura. (See GASRUL 9:83).

4. The following types of crude oil are available at Ras Tanura Terminal: ARABIAN BERRI (sometimes incorrectly referred to as Light Extra Light) CRUDE, ARABIAN LIGHT CRUDE, ARABIAN MEDIUM CRUDE, ARABIAN HEAVY CRUDE.

Loading arm connection: Jetty crews are on duty continuously to handle hoses/arms and will make connections and disconnections.

All loading connections are equipped with electrical insulating flanges therefore ship to shore bonding cables are not required.

Loading procedures: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by the ship's officer.

It is the responsibility of the vessel to advise shore personnel to shut down cargo and bunker loading when the vessel's cargo and bunker requirements are met.

Upon completion of loading the vessel will normally be required to leave the berth immediately after disconnecting hoses/arms to await clearance in the Tanker Anchorage.

Cargo Calculations and Release: The American system of cargo measurement in BARRELS with temperatures in fahrenheit degrees according to the ASTM – I.P. is used by Saudi Aramco and the Saudi Arabian Government for Cargo measurement purposes. Ships cargo loaded figures should be available in these units. Generally, if the difference between average normal ship measurement and official cargo measurement is satisfactory the ship will be released to sail by Saudi Aramco under E.D.P. Unusual differences will be investigated by Saudi Aramco while the vessel waits in the Tanker Anchorage.

BALLAST: *Arrival Ballast Condition:* Vessels arriving at Ras Tanura Terminal shall retain sufficent clean water ballast on board to permit safe handling of the vessel in the prevailing weather conditions. A maximum stern trim of 15 ft. with the propeller just covered is recommended.

Ballast pumping equipment should be ready to commence discharging ballast as soon as the vessel is secured in the berth.

DEPARTURE: See "Inbound Traffic Procedure" – East Channel Caution.

Deep Water Departure Channel: Has a clear swept depth of 21 m. at LAT.

Maximum departure draft from Ras Tanura Piers and Sea Islands is 19.48 m. plus predicted rise of tide so that there is a minimum keel clearance of 1.52 m. maintained during transit of Departure Channel. (See Saudi Aramco form "Maximum Sailing Draft – VLCC, 1st March 1986").

Departure Pilotage: On departure from Ras Tanura, Masters of vessels 150,000 d.w.t. and above with draft of 60 ft. (18.28 m.) or more, may request additional pilotage assistance to line up for the Deep Water Departure Channel. Such pilotage assistance is compulsory for vessels with a draft of 68 ft. (20.73 m.) or more. In such instances the Harbour Pilot will remain on board until the vessel is aligned on a safe course for the Departure Channel, provided the Pilot can disembark safely. In certain cases it may be possible to arrange for the Pilot to leave by helicopter (See Part "A" – Helicopter Operation). The additional pilotage is also available when it is necessary for a VLCC to proceed to anchor to await a favourable tide or other reasons. The Pilot will remain on board until the vessel arrives in the anchorage, however, the Master will be responsible for the actual anchoring of the vessel. During adverse sea and weather conditions, a proper lee must be made so as to allow the Pilot to safely disembark.

Vessel proceeding from Ras Tanura Terminal to Northern Holding Anchorage: The vessel should leave Ras Tanura Terminal and follow the Departure Channel observing the separation scheme to the Northern Holding Anchorage under advice of Port Radar.

SEE Part "B" TRAFFIC REGULATIONS

The vessel should advise Ras Tanura Pilots of its anchoring time.

REPORT: *More stringent safety checks:*

Quote:

Due to recent accidents involving tankers at terminals, Saudi Aramco have tightened up their safety checks and closely follow the issued safety regulations.

Saudi Aramco, as terminal operator of Ras Tanura/Ju'aymah, inspect all vessels before loading. Anything found not up to the standard of guidelines and recommendations compiled by Oil Companies International Marine Forum are noted, the Master is given a letter of protest, and the Owner is advised to correct deficiencies. At the same time all remarks and recommendations are computer-stored for easy access in the future.

Saudi Aramco have found that many recommendations are neglected and some vessels are repeatedly given the same remarks.

To prevent this, new actions are being taken by Saudi Aramco. Vessels which in the past have received recommendations and not followed the same have recently been refused permission to load at Ras Tanura/Ju'aymah.

That a vessel was allowed to load at her last call is not a guarantee that she will be allowed again.

Unquote.

Further to the above, we have been advised that since these deficiency letters do not allow these vessels to berth at the Ju'aymah Terminal's SBMs, vessels will be diverted to either of the three suitable berths at Sea Island. Time lost from berth available at Ju'aymah to berth available at Sea Island will be on the vessel's account.

This will affect vessels between 200,000 d.w.t. – 275,000 d.w.t.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Saudi Riyals (SR).

YANBU (See Plan)

(A) COMMERCIAL PORT: 24.05 N. 38.03 E.
(B) INDUSTRIAL PORT: 23.57 N. 38.13 E.

NOTICE: British Admiralty Notice No. 3553(P)/86.

Red Sea – Saudi Arabia, West Coast – Madinat Yanbu As Sinaiyah – King Fahd Port – New Approach Channel.

1. A new Southern Approach Channel for vessels calling at King Fahd Port, Madinat Yanbu As Sinaiyah, opens to shipping on 1st December, 1986. Pilotage is compulsory for all vessels using this channel.

2. The following have been established:

	Feature	*Position*
(a)	Yanbu South Light, Fl. W.R. 10 sec. 34 m. 20/17 M. (Red/white circular tower with radar reflectors) and radar beacon Racon (B).	23° 28.13' N., 38° 25.52' E.
(b)	Starboard-hand light beacon with topmark, Fl. (3) G. 10 sec. 12 m. 8 M. S3.	23° 31.02' N., 38° 29.90' E.
(c)	Port-hand light beacon with topmark, Fl. (4) R. 12 sec. 12 m. 8 M. S6.	23° 38.38' N., 38° 25.16' E.
(d)	Starboard-hand light beacon with topmark, Fl. (4) G. 12 sec. 12 m. 8 M. S7.	23° 41.17' N., 38° 28.64' E.
(e)	Blue/White striped beacon with radar reflector, SR1.	23° 31.65' N., 38° 25.92' E.
(f)	Blue/White striped beacon with radar beacon, SR2 Racon (TG).	23° 34.66' N., 38° 27.71' E.
(g)	Blue/White striped beacon with radar beacon, SR3 Racon (X).	23° 42.86' N., 38° 23.22' E.
(h)	White cardinal pillar light-buoy, Q(9), 15 sec. S1.	23° 26.30' N., 38° 29.22' E.
(i)	Port-hand can light buoy with topmark, Fl. (2) R. 5 sec. S2.	23° 27.96' N., 38° 25.86' E.
(j)	Port-hand can light buoy with topmark, Fl. (2) R. 10 sec. S4.	23° 34.55' N., 38° 28.22' E.
(k)	White cardinal pillar light buoy Q(9) 15 sec. S5.	23° 35.31' N., 38° 31.41' E.
(l)	Port-hand can light buoy with topmark, Fl. R. 5 sec. S8.	23° 44.47' N., 38° 23.15' E.
(m)	Starboard-hand conical light buoy with topmark, Fl. G. 5 sec. S9.	23° 45.46' N., 38° 25.25' E.
(n)	N. cardinal pillar light buoy, Q. S10.	23° 49.08' N., 38° 17.82' E.
(o)	Starboard-hand conical light buoy with topmark, Fl. (2) G. 10 sec. S11.	23° 51.15' N., 38° 19.44' E.
(p)	Pilot boarding place.	23° 26.60' N., 38° 27.20 E.

Charts Affected: 63, 4704, 4071.

Light List Vol. E/86, 6050.63 and (Remarks), 6050.64 and (Remarks).

Admiralty List of Radio Signals, Vol. 2, 1986: 8511.2, 8511.4, 8511.6.

Saudi Ports Authority Notice "A" 170/86. (H. 2579/79).

NOTICE: The following is taken from the Saudi Port Authority's Circular Telex No. SEAPA-26255/95, dated 15th June 1995:

"The pilot boarding stations, the compulsory pilotage area and the separation scheme in the Southern approaches have been revised as follows:

1. *Northern Approaches:*

Outer Pilot Station: Has been moved 1.5 miles on bearing 246° to new position Lat. 24° 02' N., Long. 37° 44' E.

Inner Pilot Station: New station has been established in position Lat. 24° 05' N., Long. 37° 55' E.

2. *Southern Approaches:*

Outer Pilot Station: In position Lat. 23° 26.6' N., Long. 38° 27.2' E.

Inner Pilot Station: New station has been established in position LAt. 23° 50' N., Long. 38° 19' E.

3. *Compulsory Pilotage Area:*

The inner approaches to Yanbu port included within the following borders:

Northern Border: A line from Shib Ash Sharm (Schermo) Beacon (Lat. 24° 03' N., Long. 37° 51.5' E.) on a bearing of 065° to the coast at Lat. 24° 06.7' N., Long. 37° 59.3' E.

Southern Border: A line from S10 Buoy (Lat. 23° 49.1' N., Long. 38° 17.8' E.) on a bearing of 044° to the coast at Lat. 23° 52.6' N., Long. 38° 21.6' E.

4. *Extension of South Traffic Separation Zone:*

The Southern separation zone has been extended from position Lat. 23° 45' N., Long. 38° 24.2' E. to position Lat. 23° 52' N., Long. 38° 16.3' E. The zone extends for 1.5 cables (279 m.) on either side of the line joining these positions.

5. *Arrivals and Departures:*

Vessels proceeding to the Port of Yanbu shall advise their ETA at the Outer Pilot Stations and shall await instructions from King Fahd Port Control before proceeding to the Inner Pilot Station.

The Pilot will generally board and disembark at the Inner Pilot Station. Pilotage may be arranged from the Outer Pilot Station, but only with prior notice given well in advance. The actual position of Pilot boarding and disembarking shall remain at the discretion of the port."

(A) COMMERCIAL PORT

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: Yanbu Commercial Port is on Red Sea coast, about 168 nautical miles N.N.W. of Jeddah.

PORT LIMITS:

Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Lat. 24° 06' 00" N.	Long. 38° 00' 00" E.
Lat. 24° 06' 00" N.	Long. 37° 57' 30" E.
Lat. 24° 03' 30" N.	Long. 37° 57' 30" E.
Lat. 24° 03' 30" N.	Long. 38° 05' 30" E.

CHANNEL: Ships entering port pass through a channel of the following measurement: Length 1,647 m., width 200 m.

BEACONS:

1. Schermo Beacon: A Racon is established on Schermo Reef in position: Lat. 24° 03' 20" N., Long. 37° 51' 60" E. Code letter "Y".Cycle: 75 seconds. Range: Approximately 12 nautical miles.

2. Entrance Beacons: Two Beacons, 1 & 2 at entrance of port channel. Height: 4.0 m. Range: 5 nautical miles.

Beacon No. 1: Starboard – hand beacon (Green), green flash every second (Q.G.).

Beacon No. 2: Port – hand beacon (Red), red flash every second (Q.R.).

Beacon No. 6: 795 m. from channel entrance on port side there is another beacon height 4.0 m. (Red), red flash every second (Q.R.) Range: 5 nautical miles.

APPROACHING: A cement factory has been established in position Lat. 24° 16.1' N., Long. 37° 33.2' E.

The factory provides a strong radar echo and emits a very bright glo at night.

It has been reported that this has confused seafarers who have take it for the town of Yanbu.

Seafarers are strongly advised to amend their sea charts according

Masters proceeding to Yanbu Commercial Port should follow stric the Channel and traffic separation scheme as clearly as delineated formal charts in force (e.g., British Admiralty Charts 327 and 328.)

The Ports Authority, Kingdom of Saudi Arabia, advise that shi proceeding outside the Approach Channels, or contravening the Rul of the Traffic Separation Scheme in order to save time, will be fined a the Masters held individually responsible.

BUOYS: Channel is buoyed with red and green port and starboard-hand buoys.

Starboard-hand buoys: 7 buoys, odd number: 1A, 3, 5, 7, 9, 11, & 13. Buoy shape: Cone. Light characteristic: Green flash every 2 seconds (Fl. G. 2 secs.).

Port-hand Buoys: Number of buoys: 2, even numbers: 4, 8. Buoy shape: Can. Light characteristic: Red flash every 2 secs (Fl. R. 2 secs.).

DOCUMENTS: All ships bound for Yanbu Commercial Port should have the following documents prepared for the relevant authorities and the original certificates as specified ready for inspection by the Port Authority's Boarding Officer.

Crew List, original plus 4 copies.
Passenger List, original plus 4 copies.
Personal Effects of Crew, original plus 1 copy.
Vaccination List, original plus 1 copy.
Marine Health Declaration, original plus 1 copy.
Israel Boycott Declaration, original plus 2 copies.
Ship's Stores List, original plus 1 copy.
Logbook.
Certificate of Registry.
Certificate of Classification.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio & Wireless Certificate.
Cargo Gear Certificate.
Derat Certificate.
Port Clearance – Last Port of Call.

PILOTAGE: Pilotage is compulsory. Vessels bound for Yanbu Commercial Port should call Yanbu Port Control on VHF Channel 16 at least 2 hours prior to arrival.

North Channel: Pilots will normally board in position Lat. 24° 02' N., Long. 37° 44' E. Pilot boats are painted orange with "Pilot" written in black on white superstructure.

Vessels should exhibit international code flag "G" by day or flash "G" by night. On approaching the Pilot Boarding Area, a pilot ladder should be rigged, reaching approximately 1 m. above sea level. Vessels should ensure a good lee for boarding of the Pilot.

South Channel: Ordering of Pilotage Service for Vessels Arriving at the South Channel: Due to the extra length of the South Channel compared to the North Channel, the Port Control Tower will require 5 hours notice prior to pilot boarding time at the South Pilot Station. Requirements for the North Pilot Station remain unchanged.

Way Points in South Channel: You are informed that the following way points are now established in the South Channel for use with the Control Tower and movement of vessels within the South Channel:

South Pilot Station	23° 26.6' N., 38° 27.2' E.
S-1	23° 34.3' N., 38° 29.6' E.
S-2	23° 46.2' N., 38° 23.4' E.
CSZ	23° 52.0' N., 38° 16.8' E.

Also see "Notices" before Section A.

ANCHORAGES: There are no areas suitable for the safe anchorage of vessels in the vicinity of Yanbu Commercial Port.

RESTRICTIONS: The port is open 24 hours per day and vessels may enter and leave port at any time.

MAX. SIZE: There is no restriction as to length or breadth of vessels but a draft restriction of 34 ft. is in force for all vessels to all berths other than those cement vessels nominated specifically for discharge at Berth No. 3 or No. 9 where a 36 ft. draft limit is allowed.

HEALTH: Quarantine formalities are effected after vessels are berthed except in the case of passenger/pilgrim vessels which will be anchored inside the harbour for quarantine and immigration clearance.

RADIO: Vessels bound for Yanbu from the North should route their ETA cables through Port Said Radio.

Vessels bound for Yanbu from the South should route their ETA cables through Bahrain Radio.

ETA cables are transmitted to the local Saudi PTT Yanbu Office and thence distributed to concerned parties by telex.

VHF: Yanbu Port Control keeps a radio watch on Channel 16 VHF, 24 hours per day. VHF Channels 14, 12 and 9 are available for standard communications. VHF Channel 14 is normally used by Pilots and tugs for manoeuvring purposes.

RADAR: There is no port radar facility at Yanbu Commercial Port.

TUGS: Tugs normally meet incoming vessels off Channel Buoy No. 8 abeam of the port Coast Guard station. Tugs' lines are used for berthing and unberthing operations.

Tugs range from 800 h.p. – 2,500 h.p.

BERTHING: The following categories of berth, with a draft range from 10.0 m. to 12.0 m. are available: Bulk Cement, Bulk Grain, Ro-Ro (stern to), General Cargo and Passengers.

Storage: Adequate covered and open storage space is available in the form of warehouses, transit sheds, container freight stations, vehicle parks.

CARGO HANDLING EQUIPMENT: Mobile cranes of up to 200 tons capacity are available.

40 tons tower cranes are equipped with container spreaders. One crane is equipped with container lifting capacity 70 tons.

Head trucks, Mafi trailers, container handlers up to 35 tons, forklifts up to 25 tons are available.

BULK HANDLING FACILITIES: *Bulk Cement Terminal:* One Bulk Cement Berth with an annual capacity of about 1 million tons is available. *Bulk Grain Units:* Mobile discharging machines with handling capacity 200 t.p.h./machine, no bulk storage facility. Bulk grain is normally handled at Berth No. 5 and Berth No. 8.

STEVEDORES: Contracted for an integrated cargo handling operation, and work continuously 24 hours per day, 7 days per week.

MEDICAL: Assistance can be given by local general hospital and/or by a small private clinic via the Agents.

No vaccinations are required, but Malaria precautions are recommended.

DENSITY: 1025.

FRESH WATER: Available via mains direct to berth at a delivery rate of approximately 25 t.p.h. Costs as per current tariff.

CONSULS: At Jeddah.

REPAIRS: No facilities, however minor repairs are possible in local workshops via the Agents.

DRY DOCK: Not available.

SURVEYORS: Available via Jeddah.

GANGWAY/DECK WATCHMEN: Service not necessary and not available. Port area is fenced and guarded by Saudi Arabian Coast Guard, and guards are posted on each individual vessel in port.

HATCHES/CARGO GEAR: To vessel's advantage if all hatches and gear are prepared by ship's crew, however stevedores do assist.

CUSTOMS ALLOWANCES: In all Saudi Arabia, possession of any alcoholic beverages is strictly prohibited.

AIRPORT: Regular flight service on direct flights to Jeddah and Riyadh by Saudia. Other Saudi destinations and international destinations via Jeddah and Riyadh.

Yanbu domestic airport is located approximately 15 km. from the port.

TIME: GMT plus 3 hours.

HOLIDAYS: Public holidays do not affect port's activity. But all government offices, banks, etc., are closed to the public during Ramadan and Haijh holidays which change annually by the Higirian calendar.

TELEPHONE NUMBERS:

Police (Coast Guard):	Ext. 1000
Fire	Ext. 1313
Ambulance – via Port Safety	Ext.1026/7
or Traffic Department	Ext.1317

TELEPHONES: There are pay phones in the port.

SERVICES: Services like tank cleaning, etc., are not available.

SHORE LEAVE: By Agent's request permitted.

IDENTIFICATION CARDS: Seamen's Discharge Books are sufficient.

REGULATIONS: Refer to Rules and Regulations for Seaports issued by the Co-operation Council for the Arab States of the Gulf, 1985.

DEVELOPMENTS: Future port developments include an additional 7 berths and a control tower. No time has yet been fixed for implementation of these projects.

AUTHORITY: Yanbu Port Management, P.O.Box 1019, Yanbu Port, Yanbu, Al Bahr, Saudi Arabia. *Tel:* (04)322 1163, 322 2470. *Telex:* 661005 Port SJ and 661096 Port SJ. *Cables:* Ports Yanbu (via Port Said or Bahrain). *Contact:* Abdul Rahman Ahmad Al-Khateeb, Port Director-General.

AGENT: See Section (B).

(B) KING FAHD INDUSTRIAL PORT, YANBU

At present the King Fahd Industrial Port consists of 7 Terminals listed as follows:

Crude Oil Terminal
NGL Terminal
Yanbu Petromin Refinery Terminal
Petromin – Mobil Refinery – PEMREF
Al Muajjiz Terminal
General Cargo and Container Terminal
Bulk Terminal

PORT LIMITS: Seaward boundaries of King Fahd Industrial Port are enclosed by the following boundaries:

1. Lat. 24° 03.50' N., Long. 38° 05.50' E.
2. Lat. 24° 03.50' N., Long. 38° 02.00' E.
3. Lat. 24° 07.00' N., Long. 37° 53.67' E.
4. Lat. 24° 07.00' N., Long. 37° 45.00' E.
5. Lat. 24° 01.50' N., Long. 37° 45.00' E.
6. Lat. 23° 50.00' N., Long. 38° 12.00' E.
7. Lat. 23° 25.00' N., Long. 38° 20.00' E.
8. Lat. 23° 25.00' N., Long. 38° 40.00' E.

Thence along the coast to No. 1 (above).

FLAG: Every vessel entering King Fahd Industrial Port at Yanbu must hoist the Flag of the Kingdom of Saudi Arabia from the foremast and keep it flying *at all times* throughout the vessel's stay in Port. The Flag of the Kingdom of Saudi Arabia is to be in good condition and is properly displayed when the Arabic writing appears at the top and the sword at the bottom.

DOCUMENTS: Also see "Radio".

Arrival Documentation Requirements: The Rules and Regulations for Seaports specify that Masters must present or make available for inspection the following papers and documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load-Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Cargo Gear Certificate.
Maritime Health Declaration.
Vaccination List.
Derat Certificate.
Clearance from last Port of call.
Israel Boycott Declaration.
Ship's Stores List.
Grain Shipping Certificate if the vessel is carrying a grain shipment.
Mail Transport Documents in accordance with the "International Postal Treaty" if any mail is carried aboard.
5 copies of the Crew List including name (first and last name – initials are not acceptable), nationality, date and place of birth, Passport number, port of embarkation, port of disembarkation.

2 copies of the List of Personal Effects of crew and passengers.
5 copies of the Passenger List including name, nationality, date and place of birth, passport number, port of embarkation, port of disembarkation.

In addition, the Rules and Regulations for King Fahd Industrial Port require that the Oil Record Book and the Certificate of Fitness (in cases of gas and chemical carriers) are available for inspection.

CLEARANCE: *Basic Procedure for Clearing a Ship:* On arrival of the ship at anchor or berth, and given that all the pre-entry requirements have been fulfilled, the ship will be boarded by the following for completion of the required formalities:

Immigration Authorities.
Coast Guard.
Port Health Officer.
Customs Officer.

In the case of dry cargo vessels, on completion of these formalities, the Agent will collect the discharge permit from the Customs Authorities, having provided a copy of the manifest well in advance. The Customs Authorities then issue a Discharge Permit, one copy of which is given to the stevedores while the other is given to Port Management.

Basic Procedures for Clearing a Ship Outward: When a vessel completes cargo, the Agent is responsible for issuing a letter of notification to the Customs Authorities. The letter is endorsed by the Customs and copies given to the following:

(i) Immigration Department.
(ii) Criminal Investigation Department.
(iii) Yanbu Port Authorities.
(iv) Intelligence Department.
(v) Coast Guard.

The Coast Guard issues a letter to the Quarantine Department, in their capacity as Port Health Authority stating:

(i) They have received the clearance letter from Customs.
(ii) The vessel's name.
(iii) The vessel's flag.
(iv) The name of the Agent.

and requesting them to issue the Departure Permit.

The Departure Permit, duly signed and stamped, is taken to the Immigration Department who will dispatch one of their Officers to the vessel. This Officer checks the Crew List against the Passports and obtains assurances from the Master that the crew is the same as on arrival, apart from any agreed repatriation, and that no crew member has been involved in any mishap. Once the Immigration Officer is satisfied he gives one copy of the Departure Permit to the Master and one copy to Port Management, concluding the formalities.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is available at the crude oil terminal and should be requested through the ship's Agent.

PILOTAGE: *Instructions to Vessels and Conditions of Use of all Berths within King Fahd Industrial Port:* When the Pilot boards an inward bound vessel he will present the Master with a letter "Instructions to Vessels and Conditions of Use of all Berths within King Fahd Industrial Port". The Master is required to sign the letter, acknowledging receipt and agreeing to the Instructions and Conditions contained therein prior to entry into the Port. No vessel will be allowed to proceed into the Port until this letter has been signed.

Pilotage: Pilotage is compulsory for all vessels entering, navigating within, or leaving the port limits of King Fahd Industrial Port.

Orders for Pilots must be received at least 5 hours before their services are required.

Vessels under 150 n.r.t., pleasure craft, vessels operated by the Saudi Arabian Government and the SEAPA and any craft employed solely within the port limits are exempt from Pilotage. These vessels must keep clear of the fairway.

There are two pilot boarding positions, one off Schermo Reef Lt. (Lat. 24° 02.0' N. Long. 37° 44.0' E.) and the other off Yanbu South Lt. (Lat. 23° 26.6' N. Long. 38° 27.2' E.), as shown on charts. Pilots will embark and disembark from twin screw, steel pilot vessels. When approaching the pilot boat the Master of every vessel must reduce speed to a minimum for steerage way, maintain VHF contact with the pilot boat, and provide a good lee.

Every vessel picking up a Pilot must have rigged and ready for use a safe, clean, properly secured pilot ladder or combination of gangway and pilot ladder. The Pilot boarding arrangements must comply with the current IMO codes of practice concerning pilot boarding. A lifebuoy, with lifeline attached, and a boat rope must be provided ready for immediate use, and, in addition, between sunset and sunrise the pilot boarding area must be well illuminated. The rigging of pilot ladders and the embarkation and disembarkation of pilots must be supervised by a responsible deck officer.

Any vessel which overcarries a Pilot to another Saudi Arabian Port, must pay all repatriation expenses. Under no circumstances may a Pilot be overcarried to a Port outside the Kingdom of Saudi Arabia, due to visa restrictions. If weather, or other conditions preclude the disembarkation of a Pilot from a vessel, bound to a Port outside the Kingdom of Saudi Arabia, then that vessel will be delayed, at the vessel's expense, until such time as disembarkation is possible. Any such vessel so delayed may arrange, at their own expense, for the Pilot to be disembarked by helicopter.

The length of Pilotage from the Schermo Pilot boarding position is approximately 33 miles, with a minimum surveyed depth of 32 m. and from the Yanbu South boarding station about 37 miles, with a minimum surveyed depth of 41 m. In general, channel depths are rarely less than 100 m. and in places exceed 400 m.

Also see "Section A" and "Notices" before "Section A".

Shipmaster's Report: September 1995.

When coming from the South, Pilot now usually embarks near the Inner South Entrance Pilot Station.

The Pilot disembarks even earlier, after passing Buoy No. 18.

The Pilot will only board at Outer South Entrance on special request, and with plenty of advance notice from the Agent.

APPROACHES: Masters of deep draft vessels will be aware that there are extensive unsurveyed areas between the main shipping lanes and the approaches to Yanbu. Two approach corridors to the present pilot boarding area off Schermo Reef were surveyed early in 1981. The Northern approach corridor, some 48 miles long and 3 miles wide extends in a Westerly direction from just West of Schermo Reef, at approximately Lat. 24° 03' N., Long. 37° 45.2' E. to Lat. 24° 04' N., Long. 36° 53' E. Depths range in general from 650 m. inshore to 950 m. offshore, but two isolated domes were discovered with least depths of 132 m. and 184 m. at approximately Lat. 24° 04' N., Long. 37° 36' E. and Lat. 24° 07' N., Long. 37° 36' E. respectively.

The Southern approach corridor some 43 miles long and 3 miles wide extends in a South-Westerly direction from just West of Schermo Reef at approximately Lat. 24° 03' N., Long. 37° 45.2' E. to Lat. 23° 22.5' N., Long. 37° 28.5' E. No hazards were discovered with depths generally 650 m. inshore to 790 m. offshore.

The surveyed approach corridor for the South Pilot station runs in a Northeasterly direction to Yanbu South Lt., a distance of some 40 miles with a width of 3 miles. Depths obtained are in the range of 550 m. to 780 m.

ANCHORAGES: The bearing and distance shown below is calculated *from Beacon 2C* and indicates position of the anchoage.

Anchoring Points	*Beacon 2C Bearing*	*Distance*	*Max. Draft*
N1	101°	1.06 miles	15.0 m.
N2	110°	1.26 miles	16.0 m.
N3	098°	1.56 miles	22.0 m.
N4	117°	1.80 miles	22.0 m.
N5	123°	2.15 miles	22.0 m.

Anchorages "N4" and "N5" will be utilised for fully laden VLCCs.

Masters of vessels are advised of the following conditions for the use of the anchorage:

1. No repairs of any kind are permitted at the anchorage unless authorised by the Harbour Master.
2. Main engines to be in a state of readiness at all times to leave the anchorage at short notice.
3. A continuous listening watch on VHF Channel 16 should be maintained.
4. Anchor watches to determine vessel's anchor position at reasonable intervals is recommended.

There are no anchorages considered suitable for deep drafted vessels without local knowledge in the vicinity of either Pilot Boarding Station. In any case, vessels not cleared to enter King Fahd Industrial Port are required to remain outside the territorial waters of Saudi Arabia.

An inner anchorage has been established approximately one mile S.W. of the Port Control Tower (27° 57.4' N., 38° 13' E.) within the Controlled Navigation Zone of the port. Five vessels can be accommodated in this anchorage. The minimum depth in the anchorage is 35.0 m. and the holding ground is considered to be good. A SEAPA Pilot will conduct vessels to a designated anchorage position on request.

RESTRICTIONS: *Equipment Requirements:* No vessel shall navigate within the Port, unless the vessel complies with the following equipment requirements:

Efficient VHF Radio Telephone capable of working on the Port frequencies.
Efficient steering gear with fully operational rudder and helm indicators.
Efficient working radar.
Efficient propulsion both ahead and astern and fully operational tachometer.
Both anchors capable of being let go and capable of being raised by the vessel.
Efficient winches and adequate mooring gear to secure the vessels safely, and an efficient mooring stations communication system.
Sufficient crew on board at all times to operate the vessel safely and efficiently and all officers properly qualified and certificated as required by the flag nation.
All secondary power or mechanical systems on the vessel to be in operation and immediately available in the event of failure of any primary system.

If any vessel cannot comply with any of the requirements listed above King Fahd Industrial Port Control must be advised prior to arrival or departure. The vessel will then be subject to inspection and possible delay. Failure to comply or to notify King Fahd Industrial Port Control may result in the vessel being fined or refused entry to the Port or both.

Permission to Enter the Port: All Masters of sea going vessels must have prior permission of the King Fahd Industrial Port Control to enter the Port. Such permission may be subject to special restrictions or conditions i

The vessel arrives before or after the given ETA.
The vessel is in danger of sinking.
The vessel or its cargo is on fire or if there is any possibility of a fire or if after a fire it is uncertain whether that fire is completely extinguished.
The vessel is overloaded or, on account of the condition of the cargo, the vessel is dangerous or has deck cargo which extends beyond her sides.
The vessel has been involved in a collision or has grounded.
The vessel is leaking.
The vessel has a list.
The vessel is in an unstable condition.

Draft Requirements: Vessels will not be permitted entry to the Port unless they arrive at a draft consistent with safe manoeuvring and reasonably trimmed, to the satisfaction of the Pilot.

RADIO: *ETA Requirements:* In addition to the Pre-Arrival Information Requirements below, further notification of ETA is required 5 days, 72 hours, 48 hours and 24 hours prior to arrival at the Port and should be sent by telex: 662360 ("PORTCT SJ") for information of the Director General. Changes in ETA in excess of one hour must be notified thereafter. On coming within range of King Fahd Industrial Port Control, the ETA must be confirmed by VHF.

Vessels which fail to comply with these requirements may be delayed and or subject to a fine as laid down in the Rules and Regulations.

Government Entry Requirements: The Master will be responsible for complying fully with the requirements of Saudi Arabian Government Departments, Ministries, Agencies and Organisations. Particular attention should be paid to the requirements of the Customs, Coast Guard, Immigration and Port Health Authorities. Masters requiring any advice on these requirements should contact their local Agents.

PEMREF: PEMREF requires a *minimum* of 96/72/48/24 hours notice of a vessel's arrival. The full pre-arrival message should accompany the 96 hour ETA. Where a vessel is arriving from a port less than 96 hours away, an ETA must be sent as soon as the vessel leaves that port.

The above requirements are a *minimum* and Masters should be encouraged to keep PEMREF well advised at an early stage regarding all aspects of their call. Failure to provide the required information in a timely manner will result in delays in berthing and loading, which will be for Owner's account.

PRE-ARRIVAL INFORMATION REQUIREMENTS: The Rules and Regulations for Seaports of the G.C.C. Member States cover King Fahd Industrial Port and these specify that certain information must be received either directly or through the vessel's Agent before that vessel arrives at the port. Vessels which fail to comply with this requirement may be delayed and/or subject to a fine as laid down in the Rules and Regulations.

Dry Cargo Vessels: The following information must be sent to the Director General as soon as that vessel has completed loading cargo at her previous port:

1. Call Sign.
2. Name of vessel.
3. Owner's/Charterer's name and address.
4. Nationality.
5. Agents.
6. LOA.
7. Maximum draft.
8. No. of hatches.
9. G.R.T.
10. N.R.T.
11. D.W.T.
12. Previous Names.
13. Type of Vessel.
14. Type of Cargo.
15. Total cargo weight tons.
16. Total cargo freight tons.
17. No. of containers/units.
18. No. of Livestock.
19. E.T.A.
20. Actual Arrival Draft.
21. Hazardous Cargo for Yanbu, including quantities and classes.
22. Hazardous Cargo in Transit for other ports, including quantities and classes.
23. Tonnage to Hatch for Yanbu Discharge.
24. Year of Construction.
25. Lloyd's Registered Number.
26. All Ports of Loading.
27. Ship's Derricks.
28. Speed.
29. Next Port.
30. Route.
31. Last 3 Ports of Call.
32. Bunker Requirement.
33. Liquor Cargo in Transit with container number.
34. Arms and Ammunitions on board.

Tankers: The following information must be sent to the Director General as soon as the vessel receives orders to proceed to the port. It is requested that the information should also be sent to the relevant Terminal Operator.

AA	Name of vessel.
BB	Former names.
CC	Port of registry, flag, call sign.
DD	LOA, G.R.T., N.R.T.
EE	Summer D.W.T., arrival D.W.T.
FF	Draft on arrival forward and aft.
GG	ETA. (To be advised 5 days, 72 hours, 48 hours, 24 hours and any later changes).
HH	Last port.
II	Cargo on board and flash point, destination of cargo.
JJ	Cargo requirements.
KK	Previous cargo and quantity residues on board for load on top.
LL	IMO Class.
MM	Whether gas free or in an inert condition (Oxygen content of atmosphere throughout tank to be less than 8% by volume).
NN	Port of loading ballast and amount.
OO	Quantity of ballast loaded on passage.
PP	Quantity of segregated ballast on arrival.
QQ	Quantity of cargo tank ballast on arrival.
RR	Time for deballasting: Can ship load/deballast simultaneously?
SS	Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
TT	Agent's name.
UU	Maximum loading rate.
VV	Topping-off rate.
WW	Bunker requirements.
XX	Cargo manifold connections size.
YY	Bunker connections size.
ZZ	Derricks.
11.	Ship shore comparisons for last 5 voyages.
22.	Year built.
33.	Master's full name.
44.	Discharge port.
55.	Next port of call.
66.	Number of crew.
77.	Vessel's economical speed.
88.	Vessel's position when 48 hours from Pilot Station.

(See also "Appendix").

Gas Tankers: The following information must be sent to the Director General and Terminal Operator as soon as the vessel receives orders to proceed to the port.

AAG	Name of vessel, indicating any former names.
BBG	Port of registry, flag, call sign.
CCG	LOA, G.R.T., N.R.T.
DDG	Summer D.W.T., arrival D.W.T., arrival draft forward and aft.
EEG	Last port, ETA Yanbu.
FFG	Quantity of ballast on arrival: where loaded.
GGG	Quantity of dirty ballast on arrival.
HHG	Total cargo capacity in cubic metres. Cargo required.
IIG	Grades and quantities of any part cargoes or cargo residues and where loaded. Grade and quantities of product in deck tanks.
JJG	Are part cargoes to be comingled with Yanbu loadings?
KKG	Gauge pressures; top, bottom and mean temperatures of each cargo tank.
LLG	Quantity of coolant required in addition to cargo requirements.
MMG	Maximum allowable relief valve settings for all cargo tanks.
NNG	Have any cargoes other than LPG been carried during last 3 loaded voyages? Specify.
OOG	Maximum oxygen content by volume per cent of each warm or inerted cargo tank.
PPG	If tank purging required specify whether: (a) Parallel or in series. (b) Liquid from shore direct to cargo tanks. (c) Liquid from shore to vessel's vaporisers. Specify vaporiser throughout in RLPG tonnes/hour.
QQG	If cooling down tanks is required, specify maximum cooling rate in terms of temperature reduction per hours and maximum temperature differential permitted between any two points in cargo tanks.
RRG	Available total capacity of ship's reliquefication plant for each nominated cargo product.
SSG	Type of ship's reliquefication system i.e., direct, cascade or other.
TTG	Capacity of ship's gas blowers to shore vapour return line in volume per hour at reference temperature.
UUG	Maximum loading rate and approximate topping off rate.
VVG	Bunker manifold size. Bunker requirements.
WWG	Manifold presentation; function, ASA rating, size, from Forward.
XXG	Agent's name.
YYG	IMO ship type. Does vessel have valid certificates of fitness?
ZZG	Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
111.	Deballasting time, specify concurrent loading or not.
222.	Year built.
333.	Master's full name.
444.	Discharge port.
555.	Next port of call.
666.	Number of crew.
777.	Vessel's economical speed.
888.	Vessel's position when 48 hours from Pilot Station.

(See also "Appendix").

NOTICE: Issued by Saudi Aramco on 1st October 1994.

Quote:

SHIP'S STANDARD MESSAGE

Effective December 1st, 1994, Communication will apply the attached standard message to all ships calling Saudi Aramco Terminals at Ras Tanura, and Yanbu as well. Hence, we appreciate communicating this to all your customers. It is mandatory to answer back all information required, in order to eliminate any conflicts, usually caused by shortage of information received from ships.

From: Saudi Aramco Ras Tanura. No. . . . . . UTC/Date and time. . .
Master . . . . .

Please contact "HZY" on CW or Inmarsat Telex 801919 Amar SJ with following information:

One	ETA UTC Ras Tanura Entry Buoy, any later changes.
Two	Ship's former name if any, present flag, net registered tonnage.
Three	Agent's name, last dry dock MM/DD/YY and Master's name.
Four	Cargo requirements in net barrels and destination of cargo.
Five	Bunker requirements in net barrels fuel and/or diesel bunker.
Six	Arrival/departure draft fore and aft, arrival displacement tonnage, derrick capacity, number and size of connections.
Seven	If loading Arab Medium for the account of Banoco and/or Arab Extra Light, your ship must arrive with a maximum arrival draft of 54 ft. plus tide, and a maximum sailing draft of 64 ft. plus tide.
Eight	If loading LPG, advise if ship's tanks sufficiently cooled for normal loading, otherwise advise if you require coolant.
Nine	Whether gas-free or in inert condition.

Ten Deballasting hours, loading rate, if can load cargo concurrent with deballasting, maximum loading rate after deballasting.

Eleven Previous cargo, also quantity and quality of part cargo or residue or slops aboard, if any, and whether to be mixed with Ras Tanura cargo or not.

Twelve If loading more than one grade, which grade to be loaded first, or if can load simultaneously, and loading rate for each grade.

Thirteen Does your vessel comply with SOLAS Conventions regarding the fitting and use of a fully operational Inert Gas System.

Fourteen It is a requirement of the port that the propeller remains immersed and stern trim does not exceed 1.5% of the ship's length when at berth. Confirm that your vessel will comply.

If VHF aboard, call Ras Tanura Pilots on Channel 16 or 14 for anchoring, boarding and berthing instructions when 100 miles out. On arrival anchorage, advise "HZY" offical readiness time and anchored position. Radio messages without charge. Pilots require sufficient clean ballast for manoeuvring with propeller covered and trim limited to 15 ft. for Ras Tanura Terminal, and 8 ft. for Juaymah Terminal. Imperative all vessels operating under Early Departure Procedure, copy "HZY" traffic list after departure until cargo quantities are resolved and Agent is authorised to sign cargo documents.
Saudi Aramco.

From: Saudi Aramco Ras Tanura. No. . . .UTC/Date and time. . . .
Master

Please advise any epidemic disease or illness on board. Status of crews International Certificates of Immunisation. All ports called past 30 days. Destination. Flag. Net registered tonnage. Vessel will not be allowed to berth until this information is received.
Saudi Aramco.
Unquote.

HEALTH: *Quarantine:* In accordance with International practice, quarantine signals must be displayed by all vessels approaching the port. These signals must be displayed continuously until Pratique is granted.

Sunrise to Sunset	Quarantine Flag
Sunset to Sunrise	Signal lights Red over white

VHF: *Port Control:* All the marine services and shipping movements within King Fahd Industrial Port Limits are monitored and controlled by "King Fahd Port Control", which is situated at Lat. 23° 57.4' N., Long. 38° 13' E. The station is manned 24 hours a day and maintains a continuous VHF watch. Information can be provided to Masters and Pilots on all navigational aspects, including wind and visibility, navigational aids and shipping movements within the port area. The station will also provide a liaison with the Terminal Operators and Emergency Services.

The following VHF channels are continuously available for use by King Fahd Port Control.

Channel Designator	*MHz Frequency*	*Service*
16	156.800	International Calling and Distress
10	156.500	Port Operations – 3
11	156.550	Port Operations – 1
13	156.650	Port Operations – 4
68	156.425	Port Operations – 2
67	156.375	Pilotage/Berthing Operations
69	156.475	Pilotage/Berthing Operations
71	156.575	Pilotage/Berthing Operations
73	156.675	Pilotage/Berthing Operations
74	156.725	King Fahd Port Operations – Private

In the event of a Port Emergency, King Fahd Industrial Port Control will designate a channel for use during the period of the emergency.

RADAR: Harbour Surveillance Radar is installed in the Port Control Tower.

A second surveillance radar is being erected (1990) on a 30 m. tower in position Lat. 23° 42' N. Long. 38° 29' E., remote reading at the Port Control Tower.

TUGS: There is no requirement for Masters to order tugs in King Fahd Industrial Port. The number of tugs to be used during berthing and on departure will be specified by the Harbour Master. If the Master wishes to appeal against the number of tugs allocated, he will do so to the Harbour Master, who will make the final decision.

Any tug whether owned, hired or chartered by the Ports Authority, when used for assisting a vessel, shall be deemed to be under the order and control of the Master, Owner or Charterers of the vessel being assisted. The Ports Authority shall not be liable for damage of any description or any consequential loss suffered by, or to, the tugs or their crews while assisting vessels, whether occasioned by any act or omission of Tug Master or crew or by any defect or inadequacy of the tug, machinery or gear.

Towing lines will be provided by the Ports Authority. Tugs will rendezvous with vessels bound for Port Terminals in the vicinity of Buoy No. 14, or further South as appropriate for the terminal.

All tugs are fitted with foam and water monitors for fire fighting and spray booms for pollution dispersal work.

15 tugs up to 87 tons bollard pull. Pilot launches and mooring launches are available.

Most tugs are VSP Water Tractors.

CRUDE OIL TERMINAL:
Saudi Aramco Berth Particulars:
Berth No. 61:

Tanker Size (approx.)	80,000 – 275,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth No. 1	92 ft. ISLW
Max. Draft	83 ft.
Loading Arms (number and size)	4×20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Fuel Arms (number and size)	2×12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Max. Rate Per Loading Arm	32,500 b.p.h.
Max. Rate Per Bunker Arm (Off-loading)	8,900 b.p.h.
Number of Breasting Dolphins	4
Number of Mooring Dolphins	4
Available Mooring Hooks	24 (SWL @ 70 M/T)
Distance Between Centre of Inner Breasting Dolphins	239 ft. (73 m.)

Berth No. 62:

Tanker Size (approx.)	275,000 – 500,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth	105 ft. ISLW
Max. Draft	95 ft.
Loading Arms (Number and Size)	4 × 20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Arms (Number and Size)	2 × 12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Max. Rate per Loading Arm	32,500 b.p.h.
Max. Rate per Bunker Arm (Bunkering)	10,000 b.p.h.
Number of Breasting Dolphins	2
Number of Mooring Dolphins	6
Available Mooring Hooks	26 (SWL @ 70 M/T)
Distance Between Centre of Breasting Dolphins	449 ft. (137 m.)

Note: Tankers of less than 275,000 d.w.t. may be accepted if the ligh water line flat side forward and aft of the manifold is at least 75 m. (246 ft.)

Berth No. 63: (Also see "Shipmaster's Report" – dated October 1985).

Tanker Size (approx.)	120,000 – 275,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth	90 ft. ISLW
Max. Draft	81 ft.
Loading Arms (Number and Size)	4 × 20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Arms (Number and Size)	2 × 12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Max. Rate per Loading Arm	32,500 b.p.h.
Max. Rate per Bunker Arm (Bunkering)	10,000
Number of Breasting Dolphins	2
Number of Mooring Dolphins	5
Available Mooring Hooks	23 (SWL @ 70 M/T)
Distance Between Centre of Breasting Dolphins	420 ft. (128 m.)

Note: Tankers of less than 120,000 d.w.t. may be accepted if the ligh water line flat side forward and aft of the manifold is at least 70 m (230 ft.).

Berth No. 64: In 1990 a fourth berth for vessels of 80,000 d.w.t. t 500,000 d.w.t. was under construction.

Only two berths of the Crude Oil Terminal can be loaded at the sam time. Maximum loading rate to two crude berths simultaneously i 260,000 b.p.h. through 8 × 20 in. loading arms.

Environmental Monitoring System: An environmental monitoring syste is installed at Berth No. 61 dock control room with repeater units locate in dock control rooms at Berths 62 and 63. The system indicates win velocity and direction, atmospheric pressure and temperature, curre velocity and direction, and wave height and period.

Berthing Criteria:

Max. berthing velocity:	20 cm./sec.
Max. approach angle:	7°

For berthing and unberthing purposes, wind, sea, and curre conditions have to be within acceptable limits, so that during the fin docking the maximum berthing velocity and maximum approach ang is not being exceeded.

Mooring Arrangements: Each mooring dolphin, breasting dolphin, an loading platform is equipped with either double or triple quick-releas mooring hooks and with a mooring capstan.

The terminal will furnish a required mooring arrangement for th loading berth to which the vessel is nominated. The mooring diagra shows the number of mooring hooks provided for each ber consecutively numbered from North to South. These mooring hooks a designed to service one mooring line per hook.

Port mooring launches will be used to assist during moori operations.

The terminal will provide suitable messengers for heaving in lines.

In order to ensure the integrity of the offshore terminal facilities, i recommended that VLCCs provide an all wire mooring arrangement a that tankers in the 50 to 160 MDWT range provide mooring wires least for their spring mooring lines and breast mooring lines. T recommended minimum number of wire moorings is as follows:

50,000 – 160,000 d.w.t. tankers:	8 mooring wires
160,000 – 250,000 d.w.t. tankers:	10 mooring wires
250,000 – 350,000 d.w.t. tankers:	12 mooring wires
350,000 plus d.w.t. tankers:	14 mooring wires

VLCCs with an all synthetic mooring system will be accepted if t synthetic mooring lines consist of low elasticity material.

All mooring lines should be of similar size and material and must in good condition. Manual brakes have to be set and to be secure all tension winches once the tanker is moored. Ship's crew must tend all moorings to keep the ship in position and mooring lines have to be taut at all times.

Each loading berth is equipped with a mooring load monitor/hook release system. The system is designed to monitor the loads on each mooring hook and to provide an alarm should the loads on a mooring hook exceed the system's set points. Berth operating personnel will monitor the mooring loads and, based on the read-outs they will advise the responsible officer who is expected to immediately correct any undesirable mooring situation.

The mooring load monitoring system does not relieve the vessel's Master from his responsibility to ensure adequate and safe mooring at all times when berthed alongside the Crude Oil Terminal.

Report: 1989.

King Fahd Industrial Port Authorities and Saudi Aramco have reminded us to ensure that Owners and Masters, of all vessels berthing at the Crude Oil Terminal and NGL jetties, are made fully aware of the mooring requirements, which are a minimum of 16 lines arranged as follows:

3 head lines
3 forward breast lines
2 forward back springs
2 after back springs
3 after breast lines
3 stern lines.

Further, please take note of Saudi Aramco's minimum wire mooring line requirement as under:

Vessel Size	*Required*	*Recommended*
75,000 – 160,000 d.w.t.	8 Wires	12 Wires
161,000 – 250,000 d.w.t.	10 Wires	12 Wires
251,000 – 300,000 d.w.t.	12 Wires	14 Wires
301,000 – 350,000 d.w.t.	12 Wires	16 Wires
351,000 d.w.t. and above	14 Wires	16 Wires

Gangway: The Crude Oil Terminal will provide a gangway to the ship at each berth.

Each loading platform has a gangway tower equipped with a self-adjusting gangway. The gangway provides access to and from the tanker and is the only permissible means for any personnel to enter or leave the ship.

Loading: *Loading Arms:* There are 4×20 in. crude oil loading arms at each of the loading platforms at Berth Nos. 61, 62 and 63. Each crude oil loading arm is capable of handling 32,500 bbls.p.h. maximum. The maximum flow rate per berth is 130,000 bbls.p.h., using 4 arms.

The hydraulic controls for the loading arms are located at the control desk on the loading platform adjacent to the loading arms. All loading arms are fully hydraulic powered and counter-balanced when empty. Each loading arm is fitted with a "Quick Disconnect Cargo Coupler" and a minimum distance of 18 in. is required between the lowest point of the ship loading line flanges to the upper level of the working platform of the spill tank.

All loading/bunker connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

Loading Plan Agreement: Prior to loading, the Terminal Supervisor will contact the officer in charge for the loading operation on board the tanker and discuss and agree on the loading plan.

The loading agreement consists of:

(a) Maximum acceptable loading rates, starting rates, topping-off rates, and standby notice requirements. (During loading, all anticipated changes in cargo transfer rates are to be communicated in a timely manner to ship or shore).
(b) Cargo quantities required by tanker's Master and comparison with terminal loading instructions.
(c) Cargo characteristics, required samples and tests.
(d) Assignment of cargo to vessel tanks and preferred order of loading.
(e) Details of last cargo, condition of tanks and pipelines, and ballast conditions and deballast time. Inspection of all cargo tanks prior to loading and signing of the Dry Certificate.
(f) Load-on-top procedures.
(g) Quantity of slop oil on board and quantity of free water in slops.
(h) Quantity of bunkers ordered prior to arrival.
(i) Estimated loading time required and estimated departure time.

Crude Oil Characteristics:

Arabian Light

Temperature	120°–150°F
API Gravity	33.2–33.8
Reid Vapour Pressure	3.6–5.0 PSIA
Pour Point	Below 20°F
Viscosity	57 SUS @ 70°F
BS&W	Less than 0.05%
H_2S	Less than 10 PPM

Hydrogen Sulphide Hazards (H_2S): Arabian crude loaded at the Offshore Marine Terminal has been treated for H_2S removal prior to shipping.

However, the crude oil may still contain Hydrogen Sulphide in concentrations which may be harmful to personnel. Personnel on board tankers who may be exposed to concentrations of H_2S gas should observe safety precautions applicable to harmful gases.

Slop Residues: Slop residues cannot be discharged ashore at Petromin's crude oil terminal.

Cargo Tank Inspection: Cargo tanks onboard the tanker will normally not be inspected by the Terminal Offshore Supervisor. If the Owner/Charterer of the ship requests an independent oil inspection company to inspect cargo tanks, the Offshore Supervisor will witness the tank inspection.

Tankers which arrive with all tanks inerted must enable ullage inspections of all cargo tanks to be carried out prior to start of cargo transfer operations and after completion of cargo transfer operations.

If the tanker requests load-on-top procedures, measuring of the quantity of oil and water in the slop tank(s) will be witnessed by the Terminal Supervisor (Also see "Appendix").

Loading Signal: During loading the international code flag "B" shall be displayed during daylight hours. During darkness a red loading light shall be displayed.

Watches: During the entire stay of the vessel alongside the Crude Oil Terminal, a deck watch is required.

Bunkering: Bunkering fuel is available at all berths at the Crude Oil Terminal, and 2 bunker loading arms are located on each loading platform, size 12 in. Maximum flow rate per bunker loading arm is 14,500 bbls./p.h. To avoid any delays to tankers, bunkering has to be accomplished concurrently with cargo transfer operations.

NGL TERMINAL: The NGL Terminal is a Saudi Arabian Government owned, Saudi Aramco operated facility designed to load refrigerated liquid petroleum gas (propane and butane) and naphtha product for export. LPG carriers range in size from approximately 25,000 cu.m. to 200,000 cu.m. Naphtha carriers range from 20,000 to 280,000 d.w.t.

Terminal Facilities: The 2 loading berths are situated on the offshore side of the base of the "L". Berth 71 is the Southerly berth and Berth 72 is the Northerly berth. Berth alignment is 290° true bearing. A tower crane is located in the middle of each loading platform. Reading from North to South the 7 loading arms are designated for the following service; Naphtha, ship's fuel, LPG (4 arms), and ship's fuel. All LPG arms are universally manifolded to permit propane or butane liquid loading; or propane, butane or contaminated vapour return. Bunker fuel or black diesel can be loaded through either or both 12 in. ship's fuel arms which flank the LPG loading station. The naphtha arm is capable of delivering naphtha product and receiving small amounts of naphtha slop, which will be disposed of onshore. There are no shore-based ballast handling facilities.

Berth Particulars: No. 71 and No. 72.

Tanker size (approx.):	16,000 – 200,000 cu.m.
Deck Level of Loading Platform:	56 ft. ISLW
Depth Alongside Berths (min.):	60 ft. ISLW
Max. Draft:	53 ft. 02 in. (16.2 m.)

Loading Arms:

	Number/Size		*Number/Size*
(a) Ships' Fuel	2×12 in.	(c) LPG	4×16 in.
(b) Naphtha	1×16 in.		

Quick Disconnect Coupling Sizes: 8 in., 10 in., 12 in., 14 in. and 16 in.

Maximum loading rate:

(a) Ships' Fuel	
1. Diesel	650 bbls.p.h.
2. Bunker Fuel	5,000 bbls.p.h.
(b) Naphtha	30,000 bbls.p.h.
(c) LPG	30,000 bbls.p.h.

Number of Breasting Dolphins:	2
Number of Mooring Dolphins:	6
Available Mooring Hooks:	42
Distance between centre of Breasting Dolphins:	300 ft.

Condition of Ship's Products Tanks: The Saudi Aramco facilities for loading LPG are not designed for loading pressurised cargoes and LPG will not be loaded into a tanker which does not have adequate shipboard refrigeration capacity and chilled tanks.

Mooring Lines and Arrangements: In order to ensure the safety of personnel, tankers and loading facilities, and to prevent accidental oil spillages, Saudi Aramco strongly recommend that tankers of 75,000 d.w.t. and larger which moor at NGL Terminal berths utilise a minimum of 8 to 12 wire mooring lines (breasts and springs) in accordance with the following:

75,000 to 160,000 d.w.t. : 8 wire lines
161,000 to 250,000 d.w.t. : 10 wire lines
Greater than 250,000 d.w.t. : 12 wire lines

Vessels equipped with both wire and synthetic mooring lines must avoid mixing such lines to the same dolphin. During periods of unsettled weather, arriving vessels fitted with sufficient wires will be preferentially berthed whereas vessels equipped with synthetic lines or too few wire lines will not be berthed until the weather improves. If a ship with synthetic lines is already moored and squall conditions arise, loading to that vessel will be stopped and the loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation. The use of nylon or other highly elastic line is prohibited.

Each mooring dolphin and breasting dolphin is equipped with triple quick-release mooring hooks and with a mooring winch.

Vessels must be moored to the entire satisfaction of the Pilot. Vessels must be ready at all times to put out more lines as required by the Harbour Master or pier personnel, or as dictated by weather changes. All vessels moored to the piers must have deck winches in readiness for immediate use. All vessels moored with automatic tension winches will set the manual brakes on these winches.

Pier crew are on duty continuously to handle loading arms and mooring lines. Mooring lines on board vessels will not be handled by shore personnel.

All loading connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

Gangway: The NGL Terminal will provide a gangway to the ship at either berth. Each berth has a gangway tower equipped with a self-adjusting gangway for access to and from the ship, and this is the only permissible means for any personnel to enter or leave the ship.

Loading Plans: After a tanker is secured at the berth and prior to the beginning of any loading operation, the Master (or a ship's officer designated by him) will meet with the NGL Terminal senior shiftoperations representative in order to discuss and prepare the vessel's loading plan. Items to be discussed will include, but not be limited to, the following:

1. Temperature and pressure of each of the ship's tanks.
2. Product to be loaded in each tank and the sequence of tank loading.

3. Quantity and type of product, if any, in each ship's tank, and whether it is a part cargo or residue required for tank cooling.
4. Loading rates of each product.
5. Safety procedures and safe loading practices.

All clean excess vapours which cannot be handled by the tanker's vapour recovery equipment will be metered to the shore-based vapour recovery system and reprocessed. Contaminated vapours will be metered to the flare.

Refrigerated LPG: Refrigerated LPG is loaded via 16 in. loading arms. The maximum loading rate for each product is 30,000 bbls.p.h. Each berth is equipped with 4 LPG loading arms which may be used for butane liquid, propane liquid or vapour return to a ship's vapour recovery unit, or contaminated vapours to flare. All 8 LPG loading arms are fitted with quick connect/disconnect couplers. Each LPG loading line has an associate circulation return line. Loading lines must be on circulation at least 4 hours prior to commencement of loading. No 2 ships are loaded from one loading line simultaneously.

The NGL Terminal facilities ARE NOT designed for loading pressurised LPG and NO LPG will be loaded into ship's tanks that are not equipped with refrigeration facilities and are not adequately chilled.

Vapour line MUST be connected prior to loading LPG cargo. This also includes those vessels loading coolant.

Before being transferred from the loading line to the loading barrel and arms, the propane and butane products are metered. The metering system is designed for loading rates between 100 bbls.p.h. and 30,000 bbls.p.h. for each product.

A 3 in. turbine type meter with a capacity of 79 bbls.p.h. – 929 bbls.p.h is provided for low loading rates such as cooldown and topping off.

An 8 in. turbine type meter with a capacity of 679 bbls.h.p. – 7,420 bbls.p.h. is provided for full flow rates.

Every vessel loading LPG at the NGL Terminal will be required to have a copy of SAUDI ARAMCO GASRUL 9:83 on board. When a copy is not on board prior to arrival Saudi Aramco and the Agent of the vessel shall be so advised. Extracts of the regulations are included for information as follows:

1. *Propane Loading:*
   (a) The cargo tank bottom is cooled down to a maximum mean temperature of −38°F or −39°C.
   (b) The maximum mean temperature above the mid-depth of the cargo tank, in the range between two-thirds and three-quarters of the Maximum Allowable Tank Filling Level (MATFL), and excluding any temperature indicated in the cargo tank dome vapour space, is −13°F or −25°C.
   or
   The maximum mean temperature at the top of the cargo tank and at or immediately below the MATFL and excluding any temperature indicated in the cargo tank dome vapour space is −8°F or −22°C.
2. *Butane Loading:*
   (a) The cargo tank bottom is cooled down to a maximum mean temperature of +32°F or 0°C.
   (b) The maximum mean temperature above the mid-depth of the cargo tank, in the range between two-thirds and three-quarters of the MATFL and excluding and temperature indicated in the cargo tank dome vapour space, is +57°F or +14°C.
   or
   The maximum mean temperature at the top of the cargo tank and at or immediately below the MATFL and excluding any temperature indicated in the cargo tank dome space is plus 62°F. or plus 17°C.
3. The cargo tank gauge pressure not more than 1.0 p.s.i. or 70 MBS or 0.07 kg./sq.cm. on arrival at berth. During cargo operation the pressure of any cargo tank shall be maintained within the range between zero gauge minimum (atmospheric pressure) and a maximum which shall not exceed 70% of the maximum allowable relief valve setting for that cargo tank or such other lesser maximum percentage as may be determined by Saudi Aramco for a particular vessel.
4. Butane may be loaded into ship tanks containing residue up to 10% of the cargo to be loaded.
5. Propane may be loaded into ship tanks containing propane residue up to 10% of the cargo to be loaded.
6. Butane or propane may be loaded into ship tanks containing part cargo of the same grade only by authorisation of the offtaker. Quantities of over 10% of the cargo to be loaded shall be considered part cargo.
7. Should the vessel be unable to comply with the provisions of paragraphs 3 and 4, Saudi Aramco operations management representatives shall confer with the vessel Master and/or Responsible Loading Officer to develop a loading procedure for the safest possible loading for the tank(s) containing dissimilar residue. The procedure shall be in writing, agreed to by both parties and take into consideration loading rates, temperatures, pressures and all possible safeguards to ensure minimising the dangers to ship and shore installations. It must be understood that this procedure will involve delays to the vessel and will impose additional workloads on the shore and ship personnel.
8. IN NO CASE WILL LOADING BE PERMITTED INTO SHIP TANKS CONTAINING LIQUID PRODUCT OF A DIFFERENT GRADE IN EXCESS OF TEN TONS.
9. When a vessel requires special handling, as described above, the vessel shall be given a letter of protest, with copies to Owners and Operators.
10. Refrigerated LPG vessels with warm cargo tanks can be handled at the Saudi Aramco NGL Terminal. When special circumstances warrant, new ships and other vessels with warm tanks may be accommodated but will be subject to specific conditions.
11. Vessels with part cargo on board of products other than A-140 Propane or A-160 Butane must be equipped to keep any liquid or vapour completely self-contained from those cargo parcels. There must be no return of non-compatible vapour to atmosphere while at berth. *No mixing of dissimilar refrigerated liquids is allowed at berth.*
12. Vessels loading either propane or butane are expected to use the appropriate vapour return line but only for *excess* vapour which the vessel's vapour recovery equipment cannot handle. Excessive vapour will be metered to a shoreside ship's vapour recovery system. If the excess vapour cannot be handled by using both systems, the vapour will be sent to flare. If the situation cannot be corrected promptly aboard ship, the loading shall be shut down. Loading shall be resumed only after the loading plan has been reviewed with the Master or Responsible Loading Officer by the senior shift operations representative and corrective action has been agreed upon.
13. In the event of a spill of liquid propane or butane on board the vessel, shore loading shall be shut down until corrective action to clean up the spill and to avoid future recurrence has been agreed upon by the Master or Responsible Loading Officer, the shift operations staff and the Harbour Master.
14. There are no facilities at the NGL Terminal for the return of either liquid propane or liquid butane cargo. Vessels must pay strict attention not to overload either of these grades.

Emergency Procedures: In the event of a fire or explosion at the pier, or on board a vessel which is berthed alongside at the Terminal, the alarm signal will be a one minute undulating signal on the siren and an Emergency Shutdown System will be activated to shutdown immediately all cargo loading to vessels at the berths. The course of action to be followed by Saudi Aramco Terminal personnel will be dictated by the particular facts and circumstances of the incident. It is impossible to indicate exactly and completely what practices will be applied during an emergency before an evaluation of the specfic situation can be made. Masters are advised to familiarise themselves with the Port and Terminal Emergency Procedures.

YANBU PETROMIN REFINERY: This is the domestic refinery for Saud Arabia and is operated by Saudi Arabian Marketing and Refining Company (SAMAREC).

Terminal Facilities: There are 4 berths at the terminal, 2 for vessels of 20,000 d.w.t. to 80,000 d.w.t. capacity (Berths No. 91 and 92) and 2 for vessels of 1,000 d.w.t. to 20,000 d.w.t. capacity (Berths No. 93 and 94).

The smaller berths are located inside the harbour basin and the two larger berths on the seaward side of the causeway dogleg extending to the South Eastward of the main causeway.

Berth structures consist of a central loading platform and mooring and breasting structures connected by a trestle for vehicular access. Platform and trestle are of concrete, and the loading platforms connected to the mooring dolphins by steel walkways.

For the two larger berths, there are 4 semi-flexible breasting dolphins for each berth, two each side of the platform. The berths have been dredged to a depth of 16 m. below LAT.

For the two smaller inside berths, a semi-flexible breasting beam is installed in front of the platform, designed to absorb the berthing energy of vessels up to 20,000 d.w.t. tonnes. The turning circle with a diameter of 760 m. and the approach to the inner basin has been dredged to 13.5 m. below LAT; the berths themselves dredged to 11.5 m. below LAT.

All berths are equipped with double or triple quick release hooks. Al hooks can be released remotely in an emergency.

The two larger berths are equipped with a berthing approach system which monitors and records approach velocity, distance off and angle of approach; visible readout boards are installed for vessels' use.

A ballast water treatment plant is capable of receiving ballast at a maximum rate of 3,000 tonnes per hour prior to loading. Ballast water is passed through the facility's spearator system, clean water is then passed to retention ponds prior to being released to sea. The discharge of ballast water from the facility is monitored to ensure compliance with current environmental standards.

Bunkers (fuel and diesel oil) and potable fresh water are available at each berth.

Berth Particulars:

Berths No. 91 and 92:

Min./Max. tanker size	20,000 to 80,000 d.w.
Loading platform height above LAT	6.0 m
Minimum water depth alongside	16.0 m
Maximum draft allowed	14.2 m
Breasting dolphins	
Maximum LOA	260 m
Usual side alongside	Starboa
Shore gangway	Ye

Berths No. 93 and 94:

Min./Max. tanker size	1,000 to 20,000 d.w
Loading platform height above LAT	5.0 m
Minimum water depth alongside	11.5 m
Maximum draft allowed	9.8 m
Breasting dolphins	
Maximum LOA	175 m
Usual side alongside	Starboa
Shore gangway	Ye

Product Loading Rates:

Berths No. 91 and 92:

Product	*Max. Rate per Arm* cu.m./hr.	*Design Pumping Rate* t.p.h.	*No. of Arms*
Fuel Oil (cargo)	1,500	2,360	3
Marine Diesel (cargo)	1,500	1,570	2
Regular Gasoline	1,500	1,570	2
Premium Gasoline	1,500	1,570	2
Motor Diesel Oil	1,500	1,570	2
Kerosene	1,500	1,570	2
Naphtha	440	300	1
JP4	240	182	1
Fuel Oil (bunker)	800	760	1
Marine Diesel (bunker)	550	450	1
Ballast Water (discharge)	1,500	3,000	3
Fresh Water	—	25	Hose

Berths No. 93 and 94:

Product	*Max. Rate per Arm* cu.m./hr.	*Design Pumping Rate* t.p.h.	*No. of Arms*
Fuel Oil (cargo)	1,000	2,360	3
Marine Diesel (cargo)	1,000	1,570	3
Regular Gasoline	1,500	1,570	2
Premium Gasoline	1,500	1,570	2
Motor Diesel Oil	1,500	1,570	2
Kerosene	1,500	1,570	2
Naphtha	440	330	1
JP4/JP1	240	182	1
L.P.G.	60	30	1
Caustic (discharge)	15	20	1
T.E.L. (discharge)	23	40	Hose

Marine Diesel (bunker)	250	205	1
Ballast Water (discharge)	1,000	1,500	3
Fresh Water	—	25	Hose

Loading Arms: Loading arms on all berths are numbered from right to left when facing the berth from the deck of a vessel. Loading arm numbers are prefixed with berth identity number.

Berths No. 91 and 92:

Loading Arm (No.)	*Diameter* (in.)	*Coupling Sizes* (in.)	*Products Handled*
1	10	10 – 14	Fuel oil (cargo), Marine diesel (cargo), Fuel oil (bunker), Marine diesel (bunker), Ballast
2	10	10 – 14	Fuel oil (cargo), Marine diesel (cargo), Fuel oil (bunker), Marine diesel (bunker), Ballast
3	10	10 – 14	Motor diesel, Kerosene
4	10	10 – 14	Motor diesel, Kerosene
5	10	10 – 14	Regular gasoline, Premium gasoline
6	10	10 – 14	Regular gasoline, Premium gasoline
7	10	10 – 14	Fuel oil (cargo), Marine diesel (cargo), Fuel oil (bunker), Marine diesel (bunker), Ballast
8	8	8, 10, 12	JP4, Napatha

Berths No. 93 and 94:

Loading Arm (No.)	*Diameter* (in.)	*Coupling Sizes* (in.)	*Products Handled*
1	8	8 – 12	Fuel oil (cargo), Marine diesel (cargo), Fuel oil (bunker), Marine diesel (bunker), Ballast
2	8	8 – 12	Fuel oil (cargo), Marine diesel (cargo), Fuel oil (cargo), Marine diesel (cargo), Ballast
3	10	10 – 14	Motor diesel, Kerosene
4	10	10 – 14	Motor diesel, Kerosene
5	10	10 – 14	Regular gasoline, Premium gasoline
6	10	10 – 14	Regular gasoline, Premium gasoline
7	8	8 – 12	Fuel oil (cargo), Marine diesel (cargo), Fuel oil (bunker), Marine diesel (bunker), Ballast
8	8	8 – 12	JP4/JP1, Naphtha
9 (Berth 94 only)	4	4	L.P.G.
10 (Berth 94 only)	4	4	Caustic
X (Berth 94 only)	6	Hose	T.E.L.

Quick Disconnect Couplers: Each loading arm is fitted with a "quick disconnect" coupler. These are hydraulically operated from a centrally located operating panel. A pendant control lead is available for local control of loading arms when connecting to the ship's manifold.

Gangway: Each of the four berths is equipped with hydraulically operated shore/ship gangways, which will normally be used. It is the vessel's responsibility to ensure that the ship end of the gangway is placed in such a position as to be clear of all obstructions. A gangway watch is to be maintained to ensure no fouling of the gangway occurs during loading/discharging. At no time is the gangway to be made fast to any part of the vessel.

Mooring Arrangements: Each mooring dolphin, outer breasting dolphin and/or loading platform is equipped with double or triple quick release mooring hooks, each grouping is fitted with a 2.5 tonnes SWL Capstan. The terminal will provide the required mooring hooks arrangement for the vessel on each berth. The mooring hooks are designed to handle one mooring line per hook only. Mooring boats will run moorings from the ship to the dolphins. The terminal will provide suitable messenger lines.

Working Areas: Under no circumstances may the longitudinal or lateral movements of a vessel exceed the limited working envelopes of the connected loading arms.

Each berth is equipped with a mooring hook load monitor. The system is designed to monitor the load on each mooring hook and provide warning, should the load exceed the set parameters. Berth operating personnel will warn ship's Officers of discrepancies of load between mooring lines. The ship's responsible Officer is required to immediately correct any undesirable situation. The mooring load monitoring system does not relieve the vessel's Master from his responsibility to ensure adequate and safe mooring at all times while berthed.

Deballasting: Deballasting connections are provided at all four berths and their use is mandatory, except in the case of ballast in segregated ballast systems. Discharge of ballast from SBT is only to be permitted after inspection by Port Authority Inspectors.

Bunkering: Bunkering fuel and diesel oil is available at all berths. Whenever possible, bunkers should be taken during deballasting operation.

LPG Loading System: The LPG system is designed to load LPG to pressurised carriers. In the case of vapours returned by a vessel during loading, these can be condensed and pumped back into the vessel's tanks.

Slop Residue: "Slop" oil may be discharged to the ballast reception facility, subject to content restrictions and with the approval of the terminal representative. Slop residues containing chemicals or emulsifying agents may not be accepted. Samples may be taken for testing before slops are accepted.

Bonding: All cargo/bunker loading connections are equipped with insulating flanges, and therefore ship-to-shore bonding is not necessary.

Communications: A telephone connected to the refinery PABX system is installed at the gangway ship side for use of operations or emergencies only.

Emergency Shut-Down System: At the end of the gangway (ship side), an emergency shut-down push button is installed. This may be activated by ship's responsible Officers, in case of emergency on board the ship.

Valve Closure: Ship's valves will not be closed off against shore pumps.

Loading Plan Agreement: Prior to loading, and especially in the case of multi-parcel cargoes, the Marine Terminal Supervisor will meet the Officer-in-Charge of the loading operation to discuss and agree on the loading plan, offering the safest and most expeditious method of loading. Items to be discussed will include, but not be limited to, the following:

1. Grades and quantities of cargo/bunkers required.
2. Loading rates and quantities per grade for start, maximum and topping-off.
3. Stand-by time for parcel completed.
4. Ballast quantity to be discharged to sea or shore.
5. Slop residues to be discharged to facilities.
6. Manifold connections/loading arms to be used for each operation.
7. Sequence of loading different products.
8. Expected loading time.
9. Information regarding communications, emergency shut-down procedures, tank venting system, and maximum pressures allowed.
10. Ship/shore Check List.

PETROMIN – MOBIL REFINERY – PEMREF: The Export Refinery Terminal has 2 separate loading facilities.

A tanker loading facility consisting of 3 berths for bulk petroleum liquids is operated under a lease agreement by PETROMIN-Mobil Yanbu Refinery Company Limited (PEMREF).

A chemical loading facility with one berth is likewise operated under a lease agreement by Saudi Yanbu Petrochemical Company (YANPET).

Pemref Standard Pre-Arrival Message:

Pemref have requested Agents in Yanbu to transmit this telex as a standard procedure to vessels calling at the Pemref Terminal for the *first time.*

Format of the telex is:

Quote

1. To provide ETA messages 72, 48 and 24 hours prior to arrival. Changes of 2 hours or more should be updated in separate message.
2. In addition to the standard port pre-arrival message to advise with the 72 hour ETA or as soon as possible thereafter:
   (AA) Where due to load more than one grade/parcel of cargo, the preferred order of loading and configuration of grades/manifolds from forward.
   (BB) Ship's maximum draft on sailing.
   (CC) Max. height of manifolds above water-line at completion of deballasting.
   (DD) If shore reducers required and sizes.
   (EE) Whether slops are chemical free.
   (FF) On first call at Pemref Terminal (or where not previously given), distance of parallel hull section forward and aft of manifold centre line in light ship condition.

Berth Information: Pemref operates three berths, all equipped with shore gangways and deballasting facilities. Shore reducers available, but require ship's gear for lifting on board. Designated service of loading arms given below from West to East.

Berth No. 42: Vessels berth port side to jetty facing West. Max. depth water 13.5 m. Loading arms: Fuel oil or ballast/fuel oil or ballast/jet/ADO or gasoline/jet/ADO or gasoline. Twelve inch except fuel oil/ballast arms which ten inch.

Berth No. 54/55: Vessels berth starboard side to berth facing West. Max. depth water 18.5 m. Loading arms: Fuel oil or ballast/fuel oil or ballast/ADO or gasoline/gasoline/jet/ADO or gasoline/gasoline all 16 in.

Ballast/Slops: Sea discharge of cargo tank ballast not permitted. Adequate shore ballast reception facilities available, but cannot accept chemicals.

Inert Gas: Saudi Arabia is signatory to IMO Solas Regulations, requiring fitted vessels to have cargo spaces fully inerted prior to loading volatile petroleum products.

Mooring Arrangements: Minimum moorings required:

Forward – Three headlines/three breastlines/two spring lines.

Aft – Three stern lines/three breastlines/two spring lines.

Mixed mooring not permitted. All mooring in same direction, and service must be of same material and type.

Cargo Information: Generally density and temperature not available until soon after commencement. Loading cargo is blended directly to vessel, therefore typical densities for grade/product being loaded should be used until actual available. Cargo is metered at jetty, and quantity, density and temperature available from Control Operator.

Cargo nomination and berthing information will be advised separately.

Pemref Terminal

Unquote.

PEMREF Facilities Particulars:

1. Berth No. 42 is located in the inner basin. It consists of a fixed loading platform with semi-flexible mooring and breasting dolphins. The berth will accommodate tankers from 5,000 d.w.t. to 35,000 d.w.t.
2. A ballast water treatment facility is located adjacent to Berth No. 42 and is capable of processing ballast water from tankers loading at the Export Refinery Terminal including the Chemical Berth.
3. The inner basin has been dredged to a depth of 13.5 m. below LAT. A turning basin with a diameter of 400 m. allows for ready access to the basin.
4. There is a jetty trestle with 2 outer loading berths connected to the shore by a free standing trestle and causeway. The 2 loading berths are fixed structures with fixed loading platforms and semi-flexible mooring and breasting dolphins. These berths are numbered 54 and 55. They are capable of handling tankers up to 150,000 d.w.t. in size. The water depth alongside these 2 berths has been dredged to 18.5 m. below LAT.

PEMREF Berth Particulars: Berth No. 42:

Min. Size Vessel: 5,000 d.w.t.
Max. Size Vessel: 35,000 d.w.t.
Deck Level of Loading Platform: 5.0 m./16.4 ft.
Depth Alongside Berth: 13.50 m./44.28 ft.
Max. LOA: 220 m.
Max. Draft: 12.15 m./39.85 ft.
Loading Arms (number and size): 2×10 in. – Black Products/Ballast
4×12 in. – White Products
Quick Disconnect Coupling Size: 6 in., 8 in., 10 in., 12 in., 16 in.
Bunker Fuel Arms
(number and size): 2×6 in.
Quick Disconnect Coupling Size: 6 in., 8 in., 10 in.
Max. Rate per Loading Arm: 10 in. – 1,430 cu.m./hr.
12 in. – 1,590 cu.m./hr.
Max. Rate per Bunker Arm: Heavy Fuel 480 cu.m./hr.
Diesel Fuel 160 cu.m./hr.
Number of Breasting Dolphins: 4
Number of Mooring Dolphins: 4
Available Mooring Hooks: 20
Distance between Centre of
Inner Breasting Dolphins: 33.0 m./108.25 ft.
Normal Shipside to Berth: Port
Shore Gangway Provided: Yes
Water to Manifold 12.80 m./42 ft.
Max. Height: 2.59 m./8 ft. 6 in.
Min. Height: 0.25 m./sec.
Max. Approach Velocity: ±5 degrees
Max. Approach Angle:

Berths No. 54 and 55: (Also see "Shipmaster's Report" – March 1985).

Min. Size Vessel: 30,000 d.w.t.
(see Note No. 1)
Max. Vessel Size: 150,000 d.w.t.
Deck Level of Loading Platform: 7.0 m./22.96 ft.
Depth Alongside Berth: 18.50 m./60.28 ft.
Max. LOA: 300 m.
Max. Draft: 16.65 m./54.60 ft. (See Note 2 below).
Loading Arms
(number and size): 7×16 in.
Quick Disconnect Coupling Size: 6 in., 8 in., 10 in., 12 in., 16 in.
Bunker Fuel Arms
(number and size): 2×10 in.
Quick Disconnect Coupling Size: 6 in., 8 in., 10 in., 12 in.
Max. Rate per Loading Arm: Heavy Fuel – 4,378 cu.m./hr.
White Products – 1,590 cu.m./hr.
Max. Rate per Bunker Arm: Heavy Fuel 1,590 cu.m./hr.
Diesel Fuel 160 cu.m./hr.
Number of Breasting Dolphins: 4
Number of Mooring Dolphins: 4
Available Mooring Hooks: 20
Distance between Centre of
Inner Breasting Dolphins: 56.0 m./183.7 ft.
Normal Shipside to Berth: Starboard
Shore Gangway Provided: Yes
Waterline to Manifold
Max. Height: 19.00 m./62 ft. 4 in.
Min. Height: 4.50 m./14 ft. 9 in.
0.18 m./sec.
Max. Approach Velocity: ±5 degrees
Max. Approach Angle:

Note 1: Tankers of less than 30,000 d.w.t. may be accepted at the Berth Nos. 54 and 55 if the light water line flat side forward and aft of the manifold is at least 34.0 m./111.5 ft., and subject to weather conditions.

Note 2: Shipmaster's Report: September 1995.

For PEMREF Jetties No. 54 and 55, there are some restrictions. We received the following Telex:

"Propeller to be fully submerged and trim limited to not more than 0.015 LOA while berthed at Jetties No. 54 and 55.

A stand-by tug will be assigned, at vessel's cost, for periods vessel is out of compliance".

YANPET Facilities Particulars: There is one chemical berth, No. 41 located in the inner basin. It can accommodate tankers from 5,000 to 35,000 d.w.t. The turning circle into the inner basin is 400 m. in diameter and is dredged to 13.5 m. below LAT.

The facilities are designed for the export and import of petrochemical products; these include: mono-ethylene glycol (MEG), di-ethylene glycol (DEG), glycol blackflush, hexene, vapour return, propylene, process water, and caustic soda.

YANPET Berth Particulars:

Minimum vessel size: 5,000 d.w.t.
Maximum vessel size: 35,000 d.w.t.
Maximum LOA: 200 m.
Maximum beam: No restriction.
Deck level of loading platform: 5 m.
Depth alongside berth: 13.5 m.
Maximum draft: 12.2 m.
Loading arms:

Size	*Product*	*Max. Loading Rate*
6 in.	Hexene	50 cu.m.p.h.
6 in.	Propylene	
10 in.	Ballast water	
	HFO & DO (bunkers)	
10 in.	M.E.G.	750 cu.m.p.h.
6 in.	Glycol backflush	
6 in.	D.E.G.	113 cu.m.p.h.
4 in.	Caustic Soda	50 cu.m.p.h.
6 in.	HFO & DO (bunkers)	

Quick disconnect coupling size – various adaptors available
Number of breasting dolphins – 4
Number of mooring dolphins – 4
Available mooring hooks – 20
Distance between centre of inner breasting dolphins – 33 m.
Daylight berthing only. No restrictions for unberthing.
Normal shipside to berth – Starboard.
Shore gangway provided.
Waterline to manifold Maximum height – 12.8 m.
Minimum height – 2.59 m.
Maximum approach velocity – 0.25 m./sec.
Maximum approach angle – ±5°
Fresh water available upon request.
Bunkers currently not available.

Ballast Water Facility: The Export Refinery Terminal incorporates a ballast water facility which is capable of processing ballast water from vessels loading at the 3 berths at the terminal and from the Chemical Berth, No. 41.

The facility has 3 initial storage tanks of 50,000 cu.m. each, which wil receive ballast water direct from the tankers.

Ballast water is passed through the facility's separator system; clear water is then passed to retention ponds prior to being pumped to sea and recovered oil is passed to the recovered oil system.

All ballast water handled at the facility is monitored to ensure compliance with current environmental standards and requirements.

Vessels loading at Crude, NGL and Chemical Berths will not be abl to discharge slops to the shore facility.

Bunkers: Not available alongside but may be obtained at the anchorag from barges.

Berthing Criteria: Max. Berthing Velocity:

Chemical Berth No. 41 0.25 m./sec.
Berth No. 42 0.25 m./sec.
Berth No. 54 0.18 m./sec.
Berth No. 55 0.18 m./sec.
Max. approach angle: ±5 degrees

Environmental conditions such as current, wind speed and sea stat should be considered in ensuring the above maximum criteria is no exceeded at final docking stage.

Mooring Arrangements: Each mooring dolphin, outer breasting dolph and loading platform is equipped with either double or triple quick releas mooring hooks, each combination of double or triple hooks having mooring capstan with safe working load of 3 tons.

The terminal will provide a required mooring arrangement for th loading berths. The mooring arrangement shows the number a position of the mooring hooks provided on each berth. The moor hooks are designed to handle 1 mooring line per hook.

Mooring boats will be utilised to run mooring lines to the moor dolphins from the tanker. The terminal will provide suitable messeng lines for heaving the mooring lines to the hooks.

In order to ensure the integrity of the berth facilities it is recommend that tankers in the 50,000 d.w.t. to 150,000 d.w.t. range provides moor wires at least for their spring and breast mooring lines. Th recommended minimum for tankers from 50,000 d.w.t. – 150,000 d.w is 8 mooring wires each end.

Tankers with the recommended mooring wire systems will be giv berthing preference during adverse or unsettled weather conditions.

All mooring lines should be of similar size and material and should be in good condition. Manual brakes must be set on tension winches when mooring is completed. The ship's crew must tend moorings at all times to maintain the ship's position at the berth.

Under no circumstances may the longitudinal or lateral movements of a vessel exceed the limited working envelopes (working areas) of the connected loading arms.

Docking Monitoring System: A system of velocity and distance indicating and recording instruments are provided for the 4 berths. The transducers are positioned on the berth structure with electronic equipment housed in the control room. An illuminated display is located on the berth structures to provide an indication of fore and aft ship distance and approach speed to the ship's Pilot.

Gangway: The Export Refinery Terminal will provide a gangway to the ship at each berth. Each berth is equipped with a hydraulically operated self adjusting gangway. The gangway provides the only permissible means of access to and from the tanker.

Ballast Water: Tankers arriving at the Export Refinery Terminal with clean ballast, which meets the current environmental standards of King Fahd Industrial Port, will be allowed to discharge the ballast water direct to the sea.

The discharge of clean ballast water into the sea from cargo tanks will only be permitted with the approval of the Harbour Master or his designated representative.

A monitoring procedure will be employed during the discharge of clean ballast to ensure quality is maintained.

Tankers arriving with "dirty ballast" or ballast which does not meet the port requirements must discharge ballast to the Terminal's ballast facility.

Details of this operation will be agreed with the Terminal operator when 'operation agreement' is made.

Slop Residues: Slop oil may be discharged to the ballast reception facilities consistent with content restrictions. Slop residues containing chemicals or emulsifying agents may not be accepted.

Prior to arrival at the Terminal, vessel's Master must request use of this facility giving following details:

1. Total quantity to be discharged.
2. Quantity of oil.
3. Quantity of water.
4. Type of chemicals contained if any.

Loading Arms – Chemical Berth – Berth No. 41: The Chemical Berth is equipped with 8 loading arms, 2×10 in. diameter, 5×6 in. diameter and 1×4 in. diameter as detailed below:

Arm Size	*Product*
6 in.	Hexene.
6 in.	Propylene.
10 in.	Heavy Fuel Oil (Bunkers)/Diesel Fuel Oil (Bunkers)/Ballast Water.
10 in.	Mono-ethylene Glycol (MEG).
6 in.	Glycol Backflush.
6 in.	Die-ethylene Glycol (DEG).
4 in.	Caustic Soda.
6 in.	Heavy Fuel Oil (Bunkers)/Diesel Fuel Oil (Bunkers)

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships' manifolds.

The loading arms and quick disconnect couplers are hydraulically controlled from a central operating location. A wandering control lead is available for local control on board the vessel for connecting by the berth operator.

Loading Arms – Berth No. 42: The berth is equipped with 6 loading arms, 4×12 in. and 2×10 in. as detailed below. 2×6 in diameter bunker loading arms are also provided.

Arm Size	*Product*
10 in.	Marine Heavy Fuel Oil/Ballast Water.
10 in.	Marine Heavy Fuel Oil/Ballast Water.
6 in.	Heavy Fuel Oil Bunker/Diesel Fuel Oil Bunker/Bunker Cutter Stock.
12 in.	Jet Fuel.
12 in.	ADO/Leaded Gasoline.
12 in.	Jet Fuel.
12 in.	ADO/Leaded Gasoline.
6 in.	Diesel Fuel Bunkers/Heavy Fuel Bunker.

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships manifolds from 6 in. to 16 in. ASTM.

The loading arms and quick disconnect couplers are hydraulically controlled from a central operating location. A wandering control lead is available for local control on board the vessel for connecting by the berth operator.

Loading Arms – Berth Nos. 54 and 55: The berths are each provided with 7 loading arms of 16 in. diameter and 2 bunker fuel loading arms of 10 in. diameter, as shown below:

Arm Size	*Product*
16 in.	Marine Heavy Fuel Oil/Ballast Water.
16 in.	Marine Heavy Fuel Oil/Ballast Water.
10 in.	Heavy Fuel Oil Bunker/Diesel Fuel Oil Bunker/Bunker Cutter Stock.
16 in.	Naphtha/ADO.
16 in.	Leaded Gasoline/Unleaded Gasoline.
16 in.	Jet Fuel.
16 in.	ADO/Naphtha.
16 in.	Leaded Gasoline/Unleaded Gasoline.
10 in.	Diesel Fuel Oil Bunker/Heavy Fuel Oil Bunker.

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships' manifolds from 6 in. to 16 in. ASTM.

The loading arms and quick disconnect couplers are hydraulically operated from a centrally located operating panel. A wandering control lead is also available for remote use when connecting arms to ship's manifold.

Grounding: All cargo/bunker loading connections are equipped with electrical insulating flanges, and therefore ships to shore bonding is not necessary.

Maximum Loading Rates:

Berth No. 42		
Heavy Fuel Oil	2,860 cu.m./hr.	18,000 bbls./p.h.**
Leaded Gasoline	3,180 cu.m./hr.	20,000 bbls./p.h.**
Automotive Diesel Oil	3,180 cu.m./hr.	20,000 bbls./p.h.**
Jet Fuel	3,180 cu.m./hr.	20,000 bbls./p.h.**
Heavy Fuel Bunker	480 cu.m./hr.	3,000 bbls./p.h.
Diesel Fuel Bunker	160 cu.m./hr.	1,000 bbls./p.h.
Berth Nos. 54 and 55		
Heavy Fuel Oil	8,756 cu.m./hr.	50,000 bbls./p.h.**
Leaded Gasoline	5,170 cu.m./hr.	32,500 bbls./p.h.
Unleaded Gasoline	5,170 cu.m./hr.	32,500 bbls./p.h.
Naphtha	5,170 cu.m./hr.	32,500 bbls./p.h.
Automotive Diesel Oil	5,170 cu.m./hr.	32,500 bbls./p.h.
Jet Fuel	5,170 cu.m./hr.	32,500 bbls./p.h.
Heavy Fuel Bunker	1,590 cu.m./hr.	10,000 bbls./p.h.
Diesel Fuel Bunker	160 cu.m./hr.	1,000 bbls./p.h.

Note: Loading rates for products marked ** are for 2 loading arms availability; rates should be halved to indicate rate per loading arm.

PEMREF Operational Agreement: Prior to any operational activity after a tanker is moored, an "Operational Agreement" will be made between the ship's responsible cargo Officer and the terminal representative. The Operational Agreement requires an exchange of information between the ship and terminal covering the following items:

1. Grades and quantities of cargo/bunkers required.
2. Loading rates and quantities per grade for start, maximum and topping off.
3. Standby time required for stopping loading and slow down for each grade.
4. Ballast quantity to be discharged to sea or ballast facility.
5. Slop residues to be discharged to facility.
6. Manifold connections/loading arms to be used for each operation.
7. Sequence of loading different grades/products.
8. Estimated time required to carry out each operation, to give total expected load time.
9. Information regarding (a) Communications, (b) Emergency Shutdown Procedures, (c) Tank Venting System, (d) Maximum pressures allowed, etc.
10. Has Ship/Shore Safety Check List been completed. (Also see "Appendix").

Inert Gas Requirements:

All vessels scheduled to load at PEMREF which are fitted with an inert gas system, must comply fully with the rules, and arrive, where applicable, with tanks fully inerted to below 8% Oxygen content.

Vessels which do not comply with the Rules will face delays in berthing, removal from the berth and possible rejection for loading.

Ship/Shore Safety Check List: Prior to operations on board tankers at the Terminal berths a 'Ship/Shore Safety Check List' will be completed by both ship and Terminal representatives who will together inspect the necessary items listed. Further checks will be made at intervals throughout the vessels time at the berth.

Safety Requirement Letter: The Master of each tanker will be given a letter concerning safety requirements. Receipt of the letter has to be acknowledged by signing and returning a copy of the letter to the Terminal representative.

Sea Valves: All sea-valves and overboard valves connected to the tanker's cargo system have to be closed and lashed prior to commencement of cargo transfer operations.

Loading Signal: During loading the international code flag "B" shall be displayed during daylight hours. During darkness a red loading light shall be displayed.

Shore Emergency Signals: Continuous sounding of vessel's fog signal.

Emergency Towing Wires: While at the Terminal, tankers have to provide emergency towing wires of adequate strength to move the tanker off the dock. The towing wires are to be positioned on the offshore bow and stern quarter of the tanker and the outboard eye should be maintained approximately 1 m. above water level at all times.

Emergency Pilot Boarding: A pilot ladder of sufficient length should be at all times on standby at the offshore side of the tanker's main deck. In an emergency the pilot ladder should be lowered to 3 ft. above the water line to enable boarding of the Pilot if this should become necessary.

AL MUAJJIZ TERMINAL: Lat. 23° 29' N., Long. 38° 24' E.

Location: 15 miles South of King Fahd Industrial Port Control tower and 21 miles from S2 Buoy.

Pilotage: All vessels intending to load cargo at Al Muajjiz Terminal are required to embark the Port Pilot at the South Channel Pilot Station in position Lat. 23° 27' N., Long. 38° 27' E., and on the outward passage they must disembark the Pilot at the South Channel Pilot Station.

Berthing:

	Berths No. 101 & 103	*Berth No. 102*
Tanker size (approx.)	35,000 d.w.t. – 300,000 d.w.t.	100,000 d.w.t. – 500,000 d.w.t.
Max. LOA	347 m.	412 m.
Max. draft	26.2 m.	29.6 m.
Loading Arms	4 × 20 in.	4 × 20 in.
Quick Disconnect coupling size	16 in., 20 in., 24 in.	16 in., 20 in., 24 in.
Max. Rate per Loading Arm	30,000 b.p.h.	30,000 b.p.h.
Number of Breasting Dolphins	4	4

The Terminal consists of a jetty trestle with 3 loading berths connected to a shore causeway. All 3 loading berths are fixed structures with fixed loading platforms, breasting dolphins and mooring dolphins. The terminal has 10 shore tanks, each of 1,000,000 bbls. capacity.

So far there is no shore metering system available and therefore Bill of Lading figures are determined by using ship's figures.

Notice to Mariners: No. 223/1990.

A new oil loading terminal facility has been built South of King Fahd Industrial Port as Ras Al Ma'ajjiz (as spelt on the relevant chart). Details as follows:

1. From a position on the coast of 23° 48.870' N., 38° 24.355' E., a causeway extends for 0.391 nautical miles on a bearing of 225°.
2. The terminal jetty consists of a line of dolphins connected by catwalks extending from 23° 48.633' N., 38° 23.923' E., for 0.751 nautical miles on a bearing of 135°. A catwalk extends from the end of the causeway to the jetty.
3. Navigation lights and loading platforms as follows:

	Position	*Depth Alongside*	*Characteristic*
North End	–	–	Morse (U).G.
South End	–	–	Morse (U).G.
Berth 103	23° 48.528' N. 38° 23.984' E.	28.8 m.	Morse (U).R.
Berth 102	23° 48.347' N. 38° 24.183' E.	32.5 m.	Morse (U).R.
Berth 101	23° 48.163' N. 38° 24.381' E.	29.0 m.	Morse (U).R.

Ballast: No facilities for dirty ballast.

Authority: King Fahd Industrial Port, Yanbu.

GENERAL CARGO AND CONTAINER TERMINAL: This facility is situated to the North of the Crude Oil Terminal. It has 7 berths along a 1,784 m. wharf. These include berths for Ro-Ro, heavy lift, conventional general cargo and cellular container vessels. The channel inside the barrier reef has been dredged to 14 m. below LAT and there are 2 turning basins at either end of the 2 km. berth frontage.

The Ro-Ro facility, adjacent to Berth No. 1, situated at the Northern end of the berth frontage, with a dredged depth of 14 m. below LAT is operational. A permanent ramp with a 1:25 gradient and an overall width of 34 m. is located at right angles to the berth frontage. Horizontal "Sumimoto" fendering is fixed to the ramp face at a height of 0.75 m. above LAT. The deck of the ramp is 2.0 m. above LAT rising to 2.36 m., 3.0 m. inshore from the ramp face. Three bollards, each rated at 90 tonnes are positioned either side of the ramp deck, providing a clear width of approximately 31 m. Additional bollards, also rated at 90 tonnes, are situated on the berth frontage, the first 30 m. South of the ramp face and thereafter at approximately 30 m. intervals. "Sumimoto" 'pie' type fendering, spaced at 10 m. intervals, is provided on the berth frontage.

The maximum uniform live loads on the Ro-Ro ramp is 6.25 tonnes/sq.m. The maximum concentrated load is 1,100 tonnes when used on a Scheurle platform trailer, which provides for a 28 tonnes maximum axle load with a maximum load on a contact area of 200 m.×455 mm. of 7 tonnes: or 60 tonnes on 0.3 m.×0.3 m. (as from 20 ft. containers stacked 3 high): or, 91 tonnes on 0.6 m.×0.5 m. (as from 40 ft. containers stacked 3 high): or, 80 tonnes front axle load of a container fork lift truck.

Cargo work is carried out by SEAPA stevedores and is continuous 7 days a week, 24 hours a day with 2 × 1 hour breaks. There are 3 container gantry cranes always available.

Particulars of the container cranes are:

Safe working load	40 tons
Outreach	34.5 m.
Hoisting height above rail	26.0 m.
Elevation of wharf above Maximum HW	3.17 m.

Cycle time is 90 secs. or 40 containers per hour.

The 3 container cranes are numbered 1, 2 and 3 from the Ro-Ro ramp end, container tracks continuous over 500 m. (Berth Nos. 1 and 2). The berthing arrangements are:

		Length of Wharf
Berth No. 1	Ro-Ro Terminal	200 m.
Berth No. 2	Container Terminal	300 m.
Berth No. 3	General Cargo	200 m.
Berth No. 4	Heavy Lift	180 m.
Berth No. 5	General Cargo	180 m.
Berth No. 6	General Cargo	180 m.
Berth No. 7	General Cargo	180 m.

A minimum clearance of 15 m. between vessels at adjacent berths is required during berthing/unberthing operations.

BULK TERMINAL: The Bulk Terminal consists of a wharf 500 m. in length with 2 dry bulk berths, Nos. 21 and 22. The wharf is 33 m. wide and can accommodate bulk carriers up to 60,000 d.w.t. The water off the wharf is dredged to 15.5 m. below LAT. The maximum draft allowed is 13.9 m. (46 ft. 07 in.).

PEMREF's sulphur loading equipment is located at the Bulk Terminal's "Sulphur Berth" (Berth No. 21) and is capable of loading prilled sulphur at a maximum rate of 420 t.p.h.

A slewing arm loader is designed to operate along the face of the sulphur dock to any hold of vessels up to 30,000 d.w.t., without requiring movement of the ship.

Ships mooring at the Bulk Terminal will be required to provide gangway access to ship.

BALLAST: The discharge of ballast water containing quantities of oil, or high levels of mineral or chemical pollutant, into the water of the Port is prohibited.

The discharge of ballast water from segregated or permanent ballast tanks into the waters of the Port will be permitted provided that the Master signs a declaration that the permanent ballast is clean and not affected by any pollutants.

The discharge of clean ballast water, from cargo tanks, into the waters of the Port will only be permitted if the oil content of the ballast water does NOT exceed 10 parts per million. Cargo tank ballast water will be sampled on the arrival of the vessel and measurements taken to determine the total oil concentration in the water. Subject to the results of the measurements being within the prescribed limits, the Harbour Master, or his deputy, will approve the start of deballasting. Throughout the cargo tank ballast discharge the oil concentrations in the discharged water will be closely monitored and the results reported to the Harbour Master, or his deputy, who will decide when such discharge shall stop.

MEDICAL: Medical facilities are available for the treatment of emergency cases only. Masters should, if possible, provide advance notice, to their Agent, of their requirements, together with name, rank, nationality, passport or seaman's identity book number including date of issue and place of issue.

FRESH WATER: Potable fresh water is available at the General Cargo and Container Terminal, Bulk Terminal and Export Refinery Terminal. Fresh water is not presently available at the Crude Oil Terminal and NGL Terminal. Fresh water is also available in small quantities at the anchorage from a tug. Masters should contact their Agent well in advance to establish availability.

FUEL: Bunker fuel is available from a bunker barge at the anchorage or from a bunker barge alongside at the General Cargo and Container Terminal.

Report: January 1995.

Bunker supply is available at Berth No. 21, Bulk Terminal, King Fahd Industrial Port. This facility, however, is only open to those vessels which are loading or discharging at King Fahd Industrial Port. Thus, vessels will not be accepted for 'bunkering only'.

The supplier is Bakri Bunker Trading Company, Jeddah.

The bunker specifications are as follows:

(a) Straight run fuel oil of maximum 180 CST, ex-Yanbu Refinery with maximum water percentage of 0.5.

(b) Marine gas oil, ex-Yanbu Refinery with maximum water percentage of 0.1.

Posted prices of both fuel oil and MGO are the same as Jeddah prices.

Restrictions at berth:

1. Maximum draft: 13.9 m.
2. Maximum d.w.t.: 60,000 tons.

CONSULS: At Riyadh and Jeddah.

REPAIRS: While alongside berths, engines and propulsive machiner must be ready at all times to leave the berth at 10 minutes' notice, unde full power.

No repairs of any kind are permitted alongside any berth unles mutually agreed by the Master, Harbour Master and Terminal Manage

Any repairs involving "Hot Work" will be subject to special condition contained in the "Hot Work Permit" which must be obtained from th Harbour Master.

CUSTOMS: *Import/Export Prohibitions:* All goods to be imported into, or exported from, the Kingdom of Saudi Arabia are subject to examination by the Customs Authorities. The importation of certain articles is strictly prohibited, for example:

Explosives and Firearms, including air rifles
Implements of war of any kind, including antiques
Alcoholic beverages of any kind
Religious matter not pertaining to the Moslem faith
Pig meat or pig products
Playing cards and gambling games or devices
Narcotics
Pornographic material.

Trafficking in these items between ships, and between ships' crews and shore personnel, is strictly prohibited.

Also see "General".

TIME: The Time Zone is GMT plus 3 hours.

SHORE LEAVE: Ship's personnel are NOT permitted ashore, nor on the wharves FOR ANY PURPOSE WHATSOEVER (this includes the reading of the ship's draft) until Pratique is granted, and then are allowed on the wharves only if actually engaged in duties in connection with operations of discharging, deballasting or loading.

All shore leave is contingent upon compliance with Saudi Arabian Quarantine and Passport Regulations. For current details concerning these regulations and shore leave restrictions the ship's Agents must be consulted.

SAFETY/POLLUTION: *Safety Requirements:* A letter concerning safety requirements will be given to the Master of each vessel by the Terminal Supervisor at the Crude Oil Terminal.

Receipt of the safety requirement letter has to be acknowledged by countersigning and returning a copy to the Terminal Supervisor.

Ship/Shore Safety Check List and Precautions: Terminals in King Fahd Industrial Port follow the recommended safe practice for loading, discharging and related operations as contained in the International Oil Tanker and Terminal Safety Guide and the International Chamber of Shipping's Tanker Safety Guides for Chemicals and Liquefied Gas, or other comparable Guides.

Prior to commencement of any cargo/bunker transfer operations, a ship/shore check list is to be completed and signed by responsible personnel from ship and shore. Each item should be positively verified before it is ticked and, if necessary, a physical check will be performed.

Regular inspections by the Terminal Staff will be made with the ship's Master, or his deputy, to ensure that the relevant safe practices are strictly adhered to. The Harbour Master or his deputies may also carry out inspections. If any infringement of the recommended safe practices is observed, the attention of the person in charge will be drawn to the fact and, if the situation is not resolved immediately, all operations must cease. In the event of continued and blatant disregard of the regulations, the vessel may be ordered off the berth for appropriate action to be taken by the Charterers and Owners concerned.

Tank cleaning and/or gas freeing is only permitted with the approval of the Terminal Manager and Harbour Master and only if tank washings can be discharged into reception facilities (Also see "Appendix").

Crude Oil Terminal Emergency Procedures: Emergency procedures, both on board and offshore, shall be introduced in the event that normal operational practice has to be interrupted or suspended as a result of an unforeseen incident that would create unsafe conditions while loading crude oil at one of the berths of the Crude Oil Terminal.

Crude Oil Terminal Emergencies which would require immediate action by terminal personnel or shipboard personnel are:

1. Electrical storm.
2. Electrical power failure.
3. Mechanical failure.
4. Leakage, spill.
5. High gas concentration.
6. High winds exceeding 35 knots.
7. Fire.

Actions to be taken shall be determined by the type and severity of the incident and are:

(a) Stop loading.
(b) Comply with emergency reporting procedures.
(c) Disconnect loading/bunker arms.
(d) Fire facilities standby.
(e) Standby for unmooring.
(f) Departure from berth.

Emergency actions should be initiated by offshore personnel when an emergency is detected onshore or on board that tanker. It is important that the first able-bodied person or persons at the scene of the emergency should take whatever action is appropriate and necessary to protect personnel, minimise the hazard and to limit the extent of damage.

All Crude Oil Terminal personnel have to be familiar with the King Fahd Industrial Port Emergency Plans and, on declaration of an emergency for the Port, follow the procedures as listed in these emergency plans. The King Fahd Industrial Port Emergency Plans apply to all areas within the port limits as defined by the Rules and Regulations for King Fahd Industrial Port.

Oil Pollution Prevention: Any oil pollution of the waters of the King Fahd Industrial Port will be treated as a very serious matter. In order to prevent oil pollution, the Port Authority carries out continuous surveillance of the Port area. If any vessel is seen, or there is evidence to suggest a vessel is polluting the water of the Port, instructions will be given for all loading/discharging/deballasting operations to cease. A detailed investigation will be carried out and any vessel held responsible for pollution, will be required to pay the costs of all clean up operations and any fines that may be levied.

Masters, Owners and Charterers are reminded:

A. That before any vessel enters the Port, the Master is required to notify the Pilot of any special conditions, difficulties or peculiarities such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or loading/discharge of vessels ("Instruction to vessels and conditions of use of all berths within King Fahd Industrial Port").
B. In addition to (A) above, tankers and gas carriers are obliged to give a similar undertaking in their pre-arrival information.
C. All tankers, gas carriers and any vessels bunkering are required under the Rules and Regulations for Seaports of the G.C.C. Member States, Part 3, Section 4, to ensure all alarms and safety trips are tested and working, and that all pipes, valves, hoses or other apparatus shall be in good condition and free from leakage. Drip pans and deck scuppers shall be in position and plugged.
D. Suitable sorbent material or other materials or equipment should be readily available on deck in order to clean up any spillage.

GENERAL: *Emergency Plans:* Information will be supplied to each vessel arriving at the various terminals in the port detailing action to be taken in the event of an emergency situation arising. Masters, officers and crew should familiarise themselves with this information.

A Port Emergency may be declared in the event of:

a fire on a terminal or ship;
a pollution incident occurring from a terminal or ship;
a collision, grounding, sinking or other major incident occurring within the Port area.

A Port Emergency can only be declared and terminated by the Harbour Master who will make a broadcast on VHF to this effect. Instructions will also be issued to inform all vessels that a Port Emergency has been declared. It is vital, therefore, that all vessels should have their VHF available for immediate operation and that provision is made for a continuous listening watch to be maintained in the event of a Port Emergency being declared.

The alarm may be raised by:

Contacting King Fahd Industrial Port Control by VHF Channel 16,
or by continuous sounding of fog signalling apparatus, or
by visual means, or
if ashore by whatever means is available.

Initial action should be taken by those persons at the scene until the arrival of assistance.

The control of all operational activities afloat, and the movement of vessels during a declared Emergency will be exercised by the Harbour Master who will undertake the direction of these activities through King Fahd Port Control and will liaise with the Port Authority.

All loading or discharging of dangerous and/or flammable goods in the Port must cease immediately a Port Emergency is declared.

Port Regulations: Every vessel which arrives at the port must have a copy of the Rules and Regulations for Seaports issued by the Co-operation Council for the Arab States of the Gulf on board. On first arrival at the port, these Rules and Regulations must be obtained.

Saudi Arabian Government Regulations: Saudi Arabian Government Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their agent. While in Port, whether at anchorage or at a berth, the vessel's personnel are under the jurisdiction of Saudi Arabian Laws.

The taking of photographs while the ship is in port is strictly forbidden by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors, are to be under lock and key during a vessel's stay in port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred due to Government investigations of violations.

Provisions: Frozen meat (except pig meat), fish and fresh vegetables are available locally, however Masters are advised to contact their Agent well in advance to establish availability and prices.

Stores: Local availability of chandlery items is limited and Masters should contact their Agents well in advance to establish availability. Storing not permitted alongside Saudi Aramco berths.

Lights: British Admiralty List of Lights and Fog Signals – Volume "E".

WEATHER:

Climate: The climatic conditions affecting King Fahd Industrial Port are seasonal. In Winter onshore, air temperatures range from 25°C during the day to about 12°C at night. In Summer air temperatures range from 35°C during the day to 25°C at night. Extreme air temperatures recorded in recent years in the area have been 49°C in May and 6°C in February. Temperatures offshore are generally several degrees lower. Relative humidity varies throughout the year with average values between 65% and 70% in Winter and 50% to 55% in Summer, however values of 100% may occur for short periods around dawn. The average annual rainfall taken over a 4 year period is 3.2 mm.

Winds: A diurnal sea breeze/land breeze cycle occurs almost daily throughout the year and causes wind speeds of 10 knots and above to occur from the N.W. during the late afternoon. Storms occur as frequently as every 5-10 days and sometimes can last as long as 2 weeks. Although there is little drop in barometric pressure and very rarely any precipitation during these storms, wind speeds of up to 30 knots may occur from the North or N.W.

Tides and Currents: The mean tidal range is about 0.34 m., but fluctuations due to non-tidal effect, caused by storms, can be up to about 0.50 m. with a drop in mean sea level during the storm and a significant increase after the storm or as it subsides. Generally tides are semi diurnal with a period of 12 hours 25 minutes. Information to date suggests that the following datums be adopted:

Datum	*Elevation above PLAT* (m.)
Provisional Highest Astronomical tide (PHAT)	1.14
Mean High Water Springs (MHWS)	0.80
Mean High Water (MHW)	0.74
Mean High Water Neaps (MHWN)	0.67
Mean Sea Level (MSL)	0.57
Mean Low Water Neaps (MLWN)	0.47
Mean Low Water (MLW)	0.40
Mean Low Water Springs (MLWS)	0.34
Indian Springs Low Water (ISLW)	0.32
Provisional Lowest Astronomical Tide (PLAT)	0.00

Currents in the area are influenced by local wind conditions, tide, and the general circulatory pattern of the Red Sea. Generally currents within the port have been observed at less than 0.5 knots and run parallel to the coast. However, they are considerably influenced by surface wind activity.

Sea Conditions: Sea conditions can vary considerably within the Port limits. Wave heights in the port area are usually lower than 40 cm. during sea breezes, but during storms, waves in excess of 2 m. are common outside the offshore reefs while waves exceeding 1 m. are common in the inner port area. There is no distinct seasonality in this respect.

Sea Salinity and Sea Water Temperatures: Sea water temperatures are similar to air temperatures and range between 25°C (77°F) and 31°C (88°F). Salinity varies between 37 and 39 parts per thousand.

Visibility: The incidence of fog is rare, but, should it occur, it is more likely during the period November to April. During the summer months from May to September the incidence of poor visibility (less than 5 miles) can be quite high due to mist and haze, or dust particles held in suspension in the atmosphere. However, throughout the year, dust storms may occur obscuring the coastline.

APPENDICES:

APPENDIX "C"

SOLAS Convention – Ratification:

The Government of Saudi Arabia has ratified the SOLAS Convention of 1974 and its 1978 Protocol on 29th May, 1984. Therefore, Saudi Aramco is now obliged to enact the provisions of the said Convention as soon as possible.

Please inform all Shipowner/Operator clients of the following:

1. Effective 1st January, 1985, all vessels of 70,000 d.w.t. and larger calling at any of Saudi Aramco's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.
2. Effective 1st March, 1985, all vessels of 20,000 d.w.t. and larger calling at any of Saudi Aramco's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.

Vessels not so equipped will not be accepted for loading as of the effective dates mentioned above.

The SOLAS Convention of 1974 represents a significant contribution to safety of tankers and oil installations and Saudi Aramco recommends that Shipowners take immediate steps to comply with the provisions of this convention as soon as possible and no later than the effective dates mentioned above. No exceptions will be allowed except in the most unusual circumstances.

Signed:

Manager, Oil Supply Planning and Scheduling Dept., Dhahran

APPENDIX "D"

Flammability Check of Ships' Fuel Tanks.

S.P.A. Circular No. 15335/85

Dated: 14.7.1405H/04.04.85G

With immediate effect you are advised to inform all concerned parties that the Port Management of all S.P.A. ports will require additional flammability checks on fuel tanks of OBO carriers and tankers excluding tankers engaged solely in the transport of chemicals.

The purpose of this extra precaution is to deter the use of cargo oil as fuel supplement and will be required on a random basis as advised by the Port Operations Department. The results are to be incorporated (when applicable) on the Gas Free Certificate.

When such a random test is required by the Port Management it will be necessary for the ship's Agent to arrange for the services of a Surveyor.

For your information if the atmosphere in any fuel oil bunker tank be discovered at more than 15% (LEL) then the ship's Master will be required to engage a Surveyor to provide an exact flashpoint analysis of the tank contents.

Furthermore, should the flashpoint be less than the prescribed limits stipulated in Regulation 33 of SOLAS, the Port Management reserves the right to remove the ship from the berth.

Signed:

President and Chairman of the Board Ports Authority,
Kingdom of Saudi Arabia.

SHIPMASTER'S REPORT: March 1985.

Note: Vessel was chartered at very short notice, hence problems experienced are not typical.

Arrival: As soon as vessel was ordered to Yanbu, a pre-arrival information list was telexed to Agents, as per format in "Guide to Port Entry". (Referred to locally as the AA to ZZ List). Unfortunately, these Agents turned out to be in Jeddah, and the list was not forwarded to Yanbu until at least 1200 hrs. on the following day, by which time the vessel had been instructed to repeat the message to a Telex No. given by the Port Control by VHF (who turned out to be the local sub-Agent).

On approach to the Pilot Station, the vessel was instructed, when 24 miles from the Pilot Station, to remain 3 hours steaming from the Pilot Station, to await orders. (When the Pilot eventually boarded, this instruction was discussed with him and it transpired that the Port Radio operators invariably say this although the intention is to remain WITHIN 3 hours steaming of the Pilot Station).

Vessel was brought from sea to the inner anchorage. Anchorage positions have been established as follows:

N1	Lat. 23° 56.64' N., Long. 38° 11.65' E.
N2	Lat. 23° 56.47' N., Long. 38° 11.86' E.
N3	Lat. 23° 56.44' N., Long. 38° 12.14' E.

Depths at these anchorages, as per chart 328, vary from 35 m. to 45 m.

Vessel was berthed between 0116 hrs. and 0333 hrs. next day, on Berth No. 55 (Suez East). Tug Masters are of doubtful ability regarding tug handling, although the tugs themselves are quite powerful. Language difficulties seem to be a part of the cause.

The berth is intended for use by vessels up to 150,000 d.w.t., and a depth of 20 m. alongside was measured by echo sounder.

On berthing at night, quarantine lights are required.

After berthing, no transmissions, except from low power walkie-talkies, are permitted, not even main VHF on low power.

Despite "OO" through "RR" of the pre-arrival message being correctly sent, the Terminal was unaware that the vessel had ballast in cargo tanks. Once they discovered this, the vessel had to be moved 70 m. to use deballasting lines. Contrary to advise in the port information book supplied by King Fahd Port Control, ONLY SEGREGATED BALLAST is permitted to be discharged into the sea.

Cargo: 2 Cargo Surveyors were appointed: S.G.S. on behalf of PEMREF and Watson Gray on behalf of MOBIL. Both were most helpful.

It is understood that, from March 1985, all petroleum cargoes, of any sort, will have to be loaded into INERTED tanks.

We had no difficulty in obtaining loading rates requested, or in reducing rate for topping-off.

Throughout loading, the gangway was attended by an armed guard, and ship's personnel were not permitted on the jetty at any time, not even for the purpose of reading draft.

Loading lines are 16 in. (400 mm.) rigid booms (total of 7) and 2×10 in. (250 mm.) rigid booms for bunkers.

Apparently, it is not uncommon for cargo contamination to occur within the shore tank farm and a number of cargoes, found to be 'off spec.' when loaded, have had to be discharged and sound cargo loaded.

Delays: Pilots require 2 hours' notice for sailing; Agent will not in any case order Pilot until shore figure for cargo has been obtained; this takes 1.5 hours, thus minimum of 3.5 hours between completion and sailing, officially. In fact, Pilot boarded on this occasion 3 hours before completion and a further delay was occasioned only due to cargo papers not being ready.

Port Facilities: Much as described by "Guide to Port Entry". All port installations, except the domestic refinery terminal (Chart 328), are now complete, however, utilisation of these installations appears to be low; only one berth on Container Wharf was in use and product and crude jetties had berths empty for protracted periods.

SHIPMASTER'S REPORT: October 1985.

The port is approached from the West, or the S.S.W., in specifically marked channels which have been surveyed. Water is very deep and though many ships were seen passing through the uncharted regions none were VLCCs and the Pilots at the port recommend the use of the proper lanes.

Accurate positions can be obtained, when approaching from the West, by fixes on the land at Ras Baridi and more particularly by radar and visual fixes of the industrial complex to the South of this point which is marked on the charts as a silo. There are actually numerous chimneys and buildings there. When closer, the beacon at Scherbo Reef and the adjacent buoys all show up well on radar though the Racon on the beacon was not working in October 1985. The beacon is not easy to see visually even when quite close.

There was no apparent current in the approaches to the Pilot Station. Note that the Pilot does not board at the position marked on the charts but at a point due North of Scherbo Beacon and so ETAs should be calculated to this point. He also leaves there when outbound.

King Fahd Port Control listens on VHF Channel 16 and ETAs should be sent to them at least 4 hours and 2 hours before arrival so that the pilot boat knows when to leave the shore to rendezvous at the above point. The boat listens on VHF Channel 74. The Pilot wants a speed of about 8 knots at time of boarding and a combination ladder on the lee side. A speed of about 13 knots was requested on 15 minutes' notice of reduction and this will usually be maintained for about one hour.

There are 3 berths for VLCCs and the allocation criteria is deadweight and the amount of flat side. Berth 61 takes 80 – 260,000 d.w.t. and requires a flat side of at least 400 ft. Berth 62, takes 275 – 500,000 d.w.t. and a flat side of 460 ft., and 63 takes 120 – 280,000 d.w.t and flat side of 420 ft. There are occasional queues for No. 61 as the majority of ships fit this berth. No. 62 is frequently unoccupied.

4 tugs meet the ship as she swings in from the approach channel towards the berths. They are all about 3,400 h.p. and most are Voith Schneider. Tugs' wires are used and they have good messengers already attached so that only a heaving line is needed from the ship

All ships berth starboard side alongside with moorings of 3, 3, 2 and springs are sent away first. The tugs hold the ship alongside until mooring is complete. The berths lie about 130°/310° and the prevailing wind is from the W.N.W. up to Force 6/7.

Vessel berthed at No. 63 as she would not fit any better on the other berths. Masters should push for their headlines to be put on the Southernmost hooks for No. 62 berth, if available, as this gives good leads and the Supervisor says it is possible.

The berths were originally designed for SBT tankers and so have no dirty ballast lines (though other berths in the port have this facility). However, since Saudi Aramco took over the berths there have been talks and lines may be fitted.

Arrival ballast must be able to pass very stringent laboratory tests otherwise the ship will be refused and ordered to sail. *At least one ship per month suffers this.*

There is a large desalination plant North of the port making water for most of the area. Pollution costs and fines are HEAVY.

The ballast requirements are a maximum of 8 p.p.m. and an average of 8 p.p.m.. Samples are taken of the top (skim), middle and bottom of the cargo ballast tanks and an oil absorbent cloth is then dragged over the surface in each tank. All deck openings must be available as well as the tank lid and they utilise most of them. Shore also reserves the right to test the permanent ballast tanks. Samples are taken ashore and the results known before any deballasting is permitted. A small boat is stationed at the ship's side adjacent to the ballast discharge throughout and hourly samples are taken at the pumps. On this vessel the part flow system was operating and shore were much impressed with this as it permitted them to constantly monitor the ballast. They took the hourly samples from there (in fact they trusted the ship to take them for most of the time as the gangway had to be removed due to airdraft). Shore at present only requests that at least 30 cm. is left in each tank but this will soon become a regulation for further protection. They are also upset by rust and IG discoloration of the ballast. It is recommended that ballast is changed as near to arrival time as possible to lessen this.

This vessel had a maximum content of 4 p.p.m. and an average of 1 p.p.m. and would appear to be ideally suited to the port as the ballast is normally very clean.

The Agent, Customs and Port Health board first on arrival at the berth and the "Q" signal must be lowered as soon as Pratique is granted as no-one else will board until this is done.

There are 6 Chicksans at each berth, 2 of which are for bunkers, and the cargo ones are designed for 24 in. connections but all reducers are available ashore and in fact the 16 in. size is more or less permanently attached. The shore line is 56 in. and the distance from the tank farm is about 8 km.

For Basrah Crude, the maximum loading rate is 150,000 bbls.p.h. Shore will try to insist that the ship maintains her full loading rate until one hour prior to completion and a close check must be kept on the rate as vessel's request for a reduction may not be heeded! It is suggested that this is clarified before start of loading and cargo stopped if reduction is not heeded, later.

There is a storage capacity of some 3 million barrels for Basrah (they call it Iraq Light) Crude and a maximum pipeline throughput of 2 million barrels per day though the average is only about 500,000 barrels. The maximum is used when they have a ULCC and need to maintain stock which is seldom. The average API is 33.5.

Incidentals: All cameras must be placed in bond. No one is allowed on the jetty for ANY reason. If there is a crew change then 2 new Crew Lists will be required, incorporating all changes, for outward clearance. Incoming members' baggage was searched three times and one man had some family photos removed as a girl had an off-shoulder dress. There is of course no argument. Agent's office is 40 km. away and he is often difficult to contact.

Generally speaking the shore personnel are friendly and helpful. There is only this 'problem' of the loading rate which must be sorted out.

SHIPMASTER'S REPORT: October 1986.

Approaches: The cement silo in approximate position Lat. 24° 16.35' N., Long. 37° 33.55' E. (near Ra's Baridi) gave a good strong echo at 48 miles. This was in sufficient time to ascertain the vessel's position for the alteration of course into the Northern Approach Channel.

Documents: Papers required by the Agent:

10 Crew Lists (standard IMO Form 5 acceptable).
1 Vaccination List.
2 Personal Manifests.
2 Stewards Stores Lists.
*3 Health Declarations.
*4 Arrival Details.
*2 Passport Control Office Arrival Details.
*1 Customs Declaration.
*1 Arrival Report.
*1 Customs Alcohol and Tobacco Declaration.
*Forms supplied by local Agent.

Telex Numbers:

Aramco, Yanbu: 662333 Aramco Sj. 661052 Aramco Sj.

Port Management: (Tankers only) 662360 Portct Sj. (Others) 661096 Portct Sj.

SHIPMASTER'S REPORT: June 1990.

All cargo tanks must be below 8% oxygen before vessel may enter port. 02 content checked on arrival alongside.

A fire hose must be rigged on the poop.

Manifold drip trays must be free of oil.

Pilot boarded from tug about half way between reporting Positions "A" and "B", due to weather conditions being rough.

Three tugs for berthing 70,000 d.w.t. vessel, one tug each end with tug's line and one tug pushing, but does not make fast.

Moorings consisted of 3, 2 and 2 each end. Springs first by ship's heaving line and shore messenger, breasts and stern/head lines by boat.

Fire wires to be turned up on bitts with at least 5 turns, then eye to be suspended 1.0 m. – 2.0 m. above the water with heaving lines attached.

Please note that the pilot boarding position given in the "Guide" is not the same as on B.A. chart, which gives the position as 24° 2.5' N., 37° 45' E. However, it seems the pilot will normally board inside, and usually disembarks as soon as possible.

Senegal

DAKAR: 14.40 N. 17.26 W. (See Plan)

PORT LIMITS: *North:* From the point of Bel-Air by a parallel from N.E. of the N.E. Jetty of the harbour, to the point of 1 mile N.E. by a meridian passing 2,900 m. East of the Round-Point determined by the crossing of Felix Eboue and Avenue de la Jetee Nord and by the parallel passing 2,060 m. North of Goree Island.
East: By the meridian passing 1 mile East of Goree.
South: By a line joining the Cape Manuel from the South point of Goree prolonged until it encounters the meridian passing 1 mile East of Goree.

DOCUMENTS: Vessels carrying hazardous and/or strong smelling cargoes must declare to the Harbour Master, at least 48 hours before ship's arrival, the nature/quantity/packing of these goods, as well as their stowage on board. Same applies for Arms and Ammunitions.

Health:
2 Crew Lists.
1 Sanitary Declaration.
2 Lists of Date of Vaccinations.
(Valid vaccination for Yellow Fever for all persons)

Customs:
3 Crew Lists.
2 Stores Lists.
2 Personal Effects Declarations.
2 Slop Chest Lists.
1 Arms and Ammunition List.

Immigration:
4 Crew Lists.
2 Lists of Ports of Call with dates of arrival/departure.

Agents:
1 Crew List.
1 Personal Effects Declaration.
1 Slop Chest List.
2 Lists of Arms and Ammunition.

Papers required on arrival: Bills of Lading for cargo to be discharged and Master's copy. 2 copies of Cargo Manifests for cargo to be discharged.

Great care should be taken in completing all Store Lists, Slop Chest Lists and Personal Effects Lists as Customs check all stores, including fridge spaces. All paints onboard must be declared.

Customs also board vessels at anchor and inside territorial waters, inflicting heavy fines in cases where stores, etc. are not prepared and ready for inspection. Also, heavy fines are imposed for any discrepancies. Even when calling at port for emergencies (e.g. Medivac) a full set of documents must be prepared before entering territorial waters.

No vessel is allowed to leave Dakar without having received on board an outward manifest duly visaed by the local Customs Authorities. Vessels leaving without such a manifest will be heavily fined.

PILOTAGE: Pilots meet vessels off the North point of the Island of Goree in a naturally sheltered area. Pilot available 24 hours and service is compulsory. Pilots on VHF Channel 16.

RESTRICTIONS: During the rainy season, all vessels with a draft of more than 32 ft. 6 in. could be delayed, due to the effects of swell, at anchorage in outer roads and await meteorological conditions permitting their entry into the harbour.

Use of whistle signals to call Pilot is forbidden between 2200 hrs. and 0600 hrs. The harbour area is dredged to a depth of 10 m. to 11 m.

Dangerous Cargo: Vessels are allowed to have the following dangerous cargo on board:

For Discharging	*North Area*	*South Area*
I.M.O. 1	20 tons	10 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	25 tons
In Transit	*North Area*	*South Area*
I.M.O. 1	25 tons	20 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	40 tons

MAX. SIZE: Ships of 30 ft. draft are able to enter at all stages of the tide by day and night. Vessels up to 36 ft. draft may enter at high tide except possibly during the stormy season, between mid August and mid October.

HEALTH: Health Officials board vessel immediately after berthing alongside. For passenger vessels, these formalities are effected before berthing to avoid delays. Vessels at sea may obtain medical advice by VHF or telex via Dakar Radio.

Inoculation/Vaccination can be arranged through Agent during weekdays.

Free Pratique can be granted via radio by Agent, by using international Code Words "MIBDU/MIJMA".

RADIO: ETA advice should be sent 96 hours, 48 hours and 12 hours prior to arrival including cargo to discharge, drums to discharge (if any), draft on arrival, expected draft on departure, last port and next port of call. Agents should be notified of tug requirements, VHF Channel 8.

VHF: The Port Captain's Office, Pilot Station and tugs are equipped with VHF, with the following Channels: Channel 16 used by vessels approaching to contact Pilot Station or Port Captain's Office; Channel 12 used during manoeuvres for communications between Pilots and tugs; Channel 6 used only by the tug station.

TUGS: Operated by a private company, 3 tugs available up to 2,000 h.p. (bollard pull 24 tons). Compulsory for loaded tankers.

BERTHING: 10,000 m. of quay length available of which more than half has depths of 8 m. to 11 m. alongside.

The Northern area has 5 wharves with depths of 23 ft. – 36 ft.

Dock 4: Length 572 m.

Berth 41: Draft 33 ft. Equipped for discharging bulk grain with private equipment (rate of 4,000 tonnes per day) and load ground nuts.

Berth 42 – 43: Draft 33 ft. Used for the discharge of rice.

Berth 45: Length 120 m., draft 23 ft. Used for the discharge of liquified gas.

Dock 5: Berth 52 (Taiba Phosphate Quay): Length 170 m. Max. draft 36 ft. Loading at an average of 900 tonnes per hour (Air draft 35 ft.).

Dock 6: Length 634 m.

Berth 61: Length 210 m. Used for wine and ground nut oil tankers with a draft of 27 ft.

Berth 62 – 63: Length 425 m. Max. draft 36 ft. A new terminal of containers with area of 50,000 sq.m.

Dock 7: Berth 708 (Thies Phosphate Quay): Length 215 m. Max. draft 32 ft. Loading at an average of 200 tonnes per hour.

Dock 8: Total length of 265 m. and depth of 32 ft.

Berth 81: New terminal with gantry crane/conveyor belt enabling a daily discharging/loading rate of 7,000 tonnes (bulk sulphur, fertiliser, etc.).

Berths 82 – 85: For bunkers, general cargo, logs, scrap iron, bulk grain, etc.

The South area has 3 wharves with a depth of 26 ft. – 33 ft.

Dock I is 460 m. long.

Berth No. 12	Draft	26 ft.	3 in.
" " 13	"	28 ft.	7 in.
" " 14	"	28 ft.	7 in.
" " 15	"	33 ft.	
" " 17	"	33 ft.	

Dock II

Berth No. 21	Draft	27 ft.	3 in.
" " 22	"	26 ft.	11 in.
" " 24	"	26 ft.	3 in.
" " 25	"	25 ft.	11 in.

Dock III is 350 m. long. Max. draft of 32 ft. 10 in. Reserved for trade with the Republic of Mali.

Mole de Peche: 1,461 m. of quays, supplied with water and bunkers. Areas for spreading out fishing lines and nets.

CRANES:
5 Mobile cranes × 20 tons.
1 Mobile crane × 60 tonnes.
6 Mobile cranes × 25 tonnes.
1 Floating crane × 30 tonnes.
1 Mobile crane × 100 tonnes.
1 Mobile crane × 70 tonnes.
6 Mobile cranes × 40 tonnes.

In addition, there are many mobile cranes with capacity 2 tons - 15 tons.

CONTAINER FACILITIES: *Container Terminal:* Length 430 m., depth 11.6 m. Back-up area of 8 ha., connected to an extension of 6 ha. 120 reefer points.

Containers are also handled at Pier 3.

STEVEDORES: Normal working hours, weekdays from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Saturdays from 0800 to 1200 hrs. Overtime, weekdays from 0500 to 0800 hrs.; from 1200 to 1400 hrs.; from 1800 to 2200 hrs.; from 2200 to 0500 hrs. Holidays and Sundays from 0000 to 0500 hrs.; from 2200 to 2400 hrs.

MEDICAL: *Vaccinations:* Possible from 0800 to 1200 hrs. and 1500 to 1700 hrs. Sundays and holidays excluded.
Doctors: All kinds of specialists available.
Hospitals: With qualified doctors and good equipment.

TANKERS: The Petroleum Basin is dredged to a depth of 10 m. to 11 m. 2 jetty berths can receive tankers up to 200 m. length, max. draft 32 ft. 6 in. Petroleum Wharf which has 4 berths, depth alongside 12 m. (depth in approaches 11 m.) can receive tankers up to 250 m. length with a draft of 39 ft.

Black products handled at all berths (6 in., 8 in. and 10 in. hoses). White products at Berth, 2 only (8 in. hoses). Distance to tank farm about 5 km. Water to be pumped between grades.

Ship to Ship transfer (STS) is carried out across Petroleum Wharf using 2 × 8 in. hoses. Standard practice – discharging tanker starboard side alongside Berth No. 93 and loading tanker port side alongside at No. 92 Berth. Transhipment supervised by Iransen and Shell.

M'bao Refinery sealine buoy berth is situated 3 miles N.E. of Goree Island. Vessel berths using both bow anchors, stern is secured to 4 buoys using 4×5 in. wires from buoys stern. Ship's ropes not used. Hose connection on port side using 12 in. (300 mm.) hoses. Vessel's derrick to have an SWL of at least 5 tonnes.

FRESH WATER: All quays are fitted with water hydrants. Water supplied by 3 hoses simultaneously, with a rate from 60 – 100 cu.m.p.h. Can also be supplied by barge up to 400 tons capacity but minimum order 150 tons.

FUEL: All grades can be supplied from the quays up to 1,000 t.p.h. Fuel can also be supplied by barge. Also see "Shipmasters' Report".

REPAIRS: All types of repair can be effected by the Naval Arsenal or by private companies.

DRY DOCKS: At the Naval Arsenal, one dry dock length 195 m., width 23 m., depth up to 9.50 m.

Syncrolift, max. weight acceptable, 1,200 tons.

New Floating Dock will take vessels up to 60,000 d.w.t. Lifting capacity 28,000 tons. Acceptable dimensions 235 m. × 38 m.

REPATRIATION: Seamen can be repatriated to Europe without delays by air.

AIRPORT: International airport with regular services to Europe.

TELEPHONES: All berths are equipped with telephone apparatus which is placed on board vessels without charge.

HOLIDAYS: New Year (1st January); Tabaski (Variable Date); National Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascension Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Date); National Day (14th July); Assumption (15th August); All Saints' Day (1 November); Korite (Variable Date); Christmas (25th December).

GARBAGE DISPOSAL: Collection service is available and is supplied by the Port Authority. Collection services may also be supplied by ship's agent or private companies.

WASTE OIL DISPOSAL: Collection service is available through private company SRH (Societe de Precuperation des Huiles).

CURRENCY: CFA Franc (Fr.CFA). Fixed against French Franc (F.Fr.). F.Fr. 1.00 = 50Fr.CFA.

GENERAL: Several cases of assault have been reported against crew members returning to their ships during the hours of darkness. For this reason, the delivery of cash from Agents is suspended during the night hours. Although Port Authorities and Security are aware of the situation, it is advisable to acquaint all on board with this.

SHIPMASTER'S REPORT: With a draft in excess of 15 m. it is not possible to anchor in the inner roads due to the swell. The swell is worse from July to October (rainy season).

The Pilot directed us to an anchorage 0.5 miles N.E. of Island of Goree but in my opinion it is a little too close. However, the nearer a vessel can anchor N.E. of Goree the better. The holding ground is very good.

It is possible to talk to Mory Fuel Company direct on VHF Channel 2. They have a barge which is able to deliver fuel oil and diesel oil, capacity 500 tons.

Three tugs available, be sure to order one well in advance before completion of bunkering or the vessel may have to wait. Bunkering undertaken day and night.

SHIPMASTER'S REPORT: October 1983.

Documents: Separate Bonded Stores List (4 copies) required by Customs.

Pilotage: Pilots will board 0.2 miles from breakwater entrances.

Health: Advise Port Health Authorities of health state, also vaccinations required. They attend on arrival but do not acknowledge messages.

Fresh Water: Fresh water supply at piers averages 20 t.p.h.

Security: There have been many cases recently of anchored and stationary vessels being boarded by thieves and mooring ropes, etc. purloined. Vessels on regular run to Dakar do *not* stop in port approach areas until daylight. Gangway watchman essential. Shore traders to be confined to one area under supervision if allowed on board.

SHIPMASTER'S REPORT: March 1989.

Port Officials: Immigration and Port Health boarded on arrival alongside. Customs did not board until the next day.

The Agent advised that particular attention should be paid to declaring the paint on board and also that the Stores Declaration should be made out after the usual "presents" had been given out.

The Customs search was a quick look at the bond locker and the question "Is it as declared?" is asked. When the answer was in the affirmative and a "present" handed over the locker was sealed, no other area of the vessel was searched.

Normally, all stores are checked and any discrepancies will result in a fine, the minimum reported to be U.S.$500.00.

Ship's standard papers are accepted, except for the Health Declaration where the Port Authority form is required, copies placed on board for next call.

Papers required:

Health Declaration	1 copy
Crew Declaration	2 copies
Ports of Call List	5 copies
Vaccination List	2 copies
Drugs List	3 copies
Crew List	6 copies
Stores List	3 copies
Hazardous Cargo List	2 copies
Passenger List	4 copies
Stowaway List	4 copies
Arms and Ammunition List	4 copies
Animals List	4 copies
Cargo Manifest	4 copies

"Nil" declarations are required when appropriate.

The quantity of forms required varies slightly from visit to visit but this would appear sufficient to cover most calls.

The standard vaccination list included Cholera, and the Port Health advised that one of these was out of date, however Cholera is not required for Dakar and no problems were experienced.

An Inward Clearance Certificate is issued by the Port Authority and also a certificate of Free Pratique by the Port Health.

Outward Clearance is stamped by the Customs on copies of the Cargo Manifest.

Approaches: B.A. Chart 1001 was found to be as charted. Arrival was in daylight and lights could not be verified.

Buoy No. 1 is painted white and was difficult to see in the hazy conditions prevailing at the time.

Buoy No. 12 has a double black ball topmark as indicated in the Light List and not a single ball as appears on the chart.

Approach to the harbour entrance can be made either between the buoy just North of Goree Island and Buoy No. 12 or between Buoy No. 1 and Buoy No. 12.

Pilots: On arrival the Pilot will board at the charted position or closer to the harbour entrance from a large launch.

On departure, call the Pilot Station on VHF 1 hour before estimated departure time and confirm 10 minutes before vessel is ready to leave.

The Pilots employed were competent and spoke good English.

Shifting ship: It is not necessary to use a Pilot for warping the vessel along the dock. For this operation linesmen are obtained by calling the Pilots on VHF.

Radio: The Port Authority require 96 hours, 48 hours and 24 hours notice of arrival according to the Radio Signals List. An attempt was made to pass this information using the telex number from the Radio Signals, but the telex remained undelivered, so contact was made by W/T through the local coast station.

Agents were also asked to advise the Port Authority and Pilots. The message must have been received as we were expected.

Pilots can be contacted on VHF as soon as within range and will advise berthing or anchoring prospects, the English spoken is generally good.

Pilots will advise on VHF, any vessel movements and give directions for approach.

Tugs: Two tugs were used for berthing as there was a strong wind on to the berth and there was another vessel on the berth astern, however, probably one tug would be sufficient under similar conditions in future.

The pilots carry portable VHF for communication with the tugs.

Tugs lines are used when required and are in good condition.

Berthing: All berths are fitted with fenders, but some are in a poor condition. In February 1989 the vessel berthed on Berth No. 85, the fendering here is good.

There are 2 sets of boat landing steps set into the face of the dock along this side of Pier No. 8 which would cause a problem if the vessel was positioned with either of these close to the foot of the gangway.

The vessel was later moved astern to Berth No. 84.

There is a clear working area alongside Berths No. 85 and 86, but dockside sheds and stored cargo made the loading area alongside Berth No. 84 somewhat cramped.

Loading: Vessel loaded 6,600 tonnes of ground nut pellets.

The loading is by portable belt elevators, supplied by tipper trucks.

Four elevators were used and positioned variously at hatches, depending on the distribution required.

Working hours are 0800 hrs. – 1800 hrs. every day.

Starting in the morning is slow, the first truck arriving at about 0830 hrs. and sometimes as late as 0915 hrs.

Hoppers are then constructed at the ends of the elevators by filling bags with the first of the delivered cargo, the hoppers are to give a good feed to the elevators. The last truck of the day arrives at about 1700 hrs. and when that is emptied the hoppers are dismantled and the contents of the bags are emptied on to the elevators and any remaining sweepings on the dock are shovelled on afterwards.

The day's work is usually completed by 1730 hrs.

The loading rate is governed by the availability of trucks and the rate of filling them at the silos.

The Agents are also the stevedores and their equipment was used.

Daily tonnage sheets are produced but are slow in coming forth, no record was kept of the tonnage per hatch, only the total loaded.

Gross elevator hours	284	Gross rate	23.24 t.p.h.
Net elevator hours	243.17	Net rate	27.14 t.p.h.

Approximate rate of 250 tonnes per elevator per day.

Fresh Water: Available at berth, the watermen supply their own hoses.

Repairs: Permission is required to immobilse the main engines. There are no other restrictions.

The repair firm Dakar Marine did a fair job of supplying and fitting new bolts to the rudder of another vessel alongside, but I suspect repair work is expensive.

Watchmen: It is best to employ two shore watchmen, one permanently on gangway duty and one on patrol. Theft is common and firefighting and lifesaving equipment are favourite items.

General: Fumigation: The holds were fumigated on arrival and left overnight, loading starting the next morning. The cargo was also fumigated on completion of loading.

Presents: Everyone expects either cigarettes or soft drinks for services rendered but can generally be persuaded to go away empty-handed, however a reasonable supply is required to take care of deserving cases.

Dust: For some days before arrival visibility was reduced by dust haze caused by sand from the desert, the whole of Dakar is covered in dust and when loading commenced this was made considerably worse.

Disbursements through Agents: The Agents prefer to draw cash and hand it to the Master to pay any accounts direct to the supplier, which is not the easist way of doing things.

Ensure that the Agent advises you of which items they will pay and which are expected to be paid by the vessel.

Laundry: Can be arranged by the ship chandler, but it is expensive.

Shore labour: All forms of cleaning and painting are possible, however at a cost of U.S.$20.00 per man per day would appear to be rather expensive, especially as the workers also expect to be fed.

Garbage collection: Recommended by the Agents and is carried out at intervals specified by the vessel (daily, every 2 days, etc.).

Ship Chandlers: A large number will present themselves as soon as the vessel arrives alongside, also a number of businessmen with everything from fish to watches for sale. The businessmen are best kept off the ship, as apart from their prices generally being the same or more than the Chandlers, they are likely to pick up anything that can be moved and spirit it away under their robes.

Prices of all items are high. Most foodstuffs have been imported and nothing except fish seems to be produced locally, although some good produce was seen on the market stalls in town.

M.N. Thoumas, United Shipchandlers, had been used before by the vessel and his prices compared favourably with other chandlers, he also seems to have an efficient organisation. Some of his fresh produce was returned as being poor and replacements were made.

Dock 5: Berth 52 (Taiba Phosphate Quay): Length 170 m. Max. draft 36 ft. Loading at an average of 900 tonnes per hour (Air draft 35 ft.).

Dock 6: Length 634 m.

Berth 61: Length 210 m. Used for wine and ground nut oil tankers with a draft of 27 ft.

Berth 62 – 63: Length 425 m. Max. draft 36 ft. A new terminal of containers with area of 50,000 sq.m.

Dock 7: Berth 708 (Thies Phosphate Quay): Length 215 m. Max. draft 32 ft. Loading at an average of 200 tonnes per hour.

Dock 8: Total length of 265 m. and depth of 32 ft.

Berth 81: New terminal with gantry crane/conveyor belt enabling a daily discharging/loading rate of 7,000 tonnes (bulk sulphur, fertiliser, etc.).

Berths 82 – 85: For bunkers, general cargo, logs, scrap iron, bulk grain, etc.

The South area has 3 wharves with a depth of 26 ft. – 33 ft.

Dock I is 460 m. long.

Berth	No.	12	Draft	26 ft.	3 in.
"	"	13	"	28 ft.	7 in.
"	"	14	"	28 ft.	7 in.
"	"	15	"	33 ft.	
"	"	17	"	33 ft.	

Dock II

Berth	No.	21	Draft	27 ft.	3 in.
"	"	22	"	26 ft.	11 in.
"	"	24	"	26 ft.	3 in.
"	"	25	"	25 ft.	11 in.

Dock III is 350 m. long. Max. draft of 32 ft. 10 in. Reserved for trade with the Republic of Mali.

Mole de Peche: 1,461 m. of quays, supplied with water and bunkers. Areas for spreading out fishing lines and nets.

CRANES:
- 5 Mobile cranes × 20 tons.
- 1 Mobile crane × 60 tonnes.
- 6 Mobile cranes × 25 tonnes.
- 1 Floating crane × 30 tonnes.
- 1 Mobile crane × 100 tonnes.
- 1 Mobile crane × 70 tonnes.
- 6 Mobile cranes × 40 tonnes.

In addition, there are many mobile cranes with capacity 2 tons - 15 tons.

CONTAINER FACILITIES: *Container Terminal:* Length 430 m., depth 11.6 m. Back-up area of 8 ha., connected to an extension of 6 ha. 120 reefer points.

Containers are also handled at Pier 3.

STEVEDORES: Normal working hours, weekdays from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Saturdays from 0800 to 1200 hrs. Overtime, weekdays from 0500 to 0800 hrs.; from 1200 to 1400 hrs.; from 1800 to 2200 hrs.; from 2200 to 0500 hrs. Holidays and Sundays from 0000 to 0500 hrs.; from 2200 to 2400 hrs.

MEDICAL: *Vaccinations:* Possible from 0800 to 1200 hrs. and 1500 to 1700 hrs. Sundays and holidays excluded.

Doctors: All kinds of specialists available.

Hospitals: With qualified doctors and good equipment.

TANKERS: The Petroleum Basin is dredged to a depth of 10 m. to 11 m. 2 jetty berths can receive tankers up to 200 m. length, max. draft 32 ft. 6 in. Petroleum Wharf which has 4 berths, depth alongside 12 m. (depth in approaches 11 m.) can receive tankers up to 250 m. length with a draft of 39 ft.

Black products handled at all berths (6 in., 8 in. and 10 in. hoses). White products at Berth, 2 only (8 in. hoses). Distance to tank farm abou 5 km. Water to be pumped between grades.

Ship to Ship transfer (STS) is carried out across Petroleum Whar using 2 × 8 in. hoses. Standard practice – discharging tanker starboar side alongside Berth No. 93 and loading tanker port side alongside a No. 92 Berth. Transhipment supervised by Iransen and Shell.

M'bao Refinery sealine buoy berth is situated 3 miles N.E. of Gore Island. Vessel berths using both bow anchors, stern is secured to 4 buoys using 4×5 in. wires from buoys stern. Ship's ropes not used. Hos connection on port side using 12 in. (300 mm.) hoses. Vessel's derric to have an SWL of at least 5 tonnes.

FRESH WATER: All quays are fitted with water hydrants. Water supplie by 3 hoses simultaneously, with a rate from 60 – 100 cu.m.p.h. Ca also be supplied by barge up to 400 tons capacity but minimum orde 150 tons.

FUEL: All grades can be supplied from the quays up to 1,000 t.p.h Fuel can also be supplied by barge. Also see "Shipmasters' Report".

REPAIRS: All types of repair can be effected by the Naval Arsenal by private companies.

DRY DOCKS: At the Naval Arsenal, one dry dock length 195 m., wid 23 m., depth up to 9.50 m.

Syncrolift, max. weight acceptable, 1,200 tons.

New Floating Dock will take vessels up to 60,000 d.w.t. Lifting capac 28,000 tons. Acceptable dimensions 235 m. × 38 m.

REPATRIATION: Seamen can be repatriated to Europe without dela by air.

AIRPORT: International airport with regular services to Europe.

TELEPHONES: All berths are equipped with telephone apparatus whi is placed on board vessels without charge.

HOLIDAYS: New Year (1st January); Tabaski (Variable Date); Natio Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascensi Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Dat National Day (14th July); Assumption (15th August); All Saints' Day (1 November); Korite (Variable Date); Christmas (25th December).

GARBAGE DISPOSAL: Collection service is available and is supplied by the Port Authority. Collection services may also be supplied by ship's agent or private companies.

WASTE OIL DISPOSAL: Collection service is available through private company SRH (Societe de Precuperation des Huiles).

CURRENCY: CFA Franc (Fr.CFA). Fixed against French Franc (F.Fr.). F.Fr. 1.00 = 50Fr.CFA.

GENERAL: Several cases of assault have been reported against crew members returning to their ships during the hours of darkness. For this reason, the delivery of cash from Agents is suspended during the night hours. Although Port Authorities and Security are aware of the situation, it is advisable to acquaint all on board with this.

SHIPMASTER'S REPORT: With a draft in excess of 15 m. it is not possible to anchor in the inner roads due to the swell. The swell is worse from July to October (rainy season).

The Pilot directed us to an anchorage 0.5 miles N.E. of Island of Goree but in my opinion it is a little too close. However, the nearer a vessel can anchor N.E. of Goree the better. The holding ground is very good.

It is possible to talk to Mory Fuel Company direct on VHF Channel 2. They have a barge which is able to deliver fuel oil and diesel oil, capacity 500 tons.

Three tugs available, be sure to order one well in advance before completion of bunkering or the vessel may have to wait. Bunkering undertaken day and night.

SHIPMASTER'S REPORT: October 1983.

Documents: Separate Bonded Stores List (4 copies) required by Customs.

Pilotage: Pilots will board 0.2 miles from breakwater entrances.

Health: Advise Port Health Authorities of health state, also vaccinations required. They attend on arrival but do not acknowledge messages.

Fresh Water: Fresh water supply at piers averages 20 t.p.h.

Security: There have been many cases recently of anchored and stationary vessels being boarded by thieves and mooring ropes, etc. purloined. Vessels on regular run to Dakar do *not* stop in port approach areas until daylight. Gangway watchman essential. Shore traders to be confined to one area under supervision if allowed on board.

SHIPMASTER'S REPORT: March 1989.

Port Officials: Immigration and Port Health boarded on arrival alongside. Customs did not board until the next day.

The Agent advised that particular attention should be paid to declaring the paint on board and also that the Stores Declaration should be made out after the usual "presents" had been given out.

The Customs search was a quick look at the bond locker and the question "Is it as declared?" is asked. When the answer was in the affirmative and a "present" handed over the locker was sealed, no other area of the vessel was searched.

Normally, all stores are checked and any discrepancies will result in a fine, the minimum reported to be U.S.$500.00.

Ship's standard papers are accepted, except for the Health Declaration where the Port Authority form is required, copies placed on board for next call.

Papers required:

Health Declaration	1 copy
Crew Declaration	2 copies
Ports of Call List	5 copies
Vaccination List	2 copies
Drugs List	3 copies
Crew List	6 copies
Stores List	3 copies
Hazardous Cargo List	2 copies
Passenger List	4 copies
Stowaway List	4 copies
Arms and Ammunition List	4 copies
Animals List	4 copies
Cargo Manifest	4 copies

"Nil" declarations are required when appropriate.

The quantity of forms required varies slightly from visit to visit but this would appear sufficient to cover most calls.

The standard vaccination list included Cholera, and the Port Health advised that one of these was out of date, however Cholera is not required for Dakar and no problems were experienced.

An Inward Clearance Certificate is issued by the Port Authority and also a certificate of Free Pratique by the Port Health.

Outward Clearance is stamped by the Customs on copies of the Cargo Manifest.

Approaches: B.A. Chart 1001 was found to be as charted. Arrival was in daylight and lights could not be verified.

Buoy No. 1 is painted white and was difficult to see in the hazy conditions prevailing at the time.

Buoy No. 12 has a double black ball topmark as indicated in the Light List and not a single ball as appears on the chart.

Approach to the harbour entrance can be made either between the buoy just North of Goree Island and Buoy No. 12 or between Buoy No. 1 and Buoy No. 12.

Pilots: On arrival the Pilot will board at the charted position or closer to the harbour entrance from a large launch.

On departure, call the Pilot Station on VHF 1 hour before estimated departure time and confirm 10 minutes before vessel is ready to leave.

The Pilots employed were competent and spoke good English.

Shifting ship: It is not necessary to use a Pilot for warping the vessel along the dock. For this operation linesmen are obtained by calling the Pilots on VHF.

Radio: The Port Authority require 96 hours, 48 hours and 24 hours notice of arrival according to the Radio Signals List. An attempt was made to pass this information using the telex number from the Radio Signals, but the telex remained undelivered, so contact was made by W/T through the local coast station.

Agents were also asked to advise the Port Authority and Pilots. The message must have been received as we were expected.

Pilots can be contacted on VHF as soon as within range and will advise berthing or anchoring prospects, the English spoken is generally good.

Pilots will advise on VHF, any vessel movements and give directions for approach.

Tugs: Two tugs were used for berthing as there was a strong wind on to the berth and there was another vessel on the berth astern, however, probably one tug would be sufficient under similar conditions in future.

The pilots carry portable VHF for communication with the tugs.

Tugs lines are used when required and are in good condition.

Berthing: All berths are fitted with fenders, but some are in a poor condition. In February 1989 the vessel berthed on Berth No. 85, the fendering here is good.

There are 2 sets of boat landing steps set into the face of the dock along this side of Pier No. 8 which would cause a problem if the vessel was positioned with either of these close to the foot of the gangway.

The vessel was later moved astern to Berth No. 84.

There is a clear working area alongside Berths No. 85 and 86, but dockside sheds and stored cargo made the loading area alongside Berth No. 84 somewhat cramped.

Loading: Vessel loaded 6,600 tonnes of ground nut pellets.

The loading is by portable belt elevators, supplied by tipper trucks.

Four elevators were used and positioned variously at hatches, depending on the distribution required.

Working hours are 0800 hrs. – 1800 hrs. every day.

Starting in the morning is slow, the first truck arriving at about 0830 hrs. and sometimes as late as 0915 hrs.

Hoppers are then constructed at the ends of the elevators by filling bags with the first of the delivered cargo, the hoppers are to give a good feed to the elevators. The last truck of the day arrives at about 1700 hrs. and when that is emptied the hoppers are dismantled and the contents of the bags are emptied on to the elevators and any remaining sweepings on the dock are shovelled on afterwards.

The day's work is usually completed by 1730 hrs.

The loading rate is governed by the availability of trucks and the rate of filling them at the silos.

The Agents are also the stevedores and their equipment was used.

Daily tonnage sheets are produced but are slow in coming forth, no record was kept of the tonnage per hatch, only the total loaded.

Gross elevator hours	284	Gross rate	23.24 t.p.h.
Net elevator hours	243.17	Net rate	27.14 t.p.h.

Approximate rate of 250 tonnes per elevator per day.

Fresh Water: Available at berth, the watermen supply their own hoses.

Repairs: Permission is required to immobilse the main engines. There are no other restrictions.

The repair firm Dakar Marine did a fair job of supplying and fitting new bolts to the rudder of another vessel alongside, but I suspect repair work is expensive.

Watchmen: It is best to employ two shore watchmen, one permanently on gangway duty and one on patrol. Theft is common and firefighting and lifesaving equipment are favourite items.

General: Fumigation: The holds were fumigated on arrival and left overnight, loading starting the next morning. The cargo was also fumigated on completion of loading.

Presents: Everyone expects either cigarettes or soft drinks for services rendered but can generally be persuaded to go away empty-handed, however a reasonable supply is required to take care of deserving cases.

Dust: For some days before arrival visibility was reduced by dust haze caused by sand from the desert, the whole of Dakar is covered in dust and when loading commenced this was made considerably worse.

Disbursements through Agents: The Agents prefer to draw cash and hand it to the Master to pay any accounts direct to the supplier, which is not the easist way of doing things.

Ensure that the Agent advises you of which items they will pay and which are expected to be paid by the vessel.

Laundry: Can be arranged by the ship chandler, but it is expensive.

Shore labour: All forms of cleaning and painting are possible, however at a cost of U.S.$20.00 per man per day would appear to be rather expensive, especially as the workers also expect to be fed.

Garbage collection: Recommended by the Agents and is carried out at intervals specified by the vessel (daily, every 2 days, etc.).

Ship Chandlers: A large number will present themselves as soon as the vessel arrives alongside, also a number of businessmen with everything from fish to watches for sale. The businessmen are best kept off the ship, as apart from their prices generally being the same or more than the Chandlers, they are likely to pick up anything that can be moved and spirit it away under their robes.

Prices of all items are high. Most foodstuffs have been imported and nothing except fish seems to be produced locally, although some good produce was seen on the market stalls in town.

M.N. Thoumas, United Shipchandlers, had been used before by the vessel and his prices compared favourably with other chandlers, he also seems to have an efficient organisation. Some of his fresh produce was returned as being poor and replacements were made.

AUTHORITY: Port Autonome de Dakar, 21 Boulevard de la Liberation, P. 3195, Dakar, Senegal. *Tel:* 23-45-45. *Telex:* 21404. *FAX:* 23.36.06. *Cables:* Porcomer Dakar. *FAX:* 213606. *Contact:* Mr.Pathe Ndiaye, Director General. Captain E. Sarr, Harbour Master. J.B.G. Diatta, Commercial Director.

Sub-Agency at Kaolak. Tel: 41.19.07. Telex: 74060.

KAOLACK: 14.09 N. 16.06 W.

DOCUMENTS:
2 Crew Lists.
2 Stores Lists.
2 Manifests (tobacco, wine, etc.). Agents deposit at Customs office.

PILOTAGE: Pilot taken on board, and lands in Dakar. When vessels do not require tank-washing, the Pilot disembarks in roadstead.

ANCHORAGES: Sufficient for three vessels only. About 6 m. deep.

RESTRICTIONS: Night navigation forbidden in River Saloum. Depth available 3.0 m.

MAX. SIZE: Length 105 m. (because of River Valor).

HEALTH: Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar.

TUGS: No tugs. (Only from Dakar.)

BERTHING: Signals by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

Private Berth: Saltworks Wharf, length 52 m. Owned by S.S.S.I.M. Tel: 411904. Telex: 7472 SG.

MEDICAL: Yellow fever vaccinations only at Dakar. No hospital facilities.

DENSITY: 1025 – 1035.

FRESH WATER: Available at 10 t.p.h.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agent.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco, no restrictions; Customs control on board (Declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, not limited, Customs controlled.

CONSULS: None (Dakar only). French Consulate Agent: Leon Masfrand, Tel: 412176.

REPATRIATION: Not possible (Dakar only).

AIRPORT: None.

TIME: GMT throughout year.

HOLIDAYS: Independence Day (4th April) no loading. Tabaski (dependent on moon phase).

FIRE: Tel: 324.

TELEPHONES: Not possible to place on board.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not necessary.

REGULATIONS: Vessels must hoist Senegalese flag and notify Agent before entering port.

AUTHORITY: Harbour Master, Rue de la Residence, Kaolack, Senegal. *Tel:* 411915.

AGENT: See "Dakar".

Republic of Seychelles

PORT VICTORIA, Mahe: 04.37 S. 55.28 E. (See Plan)

PORT LIMITS: *Outer Harbour:* The area in Victoria Harbour between limits of the inner harbour and a line from Cedre Point to Long. 55° 29.84' E., thence South to St.Anne Island Shore, thence S.S.W. until Rochon Bridge bears West, then West until Victoria Lighthouse bears North.

DOCUMENTS:
Maritime Declaration of Health – forms obtainable from Medical Officer/Chief Environmental Health Officer.
Derat Certificate.
5 Crew Lists and Passengers' Lists.
Dangerous Cargo List.
Ship's Register.
Crew Declaration Form.
Declaration of Stores and high dutiable goods.
Parcels List.
Firearms List.
List of Animals remaining on board (Pets included).
Un-manifested Cargo List.
Cargo Manifests.
Clearance from last Port.

APPROACHES: *Notice to Mariners No. 1013(P)/86:*
Indian Ocean – Seychelles – Mahe – Port Victoria – Routeing System.

The following announcement has been made by the Ministry of Tourism and Transport, Port and Marine Services Division, Seychelles.

"A routeing system for approaches to Port Victoria, Mahe, Seychelles has been adopted.

All vessels calling to and from Port Victoria are required as far as practicable to stay within an area bounded by lines joining the following Geographical points. Points (1), (2), (3), (9) and (10) demark the Northern Approach and Points (3), (4), (5), (6), (7) and (8) demark the Southern Approach."

(1) 3° 43.0' S., 55° 33.0' E.
(2) 4° 26.0' S., 55° 32.0' E.
(3) 4° 30.0' S., 55° 39.0' E.
(4) 4° 51.0' S., 55° 42.5' E.
(5) 5° 16.5' S., 55° 30.0' E.
(6) 5° 13.0' S., 55° 23.0' E.
(7) 4° 48.5' S., 55° 34.5' E.
(8) 4° 37.0' S., 55° 33.5' E.
(9) 4° 33.0' S., 55° 26.0' E.
(10) 3° 43.0' S., 55° 25.0' E.

Charts affected: 742, 740, 721.

Harbour Master, Ministry of Tourism and Transport, Seychelles. (H. 5775/82.)

PILOTAGE: Compulsory in Inner and Outer Harbour for any vessel of or exceeding 150 g.r.t.

24 hours' notice, giving draft and length. Telegraphic address "Demarine" through Cable & Wireless (on schedule 500 kHz and 8714 kHz. Schedule published in Radio List. Harbour Control equipped with VHF Channels 16, 12 and 6).

Pilot Boat: White hull with white cabin, orange top, flying "H" flag.

Signals for Pilot: "G" by flag and/or whistle.

Pilot Boarding Ground: The Pilot boards vessels about 6 cables Northward of the outermost buoy ("Isolated Danger Buoy") in position Lat. 4° 35.7' S., Long. 55° 29.6' E. There is no night pilotage. Pilot can board in almost any weather. While awaiting Pilot; vessel can anchor in any suitable anchorage in the pilotage area. Vessels should call "Victoria Harbour Control" on VHF, Channel 16, 2 hours before arrival.

ANCHORAGES: Masters of all vessels are requested not to anchor on the leading marks or in any other position so as to block the entrance channel.

The following anchorages are available in the Outer Harbour.
(i) Victoria Lighthouse bearing 238° True. Distance 9.75 cables in depths of 20 m. to 22 m.
(ii) Victoria Lighthouse bearing 232° True. Distance 1 mile in depths of 22 m.
(iii) Victoria Lighthouse bearing 224° True. Distance 1.4 miles in depths of 18 m. to 20 m.
(iv) Victoria Lighthouse bearing 212° True. Distance 1.5 miles in depths of 20 m. to 22 m.

Supertankers and large vessels anchor outside the Fairway Buoy in any suitable anchorage. The Master should always contact Harbour Master for anchorage instructions.

RESTRICTIONS: All shipping movement in Inner Harbour to take place during daylight hours only. In Outer Harbour, night movement at discretion of Master after consultation with Harbour Master. No tide restrictions.

There is berthing space available for vessels with draft over 9.5 m., but not exceeding 11.5 m. This is between bollards No. 12 and No. 20, a distance of 123 m., at the Southern end of the quay. Vessels exceeding 123 m. with draft of 9.5 m. to 11.5 m. overhang the quay to the South and lines are made fast on shore bollards.

Under these circumstances vessels which overhang come starboard side to and the port anchor is used. This system is mainly used for tankers as the connecting discharge pipe ashore only needs to be in line with the ship's manifold. Cargo ships coming in at a deeper draft than 9.5 m. and less 11.5 m. can be docked. However it must be noted that cargo cannot be discharged from all hatches that overhang and the ship will have to be turned at a certain stage of discharging.

HEALTH: "Q" Flag or international red over white. Medical Officer/ Environmental Health Officer may board vessels at anchor and before entering Inner Harbour. Crew Lists with vaccination dates against yellow fever and cholera if vessel from infected places. Health clearance given at Port Victoria only, health clearance may be given at Assumption Island by prior arrangement. Hospital facilities available. Vessels proceeding to the Inner Harbour may be disinsectised. Radio Pratique may be granted on request to "Port Health" – Ministry of Health.

No animal/pet of any description is permitted to be landed ashore or on the wharf as per Seychelles Quarantine Regulations. Necessary action will be taken against any Master who disregards these instructions in addition to the possibility of destroying any such animal or pet found ashore. Emphasis is made on the need to keep the Seychelles free from major animal diseases.

RADIO/VHF: Cable and Wireless, Port Victoria, Mahe. Call sign ZCQ. The Harbour Master's Office, call sign, "Harbour Control" keeps a 24 hour watch on VHF Channel 16 and Channel 12. Any further information can be obtained by calling up Harbour Control on Channel 16. Other Channels available – 12 and 6.

TUGS: 2×1,200 b.h.p. twin screw tugs and 1×2,000 b.h.p. twin screw tug in operation. Vessels of up to 800 ft. are able to berth alongside.

BERTHING: Due to limited space no berth can be reserved either alongside or at anchorage. All assistance given to position every ship in best available place.

Mahe Quay is in full operation. Two vessels can berth alongside. Berth No. 1 is allocated to oil and cement tankers and Berth No. 2 to cargo and passenger ships. Total length 370.4 m. Maximum depth of water at all berths is 35 ft. There are connections for fuel, fresh water and telephones at all berths. Port Offices, Customs and Health are situated at the New Port area.

Masters and Officers of vessels moored at the 2 above mentioned places are reminded of the importance of tending moorings at frequent intervals. Rat guards are deemed essential. Slack lines present a hazard to the safety of vessels moored alongside.

In the case of tankers and bulk carriers discharging or loading, the hourly difference in draft can be considerable. It is therefore recommended that regular routine checks on moorings be carried out by the Duty Officer.

Movement of Vessels Moored at Mahe Quay, Commercial Port, Fishing Port or at Anchorage. No movement of any vessel moored at the above mentioned places is permitted without authorisation from the Harbour Master. Ship's boats or lifeboats are not to be used as plying boats or on excursions to nearby islands. Use of ship's own craft for any reason including exercises must be cleared and authorised in the first instance.

Loading and discharging by ship's gear. Equipment available to handle 20 ft. and 40 ft. containers.

STEVEDORES: ETA advice required two to three days before ship's arrival in port. Loading and Discharging: General Cargo: average 15 t.p.h. per gang (subject weather conditions). Bagged Cargo: average 50 t.p.h. per gang (subject weather conditions). Containers: 22 boxes per hour. All stevedoring undertaken with ship's own gear.

TANKERS: Max. LOA 180 m., max. beam 33 m., max. draft 11.5 m. Discharge throughout 24 hours. Discharge lines 8 in. and 6 in. (Bulk white petroleum products and bulk cement).

DENSITY: Average 1025 at all states of tide.

FRESH WATER: In good supply. By mains when alongside. No water barge currently available. All water supplied is chlorinated. Vessels should request water at least 72 hours before arrival through Agent.

FUEL: Gas oil Kinematic CS at 40°C. = 3.63. Due to limited stock, it is advisable to give one week's notice, preferably through nomination addressed to Seychelles Petroleum Co. (Seypec).

Intermediate Fuel oil now available on North end of berth only. (Fuel oil 180 centistoke). Pour point 70 max. – Kinematic 180 max. – restriction on flow of delivery pending improvement of facilities.

CONSULS: *Embassies:* China, Cuba, France, Russia, U.S.A.

High Commissions: Great Britain, India.

Consuls: Belgium, Cyprus, Denmark, Finland, Germany, Greece, Italy, Malagasy Rep., Mauritius, Morocco, Netherlands, Norway, Spain, Sweden, Switzerland.

REPAIRS: Slipways for vessels under 300 g.r.t. Mechanical engineering and fabrication. Electronic and electrical engineering. Commercial diving services (hull cleaning, inspection and repairs). Shipchandling (marine equipment).

DRY DOCKS: None, but being considered.

GANGWAY/DECK WATCHMEN: Customs Officer on duty at all times if vessel is discharging cargo.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CUSTOMS ALLOWANCES: At Custom Officer's discretion.

CARGO GEAR: All cargo slings and gear supplied by ship.

REPATRIATION: Crew changes possible. Undertaken by Agents in connection with Immigration Authorities.

AIRPORT: In operation. Several flights weekly.

TIME: GMT plus 4 hours, throughout year.

HOLIDAYS: New Year (1st and 2nd January); Good Friday; Labour Day (May 1st); Corpus Christi (June 2nd); Liberation Day (June 5th); National Day (June 18th); Independence Day (June 29th); Assumption Day (August 15th); All Saints' Day (November 1st); Immaculate Conception (December 8th); Christmas Day (December 25th).

SHIP SUPPLY SERVICE: Ship Supply Services can be made by prior arrangements with any shipping Agencies by using fast hire crafts, which are allowed to operate within a range of 60 miles Mahe to any given rendezvous.

List of Shipping Agents:

Aquaris Shipping, P.O.Box 865, Victoria, Male, Seychelles. Tel: (248) 225050. Telex: 2424 Unship. Fax: (248) 225043.

ANCHORAGES: Sufficient for three vessels only. About 6 m. deep.

RESTRICTIONS: Night navigation forbidden in River Saloum. Depth available 3.0 m.

MAX. SIZE: Length 105 m. (because of River Valor).

HEALTH: Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar.

TUGS: No tugs. (Only from Dakar.)

BERTHING: Signals by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

Private Berth: Saltworks Wharf, length 52 m. Owned by S.S.S.I.M. Tel: 411904. Telex: 7472 SG.

MEDICAL: Yellow fever vaccinations only at Dakar. No hospital facilities.

DENSITY: 1025 – 1035.

FRESH WATER: Available at 10 t.p.h.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agent.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco, no restrictions; Customs control on board (Declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, not limited, Customs controlled.

CONSULS: None (Dakar only). French Consulate Agent: Leon Masfrand, Tel: 412176.

REPATRIATION: Not possible (Dakar only).

AIRPORT: None.

TIME: GMT throughout year.

HOLIDAYS: Independence Day (4th April) no loading. Tabaski (dependent on moon phase).

FIRE: Tel: 324.

TELEPHONES: Not possible to place on board.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not necessary.

REGULATIONS: Vessels must hoist Senegalese flag and notify Agent before entering port.

AUTHORITY: Harbour Master, Rue de la Residence, Kaolack, Senegal. *Tel:* 411915.

AGENT: See "Dakar".

Derat Certificate.
5 Crew Lists and Passengers' Lists.
Dangerous Cargo List.
Ship's Register.
Crew Declaration Form.
Declaration of Stores and high dutiable goods.
Parcels List.
Firearms List.
List of Animals remaining on board (Pets included).
Un-manifested Cargo List.
Cargo Manifests.
Clearance from last Port.

APPROACHES: *Notice to Mariners No. 1013(P)/86:*

Indian Ocean – Seychelles – Mahe – Port Victoria – Routeing System.

The following announcement has been made by the Ministry of Tourism and Transport, Port and Marine Services Division, Seychelles.

"A routeing system for approaches to Port Victoria, Mahe, Seychelles has been adopted.

All vessels calling to and from Port Victoria are required as far as practicable to stay within an area bounded by lines joining the following Geographical points. Points (1), (2), (3), (9) and (10) demark the Northern Approach and Points (3), (4), (5), (6), (7) and (8) demark the Southern Approach."

(1) 3° 43.0' S., 55° 33.0' E.
(2) 4° 26.0' S., 55° 32.0' E.
(3) 4° 30.0' S., 55° 39.0' E.
(4) 4° 51.0' S., 55° 42.5' E.
(5) 5° 16.5' S., 55° 30.0' E.
(6) 5° 13.0' S., 55° 23.0' E.
(7) 4° 48.5' S., 55° 34.5' E.
(8) 4° 37.0' S., 55° 33.5' E.
(9) 4° 33.0' S., 55° 26.0' E.
(10) 3° 43.0' S., 55° 25.0' E.

Charts affected: 742, 740, 721.

Harbour Master, Ministry of Tourism and Transport, Seychelles. (H. 5775/82.)

PILOTAGE: Compulsory in Inner and Outer Harbour for any vessel of or exceeding 150 g.r.t.

24 hours' notice, giving draft and length. Telegraphic address "Demarine" through Cable & Wireless (on schedule 500 kHz and 8714 kHz. Schedule published in Radio List. Harbour Control equipped with VHF Channels 16, 12 and 6).

Pilot Boat: White hull with white cabin, orange top, flying "H" flag.

Signals for Pilot: "G" by flag and/or whistle.

Pilot Boarding Ground: The Pilot boards vessels about 6 cables Northward of the outermost buoy ("Isolated Danger Buoy") in position Lat. 4° 35.7' S., Long. 55° 29.6' E. There is no night pilotage. Pilot can board in almost any weather. While awaiting Pilot; vessel can anchor in any suitable anchorage in the pilotage area. Vessels should call "Victoria Harbour Control" on VHF, Channel 16, 2 hours before arrival.

ANCHORAGES: Masters of all vessels are requested not to anchor on the leading marks or in any other position so as to block the entrance channel.

The following anchorages are available in the Outer Harbour.

(i) Victoria Lighthouse bearing 238° True. Distance 9.75 cables in depths of 20 m. to 22 m.
(ii) Victoria Lighthouse bearing 232° True. Distance 1 mile in depths of 22 m.
(iii) Victoria Lighthouse bearing 224° True. Distance 1.4 miles in depths of 18 m. to 20 m.
(iv) Victoria Lighthouse bearing 212° True. Distance 1.5 miles in depths of 20 m. to 22 m.

Supertankers and large vessels anchor outside the Fairway Buoy in any suitable anchorage. The Master should always contact Harbour Master for anchorage instructions.

RESTRICTIONS: All shipping movement in Inner Harbour to take place during daylight hours only. In Outer Harbour, night movement at discretion of Master after consultation with Harbour Master. No tide restrictions.

There is berthing space available for vessels with draft over 9.5 m., but not exceeding 11.5 m. This is between bollards No. 12 and No. 20, a distance of 123 m., at the Southern end of the quay. Vessels exceeding 123 m. with draft of 9.5 m. to 11.5 m. overhang the quay to the South and lines are made fast on shore bollards.

Under these circumstances vessels which overhang come starboard side to and the port anchor is used. This system is mainly used for tankers as the connecting discharge pipe ashore only needs to be in line with the ship's manifold. Cargo ships coming in at a deeper draft than 9.5 m. and less 11.5 m. can be docked. However it must be noted that cargo cannot be discharged from all hatches that overhang and the ship will have to be turned at a certain stage of discharging.

HEALTH: "Q" Flag or international red over white. Medical Officer/Environmental Health Officer may board vessels at anchor and before entering Inner Harbour. Crew Lists with vaccination dates against yellow fever and cholera if vessel from infected places. Health clearance given at Port Victoria only, health clearance may be given at Assumption Island by prior arrangement. Hospital facilities available. Vessels proceeding to the Inner Harbour may be disinsectised. Radio Pratique may be granted on request to "Port Health" – Ministry of Health.

No animal/pet of any description is permitted to be landed ashore or on the wharf as per Seychelles Quarantine Regulations. Necessary action will be taken against any Master who disregards these instructions in addition to the possibility of destroying any such animal or pet found ashore. Emphasis is made on the need to keep the Seychelles free from major animal diseases.

RADIO/VHF: Cable and Wireless, Port Victoria, Mahe. Call sign ZCQ. The Harbour Master's Office, call sign, "Harbour Control" keeps a 24 hour watch on VHF Channel 16 and Channel 12. Any further information can be obtained by calling up Harbour Control on Channel 16. Other Channels available – 12 and 6.

TUGS: 2×1,200 b.h.p. twin screw tugs and 1×2,000 b.h.p. twin screw tug in operation. Vessels of up to 800 ft. are able to berth alongside.

BERTHING: Due to limited space no berth can be reserved either alongside or at anchorage. All assistance given to position every ship in best available place.

Mahe Quay is in full operation. Two vessels can berth alongside. Berth No. 1 is allocated to oil and cement tankers and Berth No. 2 to cargo and passenger ships. Total length 370.4 m. Maximum depth of water at all berths is 35 ft. There are connections for fuel, fresh water and telephones at all berths. Port Offices, Customs and Health are situated at the New Port area.

Masters and Officers of vessels moored at the 2 above mentioned places are reminded of the importance of tending moorings at frequent intervals. Rat guards are deemed essential. Slack lines present a hazard to the safety of vessels moored alongside.

In the case of tankers and bulk carriers discharging or loading, the hourly difference in draft can be considerable. It is therefore recommended that regular routine checks on moorings be carried out by the Duty Officer.

Movement of Vessels Moored at Mahe Quay, Commercial Port, Fishing Port or at Anchorage. No movement of any vessel moored at the above mentioned places is permitted without authorisation from the Harbour Master. Ship's boats or lifeboats are not to be used as plying boats or on excursions to nearby islands. Use of ship's own craft for any reason including exercises must be cleared and authorised in the first instance.

Loading and discharging by ship's gear. Equipment available to handle 20 ft. and 40 ft. containers.

STEVEDORES: ETA advice required two to three days before ship's arrival in port. Loading and Discharging: General Cargo: average 15 t.p.h. per gang (subject weather conditions). Bagged Cargo: average 50 t.p.h. per gang (subject weather conditions). Containers: 22 boxes per hour. All stevedoring undertaken with ship's own gear.

TANKERS: Max. LOA 180 m., max. beam 33 m., max. draft 11.5 m. Discharge throughout 24 hours. Discharge lines 8 in. and 6 in. (Bulk white petroleum products and bulk cement).

DENSITY: Average 1025 at all states of tide.

FRESH WATER: In good supply. By mains when alongside. No water barge currently available. All water supplied is chlorinated. Vessels should request water at least 72 hours before arrival through Agent.

FUEL: Gas oil Kinematic CS at 40°C. = 3.63. Due to limited stock, it is advisable to give one week's notice, preferably through nomination addressed to Seychelles Petroleum Co. (Seypec).

Intermediate Fuel oil now available on North end of berth only. (Fuel oil 180 centistoke). Pour point 70 max. – Kinematic 180 max. – restriction on flow of delivery pending improvement of facilities.

CONSULS: *Embassies:* China, Cuba, France, Russia, U.S.A.

High Commissions: Great Britain, India.

Consuls: Belgium, Cyprus, Denmark, Finland, Germany, Greece, Italy, Malagasy Rep., Mauritius, Morocco, Netherlands, Norway, Spain, Sweden, Switzerland.

REPAIRS: Slipways for vessels under 300 g.r.t. Mechanical engineering and fabrication. Electronic and electrical engineering. Commercial diving services (hull cleaning, inspection and repairs). Shipchandling (marine equipment).

DRY DOCKS: None, but being considered.

GANGWAY/DECK WATCHMEN: Customs Officer on duty at all times if vessel is discharging cargo.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CUSTOMS ALLOWANCES: At Custom Officer's discretion.

CARGO GEAR: All cargo slings and gear supplied by ship.

REPATRIATION: Crew changes possible. Undertaken by Agents in connection with Immigration Authorities.

AIRPORT: In operation. Several flights weekly.

TIME: GMT plus 4 hours, throughout year.

HOLIDAYS: New Year (1st and 2nd January); Good Friday; Labour Day (May 1st); Corpus Christi (June 2nd); Liberation Day (June 5th); National Day (June 18th); Independence Day (June 29th); Assumption Day (August 15th); All Saints' Day (November 1st); Immaculate Conception (December 8th); Christmas Day (December 25th).

SHIP SUPPLY SERVICE: Ship Supply Services can be made by prior arrangements with any shipping Agencies by using fast hire crafts, which are allowed to operate within a range of 60 miles Mahe to any given rendezvous.

List of Shipping Agents:

Aquaris Shipping, P.O.Box 865, Victoria, Male, Seychelles. Tel: (248) 225050. Telex: 2424 Unship. Fax: (248) 225043.

Senegal

DAKAR: 14.40 N. 17.26 W. (See Plan)

PORT LIMITS: *North:* From the point of Bel-Air by a parallel from N.E. of the N.E. Jetty of the harbour, to 1 mile N.E. by a meridian passing 2,900 m. East of the Round-Point determined by the crossing of Felix Eboue and Avenue de la Jetee Nord and by the parallel passing 2,060 m. North of Goree Island.
East: By the meridian passing 1 mile East of Goree.
South: By a line joining the Cape Manuel from the South point of Goree prolonged until it encounters the meridian passing 1 mile East of Goree.
DOCUMENTS: Vessels carrying hazardous and/or strong smelling cargoes must declare to the Harbour Master, at least 48 hours before ship's arrival, the nature/quantity/packing of these goods, as well as their stowage on board. Same applies for Arms and Ammunitions.
Health:
2 Crew Lists.
1 Sanitary Declaration.
2 Lists of Date of Vaccinations.
(Valid vaccination for Yellow Fever for all persons)
Customs:
3 Crew Lists.
2 Stores Lists.
2 Personal Effects Declarations.
2 Slop Chest Lists.
1 Arms and Ammunition List.
Immigration:
4 Crew Lists.
2 Lists of Ports of Call with dates of arrival/departure.
Agents:
1 Crew List.
1 Personal Effects Declaration.
1 Slop Chest List.
2 Lists of Arms and Ammunition.
Papers required on arrival: Bills of Lading for cargo to be discharged and Master's copy. 2 copies of Cargo Manifests for cargo to be discharged.

Great care should be taken in completing all Store Lists, Slop Chest Lists and Personal Effects Lists as Customs check all stores, including fridge spaces. All paints onboard must be declared.

Customs also board vessels at anchor and inside territorial waters, inflicting heavy fines in cases where stores, etc. are not prepared and ready for inspection. Also, heavy fines are imposed for any discrepancies. Even when calling at port for emergencies (e.g. Medivac) a full set of documents must be prepared before entering territorial waters.

No vessel is allowed to leave Dakar without having received on board an outward manifest duly visaed by the local Customs Authorities. Vessels leaving without such a manifest will be heavily fined.
PILOTAGE: Pilots meet vessels off the North point of the Island of Goree in a naturally sheltered area. Pilot available 24 hours and service is compulsory. Pilots on VHF Channel 16.
RESTRICTIONS: During the rainy season, all vessels with a draft of more than 32 ft. 6 in. could be delayed, due to the effects of swell, at anchorage in outer roads and await meteorological conditions permitting their entry into the harbour.

Use of whistle signals to call Pilot is forbidden between 2200 hrs. and 0600 hrs. The harbour area is dredged to a depth of 10 m. to 11 m.
Dangerous Cargo: Vessels are allowed to have the following dangerous cargo on board:

For Discharging	*North Area*	*South Area*
I.M.O. 1	20 tons	10 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	25 tons
In Transit	*North Area*	*South Area*
I.M.O.	25 tons	20 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	40 tons

MAX. SIZE: Ships of 30 ft. draft are able to enter at all stages of the tide by day and night. Vessels up to 36 ft. draft may enter at high tide except possibly during the stormy season, between mid August and mid October.
HEALTH: Health Officials board vessel immediately after berthing alongside. For passenger vessels, these formalities are effected before berthing to avoid delays. Vessels at sea may obtain medical advice by VHF or telex via Dakar Radio.

Inoculation/Vaccination can be arranged through Agent during weekdays.

Free Pratique can be granted via radio by Agent, by using international Code Words "MIBDU/MIJMA".
RADIO: ETA advice should be sent 96 hours, 48 hours and 12 hours prior to arrival including cargo to discharge, drums to discharge (if any), draft on arrival, expected draft on departure, last port and next port of call. Agents should be notified of tug requirements, VHF Channel 8.
VHF: The Port Captain's Office, Pilot Station and tugs are equipped with VHF, with the following Channels: Channel 16 used by vessels approaching to contact Pilot Station or Port Captain's Office; Channel 12 used during manoeuvres for communications between Pilots and tugs; Channel 6 used only by the tug station.
TUGS: Operated by a private company, 3 tugs available up to 2,000 h.p. (bollard pull 24 tons). Compulsory for loaded tankers.
BERTHING: 10,000 m. of quay length available of which more than half has depths of 8 m. to 11 m. alongside.

The Northern area has 5 wharves with depths of 23 ft. – 36 ft.
Dock 4: Length 572 m.

Berth 41: Draft 33 ft. Equipped for discharging bulk grain with private equipment (rate of 4,000 tonnes per day) and load ground nuts.

Berth 42 – 43: Draft 33 ft. Used for the discharge of rice.

Berth 45: Length 120 m., draft 23 ft. Used for the discharge of liquified gas.
Dock 5: Berth 52 (Taiba Phosphate Quay): Length 170 m. Max. draft 36 ft. Loading at an average of 900 tonnes per hour (Air draft 35 ft.).
Dock 6: Length 634 m.

Berth 61: Length 210 m. Used for wine and ground nut oil tankers with a draft of 27 ft.

Berth 62 – 63: Length 425 m. Max. draft 36 ft. A new terminal of containers with area of 50,000 sq.m.
Dock 7: Berth 708 (Thies Phosphate Quay): Length 215 m. Max. draft 32 ft. Loading at an average of 200 tonnes per hour.
Dock 8: Total length of 265 m. and depth of 32 ft.

Berth 81: New terminal with gantry crane/conveyor belt enabling a daily discharging/loading rate of 7,000 tonnes (bulk sulphur, fertiliser, etc.).

Berths 82 – 85: For bunkers, general cargo, logs, scrap iron, bulk grain, etc.

The South area has 3 wharves with a depth of 26 ft. – 33 ft.
Dock I is 460 m. long.

Berth No.	12	Draft	26 ft.	3 in.
" "	13	"	28 ft.	7 in.
" "	14	"	28 ft.	7 in.
" "	15	"	33 ft.	
" "	17	"	33 ft.	

Dock II

Berth No.	21	Draft	27 ft.	3 in.
" "	22	"	26 ft.	11 in.
" "	24	"	26 ft.	3 in.
" "	25	"	25 ft.	11 in.

Dock III is 350 m. long. Max. draft of 32 ft. 10 in. Reserved for trade with the Republic of Mali.
Mole de Peche: 1,461 m. of quays, supplied with water and bunkers. Areas for spreading out fishing lines and nets.
CRANES:
5 Mobile cranes × 20 tons.
1 Mobile crane × 60 tonnes.
6 Mobile cranes × 25 tonnes.
1 Floating crane × 30 tonnes.
1 Mobile crane × 100 tonnes.
1 Mobile crane × 70 tonnes.
6 Mobile cranes × 40 tonnes.

In addition, there are many mobile cranes with capacity 2 tons - 15 tons.
CONTAINER FACILITIES: *Container Terminal:* Length 430 m., depth 11.6 m. Back-up area of 8 ha., connected to an extension of 6 ha. 120 reefer points.

Containers are also handled at Pier 3.
STEVEDORES: Normal working hours, weekdays from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Saturdays from 0800 to 1200 hrs. Overtime, weekdays from 0500 to 0800 hrs.; from 1200 to 1400 hrs.; from 1800 to 2200 hrs.; from 2200 to 0500 hrs. Holidays and Sundays from 0000 to 0500 hrs.; from 2200 to 2400 hrs.
MEDICAL: *Vaccinations:* Possible from 0800 to 1200 hrs. and 1500 to 1700 hrs. Sundays and holidays excluded.
Doctors: All kinds of specialists available.
Hospitals: With qualified doctors and good equipment.
TANKERS: The Petroleum Basin is dredged to a depth of 10 m. to 11 m. 2 jetty berths can receive tankers up to 200 m. length, max. draft 32 ft. 6 in. Petroleum Wharf which has 4 berths, depth alongside 12 m. (depth in approaches 11 m.) can receive tankers up to 250 m. length with a draft of 39 ft.

Black products handled at all berths (6 in., 8 in. and 10 in. hoses). White products at Berth, 2 only (8 in. hoses). Distance to tank farm about 5 km. Water to be pumped between grades.

Ship to Ship transfer (STS) is carried out across Petroleum Wharf using 2 × 8 in. hoses. Standard practice – discharging tanker starboard side alongside Berth No. 93 and loading tanker port side alongside at No. 92 Berth. Transhipment supervised by Iransen and Shell.

M'bao Refinery sealine buoy berth is situated 3 miles N.E. of Goree Island. Vessel berths using both bow anchors, stern is secured to 4 buoys using 4×5 in. wires from buoys stern. Ship's ropes not used. Hose connection on port side using 12 in. (300 mm.) hoses. Vessel's derrick to have an SWL of at least 5 tonnes.
FRESH WATER: All quays are fitted with water hydrants. Water supplied by 3 hoses simultaneously, with a rate from 60 – 100 cu.m.p.h. Can also be supplied by barge up to 400 tons capacity but minimum order 150 tons.
FUEL: All grades can be supplied from the quays up to 1,000 t.p.h. Fuel can also be supplied by barge. Also see "Shipmasters' Report".
REPAIRS: All types of repair can be effected by the Naval Arsenal or by private companies.
DRY DOCKS: At the Naval Arsenal, one dry dock length 195 m., widt 23 m., depth up to 9.50 m.

Syncrolift, max. weight acceptable, 1,200 tons.

New Floating Dock will take vessels up to 60,000 d.w.t. Lifting capac 28,000 tons. Acceptable dimensions 235 m. × 38 m.
REPATRIATION: Seamen can be repatriated to Europe without delay by air.
AIRPORT: International airport with regular services to Europe.
TELEPHONES: All berths are equipped with telephone apparatus whic is placed on board vessels without charge.
HOLIDAYS: New Year (1st January); Tabaski (Variable Date); Nation Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascensio Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Date National Day (14th July); Assumption (15th August); All Saints' Day (1 November); Korite (Variable Date); Christmas (25th December).

GARBAGE DISPOSAL: Collection service is available and is supplied by the Port Authority. Collection services may also be supplied by ship's agent or private companies.

WASTE OIL DISPOSAL: Collection service is available through private company SRH (Societe de Precuperation des Huiles).

CURRENCY: CFA Franc (Fr.CFA). Fixed against French Franc (F.Fr.). F.Fr. 1.00 = 50Fr.CFA.

GENERAL: Several cases of assault have been reported against crew members returning to their ships during the hours of darkness. For this reason, the delivery of cash from Agents is suspended during the night hours. Although Port Authorities and Security are aware of the situation, it is advisable to acquaint all on board with this.

SHIPMASTER'S REPORT: With a draft in excess of 15 m. it is not possible to anchor in the inner roads due to the swell. The swell is worse from July to October (rainy season).

The Pilot directed us to an anchorage 0.5 miles N.E. of Island of Goree but in my opinion it is a little too close. However, the nearer a vessel can anchor N.E. of Goree the better. The holding ground is very good.

It is possible to talk to Mory Fuel Company direct on VHF Channel 2. They have a barge which is able to deliver fuel oil and diesel oil, capacity 500 tons.

Three tugs available, be sure to order one well in advance before completion of bunkering or the vessel may have to wait. Bunkering undertaken day and night.

SHIPMASTER'S REPORT: October 1983.

Documents: Separate Bonded Stores List (4 copies) required by Customs.

Pilotage: Pilots will board 0.2 miles from breakwater entrances.

Health: Advise Port Health Authorities of health state, also vaccinations required. They attend on arrival but do not acknowledge messages.

Fresh Water: Fresh water supply at piers averages 20 t.p.h.

Security: There have been many cases recently of anchored and stationary vessels being boarded by thieves and mooring ropes, etc. purloined. Vessels on regular run to Dakar do *not* stop in port approach areas until daylight. Gangway watchman essential. Shore traders to be confined to one area under supervision if allowed on board.

SHIPMASTER'S REPORT: March 1989.

Port Officials: Immigration and Port Health boarded on arrival alongside. Customs did not board until the next day.

The Agent advised that particular attention should be paid to declaring the paint on board and also that the Stores Declaration should be made out after the usual "presents" had been given out.

The Customs search was a quick look at the bond locker and the question "Is it as declared?" is asked. When the answer was in the affirmative and a "present" handed over the locker was sealed, no other area of the vessel was searched.

Normally, all stores are checked and any discrepancies will result in a fine, the minimum reported to be U.S.$500.00.

Ship's standard papers are accepted, except for the Health Declaration where the Port Authority form is required, copies placed on board for next call.

Papers required:

Health Declaration	1 copy
Crew Declaration	2 copies
Ports of Call List	5 copies
Vaccination List	2 copies
Drugs List	3 copies
Crew List	6 copies
Stores List	3 copies
Hazardous Cargo List	2 copies
Passenger List	4 copies
Stowaway List	4 copies
Arms and Ammunition List	4 copies
Animals List	4 copies
Cargo Manifest	4 copies

"Nil" declarations are required when appropriate.

The quantity of forms required varies slightly from visit to visit but this would appear sufficient to cover most calls.

The standard vaccination list included Cholera, and the Port Health advised that one of these was out of date, however Cholera is not required for Dakar and no problems were experienced.

An Inward Clearance Certificate is issued by the Port Authority and also a certificate of Free Pratique by the Port Health.

Outward Clearance is stamped by the Customs on copies of the Cargo Manifest.

Approaches: B.A. Chart 1001 was found to be as charted. Arrival was in daylight and lights could not be verified.

Buoy No. 1 is painted white and was difficult to see in the hazy conditions prevailing at the time.

Buoy No. 12 has a double black ball topmark as indicated in the Light List and not a single ball as appears on the chart.

Approach to the harbour entrance can be made either between the buoy just North of Goree Island and Buoy No. 12 or between Buoy No. 1 and Buoy No. 12.

Pilots: On arrival the Pilot will board at the charted position or closer to the harbour entrance from a large launch.

On departure, call the Pilot Station on VHF 1 hour before estimated departure time and confirm 10 minutes before vessel is ready to leave. The Pilots employed were competent and spoke good English.

Shifting ship: It is not necessary to use a Pilot for warping the vessel along the dock. For this operation linesmen are obtained by calling the Pilots on VHF.

Radio: The Port Authority require 96 hours, 48 hours and 24 hours notice of arrival according to the Radio Signals List. An attempt was made to pass this information using the telex number from the Radio Signals, but the telex remained undelivered, so contact was made by W/T through the local coast station.

Agents were also asked to advise the Port Authority and Pilots. The message must have been received as we were expected.

Pilots can be contacted on VHF as soon as within range and will advise berthing or anchoring prospects, the English spoken is generally good.

Pilots will advise on VHF, any vessel movements and give directions for approach.

Tugs: Two tugs were used for berthing as there was a strong wind on to the berth and there was another vessel on the berth astern, however, probably one tug would be sufficient under similar conditions in future.

The pilots carry portable VHF for communication with the tugs.

Tugs lines are used when required and are in good condition.

Berthing: All berths are fitted with fenders, but some are in a poor condition. In February 1989 the vessel berthed on Berth No. 85, the fendering here is good.

There are 2 sets of boat landing steps set into the face of the dock along this side of Pier No. 8 which would cause a problem if the vessel was positioned with either of these close to the foot of the gangway.

The vessel was later moved astern to Berth No. 84.

There is a clear working area alongside Berths No. 85 and 86, but dockside sheds and stored cargo made the loading area alongside Berth No. 84 somewhat cramped.

Loading: Vessel loaded 6,600 tonnes of ground nut pellets.

The loading is by portable belt elevators, supplied by tipper trucks.

Four elevators were used and positioned variously at hatches, depending on the distribution required.

Working hours are 0800 hrs. – 1800 hrs. every day.

Starting in the morning is slow, the first truck arriving at about 0830 hrs. and sometimes as late as 0915 hrs.

Hoppers are then constructed at the ends of the elevators by filling bags with the first of the delivered cargo, the hoppers are to give a good feed to the elevators. The last truck of the day arrives at about 1700 hrs. and when that is emptied the hoppers are dismantled and the contents of the bags are emptied on to the elevators and any remaining sweepings on the dock are shovelled on afterwards.

The day's work is usually completed by 1730 hrs.

The loading rate is governed by the availability of trucks and the rate of filling them at the silos.

The Agents are also the stevedores and their equipment was used.

Daily tonnage sheets are produced but are slow in coming forth, no record was kept of the tonnage per hatch, only the total loaded.

Gross elevator hours	284	Gross rate	23.24 t.p.h.
Net elevator hours	243.17	Net rate	27.14 t.p.h.

Approximate rate of 250 tonnes per elevator per day.

Fresh Water: Available at berth, the watermen supply their own hoses.

Repairs: Permission is required to immobilse the main engines. There are no other restrictions.

The repair firm Dakar Marine did a fair job of supplying and fitting new bolts to the rudder of another vessel alongside, but I suspect repair work is expensive.

Watchmen: It is best to employ two shore watchmen, one permanently on gangway duty and one on patrol. Theft is common and firefighting and lifesaving equipment are favourite items.

General: Fumigation: The holds were fumigated on arrival and left overnight, loading starting the next morning. The cargo was also fumigated on completion of loading.

Presents: Everyone expects either cigarettes or soft drinks for services rendered but can generally be persuaded to go away empty-handed, however a reasonable supply is required to take care of deserving cases.

Dust: For some days before arrival visibility was reduced by dust haze caused by sand from the desert, the whole of Dakar is covered in dust and when loading commenced this was made considerably worse.

Disbursements through Agents: The Agents prefer to draw cash and hand it to the Master to pay any accounts direct to the supplier, which is not the easist way of doing things.

Ensure that the Agent advises you of which items they will pay and which are expected to be paid by the vessel.

Laundry: Can be arranged by the ship chandler, but it is expensive.

Shore labour: All forms of cleaning and painting are possible, however at a cost of U.S.$20.00 per man per day would appear to be rather expensive, especially as the workers also expect to be fed.

Garbage collection: Recommended by the Agents and is carried out at intervals specified by the vessel (daily, every 2 days, etc.).

Ship Chandlers: A large number will present themselves as soon as the vessel arrives alongside, also a number of businessmen with everything from fish to watches for sale. The businessmen are best kept off the ship, as apart from their prices generally being the same or more than the Chandlers, they are likely to pick up anything that can be moved and spirit it away under their robes.

Prices of all items are high. Most foodstuffs have been imported and nothing except fish seems to be produced locally, although some good produce was seen on the market stalls in town.

M.N. Thoumas, United Shipchandlers, had been used before by the vessel and his prices compared favourably with other chandlers, he also seems to have an efficient organisation. Some of his fresh produce was returned as being poor and replacements were made.

AUTHORITY: Port Autonome de Dakar, 21 Boulevard de la Liberation, P. 3195, Dakar, Senegal. *Tel:* 23-45-45. *Telex:* 21404. *FAX:* 23.36.06. *Cables:* Porcomer Dakar. *FAX:* 213606. *Contact:* Mr.Pathe Ndiaye, Director General. Captain E. Sarr, Harbour Master. J.B.G. Diatta, Commercial Director.

AGENT: Socopao Senegal, 47 Avenue Albert Sarrault, B.P. 233, Dakar, Senegal. Tel: 23.10.01, 23.46.81. Telex: 51444 Freight SG. Fax: 23.47.49, 23.56.14. Cables: "Freight Dakar".

Fish Department – Tel: 23.59.43, 23.10.01. Telex: 21496 Freight SG. Fax: 23.47.69, 23.56.14.

Sub-Agency at Kaolak. Tel: 41.19.07. Telex: 74060.

KAOLACK: 14.09 N. 16.06 W.

DOCUMENTS:
2 Crew Lists.
2 Stores Lists.
2 Manifests (tobacco, wine, etc.). Agents deposit at Customs office.

PILOTAGE: Pilot taken on board, and lands in Dakar. When vessels do not require tank-washing, the Pilot disembarks in roadstead.

ANCHORAGES: Sufficient for three vessels only. About 6 m. deep.

RESTRICTIONS: Night navigation forbidden in River Saloum. Depth available 3.0 m.

MAX. SIZE: Length 105 m. (because of River Valor).

HEALTH: Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar.

TUGS: No tugs. (Only from Dakar.)

BERTHING: Signals by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

Private Berth: Saltworks Wharf, length 52 m. Owned by S.S.S.I.M. Tel: 411904. Telex: 7472 SG.

MEDICAL: Yellow fever vaccinations only at Dakar. No hospital facilities.

DENSITY: 1025 – 1035.

FRESH WATER: Available at 10 t.p.h.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agent.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco, no restrictions; Customs control on board (Declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, not limited, Customs controlled.

CONSULS: None (Dakar only). French Consulate Agent: Leon Masfrand, Tel: 412176.

REPATRIATION: Not possible (Dakar only).

AIRPORT: None.

TIME: GMT throughout year.

HOLIDAYS: Independence Day (4th April) no loading. Tabaski (dependent on moon phase).

FIRE: Tel: 324.

TELEPHONES: Not possible to place on board.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not necessary.

REGULATIONS: Vessels must hoist Senegalese flag and notify Agent before entering port.

AUTHORITY: Harbour Master, Rue de la Residence, Kaolack, Senegal. *Tel:* 411915.

AGENT: See "Dakar".

Republic of Seychelles

PORT VICTORIA, Mahe: 04.37 S. 55.28 E. (See Plan)

PORT LIMITS: *Outer Harbour:* The area in Victoria Harbour between limits of the inner harbour and a line from Cedre Point to Long. 55° 29.84' E., thence South to St.Anne Island Shore, thence S.S.W. until Rochon Bridge bears West, then West until Victoria Lighthouse bears North.

DOCUMENTS:

Maritime Declaration of Health – forms obtainable from Medical Officer/Chief Environmental Health Officer.
Derat Certificate.
5 Crew Lists and Passengers' Lists.
Dangerous Cargo List.
Ship's Register.
Crew Declaration Form.
Declaration of Stores and high dutiable goods.
Parcels List.
Firearms List.
List of Animals remaining on board (Pets included).
Un-manifested Cargo List.
Cargo Manifests.
Clearance from last Port.

APPROACHES: *Notice to Mariners No. 1013(P)/86:*

Indian Ocean – Seychelles – Mahe – Port Victoria – Routeing System.

The following announcement has been made by the Ministry of Tourism and Transport, Port and Marine Services Division, Seychelles.

"A routeing system for approaches to Port Victoria, Mahe, Seychelles has been adopted.

All vessels calling to and from Port Victoria are required as far as practicable to stay within an area bounded by lines joining the following Geographical points. Points (1), (2), (3), (9) and (10) demark the Northern Approach and Points (3), (4), (5), (6), (7) and (8) demark the Southern Approach."

(1)	3° 43.0' S.,	55° 33.0' E.
(2)	4° 26.0' S.,	55° 32.0' E.
(3)	4° 30.0' S.,	55° 39.0' E.
(4)	4° 51.0' S.,	55° 42.5' E.
(5)	5° 16.5' S.,	55° 30.0' E.
(6)	5° 13.0' S.,	55° 23.0' E.
(7)	4° 48.5' S.,	55° 34.5' E.
(8)	4° 37.0' S.,	55° 33.5' E.
(9)	4° 33.0' S.,	55° 26.0' E.
(10)	3° 43.0' S.,	55° 25.0' E.

Charts affected: 742, 740, 721.

Harbour Master, Ministry of Tourism and Transport, Seychelles. (H. 5775/82.)

PILOTAGE: Compulsory in Inner and Outer Harbour for any vessel of or exceeding 150 g.r.t.

24 hours' notice, giving draft and length. Telegraphic address "Demarine" through Cable & Wireless (on schedule 500 kHz and 8714 kHz. Schedule published in Radio List. Harbour Control equipped with VHF Channels 16, 12 and 6).

Pilot Boat: White hull with white cabin, orange top, flying "H" flag.

Signals for Pilot: "G" by flag and/or whistle.

Pilot Boarding Ground: The Pilot boards vessels about 6 cables Northward of the outermost buoy ("Isolated Danger Buoy") in position Lat. 4° 35.7' S., Long. 55° 29.6' E. There is no night pilotage. Pilot can board in almost any weather. While awaiting Pilot; vessel can anchor in any suitable anchorage in the pilotage area. Vessels should call "Victoria Harbour Control" on VHF, Channel 16, 2 hours before arrival.

ANCHORAGES: Masters of all vessels are requested not to anchor on the leading marks or in any other position so as to block the entrance channel.

The following anchorages are available in the Outer Harbour.

(i) Victoria Lighthouse bearing 238° True. Distance 9.75 cables in depths of 20 m. to 22 m.
(ii) Victoria Lighthouse bearing 232° True. Distance 1 mile in depths of 22 m.
(iii) Victoria Lighthouse bearing 224° True. Distance 1.4 miles in depths of 18 m. to 20 m.
(iv) Victoria Lighthouse bearing 212° True. Distance 1.5 miles in depths of 20 m. to 22 m.

Supertankers and large vessels anchor outside the Fairway Buoy in any suitable anchorage. The Master should always contact Harbour Master for anchorage instructions.

RESTRICTIONS: All shipping movement in Inner Harbour to take place during daylight hours only. In Outer Harbour, night movement at discretion of Master after consultation with Harbour Master. No tide restrictions.

There is berthing space available for vessels with draft over 9.5 m., but not exceeding 11.5 m. This is between bollards No. 12 and No. 20, a distance of 123 m., at the Southern end of the quay. Vessels exceeding 123 m. with draft of 9.5 m. to 11.5 m. overhang the quay to the South and lines are made fast on shore bollards.

Under these circumstances vessels which overhang come starboard side to and the port anchor is used. This system is mainly used for tankers as the connecting discharge pipe ashore only needs to be in line with the ship's manifold. Cargo ships coming in at a deeper draft than 9.5 m. and less 11.5 m. can be docked. However it must be noted that cargo cannot be discharged from all hatches that overhang and the ship will have to be turned at a certain stage of discharging.

HEALTH: "Q" Flag or international red over white. Medical Officer/Environmental Health Officer may board vessels at anchor and before entering Inner Harbour. Crew Lists with vaccination dates against yellow fever and cholera if vessel from infected places. Health clearance given at Port Victoria only, health clearance may be given at Assumption Island by prior arrangement. Hospital facilities available. Vessels proceeding to the Inner Harbour may be disinsectised. Radio Pratique may be granted on request to "Port Health" – Ministry of Health.

No animal/pet of any description is permitted to be landed ashore or on the wharf as per Seychelles Quarantine Regulations. Necessary action will be taken against any Master who disregards these instructions in addition to the possibility of destroying any such animal or pet found ashore. Emphasis is made on the need to keep the Seychelles free from major animal diseases.

RADIO/VHF: Cable and Wireless, Port Victoria, Mahe. Call sign ZCQ. The Harbour Master's Office, call sign, "Harbour Control" keeps a 24 hour watch on VHF Channel 16 and Channel 12. Any further information can be obtained by calling up Harbour Control on Channel 16. Other Channels available – 12 and 6.

TUGS: 2×1,200 b.h.p. twin screw tugs and 1×2,000 b.h.p. twin screw tug in operation. Vessels of up to 800 ft. are able to berth alongside.

BERTHING: Due to limited space no berth can be reserved either alongside or at anchorage. All assistance given to position every ship in best available place.

Mahe Quay is in full operation. Two vessels can berth alongside. Berth No. 1 is allocated to oil and cement tankers and Berth No. 2 to cargo and passenger ships. Total length 370.4 m. Maximum depth of water at all berths is 35 ft. There are connections for fuel, fresh water and telephones at all berths. Port Offices, Customs and Health are situated at the New Port area.

Masters and Officers of vessels moored at the 2 above mentioned places are reminded of the importance of tending moorings at frequent intervals. Rat guards are deemed essential. Slack lines present a hazard to the safety of vessels moored alongside.

In the case of tankers and bulk carriers discharging or loading, the hourly difference in draft can be considerable. It is therefore recommended that regular routine checks on moorings be carried out by the Duty Officer.

Movement of Vessels Moored at Mahe Quay, Commercial Port, Fishing Port or at Anchorage. No movement of any vessel moored at the above mentioned places is permitted without authorisation from the Harbour Master. Ship's boats or lifeboats are not to be used as plying boats or on excursions to nearby islands. Use of ship's own craft for any reason including exercises must be cleared and authorised in the first instance.

Loading and discharging by ship's gear. Equipment available to handle 20 ft. and 40 ft. containers.

STEVEDORES: ETA advice required two to three days before ship's arrival in port. Loading and Discharging: General Cargo: average 15 t.p.h. per gang (subject weather conditions). Bagged Cargo: average 50 t.p.h. per gang (subject weather conditions). Containers: 22 boxes per hour. All stevedoring undertaken with ship's own gear.

TANKERS: Max. LOA 180 m., max. beam 33 m., max. draft 11.5 m. Discharge throughout 24 hours. Discharge lines 8 in. and 6 in. (Bulk white petroleum products and bulk cement).

DENSITY: Average 1025 at all states of tide.

FRESH WATER: In good supply. By mains when alongside. No water barge currently available. All water supplied is chlorinated. Vessels should request water at least 72 hours before arrival through Agent.

FUEL: Gas oil Kinematic CS at 40°C. = 3.63. Due to limited stock, it is advisable to give one week's notice, preferably through nomination addressed to Seychelles Petroleum Co. (Seypec).

Intermediate Fuel oil now available on North end of berth only. (Fuel oil 180 centistoke). Pour point 70 max. – Kinematic 180 max. – restriction on flow of delivery pending improvement of facilities.

CONSULS: *Embassies:* China, Cuba, France, Russia, U.S.A.

High Commissions: Great Britain, India.

Consuls: Belgium, Cyprus, Denmark, Finland, Germany, Greece, Italy, Malagasy Rep., Mauritius, Morocco, Netherlands, Norway, Spain, Sweden, Switzerland.

REPAIRS: Slipways for vessels under 300 g.r.t. Mechanical engineering and fabrication. Electronic and electrical engineering. Commercial diving services (hull cleaning, inspection and repairs). Shipchandling (marine equipment).

DRY DOCKS: None, but being considered.

GANGWAY/DECK WATCHMEN: Customs Officer on duty at all times if vessel is discharging cargo.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CUSTOMS ALLOWANCES: At Custom Officer's discretion.

CARGO GEAR: All cargo slings and gear supplied by ship.

REPATRIATION: Crew changes possible. Undertaken by Agents in connection with Immigration Authorities.

AIRPORT: In operation. Several flights weekly.

TIME: GMT plus 4 hours, throughout year.

HOLIDAYS: New Year (1st and 2nd January); Good Friday; Labour Day (May 1st); Corpus Christi (June 2nd); Liberation Day (June 5th); National Day (June 18th); Independence Day (June 29th); Assumption Day (August 15th); All Saints' Day (November 1st); Immaculate Conception (December 8th); Christmas Day (December 25th).

SHIP SUPPLY SERVICE: Ship Supply Services can be made by prior arrangements with any shipping Agencies by using fast hire crafts, which are allowed to operate within a range of 60 miles Mahe to any given rendezvous.

List of Shipping Agents:

Aquaris Shipping, P.O.Box 865, Victoria, Male, Seychelles. Tel: (248) 225050. Telex: 2424 Unship. Fax: (248) 225043.

Hunt Deltel & Co. Ltd., P.O.Box 14, Victoria, Mahe, Seychelles. Fax: (248) 225367.

Mahe Shipping Co. Ltd., P.O.Box 336, Victoria, Mahe, Seychelles. Fax: (248) 322978.

Harry Savy & Co. Seychelles (Pty) Ltd., P.O.Box 20, Victoria, Mahe, Seychelles. Fax: (248) 321421.

M/S Allied Agencies Ltd., P.O.Box 345, Mahe, Seychelles. Fax: (248) 224226.

POLICE/AMBULANCE/FIRE: Emergency: Ring 999 otherwise Police 322011 and Hospital 324400.

SERVICES: No tank-cleaning equipment, no facilities for discharge of tank washing, no compass adjusting, radar or radio engineer available for small repairs.

TELEPHONES: A telephone is placed on board ships alongside. Vessel may arrange for additional telephones.

SHORE LEAVE: All members of the crew are allowed ashore. No limit to shore leave. Crew to be in possession of identity card or discharge book.

IDENTIFICATION CARDS: See "Shore Leave".

DELAYS: Berthing: Limited berth. Loading or discharging: Weather conditions. Bunkering: Space alongside.

SAFETY: There shall be no smoking on board vessels carrying petroleum products, chemicals or LPG except in such safe places as may be approved jointly by the Master and Harbour Master. Responsibility for ensuring that the crew of the vessel are informed of the safe places so approved, and that the regulations are complied with, rests with the Master. Such vessels when berthed alongside a quay must have the eye of a wire hanging over the outside bow and quarter to enable tugs to connect up readily in an emergency. The said wire must be suitable for such purposes and shall have sufficient scope on deck for free running.

Engines are not to be immobilised whilst the vessel is berthed alongside the wharf without prior authorisation from the Harbour Master.

Any unsafe condition or action observed on board a vessel will result in immediate cessation of cargo or bunkering operations until such condition or action is corrected. Continued or blatant disregard of these requirements by any ship will result in the removal of the ship from berth or quay at the cost of the vessel and the Owners/Operators/Charterers informed of the circumstances.

Use of radar and radio transmitter forbidden whilst alongside the wharf. Walkie-Talkies not permitted outside port area.

Portable R/T sets or transceivers must be of an approved design and those used on tankers must be intrinsically safe.

POLLUTION: All ballast discharged over the side must be clean and entirely free from petroleum products of any description in accordance with the Marine Pollution Regulations of 1981. No dirty ballast is to be pumped overboard as per Laws of Seychelles Cap. 210 Section 18. This includes brine from fish tanks in which fish have been stored. All Masters are advised to familiarise themselves, through their respective Agent, with the Marine Pollution regulations 1981. The Master of a vessel found guilty under these Regulations is liable to imprisonment for five years and to a fine of two hundred thousand Seychelles Rupees in addition to costs for cleaning up operations, environmental damages and commercial loss.

Whilst transferring fuel and/or taking bunkers all scuppers must be effectively plugged to prevent accidental discharge of oil into the sea.

GARBAGE DISPOSAL: A small fee is charged by the port daily for use of port bins meant to cater for empty bottles and cans. These must be packed in plastic garbage bags.

Garbage from the galley and remnants of food are not permitted ashore. These are cleared by Waterborne Licenced Garbage Contractors for a fee. Regular disposal of garbage is compulsory.

WASTE OIL DISPOSAL: No facilities exist at the moment.

It is hoped that such facilities will be provided in the not too distant future.

SEAMAN'S CLUBS: None. Several popular bars, restaurants and night clubs are available in the town centre, some 10 – 15 minutes walk from the port.

CURRENCY: Seychelles Rupee. No restrictions on foreign currency, although coins are not readily acceptable.

AUTHORITY: Ministry of Tourism and Transport, Port and Marine Services Division, P.O.Box 47, Mahe, Seychelles. *Tel:* (248) 224701. *Telex:* 2329. *Cables:* Demarine. *FAX:* (248) 224004. *Contact:* S.A.G. Andrade, Director General. Captain Gilbert Hoareau, Senior Harbour Master – Pilot. Captain R. Larue, Assistant Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Sierra Leone

FREETOWN: 08.30 N. 13.14 W. (See Plan)

DOCUMENTS:

5 Crew Lists.
5 Ports of Call Lists.
5 Passengers in Transit Lists.
5 Passengers Landing Lists.
1 Crew Declaration (signed by crew members).
1 Stores List.
1 Arms & Ammunition List.
1 Port Health Declaration.
1 Vaccination List (cholera and yellow fever).

Port Health Declaration, Crew Declaration Form and Arms and Ammunition List, all special forms, which obtained from boarding party or, if required, mailed in advance to ship's Owners.

1. *For Vessels Working Cargo (Discharging):*

(a) From each port of loading, by air mail to vessel's Agent: 2 copies of Cargo Manifest, 1 copy of Freighted Manifest.

(b) On arrival: 5 copies of Cargo Manifests, 1 copy each Bill of Lading (non-negotiable).

Note: Customs and Port Authority insists on documents in English, and that Manifests should show weights and measurements. Non-compliance with these instructions places vessel's Agent in difficult position, and vessel may not discharge without payment of fine.

2. *Required by Port and Stevedores for Vessels Working Cargo:*

4 copies Stowage Plan, 4 copies Hatch Lists. List of all lifts over 3 tons.

PILOTAGE: Vessels may at present enter and leave port anchorage without Pilot. Pilotage only compulsory for vessels berthing alongside Queen Elizabeth II Quay, Kissy Oil Jetty, vessels over 20,000 tonnes Summer deadweight and vessels over 30 ft. draft. Upon Master's request, Pilot available at Fairway Buoy with 24 hours' notice. Normally only during daylight hours. Port entrance is between Cape Sierra Leone to South and Fairway Buoy to North. Is approx. 1 mile wide and minimum draft 38 ft. To West harbour is protected by sand shoals, nearest to entrance is O'Farrell Shoal about 1.5 miles North of Cape Sierra Leone.

Pilots board from a launch painted black, with "Pilot" in black on both sides of superstructure on a white background.

Pilot Office will give an anchorage to every vessel arriving or, if a vessel is berthing on arrival, will advise where the Pilot is boarding. This is normally off the quay. The Signal station is equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication.

The Pilot Office, Queen Elizabeth II Quay, is also equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication. The Port Operations Manager is available on VHF Channel 10.

ANCHORAGE: With Falconbridge Point Beacon bearing as follows (all bearings true): Note: Falconbridge Point Beacon circular steel tower 8 ft. high, painted white with 2 horizontal black bands; Fl. white every 2 seconds.

Anchor Berth	*Bearing (T)*	*Distance (Cables)*	
E. 3	138	10.5	
E. 4	154	9	
E. 5	180	8	
E. 6	207	8	
F. 5	136	7	
F. 6	154	6	
F. 7	184	5	
F. 8	210	5	
F. 9	232	7	
F. 10	242	9	
F. 11	249	11	
G. 1	099	15	
G. 2	100	12	
G. 3	104	7	
G. 4	126	3	
H. 1	184	2	
H. 2	234	3	
H. 3	252	5	
H. 4	258	7	
B. 1	236	11	(Vessels bunkering ex-barge)

With Cline Point bearing as follows:

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
D. 1	232	5.5
D. 2	253	7
D. 3	253	3
D. 4	273	5.5
C. 1	244	4
C. 2	270	5
B. 2	280	7.25

With Kissy Oil Jetty bearing as follows:

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
B. 2	235	1 mile

No draft restriction at anchorage, also no length and beam restrictions and vessels can arrive and sail any hour day and night.

RESTRICTIONS: *Draft Limits for Deep Laden Vessels:*

Draft Limits: 38 ft. (11.6 m.) plus height of tide to a maximum of 48 ft. (14.6 m.).

Time Limits:

1. From 5 hours Flood Tide to HW.
2. From LW to 1 hour Flood Tide.
3. During hours of daylight only.

Vessels of 36 ft. draft and over must keep to the time limits.

Vessels of under 36 ft. draft may navigate the channel at any time but attention is drawn to the strong cross currents.

(H.M.S. Hydra has commented strongly on this danger).

HEALTH: Pratique by radio or on boarding. See "Agent's Cable Requirements".

RADIO: *Freetown Radio, Coast Station:* Watch is maintained on 500 kHz from 0700 – 2200 hrs. GMT on week-days, and 1200 – 1400 hrs. GMT on Sundays and Public Holidays.

The working frequency is 421 kHz and traffic lists are broadcast on this frequency after preliminary announcements on 500 kHz at 0730, 0830 hrs., etc.: up to 2130 hrs. GMT. On Sundays and holidays, traffic lists are broadcast at 0800, 1200 hrs. and 1700 hrs. GMT.

Time GMT	*9LL Freq.*	*Search-band for reply*
0800 – 0900 hrs. 1300 – 1430 hrs. 1700 – 1830 hrs.	6411	6 MHz
0900 – 1000 hrs. 1200 – 1300 hrs. 1830 – 2000 hrs.	8710	8 MHz
1000 – 1100 hrs. 1530 – 1700 hrs.	13042.5	12 MHz

On Sundays and other holidays the H.F. Schedules are as follows:

0830 – 0900 hrs.	8710	8354 to 8374 kHz
0930 – 1000 hrs.	13042.5	12531 to 12561 kHz
1330 – 1400 hrs.	6411	6 MHz
1600 – 1630 hrs.	13042.5	12531 to 12561 kHz
1700 – 1730 hrs.	8710	8354 to 8374 kHz

Traffic lists are broadcast at the commencement of every HF Schedule and repeated at intervals during the Schedule.

Ship's Radio Telephone and Harbour Service: Watch is kept on 2182 kHz for casual R/T traffic from 0800 – 2000 hrs. GMT on weekdays, and 0800 – 1730 hrs. GMT on Sundays and holidays.

Ships are advised to arrange their calls in advance by W/T where possible so it can be ensured that the called party is available. Calls can be connected to or from any number on the Freetown Telephone Exchange. Longer range contacts should be in the 8 MHz maritime band, the frequency of 9LL in this band being 8768.9 kHz.

Other Services: Navigational warnings issued from time to time by the Harbour Master are broadcast on W/T. Spoken telegrams are accepted at ordinary W/T rates on RT.

VHF: *Freetown Radio:* A 24-hour watch is kept on Channel 16 switching to Channel 26 for communication. Calls can be connected to the Freetown Exchange. Masters are advised the fullest use should be made of this service, particularly after office hours and during the early hours of the morning or late at night when no cable service is available. The Authority tugs are also equipped with VHF, watch being kept on Channel 16 switching to Channel 12 for communication.

Signal Station	Channel 16
Pilot Office (Freetown Pilot)	Channel 16
Harbour Master	Channel 16

AGENT'S CABLE REQUIREMENTS: Masters requested cable ETA as early as possible. Following information required:

(a) For vessels working cargo: 1. Discharge or Loading Hatch distribution. 2. Gangs required. 3. If Explosives on board for Freetown or in transit.

(b) For vessels bunkering: Bunkers and water required.

(c) For Tankers discharging: 1. Total Displacement. 2. Draft. 3. Cargo particulars (quantity and grade).

(d) For vessels embarking/disembarking Krooboys: 1. If Krooboys provisions required and for how long. 2. Cash requirements. 3. If service on arrival if arriving between 2200 hrs. and 0700 hrs., bearing in mind the high costs for Customs overtime and port service.

(e) In general: 1. Cash requirements. 2. Water requirements. 3. Medical attendance, if required on arrival.

When ETA received and confirmed Agent will cable vessel informing despatch prospects and if not berthing on arrival, anchor berth.

Note: For vessels returning to Freetown from round trip to coast, information should be cabled if any over-carried cargo, etc., to be discharged.

TUGS: 1 seagoing tug available, *Sewa* (2,200 h.p.).Tug has twin-screw with diesel engine and is equipped for salvage having fire-fighting equipment and a 10 ton derrick. Normally tug used for berthing and unberthing operations. Charges for berthing and unberthing include use of a tug, whether required or not.

BERTHING: All alongside berths: between hours of 0630 and 2230. Vessels may request berthing after 2230 hrs. from Harbour Master's office. Kissy Oil Jetty; max. displacement – 46,000 tons, max. draft 39 ft., berthing flood-tide only.

Queen Elizabeth II Quay No. 1: Berthing length: no restriction; breadth: no restriction; max. draft 31 ft. 6 in. At this draft vessels must be 180 ft. from steps East end of quay. Vessels up to draft not exceeding 24 ft. may berth as far East as steps. Unberthing not permitted from 1 hour after HW until 1 hour after LW.

Berth No. 1A: As for Berth No. 1, max. draft 31 ft. 06 in.

Berth No. 2: Berthing and unberthing, length and breadth no restrictions. Max. draft 31 ft. 06 in. No tidal restrictions.

Berths No. 3 and 4: Max. draft 32 ft. 06 in.

Berth No. 5: Max. draft 31 ft. 06 in. – 32 ft. 06 in.

Berth No. 6: Max. draft 24 ft.–25 ft.

Facilities for loading palm kernel oil available only at Berth No. 1.

Bulk Grain: Berth No. 1 is equipped for discharging grain in bulk through a conveyor built on Shed No. 1 to the Flour Mill. The actual discharge is effected by mobile vacuvators. Four such units are available with total potential of 80 t.p.h., though a more realistic figure would be in the region of 60 – 70 t.p.h. Grain vessels are worked around the clock.

King Tom Jetty: Berthing *not* allowed.

Dispensation will only be granted in exceptional circumstances to berth or unberth vessels before 0600 hrs. and after 2330 hrs.

During discharging and/or loading, Customs Officers, normally 2, as well as 2 Port Authority Discrepancy Clerks (only when discharging) will be on board.

Sherbro River: Anchorage daylight only. Length of vessel up to 470 ft. Breadth, no restrictions. Max. draft, 24 ft. 06 in. The passage between Buoy No. 1 and Buoy No. 8 and between No. 1 Buoy and Yangsai Anchorage must be navigated in daylight hours only.

The Channel between Buoy Point and Yangsai must be navigated only during period 2 hours to H.W., and on a rising tide, buoy point being area which restricts draft. Bagru River Anchorage Buoy No. 8, length and breadth unlimited. Max. draft 24 ft. 06 in. Limitations as regards vessel's dimensions, drafts and times at which movements may be carried out should not be deviated from without prior permission of the Harbour Master.

MECHANICAL EQUIPMENT:

Type	*Capacity*	*Complement*
Portal quay cranes	3 tons	2
Mobile crane	30 tons	1
Fork truck	10 tons	3
Fork trucks	4,000/5,000 lbs.	34
Container handler	42 tons	1
Container handler	35 tons	1
Container handler	26 tons	1
Mafi trucks		3
Mafi trailers	40 tons	11
Fire engine		1
Ambulance		1

DANGEROUS CARGO: Dangerous cargo, explosives, small arms, ammunition, *must not* be unloaded alongside unless Port Authority has been notified on approved form, and has given permission for cargo to be discharged. Vessels should cable prior arrival if dangerous cargo for discharge on board.

STEVEDORES: (See "Agent's Cable Requirements") ETA as soon as possible. Discharge/loading hatch distribution. Gangs required. Bunkers and water requirements, information re explosives. For tankers discharging – total displacement and draft. Work ashore undertaken by Sierra Leone Ports Authority on cargo quay, Queen Elizabeth II Quay, whilst work on board as well as discharging and/or loading to or from vessels at stream undertaken by Sierra Leone Ports Authority stevedoring division.

Working hours alongside quay: Normal working hours from 0800 hrs. to 1200 hrs. and 1330 hrs. to 1700 hrs. Monday to Friday.

No meal-break but the hour 1200 hrs. to 1330 hrs. counts overtime.

Working at Stream: Discharging and/or loading to or from vessels effected 24 hours a day. Gangs can be arranged at anytime between 0730 hrs. and 1800 hrs. week-days. On Sundays and holidays work must be arranged on the previous day.

MEDICAL: Hospital facilities available.

TANKERS: *Kissy Oil Jetty:* In order that berthing/unberthing operations at Kissy Oil Jetty are carried out without delay Agencies are requested to furnish to the Harbour Master the following particulars, of vessel using Kissy Oil Terminal.

ETA: At least 24 hours' notice to be given.

Displacement and deadweight: The max. permitted displacement is 46,000 tons.

Draft forward and aft: Max. draft 11.90 m. (39 ft.).

Length overall: No restriction.

The time of berthing will be at the discretion of the Port Authority, dependent on tidal and weather conditions, and vessel's draft. This is normally on a flood tide and during daylight hours only.

Notice: Port Authority Circular No. HM/241/354 dated 14th January 1981.

Oil Tankers Berthing Kissy Oil Jetty: In view of the strain experienced on the forward back springs during ebb tide on above-named jetty, vessels are to moor using double or more forward back springs.

This is necessary to avoid any damage to the discharge/loading arms on jetty.

Agents are advised to inform shipping companies that vessels are required to carry the necessary extra mooring ropes or wires.

Port Authority Pilots are to ensure prior to berthing vessels that sufficient moorings are onboard for extra forward back springs and separate bollards on jetty head are used for each spring.

DENSITY: 1018 to 1025.

FRESH WATER: Good fresh water is available at all quay berths and at Kissy Oil Jetty.

(Supply Rates:	Old berths	Approx. 20/25 t.p.h.
Dependent on	New berths	Approx. 40/50 t.p.h.
Ship's intake)	Kissy Oil Jetty	Approx. 15/20 t.p.h.

FUEL: Available at Kissy Oil Jetty and Q.E.II Quays. Gas oil available by tanker truck.

CONSULS:

Belgium	250143	Japan	222721
China (People's Republic)	231797	Lebanon	222353

REPAIRS: All repairs if spares supplied.

DRY DOCKS: No dry docks in Freetown. Slipway of 600 tons capacity.

SURVEYORS: Mining and General Services Limited, P.O.Box 68, Freetown. Telex: 3226. Cables: Mags. They are Lloyd's Agents and undertake cargo surveys.

A Lloyd's Register approved surveyor is available.

GANGWAY/DECK WATCHMEN: Strongly recommended, available through Agent. It is suggested that gangway is raised after close of work. The Port Authority operates a patrol boat with security personnel to combat piracy.

Piracy: Acts of piracy have taken place alongside and whilst vessel approaching Pilot. Crew members have sustained injuries.

OPENING/CLOSING HATCHES: By stevedores, except mechanical hatches.

CERTIFICATES:

Ship's Register.
Derat Certificate.
Deck Passengers Certificate.
Radio Certificate.

CUSTOMS ALLOWANCES: Tobacco, 40 cigarettes *or* 0.25 lb tobacco. Wine and/or Spirits, 0.25 bottles of spirit. Master — 200 cigarettes and 1 opened bottle of spirit.

REPATRIATION: Can be arranged.

AIRPORT: By bus and ferry to Lungi Airport. Regular scheduled services to Africa, Middle East and Europe. European airlines operate city centre check-in facilities.

Helicopter service from Aberdeen to Lungi takes 10 minutes.

TIME: GMT throughout year.

HOLIDAYS: Several religious and anniversary holidays. Port works every day except Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: In port, call Pilot Station on Channel 16, otherwise dial 019.

EMERGENCY CO-ORDINATION CENTRE/S.A.R. LINK: Sierra Leone Ports Authority. Telex: 3262. Cables: Portman Freetown.

TELEPHONES: Not available for placing on board.

SERVICES: Tank cleaning. Tank and hull scaling.

BANKS: Barclays Bank of Sierra Leone, P.O.Box 12, Siaka Stevens Street, Freetown.

Standard Bank Sierra Leone Ltd., Lightfoot Boston Street, Freetown.

STORING: Moderate quantities of stores are available and can be taken ex-quay. However no bonded stores' facilities exist.

SHIP SUPPLY SERVICE: Contact: Offshore Services Ltd., P.O.Box 376, Freetown.

SHORE LEAVE: Allowed. Identity cards must be carried.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Collection service available. Skips are provided alongside by SLPA on arrival of vessels. Charges as per SLPA tariff.

WASTE OIL DISPOSAL: Available on request.

SEAMAN'S CLUBS: Stella Maris, Blackhall Road, Freetown, Sierra Leone. Facilities include postage, telephones in the port. Football matches and church services could be arranged, likewise minibus collection.

CURRENCY: Leone (Le). No local currency restrictions up to Le 25,000.00.

Forex Bureau available in City Centre.

DELAYS: No delays experienced.

GENERAL: Always confirm time of entering harbour with the Aberdeen Hill Signal Station to ensure turn for berthing. Draft should be indicated.

DEVELOPMENTS: Rehabilitation of Queen Elizabeth II Quay and facilities scheduled between 1996 and 2002.

AUTHORITY: Sierra Leone Ports Authority, P.M.Bag 386, Freetown, Sierra Leone. *Tel:* (232 22) 250111, 250989. *Telex:* 3262. *Cables:* Portman Freetown. *FAX:* 250616. *Contact:* Captain Helmut Friedrichs, General Manager.

AGENT: Sierra Leone Shipping Agencies Limited, P.O.Box No. 74, Freetown, Sierra Leone. Tel: 250881/250528. Telex: 3260/3225 Fax: 250400. Cables: "Seaborne Freetown".

PEPEL: 08.34 N. 13.04 W.

LOCATION: On Sierra Leone River, 15 miles upstream from Freetown. Approach Channel between Freetown anchorage and Pepel is full buoyed. No night navigation.

DOCUMENTS: See "Freetown".

PILOTAGE: Private pilotage undertaken by mining Company's Pilot who board at Freetown Anchorage. 48 hours ETA required, cable "Mag Freetown Sierra Leone", giving ETA Fairway Buoy, quantity water/fue required, asking for Free Pratique, and if Pilot required to Freetow Anchorage.

ANCHORAGE: See "Freetown".

RESTRICTIONS: Draft only, decided at discretion of Berthing Maste Entry daylight hours only. Channel between Pepel and Freetown is no deepened so that depth in channel is 38 ft. plus height of tide. Accordin to official tide tables, range of high tides is approximately 7 ft. to 11 f above Admiralty Chart Datum.

MAX. SIZE: Length 840 ft., beam 128 ft., water depth 38 ft.* plus heig of tide which ranges from 7 ft. to 11 ft. above Chart Datum. Septemb to December additional draft restrictions due channel silting.

*The channel has not been maintained since 1975. Dredging is to tak place.

HEALTH: See "Freetown". 48 hours advance warning for Free Pratiqu

TUGS: Not used.

BERTHING: Milton Margai Pier only. Loading up to 3,000 t.p according to size of vessel.

New dolphin mooring system installed to permit handling larger ship Depth alongside 45 ft. Shiploader max. boom height when in horizo position is 71 ft. above Chart Datum, with max. outreach 87 ft. fro berthing line. Loading rate 4,000 t.p.h. Under the new conditions, limitin dimensions for ships (which must be equipped with satisfactory moori equipment): LOA 840 ft. Moulded breadth 128 ft.

Permissible sailing draft with allowance made for safe navigation, of all ships will, as at present, remain absolutely at discretion of Berthing Master at Pepel or his deputy. It is possible that during the months of September to December every year an additional draft allowance will have to be imposed by reason of seasonal silting of the channel, but it is intended to carry out annual maintenance dredging.

Company will be prepared to consider acceptance of ships having dimensions in excess to those above but only after specific approval of fully detailed plans of each ship concerned and, in any event, not in excess of dimensions: LOA 870 ft., moulded breadth 136 ft., moulded depth 73 ft.

Berthing displacement 63,000 tons on an even keel ballast draft of 23 ft. forward and aft on berthing.

STEVEDORES: Available.
FRESH WATER: Available, 48 hours' notice required.
FUEL: Limited supplies available, 48 hours' notice required.
TIME: GMT throughout year.
TELEPHONES: None available.
SHORE LEAVE: Not allowed. Customs and Immigration regulations prohibit any member of crew from disembarking at jetty or other works.
DELAYS: First come first served.
GENERAL: See "Freetown" for all general information.

SHERBRO (Bonthe): 07.32 N. 12.30 W.

DOCUMENTS: See "Freetown".
PILOTAGE: Compulsory. Freetown Pilots are used and are picked-up and landed at Freetown.
ANCHORAGES: Between Buoy No. 4 and Buoy No. 8.
RESTRICTIONS: Entry during daylight only. Restrictions between Buoy Point and Yangasi Tree, which must be navigated 2 hours to high water and on a rising tide.
MAX. SIZE: Max. draft 7.31 m.
HEALTH: International Health Certificate is required.
RADIO/VHF: Channel 16 (calling), Channels 88 and 12 (working).
TUGS: Not available.
BERTHING: No berths. Ships loaded and discharged by lighters.
BULK CARGO FACILITIES: Lighters can handle all types of cargo.
STEVEDORES: Available.
MEDICAL: Hospitals at Nitti and Mobimbi.
FIRE PRECAUTIONS: Fire tender provided by mining companies on VHF Channels 80/88 (24 hours).
REPAIRS: Minor repairs, which do not require docking, can be handled.
DRY DOCKS: None. Only in Freetown for small ships.
SURVEYORS: Local surveyors working for international survey organisation, e.g. Lloyd's.
TIME: GMT.
HOLIDAYS: Good Friday, Christmas Day, Eid-Ul-Fitri and Eid-Ul-Ahda.
BANKS: Banking facilities available.
GARBAGE DISPOSAL: Not available.
CURRENCY: Leone (Le). U.S.$ 1.00 = Le 1,000.
DEVELOPMENTS: None.
AUTHORITY: Sierra Leone Ports Authority (SLPA), P.M.Bag 386, Cline Town, Freetown, Sierra Leone. *Tel:* 250989/250111. *FAX:* 232-22-250616. *Contact:* Captain Helmut Friedrichs, General Manager.

SINGAPORE (incl. Jurong, Pulau Bukom, Pulau Ayer Chawan, Sembawang and Tanjong Penjuru):

01.16 N. 103.50 E. **(See Plan)**

DOCUMENTS:
4 Ship's Passenger Lists (1 copy for Customs).
4 Crew Lists (1 copy for Customs).
5 Cargo Manifests.
3 copies of Customs Declaration for fresh issue of duty free liquor and tobacco Form (C and E 117) to be furnished by Master to Customs boarding officers.

Master, Mate, or authorised officer required to furnish information asked for by Officer in charge of Customs' Boarding Party for Boarding Officer's Report (this only required if ship is to be searched).

Immigration: 6 copies Crew List and 4 copies each of Disembarking and Through-Passenger Lists on arrival. At departure, 2 copies Crew List and 2 copies Passenger List.

Declaration regarding presence on board of any stowaway, unauthorised person and/or repatriate.

PSA: All vessels: General Declaration on arrival or departure.

Port Health: Entry Declaration, Derat or Exemption Certificate, Yellow Fever Certificates.

Crew Lists. Passenger Lists.

PSA (The Port of Singapore Authority): Arms and Explosives, and Dangerous Goods and Petroleum Declaration.

Shipmaster's Report: August 1987.

In order to obtain vessel's clearance the agent requires – Last Port Clearance, Load Line, Safety Radio, Safety Equipment and Safety Construction Certificates; Articles of Agreement; Safe Manning Certificate; Certificates of Competency (Panamanian and Liberian ships only – not photocopies), a British Certificate will suffice if Liberian/Panamanian Certificate has not arrived; C.L.C.

Shipmaster's Report: November 1988.
2 copies Passenger List.
2 copies Crew List.
2 copies Stores List.
1 copy Stowaways List.
1 copy Arms/Ammunition List.
1 copy Vaccinations List.
1 copy Maritime Declaration of Health.

Vessels arriving to take stores and make crew changes: See "Notices" – Circular No. 121/87.

ANCHORAGES: Also see "Notices".
REVISION OF ANCHORAGES

1. *EASTERN SECTOR*

1.1 *Awaiting Pilot Anchorage* is renamed *Changi General Purposes Anchorage* and is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 20.000'	104° 03.167'
01° 20.000'	104° 03.706'
01° 18.880'	104° 04.820'
01° 18.880'	104° 04.281'
01° 19.550'	104° 03.667'

Purpose: For general purposes on prior permission of the Port Master.

1.2 *Eastern Explosives Anchorage* is withdrawn.

1.3 *Eastern Petroleum 'B' Anchorage* is relocated and is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.500'	103° 59.083'
01° 17.650'	104° 01.200'
01° 16.629'	103° 59.313'
01° 16.629'	103° 59.082'

Purpose: For vessels of less than 10,000 g.r.t. loaded with Petroleum and Non-Gas-Free Vessels.

1.4 *Eastern Special Purposes Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.979'	103° 56.617'
01° 18.300'	103° 57.438'
01° 18.300'	104° 00.450'
01° 17.650'	104° 01.200'
01° 17.500'	103° 59.083'
01° 16.629'	103° 59.082'
01° 16.633'	103° 56.617'

Purpose: For vessels under Arrest, Damaged Vessels, Deep-Draft Vessels requiring repairs and other vessels on prior permission of the Port Master.

1.5 *Laid-up Vessels Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.784'	103° 56.117'
01° 17.979'	103° 56.617'
01° 16.633'	103° 56.617'
01° 16.633'	103° 67.117'

Purpose: For vessels laid-up in port.

1.6 *Small Craft Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.388'	103° 55.106'
01° 17.784'	103° 56.117'
01° 16.633'	103° 56.117'

Purpose: For harbour tugs, pontoons, barges and other small craft.

1.7 *Eastern Petroleum 'A' Anchorage* is bounded by the following co-ordinates:

	Latitude (N)	*Longitude (E)*
(31)	01° 15.433'	103° 53.917'
(32)	01° 16.121'	103° 54.991' (Timor Bn.)
(33)	01° 15.319'	103° 55.851'
(34)	01° 14.687'	103° 54.685'

Purpose: For vessels loaded with Petroleum and Non-Gas-Free Vessels or as directed by Port Master.

Please see "Plan". The numbers in brackets provide positional reference.

Eastern Holding Anchorage is created and will be bounded by a line connecting the following geographical positions:

	Latitude (N)	*Longitude (E)*
(34)	01° 14.687'	103° 54.685'
(33)	01° 15.319'	103° 55.851'
(37)	01° 15.046'	103° 56.143'
(38)	01° 14.687'	103° 55.481'

Purpose: For vessels to temporarily anchor as directed by Port Master.

Please see "Plan". The numbers in brackets provide positional reference.

1.8 *Eastern Quarantine and Immigration Anchorage* is bounded by the following co-ordinates: (Not in use).

Latitude (N)	*Longitude (E)*
01° 14.683'	103° 52.783'
01° 15.125'	103° 53.459'
01° 14.450'	103° 54.167'
01° 14.000'	103° 53.383'

Purpose: For vessels arriving from the East and seeking Quarantine and Immigration Clearance.

1.9 *Man-of War Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.517'	103° 54.553'
01° 16.517'	103° 53.417'
01° 17.004'	103° 53.417'
01° 17.004'	103° 54.015'

Purpose: For visiting warships.

1.10 *Eastern Explosives Lighters Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.004'	103° 53.650'
01° 17.133'	103° 53.650'
01° 17.133'	103° 54.015'
01° 17.004'	103° 54.015'

Purpose: For small craft loaded with explosives. The maximum amount of Hazard Division 1.1 type explosives allowed on board each craft is 8 tonnes Nett Explosives Quantity (NEQ).

1.11 *Eastern Working Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.004'	103° 53.417'
01° 16.517'	103° 53.417'
01° 16.517'	103° 54.553'
01° 16.123'	103° 54.988'
01° 14.683'	103° 52.783'
01° 14.683'	103° 52.283'
01° 15.040'	103° 51.871'
01° 16.017'	103° 51.767'
01° 16.567'	103° 52.533'
01° 16.443'	103° 52.598'
01° 16.623'	103° 52.820'
01° 16.683'	103° 52.733'
01° 17.004'	103° 53.200'

Purpose: For general purposes such as working cargo, receiving stores, water and bunkers or awaiting berth.

2. *WESTERN SECTOR*

2.1 *Western Quarantine and Immigration Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 13.583'	103° 49.696'
01° 13.150'	103° 50.033'
01° 12.800'	103° 49.850'
01° 12.750'	103° 49.133'
01° 13.133'	103° 48.683'

Purpose: For vessels seeking Quarantine and Immigratio Clearance during the North-East Monsoon.

2.2 *Western Petroleum Anchorage* is bounded by the followin co-ordinates:

	Latitude (N)	*Longitude (E)*
(71)	01° 14.813'	103° 46.684'
(72)	01° 15.223'	103° 47.637'
(73)	01° 14.490'	103° 48.470'
(74)	01° 14.028'	103° 47.399'

Purposes: For vessels loaded with Petroleum and Non-Gas-Fre vessels or as directed by Port Master.

Please see "Plan". The numbers in brackets provide positio reference.

2.3 *Western Petroleum 'B' Anchorage* – Withdrawn.

2.4 *Western Working Anchorage* is bounded by the following co-ordinates:

	Latitude (N)	*Longitude (E)*
(74)	01° 14.028'	103° 47.399'
(73)	01° 14.490'	103° 48.470'
(72)	01° 15.223'	103° 47.637'
(78)	01° 15.459'	103° 48.188'
(79)	01° 14.567'	103° 49.202'
(80)	01° 13.583'	103° 49.696' (Selegi Bn.)
(81)	01° 13.132'	103° 48.684'
(82)	01° 12.983'	103° 48.350'

Purpose: For general purposes such as receiving stores, water and bunkers or awaiting berth, or as directed by Port Master.

Please see "Plan". The numbers in brackets provide positional reference.

Triton Petroleum Anchorage is created and will be bounded by a line connecting the following geographical positions:

	Latitude (N)	*Longitude (E)*
(135)	01° 15.622'	103° 39.600'
(136)	01° 16.271'	103° 39.560'
(137)	01° 16.629'	103° 40.273'
(138)	01° 16.245'	103° 40.615'

Purposes: For licensed Port Limit Tankers or as directed by Port Master.

Please see "Plan". The numbers in brackets provide positional reference.

NOTE: Triton Petroleum Anchorage: With the closure of Western Petroleum 'B' Anchorage, Port Limit Tankers are now to use Triton Petroleum Anchorage or Sultan Shoal Petroleum 'B' Anchorage. Mariners proceeding to anchor at Triton Petroleum Anchorage are recommended the use of the following transits to assist their positioning:

(a) Gul Beacon in line with Long Shoal Buoy.
(b) Pioneer Beacon in line with Triton Beacon.
(c) Pesek Buoy 4 in line with Esso Berth 5 Dolphin Light.

Sultan Shoal Petroleum 'B' Anchorage is bounded by a line connecting the following geographical positions:

	Latitude (N)	*Longitude (E)*
(131)	01° 14.335'	103° 39.035'
(132)	01° 14.600'	103° 39.325'
(133)	01° 14.270'	103° 39.955'
(134)	01° 13.733'	103° 39.850'

Purposes: For licensed Port Limit Tankers or as directed by Port Master.

Please see "Plan". The numbers in brackets provide positional reference.

2.5 *Western Reserved Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.170'	103° 47.170'
01° 15.600'	103° 46.700'
01° 15.830'	103° 46.290'
01° 16.400'	103° 46.680'

Purpose: For LASH Ship operations.

2.6 *Western Dangerous Goods Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.250'	103° 45.640'
01° 16.710'	103° 45.050'
01° 17.020'	103° 45.020'
01° 16.550'	103° 45.640'

Purpose: For vessels loading or discharging Explosives or Group 1 Dangerous Goods or vessels in transit with such cargo onboard. The maximum amount of Hazard Division 1.1 type explosives allowed on board each vessel is 50 tonnes Nett Explosives Quantity (NEQ).

2.7 *Pasir Panjang Coastal Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.400'	103° 46.680'
01° 15.830'	103° 46.290'
01° 16.120'	103° 45.820'
01° 16.250'	103° 45.640'
01° 16.550'	103° 45.640'
01° 17.020'	103° 45.020'
01° 17.300'	103° 45.000'
01° 17.300'	103° 45.280'
01° 17.060'	103° 45.280'

Purpose: For vessels working cargo overside by means of lighters.

2.8 *Pasir Panjang Lighter Mooring* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.133'	103° 45.383'
01° 17.283'	103° 45.450'
01° 17.267'	103° 45.583'
01° 17.350'	103° 45.817'
01° 17.350'	103° 46.167'
01° 17.150'	103° 46.533'
01° 17.017'	103° 46.700'
01° 16.717'	103° 46.500'
01° 17.050'	103° 45.933'

Purpose: For the mooring of licensed wooden lighters.

2.9 *Selat Pauh Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 13.183'	103° 45.617'
01° 12.817'	103° 44.650'
01° 12.817'	103° 43.666'
01° 13.050'	103° 43.033'
01° 13.583'	103° 42.783'
01° 13.783'	103° 43.150'
01° 13.483'	103° 43.850'
01° 13.317'	103° 45.017'
01° 13.417'	103° 45.567'

Purpose: For vessels under Arrest, Laid-up or other vessels on prior permission of the Port Master.

3. *JURONG SECTOR*

3.1 *Sultan Shoal Quarantine* and *Immigration Anchorage* is withdrawn.

3.2 *West Jurong Petroleum Anchorage* is renamed *Sultan Shoal Petroleum Anchorage* and relocated to an area bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 13.919'	103° 37.257'
01° 14.511'	103° 38.811'
01° 13.733'	103° 39.850'
01° 13.350'	103° 39.058'

Purpose: For vessels loaded with Petroleum and for Non-Gas-Free vessels.

3.3 *LNG/LPG/Liquefied Chemical Gas Carriers Anchorage* is relocated and is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 14.900'	103° 36.500'
01° 14.900'	103° 36.800'
01° 14.205'	103° 36.775'
01° 14.367'	103° 36.500'

Purpose: For Non-Gas-Free Liquefied Petroleum Gas Carriers, Liquefied Natural Gas Carriers and Liquefied Chemical Gas Carriers.

3.4 *Tuas Explosives Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.295'	103° 36.500'
01° 16.295'	103° 37.525'
01° 15.643'	103° 37.525'
01° 15.643'	103° 36.500'

Purpose: For vessels loading or discharging Explosives and Group 1 Dangerous Goods or vessels in transit with such cargo on board. The maximum amount of the Hazard Division 1.1 type explosives allowed on board each vessel is 500 tonnes Nett Explosives Quantity (NEQ).

3.5 *Tuas Explosives Lighters Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.000'	103° 36.500'
01° 17.000'	103° 36.716'
01° 16.295'	103° 36.716'
01° 16.295'	103° 36.500'

Purpose: For small craft loaded with explosives. The maximum amount of the Hazard Division 1.1 type explosives allowed onboard each craft is 60 tonnes Nett Explosives Quantity (NEQ).

3.6 *West Jurong Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.000'	103° 36.716'
01° 17.000'	103° 38.800'
01° 14.900'	103° 38.800'
01° 14.900'	103° 36.500'
01° 15.643'	103° 36.500'
01° 15.643'	103° 36.525'
01° 16.295'	103° 37.525'
01° 16.295'	103° 36.716'

Purpose: For vessels awaiting berth, working cargo, vessels under repairs, or for the mooring of oil rigs.

Shipmaster's Report: September 1995.

Singapore Strait – Western Grounds: Ship-to-ship transfer area:

Charts: B.A. 3833, 2598.

Location: West of P.Nippa Reef in 20 m. to 29 m. is safe anchorage (Lat. 01° 09' N., Long. 103° 35' E. to Lat. 01° 10' N., Long. 103° 35' E. to Lat. 01° 10' N., Long. 103° 38' E. to Lat. 01° 09' N., Long. 103° 38' E. to point of origin). South of this location is not advisable as it is in Indonesian waters.

Services: All services from Singapore (Fenders, hoses, tugs, launches, stores, fresh water, bunkers, personnel changes). Contact local Agents.

PILOTAGE: Port Marine Circular No. 18 of 1996 (dated 27th July 1996).

GENERAL

1. The Maritime and Port Authority of Singapore (MPA) Act 1996 provides that every vessel while navigating in any pilotage district or part thereof shall be under pilotage, and the Owner, Agent or Master of the vessel shall comply with that requirement.

2. The MPA however may, if it appears to the Authority to be necessary, exempt any vessel or class of vessels while navigating in any pilotage district from being under pilotage subject to such conditions as it may think fit to impose.

3. The MPA may, if it considers it expedient, authorise any person to pilot vessels in a pilotage district, subject to such conditions as it thinks fit.

4. This directive sets out the vessels or class of vessels which are to be under compulsory pilotage and those which are exempted or in respect of which exemptions may be sought. This directive will come into force with effect on 1st August 1996.

5. This directive shall not apply to or in relation to vessels belonging to or operated by the Maritime and Port Authority of Singapore, Singapore Police Coast Guard and the Singapore Armed Forces.

DEFINITIONS

6. *Pilotage District:* The Pilotage District is described in the Port of Singapore Authority (Pilotage District) Notification. For the purpose of this circular, the Pilotage District is divided into four areas, "A", "B", "C" and "D". These areas are defined in Annex I and depicted in Annex II (See "Plan").

7. *Height:* The height of vessel referred to in this circular shall be the height of the vessel measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structures or equipment on board.

COMPULSORY PILOTAGE

8. Compulsory pilotage applies to all liquefied gas carriers and chemical carriers. For purpose of compulsory pilotage, a chemical carrier means any vessel which is or was carrying in bulk as a whole or part of the last cargo any of the hazardous liquid cargo listed in Chapter 17 of International Maritime Organization International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals. In the case of a vessel having previously carried as a whole or part of its last cargo any of the said hazardous liquid cargo in bulk, it shall continue to be considered a chemical carrier so long as any of its cargo tanks or cargo system is not completely cleared and removed of residual cargo.

9. In addition to liquefied gas carriers and chemical carriers, other vessels to which compulsory pilotage applies, when moving within a particular area of the pilotage district, are as indicted in Table I.

Table I

Area of Movement	*Vessels to which compulsory pilotage applies*
"A"	Every vessel of 300 g.r.t. and above.
"B"	Every vessel of 5,000 g.r.t. and above.
"C"	Every vessel of 300 g.r.t. and above or overall length exceeding 45 m.
"D"	Every vessel of 300 g.r.t. and above or of a height exceeding 30 m.

PILOTAGE EXEMPTION

10. Vessels in respect to which pilotage exemption may be sought from the Authority for movement within a particular area of the Pilotage District are as indicated in the Table II below:

Table II

Area of Movement — *Vessels in respect to which pilotage exemption may be sought*

"A" A vessel of:

(a) *Less than 300 g.t.:* A blanket exemption is granted unless otherwise specified by the Port Master.

(b) *300 g.r.t. and above but less than 2,000 g.t.:* Exemption may be granted provided that the vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek the exemption, the vessel must call the appropriate control station by VHF radio-telephone on the designated Channel (See "Notices" – Notice No. 15 of 1996).

(c) *2,000 g.t. or above but less than 5,000 g.t.:* Exemption may be granted subject to the following conditions:

(i) The vessel must be fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s) (See "Notices" – Notice No. 15 of 1996).

(ii) In the case of a sea-going vessel, the Master must have brought the vessel into and out of Area "A" on at least 6 occasions within the 12 months immediately preceding the date of the application for the exemption. In the case of an application for the renewal of an exemption, the Master must have brought the vessel into and out of Area "A" on at least 2 occasions in the 6 months immediately preceding the date of the application for the renewal of the exemption.

In all applications for exemption, the Master of the vessel must satisfy the Port Master of his knowledge of local waters, regulations, communication procedures, and such other requirements as the Port Master may impose.

"B" A vessel of:

(a) *Less than 300 g.t.:* A blanket exemption is granted unless otherwise specified by the Port Master.

(b) *300 g.t. and above but less than 5,000 g.t.:* A blanket exemption is granted provided that the vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). The vessel must call the appropriate control station by VHF radio-telephone on the designated channel (See "Notices" – Notice No. 15 of 1996).

(c) *5,000 g.t. or above but less than 10,000 g.t.:* Exemption may be granted subject to the following conditions:

(i) The vessel must be fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s) (See "Notices" – Notice No. 15 of 1996).

(ii) In the case of a sea-going vessel, the Master must have brought the vessel into and out of Area "B" on at least 6 occasions within the 12 months immediately preceding the date of the application for the exemption. In the case of an application for the renewal of an exemption, the Master must have brought the vessel into and out of Area "B" on at least 2 occasions in the 6 months immediately preceding the date of the application for the renewal of the exemption.

In all applications for exemption, the Master of the vessel must satisfy the Port Master of his knowledge of local waters, regulations, communication procedures, and such other requirements as the Port Master may impose.

"C" Generally no exemption from compulsory pilotage. However, see paragraph 11.

"D" A vessel of:

(a) *Less than 300 g.t.:* Blanket exemption is granted provided the vessel does not enter, leave or transit the Traffic Information Area promulgated in Port Circular No. 6 of 1996 (See "Notices").

(b) *300 g.t. or above but less than 2,000 g.t. and of a height of 30 m. or less:* Exemption may be granted provided that the vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek the exemption for the intended movement, the vessel must call the appropriate control station by VHF radio-telephone on the designated Channel (See "Notices" – Notice No. 15 of 1996).

11. Vessels engaged in Marine Projects (e.g. Dredging, Reclamation and Port Development projects) in respect to which pilotage exemption may be sought for movement within a particular area of the Pilotage District are as indicated in the Table III below:-

Table III

Area of Movement — *Vessels Engaged in Marine Projects (e.g. Dredging, Reclamation and Port Developments) in respect of which Pilotage Exemption may be sought.*

"A" or "B"

A vessel of 5,000 g.t. or above but less than 10,000 g.t.:

(a) The vessel must be engaged in marine projects which require her to move frequently within this area of the pilotage district. (Marine projects include dredging, reclamation, laying of cable, etc.).

(b) The vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF channel(s). (See "Notices" – Notice No. 15 of 1996).

(c) The Master shall have brought the vessel into and out from the area concerned under pilotage for at least a total of 6 occasions within the 12 months immediately preceding the date of the application for exemption.

(d) In the case of a sea-going vessel, the Master shall have brought the vessel into and out of the area concerned on at least a total of 6 occasions under pilotage within the 12 months immediately preceding the date of application for exemption. In the case of an application for the renewal of an exemption, the Master must have brought the vessel into and out of the area concerned on at least 4 occasions in the 3 months immediately preceding the date of the application for the renewal of the exemption.

(e) The Master of the vessel must follow the route laid down under the conditions for exemption.

(f) In all cases applications for exemptions, the Master must satisfy the Port Master of his knowledge of local waters, regulations, communication procedures, and such other requirements as the Port Master may impose.

Area of Movement — *Vessels Engaged in Marine Projects (e.g. Dredging, Reclamation and Port Developments) in respect of which Pilotage Exemption may be sought.*

"C"

A vessel of 300 g.t. or above or of overall length exceeding 45 metres:

(a) The vessel must be engaged in marine projects which require her to move frequently within this area of the pilotage district.

(b) For navigating the Main Channel under the Benjamin Sheares Bridge at the entrance to Kallang Basin, the displacement of the vessel must not exceed 2,500 tonnes and for navigating the Middle Channel under the Benjamin Sheares Bridge at the entrance to Marina Bay the displacement of the vessel must not exceed 2,000 tonnes.

(c) In the case of a tow proceeding through the entrance to Kallang Basin, the total displacement of the tug and tow must not exceed 2,500 tonnes and in the case of a tow proceeding through the entrance to Marina Bay the total displacement of the tug and tow must not exceed 2,000 tonnes.

(d) The vessel or the tug, in the case of a tow, must be fitted with a VHF radio-telephone which is in good condition and capable of communicating at all times on the required VHF channel(s). (See "Notices" – Notice No. 15 of 1996).

(e) In the case of a vessel proceeding to or from Kallang Basin, the conditions stipulated under Port Circular No. 76 of 1987 are to be complied with and in the case of a vessel proceeding to or from Marina Bay the conditions stipulated under Port Circular No. 75 of 1987 are to be complied with.

(f) The Master must have brought the vessel under pilotage into and out of this area on at least 12 occasions within the 12 months immediately preceding the date of application for the exemption.

(g) In the case of a sea-going vessel, the Master must have brought the vessel under pilotage into and out of the area on at least 24 occasions within the 12 months immediately preceding the date of application for exemption.

For subsequent exemptions, the Master shall have entered and left the area on at least 4 occasions within the 3 months immediately preceding the date of application for the renewal of the exemption.

(h) The Master of the vessel shall follow the route laid down under the conditions for exemption.

(i) In all cases, applications for exemption, the Master must satisfy the Port Master of his knowledge of local waters, regulations, communications procedures, and such other requirements as the Port Master may require.

"D" *A vessel of 300 g.t. or above but not less than 10,000 g.t. requiring to enter, leave or transit the Traffic Information Area:*

(a) The vessel must be engaged in marine projects which require her to move frequently within this area of the pilotage district.

(b) The vessel must be fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF channel(s). (See "Notices" – Notice No. 15 of 1996).

(c) The Master shall be conversant with the reporting procedure required under Port Circular No. 6 of 1996 (See "Notices").

(d) The Master shall have brought the vessel into and out of the area under pilotage, for at least 12 occasions within the 12 months immediately preceding the date of the application for the exemption.

(e) In the case of a sea-going vessel, the Master must have brought the vessel into and out of the area on at least a total of 24 occasions under pilotage, within the 12 months immediately preceding the date of application for exemption. For subsequent renewals of the exemptions, the Master shall have entered and left the area on at least a total of 4 occasions within the 3 months immediately preceding the date of the application for the renewal of the exemption.

(f) The Master of the vessel shall follow the route laid down under the conditions for exemption.

(g) In all applications for exemption, the Master must satisfy the Port Master of his knowledge of local waters, regulations, and such other requirements as the Port Master may require.

12. Notwithstanding any exemption granted, for berthing and unberthing operations, the express permission of the Owners/Operators of the berth is also required.

13. All vessels, whether exempted from pilotage or otherwise must follow the reporting procedures laid down in Port Marine Circular No. 2 of 1996.

14. All exempted vessels, when underway within the pilotage areas must display by day the International Code Flag "N".

15. All Masters of vessels are advised not to hamper large or deep draft vessels in the restricted channels of the Port.

16. Application forms for the pilotage exemption for vessels may be obtained from Port Master's Department, 19th storey, Tanjong Pagar Complex, Singapore 089053.

TOWAGE WITH PILOTAGE EXEMPTION:

17. Masters of tug(s) of less than 2,000 g.t. may seek pilotage exemption to tow vessels, subject to the following conditions:

(a) For movement within Area "A" and Area "B", the aggregate g.t. of the tow(s) must be less than 5,000.

(b) For movement within Area "D", the aggregate g.t. of the tow(s) must be less than 2,000. The height of the tug(s) and tow(s) must be 30 m. or less. Where the tug(s) and tow(s) are required to enter, leave or transit the Traffic Information Area promulgated in Port Marine Circular No. 6 of 1996 and either the height of the tug(s) or tow(s) is more than 30 m., compulsory pilotage shall apply.

(c) Provided that for tow(s) with aggregate g.t. exceeding 1,000 g.t., the total horsepower of the tug(s) must not be less than 450 kW (600 bhp).

PILOT BOARDING AND DISEMBARKATION GROUNDS

18. The 5 Pilot Boarding Grounds for vessels coming into port are:

(a) Eastern Boarding Ground "A" (PEBGA) – in position Lat. 01° 13.52' N., Long. 103° 53.55' E.

(b) Eastern Boarding Ground "B" (PEBGB) – in position Lat. 01° 15.50' N., Long. 103° 57.50' E. This boarding ground is to be used by all tankers requiring pilots when arriving from the East and proceeding to the appropriate anchorage in the Eastern sector of the port. Other vessels may also use this boarding ground to pick up pilots provided special arrangement has been made with the pilotage service. Anchoring is strictly prohibited at this boarding ground as it is within the submarine cable area.

(c) Southern Boarding Ground (PSBG) – South of Sebarok Beacon within port limits (To be used only through prior arrangement with the pilotage service).

(d) Western Boarding Ground (PWBG) – in position Lat. 01° 13.73' N., Long. 103° 36.50' E.

(e) East Johor Strait Boarding Ground (PJSB) – S.E. of Johor Shoal Buoy in position Lat. 01° 18.00' N., Long. 104° 05.50' E.

19. The 10 Pilot Disembarkation Grounds (DG) are in positions as follows:

No. 1: Lat. 01° 18.47' N., Long. 104° 05.72' E.
No. 2: Lat. 01° 16.95' N., Long. 103° 59.77' E.
No. 3: Lat. 01° 15.50' N., Long. 103° 56.90' E.
No. 4: Lat. 01° 14.25' N., Long. 103° 54.78' E.
No. 5: Lat. 01° 13.48' N., Long. 103° 53.30' E.
No. 6: Lat. 01° 15.50' N., Long. 103° 51.87' E.
No. 7: Lat. 01° 11.75' N., Long. 103° 49.45' E.
No. 8: Lat. 01° 10.68' N., Long. 103° 46.98' E.
No. 9: Lat. 01° 12.80' N., Long. 103° 39.28' E.
No. 10: Lat. 01° 13.97' N., Long. 103° 37.37' E.

See "Plans" for the locations of Pilot Boarding Grounds and Disembarkation Grounds.

PILOTAGE ORDERS

20. Request for pilotage service should be placed directly with the pilotage service provider.

21. Vessels at anchor and requiring Pilots at night shall exhibit 3 all-round lights in a vertical line. The highest and middle lights shall be white and the lowest light shall be red. By day, the vessels should fly the flag 'G' of the International Code of Signals 1969.

22. All vessels above 300 g.t. must report their final anchored position in the port in terms of bearing and distance from the reference points listed in Port Marine Circular No. 2 of 1996.

TRAFFIC INFORMATION SYSTEM

23. Masters of vessels intending to enter, transit or leave the East Johor Strait are to refer to the Port Circular No. 6 of 1996 (See "Notices") on Traffic Information System for Ships Transiting The Serangoon Harbour and where applicable, comply with the directives given therein.

ACCESS TO VESSELS

24. Mariners are reminded that Pilots and other Government Officers may, on grounds of personal safety, refuse service unless a safe and satisfactory means of access to the vessel is provided. The safety requirements in respect of pilot ladders, shall be in accordance with Regulation 17 of Chapter V of the Merchant Shipping (Safety Convention) Regulations (Cap 179, Rg 11).

25. In the case of accommodation ladders and shore gangways, the following should be complied with:

(a) *Accommodation Ladders*

(1) The embarkation and disembarkation of Pilots and Government Officers are to be supervised by a responsible Officer of the ship.

(2) The accommodation ladder is to be in good condition, secured and properly illuminated at night. The landing platform is to be properly adjusted to provide safe access.

(3) A manrope is to be attached to the lower bridle in order to provide a good handhold for boarding, and a lifebuoy with self-igniting light must be available close to the upper platform.

(4) Discharges in the way of the accommodation ladder must be properly covered or stopped while the ladder is in use.

(b) *Vessel and Shore Gangways*

(1) Where a vessel's gangway or a shore gangway is used when the vessel is berthed alongside a wharf, the gangway is to be landed squarely onto the vessel and wharf. No person other than those engaged in the rigging of the gangway should be permitted to embark or disembark before it is properly secured.

(2) Where the gangway is landed onto the ship's bulwark, steps and adequate handholds are to be provided for safe and convenient access.

(3) The gangway shall be adequately illuminated at night and tended by a watchman.

(4) When a shore gangway is used, Masters are not to permit it being landed onboard before crew members of the vessel are available to receive it.

26. This Port Marine Circular supersedes Port Marine Circulars No. 107 of 1987, No. 7 of 1991 and No. 9 of 1994.

27. All Port Marine Circulars referred to in this Circular are available from the Port Master's Department.

28. Any queries concerning this Circular may be directed to the Port Master's Department on Tel: 3252461, 3252460, or Fax: 3252454.

for Director General
Maritime and Port Authority of Singapore.

Annex I:

PILOTAGE DISTRICT AREAS

1. Area "A" – is defined as that part of the Pilotage District Westwards of the line joining the following positions including the area up to the causeway in the Johor Strait:

(a) Lat. 01° 16.27' N., Long. 103° 51.43' E.
(b) Lat. 01° 15.03' N., Long. 103° 51.87' E.
(c) Lat. 01° 14.68' N., Long. 103° 52.28' E.
(d) Lat. 01° 14.68' N., Long. 103° 52.77' E.
(e) Lat. 01° 13.35' N., Long. 103° 51.87' E.
(f) Lat. 01° 12.73' N., Long. 103° 52.12' E.

2. Area "B" – is defined as that part of the Pilotage District excluding Area "C" Marina Bay and Kallang Basin, Eastward of the line joining the positions referred to in paragraph 1 above up to the line joining the following positions:

(a) Lat. 01° 20.55' N., Long. 103° 59.80' E.
(b) Lat. 01° 20.00' N., Long. 104° 02.80' E.

3. Area "C" – is defined as follows:

From a position	Lat. 01° 17.890' N.	Long. 103° 51.980' E.
by a straight line to a position in	Lat. 01° 17.770' N.	Long. 103° 51.970' E.
thence by a straight line to a position in	Lat. 01° 17.658' N.	Long. 103° 51.974' E.
thence by a straight line to a position in	Lat. 01° 17.303' N.	Long. 103° 52.034' E.
thence by a straight line to a position in	Lat. 01° 17.309' N.	Long. 103° 51.733' E.
thence by a straight line to a position in	Lat. 01° 17.186' N.	Long. 103° 51.733' E.
thence by a straight line to a position in	Lat. 01° 17.184' N.	Long. 103° 51.805' E.
thence by a straight line to a position in	Lat. 01° 17.063' N.	Long. 103° 52.110' E.
thence by a straight line to a position in	Lat. 01° 16.927' N.	Long. 103° 52.305' E.
thence by a straight line to a position in	Lat. 01° 16.720' N.	Long. 103° 52.467' E.
thence by a straight line to a position in	Lat. 01° 16.567' N.	Long. 103° 52.533' E.
thence by a straight line to a position in	Lat. 01° 16.683' N.	Long. 103° 52.733' E.
thence by a straight line to a position in	Lat. 01° 16.811' N.	Long. 103° 52.680' E.
thence by a straight line to a position in	Lat. 01° 16.941' N.	Long. 103° 52.508' E.
thence by a straight line to a position in	Lat. 01° 17.333' N.	Long. 103° 52.150' E.
thence by a straight line to a position in	Lat. 01° 17.630' N.	Long. 103° 52.050' E.
thence by a straight line to a position in	Lat. 01° 17.760' N.	Long. 103° 52.030' E.
thence by a straight line to a position in	Lat. 01° 17.850' N.	Long. 103° 52.040' E.

thence by a straight line to the point of origin.

4. Area "D" – is defined as that part of the Pilotage District Northwards of the line joining the following positions up to the causeway in the Johor Strait.

(a) Lat. 01° 20.55' N., Long. 103° 59.80' E.
(b) Lat. 01° 20.00' N., Long. 104° 02.80' E.
(c) Lat. 01° 20.00' N., Long. 104° 03.17' E.
(d) Lat. 01° 19.55' N., Long. 104° 03.67' E.
(e) Lat. 01° 18.75' N., Long. 104° 04.40' E.
(f) Lat. 01° 18.30' N., Long. 104° 05.63' E.
(g) Lat. 01° 19.30' N., Long. 104° 05.78' E.

Annex II: See "Plan".

RESTRICTIONS:
Navigational Channels:

Name	*Controlling Depth*

Pasir Panjang Fairway	11.5 m.
Sultan Fairway	13.6 m.

Also see "Bridges".

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Also see "Notice".

INWARD HEALTH CLEARANCE FOR VESSELS ARRIVING SINGAPORE:

1. All vessels arriving Singapore are required to have a valid Derat Certificate/Derat Exemption Certificate.
2. Only the following vessels need to notify Port Health Office (4-12 hours in advance) for Inward Health Clearance prior to arrival:
   (a) Vessels have been in plague infected area within 60 days prior to arrival in Singapore.
   (b) Vessels with illness on board.
   (c) Vessels with death on board.
   (d) Vessels with dead rodents on board.
   (e) Vessels with refugees on board.
3. Outward Health Clearance is not required for any vessel.
4. For detailed information, please call the Port Health Office at:
   7 Keppel Road, 02-14 Tanjong Pagar Complex, Singapore 0208.
   Tel: 2226924, 2222585.

IMMIGRATION CLEARANCE: Also see "Notices".
Port of Singapore Authority – Port Circular No. 70/87, dated 15th September 1987.
IMMIGRATION CLEARANCE:

The Immigration Department has informed us that the contents in Port Circulars Nos. 87 of 1984 and 21 of 1987 regarding Immigration Clearance have been revised. We reproduce below the contents of the revised circulars. Port Circulars Nos. 87 of 1984 and 21 of 1987 are hereby superseded.

INWARD CLEARANCE **Appendix 'A'**
Physical Clearance: Owners/Agents requesting Immigration clearance for vessels are required to contact the appropriate offices and to follow the procedures as outlined below:

Location for Clearance	*Office covering the Location*	*Telephone No./ VHF Channel*
Eastern/Western Quarantine and Immigration Anchorages, PSA Wharves, Western Sector Anchorages	The Seaman's Section World Trade Centre	2730527/VHF Channel 14 } 24 hours
Jurong Fishing Port	Immigration Office at the Jurong Fishing Port	2652818
Sembawang Port	Immigration Woodlands Checkpoint	2692531

The Owners/Agents contacting the Immigration Office regarding the ETAs of their vessels are required to give the following information. Such ETAs should be given at least 12 hours before the arrival of their vessels. The office for this purpose provides a 24-hour service.

(i) Name of Vessel;
(ii) Location for clearance of the Vessel;
(iii) Expected time of arrival (ETA);
(iv) Last/Next Port of Call;
(v) Agent of Vessel;
(vi) Owner of Vessel;
(vii) Number of Passengers, if any, on board;
(viii) Stowaway/Unauthorised persons/survivors, if any, on board.

Any vessel arriving in Singapore, excluding those vessels which have been granted Advance Immigration Clearance, must proceed to the prescribed Immigration and Quarantine Anchorage for Immigration Inward Clearance.

Such a vessel on arrival must exhibit the necessary signal for easy identification and speedy clearance. The Immigration signal is:

(a) by day, the flags in the International Code of Signals corresponding to:
   (i) the numerals "25" in respect of vessels not carrying passengers; or
   (ii) the numerals "34" in respect of vessels carrying passengers.
(b) by night, in every case, 2 green lights mounted vertically, 6 ft. apart, visible all-round the horizon for a distance of at least 2 miles.

Owners/Agents and Masters must ensure that their vessels have proper and secure gangways which are ready on arrival so that Immigration Officers can board their vessels immediately. The use of rope-ladders is discouraged. Co-operation in this regard will enable Immigration Officers to grant fast clearance.

Procedure on Board:

The Master is required to submit 6 copies of the Crew List and if there are passengers, 4 sets of the Passenger List to the Clearing Officer who boards the vessel. The Master has to certify on the original Crew List that the details in the lists submitted are correct and that there are no stowaways or unauthorised persons on board.

If requested by the Clearing Officer, Seaman's Books/travel documents will have to be produced. Crew members may be required to present themselves before the Officer.

All passengers shall present themselves before the Clearing Officer. Disembarking passengers shall complete the Disembarkation Forms (IMM 23A). Agents may obtain the forms from the Immigration Field Division Headquarters.

The Master shall execute the Seaman's Security Bond, bonding crew members (except the Master) for $1,000/– each. If there are persons who are refused entry by the Clearing Officer, the Master shall execute the Security Bond, bonding such persons who are refused entry, for not less than $2,000/– each.

Summary action will be served on the Master giving him the names of all those who have been refused entry, and/or the breakdown figures of the transit passengers and disembarking passengers.

When clearance has been granted, the Master shall haul down the Immigration signal upon the Immigration Officer leaving the vessel.

OUTWARD CLEARANCE **Appendix 'B'**
Physical Checkout: Agents requiring physical checkout of vessels should contact the following offices:

Location of Vessel	*Office of Contact*	*Telephone No./ VHF Channel*
Eastern/Western Quarantine and Immigration Anchorages PSA Wharves, Western Sector Anchorages	The Seaman's Section World Trade Centre	2730527/VHF Channel 14 } 24 hours
Jurong Fishing Port	Immigration Office at the Jurong Fishing Port	2652818
Sembawang Port	Immigration Woodlands Checkpoint	2692531

Procedure:
Vessels requesting Immigration Outward Clearance must either fly the "Blue Peter" in addition to the "25" or "34" signals during the day. By night to display 2 green lights in every case mounted vertically 6 ft. apar visible all-round the horizon for a distance of at least 2 miles. This is t assist the Officers in locating the vessel.

The Master is required to submit 2 sets of Crew Lists and if applicabl 3 sets of Passenger Lists to the Checking-Out Officer. The Master shoul certify on the Crew Lists that all crew are on board. Passengers if an and persons who have been refused entry will have to be presented t the Checking-Out Officer.

INWARD CLEARANCE **Appendix 'C**
Advance Immigration Clearance:
Procedure in Respect of Vessels which are Eligible for AIC.

(i) The Advance Immigration Clearance (AIC) facility is extended t merchant vessels over 75 n.r.t. and which are carrying not mor than 12 passengers, but excluding fishing vessels.
(ii) Applications to be submitted at least 6 hours before arrival o vessel.
(iii) The Owner/Agent of the vessel shall obtain from the Master b radio or post the requisite information as outlined below.
(iv) The Owner/Agent shall submit 5 Crew Lists, Transit Passeng Lists (if any), Disembarking Passenger Lists (if any), i quadruplicate to the Immigration Checkpoint, Finger Pier Buildin South Quay. All lists must be inserted with the necessary detai and must be duly signed by the authorised representatives of th Owner/Agent of the vessel.
(v) If AIC is granted, one copy of each of the Crew List, Trans Passenger List, and Disembarking Passenger List bearing th appropriate Immigration endorsements can be collected by th Owner/Agent on execution of the relevant documents such a Seaman's or other Security Bonds. If any person is not permitt to land, the Owner/Agent will be required to inform the Master o the vessel accordingly and upon the ship's arrival must ensu that such person in fact does not disembark from the vessel.

(vi) After the arrival of the vessel, it shall be the responsibility of the Owner/Agent to submit immediately the Master's copy of the Crew List and/or Passenger List to the Immigration Finger Pier Checkpoint, bearing the signature of the Master of the vessel certifying that the details previously submitted through the Owner/Agent are correct. Whenever required, travel documents and Seaman's Books of the crew and/or passengers must be handed over to the Immigration Finger Pier Checkpoint, for checking within 4 hours of the vessel's arrival. Passengers will not land until their passports have been endorsed with the appropriate passes.

(vii) If the vessel is arriving from an infected port, provisional Radio Pratique should first be obtained from Port Health Authorities before AIC can be considered.

INWARD CLEARANCE **Appendix 'D'**

Advance Immigration Clearance for supply vessels plying between Singapore and oil rigs:

1. *Description of Vessels:* Supply vessels based at Singapore which ply between Singapore and oil rigs situated in waters near the neighbouring countries.

2. (a) *A supply vessel arriving without change of crew:* The Owner/Local Agent of a supply vessel, after receiving from the oil rig Superintendent by radio, must submit 2 copies of the vessel's Crew List to the Immigration Officer at the Immigration Finger Pier Checkpoint at least 2 hours before the vessel arrives at the Port Limits. The Crew List should bear a written certification by the Owner/Local Agent that the vessel will be arriving at Singapore without any change of crew since its last departure from Singapore.

After submission of these certified Crew Lists, the Owner's/Local Agent's representatives will be required to execute the usual documents such as Seaman Security Bond.

(b) *A supply vessel arriving with a change of crew:* If the Owner/Local Agent is able to communicate with an arriving supply vessel, and if there has been a change of crew, the Owner/Local Agent must submit 5 copies of the Arrival Crew List to the Immigration Officer at Immigration Finger Pier Checkpoint, at least 12 hours before the vessel's arrival at the Port Limits. If Advance Immigration Clearance is given, the Owner's/Local Agent's representatives will execute the usual bonds and inform the vessel accordingly.

(c) *A supply vessel arriving with passengers:* No Advance Immigration Clearance is available.

(d) *A supply vessel arriving in Singapore from oil rigs located on the high seas or South China Sea:* No Advance Immigration Clearance will be granted.

(e) Any Advance Immigration Clearance for a vessel requiring Health Clearance will be subject to the condition that Health Pratique is provided by Port Health Authorities.

Shipmaster's Report: August 1987.

A Crew List is to be sent to the Agent in advance of the vessel's arrival and is to include – name, rank, nationality, Seaman's Book number and date and place engaged.

RADIO:

Radiotelegram Services to Ships (Radiotelephony):

Singapore Radio Working Schedules for MF/HF Radiotelephony:

1. The following schedules of watch-keeping will be operated by the Singapore Coast Station:

Singapore Radio	*Transmit Frequency (kHz)*	*Hours of Watch (UTC)*	*Ship Transmit Frequency (kHz)*	*Remarks*
9VG4	2182	Continuous	2182	Call, Reply and Safety

9VG 5 9VG60	2760 4369.8	1345	Navigational Warnings and Weather Bulletin.

2. The broadcast will normally be made on the two listed frequencies simultaneously except during transmitter maintenance periods when the broadcast will be made on the two frequencies consecutively.

Traffic Lists:

1. Singapore Radio will transmit Traffic Lists on the following two listed frequencies simultaneously except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively:

Singapore Radio	*Frequency (kHz)*	*Times (UTC)*
9VG 5 9VG63	2760 8728.2	0005, 0405, 0805 and 1205
9VG 5 9VG60	2760 4369.8	1605

Medical Advice to Ships:

1. A radio Medical Advice service is available to ships of all nationalities and no charge is made for this service.

2. Radiotelegrams requesting medical advice should state briefly and clearly the symptoms of the illness of the person affected and contain a brief description of the contents of the medical chest carried by the ship. Such telegrams should be in English Language, be signed by the Master of the ship and addressed "Radiomedical Singapore".

3. In very urgent cases, the urgency signal (PAN) may be used in order to ensure priority over all other communications, with the exception of those relating to distress calls.

MF and HF Telephone Service:

1. General. The MF and HF radiotelephone service is available continuously to ships at sea, subject to radio propagation conditions, and provided that the ships are suitably equipped.

Ships wishing to contact Singapore Radio may do so on any of the calling carrier frequencies listed under "Radio Working Schedules" above.

After establishing contact, the call will be booked. Both the coast and ship station will then change over to any one of the following frequencies as agreed upon by both stations (depending on the position of the vessel and the time of day) prior to connecting the telephone subscriber.

Singapore Radio	*Transmit Frequency (kHz)*		*Remarks*
	Coast	*Ship*	
9VG52	2780	2685	Connection to the telephone system on demand
9VG61	4376	4081.6	
9VG62	6509.5	6203.1	
9VG64	8762.3	8238.4	
9VG65	8790.2	8266.3	
9VG66	13147.3	12376.5	
9VG68	17270.1	16497.2	
9VG69	17356.9	16584	
9VG70	22630.1	22034.1	

Maritime Radiotelex service available.

Enquiries regarding the Maritime Mobile Services may be made to the Supervisor at either Singapore Radio or the International Telephone Exchange as appropriate, or in writing to Telecoms, Comcentre, Exeter Road, Singapore 0923.

VHF: VHF Radio Telephony transmitting and receiving Channels used within the Port of Singapore. All the stations offer a 24-hour service.

Station	*Frequency (MHz)*	*Channel*	*Functions*
Singapore Port Operations	156.60	12	VHF Channels for reporting ETAs, departures and location of ships within the Port.
Singapore Port Operations	157.00 161.60	20	Pilotage Service and information.

Notice: *Port Marine Circular No. 6 of 1990:*

(A) NOTIFICATION OF ARRIVAL AND VHF REPORTING PROCEDURE FOR ARRIVAL AND DEPARTURE VESSELS.

(B) VESSEL TRAFFIC INFORMATION SERVICE.

1. This Port Marine Circular (No. 6 of 1990) comes into effect on 1st October 1990 and supersedes Port Circular No. 88 of 1987 and Port Marine Circular No. 5 of 1990.

2. The directives and requirements stipulated in Part A of this Circular regarding the notification of a vessel's arrival and a vessel's VHF confirmation of Arrival Report are made pursuant to Regulation 3 of the Singapore Port Regulations 1977.

3. This Circular is in 2 parts. Part A revises the arrival and departure vessel VHF reporting requirements to include operation of the Vessel Traffic Information Service (VTIS). Part B introduces the VTIS operation to the shipping community. Designated control centres, use of VHF frequencies and position reference points are contained in the Appendices to this Circular.

4. For the purpose of this Circular. Notification of arrival is the advance notice given to the Port Master of a vessel's intention to enter the Port of Singapore. Confirmation of arrival is the VHF report given to the Port Master confirming a vessel's intention to enter the Port when it is within VHF radiotelephone range.

PART A NOTIFICATION OF ARRIVAL AND VHF REPORTING PROCEDURE FOR ARRIVAL AND DEPARTURE VESSELS

5. *NOTIFICATION OF ARRIVAL*

5.1 APPLICATION

The Owner, Agent and Master or person-in-charge of every vessel of 500 g.r.t or more which intends to enter the Port of Singapore shall notify the Port Master at least 12 hours before the arrival of such vessel by any of the following means:

(a) Radio
Telegram: Addressed to "Portmaster Singapore".
(b) Telex: Addressed to "Portmaster". Telex: RS 34970. Answerback PORTPM RS 34970.
(c) Telefax: Addressed to "Portmaster". Fax: 3212016.
(d) Portnet: Through pilot order transaction.

5.2 The Owner, Agent, Master or person-in-charge of such a vessel, coming from a nearby port with less than 12 hours steaming time to Singapore, shall immediately on departure from such port notify the Port Master by any one of the means of communication mentioned above in paragraph 5.1.

5.3 *FORMAT – NOTIFICATION OF ARRIVAL*

The Owner, Agent, Master or person-in-charge of the vessel shall provide the information in the following format:

Format	*Explanation*
(A) NAME	Name of vessel.
(B) CALL SIGN	Call Sign.
(C) FLAG	Nationality.
(D) TYPE	Type of vessel.
(E) GRT	Gross registered tonnage.
(F) AGENT	Name of local shipping agency.
(G) ETA	Date and estimated time of arrival.
(H) LAST PORT	Last port of call.
(I) NEXT PORT	Next port of call.
(J) DRAFT	Draft of vessel.
(K) HEIGHT	Height of vessel which shall be the height measured vertically from the water line of the vessel to the highest point of the vessel including its cargo, structure or equipment onboard.
(L) LOCATION	Required location within the port.
(M) PORT SERVICE	Whether or not pilot service is required on arrival.
(N) TRACK-CHEM	Dangerous chemicals in bulk. This item shall apply to a vessel carrying those dangerous chemicals listed in Chapter 17 of the International Maritime Organisation's (IMO) International Code for the Construction and the Equipment of Ships Carrying Dangerous Chemicals in Bulk (IBC Code). See Port Circular No. 87 of 1987, entitled "Tracking of Chemical Carriers".
(O) REMARKS	If any.

The following remarks, when applicable, shall always be given:

(i) Condition affecting the navigation of vessel such as defective propulsion machinery, defective steering equipment, defective thruster, excessive list and awkward tows.
(ii) Fire or hazards onboard of including carriage of dangerous goods.
(iii) Damaged vessels.
(iv) Vessels damaged by bombs and other ordnances.

6. *CONFIRMATION OF ARRIVAL – VHF (VERY HIGH FREQUENCY) RADIOTELEPHONE REPORT*

6.1 *APPLICATION*

The Master of every vessel of 300 g.r.t or more or every tug engaged in towing or pushing, if the combined GRT of the tug and tow or vessel(s) being pushed is 300 g.r.t. or more, or any passenger vessel intending to enter the Port of Singapore, shall with effect from 1st October 1990 report by VHF the confirmation of arrival to the Singapore Vessel Traffic Information Service (VTIS).

6.1.1 For ease of reporting, the VTIS operational area is divided into VTIS East and VTIS West. Further details of the VTIS can be found in Part B of this Circular.

6.2 *VHF ARRIVAL REPORTING POINTS*

6.2.1 REPORTING VIA VTIS EAST

Masters of such vessels arriving in the Port of Singapore via the VTIS East operational area shall report their confirmation of arrival to VTIS East operator on Channel 10 when:

(a) Arriving from the East (South China Sea):
When abeam of Horsburgh Lighthouse (Lat. 01° 19.817' N., Long. 104° 24.444' E.).
(b) Arriving from the South via Selat Riau:
When abeam of Karang Galang Light (Lat. 01° 09.580' N., Long. 104° 11.470' E.).
(c) Arriving from East Johor Strait:
When abeam of Johor Shoal Buoy (Lat. 01° 18.880' N., Long. 104° 04.992' E.).

6.2.2 *REPORTING VIA VTIS WEST*

Masters of such vessels arriving into the Port of Singapore via the VTIS West operational area shall report their confirmation of arrival to VTIS West operator on Channel 10 when:

(a) Arriving from the South via Selat Durian:
When abeam of Pulau Jangkat Beacon (Lat. 00° 05.920' N., Long. 103° 42.730' E.).
(b) Arriving from the West (Malacca Strait):
When abeam of Pulau Iyu Kechil (Lat. 01° 11.470' N., Long. 103° 21.240' E.).

6.2.3 Master of vessels approaching from a location not mentioned in (a) – (e) above shall on approaching the VTIS operational area call the VTIS East or VTIS West operator as appropriate and provide the vessel's position by bearing and distance from one of the 7 conspicuous reference points listed in Appendix II of this Circular.

6.3 *VESSELS WITH ORDER FOR PILOT SERVICES ON ARRIVAL*

6.3.1 Masters of all vessels arriving at a Singapore Pilot boarding ground shall confirm their ETA on VHF Channel 10 by calling VTIS East or VTIS West as appropriate. They shall do so when passing the reporting points mentioned above in paragraph 6.2, or when at least 2 hours prior to arrival at the pilot boarding ground, whichever is earlier.

6.3.2 In confirming the ETA at pilot boarding ground, the Master shall also report for Confirmation of Arrival by providing the information, required in Paragraph 6.4. If this report is made before crossing the reporting point, then the Master need only report the vessel's name and position when passing the reporting point.

6.4 *CONTENTS OF VHF CONFIRMATION OF ARRIVAL REPORT*

The VHF Confirmation of Arrival report shall contain the following information:

(a) Name of vessel.
(b) Call sign.
(c) Present location with reference to any one of the designated reporting points described in Paragraph 6.2, e.g. abeam of Horsburgh Lighthouse.
(d) I . For vessel not requiring pilot services on arrival, then the name of the first destination in the Port, i.e. name of anchorage or berth, and the estimated time of arrival (ETA) at that destination.
 II. For vessels requiring pilot services on arrival, then in lieu of I., the name of the pilot boarding ground and the ETA at that boarding ground.
(e) Height of vessel as defined in Paragraph 5.3(K) above.
(f) Maximum draft of vessel.
(g) Remarks, if any (e.g. damaged vessel, unusual trim).
(h) For deep draft vessel and VLCC as defined in the "Rules for Vessels Navigating through the Straits of Malacca and Singapore", then the estimated time and place of crossing or joining the Singapore Strait TSS.

6.4.1 Where there are no changes to the information contained in (e) to (g) above from the Notification of Arrival made under Paragraph 5, the Master shall affirm that it is so and the repetition of such information in the Confirmation of Arrival report shall not be necessary.

7. *REPORTING ARRIVAL IN THE PORT*

The Master of an arrived vessel, fitted with VHF radiotelephone shall report as soon as practicable to the appropriate designated control centre on VHF Channel 12, 21 or 22, when such a vessel is anchored or moored within the port limit of Singapore. The report shall contain the date, time and the location of the vessel.

8. *ANCHORED POSITION REPORT*

For the reporting of an anchored location, the report shall be in the form of a bearing and distance from one of the following position reference points:

(a) *Eastern Sector*	*Reference Point*
Eastern Special Purposes Anchorage (A)	Amber Beacon Lat. 01° 17.876' N.
Eastern Special Purposes Anchorage (B)	Long. 103° 54.450' E. (all anchorages)
Small Craft Anchorage	
Laid-up Vessels Anchorage	
Eastern Petroleum Anchorage (B)	
Eastern Petroleum Anchorage (C)	
Man-of-War Anchorage	
Eastern Working Anchorage	
Eastern Petroleum Anchorage (A)	
Eastern Quarantine and Immigration Anchorage	
Explosives Anchorages for Lighters and Barges	

(b) *Western Sector*

Western Working Anchorage	Rimau Beacon
Western Petroleum Anchorage (A)	Lat. 01° 15.598' N.
Western Petroleum Anchorage (B)	Long. 103° 48.496' E.
Western Quarantine and Immigration Anchorage	(all anchorages)
Reserved Anchorage	
Pasir Panjang Coastal Anchorage	
Dangerous Goods Anchorage	

(c) *Jurong Sector*

Sultan Shoal Petroleum Anchorage (B)	Sultan Shoal Lighthouse
Sultan Shoal Petroleum Anchorage	Lat. 01° 14.381' N.
West Jurong Anchorage	Long. 103° 38.985' E.
Chemical/Gas Carriers Anchorage	(all anchorages)
Selat Pauh Anchorage	
Tuas Explosives Anchorage	
Tuas Explosives Lighter Anchorage	

(d) *East Johor Strait*

Changi General Purposes Anchorage	Johor Shoal Buoy Lat. 01° 18.880' N. Long. 104° 05.992' E.

9. *REPORT FOR INTRA-PORT VESSELS MOVEMENTS*

Prior to moving a vessel within the port limits of Singapore, the Master shall as soon as practicable report such event or intention to the designated control centre giving the following:

(a) Name of vessel.
(b) Call sign.
(c) Present location.
(d) Destination.
(e) Draft.
(f) Height.
(g) Remarks, if any.

10. *VHF REPORT FOR DEPARTING VESSELS*

10.1 PRIOR TO DEPARTURE

The Master of every vessel, as specifited in Paragraph 6.1 intending to leave Singapore, shall inform the appropriate designated control centre prior to departure, and shall give the information as specified in Para 9 above. In addition, the Master shall advise the departure reporting points he intends to use. Departure reporting points are contained in Paragraph 10.3 below.

10.2 *ON DEPARTURE*

The Masters of such vessel leaving Singapore shall report to the Singapore VTIS East or West on VHF Channel 10 when passing any of the departure reporting points.

10.3 *VHF DEPARTURE REPORTING POINTS*

10.3.1 *REPORTING VIA VTIS EAST*

Master of such vessels departing from the Port of Singapore and joining the Singapore Strait traffic via the VTIS East operational area shall report to VTIS East operator on Channel 10 when:

(a) Departing from the East Johor Strait:
When abeam of Johor Shoal Buoy (Lat. 01° 18.880' N., Long. 104° 04.992' E.).

(b) Departing from the Eastern Petroleum B Anchorage:
When abeam of Airway Buoy (Lat. 01° 17.650' N., Long. 104° 01.200' E.).

(c) Departing from the Eastern Fairway:
When abeam of Lagoon Beacon (Lat. 01° 16.637' N., Long. 103° 57.529' E.).

(d) Departing from the Corridor Fairway:
When abeam of S.W. Corridor Buoy (Lat. 01° 14.450' N., Long. 103° 54.167' E.).

(e) Departing from the East Keppel Fairway:
When abeam of Tembakul Beacon (Lat. 01° 13.343' N., Long. 103° 51.858' E.).

10.3.2 *REPORTING VIA VTIS WEST*

Master of such vessels departing from the Port of Singapore and joining the Singapore Strait traffic via the VTIS West operational area shall report to VTIS West operator on Channel 10 when:

(f) Departing from the Jong Fairway:
When abeam of Sebarok Beacon (Lat. 01° 11.841' N., Long. 103° 462' E.).

(g) Departing from the Sinki Fairway:
When abeam of Ajax Shoal Buoy (Lat. 01° 13.733' N., Long. 103° 39.850' E.).

(h) Departing from the Sultan Fairway:
When abeam of Sultan Shoal Lighthouse (Lat. 01° 14.381' N., Long. 103° 38.985' E.).

(i) Departing from the West Jurong Anchorage, the Gas and Chemical Anchorage and the Sultan Shoal Petroleum Anchorage:
When abeam of Western Beacon (Lat. 01° 12.720' N., Long. 103° 35.883' E.).

10.3.3 Master of vessels departing from a departure point not mentioned in (a) to (i) above shall, on approaching the Singapore Strait traffic area, call the VTIS East or VTIS West operator as appropriate, and provide the vessel's position by bearing and distance from one of the 4 reference points listed below:

Sultan Shoal Lighthouse	01° 14.381' N., 103° 38.985' E.
Raffles Lighthouse	01° 09.609' N., 103° 44.552' E.
Sakijang Beacon	01° 13.308' N., 103° 51.378' E.
Bedock Lighthouse	01° 18.548' N., 103° 56.068' E.

10.4 *CONTENTS OF DEPARTURE REPORT TO VTIS*

The departure report to the Singapore VTIS shall contain the following information:

(a) Name of vessel.
(b) Call sign.
(c) Current location passing which departure point, e.g. abeam Tembakul Beacon.
(d) Bound East, West or South.
(e) Remarks, if any.

11. *MALFUNCTION OF VHF RADIOTELEPHONE EQUIPMENT*

11.1 When it is not possible to operate the VHF radiotelephone equipment carried on board a vessel, compliance with Paragraphs 6, 7, 8, 9 and 10 above shall be made as soon as practicable by any available means.

11.2 The Master shall at the earliest opportunity restore such VHF radiotelephone carried on board his vessel to working condition and report to the designated communication centre accordingly.

PART B SINGAPORE VTIS (VESSEL TRAFFIC INFORMATION SERVICE)

12. The Port of Singapore Authority is establishing a Vessel Traffic Information Service (VTIS) which will commence operations on 1st October 1990. It is hoped that with the operation of the system, it will be possible to inform participating vessels of dangers affecting their navigation. The VTIS operation is part of the PSA's Port Operation Centre.

13. *OBJECTIVES OF THE VTIS*

The objectives of the VTIS are as follows:

(a) Improve safety of navigation in the Singapore Strait.
(b) Facilitate the safe flow of shipping in and out of the Port of Singapore.
(c) Provide navigational information to vessels using the Singapore Strait.

14. *VTIS OPERATIONAL AREA*

The VTIS will assist marine traffic within the Singapore Strait Traffic Separation Scheme (TSS) bounded by Long. 103° 25.0' E. and Long. 104° 23.0' E. The VTIS coverage is divided into two areas, namely VTIS East and VTIS West, by Long. 103° 51.2' E.

14.1 *VTIS EAST*

Vessels East of Long. 103° 51.2' E. shall communicate to the VTIS East operator.

14.2 *VTIS WEST*

Vessels West of Long. 103° 51.2' E. shall communicate to the VTIS West operator.

15. *VTIS RADAR POSITIONS*

The 5 radars are located at the following positions:

	Site	*Latitude*	*Longitude*
(a)	Horsburgh	01° 19.818' N.	104° 24.456' E.
(b)	Bedok	01° 18.845' N.	103° 57.327' E.
(c)	St. John	01° 12.832' N.	103° 51.201' E.
(d)	Raffles	01° 09.641' N.	103° 44.575' E.
(e)	Sultan Shoal	01° 14.386' N.	103° 38.998' E.

16. *VTIS VHF COMMUNICATION FACILITIES*

VHF transmitters and receivers are located at the Horsburgh Lighthouse, Bedok Lighthouse, Jurong Control Station and the Sultan Shoal Lighthouse. The VHF frequencies operated by the Singapore VTIS are:

(a) Primary VTIS operation frequency 156.500 MHz Channel 10.
(b) Secondary VTIS operation frequency 156.675 MHz Channel 73.

VHF Channel 10 will be used for the calling and working of the VTIS. The secondary channel will be used for prolonged communication. An invitation to listen to Channel 73 will be broadcast on Channel 10, after which the navigational warnings will be transmitted on Channel 73.

17. *VTIS PARTICIPANTS*

All vessels and tows of 300 g.r.t. or more and all passenger vessels intending to enter or depart from the Port of Singapore in reporting as required in Part A of this Circular are participating in the VTIS.

All vessels transitting the Singapore Strait and not calling at Singapore should also participate by following the procedure and reporting the applicable information to the VTIS as contained in Paragraph 6 of this Circular.

18. *REPORTING POINTS FOR PARTICIPATION*

These are the same as those contained in Paragraph 6 of this Circular.

19. The effectiveness of the VTIS is to an extent dependent on the accuracy of the information provided and timely reporting by Masters. As with all other similar reporting systems in the world, Masters, in providing or receiving information to/from VTIS, are not relieved from the duties and responsibilities required by any international regulations and local rules that are in force.

APPENDIX I

Designated Communication Centre	*Channel*	*Usage*
VTIS East/VTIS West	10	Reporting of arrival by vessels on approaching the VTIS operational area. Report by departing vessels on reaching the port limit. Confirmation and Amendments of ETA at pilot boarding ground. Primary calling and working channel of the VTIS and provision of marine traffic information.
	73	Radio broadcasting of marine traffic and navigational warnings. Secondary VHF channel for VTIS participants.
Singapore Port Operations	12	Request of pilotage service. Reporting of anchored positions, intra-port movements for vessels and pre-departure calls, as well as navigational or shipping information.
	20	Request of pilotage service.

Jurong Control	22	Reporting of anchored positions, intra-port movements, and pre-departure calls, as well as navigational or shipping information within the Jurong areas.
Sembawang Control	21	Request of pilotage service, intra-port movements and pre-departure calls, as well as navigational or shipping information within the East Johor Strait.

APPENDIX II

Fixed Reference Points: The 7 fixed reference points are as follows:

Reference Name	Latitude	Longitude
Pulyu Kechil Light	01° 11.470' N.	103° 21.240' E.
Sultan Shoal Lighthouse	01° 14.381' N.	103° 38.985' E.
Raffles Lighthouse	01° 09.609' N.	103° 44.552' E.
Sakijang Beacon	01° 13.308' N.	103° 51.378' E.
Bedok Lighthouse	01° 18.548' N.	103° 56.068' E.
Tg. Setapa Light	01° 20.570' N.	104° 08.240' E.
Horsburgh Lighthouse	01° 19.817' N.	104° 24.444' E.

Source: PMC No. 6 of 1990.

TUGS: PSA has a fleet of 12 tugs, they are:

Name	*Horsepower*	*Bollard Pull* (tonnes)
VST 1	2×1,276	21.5
VST 2	2×1,276	21.3
VST 3	2×1,276	21.0
VST 4	2×1,276	22.1
Victory (V5)	2×1,500	26.0
Vigilant (V6)	2×1,500	32.0
Valiant (V7)	2×1,500	29.0
Vanguard (V8)	2×1,500	32.5
Vertex (V9)	2×1,500	28.5
Valour (V10)	2×1,500	28.5
Viking (V11)	2×1,500	30.0
Alpha 1	2×1,300	26.0

Shell operates 2 tugs approximately 1,500 b.h.p. A number of privately owned salvage tugs make the port their base.

Tugs join anywhere in port limits by pre-arrangement with Pilots. Normally ship's line used. All PSA and Shell tugs carry tow ropes for use if required. PSA charge for use of tow rope.

BERTHING: Vessel's Agents should submit to Authority a Schedule "A" (Application for Berth) giving overall length, maximum draft alongside, cargo particulars, ETA and ETD of, and Dangerous Cargo Declaration listing out dangerous cargo (including petroleum products and explosives) on board vessel at least 48 hours before berth required.

BERTHING FACILITIES:

NOTE: All depths are reduced to Chart Datum unless otherwise stated.
† Only controlling depths that are shallower than the depths alongside are listed.

STEVEDORES: Labour should be ordered by 0900 hrs. for 2nd shift (1500 to 2300 hrs.) on same day and by 1300 hrs. for 1st shift (0700 to 1500 hrs.) for next day, by 1100 hrs. for 3rd shift (2300 to 0500 hrs.) on same day.

Under normal circumstances no work is performed during meal hours, 1100 – 1200 hrs. and 1830 – 1930 hrs. unless the ship is classified as a "key" vessel or the Agent orders work during the meal hours.

MEDICAL: When infectious disease not suspected, permission will be granted by Port Health Officer to Agent to take doctor on board and remove the patient, if necessary, to hospital. Preferably as much notice as possible. Several hospitals, General Hospital, Gleneagles, Mt. Alvernia to name a few. Cholera, plague, etc., are not endemic in Singapore.

Also see "Radio" – Medical Advice to Ships.

TANKERS: Bunkering and discharge facilities available at Eastern and Western Petroleum Anchorages or installations at Pulau Bukom, Pulau Ayer Chawan, Tanjong Penjuru, Tanjong Berlayer, Jurong and Pulau Merlimau.

PSA operates a Slop and Sludge Reception and Treatment Centre at Pulau Sebarok with facilities for the disposal of slops, sludge, tankcleaning, water and dirty ballast. Also see "Pollution".

Smoking not permitted during period tanker alongside PSA wharves. Grades permitted for discharge along PSA wharves:

(a) Marine diesel oil, (b) Fuel oil.

Shell: (Lat. 01° 14.0' N., Long. 103° 46.3' E.).
Pulau Bukom, 4.6 km. off the S.W. coast of Singapore – 10 berths and a single buoy mooring (01° 11.47' N., 103° 47.53' E.). Depth of water in approach is 18.3 m. LWOST. Fresh water, fuel oil, gas oil and diesel oil available.

Tank cleaning is carried out alongside or in Roads, as arranged with Pulau Bukom.

Shore tankage for slops/dirty ballast is limited to 15,000 cu.m. for all purposes. Each vessel is normally limited to 400 cu.m., although larger quantities *may* be accepted by prior arrangement, giving preferably 7 days' notice. Waxy slops are only received on Wharves 6, 7 and 8. When waxy slops are on board for discharge, vessels are requested to advise Pulau Bukom 48 hours in advance in which case quantity must be stated. Waxy slops should be segregated if other slops are carried.

The refinery has a refining capacity of 23 million tonnes per annum. It manufactures LPG, petrol, aviation turbine fuel, kerosene, gas oil, diesel fuel, solvents, fuel oil, lub oil and bitumen for local and overseas markets. There are 200 oil storage tanks with over 3 million tonnes capacity. All grades of bunkers are available 24 hours a day.

* 2.8 m. patch exists 15 m. from end of berth.

Bunkering facilities and water supply are available.

Esso: (Lat. 01° 16.8' N., Long. 103° 41.7' E.). (Also see "Mobil" SBM). Refinery on an island Pulau Ayer Chawan 2.4 km. South of Jurong Industrial Complex. Refining capacity of 231,000 bbls. per day. Lubricant plant 7,000 bbls. per day. The jetty has an overall length of 982.1 m. and consists of 6 loading and bunkering berths. Ballast disposal facilities available.

Operating Limits for the Singapore Esso/Mobil SBM: July 1989.

1. *Vessels from 80,000 d.w.t. to 150,000 d.w.t.:*
   - (1.1) Vessels up to 280 m. LOA, and with an arrival draft of 15.0 m. (49 ft.) or less, can be moored at any time during day or night under any tidal direction and strength.
   - (1.2) Vessels with an arrival draft exceeding 15.0 m. (49 ft.) but less than 20.4 m. (67 ft.), can be moored during the day or night provided the tide is flooding.
   - (1.3) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water are accepted all year round.
   - (1.4) Vessels shall be fitted with at least one set of OCIMF's standard tongue type bow chain stopper (AKD) for securing 76 mm. (3 in.) diameter SBM mooring chafe chain(s).
   - (1.5) Timely use of vessel's segregated ballast tanks (SBT) is to be maximised, so as to minimise the vessel's freeboard. The vessel must maintain a midship draft of not less than 7.0 m. (23 ft.), a trim below 6.1 m. (20 ft.) and a forward draft of not less than 4.0 m. (13 ft.) at all times.
   - (1.6) If ballast capacity in the SBT alone cannot maintain the drafts and trim as stated in (1.5), then timely ballasting into cargo oil tanks (COT) concurrent with cargo discharge shall be carried out with double valve segregation, at both suction and discharge sides of the cargo.
2. *Vessels from 150,000 d.w.t. to 252,000 d.w.t.:*
   - (2.1) Vessels up to 280 m. LOA and with an arrival draft of 15.0 m. (49 ft.) or less, can be moored during day or night under flood or ebb tide. However, vessels shall be programmed to reach the SBM and moor with tidal rates not exceeding 1.5 knots.
   - (2.2) Vessels with an arrival draft exceeding 15.0 m. (49 ft.) but less than 20.4 m. (67 ft.) can be moored during the day or night provided the tide is flooding, and the vessels shall be programmed to reach the SBM and moor with flood tidal rates not exceeding 1.5 knots.
   - (2.3) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water are accepted all year round.
   - (2.4) Vessels shall be fitted with 2 sets of OCIMF's standard tongue type bow chain stoppers for securing 76 mm. (3 in.) diameter SBM mooring chafe chains.
   - (2.5) Timely use of SBT is to be maximised, so as to minimise the vessel's freeboard. The vessel must maintain a midship draft of not less than 7.0 m. (23 ft.), a trim below 6.1 m. (20 ft.) and a forward draft of not less than 4.0 m. (13 ft.) at all times.
   - (2.6) If ballast capacity in the SBT alone cannot maintain the drafts and trim as stated in (2.5), then timely ballasting into COT concurrent with cargo discharge shall be carried out with double valve segregation at both suction and discharge sides of the cargo.
3. *Vessels from 252,000 d.w.t. to 285,000 d.w.t.:*
   - (3.1) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water and an arrival displacement up to 330,000 metric tons (324,803 long tons) are accepted all year round.
   - (3.2) Vessels can be moored during the day or night provided the tide is flooding, and the vessels shall be programmed to reach the SBM and moor with flood tidal rates not exceeding 1.5 knots.
   - (3.3) Vessels shall be fitted with 2 sets of OCIMF's standard tongue type bow chain stoppers for securing 76 mm. (3 in.) diameter SBM mooring chafe chains.
   - (3.4) Throughout the vessel's stay at the SBM during the *Northeast Monsoon Season (November 1st to April 30th)*, the vessel must maintain a midship draft of not less than the vessel's sailing draft in light ballast condition or 7.9 m. (26 ft.) whichever is deeper. Also, the vessel's trim must not exceed 6.1 m. (20 ft.), and its forward draft must not be less than 4.9 m. (16 ft.) at all times.

SHP	2.6 – 12	17,500	500	152	10	5	0°	NA	26.5	8.1	–	–	2

Notes:
(1) P.S.A. will not berth vessels with actual displacement exceed that stipulated.
(2) For guidance only. Actual length is governed by a minimum separation of 150 ft. from the adjacent vessels.
(3) Includes height of manifolds above deck.
(4) P.S.A. required an U.K.C. of 1.0 m. whilst manoeuvring.
(5) For guidance only. Actual number of tugs is dictated by prevailing conditions and assessment of P.S.A. pilot.
(6) Vessels up to 140,000 d.w.t. *on spot basis only*, provided other parameters are met.

(3.5) Throughout the vessel's stay at the SBM during the *Southwest Monsoon Season (May 1st to October 31st)*, the vessel must maintain a midship draft of not less than the vessel's sailing draft in heavy ballast condition or 9.1 m. (30 ft.), whichever is deeper. Also, the vessel's trim must not exceed 6.1 m. (20 ft.), and its forward draft must not be less than 6.1 m. (20 ft.) at all times.

(3.6) Timely use of SBT is to be maximised, so as to minimise the vessel's freeboard. If ballast capacity in the SBT alone cannot maintain the drafts and trim as stated in (3.4) or (3.5), then timely ballasting into COT concurrent with cargo discharge shall be carried out, with double valve segregation at both suction and discharge sides of the cargo.

4. *Vessels from 285,000 d.w.t. to 303,000 d.w.t.:*

(4.1) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water and an arrival displacement up to 330,000 metric tons (324,803 long tons) are accepted all year round.

(4.2) Vessels can be moored during the day or night provided the tide is flooding, and the vessels shall be programmed to reach the SBM and moor with flood tidal rates not exceeding 1.5 knots.

(4.3) Vessels shall be fitted with 2 sets of OCIMF's standard tongue type bow chain stoppers for securing 76 mm. (3 in.) diameter SBM mooring chafe chains.

(4.4) Throughout the vessel's stay at the SBM, the vessel must maintain a midship draft of not less than the vessel's sailing draft in heavy ballast condition or 9.1 m. (30 ft.), whichever is deeper. Also, the vessel's trim must not exceed 6.1 m. (20 ft.), and its forward draft must not be less than 6.1 m. (20 ft.) at all times.

(4.5) Timely use of SBT is to be maximised, so as to minimise the vessel's freeboard. If ballast capacity in the SBT alone cannot maintain the drafts and trim as stated in (4.4), then timely ballasting into COT concurrent with cargo discharge shall be carried out with double valve segregation at both suction and discharge sides of the cargo.

5. *Engine Readiness:*
The vessel must be ready to move under its own power during her stay at the SBM. Use of engine may be necessary during tidal change or wind shift.

6. *Tug Assistance:*
All tug assistance, for the berthing and unberthing of the vessels to and from the SBM, shall be provided by the Port Authority of Singapore on the vessel's account. In the event of an emergency, the SBM Operations Superintendent shall have the right to order tug assistance on behalf of the vessel, to safeguard the safety of the vessel and the SBM on the vessel's account.

7. *Ore/Bulk/Oil (OBO) Carriers:*
For OBO carriers discharging at the SBM, the vessel's Master and/or its Chief Officer must ensure that the vessel maintains stability within its safe operating limits (taking into account the effects of free liquid surfaces on stability) at all times during the vessel's stay at the SBM.

Note: The word "d.w.t." refers to the original design deadweight of a vessel in long tons, as built and not to any subsequent 'remarked' deadweight.

Cautionary Advices

To prevent damage to the SBM anchor legs and submarine pipeline, use of anchors is prohibited in the SBM manoeuvring area. The vessel's anchors should be properly secured with chain-stoppers prior to approaching the SBM.

The SBM is located in a confined position with very limited space to swing a vessel. There is a 16 m. (chart datum) shallow patch marked by Bujor Buoy at a distance of 900 m. Southward of the SBM. In the SBM area, except for the approaching sector, there are spots of only 15 m. depth. The condition of the sea bottom is mainly sand and shells with scattered hard rocks and an aborted berthing at an advanced stage of the approach poses the risk of a grounding. Speed should not exceed 3 knots when approaching the Esso SBM. Cautious approach speed is necessary to control the vessel's motion with a minimum use of astern engine.

Berthing Restrictions: In view of the depth of the approach channel, the maximum permissible draft is limited to 67 ft. irrespective of the height of the tide. The tidal currents set 260° during flood tides with maximum rates of 2.3 knots occurring during ebb tides with maximum rates of 1.7 knots occuring during August and September. The specific gravity of sea water at the SBM varies between 1.019 and 1.022.

Berthing Procedure: From the pilot boarding location, vessels normally proceed slowly on an Easterly heading toward a point about 1 mile S.W. of the Ajax Shoal Light Buoy where the heading is changed toward the SBM manoeuvring area. Tugs normally join off Ajax Shoal and assist the vessel in slowing down and aligning her port bow to the SBM, heading the current.

The SBM Operation Superintendent, stationed on the forecastle, advises the bridge by walkie-talkie of the vessel's distance from SBM.

Mooring: The mooring consists of 2×150 ft. long×18 in. circumference nylon hawsers with chafing chains and pick-up lines.

A mooring boat takes the messenger lines from the ship and connects to the pick-up lines. (See "Plan"). Vessels are acceptable only if their fairleads or Panama chocks can receive the chafing chains and are installed in accordance with OCIMF guidelines. In this case the chafing chains are secured by means of shackles and snotters fastened to mooring bollards. Vessels of this kind should give ample notice to enable Esso Refinery to make the necessary arrangements.

Hose Connection: 2×16 in. over-the-rail hoses are connected to the ship's port side manifold by the mooring gang assisted by a winchman from the ship's crew.

Each hose has a butterfly valve and a standard 16 in. ASA flange. A clear working space of at least 20 in. is needed between the manifold and the deck, drip pan or other structure.

A minimum 13 tons SWL derrick is needed for disconnecting the hoses from a 250,000 d.w.t. tanker is light condition. The 16 in. tail hoses are 35 ft. long.

Caltex: (Lat. 01° 17.7' N., Long. 103° 44.5' E.).

Berth No.	Max. Length of Vessel (m.)	Maintained Depth Alongside (m.)	†Controlling Depth In Approaches (m.)
1	335*	13.0	12.8
2	300*	14.8	12.8
3	42	–	2.9
4	140	13.6	12.8
5	206	11.5	
6	103	12.7	12.8
7	76	9.1	

Bunkering facilities and water supply available.

* For vessel with LOA more than 300 m. but less than 335 m., it may berth at Berth No. 1. However, this will reduce the maximum LOA for Berth No. 2 from 300 m. to 183 m. during the stay of vessel at Berth No. 1.

Mobil: (Lat. 01° 17.9' N., Long. 103° 41.5' E.).
7 berths and a shared single buoy mooring (Esso/Mobil). Night time berthing at the discretion of the Pilot. At Berth No. 3 day-time berthing and unberthing only possible, on flood tide.

Berth No.	Length of Berth (m.)	Maintained Depth Alongside (m.)	†Controlling Depth in Approaches (m.) From East	From West
1	360	14.2	12.6	10.5

B.P. Refinery: (Lat. 01° 15.8' N., Long. 103° 48.5' E.).

Refinery with 3 berths situated at Tanjong Berlayer. Small jetty inside harbour known as Jetty No. 2 can receive small vessels up to 1,000 tonnes (Max. LOA 100 m.) as water depth only 6.3 m. below ACD.

Jetty No. 1 at S.W. side of Tanjong Berlayer can accommodate vessels up to 33,000 tons (Max. LOA 210 m. – 263 m.) at off-shore mooring where dredged channel 11.0 m. below ACD. Berthing cannot be effected for 43 days of year due strong tidal currents.

At Jetty No. 1A which is Northwards extension from Jetty No. 1 trunkway, vessels up to 5,000 tonnes (Max. LOA 140 m.) can be berthed; water depth 7.6 m. below ACD. Simultaneous mooring of vessels at Jetties No. 1 and 1A not allowed as floating hose used to connect Jetty No. 1 to ship at mooring buoys.

Bunkers and fresh water available.

Singapore Refining Co. Pte. Ltd.:
(Lat. 01° 17.6' N., Long. 103° 43.2' E.).

Singapore Refining Company (SRC) is situated on the island of Pulau Merlimau and has 5 Oil Handling Berths and one Dry Cargo/Oil Berth. The berths are within the port limits of Singapore and, as such, all tankers berthing or unberthing are placed under PSA pilotage. However, certain harbour craft and regular coastal vessels (less than 2,000 g.r.t. or between 2,000 to 3,000 g.r.t. and equipped with a bow thruster engine and a set of twin screw engines) may be granted pilotage exemption by both PSA and SRC. Loading of oil is performed through hard loading arms which are free-standing and manually operated, except for Berth No. 6 which is hydraulically operated. The shipboard arm has an end assembly swivel and fitted mainly with manually operated Camlock coupling connection, except for Berth No. 6 which is hydraulically operated.

1. Oil Handling and Dry Cargo Berths (Berths No. 1 to 6):

Berths No. 1 and No. 2 are designed for ships with a maximum displacement of 105,000 tonnes, and are able to accommodate ships with length overall (LOA) – maximum 290 m. and minimum 90 m. Areas around Berths No. 1 and No. 2 have been dredged to a depth of 15.7 m. and 15.8 m. respectively at Chart Datum. These berths receive crude oil for the Refinery, as well as load out volatile and non-volatile refined products.

Berth No. 3 is designed as a Dry Cargo/Oil Berth for ships with a maximum displacement of 20,000 tonnes. It is capable of loading drummed and bulk asphalt, bulk flaked sulphur and several non-volatile refined product.

Berth No. 4 is designed for small barges with maximum displacement of 1,500 tonnes and load out non-volatile refined products only.

Berths No. 5 and No. 6 are designed for coastal tankers/bunker barges with a maximum displacement of 6,000 and 8,800 tonnes respectively and load out volatile and non-volatile refined products, except LPG and TML which are handled at Berths No. 1 and No. 2 respectively.

Jetty heads of all berths are enclosed by curbs which collect any drainage into a sump tank. The drainage is then automatically pumped into the ballast line which leads to a slop tank ashore.

2. Truck and Barge Ramp:

The truck barge ramp is located at Tanjong Tok which is located approximately midway between Berths No. 2 and No. 6. The main function of this ramp is to provide a landing area for barge/carrier transporting dangerous and non-dangerous road tankers and vehicles to and from Pulau Merlimau. In the event of an emergency, this barge ramp could be used to provide a safe landing area for transporting back-up personnel and equipment from the mainland to SRC and vice versa.

3. Single Point Mooring Terminal (SPM):

Crude oil for the refinery can also be received through the SPM which is situated at Silat Sinki between Sultan Shoal and Raffles Lighthouse. The SPM is owned by the Port of Singapore Authority (PSA) and operated by Tanker Mooring Services Co.Pte.Ltd. (TMS).

Pre-Arrival Information:

Questionnaire:

Prior to vessel's arrival at berths (preferably about 72 hours before her arrival), Master of vessel of 20,000 d.w.t. and above, and all LPG vessels, shall answer SRC Berth Questionnaire as outlined below:

(i) Maximum Displacement – Berthing/Unberthing.
(ii) ETA/LOA/SDWT/GRT.
(iii) Expected Deepest Berthing/Unberthing Draft.
(iv) Distance from Bow to Cargo Manifold (BCM).
(v) Maximum Height from Water Level to Centre of Cargo Manifold:
  (a) Including Ballast Water in SBT.
  (b) Including Ballast Water in SBT, CBT and COT.
(vi) Distance of Cargo Manifold Inboard from Shipside.
(vii) Vessel's Month and Year of Build.
(viii) Does Vessel have a Fully Operational Inert Gas System and meets all SOLAS/International Maritime Organisation (IMO) Regulations?
(ix) Is Vessel equipped with COW and meets all Regulations for the Prevention of Pollution by Oil (MARPOL)/IMO Requirements?
(x) Type/Quantity of Cargo Onboard.
(xi) Type/Quantity of Cargo to be Loaded/Discharged.
(xii) Confirm wires, if used for mooring the vessel, are provided with suitable fibre tail (about 85 mm. diameter) on the end of each mooring wire.
(xiii) Is the Drugs and Alcohol Policy enforced onboard and meets OCIMF Guidelines for the Control of Drugs and Alcohol Policy Onboard?
(xiv) Does Vessel's Manning and Certification Levels meet all relevant STCM 78 Minimum Requirements for Training and Qualifications for Masters, Officers and Ratings and its amendment as adopted by PSA/IMO from time to time OR in the case of port limit vessels, does Manning and Certification Levels meet PSA Harbour Craft Manning requirements?
(xv) Is vessel equipped with VHF radio set and can operate on Channel 5 (Hague Plan) Frequency 156.25 MHz Rx; 160.85 MHz Tx.

Berth Information:

Berth No. 2 in position 01° 14.38' N., 103° 45.1' E. Length of je 320 m. Depth alongside 17.2 m.

†See "Berthing Facilities".

DENSITY: Usually between 1019 and 1022, unaffected by tide or temperature variations. Variation due to periodic heavy run-off of rain water.

FRESH WATER: Fresh water available at any point of PSA's wharves. PSA also has a fleet of 9 waterboats to supply fresh water to ships anchored within the port limits.

Port of Singapore Authority Port Circular No. 95/87.
Dated 9th November 1987.

SUPPLY OF FRESH WATER TO VESSELS WITHIN SINGAPORE PORT LIMITS

1. Shipowners and Shipping Agents of vessels in need of fresh water are requested to place their orders for water through the telephone, telefax or telex. The details are as follows:–

Telephone No.:	3212906 or 321907
Telefax No.:	3212017
Telex No.:	RS 42075
Answer Back:	WBSERV 42075

2. When placing the orders, the following information is necessary for the provision of Waterboat Services.
   - a. Name of Vessel.
   - b. Call Sign.
   - c. Flag.
   - d. Type.
   - e. g.r.t.
   - f. Freeboard.
   - g. ROI (Vessel's Rate of Intake).
   - h. Date/Time Service Required.
   - i. Quantity.
   - j. Location.
   - k. ETA (Estimated Time of Arrival).
   - l. ETD (Estimated Time of Departure).
   - m. Agent.
   - n. A/C No. (Agent's Credit Account No.).
   - o. Contact Person and Tel. No:
     - Office:
     - Residence:
3. Shipowners and Shipping Agents are to note that, as vessels are serviced on a first-come first-served basis, they are advised to place the orders as early as possible.
4. Master, Owners or Agents of vessels waiting for water supply may contact the Waterboat Office on the VHF Channel 18 to confirm the arrival of the waterboat. Vessels are requested to keep a listening watch on the same VHF Channel so that the Waterboat Office can inform them of any changes on the arrival time of the waterboat.
5. To facilitate the waterboats in locating the vessels requiring water, Masters of vessels are requested to display the following port signals prior to the scheduled time of supply.
   - (a) DAY – International Code Flags "CD ZERO"
   - (b) NIGHT – At or near the masthead, 2 all round lights in a vertical line, not less than 2 m. apart, the upper being green and the lower white.
6. Port Circulars No. 58 of 1983, 21 of 1985 and 22 of 1985 are hereby superseded.

FUEL: All grades available alongside PSA wharves and ex-installation, otherwise by barge. Marine diesel oil. Heavy fuel oil at 180 cst to 380 cst. Blended fuel from 60 cst to 180 cst.

FIRE PRECAUTIONS: Normal precautions with respect to cargo vessels, vessels under repair, etc. Fire boats available. Oil companies apply own regulations at installations.

CONSULS: Consuls, Embassies and High Commissions. Arab Republic of Egypt, Argentina, Australia, Austria, Bangladesh, Belgium, Brazil, Bulgaria, Canada, People's Republic of China, Denmark, Finland, France, Germany, Great Britain, Greece, India, Indonesia, Ireland, Israel, Italy, Japan, Democratic People's Republic of Korea, Republic of Korea, Malaysia, Myanmar (Burma), Netherlands, New Zealand, Norway, Pakistan, Panama, Philippines, Poland, Romania, Russia, Saudi Arabia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, U.S.A.

REPAIRS/DRY DOCKS: All types of repairs (hull, engine and electrical including navigational aids) carried out. Facilities also available for repairs out afloat while vessel in anchorages.

†See "Berthing Facilities" – Note.

SURVEYORS: A.B.S., B.V., Det Norske Veritas, Lloyd's Register, N.K.K., G.L., Polski Register Stratkow, China Corporation Register of Shipping and Salvage Association.

GANGWAY/DECK WATCHMEN: Recommended, particularly in Roads. Agents normally arrange. Cost varies.

Piracy: Vessels have been boarded by pirates whilst travelling at full speed.

On one occasion 5 hooded people armed with machetes boarded the vessel and made their way into the Master's cabin. The Master at that time was on the bridge but came down to his cabin for a moment, when he was seized by the gang and repeatedly hit with machete's handles. Fortunately the Master only suffered minor injuries.

After a short time, having tried unsuccessfully to force the ship's safe, the group of pirates abandoned the vessel, stealing only relatively small items like binoculars, the Master's Passport, etc.

The Master reported the incident to the Singapore Authorities.

Report: February 1987.

At 0230 hrs. one of our vessels was boarded by 6 pirates when passing the Philip Channel in Singapore Strait. The pirates were armed with cutlasses and stole cash and other valuable items. The Master and the crew did not attempt any resistance and nobody was harmed. The pirates disembarked immediately after stealing whatever they could carry.

OPENING/CLOSING HATCHES: Conventional hatches by stevedores. Mechanical hatches usually by ship's crew.

CERTIFICATES: If dangerous drugs on board, an export authorisation from country of origin and an import authorisation from country to which drugs being conveyed should be available for sighting and endorsement.

All vessels	Certificate of Registry, Tonnage Certificate, Certificate of Insurance or other financial security as applicable under CLC '69 and International Loadline Certificate or equivalent.
Passenger Ships	Passenger Safety Certificate issued under SOLAS Conventions.
Cargo Ships	Safety Equipment Certificate (if over 500 g.r.t.) or equivalent. Safety Radiotelegraphy Certificate or Radiotelephony Certificate whichever is applicable.

CUSTOMS ALLOWANCES: Tobacco: For crew and adult transit passengers – first day of arrival 50 cigarettes or 15 cigars or other tobacco 60 gms.; and for each subsequent day to the maximum of 7 days. 25 cigarettes or 7 cigars or other tobacco 30 gms.

Wines: 1 bottle per day to maximum of 8 days. Spirits: 0.875 bottle (in opened bottles) on first day of arrival and 0.125 bottle per day for rest of 7 days.

CARGO GEAR: Possession of valid test certificates. At PSA wharves all cargo gear should be inspected by an Authorised Port Officer before use.

REPATRIATION: Ships' Agents responsible for repatriating seamen. Mercantile Marine Office undertakes repatriation of distressed British seamen on behalf of Board of Trade, United Kingdom, whenever necessary. Seamen who hold proper documents which ensure entry into their countries of origin, citizenship and destination are normally granted Special Passes after discharge for purpose of repatriation.

AIRPORT: 20 km. from city. Regular and frequent services to all parts of the world.

TIME: GMT plus 8 hours. No seasonal change.

HOLIDAYS: Work can be arranged on all Public Holidays. New Year's Day; Chinese New Year; Hari Raya Haji; Good Friday; Labour Day (1st May); Vesak Day; National Day (9th August); Deepavali; Hari Raya Puasa; Christmas Day.

POLICE/AMBULANCE/FIRE: City Police 999; Fire/Ambulance only, 328111; Flag signal: CB3. VHF Channels 12 or 16. PSA Police 2712221 ext. 2222; Fire ext. 2209 or ext. 2333; Ambulance 2712211.

We quote the contents of Port Circular No. 123 of 1984 issued by the Port of Singapore Authority:

Ships Requiring Police Assistance:

1. The shipping community is hereby reminded that vessels within Singapore waters can directly contact Marine Police for assistance on those matters falling within police jurisdictions.

2. For such assistance, vessels should establish radio contact on:

	VHF Channel	*Hours*	*Ship Tran./Rec. Frequencies*	*Call sign (Voice)*
	21	24	157.05/161.65 MHz	Marine Police
or	7	24	156.350/160.950 MHz	Marine Police

Giving the following information:

(a) Name of vessel.
(b) Location of vessel.
(c) Nature of emergency.
(d) Nature of police assistance required.

3. Vessels within the port and requiring immediate police assistance shall display following signals in a conspicuous position to facilitate easy identification by the Marine Police:

By Day: International Code "CB3".
By Night: Red-Red-White (Red on top).

4. Vessels may in addition sound on their whistle or siren at intervals of about 1 minute three prolonged blasts to attract the attention of Marine Police personnel in the vicinity.

5. The shipping community is advised to illuminate and step up surveillance onboard its vessels, particularly those moored just outside the outer limits of the port, to discourage unauthorised boarding of its vessels.

TELEPHONES: Available on board vessel at PSA wharves only.

SERVICES: Following additional services available: Cleaning and preparing ship's tanks. Cleaning, scaling and painting. Insulation. Interior decorating and furnishing. Refrigeration and air-conditioning. Chemical cleaning of boilers, etc. SCAMP underwater cleaning service. Compass adjusting and DF Calibration. Radar and Radio servicing depots.

SHORE LEAVE: No restriction on crews landing after Immigration and Health formalities have been satisfactorily completed. With rare exception (Communist Country Crews), all *bona fide* crew of a vessel allowed shore leave on strength of their passports, discharge books or identification cards.

The following circular was issued in May 1973 by the Singapore Port Authority.

"In line with the Government's decision that action should be taken to deal with the 'long-hair' problem as part of a campaign against undesirable alien influences, the Port of Singapore Authority would be most grateful for your co-operation in implementing this decision by advising all your employees, including ships' officers and Crew members, wishing to come ashore to be more tidy in their general appearance.

"To assist you to decide whether an individual's hair is long, the following definition of long hair may be used as a guide:

(i) Hair reaching below an ordinary shirt collar;
(ii) Hair covering the ears;
(iii) Hair falling across the forehead and touching the eyelashes."

Shipmaster's Report: July 1987.

There is a good hovercraft service from Pulau Bukom to Pasir Panjang, also a less frequent ferry service.

IDENTIFICATION CARDS: Sect. 22 (1) (c) of Ordinance provides for issue of Seamen's Identification Card as set out in First Schedule to the Immigration Regs. 1966, but rarely issued nowadays. Normally accept Passports, Discharge Books or any identification cards issued by Masters of vessels for purpose of granting shore leave to Crew members provided these documents sufficiently identify person concerned

Gate Passes issued against Crew List at wharves and installations. No passes required from roads, although some form of identification advisable.

GARBAGE DISPOSAL: Garbage collection service is provided daily to all ships in the anchorages. Charges are incorporated in port dues. No drums or skips are provided on board. Service only accepts galley refuse which must be collected in plastic bags at time of disposal.

WASTE OIL DISPOSAL: Collection service is provided by the Port of Singapore Authority Slop Reception Centre. Barges of 1,200 cu.m. to 2,000 cu.m. are normally deployed to receive discharges from tankers at the Western Quarantine & Immigration Anchorage.

Charges:

% Oil/Water	S$ per cu.m.
more than 12%	Nil
9 – 12%	S$ 3
6 – 9%	S$ 6
3 – 6%	S$ 9
0 – 3%	S$ 12

Barge Freight: S$ 10/cu.m., minimum charge S$2,000.

Disposal of sludge and other oil residues: S$ 300/tonne or part thereof.

Various cancellation, delay and demurrage fees can also apply.

SEAMAN'S CLUBS: Singapore Mariner's Club, a division of the National Maritime Board, provides recreational facilities and information service for seafarers of all nationalities. The club is housed within a 12-storey building which is centrally located at Cantonment Road near to the port precinct. To gain entry into the club, seafarers should bring Passport, Discharge Book or other form of identification.

Facilities and services available include serviced apartments for seafarers who wish to extend their stay in town, Mariner's Corner Restaurant and Bar, Seafarers' Lounge, video corner, games room, billiard tables, Maritime Medical Centre – medical and dental treatment exclusively for seafarers, international telephone service, information service on a wide range of subjects, including tour services and travel advice, minibus transport service to shopping areas and places of interest, and shop. Contact Singapore Mariners' Club, Maritime House, 120 Cantonment Road, Singapore 0208. Tel: 2227311. Fax: 225117
Opening Hours: Club facilities 1000 – 2300 hrs. Apartments 24 hours.

Under the auspices of the National Maritime Board, a liaison office has been set up on the 2nd level of Maritime House for use by the various seamen's missions and welfare organisations. This liaison office is open mainly in the evenings to cater to the welfare needs of seafarers outside of the normal operating hours of the seamen's missions/welfare organisations. Contact Seamen's Welfare Organisations-Liaison Office at the above address. Tel: 2227311, ext. 8424.

Six other seafarers' centres exist around the city. They provide various services and facilities and their details are listed below. A leaflet detailing all the various centres and their facilities is available through the centre. It also provides maps of the city and information of general interest to seafarers.

Dansk Somandskirke Singapore, (Danish Seamen's Church & Danish Government Seamen's Service), 10 Pender Road, Singapore 040
Tel: 2746344. Telex: RS 28970 DSCS. Fax: 2729123.

Dutch Seamen's Mission, "De Waaierpalm", 1 Pender Road, Singapore 0409. Tel: 2725000.

Japan Seamen's Center, 20 Peck Seah Street 03-00, Singapore 0207. Tel: 2218261/2218262. Fax: 2220887.

Norwegian Seamen's Mission, 300-A Pasir Panjang Road, (like ved: Haw Par Villa). Tel: 7757835. Telex: RS 37354 NORMIS. Fax: 7789498.

Stella Maris Catholic Maritime Club, 510 Kampong Bahru Road, Singapore 0409. Tel: 2260545.

The Missions to Seamen, 291 River Valley Road, Singapore 0923. Tel: 7372880. Fax: 2353391.

In addition, a one-week International Sportsweek for Seamen is held annually for all seamen in port. They can participate in soccer, volleyball, table-tennis and various track and field events. The International Swimming Carnival for Seamen is also held annually with the objective of encouraging healthy recreational activities among seafarers and to foster friendly relations amongst seafarers from all parts of the world.

CURRENCY: Singapore Dollar (S$).

POLLUTION: No oil or mixture containing oil shall be discharged into Singapore waters from any vessel. The Master or person in charge of the vessel committing such an offence shall be liable on conviction to a fine not less than 500 dollars and not exceeding 500,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

No refuse, garbage, waste matter, substance of a dangerous or obnoxious nature or trade effluents to be discharged from any vessel into Singapore waters. The Master or the person in charge of the vessel committing such an offence shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

If any oil or mixture containing oil is discharged into Singapore waters:

(a) for the purpose of securing the safety of the vessel or of preventing damage to the vessel or her cargo, or of saving life;

or

(b) is found to be escaping, or to have escaped into Singapore waters from a vessel in consequence of damage to the vessel, or by reason of leakage, the Master or the person in charge of the vessel shall report the occurrences to the Director of Marine and the Port Master. Failure to do so shall be an offence and shall be liable on conviction to a fine not exceeding 5,000 dollars.

Slop Reception: The P.S.A. Slop and Sludge Reception and Treatment Centre at Pulau Sebarok has a total tank capacity of 82,000 cu.m.

Berthing facilities consist of 2 piers – Piers 1 and 2. Depths alongside: Pier 1 – 12.8 m., Pier 2 – 11.0 m.

The Centre can accommodate vessels up to an overall length of 264 m. and a displacement of 45,800 tonnes

7 barges with a total capacity of 8,500 cu.m. are used for the reception of slops/tank cleaning water at anchorages and transported to the Centre for disposal.

Communications: VHF Station Channel 61.

Safety and security at the island is well provided and maintained by both the Authority's Police Force and Fire Brigade.

Also see "Shipmaster's Report" and "Tankers – Shell".

DELAYS: Normally none. Occasional congestion due to prolonged rainy weather or other abnormal conditions.

NOTICES: *Port of Singapore Authority – Port Circular No. 20 of 1993. Dated 3rd April, 1993.*

CHANGE OF ANCHORAGE FOR HEALTH/IMMIGRATION CLEARANCE AND USE OF ANCHORAGES FOR VESSELS ARRIVING FROM EAST AND WEST

1. *Health/Immigration Clearance*

Masters, Owners and Agents of vessels are hereby informed that with effect from 0600 hrs. on 7th April 1993, the use of the Western Quarantine/Immigration Anchorage for Health/Immigration Clearance will cease until further notice.

Vessels arriving from the East or West requiring Health and/or Immigration Clearance are to make use of the Eastern Quarantine/Immigration Anchorage.

2. *Use of Anchorages in the Eastern and Western Sectors*

With effect from 7th April 1993, vessels arriving from the East may continue to make use of the appropriate anchorages in the Eastern or Western Sector, and likewise vessels arriving from the West may make use of the appropriate anchorages in the Eastern or Western Sector. In all cases, where Health or Immigration Clearances are required, they should proceed to the Eastern Quarantine and Immigration Anchorage.

3. *Use of Controlled Anchorages*

Masters/Owners/Agents requiring to anchor their vessels in any of the following anchorages are to obtain prior permission from the Enforcement Section of the Port Master's Department:

(a) Tuas Explosives Anchorage
(b) Western Dangerous Goods Anchorage
(c) Laid-up Vessels Anchorage
(d) Selat Pauh Anchorage
(e) Eastern Special Purpose Anchorage
(f) Western Reserved Anchorage
(g) Changi General Purposes Anchorage

Each application should be made in advance by letter or telex stating the name, g.r.t. and maximum draft of the vessel, the name of the required anchorage, the purpose and the period of stay at the anchorage. Vessels intending to use the Eastern Special Purpose Anchorage are to declare the highest point of the vessel/cargo above waterline.

4. *Pilotage*

Vessels requiring pilotage services are required to use the appropriate Pilot Boarding Grounds specified below:

(a)	Vessels from the East/West proceeding directly to Singapore Cruise Centre with Advance Health and Immigration Clearance or with Immigration boarding at Pilot Boarding Ground	Southern Boarding Ground
(b)	Vessels from the West proceeding directly to Anchorages in the Eastern Sector (with Advanced Health and Immigration Clearance)	Eastern Boarding Ground A
(c)	Vessels from the West proceeding directly to Berth/Anchorages (with Advanced Health and Immigration Clearance)	Eastern Boarding Ground A or Western Boarding Ground
(d)	Vessels from the East proceeding directly to Berths/Anchorages (with Advanced Health and Immigration Clearance)	Eastern Boarding Ground A or B as arranged with the Pilotage Section.
(e)	Vessels from the East or West requiring Health/Immigration Clearance	Eastern Boarding Ground A

5. The foregoing directives are issued pursuant to Section 67 of the Port of Singapore Authority Act (Cap 236).

6. Port Marine Notice No. 71 of 1992 will be cancelled with effect from 7th April 1993.

Port of Singapore Authority – Port Circular No. 56/86 Dated 1st September, 1986.

PLACING OF PILOTAGE ORDERS.

1. This circular supersedes Port Circular No. 125 of 1984 with effect from 1st October, 1986.

2. To reduce the congestion of telephone/VHF calls, shipping Agents are requested to place pilotage orders and any amendment by telex. However, the pilot office will accept orders/amendments by telephone if the orders/amendments are placed after normal office hours or during weekends and public holidays, for the convenience of shipping Agents. In cases where Agents are unable to send the orders by telex, they may also place the orders by telephone.

3. The telex and telephone numbers for placing of pilotage orders/amendments are as follows:

Service Area	*Telex*	*Telephone*
East Johor Strait	RS 35962 Answer back SEMCO 35962	5427112/ 5427113
All other areas in the port	RS 22896 Answer back PORTPM 22896 RS 34970 Answer back PORTPM 34970	3211764/ 3211765/ 3211766

4. A "hands-on" operation to replace the present system of processing pilotage orders has been designed to enhance services to port users through more efficient means of capturing, processing and dissemination of shipping information. The system will enable direct entry of pilotage orders received through telephone/telex/VHF into the computer. When implemented, this will eliminate the present 'chit' system and pave the way for more use of PSA Databox facility, by which port users may be able to place their orders or amendments through their own personal computers linked to PSA mainframe computer. Users will also be able to benefit from real time information. (More details on the PSA Databox facility will be released at a later date). Operationally, the "hands-on" system will change the present flow in the processing of pilotage orders. Replies to pilotage orders placed through telephone/telex will be standardised.

5. With effect from 1st October, 1986, the current practice of confirming pilotage orders by telephone while the Agent holds on to the telephone line will be discontinued. Upon receipt of a pilotage order by telephone, the pilot office will process and return the call by telephone or telex. Agents are required, as in telex orders, to standby for up to 30 minutes for the confirmation of acceptance of the order from the pilot office. The pilot office will also provide a *reference number* for an accepted pilotage order which is replied through the telephone. In exceptional circumstances where no confirmation is received after 30 minutes, the Agents are required to call the pilot office to check on the orders.

6. With effect from 1st October 1986, Agents need only provide full information for pilotage orders for the *first pilotage move of the vessel in the port.* For *all subsequent moves of the vessel within the same call,* reduced information is required. Other particulars such as flag, type, g.r.t. and length need only be given if there are changes.

7. We are also pleased to inform that the following waivers of pilotage amendments charges for amendments to vessel's ETAs by Masters will be given:

(a) For the *first* amendment/confirmation to ETA (of less than 6 hours notice) which is within half an hour of the service required time.

(b) For subsequent amendments, which are within 15 minutes of the *first* confirmed ETA.

8. To take advantage of the waivers, it is recommended that Masters/Agents update vessels' ETAs, if required about 6 to 7 hours before service is required. Masters/Owners/Agents are advised that amendments to ETAs other than that stated in paragraph 7 (a) and (b) giving less than 6 hours notice will be chargeable.

9. For pilotage service to berths/terminals other than the Port Authority's wharves, Agents are required to ensure the availability of such berths/terminals by liaising closely with the respective private operator.

Port of Singapore Authority – Port Marine Circular No. 11/1993.

PORT CLEARANCE FORMALITIES FOR ARRIVING AND DEPARTING VESSELS

1. For expeditious processing and clearance, the Shipping Community is advised to check and ensure that the following documents are in order when submitting the Arrival or Departure Declaration.

2. ARRIVING VESSEL

Within 24 hours of arrival of a vessel in port, the Owner, Agent or Master or a vessel is to submit (to the Port Clearance Office) the following documents for inspection or retention:

2.1 Vessel's Port Clearance from her last port.

2.2 General Declaration Forms for Arrival, duly completed in duplicate. No column/space in these forms is to be left blank (Portnet subscribers can make their declaration via Portnet).

2.3 Vessel's Certificate of Insurance or other Financial Security in respect of Civil Liability for Oil Pollution Damage (CLC Certificate) for vessel carrying in bulk a cargo of more than 2,000 tons of persistent oil.

2.4 Vessel's International Pollution Prevention Certificate for the Carriage of Noxious Liquid Substances in Bulk or the Certificate of Fitness issued under the Bulk Chemical Code or the International Bulk Chemical Code as appropriate for ship carrying bulk noxious liquid substances or unassessed liquid substances.

3. DEPARTING VESSEL

The following documents are to be submitted for inspection or retention:

3.1 General Declaration Forms for Departure, duly completed in duplicate. No column/space in these forms is to be left blank (Portnet subscribers can make their declaration via Portnet).

3.2 Vessel's Certificate of Registry/Nationality.

3.3 Vessel's Load Line Certificate.

3.4 Vessel's Cargo Ship Safety Construction Certificate.

3.5 Vessel's Cargo Ship Safety Equipment Certificate.

3.6 Vessel's Cargo Ship Safety Radiotelegraphy or Radiotelephony Certificate.

3.7 Vessel's Cargo Ship Safety Certificate as an alternative to the certificates referred to in Paragraphs 3.4, 3.5 and 3.6.

3.8 Crew List in duplicate. If there is any change of crew after port clearance has been obtained, to submit to the Port Clearance Office such amendments (in duplicate) before the vessel departs Singapore.

3.9 Passenger List, if applicable, in duplicate. If there is any change of passengers after port clearance has been obtained, to submit to the Port Clearance Office such amendments (in duplicate) before the vessel departs Singapore.

3.10 Vessel's Passenger Ship Safety Certificate for a passenger ship.

3.11 Vessel's International Oil Pollution Prevention (IOPP) Certificate for Oil Tanker of 150 tons gross tonnage and above and any other ship of 400 tons gross tonnage and above.

3.12 Vessel's International Pollution Prevention Certificate for the Carriage of Noxious Liquid Substances in Bulk (NLS) or the Certificate of Fitness Issued under the Bulk Chemical Code or the International Bulk Chemical Code as appropriate for ship carrying bulk noxious liquid substances or unassessed liquid substances.

3.13 Vessel's Certificate of Insurance or other Financial Security in respect of Civil Liability for Oil Pollution Damage (CLC) Certificate for vessel carrying in bulk a cargo of more than 2,000 tons of persistent oil.

4. The attention of the Shipping Community is drawn to the certificate, namely the Passenger Ship Safety Certificate, the Cargo Ship Safety Equipment Certificate, the Cargo Ship Safety Radio Certificate and the Cargo Ship Safety Certificate issued under the Provisions of the International Convention for the Safety of Life at Sea, 1974, as modified by the Protocol of 1988 Relating thereto shall be Supplemented by a Record of Equipment.

5. The vessel's certificates mentioned in Paragraphs 2 and 3 shall be originals, but in their absence, the Port Clearance Office is prepared to accept certified true copies authenticated by the appropriate Authorities.

6. The Shipping Community is further reminded that any vessel which fails to leave port within 48 hours, after obtaining the port clearance, shall within 6 hours after the expiry of the 48 hours, return the port clearance to the Port Clearance Office, and if so required, obtain a fresh port clearance for the vessel.

7. If you require any clarification, please call the Port Clearance Office at One Stop Document Centre (OSDC), Tanjong Pagar Complex, Tel: 3211423, 3211550 or 3211548.

8. This Port Marine Circular supersedes Port Circular No. 17 or 1987.

Port of Singapore Authority – Port Circular No. 87/87
Dated 30th October 1987.

TRACKING OF CHEMICAL CARRIERS.

1. For the purpose of this Port Circular, a chemical carrier means any vessel which is carrying or has previously carried as a whole or part of the last cargo in bulk any of those dangerous chemicals listed in Chapter 17 of the International Maritime Organisation's (IMO) International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (IBC Code).
Note: A vessel shall remain to be considered as a chemical carrier so long as any of her cargo tanks or cargo system is not completely cleared and removed of any such residual cargo.

2. Pursuant to Regulation 3 of the Singapore Port Regulations 1977, the Owner, Agent, Master or person-in-charge of a 'chemical carrier' as defined in paragraph 1 above, is hereby directed that with effect from 1st December 1987, he shall notify the Port Master as follows:
   (a) For an arriving vessel, the notification shall be given under paragraph 3 (1) of Port Circular No. 88 of 1987 (See "VHF"), entitled "Notification of Arrival and VHF Reporting Procedure", and in the manner as described in paragraph b (iv) below; or
   (b) For a vessel in port which intends to load any of those dangerous chemicals referred to in paragraph 1 above, the notification shall be given by Telex No. RS 34970 or by Facsimile No. 3212016. Such notification shall contain the following information in the format shown below:

TRACK CHEM

(i) Name of vessel.
(ii) Gross registered tonnage (g.r.t.).
(iii) Place of loading e.g. GATX Terminal Berth.
(iv) Indicate "Chemical (s) under IBC Code" – if vessel intends to load or has on board any of those dangerous chemicals listed in Chapter 17 of the IMO IBC Code; or
indicate "NA" if vessel does not have such cargoes or is not considered as a "chemical carrier". (See Note in paragraph 1.)

3. For your reference, we enclose the list of dangerous chemicals (13 pages in all)(Editor's note – not reproduced due to length of list), which appear in Chapter 17 of the IMO IBC Code (1986 Edition). You are advised to keep the list updated. If you have any queries on this subject, please call 3212295 or 3211185 or write to:

Port Master's Department,
No. 21-07 Tanjong Pagar Complex,
7B, Keppel Road,
Singapore 0208.
Telex: RS 34970.
Fax: 3212016.

TRACKING OF CHEMICAL CARRIERS

1. Owners, Agents or Masters of "Chemical Carriers" are reminded to comply with the procedures on the tracking of chemical carriers as mentioned in the Port Marine Circulars No. 87 of 1987 (See above) and No. 6 of 1990.

2. The above mentioned Port Marine Circulars have explained the requirements for the Owner, Agent or Master of a "Chemical Carrier" to notify the Port Master in the following ways:
   (a) Tracking of an Arriving Chemical Carrier:
   The notification of arrival is to be sent by radio telegram, telex, telefax or Portnet. The format must be in accordance to that given in Port Marine Circulars No. 6 of 1990 and No. 21 of 1992. For vessels carrying any chemical listed in Chapter 17 of the International Maritime Organisation's (IMO) International Code for the Construction and Equipment of Ships carrying Dangerous Chemicals in Bulk (IBC Code), the name(s) of the chemical(s) must be indicated in Item (N) of the notification of arrival. If the notification of arrival is sent by Portnet, the information is to be provided in the "Remarks" column.
   (b) Tracking of a Chemical Carrier in Port:
   If a vessel intends to load or has on board any chemical listed in Chapter 17 of the IMO IBC Code in the port waters, the Port Master must be informed of *each movement* by *telex or telefax* (and not by other means, e.g. telephone). The format of notification as given in Port Marine Circular No. 87 of 1987 should be used.

3. Compulsory Pilotage for Chemical Carriers:
Compulsory pilotage is required for a vessel, including those below 2,000 g.r.t., which has on board or has loaded chemical(s) as listed in Chapter 17 of the IMO IBC Code. The Port Master must also be provided with the information in the prescribed format.

4. Pilotage Exemption for Chemical Carriers below 2,000 g.r.t.:
When a vessel does not carry any chemical listed in Chapter 17 of the IMO IBC Code or is cleaned of such residual cargo when she calls at or while in the port, the Master should inform the Port Operations Control Centre by VHF of the vessel's status and request for pilotage exemption for the intended movements.

Source: PMC 2/1993.

Port of Singapore Authority – Port Circular No. 105/87.
Dated 19th November 1987.

HEIGHT RESTRICTED AREA OFF CHANGI/BEDOK

1. Pursuant to Section 67 (c) of the Port of Singapore Authority Act (Ca 236), 1985, the Port Master hereby directs that with immediate effect no vessel whose height measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structur or equipment on board, exceeds 15.0 m. shall enter, transit or ancho in the sea off Changi/Bedok Area.

2. The area referred to above is bounded by the following co-ordinates

	Latitude	*Longitude*	*Buoy*
From a position at	01° 18.433' N.	103° 56.433' E.	
to a position at	01° 17.500' N.	103° 59.083' E.	'Padang'
to a position at	01° 17.650' N.	104° 01.200' E.	'Airway'
to a position at	01° 21.100' N.	104° 03.117' E.	'Angler'
to a position at	01° 23.200' N.	104° 00.400' E.	
to a position at	01° 23.350' N.	104° 00.050' E.	

thence along the coastline to the point of origin.

Port of Singapore Authority – Port Circular No. 9 of 1991.

TALL VESSELS' MOVEMENTS SOUTH OF CHANGI AIRPORT

1. This is a repetition of Port Circular No. 116 of 1987 with amendmen shown by a line in the margin (Not shown). Port Circular No. 116 1987 is hereby cancelled.

2. The Civil Aviation Authority of Singapore (CAAS) has requested th Shipyard Operators and Masters, Owners or Agents of vessels wi heights exceeding 100 m. intending to conduct intra-port movemen (within port limits) which require to transit, leave or move betwe Longitude (A) 103° 54' E. and Longitude (B) 104° 05' E., South a East of Changi Airport, to notify CAAS at least 3 working days advance of such movements (See "Plan"). This is to allow CAAS issue a NOTAM (Notice to Airmen) in order to keep aircraft pil informed of such tall vessels' movements. The following procedu will come into effect on 1st May 1987.

3. *Prior to Movement*
   (a) When notifying CAAS as requested above, the follow information is to be provided:
      (i) Vessel's Registered Name/Call Sign.
      (ii) Height of Vessel above waterline.
      (iii) Intended Route/Timings (with drawings of routes if possible).
      (iv) Point of Origin/Final Destination.
      (v) Estimated Date/Time of Crossing Longitudes 103° 54' E. and 104° 05' E.
      (vi) Radio Telephone Number.

(b) The information should be sent by mail, telex or telefax to the following:

Air Navigation Services
Operations Division,
Civil Aviation Authority of Singapore,
P.O.Box 1, Singapore Changi Airport
Singapore 9181.
Telex: RS 21231 AVIATEL.
Fax: 5456516.

4. For clarification or urgent cases, please contact:

(a)	Office Hours	Air Navigation Services Operations Division, CAAS. Tel: 5412434.
(b)	Outside Office Hours	Supervisor, Changi Control Tower, CAAS. Tel: 5412416 or 5412417.

5. *On Passage*

(a) Masters of vessels with heights exceeding 100 m. above waterline intending to enter, transit or leave the area defined in Paragraph 2 of this circular are also required to report to Sembawang Control on VHF Channel 21 when passing the longitudes "A" or "B" mentioned above, or when entering or leaving the Traffic Information Area of Serangoon Harbour.

(b) When entering the area, the report required to be made shall contain the following information:
- (i) Vessel's Registered Name/Call Sign.
- (ii) Height of Vessel above water line.
- (iii) Direction of Movement (Eastwards or Westwards).
- (iv) Actual time of crossing Longitudes "A" and estimated time of crossing Longitude "B" or vice versa;
  or*
  Actual time of crossing Longitudes "A" or "B" and estimated time of entering Traffic Information Area of Serangoon Harbour;
  or*
  Actual time of leaving Traffic Information Area of Serangoon Harbour and estimated time of crossing Longitude "A" or "B".
  (*whichever is applicable).

(c) When leaving the area, a second report shall be made containing the following information:
- (i) Vessel's Registered Name/Call Sign.
- (ii) Actual time of crossing Longitude "A" or "B" or entry into Traffic Information Area of Serangoon Harbour.

6. For the purpose of this circular, the height referred to shall be the height of the vessel measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structure or equipment on board.

7. In addition to the above reporting procedure, Shipyard Operators, Masters, Owners or Agents are reminded that every vessel of gross registered tonnage of 2,000 tons or above or of a height of more than 30 m. above her waterline are to comply with the Traffic Information System for vessels navigating in Serangoon Harbour stated in Port Circular No. 90 of 1987.

Port of Singapore Authority – Port Circular No. 18 and 109/88.
Dated 3rd March 1988.

HEIGHT RESTRICTION FOR VESSELS ENTERING, TRANSITING OR ANCHORING IN THE EASTERN SPECIAL PURPOSES "A" AND THE EASTERN PETROLEUM "B" AND "C" ANCHORAGES.

1. Pursuant to Section 67 (c) of the Port of Singapore Authority Act (Cap 236), 1985, the Port Master hereby directs that no vessel whose height, measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structure or equipment on board, exceeds 49 m. shall enter, transit or anchor in the height restricted area in the Eastern Special Purposes "A" and the Eastern Petroleum "B" and "C" Anchorages. (See "Plan").

2. The height restricted area referred to above is bounded by the following co-ordinates:

	Latitude	*Longitude*	*Buoy*
From a position at	01° 18.300' N.	103° 56.617' E.	
to a position at	01° 18.300' N.	103° 56.750' E.	
to a position at	01° 17.500' N.	103° 59.083' E.	'Padang'
to a position at	01° 17.650' N.	104° 01.200' E.	'Airway'
to a position at	01° 16.633' N.	103° 59.317' E.	
to a position at	01° 16.633' N.	103° 56.617' E.	

thence to the point of origin.

Maritime and Port Authority of Singapore – Port Marine Circular No. 6 of 1996.
Dated 19th March 1996.

VHF RADIO TELEPHONE REPORTING PROCEDURES FOR VESSEL MANOEUVRING IN PORT WITHIN THE EAST JOHOR STRAIT.

1. *Introduction*

1.1 This Circular comes into effect on 1st April 1996 and supersedes the following:
- (a) PSA Port Circular No. 90 of 1987.
- (b) PSA Port Circular No. 91 of 1987.
- (c) PSA Port Circular No. 99 of 1987.
- (d) PSA Port Marine Circular No. 9 of 1993.
- (e) MPA Port Marine Circular No. 5 of 1996.

1.2 The directives and requirements stipulated in this Circular are made pursuant to Section 43 and Section 45 of the Maritime and Port Authority of Singapore Act 1996.

2. *Definitions*
The following definitions are used only for the purpose of this Circular:
- (a) East Johor Strait (EJS) – the stretch of water contained within the geographical co-ordinates shown in Appendix 1 up to the Causeway in the Johor Strait.
- (b) Traffic Information Area (TIA) – the area contained within the geographical co-ordinates shown in Appendix 2.
- (c) Height – refers to the height declared by the vessel, measured vertically from the water line to the highest point of the vessel, including its cargo, structure or equipment on board. This height must be verifiable with the appropriate plans or documents carried on board the vessel.
- (d) Night-time – refer to the hours between 1900 hrs. to 0630 hrs.
- (e) Sembawang Control Station – the designated communication centre for EJS.

3. *Application*

3.1 This Circular shall apply to the following:
- (a) Vessel of 2,000 g.r.t. or more.
- (b) Vessel with height exceeding 30 m.
- (c) Tug(s) when engaged in towing or pushing, the combined g.r.t. of the tug(s) and tow(s) or vessel(s) being pushed is 2,000 g.r.t. or more; or when any of the tug(s) or tow(s) height exceeds 30 m.

4. *Sembawang Control Station*

4.1 Sembawang Control operates on VHF Channel 21. The reserve channel is VHF Channel 13. In the event that Channel 21 is inoperative, vessels shall check with Port Operations Control Centre on VHF Channel 18 for instructions.

4.2 All reports made to Sembawang Control Station shall be in English. Timings shall be reported in local time following the 24 hour clock system.

4.3 Every vessel when underway or at anchor in EJS shall maintain a continuous listening radiotelephone watch on VHF Channel 21.

5. *Night Towing*

5.1 Night towing operation is not permitted in the part of the East Johor Strait from the causeway to Angler Buoy (Lat. 01° 21.10' N., Long. 104° 03.12' E.).

6. *Speed*

6.1 The maximum speed for EJS shall not exceed 12 knots.
The maximum speed when passing the vicinity of Sembawang Shipyard, Malaysian Shipbuilding and Engineering Yard, Pasir Gudang Port and Changi Sailing Club (approximate position Lat. 01° 23.6' N., Long. 103° 58.8' E.) shall not exceed 6 knots. This is to prevent the passing vessel from creating high bow waves that could cause vessel or sailing craft to part from their moorings.

7. *Restriction in the Traffic Information Area (TIA)*

7.1 No vessel shall proceed South of the line joining CAAS Buoy 1 (Lat. 01° 23.55' N.,Long. 104° 00.04' E.) and CAAS Buoy 2 (Lat. 01° 23.68' N., Long. 103° 59.70' E.).

7.2 No vessel is permitted to stop or anchor within the TIA. If a vessel has to stop or anchor in an emergency situation, the vessel shall report to Sembawang Control without delay.

8. *Reporting Procedure*

8.1 Format of Report:

8.1.1 Every vessel shall make the following report to and obtain clearance from Sembawang Control before entering or manoeuvring within the East Johor Strait. The report shall contain the following information:
- (a) Name of vessel.
- (b) Call sign.
- (c) Present location.
- (d) Destination, i.e. the location in the port or bound for sea.
- (e) Draft.
- (f) Height.
- (g) Remarks, if any, i.e. any other relevant information on the vessel which would affect its navigation.
- (h) The estimated time of arrival (ETA) at the following locations:
  (i) The line joining Tanjong Todak (Lat. 01° 25.45' N., Long. 104° 01.22' E.) and the point N.E. of Pulau Ubin (Lat. 01° 25.00' N., Long. 103° 59.57' E.) or Long. 103° 59.63' E. which extends Northwards off the Eastern end of Pulau Ubin.
  (ii) Malang Tiga Buoy (Lat. 01° 23.15' N., Long. 104° 01.55' E.) is abeam.
  (iii) Paku Buoy (Lat. 01° 23.54' N., Long. 104° 00.25' E.) is abeam.
  (iv) Malang Papan Beacon (Lat. 01° 24.12' N., Long. 103° 59.45' E.) is abeam.
  (v) Seletar Buoy (Lat. 01° 26.53' N., Long. 103° 52.7' E.) is abeam.
  Note: The various ETA's, referred to in Paragraph (h), are used for the co-ordination of aircraft traffic. It is important that such ETA's are accurate. The locations of the reporting points are given in Appendix 2.

8.2 Updating and Confirmation of ETA:

8.2.1 The vessel shall update and confirm the declared ETA's referred to in Paragraph 8.1.1(h) to Sembawang Control when passing the following locations:
- (a) For Northbound or Westbound vessel, when Angler Buoy (Lat. 01° 21.10' N., Long. 104° 03.12' E.) is abeam.
- (b) For Eastbound vessel, when Punggol Beacon (Lat. 01° 25.32' N., Long. 103° 54.80' E.) and again when Squance Buoy (Lat. 01° 23.72' N., Long. 103° 58.00' E.) are abeam.
- (c) For Eastbound vessel entering the TIA via Nenas Channel shall confirm or update the ETA referred to in this paragraph before entering Nenas Channel.

(d) For Southbound vessel from Sungai Johor (Lat. 01° 27.00' N., Long. 104° 01.20' E.) when the vessel is underway.

8.3 Changes to ETA:

8.3.1 The vessel shall monitor the declared ETA's referred to in Paragraph 8.1.1(h) and immediately report to Sembawang Control if:

(a) The declared ETA for Malang Tiga Buoy, Paku Buoy, Malang Papan Beacon, Tanjong Todak or North of Pulay Ubin differs by 5 minutes from the last declared ETA.

(b) The declared ETA for Seletar Buoy differs by 15 minutes from the last declared ETA.

9. For clarification on this Circular, please contact the Duty Officer of Sembawang Control Station at Tel: 5427114, Fax: 5422844.

For Port Master
Port Master's Department.

Appendix 1:
The East Johor Strait is the stretch of water contained within the following geographical co-ordinates up to the Causeway in the Johor Strait (the numbers in brackets providing positional references).

		Latitude	*Longitude*	
From Point	(1)	01° 20.55' N.	104° 59.80' E.	
	(2)	01° 20.00' N.	104° 02.80' E.	
	(3)	01° 20.00' N.	104° 03.17' E.	
	(4)	01° 19.55' N.	104° 03.67' E.	
	(5)	01° 18.75' N.	104° 04.40' E.	
	(6)	01° 18.30' N.	104° 05.63' E.	
	(7)	01° 19.30' N.	104° 06.79' E.	
	(8)	01° 27.19' N.	104° 46.27' E	(Northern point of Causeway)
	(9)	01° 26.93' N.	104° 46.35' E.	(Southern point of Causeway)

thence along the coastline to the point of origin.

Appendix 2:
The Traffic Information Area is bounded by the following geographical co-ordinates (the numbers in brackets providing positional references):

		Latitude	*Longitude*	
From Point	(1)	01° 25.32' N.	103° 54.80' E.	(Punggol Beacon)
	(2)	01° 24.22' N.	103° 55.95' E.	
	(3)	01° 22.98' N.	103° 58.02' E.	(Loyang Beacon)
	(4)	01° 23.52' N.	103° 58.45' E.	(Fairy Beacon)
	(5)	01° 23.72' N.	103° 59.53' E.	(Changi Buoy)
	(6)	01° 23.20' N.	104° 00.40' E.	
	(7)	01° 21.10' N.	104° 03.12' E.	(Angler Buoy)
	(8)	01° 21.40' N.	104° 04.05' E	
	(9)	01° 23.15' N.	104° 01.55' E.	(Malang Tiga)
	(10)	01° 25.10' N.	104° 01.13' E.	
	(11)	01° 25.45' N.	104° 01.22' E.	(Tg. Todak)
	(12)	01° 25.00' N.	103° 59.57' E.	
	(13)	01° 24.50' N.	103° 59.60' E.	(Chek Jawa Beacon)
	(14)	01° 23.90' N.	103° 57.97' E.	
	(15)	01° 23.90' N.	103° 57.37' E.	
	(16)	01° 24.60' N.	103° 56.45' E.	
	(17)	01° 25.35' N.	103° 55.67' E	(Tajam Beacon)

thence to the point of origin.

Maritime and Port Authority of Singapore – Port Marine Circular No. 15 of 1996.
Dated 1st July 1996.

MARINE COMMUNICATION IN PORT

1. This Port Marine Circular is in 2 parts.

Part A	Communication Channels for the Maritime Port Authority, Port Health, Immigration Department and Police Coast Guard.
Part B	Communication Channels for Pilotage, Towage, Water Boats, Oil Terminals and Public Correspondence.

Changes to VHF Channels:

2. The following changes shall take effect on 15th July 1996 at 0001 hrs.
3. Port Operations Control (POC) will operate on VHF Channel 88 (Simplex), with VHF Channel 18 (Duplex) as the back-up. With the use of Simplex Channel, all vessels will be able to monitor the communications between a vessel with POC or another vessel.
4. POC will maintain watch over VHF Channel 68 and VHF Channel 18 (back-up channel).
5. Keppel Control which regulates the control of navigation in Keppel Harbour will operate on VHF Channel 18 (previously VHF Channel 68), with VHF Channel 61 (no change) as the back-up.
6. This Port Marine Circular supersedes Port of Singapore Authority, Port Marine Circular No. 27 of 1995.

Port Master
Port Master's Department
Tel: 321-1763. Fax: 224-5776.

PART A: Communication channels for the Maritime Port Authority, Port Health, Immigration Department and Police Coast Guard.

(A) CONTROL OF NAVIGATION:

Call: Port Operations. Tel: (65) 2233631, (65) 2233633. Telefax: (65) 2245776 addressed to "Port Master". Telex: RS 34970 PORTPM.

Stations	*VHF* Ch.	*Frequency* (MHz)		*Usage*
Timor Control	12	156.600	156.600	For arrival and departure reports in the Timor Sector.
Keppel Control	18	156.900	161.500	Request for clearance by vessels to berth/unberth at Keppel Harbour Terminals. Request for clearance for piloted vessels to berth/unberth at Keppel Harbour Terminals. Back-up Channel: 61.
Cruise Bay Control	05	156.250	160.850	For arrival and departure reports in the Cruise Bay Sector.
Port Operations Control	68	156.425	156.425	Reporting by vessels when *underway*. Request for port traffic information. Back-up Channel: 18.
VTIS East	10	156.500	156.500	Reporting confirmation of arrival by vessels to VTIS in area East of Long. 103° 51.2' E. Provision of traffic information in Singapore Strait.
VTIS West	73	156.675	156.675	Reporting confirmation of arrival by vessels to VTIS in area West of Long. 103° 51.2' E. Provision of traffic information in Singapore Strait.

Call: Sembawang Control. Tel: (65) 5427112, (65) 5427113. Telefax: (65) 5422844.

VHF Channel	*Frequency* (MHz)		*Usage*
21	157.050	161.650	For reporting in the East Johor Strait Sector (refer PMC No. 6 of 1996). Back-up Channel 13.

Call: Jurong Control. Tel: (65) 2650246, (65) 2650493. Telefax: (65) 2613749.

VHF Channel	*Frequency* (MHz)		*Usage*
22	157.100	161.700	For arrival and departure reports in the Jurong Sector.

(B) REGULATORY CHANNELS FOR SAFETY AND EMERGENCIES

VHF Radiotelephone Channels for Safety and Emergencies in Port:

Location	*VHF* Ch.	*Frequency* (MHz)		*Usage*
Enforcement	07	156.350	160.950	Co-ordinating marine emergencies in Port waters.
Police Coast Guard	07	156.350	160.950	Request for assistance from Police Coast Guard.
Hydrographic Department	13	156.650	156.650	Navigation aids and hydrographic survey activities.
Environment Control	13	156.650	156.650	Pollution control. Back-up to Channel 21.
	06	156.300	156.300	Ship-to-ship communications.

(C) REGULATORY CHANNELS FOR IMMIGRATION/PORT HEALTH CLEARANCE.

VHF Radiotelephone Channel for Immigration/Port Health Clearance:
Call: Immigration Office. Tel: 2730527. Time: 24 hours.
Call: Port Health. Tel: 2226924, 2222585. Time: 24 hours.

Location	*VHF* Ch.	*Frequency* (MHz)		*Usage*
Western Quarantine and Immigration Anchorage	14	156.700	156.700	Request for Port Health or Immigration Clearance.

PART B: Communication Channels for Pilotage, Towage, Water Boats Oil Terminal and Public Correspondence.

(A) PILOTAGE, TOWAGE AND WATER:

Call: Singapore Pilots. Tel: 3211761 (Pilotage Bookings), 32117 (Pilotage Bookings), 3211765 (Pilotage Bookings), 3211186 (Tu Enquiries/Orders). Telefax: 3212016. Telex: RS 23333 SINPIL.

Stations	*VHF* Ch.	*Frequency* (MHz)		*Usage*
Singapore Pilots	20	157.000	161.600	Request for pilotage services a enquiries.
Berth, Tugs and Water Boats	61	156.075	160.675	Request for water boats, tugs services and berthing enquiries for Tanjong Pagar, Keppel, Bra Pasir Panjang and Jurong Terminals.

(B) OIL TERMINALS:

VHF Radiotelephone Channels for Oil Terminals in Port:

Terminals	*VHF* Ch.	*Frequency* (MHz)		*Usage*
Bukom Operations	19	156.950	161.550	Request of information for vess berthing/unberthing at Pulau Bukom and Shell SBM.
Pulau Ayer Chawan Operations	05	156.250	160.850	Request of information for vess berthing/unberthing at Pulau A Chawan and Esso SBM.
Singapore Refinery Centre	05	156.250	156.250	Request of information for vess berthing/unberthing at Pulau Merlimau and PSA SPM.

(C) PUBLIC CORRESPONDENCE:
VHF Radiotelephone Channels for Singapore Radio:

Stations	*VHF* Ch.	*Frequency* (MHz)		*Usage*
Singapore Radio	16	156.800	156.800	Distress, safety calling channel.
	23	157.150	161.750	Public correspondence via Singapore Telecom Exchange.
	24	157.200	161.800	Same as above.
	25	157.250	161.850	Same as above.
	26	157.300	161.900	Same as above.
	27	157.350	161.950	Same as above.
	28	157.400	162.000	Same as above.

PIRACY: Despite strong efforts by some local governments and authorities in the area, piracy continues.

Please see three separate reports below.

1. A 68,000 d.w.t. bulk carrier was attacked on 1st July 1990 at a position 14 miles off Mangaki Island whilst on passage through the Strait.

   The assault took place at 0100 hrs. local time and the four pirates armed with guns and knives left the ship after having spent more than 20 minutes on board holding the Master and senior officers at gunpoint.

   The pirates stole money and personal belongings but fortunately no one was harmed.

   The Master, prior to approaching the Strait, had taken precautions to prevent pirates from entering the accommodation by locking all doors. The pirates, however, were able to open the doors with skeleton keys.

   The pirates approached the ship from the stern in a small wooden speedboat but were not observed by the officer on duty on the bridge.
2. An owner has reported that a vessel was attacked by pirates while passing the Phillip Channel. The ship had reduced speed due to dense fog.

   The lookout on the poop was overpowered, tied up and taken to the bridge, where the officer on duty was also overpowered. The 5 pirates, armed with knives and swords, forced the Master to open the ship's safe. After tying up the Master and the two other crew members, the pirates abandoned the ship taking money and personal belongings.

   The Singapore Marine Police were informed and boarded the vessel to investigate.
3. After a few days on Singapore Roads for repair, a bulk carrier of 42,000 d.w.t. left Singapore on 18th October 1990 at 0030 hrs. en route from Australia to the Gulf. Shortly after departure at a position Lat. 1° 08.3' N., Long. 103° 43.6' E., four armed pirates boarded the ship via the poopdeck from a small motorboat. The Master, on the way from the bridge to his office, was overpowered by the pirates and was forced to open the ship's safe. The pirates got away with a substantial amount of cash and private belongings, such as watches, cameras, etc.

GENERAL: Master of any vessel in territorial waters of Singapore shall obey any signal from a preventive vessel and any instruction from Officers of Customs. Customs Officers shall have free access to any part of vessel and have powers to mark, lock or seal any dutiable goods on import including sea stores.

SHIPMASTER'S REPORT: September 1983.

Ballast: Slop reception barges cannot receive slops at more than about 250 t.p.h. Message should be sent to Port Master 1 day before arrival with ETA and height above water and same information repeated to Port Operations Channel 12 three hours before arrival.

RADIO OFFICER'S REPORT: September 1990.

Documents:

Agent:

2 copies Crew List.

1 copy Stores List.

Pre-Arrival Clearance possible. If coming from Australia, fax Crew List from last port.

Pilot: Pilot requires one copy of vessel's Check List for piloted movements.

Customs: Customs will only attend if coming from an Indonesian port (check for drugs).

Customs Allowances: 200 cigarettes or 250 gm. of tobacco, 7 bottles of wine, 1 bottle of spirits and 1 case of beer.

Shore Passes: Passport is sufficient.

SHIPMASTER'S REPORT: May 1991.

Pilot: Pilot outward has to be booked by Agent, 4 hours in advance. If vessel is then delayed, advise Port Control, either before pilot boards, or advise pilot when he boards. If the sailing delay is more than 30 minutes, the pilot will have to be re-ordered, which means another 4 hours.

Immigration: Indian nationals may not sign-off outside harbour limits, unless they have a visa. Indian nationals leaving a vessel inside harbour limits may be permitted to stay up to 3 days after the vessel has departed, but their flights must be confirmed before they sign-off.

Customs: The old United Kingdom style, of having to declare the length of the vessel's next intended voyage, and the number of persons on board before purchasing bonded items, i.e. cigarettes and liquor, has been rescinded. Vessels may now purchase unlimited quantities of bonded items.

AUTHORITY: Port of Singapore Authority, PSA Building, 460 Alexandra Road, Singapore 0511. Postal Address: P.O.Box 300, PSA Building Post Office, Singapore 9111, Republic of Singapore. *Tel:* (65) 2747111. *Telex:* RS 21507. *FAX:* 2744677. *Cables:* "Tanjong" Singapore. *Contact:* Port Master's Department, Tanjong Pagar Complex. Tel: 3211168. Telex: RS 34124. Fax: 3211549.

AGENT: Jardine Shipping Agencies, 1 Maritime Square, No. 10-40 World Trade Centre (Lobby D), Singapore 099253. Tel: 65-2752788 (24 hours answering service, No. 7318909). Telex: 24179 Jarship. Fax: 65-2752733. Cables: "Jarship".

NOTES

Please also advise Shipping Guides Ltd.

Slovenia

KOPER: 45.31 N. 13.44 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port are between "Debeli Rtic" (Punta Grossa) and Rt. Vilizan.

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
3 Cargo Manifests.
1 Freighted Manifest.
3 Bills of Lading.
1 Stores List.
1 Crew Effects List.
1 Derat Declaration.
1 Health Certificate.

PILOTAGE: Pilot station may be contacted on VHF Channel 8 throughout 24 hours. Pilot boards 1 mile from entrance in roads or at anchorage. Definite notice to be sent by telex 24 hours before vessel's arrival in port area through its Agent in Koper.

Fairway Buoy: Lat. 45° 33.9' N., Long. 13° 42.3' E. Light – WFL 10 sec. 6 M.

ANCHORAGES: Port area, depth 17 m. – 19 m., sandy bottom. Safe anchorages in case of S.E. wind near Rt. Vilizan and in case of N.E. wind near Debeli Rt. (Punta Grossa).

RESTRICTIONS: Vessels enter port by day and night (also tankers).

No entry for oil and chemical tankers when visibility less than 400 m. and wind over Force 4.

Entrance in Basin No. 3 (coal-ore terminal) only during daylight hours.

No length restrictions.

MAX. SIZE: General cargo berths: Draft 10.9 m. (32 ft.) to 13.0 m. (39 ft.).

Terminal for coal and ore: Draft 17.0 m. (51 ft.).
Silo berth: Draft 12.5 m. (37 ft.).
Container berths: Draft 11.2 m. (33 ft.).

HEALTH: Ship must have Health Declaration and in this case Pratique is automatic. In the event of any suspected disease or fever on board, Master must advise Harbour Master or Agent by VHF Channel 16 or by telegraph. Harbour Master's Office on VHF Channel 16 continuously.

VHF: Communication on Koper Roads on Channel 16. Channel 8 for mooring/unmooring and for Pilots.

RADAR: Service available on Master's request.

TUGS: 2 tugs available (1,920 h.p. and 4,000 h.p.). If additional tugs are required, they can be ordered. Minimum number of tugs required for berthing and unberthing depends on the agreement with the Pilots (considering the Harbour Master's Regulations).

BERTHING:

Terminal for General Cargo: Quays 833 m., max. draft from 7 m. to 13 m. Number of Berths 6. Roofed warehouses 153,600 sq.m., of which: air-conditioned warehouses, with a possibility of moisture and temperature regulation from 0°C to 20°C, 9,390 sq.m. Refrigerated rooms (freezing to −20°C) 1,863 cu.m. Special warehouses for cotton and hides 39,600 sq.m. 2 shore cranes, 1×20/40 ton mobile crane, 1×35 ton mobile crane, 1×50 ton mobile crane, 61 forklifts, 16 towing units. Terminal capacity 750,000 tons annually. Within the frame of the terminal are stables for livestock (capacity 1,200 head of cattle).

Terminal for Timber: Quays 250 m., max. draft 6.7 m. – 9.5 m. Number of berths 2. Terminal area 25 ha., sheltered storage area 50,000 sq.m., 2 shore cranes, 21 forklifts, 21 towing units, 3 loaders, 5 tractors, 2 lines for binding and edging of timber packages, 1 line for winding and packing timber. Terminal capacity 600,000 cu.m. annually.

Terminal for Container and Roll-on/Roll-off Traffic: Quays 500 m., max. draft 11.2 m. 3 berths for container vessels, 3 Ro/Ro ramps. Terminal area 25 ha. Closed warehouses 10,800 sq.m. Railway tracks 2×671 m. 118 electric connections for reefer containers. 3 container cranes
(450/500 kN). 2 reach stackers. 4 transtainers. 12 forklifts. 12 towing units. Terminal capacity 150,000 TEU annually.

BULK HANDLING FACILITIES:

Capacities for ores, coal and coke: (Max. granulate size 200 mm.) Length of quay 200 m., max. draft at the quay 17 m. Number of berths 1, open storage 300,000 tons, 2×20 tons capacity shore cranes (at outreach 36 m.) and a bridge crane (32 tons capacity). Yearly throughput of the terminal 1.5 million tons. Unloading capacity on the quay 1,500 t.p.h. Loading capacity from the ship or from depot 6,000 tons/day. Possibility of berthing vessels up to 160,000 d.w.t. Daily despatch per railway 6,000 tons.

Capacities for phosphates, fertilisers, alumina, soyabean meal in pellets and bauxite: Length of quay 273 m., max. draft at the quay 13.0 m. Number of berths – 1, sheltered warehouse 50,000 tons for soya, 6,000 tons for fertilisers, 13,000 tons for other bulk cargo, 2×20 tons capacity shore cranes (15 tons at 24.0 m.). Silo of 20,000 tons for alumina with special unloader (rate 250 t.p.h.). The quay is connected to the warehouse with a closed conveyor system.

Capacities for cereals and oilseeds/silo: Length of quay 200 m., max. draft at the quay 12.5 m. Number of berths – 1, storage capacity 60,000 tons. Discharging/loading capacity for vessels 500 t.p.h., discharging/loading capacity for wagons 500 t.p.h.

Capacities for other bulk cargoes: Length of quay 250 m. Depth at the quay 6.7 m. – 9.5 m. Number of berths 2, open storage area 12,000 tons, 2×20 ton capacity shore cranes.

Capacities for liquid cargoes: Chemicals 12,350 cu.m., phosphoric acid 7,500 cu.m., length of quay 170 m., max. draft 10.2 m.

Vegetable oil 20,604 cu.m., palm oil 4,710 cu.m. Length of quay 200 m., max. draft 12.5 m.

Wine 2,930 cu.m., latex 1,320 cu.m. Length of quay 165 m., max. draft 10.9 m.

Berth for tankers: Depth 10.9 m.

BRIDGES: None.

STEVEDORES: Gangs ordered from "Luka Koper" who are stevedores by Agents and forwarding Agents in Koper.

MEDICAL: Medical assistance and hospital available.

TANKERS: Tanker berth for crude oil with max. draft 32 ft. (10.9 m.) equipped with 2×10 in. and 1×12 in. arms.

DENSITY: 1025; in Basin II 1015 to 1025, depending on place, season and weather.

FRESH WATER: Available from any pier. Rate of delivery about 15 t.p.h.

FUEL: Available from Trieste (Italy).

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Italy. All others in Ljubljana.

REPAIRS: Small repairs can be carried out at Koper. In Izola, 2 miles from Koper, is wharf "2nd October". The repair service for containers is in the Port.

DRY DOCKS: In Izola for vessels up to 18,000 d.w.t. (160 m.×22 m.)

SURVEYORS: 1. Adria Control, DDD, Contrade, Inspect, ASA, EMS, Jadroinspect, Agroinspect, SGS Slovenia, Marine, ZZZV – Center DDD. 2. Croatian Register Shipping (Hrvatski Register Brodova), Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: Available at ship's request.

OPENING/CLOSING HATCHES: If not performed by crew, then by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and 1 bottle of spirits per week and reasonable quantity of wine per man per day.

REPATRIATION: By bus, by railway from Koper or by air from the airports.

AIRPORT: Ljubljana (Brnik) – 120 km. Rijeka – 100 km. Pula – 100 km. Ronchi (Italy) – 80 km.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer (Late March to late September).

HOLIDAYS: New Year's Days (1st, 2nd January), Slovene Cultural Holiday (8th February), 27th April, May Days (1st and 2nd May), State Holiday (25th June), Assumption (15th August), Reformation Day (31st October), 1st November, 25th December, Independence Day (26th December).

POLICE/AMBULANCE/FIRE: Police No. 92, Ambulance No. 94, Fire No. 93.

TELEPHONES: Available on Master's request.

SHIP SUPPLY SERVICE: "Olmar Ship Supply", Port Zone. Tel: 22655 Fax: 32896. General ship supply, duty free shop, laundry service, boat service available on request, international telephone service. "Katama Koper". Tel: 25650. Fax: 25994.

SHORE LEAVE: Allowed after clearing inwards (Free Pratique).

IDENTIFICATION CARDS: Shore pass issued by local police (without photograph).

GARBAGE DISPOSAL: Garbage collection service is available each day from 0700 hrs. to 1500 hrs. and is compulsory. Special plastic bags are provided on board each day. Charges depend on vessel's tonnage and are from U.S.$ 35 to U.S.$ 65 for each collection. Contact Tel: 32670/33031. Fax: 33592.

WASTE OIL DISPOSAL: Waste oil is collected by a boat with capacity of 15 – 20 cu.m. In case of larger quantities a tanker-barge can be provided. Collection can be done on all berths in the Port of Koper. Contact Tel: 32670. Actual price is U.S.$ 100/tonne in port and U.S.$120 tonne at anchorage.

SEAMAN'S CLUBS: Duty free shop, international telephone service money exchange, church service, football matches, mini-bus collection postage facilities, games available at the clubs; "Olmar Ship Supply" Port Zone. Tel: 22655. Fax: 32986.

CURRENCY: Slovene Tolar. U.S.$ 1.00 = 130 SIT (March 1996).

DEVELOPMENTS: Bulk Terminal (enlargement). Construction o warehouses for general cargo, construction of the new terminal fo livestock; depth of the all Basin III to 18.0 m. Construction of the ne multi-modal terminal.

Society Islands

BORA BORA (Vaitape): 16.31 S. 151.45 W.

DOCUMENTS: All vessels arriving in French Polynesia must first call for clearance at Papeete, pilotage is compulsory. See "Papeete" for documents required.
PILOTAGE: There is no pilotage station at Bora Bora; a Pilot will be provided at Papeete. Vessels are requested to advise their Agents at least 15 days before arrival of their ETA, length and draft of ship. In addition, Masters should confirm their ETA to the Port Captain of Papeete at least 3 days before arrival. Telegraphic address is Capitaine de Port, Papeete.
ANCHORAGES: Vessels may anchor in the port roads in depths of 34 m. – 21 m. Good holding ground in sand and coral.
RESTRICTIONS: Night pilotage is practicable, weather permitting. There are 2 buoys at the entrance and a light beacon.
MAX. SIZE: Length 220 m., beam 30 m., draft 9 m.
HEALTH: Vessel should ask for Free Pratique by radio message to Sante Maritime Papeete, via coast station Mahina. This message to be sent 24 hours before arrival. Alternatively Free Pratique can be accorded by the Pilot.
RADIO: Mahina Radio, call sign FJA, operating 24 hours a day on 500, 2182 and 8279 kHz.
TUGS: No tugs available at Bora Bora.
BERTHING: One quay, (Quai de Farepiti) 132 m. length, situated in Faanui Bay. Depth alongside 7.30 m. Only used by small warships, coasters and yachts. One other quay (Quai de Vaitape) 40 m. long and with depth alongside 4 m. Situated at Vaitape. Used by barges.
MEDICAL: Doctor available and there is a local infirmary.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: No restrictions for crew members, but all tobacco and alcohol must be declared. Crew men going ashore may not take more than 2 packets of cigarettes.
AIRPORT: Situated 7 km. from Vaitape, only inter-island services.
TIME: GMT minus 10 hours. No change during the year.
HOLIDAYS: See "Papeete".
SHORE LEAVE: Allowed.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Franc Pacifique (FCP).
AUTHORITY: Port Autonome de Papeete, B.P. 9164, Papeete, Tahiti, French Polynesia. *Tel:* (689) 505454. *FAX:* (689) 433612.
Contact: Edgar Blouin, Harbour Master.

PAPEETE: 17.33 S. 149.34 W. (See Plan)

DOCUMENTS:
Required by Port Health:
Maritime Declaration of Health (form provided by the Pilot).
Required by Immigration (1 copy of each):
Crew List.
Lists of Passengers Disembarking.
Lists of Passengers in Transit.
Required by Customs (2 copies of each):
Manifest of Cargo for Discharge.
Provisions List.
Mail List.
Crew Personal Effect List.
Bonded Stores List.
Ship's Spares List.
Crew List.
List of Passengers Disembarking.
List of Passengers in Transit.
List of Animals to be Unloaded.
List of Animals in Transit.
List of Plants.
Complete Cargo Manifest.
Required by Merchant Marine Authorities:
1 Declaration of Safe Rules on board ship (form supplied by Pilot).
Required by Port Captain (1 copy of each):
Entry Declaration (form supplied on arrival).
Crew List.
List of Passengers Disembarking.
List of Passengers Embarking.
List of Passengers In Transit.
List of Cargo to be Loaded, Unloaded or Transhipped.
Dangerous Cargo: If carrying dangerous cargo for Papeete (or in-transit) send cable to Port Captain prior to arrival.
On arrival give list of dangerous cargo to Pilot.

APPROACHES: The entrance channel is marked by occulting green range lights mounted on red and white striped towers which are aligned 149° T. This range is normally visible at approximately 11 miles, although sometimes obscured by floodlights from the nearby public swimming pool.

The barrier reef on the East side of the pass can easily be seen.

Entrance to the harbour, through the barrier to the East, and shoal water to the West, is marked by lighted buoys, during bad weather there is often a heavy sea on the shoals (5 m. deep).

In the pass itself, the current generally sets outward. When Northeasterly winds are particularly strong, the water level in the lagoon can rise considerably. Northwest or Westnorthwest setting currents may attain strengths of up to 5 knots, creating dangerous, if not impossible navigating conditions for small craft. No warning signals concerning permission to enter or leave the pass exist.

In case of doubt regarding tidal conditions in the pass, contact can be established with the Harbour Master's Office on VHF Channel 12, or HF, frequency 2638 kHz.

Interior reefs are marked. Passage once into the harbour is marked by a pair of occulting green range lights mounted on red and white towers. This range is aligned 087° T.

PILOTAGE: Compulsory. Vessels are requested to advise their Agents at least 3 days before arrival giving their ETA, length, width and max. draft of the ship; tonnage of cargo for discharge and breakdown by hold; dangerous articles and/or explosives on board and amount of fuel and water needed. In addition, Masters must give their ETA 24 hours before arrival to Capitainerie du Port, Papeete. Pilot station and pilot launches are equipped with VHF and must be contacted on Channel 12 when within 30 miles. Pilot launches have grey painted hull with a white band, with wheelhouse on the fore part. International code flag signals are used to call Pilot. Pilot boards about 1.5 miles from the entrance channel. There is no anchorage outside the port for ships awaiting a Pilot.

Pilotage available 24 hours.

ANCHORAGES: Vessels up to 170 m. length can anchor in the port roads in depths of 18 m. – 25 m. Good holding ground in mud.
RESTRICTIONS: Ships coming from a country infested by "Oryctes Rhinocerus Strategus" (coconut beetle) can be fumigated by the Department of Agriculture and can stay alongside at night. Advise agent 3 days prior to arrival if fumigation is required.
Entrance Channel: Width 110 m. Max. depth 11.30 m.
MAX. SIZE: Length 250 m., beam 32 m., draft 34 ft. The Q.E. II, length 294 m. entered and docked in 1985, 1988, 1989 and 1991.
HEALTH: Vessels with a doctor on board should ask for Free Pratique by radio to Sante Maritime Papeete, via Coast Station Mahina Radio. This message should be sent earliest 24 hours and latest 18 hours before arrival. Vessels having no doctor on board will be inspected in Papeete by the Maritime Public Health Service. All formalities concerning maritime sanitation regulations can be carried out at this time. Pratique is automatic for vessels coming from another Polynesian port. Also see "Restrictions".
RADIO: Mahina Radio, call sign FJA, operating 24 hours per day on 500, 2182, 8279 kHz, and on VHF Channel 16.

GMT 0118 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 0733 hrs. —	17040.8 kHz	FLA26	A1	W/T
GMT 0433 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 0503 hrs. —	17040.8 kHz	FJA26	A1	W/T
GMT 0903 hrs. —	4298 kHz	FJA41	A1	W/T
GMT 0933 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 1333 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 1733 hrs. —	4298 kHz	FJA41	A1	W/T
GMT 2018 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 2048 hrs. —	17040.8 kHz	FJA26	A1	W/T

Since 1st March 1992 ship stations should transmit/receive on the following frequencies:

Transmit	2182 kHz	Receive	2182 kHz
	2435 kHz		2620 kHz
	4110 kHz		4402 kHz
	8279 kHz		8803 kHz
	16372 kHz		17254 kHz

Local weather broadcasts are made in French language by Mahina Radio at the following local times:
1100 hrs. 8803 kHz and VHF Channels 26/27.
1200 hrs. 2620 kHz and VHF Channels 26/27.
2040 hrs. 8803 kHz and VHF Channels 26/27.
2100 hrs. 2620 kHz and VHF Channels 26/27.

VHF: The Port Captain's Office is equipped with VHF. Watches are kept on Channel 12 when a ship is expected. Vessels must contact Harbour Master's office one hour prior to arrival.
TUGS: Tugs join ships as soon as they are in the entrance channel. Generally, tow-lines are not required, as tugs push the vessels only. There are three tugs available up to 1,200 h.p. belonging to the Port Authority, and in addition, there are 4 naval tugs up to 750 h.p. which may assist if required.

Use of tugs is compulsory for vessels over 3,000 cu.m. The volume is calculated as follows: Length × Width × Maximum Draft.

BERTHING: Passenger Ship Quay: 233 m. length, 2 berths, depth alongside 9.5 m.
Cargo Quay: 450 m. length, depth alongside 10.50 m.
Fishing Boat Quay: 100 m. length, depth alongside 5.50 m.
STEVEDORES: Cargo information should be confirmed to the Agents with ETA 48 hours before arrival.
MEDICAL: Advance notice required if medical attendance needed on board. 2 hospitals available. Passengers disembarking must present a valid vaccination certificate.
TANKERS: One tanker berth, 105 m. long. Max. allowed draft 33 ft. Discharging hoses are: Mobil Oil 8 in., Total Oil 6 in.

One gas tanker berth, at Pont de Taunoa, accessible via Taunoa Channel. For vessels max. LOA 85 m., max. breadth 13.80 m., max. draft 6.0 m.

There is an additional tanker berth used by Mobil, Total and Shell with length 79 m. and permissible draft 34 ft. Berthing is not safe at the time of Northerly swell (November to March).

FRESH WATER: Available from pipelines on all quays. Loading rate is 50 t.p.h. at passenger and cargo quays and 30 t.p.h. at the tanker berth. It is recommended that water be sterilised for drinking.
FUEL: Three companies distribute bunker products: Tahiti Petroles (Total products), Mobil (Mobil products) and Shell.

Tahiti Petroles – Telex OLITAHI 304 FP. Service Mobil – Telex SERMOBIL 238 FP. Polypetroles et Shell – Telex Polyshell FP 400.

Refuelling with gasoline, diesel oil, marine diesel oil and light fuel is possible. Taxes may be waived on these products for foreign vessels.

A 700 ton barge operated by Mobil may be used by transit vessels for bunkering if notified 24 hours in advance.

CONSULS: The following countries maintain representatives at Papeete:

Austria
Belgium
Chile
Denmark
Finland
Italy
Korea
Netherlands
Norway
Sweden

REPAIRS: Woodwork, electrical and welding repairs can be effected.

SURVEYORS:
Classification Societies:
Bureau Veritas. Tel. 42.80.86.
Lloyd's Register. Tel. 42.63.93.
Surveyors:
Maurice Bourrat. Tel. 42.67.06.
Bernard Baudry. Tel. 43.04.47. Telex. 210 FP.

DRY DOCKS: There is 1 floating dock for vessels up to 3,500 tons which belongs to the Navy.

GANGWAY/DECK WATCHMEN: Services of shore watchmen are necessary.

OPENING/CLOSING HATCHES: Hatches opened and closed by crew if they are of mechanical type, otherwise the stevedores will perform this operation.

CUSTOMS ALLOWANCES No restrictions for crew members but all tobacco and alcohol must be declared. Crew members going ashore must not take more than two packets of cigarettes. Passengers disembarking may take 200 cigarettes or 50 cigars or 400 grammes of tobacco and one bottle of alcohol.

REPATRIATION: Can be effected.

AIRPORT: Tahiti — Faaa Airport is situated 6 km. from the port. Regular international flights.

TIME: GMT minus 10 hours. No alterations during the year.

HOLIDAYS: Stevedoring services are available on all work days in 3 mandatory shifts. Longshoremen do not work on the following days unless otherwise stated: 1st January, 5th March, Good Friday, 1st May, 14th July, 1st November, 24th December (after 1100 hrs.), 25th December and 31st December.

Work carried out on other holidays or "local legal holidays" is considered as overtime work and will be paid as such: Easter Monday, 8th May (VE day), Ascension Day, Whit Monday, 29th June (Fete de l'Autonomie Interne), 15th August (Assumption Day) and 11th November (Armistice Day).

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 2 96 74.

EMERGENCY CO-ORDINATION CENTRE: Contact Amiral Commandant la Zone Maritime. Telex: 269 FP. Tel: 42.55.30.

TELEPHONES: Can be installed on board vessels at all quays.

SERVICES: Provisions of all sorts (fresh, frozen, canned) may be bought in bulk from certain local merchants. It is possible to obtain duty-free cigarettes and alcohol. All heavy laundry can be done rapidly at several specialised cleaners.

BANKS: Banque de Polynesie, Branch of Societe Generale France, Telex: 230 Polybank FP, - B.P. 530, Papeete. (Joined to Credit Cards Visa system).

Banque de Tahiti, Branch of Bank of Hawaii, Honolulu. Branch of Credit Lyonnais, Paris. Telex: 237 FP - B.P. 1602, Papeete.

Banque Indosuez, Branch of Indosuez Paris, Telex: 232 FP and 244 PF - B.P. 120 Papeete.

STORING: Vessels can be stored by truck, which can proceed alongside the berth. Forklift trucks can be used. Special Customs Regulations in use.

SHIP SUPPLY SERVICE: The off-shore ship supply services are operated by the Pilot launches belonging to the Port Authority within 24 hours notice for ship-to-shore transport of personnel, essential stores and sick crew members.

SHORE LEAVE: Allowed without restriction.

GARBAGE DISPOSAL: Collection service available. Skips provided alongside. Contact Port Autonome, Tel: 43.60.60, Ext. 436/7 or ship's agent. Collection time arranged through ship's agent. Charge 5,730 FCP per tonne or cu.m.

WASTE OIL DISPOSAL: No collection service available.

SEAMAN'S CLUBS: None.

CURRENCY: Franc Pacifique (FCP).

AUTHORITY: Port Autonome de Papeete, B.P. 9164, Papeete, Tahiti, Polynesie Francaise. *Tel:* (689) 505454. *Cables:* Capitaine Port Papeete. *FAX:* (689) 433612. *Contact:* Edgar Blouin, Harbour Master.

APPROACHES: Approaches free from dangers provided vessels keep at least 2 cables off Point Cruz Beacon, identified by quick flashing red light. On foreshore in front of Shell Oil Storage Tanks is beacon with fixed green light, and above on Vavaya Ridge is white light flashing every 5 seconds from Tower on radio station building. When in line these 2 lights give correct approach to anchorage in 20 fathoms on, or East of, the line. Prevailing winds during S.E. monsoon season blow from N.E. direction sometimes reaching Force 4 to 5 in early afternoon. During N.W. monsoon season direction and force variable generally between North and West up to Force 4 and occasionally Force 5.
PILOTAGE: 24 hours' notice of ETA stating number of passengers, dangerous cargo, etc., to Harbour Master, Honiara, via Honiara Radio. Usual signals. Pilot boards from launch about 0.75 miles N.E. Pelope Shoal. Vessels normally berthed port side to. Pilot uses port gangway in calm weather.
ANCHORAGES: East of Port Main Leading Lights. Fl. white and fixed green, in about 20 fathoms; coral bottom.

Local boats are available for transporting crew from anchorage to the shore. The landing stage is at Joanna Jetty on the East side of the main pier at Point Cruz. Height above water level is 2 ft. at high tide and 4 ft. at low tide.
RESTRICTIONS: Berthing in daylight hours only – departure any time.
MAX. SIZE: New Wharf is 115 m. long and depth 9.14 m. Old Wharf, up to 200 ft. long and max. 13 ft. draft. Tankers, mooring at buoys, 600 ft. long and 27 ft. 6 in. draft.
HEALTH: Pratique can be obtained by radio. Cable Port Health. Suspect vessels should inform Health Authorities and Harbour Master by radio for doctor to board on arrival.

Cable to Quarantine Officer Honiara between 12 hours and 4 hours before arrival the following message: "Request Radio Pratique negative answers all health questions Maritime Declaration of Health. Master." Normally, the P & T Radio Officer may grant Pratique immediately whilst he is in radio contact with the ship. After arrival the Health Officer will check for rhinoceros beetle and will clear.
RADIO: Radio Honiara VQJ. Watch continuous. 6204 kHz, 2182 kHz, 500 kHz. GMT Schedule 0020 – 0030 transmits 11560 kHz, receives on 8 MHz or 16 MHz.
VHF: Channels 6, 12 and 16.
TUGS: There is a small 100 h.p. tugboat assisting with mooring when necessary.
BERTHING: One deepwater berth at Point Cruz for containers, general cargo and Ro-Ro vessels.
STEVEDORES: At least 24 hours' notice, usually 3 gangs, indicate any extra gangs required. To facilitate quick turn around advisable have cargo in middle holds evenly distributed not at extreme end or massed in one hold only.
Working Hours: 0730 hrs. – 1200 hrs., 1300 hrs. – 1800 hrs. and 1900 hrs. – 2300 hrs.
MEDICAL: Notice should be given in advance if medical attendance required on board. Inoculations available at clinic on Fridays only. Limited hospital facilities available.

Cholera: Required if arriving from infected area. Vaccination Certificates are checked individually for those passengers permanently disembarking.

For all other passengers and the crew ship's doctor must provide a statement advising that all passengers and crew comply with the health regulations and vaccinations required.

In case some passengers have for health reasons not been vaccinated, a letter from their doctor giving reason why no vaccination given must be produced. Passengers will be allowed to go ashore.

Central Hospital, Tel: 23600.
Emergency and Ambulance, Tel: 22200.
Dental Clinic, Tel: 23600.
Private Doctors:
Dr.T. Eritara, Tel: 22790.
Dr.P. Ogatuti, Tel: 23277.
Dr.H. Posala, Tel: 22029.

TANKERS: Tanker buoys, 8 in. pipeline, max. draft 32 ft. New Wharf, 4 in. pipeline, max. draft 27 ft. 6 in. Old Wharf, 4 in. pipeline, (ADO), max. draft 13 ft. Dirty ballast facilities available.
DENSITY/TIDE: Approx. 1025. Tidal range about 3 ft.
FRESH WATER: At wharf by hoses. 40 t.p.h.
FUEL: Diesel and gas oil available. 48 hours' notice, butane gas.
FIRE PRECAUTIONS: Normal fire precautions, with gang standing by with fire pump.
CONSULS: Australia, New Zealand, Papua New Guinea, Sweden and United Kingdom.
REPAIRS: Limited facilities only.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Watchmen to be recommended. Customs provide a preventive officer for duty at a charge.
OPENING/CLOSING HATCHES: Stevedores assist crew. Crew to rig gear.
CERTIFICATES: Certificate of Registry.
CUSTOMS ALLOWANCES: 200 cigarettes or 0.5 lb. tobacco per crew member. 3 quart bottles of beer per crew member.
REPATRIATION: Facilities available.
AIRPORT: Situated approximately 10 miles from the wharf. Air Niugini have 2 flights per week from Sydney via New Guinea, and Solomon Airlines have 2 flights to Vila, 1 flight to Nandi, 1 flight to Port Moresby and 2 flights to Brisbane, each week.
TIME: GMT plus 11 hours all year round.
HOLIDAYS: Cargo work can be arranged on all holidays except Christmas Day and Easter period.
POLICE/AMBULANCE/FIRE: Emergency phone numbers: Police 22999; Ambulance 22200; Fire 20235.
SERVICES: Labour can be hired for assistance with painting and cleaning. Other services not normally available. 24 hours' notice required.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required.
VISAS: Transit passengers: not required. Disembarking passengers: require visa for a stay over 48 hours. Visa can be obtained from nearest British Consul.
LANDING CARDS: Only permanently disembarking passengers need special Landing Cards which can be obtained from Immigration Officer on arrival.
WEATHER: Cyclone season December to April, winds N.W. to variable, Force 0 – 5. From April to November winds are from N.E., Force 4 – 5.
DELAYS: Nil, except when other ships being worked.
DEVELOPMENTS: Copra Wharf, length 100 m., to be constructed.
AUTHORITY: Solomon Islands Ports Authority, P.O.Box 307, Honiara, Solomon Islands. *Tel:* 677-646. *Telex:* 66348. *Contact:* Harbour Master.

MALLOCO BAY: 07.36 S. 156.37 E.

LOCATION: The wharf is located in position Lat. 07° 35' 42" S., Long. 156° 36' 52" E. in Malloco Bay on Vella Lavella Island.
DOCUMENTS: 3 copies of all documents including "Nil" sheets of Crew Lists, Passenger Lists, Customs, Health Manifests, Bills of Lading, Ship's Particulars, Ship's Certificates.
Quarantine Boarding Officer requires the following:
List of Provision Store, both wet and dry.
Crew List.
Last Ports of call and the next Port of call.
List of disembarking passengers.
Plants and Animals List.
APPROACHES: The approach is deep, through a pass in the fringing reef. Port and starboard reefs are marked. There are no navigation lights.
PILOTAGE: Company officials provide pilotage. Boarding point is at Port of Entry, Gizo Island, Lat. 08° 06' 00" S., Long. 156° 50' 36" E. Vessels should anchor outside the fringe reef and call "Allardyce" on VHF Channel 16, or 6365 kHz.
ANCHORAGE: The anchorage is protected from all quarters and affords good holding (See Aust. Chart No. 683).

RESTRICTIONS: As no lights are available, all entries are made during daylight hours.
MAX. SIZE: LOA 115 m., max. draft 7.2 m.
HEALTH: Pratique granted on board on arrival. If any suspected or confirmed disease or fever on board notify the Health Inspector immediately on arrival. He will advise procedure. Pratique is automatic when arriving from another Solomon Islands port.
RADIO: Gizo Base 6365 kHz. Malloco Bay 6365 kHz.
VHF: See "Pilotage".
RADAR: No radar facilities.
TUGS: A small tug/line boat is available.
BERTHING: The wharf is 100 m. in length. Minimum depth at the South end is 8.0 m. and at the North end 10.0 m. Loading and discharging is by ship's gear. There are 2 loaders on the wharf.

Cargo is S.I. round logs which are exported.
CRANES: None.
BULK CARGO FACILITIES: None.
SPECIALISED CARGO FACILITIES: None.
BRIDGES: None.
STEVEDORES: The stevedores are company personnel and available immediately ship is berthed and cleared.
MEDICAL: Local clinic about 4 km. from port. Limited medical and dental facilities.
TANKERS: No facilities.
FRESH WATER: Not available.
FUEL: Not available.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No facilities.
DRY DOCKS: Not available.
SURVEYORS: Not available.
WATCHMEN: Not necessary.
HATCHES: Opening and closing by ship's crew.
CUSTOMS ALLOWANCES: 2 litres spirits, 200 cigarettes.
REPATRIATION: Not possible.
AIRPORT: Light plane strip 1 km. from port. 2 flights a week (Monday and Thursday) to Honiara.
TIME: GMT plus 11 hours.
HOLIDAYS: Christmas Day, New Year's Day, Good Friday, Easter Monday, 7th July (Independence Day), Queen's Birthday and Whit Monday in June.
POLICE/AMBULANCE/FIRE: Not available.
EMERGENCY CENTRE: Honiara.
TELEPHONES: Not available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Solomon Islands Dollar (SB$).
REGULATIONS: Normal Customs, Immigration and Health requirements.
DELAYS: Normally straight onto berth after Pilot on board.
GENERAL: Shippers' Office may be contacted on SSB 6365 kHz at 0700 hrs., 1200 hrs. and 1630 hrs. local time.

Shortland Harbour also serves as Port of Entry for Fauro Island.
DEVELOPMENTS: None planned.
AUTHORITY: Allardyce Lumber Company Limited, P.O.Box 164, Honiara, Solomon Islands. *Tel:* (677) 30133. *Telex:* HQ 66343 Alcol. *Cables:* Alcol. *FAX:* (677) 30669. *Contact:* John Beverly, General Manager. Peter Cole, Shipping Manager.

Regional Office: Allardyce Lumber Co., P.O.Box 44, Gizo, Western Province. Tel: 60074. Fax: 60075. Contact: Edward Daga, Gizo Base Manager.

Malloco Bay: Charles McPhee, Manager.

PORT NORO: 08.13 S. 157.12 E.

SHIP'S OFFICER'S REPORT: August 1991.

VESSEL: LOA 145.5 m., max. draft 6.3 m. and 10,511 g.r.t
DOCUMENTS: See "Honiara".
APPROACHES: Approach was free of any dangers and in deep water at all times. Even whilst alongside the echo-sounder showed 20.0 m. below the keel.

Sosomboeke Island was sighted at 7 miles.

Wind and sea are usually calm but rain can impair visibility.
PILOTAGE: Berthing in daylight hours only. Pilot boards in position Lat. 08° 11' S., Long. 157° 12' E. Pilot boat "Wra" has white hull with "Pilot" in blue letters on side.
VHF: Call "Noro Port" 4 hours before arrival on Channel 16. Contact was made when approximately 19 miles from Tonguivili Point.
TUGS: None.
BERTHING: *Cutter Point Quay.* Length of quay 70 m. Depth under keel when alongside was 20.0 m. Head lines and stern lines were run to bollards on the shore by a mooring boat. Vessel berthed starboard side alongside.

Port was found to be safe but gangway was lifted at night and all doors kept closed.
STEVEDORES: Foremen, winchmen, hatchmen and tallymen are only special people employed. Stevedores are picked up in the village. Ship's crew attend to all lashings.

Gangs work from 0730 hrs. – 1200 hrs., 1300 hrs. – 1730 hrs. and 1900 hrs. – 2230 hrs. No overnight gangs available.

MEDICAL: Limited hospital facilities. Two crewmen visited the doct on a Sunday.
FRESH WATER: Not available.
FUEL: Not available.
SHORE LEAVE: Permitted. No passes required.
GENERAL: Pilot is in overall charge at the port.

On completion of cargo operations in the evening shift, vessel cou not sail as Immigration Officer will not board after 2000 hrs.

Accommodation is required for 2 persons.

SHORTLAND HARBOUR: 07.04 S. 155.52 E.

Port not operational. All lumber operations moved to Malloco Bay o Vella Lavella Island.

YANDINA: 09.04 S. 159.14 E. (See Plan

The Port of Yandina lies on the Southern shore of Renard Sound whic is a deep inlet on the Eastern coast of Banika Island, part of the Russe Group of islands.

It is the headquarters of Russell Is. Plantation Estates Ltd. (RIPEL who own the wharf, shore facilities, adjoining airstrip and plantations. *Note:* The cable area marked on BA Chart No. 2975 and the remar in the Pacific Island Pilot Vol 1, page 375, line 10, does not exist. Th cable was removed some years ago.

RIPEL Managers report that in the past, vessels anchoring in th Sound itself have fouled their anchors on wartime scrap which lies o the sea bed.

The Sound is steep-to with depths of 90 m. in the centre. There is fringing coral reef along both the Northern and Southern shore line which extend further out the farther into the Sound a vessel penetrate Two small coral spits project out into the Sound for about 100 m. fro the northern shoreline, one each end of the wharf.
DOCUMENTS: If Yandina is first port of entry, the following documen are required:

2 copies Crew List (Solomon Island Forms only).
2 copies Personal Manifest.
2 copies Stores List (Solomon Island Forms only).
2 copies Passenger List ("Nil" returns required).
2 copies Unmanifested Cargo List ("Nil" returns required).
1 copy Maritime Declaration of Health.
Last Port Clearance.

APPROACHES: The Russell Island Group is sighted visually from th South at 30 miles on an approach course of 007° (T). Good reliable rad fixes are obtained at 18 miles from Alokun Island (150 ft.). This is duri the late afternoon in fine, clear weather.

Vessels can enter the group between Keogh Island and Lamon Isla during darkness with good radar representation for navigation purposes. The least depth in the channel is recorded at 270 fathoms

Entering the Russell Group from the South, one passes between Lou and Louin Islands. The Channel here is narrow, but steep to and fr from dangers. However, on this approach to Yandina, the wharf is n visible until the vessel is practically into Renard Sound and a long bla on the whistle when within sound distance, is recommended to alert li handlers, etc.

The Northern entrance is to be recommended, particularly newcomers, as the wharf can be seen much earlier and a direct approa can be made. Entering from the North, vessel passes between Lanal and Kurimarau Islands.
PILOTAGE: Not available.
HEALTH: Radio Pratique is obtained from Honiara.

Not more than 24 hours and not less than 8 hours prior to arrival health message is to be sent, and provided there are no cases infectious diseases on board, Radio Pratique will be granted. Th message should be addressed to "Port Health, Honiara" and should phrased "Request Radio Pratique Stop Negative answers to all hea questions Maritime Declaration of Health" signed Master.
RADIO: There are 3 radio telephone channels in operation at Yandi the Post Office, the Police Station and RIPEL private. H/F frequency their Honiara Office which has Telex and Fax facilities.

There is a post office which offers a telegram service.
TUGS: A mooring boat assists when berthing.
BERTHING: Entry is made between Lanalau Island and Kurima Island and then a direct course towards Renard Sound. At slow spe all the way in, no offsetting current is experienced.

The vessel is given a direct parallel approach to the wharf and ber port side alongside.

One mooring boat is used concurrently under very efficient supervis from ashore.

On occasions a current is suspected to run from North into Ren Sound as the stern tends to set towards the shore whilst berthi however it cannot be depended upon as Masters have reported current running from the South and the stern tending to set off wh berthing.

It is essential to approach at the slowest possible speed consist with keeping on track heading for the wharf. With an offshore brea by the time the vessel arrives abeam of the wharf, it often happens although the bow is in a good position, the stern has become ang out considerably. To take care of this, the officer in charge aft should have his first stern line fleeted out on the poop deck ready for quick slacking away without any kinks or holdups (which frequently result from trying to slack away quickly from a coiled rope). He should also have a second good rope already joined on with a strong lashing, because even with the launch running the stern line smartly, it is a long haul to the shore bollard and the stern may be slowly blown further out as the line is run. It is useless to wait and see if a second rope joined will be needed. The vital time lost lashing ropes together could spoil the whole manoeuvre.

The officer in charge forward should have the starboard anchor ready for letting go, whether it is intended to use it or not.

Years ago the use of an anchor off the wharf was not recommended due to possible fouling on old wartime wreckage, but sometimes the use of the anchor is essential and any subsequent fouling is a chance that has to be taken.

Berthing starboard side to is not recommended and can be hazardous. The large scale plan of Renard Sound on BA. Chart No. 2975 gives a false impression to a stranger as to its width. In fact, the average safe width of the Sound is little more than two cables (about 2 ships' lengths for "Corabank"/"Cloverbank" Class of ship). Several large vessels attempting to turn short round in the Sound to try and berth starboard side to have found themselves in difficulties due mainly to drifting steadily up the Sound (under the influence of the wind and possibly current) while backing and filling in the limited space. The deep water in the middle of the Sound (30–40 fathoms) is not very handy for using an anchor to assist in turning round, but if dropped (with plenty of chain) abeam of the wharf where the Sound is widest, it might prevent drifting up the Sound.

The line of approach to the wharf from the West (starboard side to) is not as straight as might appear from the coastline on the chart. There is shallow water and old piles extending quite a way out just Westwards of the wharf (not shown on the chart plan) and a vessel would have to come in to the wharf at a very awkward angle to avoid the reef. There appears to be no advantage at all berthing starboard side to.

BERTH: The main wharf which lies 2.5 cables Westward of Nikoria Point is of a concrete and steel construction and 53.5 m. long, with a minimum depth alongside of 6.1 m. There are 2 mooring bollards (connected to the shore) in line with the seaward face of the wharf. The Eastern bollard is 24.4 m. away and the Western one 41.2 m. away from their respective wharf ends.

To overlap the wharf too much at either end (but particularly the Eastern end) is dangerous; there is nothing to prevent the ship grounding with an on-shore wind or if anything went wrong with the moorings, and at such extreme positions, the bow and stern line leads to the mooring bollards would be impracticable.

On "Corabank"/"Cloverbank" Class vessels, only Nos. 3 and 4 hatches can be loaded with copra conveniently and possibly No. 2 (after end of hatch only) at a stretch.

A copra bulk loading system by bottom opening bins is in use at this port.

UNBERTHING: The stern can be sprung off and vessel backed out into the Sound. A light Northerly breeze blows and the vessel tends to set slightly towards the wharf, but no difficulty is experienced. However, with any strength in this breeze, sailing would be hazardous until it fell away or shifted, also it is safe to sail at night. Vessels turn to starboard when clear and leave the Group by the Northern route. All reefs show up well and the light structure on Lanalau Island is clearly seen over the trees.

If the anchor has been used for going alongside, it should be picked up first before leaving the berth, otherwise picking it up after letting go throws the ship out of the angled-off position.

MEDICAL: A trained local medical orderly gives medical attention when required. There is no doctor.

TANKERS: Mobil Wharf close West of main wharf. 2 oil tanks available (1×500 tons, 1×300 tons).

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: RIPEL possess a limited machine shop and fabrication shop capable of handling small ship repairs.

SURVEYORS: *Hold Inspection:* Compartments to be loaded are inspected by a Government Agricultural Department Inspector.

AIRPORT: Solomon Island Airways and Western Pacific Airlines run a domestic service between Yandina and Honiara.

Distance to Honiara is 65 miles.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: No Seaman's Clubs.

The Banika Club is licenced and has snooker, tennis court and swimming pool.

Churches, general stores, post office and telephone available nearby.

GENERAL:

Transport: There is no local public transport or car hire facility.

Stores: There are 2 general trading stores, one privately run and one run by a Co-operative Society. Both supply general household items including rice and tinned fish. Also there is a fisheries marketing centre where local fresh frozen fish can be purchased.

Market: Fresh vegetables and local fruits available twice a week, very cheap and very good.

Levers have their own butchery where fresh beef is obtainable at reasonable price. If requiring such meat, it is best to cable the Agent in advance, advising the quantity required.

Laundry: Not available.

Facilities: There is a small Social Club at Yandina, having tennis court, billiards and a small swimming pool. Ship's Officers are welcome.

The Club Manager is pleased to arrange a football match with local teams for those who are interested.

Charts: BA. 2975 and BA. 1469.

Weather & Currents: See Pacific Island Pilot, Volume 1.

AUTHORITY: Russell Is. Plantation Estates Ltd., P.O.Box 134, Yandina, Russell Islands, Solomon Islands. *Tel:* Yandina 677-21779. *FAX:* 677-21785. *Contact:* The Chief Engineer.

NOTES

Please also advise Shipping Guides Ltd.

Somali Democratic Republic

GENERAL:

REPORT: *Immigration Regulations:* According to new Somali Immigration Instructions, no foreigner of any sort (including seamen, supercargo or Owners' Representative) shall be allowed to enter into Somalia without a visa.

No transit visa will be allowed for seamen joining their vessels in Somali ports.

Anybody arriving at Somalia should first obtain entry or transit visa from the Somali Consulates in their respective countries.

BERBERA: 10.26 N. 45.01 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
2 Stores Lists.
2 Lists of Articles owned by Crew i.e. tobacco, wine/spirits, cameras, binoculars, wrist-watch, radio, firearms/swords etc.
1 Cargo Manifest (must be made out in accordance with original Bill of Lading issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurements in cubic metres). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance freighted; 2 copies to be sent by the ship's box.
1 Copy Non-Negotiable Bill of Lading for each Bill of Lading issued.
2 Lists Transit Cargo (total number of packages and total weight for each destination).
6 Lists of Passengers to be Disembarked.
2 Lists of Passengers In-Transit.
1 Health Document will be prepared on arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Vessels await Pilot on the Outer Roads, 5 – 10 cables S.W. of Raastamar Lighthouse. In case of stormy weather and rough seas, it is permitted to wait for Pilot on the Inner Roads.

ANCHORAGES: Outer anchorage 5 – 10 cables S.W. from Raastamar Lighthouse. Inner anchorage limited by the line between 10° 26' 16" N., 45° 00' 14" E. and between perpendiculars from the ends of this line towards Cape of Raastamar.

RESTRICTIONS: All ships should anchor in such a position that with any wind they should lie on the leading line, or Southward from it, or opposite the deep water pier.

MAX. SIZE: Draft 28 ft., length/breadth no restrictions.

HEALTH: Pratique granted after Port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali Ports subject to same procedure.

RADIO: Cable Agents giving ETA, draft, length and cargo via port radio station – 6OY call and reply in the frequency 500 kHz, working 450 kHz. Working hours from 0700 to 1700 hrs. local time. Traffic list 3 times a day at 0800, 1200 and 1600 hrs.

TUGS: Use ship's lines. There is one tug of 1,200 h.p. and one of 700 h.p. to assist vessels in berthing and unberthing.

BERTHING: Depth at pier 28 ft., length of pier 700 m. Ro/Ro facilities available.

Transhipment of cargo is allowed with exemption of Harbour Tax and Warehouse Dues. Only handling charges are levied according to port tariff.

STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent to order gangs. No shore facilities, all cargo to be loaded and unloaded with ship's gear.
Working Hours: Normally 0700-1400 hrs., but loading to and discharging from vessel is performed day and night.

MEDICAL: General hospital facilities available, but specialised treatment and surgery is not. Yellow fever and cholera vaccination certificates inspected on arrival.

TANKERS: Discharge at mooring buoys with connecting hoses of American and British standards.

DENSITY: Salt water at all times.

FRESH WATER: Available alongside quay through hoses. Rate 15/20 t.p.h.

FUEL: Not available.

CONSULS: None.

REPAIRS: Port Management own a well-equipped workshop where minor repairs for ships can be carried out.

GANGWAY/DECK WATCHMEN: Gangway watchmen services carried out by Customs Police, food on vessel's account. Ships are also supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel do so. Crew may close hatches prior to sailing.

CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: See "Mogadiscio".

TELEPHONES: No possibility for placing telephones on board.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Crew to carry Passport or Seamen's Book whilst ashore.

REGULATIONS: Livestock vessels are given priority.

GENERAL: Vessels should not dispose of any waste into harbour or o to quays, lower lifeboats or use radio station without prior permission.

DEVELOPMENTS: The present two berths have been extended by a further two berths.

SHIPMASTER'S REPORT: June 1981.
References: Guide to Port Entry, British Admiralty Chart BA 3530 Red Sea and Gulf of Aden Pilot. (NP64) 12th Edition 1980.
Documents:
2 Crew Lists.
2 Stores Lists.
2 Lists Personal Effects.
Cargo Manifest.
Copy Non-Negotiable Bill of Lading for each consignee.
2 Lists of Transit Cargo.
2 Passenger Lists. "Nil" declaration required.
1 Health Document filled in on berthing on special local form.
1 Copy Arrival Report on special local form.
1 Copy Ship's Record and Master's Report on special local form.

Pilotage: Two Somali Pilots available. Pilot boards at Outer Anchorage from tug "Saaxil" which has black hull, white upperworks, funne markings: blue funnel with white star. Tug has VHF Channel 16. Pilo can also be contacted via Somali Shipping Agency on VHF Channel 16 call sign "Somship Berbera". Agents can usually only be contacted from 0900 – 1200 hrs. and 1600 – 1800 hrs.
Anchorage: Good anchorage obtained in Outer Anchorage shown on BA 3530. Somali Harbour Regulations forbid anchoring in such a way as to obscure leading and other lights.
Radio: Normal 72, 48 and 24 hour notice to Agents via Aden Radio Berbera Radio (6OY) not heard.
Fresh Water: Only supplied alongside at Commercial Wharf. No water barge available and tug "Saaxil" unable to deliver water at Oil Berth or Anchorages.
Tugs: One tug "Saaxil", 1,100 b.h.p., fitted with VHF Channel 16. No tug lines, all ship's lines.
Gangway/Deck Watchmen: Two watchmen are compulsory under Somali Harbour Regulations. Ship has to provide food and accommodation. Charges for watchmen:
45 Somali shillings for 12 hours (daytime).
55 Somali shillings for 12 hours (night time).
Fridays 50% additional and 26th June 50% additional. 1st July and other public holidays 100% additional.
Customs Allowances: 200 cigarettes or 0.5 lb. tobacco or 0.5 lb. cigars 1 bottle of spirits.
Airport: The landing ground shown adjacent to the Oil Tank Farm on BA Chart 3530 has now been taken over for extension of the tank farm and is no longer in use.

A new military airfield is situated 2 miles S.W. by W. from the old landing ground.

All commercial flights are from Hargeisa, 160 km. S.W. of Berbera with 3 flights weekly to Mogadiscio.
Time: GMT plus 3 hours all year round.
Agency: Somali Shipping Agency. Tel: Berbera 142. Cables: Somship Berbera. No telex facilities available and all cables have to be sent to Somali Shipping Agency, Mogadiscio, for transmission out of Somalia.

Somali Shipping are the only Agency allowed in Berbera, being a Government Agency.
Berthing: Superceded by later "Reports".
Fuel: None available.
Repairs: Minor repairs can be carried out but nothing that could not be carried out by ship's staff.
Weather: During the ship's stay at Berbera the "Kharif" blew as follows
0000 hrs., S.W., Force 3.
0400 hrs., S.W. by S., Force 6.
0800 hrs., S.W., Force 6 to 8.
1200 hrs., S.W., Force 5.
1600 hrs., S.W. by S., Force 3.
2000 hrs., Calm.

SHIPMASTER'S REPORT: June 1983.
Restrictions: All navigational lights are extinguished.
Pilotage: Only during daytime. Departure at night can be discussed with the Pilot.
Radio/VHF: Coastal radio station is out of order and will not be repaired No VHF port radio station but sometimes Pilot or Agent will call using VHF from vessel in port.
Medical: Cholera and yellow fever vaccinations are inspected on arrival
Tankers: Max. draft for tankers is 35 ft. and berthing will be effected with 2 anchors forward and 6 ropes to the mooring buoys, i.e. 2 stern rope and 1 breast rope on each side. Distance from stern to jetty about 20 m – stern discharge. Tankers up to 24 ft. – 25 ft. draft can berth betwee the buoys and use their manifold. In both cases a 6 in. shore hose i hauled up to the ship's connection, max. back pressure allowed is 3 ba and discharge rate of white products about 250 cu.m./hour. After each grade, water has to be pumped to clear the shoreline. Position of jetty Lat. 10° 26.18' N., Long. 45° 00.8' E., and a steel constructio framework pier runs from this position in direction 146° to the shor Loading arms at pier are in state of deterioration. When berthing sounding by hand is advisable and have tidal heights available.

SHIPMASTER'S REPORT: January 1986.

Details concerning lights, berths and buoys considerably different from Admiralty charts. No information forthcoming from Port Authori concerning changes, so positions and distances only approximate an obtained by radar. 4 light buoys laid on approaches to Berbera harbo limits, as these buoys not laid by the Port Authority there is no guarant that they will be maintained, either lit or in position.

R.W. Fairway Buoy, unlit, 306°×0.88 miles from Raastamar Light.

R. buoy Fl.R., approx. 4 secs., 208°×0.25 miles from Raastamar Light.

R. buoy Fl.G., approx. (3) 10 secs., 262.5°×0.58 miles from Raastamar Light.

R. buoy Fl.G., characteristics and position not ascertained, but is South of leading lights and Eastwards of outer anchorage.

2 mooring buoys in inner anchorage, 102°×0.64 miles and 115°×0.5 miles from Raastamar Light. Wreck in inner harbour now has quick flashing red light on the top of its funnel. Leading lights into the harbour are now flashing white lights. Mooring buoys around the end of the tanker terminal appear as shown on the Admiralty chart.

In the tank farm new white tanks, for United States' forces, stand out very well, their position not ascertained, but they have been built at the Western end of the tank farm. Tank farm now very well illuminated, lights show very well out to sea. These lights far better than town lights on night approach, town lights very often shut off in evenings. Raastamar Light was sighted at a distance of 15 miles, but Pilots state that it is still only 6 mile light.

Main quay has been extended Westwards, on same line as old quay, by approximately 180 m. New section well fendered with heavy rubber sections on chains. Old section of quay, the facing is badly damaged throughout most of its length, ships will require fenders to keep well off it. No sheds built on new section, but small compound for U.S. Forces use in S.W. corner. A concrete Ro/Ro ramp built at extreme Western of new quay, for vessels to berth with 2 anchors out, ramp steel-faced and steeply angled. Only livestock seen using this ramp. An additional causeway has been built out to the new section, but not seen in use and kept locked up. Shaab Quay still in use, but only for dhows and small local coasters.

During period spent in Berbera (15 days), all ships were kept at outer anchorage until required, inner anchorage not used at all. Only vessels to come to port during this time were livestock carriers, loading sheep, goats and camels for Jeddah; and one passenger/cargo ship from Jeddah.

Winds consistently freshened every afternoon from Northeasterly direction, up to Beaufort Force 6 at times and then dying away to a flat calm by midnight. Harbour very sheltered from this direction and slight sea caused no problems.

Shore watchmen compulsory, and if pilferable cargo on board, it is possible vessel will have armed Customs/Port Police as well. Vessel to supply all with meals and sleeping place if possible.

Garbage collection compulsory, but vessel does not have to accept this every day, can specify whether periodic collection required.

Fresh water appeared of satisfactory quality, no apparent restriction on quantity.

No laundry facility available.

Chandler available, but expensive and did not appear interested in supplying small quantities.

Communications very poor externally, no telex available at Agents. All overseas telephone calls routed via Mogadiscio, this line unreliable.

American base at airfield has telex and satellite telephone, but use of these facilities expensive and not always available. However, it is possible to get permission to use the ship's radio equipment for communications, though when vessel first arrived the authorities were intending to seal radio equipment.

Local maritime station out of order.

Crew have to hand Passports/Discharge Book/I.D. card in at gate when going ashore. No pass issued or receipt given. No known curfew, but police very nervous after dark and gate should be approached with caution, as police are armed, so that crew member can be identified.

On approaching port, vessel called continuously on Channel 16 from 0530 hrs. local time onwards, but got no reply, so vessel anchored in outer anchorage. Berbera Port came on the air at 0900 hrs. local time, no reply from Pilots at all, though they assured me that they operated from about 0700 hrs. to dusk. Vessels should be careful when approaching outer anchorage in darkness as ships may be encountered at anchor without lights. One Ro/Ro ship is alleged to have been there, abandoned, for at least a year; there only being a shore watchman onboard. Vessel cleared by Authorities whilst at anchor, quarantine doctor wanted to see that all crew members had current yellow fever and cholera certificates. Customs sealed bond by glueing piece of paper over door. Radio was supposed to have been sealed, but because no separate radio room they decided not to do so. Application in writing through Agents for water, engine trials, boat in water, painting from quay, etc.

No photography in port area and this included onboard vessel, but despite this did not find that anyone stopped crew members taking photos of livestock being loaded on other vesssels.

2 small tugs in harbour, but only one seen in use. This takes Pilot out to incoming vessels, Pilot informed that this tug, the oldest one, is only suitable for pushing and not towing. Pilot does not necessarily take vessel out at night, gave instructions for departure and then acted as boatman for letting go vessel.

Nearby airfield has civilian flights every 2 days linking Berbera with Mogadiscio and Jeddah, but it wasn't clear whether seats could be obtained for these flights or whether passengers had to travel to Hargeisa to fly, about 2 hours drive. From there flights go to Mogadiscio and Djibouti. However, I imagine repatriation from this area to be a lengthy and tedious business only to be attempted in an emergency.

SHIPMASTER'S REPORT: August 1994.
